3. Submit this application form with the erosion control site diagram as part of the full building permit application.

Applicant Information:

Name: _____

Phone Number: _____

Email: _____

Location:

Project Address: _____

Lot Number: _____

Erosion Control Plan Required Information:

- ☐ Label North arrow
- ☐ Identify plan scale
- ☐ Identify lot lines and site boundaries including adjacent streets
- ☐ Locate any storm sewer inlets
- ☐ Locate any existing and proposed buildings or paved areas
- ☐ Show gravel access drive location
- ☐ Show location and type of sediment fences (filter fabric fence, straw bale fence) or vegetative strips that will prevent eroded soil from leaving the site.
- ☐ Locate sediment barriers around any on-site storm sewer inlets.

I hereby certify that I understand the construction site erosion control provisions of the Wisconsin Uniform Dwelling Code (SPS 321.125), and that I accept responsibility for carrying out the above erosion control plan and management strategies as determined by actual field conditions, and failure to comply with the code or failure to clean up construction or storm tracking can result in citations or prosecution.
