9 PART 3 – EXECUTION – THIS SECTION NOT USED 1

10
11 **PART 1 – GENERAL**

12
13 **1.1. SUMMARY**

- 14 A. Each project has varying requirements for permits, inspections, and fees based on the scope, size, and location of
15 the project.
16 B. The City of Madison (Owner) is subject to all permits, inspections and associated fees for construction,
17 demolition, utility connection, storm water management, and other similar requirements that may be required
18 to complete the scope of work associated with these contract documents.
19 C. The General Contractor (GC) shall be responsible for obtaining all permits, inspections and paying for all
20 associated fees unless specifically identified within this specification.
21

22 **1.2. REFERENCES**

- 23 A. The following references are not intended to be all inclusive. It shall be the GC’s responsibility to determine all
24 requirements based on the scope of work in the contract documents.
25 B. City of Madison Ordinances: Review all ordinances that may require a permit or fee that may be connected with
26 a required permit. Contact the following City Agencies to determine the exact requirements during bidding
27 1. Building Inspection
28 2. Zoning
29 3. Engineering
30 4. Water Utility
31 5. Traffic Engineering
32 6. Others as may be specified by the contract documents.
33 B. State Statutes
34 C. Other Regulatory Regulations
35 D. Other Agencies or companies that may have related requirements
36 1. Madison Metropolitan Sewerage District
37 2. Local gas and electric utility companies
38 3. Other utility companies
39

40 **1.3. GENERAL CONTRACTORS REQUIREMENTS**

- 41 A. The GC shall be responsible for all of the following:
42 1. Execute application for all required permits as may be required by the scope of work described within the
43 contract documents.
44 2. Paying all fees associated with the application of any required permits.
45 3. Scheduling all required inspections that may be conditions of any required permits.
46 B. The GC shall provide high quality scanned images of all required permits and inspections and upload them to the
47 Contract Documents-Regulatory Documents Library on the Project Management Web Site.
48

PRODUCT SUBSTITUTION PROCEDURES

1
2
3
4 PART 1 – GENERAL 1
5 1.1. SUMMARY 1
6 1.2. RELATED SPECIFICATIONS 1
7 PART 2 – PRODUCTS..... 1
8 2.1. SUBSTITUTION REQUEST FORM..... 1
9 PART 3 - EXECUTION 1
10 3.1. REQUESTING A SUBSTITUTION DURING BIDDING..... 1
11 3.2. REQUESTING A SUBSTITUTION AFTER AWARD OF CONTRACT 2
12 3.3. UNAUTHORIZED SUBSTITUTIONS..... 2
13

PART 1 – GENERAL

1.1. SUMMARY

- 17 A. The City of Madison uses a specific list of preferred products for various specification items to establish
18 standards of quality, utility, and appearance required.
19 B. The City of Madison will not allow substitutions for specified Products except as follows:
20 1. The Product is no longer produced or the product manufacturer is no longer in business.
21 2. The manufacturer has significantly changed performance data, product dimensions, or other such design
22 criteria for the specified Product(s).
23 3. Products specified by naming one or more Products or manufacturer’s and “or approved equal” or
24 “approved equivalent.”
25 C. The City of Madison will not allow substitutions for specified Products as follows:
26 1. For Products specified by naming only one Product and manufacturer, no substitute product will be
27 considered.
28 2. For Products specified by naming several Products or manufacturers select any one of the products or
29 manufacturers named, which complies with the specifications. No substitute product will be considered.
30 D. Request for substitutions from any party other than the General Contractor (GC) will not be accepted.
31

1.2. RELATED SPECIFICATIONS

- 33 A. Section 01 26 13 Request for Information (RFI)
34 B. Section 01 31 23 Project Management Web Site
35 C. Section 01 33 23 Submittals
36

PART 2 – PRODUCTS

2.1. SUBSTITUTION REQUEST FORM

- 40 A. During bidding all contractors (General and Sub-contractors) and suppliers of materials or products shall provide
41 hard copy of the Substitution Request form and all required attachments directly to the Project Architect.
42 Submission shall use the form located at the end of this specification.
43 1. Contractors and suppliers shall use the screen shot of the form located at the end of this specification to
44 print a hard copy for all pre-bid substitution requests.
45 B. After bidding only the GC shall submit a request and shall use the form located on the Project Management Web
46 Site.
47

PART 3 - EXECUTION

3.1. REQUESTING A SUBSTITUTION DURING BIDDING

- 50 A. In the event that a substitution is requested during the bidding phase the Contractor or Supplier shall meet the
51 substitution request deadline listed in the bidding documents. No substitution request will be considered during
52 the bidding period after the stated substitution request deadline. In general this procedure shall be as follows:
53 1. Submit the Substitution Request Form including all required supporting documentation to the City
54 Project Manager and Project Architect by the substitution request deadline specified in Section A of the
55 Contract Documents. Utilize the Substitution Request Form found at the end of this Section.
56 2. Submit a Substitution Request Form for each product, supported with complete data, drawings and
57 samples as appropriate, including:
58

- 1 i. Comparison of qualities of the proposed substitutions with that specified.
- 2 ii. Changes required in other elements of the Work because of the substitution.
- 3 iii. Effect on the construction schedule.
- 4 iv. Cost data comparing the proposed substitution with the Product specified.
- 5 v. Any required license fees or royalties.
- 6 vi. Availability of maintenance service and source of replacement materials.
- 7 3. The Owner and Architect will review the Substitution Request Form and if approved the City of Madison
- 8 will publish a bidding addendum authorizing the replacement. The Owner and Architect may reject any
- 9 substitution request without providing specific reasons.
- 10 B. Substitutions submitted and approved during the bidding phase shall be announced by the City of Madison by
- 11 addenda prior to the bid due date.
- 12

13 **3.2. REQUESTING A SUBSTITUTION AFTER AWARD OF CONTRACT**

- 14 A. A substitution request will only be considered after award of contract if it meets the qualifying provisions as
- 15 described in 1.1.B.1 and .2 above.
- 16 B. The GC shall submit a substitution request using the digital form on the Project Management Web Site located in
- 17 the Construction Administration-Substitution Request library.
- 18 1. Click on *Add document* to open a new digital form, fill out form, provide required attachments, then click
- 19 the Submit button.
- 20 2. Consulting Staff, Owner and Owners Representatives will review the request and provide the appropriate
- 21 approvals and feed back to the GC.
- 22

23 **3.3. UNAUTHORIZED SUBSTITUTIONS**

- 24 A. Any Contractor who substitutes products without proper authorization by the Owner and Architect will be
- 25 required to immediately remove and replace the product and all costs required to conform to the Contract
- 26 Documents shall be borne by the General Prime Contractor.
- 27
- 28

Insert item

- Attached data includes product description, specifications, drawings, photographs, performance and test data adequate for evaluation of the request; applicable portions of the data are clearly identified.
- Attached data also includes a description of changes to the Contract Documents that the proposed substitution will require for its proper installation.

The undersigned General Contractor representative certifies that the following paragraphs are correct.

1. The function, appearance, and quality of the proposed substitution are equal or superior to the specified item.
2. The proposed substitution does not affect dimensions shown on drawings.
3. The undersigned will pay for changes to the building design, including engineering design, detailing, and construction costs caused by the request.
4. The proposed substitution will have no adverse affect on other trades, the construction schedule, or specified warranty requirements.
5. Maintenance and service parts will be locally available for the proposed substitution. Provide supporting documentation.

2
3
4 PART 1 – GENERAL 1
5 1.1. SUMMARY 1
6 1.2. RELATED SPECIFICATIONS 1
7 1.3. PERFORMANCE REQUIREMENTS..... 1
8 1.4. QUALITY ASSURANCE 1
9 PART 2 – PRODUCTS..... 1
10 2.1. REQUEST FOR INFORMATION FORM 1
11 PART 3 - EXECUTION 1
12 3.1. CONTRACTOR INITIATED RFI 2
13 3.3. RFI RESPONSES 2
14 3.4. COMMENCEMENT OF WORK RELATED TO AN RFI 2
15

PART 1 – GENERAL

1.1. SUMMARY

- 19 A. Contractors shall use the RFI form/process to request additional information or clarification regarding the
20 construction documents.
21 B. All RFI documentation will be processed through the through the Construction Administration-Request for
22 Information Library on the Project Management Web Site (PMWS).
23

1.2. RELATED SPECIFICATIONS

- 24 A. Section 01 26 46 Construction Bulletin (CB)
25 B. Section 01 26 57 Change Order Request (COR)
26 C. Section 01 26 63 Change Order (CO)
27 D. Section 01 31 23 Project Management Web Site (PMWS)
28 E. Section 01 91 00 Commissioning
29
30

1.3. PERFORMANCE REQUIREMENTS

- 31 A. RFI issues initiated by any contractor shall be done through the General Contractor (GC).
32 1. RFIs submitted by any Sub-contractor under the GCs control shall be returned with no response.
33 B. Submit a new RFI for each issue. Only multiple questions that are of a similar nature may be combined into one
34 RFI shall be allowed and responded to.
35
36

1.4. QUALITY ASSURANCE

- 37 A. The GC shall be responsible for all of the following:
38 1. Ensure that any request for additional information is valid and the information being requested is not
39 addressed in the construction documents.
40 2. Ensure that all requests are clearly stated and the RFI form is completely filled out.
41 3. Ensure that all Work associated an RFI response is carried out as intended.
42 B. The PA shall be responsible for the following:
43 1. Ensure that all responses to contractor initiated RFIs are properly responded to in a timely fashion.
44 a. The CPM, Owner, consulting staff, and other City staff shall be responsible for the initial review of
45 the RFI. The PA shall be responsible for codifying all consultant and Owner/City staff comments
46 into a unified RFI response.
47
48

PART 2 – PRODUCTS

2.1. REQUEST FOR INFORMATION FORM

- 49
50
51 A. The RFI form is located on the Project Management Web Site. The GC, PA, or CPM as appropriate shall click the
52 link in the left margin of the project web site opening a new form. Project information is pre-loaded, provide
53 additional information as indicated below in the execution to complete the form.
54
55

PART 3 - EXECUTION

1 **3.1. CONTRACTOR INITIATED RFI**

- 2 A. Immediately on discovery of the need for additional information or interpretation of the Contract Documents
3 any contractor may initiate an RFI for additional information or clarification through the GC.
4 B. The GC shall select the "Submit an RFI" link on the Project Management Web Site and completely fill out the
5 form as follows:
6 1. Contract related information will be automatically populated on the form.
7 2. Thoroughly explain the issue at hand, provide backup information (photographs, sketches, drawings,
8 data, etc) as necessary, and clearly state the question or problem that requires a resolution. Combine
9 like or related issues but do not include multiple issues on one form.
10 a. Example. If a duct interferes with other critical piping and electrical work include all issues into
11 one RFI.
12 b. Example. If you have a question regarding the chiller and another regarding toilet partitions
13 create separate RFIs.
14 3. Check all relevant boxes for trades affected. This will assist the design team in determining who should
15 be reviewing the RFI.
16 C. Upon completing the RFI click the "Submit" button. The PMWS software will automatically route the RFI to the
17 appropriate reviewers.
18

19 **3.3. RFI RESPONSES**

- 20 A. Responses to simple RFI issues shall use the response section of the RFI form and shall be completed within five
21 (5) working days of the RFI form being submitted.
22 B. Responses to more complex issues may require additional time or may require a Construction Bulletin to be
23 published. The initial RFI shall be responded to within five (5) working days stating that the RFI is being
24 reviewed and provide an estimated date for the response.
25 C. The following GC generated RFIs will be returned without action:
26 1. Requests for approval of submittals
27 2. Requests for approval of substitutions
28 3. Requests for approval of Contractor's means and methods.
29 4. Requests for coordination information already indicated in the Contract Documents.
30 5. Requests for adjustments in the Contract Time or the Contract Sum.
31 6. Requests for interpretation of A/E's actions on submittals.
32 7. Incomplete RFI or inaccurately prepared RFI.
33

34 **3.4. COMMENCEMENT OF WORK RELATED TO AN RFI**

- 35 A. The GC shall only proceed with the Work of an RFI when additional information is not required.
36 B. The GC shall not proceed with any Work associated with an RFI while it is under review.
37 C. The GC shall not proceed with any Work associated with an RFI that clearly states a CB will be issued in response
38 to the RFI.
39 D. The GC will be required to immediately remove and replace unauthorized Work and all costs required to
40 conform to the Contract Documents shall be borne by the GC.

12 3.1. WRITING THE CONSTRUCTION BULLETIN 2
13 3.2. EXECUTING THE CONSTRUCTION BULLETIN..... 2
14

PART 1 – GENERAL

1.1. SUMMARY

- 18 A. Construction Bulletins (CB) are formal published construction documents that modify the original contract bid
19 documents after construction has commenced. CBs may be published for many reasons, including but not
20 limited to the following:
21 1. Clarification of existing construction documents including specifications, plans, and details
22 2. Change in product or equipment
23 3. A response to a Request for Information
24 4. Change in scope of the contract as either an add or a deduct of work
25 B. CBs provide a higher degree of detail in response to a Request for Information (RFI) through directives, revised
26 plans/details, and specifications as necessary.
27 C. The CB may change the original contract documents through additions or deletions to the Work.
28 D. Where the directives of a CB are significant enough to warrant a Change Order Request (COR) the GC shall use all
29 information provided in the CB to assemble all required back-up documentation for additions and deletions of
30 materials, labor and other related contract costs for the COR.
31 E. All CB documentation will be processed through the Construction Administration-Construction Bulletin Library
32 on the Project Management Web Site (PMWS).
33

1.2. RELATED SPECIFICATIONS

- 34 A. Section 01 26 13 Request for Information (RFI)
35 B. Section 01 26 57 Change Order Request (COR)
36 C. Section 01 26 63 Change Order (CO)
37 D. Section 01 31 23 Project Management Web Site
38 E. Section 01 91 00 Commissioning
39
40

1.3. PERFORMANCE REQUIREMENTS

- 41 A. Project Architect (PA): The PA shall be the only person authorized to publish a CB as needed for any reason
42 indicated in section 1.1.A above. The PA shall consult as necessary with any of the following while drafting the
43 CB and shall confirm final direction with the CPM prior to issuing a CB:
44 1. City Project manager (CPM)
45 2. Owner
46 3. Members of the consulting staff
47 4. Members of city staff
48 5. The General Contractor
49 6. Sub-contractors
50 7. Commissioning Agent (CxA)
51 B. General Contractor: The GC shall be responsible for the following as needed:
52 1. Executing the directives of the CB when he/she believes that no changes in labor, materials, equipment,
53 or contract duration will be required for additions or deletions.
54 2. Submit a COR when he/she believes that a change in labor, materials, equipment or contract duration
55 will be required for additions or deletions.
56
57

1 **1.4. QUALITY ASSURANCE**

- 2 A. The PA shall be responsible for ensuring the final CB sufficiently provides direction, details, specifications and
3 other information as necessary for the GC to perform the intended Work.
4 B. The PA shall be responsible for ensuring the final CB is published as expeditiously as practical based on the
5 complexity of the CB being written. CBs that may affect the GC critical path shall be given priority.
6

7 **PART 2 – PRODUCTS**

8
9 **2.1. CONSTRUCTION BULLETIN FORM**

- 10 A. The CB form is located on the Project Management Web Site. The PA shall click the link in the left margin of the
11 project web site opening a new form. Project information is pre-loaded, the PA only needs to enter information
12 and make attachments as needed to complete the form.
13

14 **PART 3 - EXECUTION**

15
16 **3.1. WRITING THE CONSTRUCTION BULLETIN**

- 17 A. The PA shall draft a CB as needed using the Construction Bulletin form on the Project Management Web Site.
18 1. The PA and/or consulting staff as necessary shall provide specifications, model numbers and performance
19 data, details and other such information necessary to clearly state the intentions of the CB.
20 2. The consulting staff, CPM, Owner, CxA and other City Staff shall review the draft and recommend
21 changes as needed.
22 3. The PA shall amend the draft as necessary into a final CB for review
23 B. Once the final CB has been approved the PA shall “Submit” the CB through the Project Management Web Site to
24 the GC.
25

26 **3.2. EXECUTING THE CONSTRUCTION BULLETIN**

- 27 A. The GC shall acknowledge receipt of the CB on the Project Management Web Site as instructed in the Tutorial
28 Manual provided to the awarded contractor.
29 B. The GC shall notify all Sub-contractors of the CB and publish the CB to all field sets of drawings and specifications
30 as appropriate.
31 C. The GC shall execute the directives of the CB or submit COR documentation as necessary during the execution
32 and implementation of the CB.
33 1. See Specification 01 26 57 Change Order Request (COR)
34

17 3.3. CHANGE ORDER REQUEST REVIEW, APPROVAL, AND PROCESSING 5
18 3.4. EMERGENCY CHANGE ORDER REQUEST 5

19
20 **PART 1 – GENERAL**

21
22 **1.1. SUMMARY**

- 23 A. Except in cases of emergency, no changes in the Work required by the Contract Documents may be made
24 by the General Contractor (GC) without having prior approval of the City Engineer or his representative.
25 B. The City may at any time, without invalidating the Contract and without Notice to Sureties, order changes in
26 the Work by written Change Order (CO). Such changes may include additions and/or deletions.
27 C. Where the City desires to make changes in the Work through use of written Change Order Request (COR), the
28 following procedures apply:
29 1. If requested by the City, the GC shall prepare and submit a detailed proposal, including all cost and time
30 adjustments to which the GC believes it will be entitled if the change proposed is incorporated into the
31 Contract. The City shall be under no legal obligation to issue a Change Order for such proposal.
32 2. The parties shall attempt in good faith to reach agreement on the adjustments needed to the Contract to
33 properly incorporate the proposed change(s) into the Work. In the event that the parties agree on such
34 adjustments, the City may issue a Change Order and incorporate such changes and agreed to
35 adjustments, if any.
36 3. In some instances, it may be necessary for the City to authorize Work or direct changes in Work for which
37 no final and binding agreement has been reached and for which unit prices are not applicable. In such
38 cases the following shall apply.
39 a. Upon written request by the City, the GC shall perform proposed Work
40 b. The cost of such change may be determined in accordance with this specification.
41 c. In the event agreement cannot be accomplished as contemplated herein, the City may authorize
42 the Work to be performed by City forces or to hire others to complete the Work. Such action on
43 the part of the City shall not be the basis of a claim by the GC for failure to allow it to perform the
44 changed Work.
45 D. Where changes in the Work are made by the City through use of a force account basis, the GC shall as soon as
46 practicable, and in no case later than ten (10) working days from the receipt of such order, unless another time
47 period has been agreed to by both parties, give the City written Notice, stating:
48 1. The date, circumstances and source of the extra work; and,
49 2. The cost of performing extra work described by such Order, if any; and,
50 3. Effect of the order on the required completion date of the Project, if any.
51 E. The giving of each Notice by the GC as prescribed by this specification, shall be a requirement to liability of the
52 City for payment of any additional costs incurred by the GC in implementing changes in the Work. Under this
53 specification, no order or statement of the City shall be treated as a Change Order, or shall entitle the GC to an
54 equitable adjustment of the terms of this Contract or damages for costs incurred by the GC on any activity for
55 which the Notice was not given.
56 F. In the event Work is required due to an emergency as described in this specification the GC must request an
57 equitable adjustment as soon as practicable, and in no case later than ten (10) working days of the
58 commencement of such emergency.

- 1 G. All GC requests for equitable adjustment shall be submitted to the CPM per the specifications below. Such
2 requests shall set forth with specificity the amount of and reason(s) for the proposed adjustment and shall be
3 accompanied by supporting information and documents.
4 H. No adjustment of any kind shall be made to this Contract, if asserted by the GC for the first time, after the date
5 of final payment.
6 I. This specification shall be used by the GC when preparing documentation for any COR to ensure each has been
7 properly and completely filled out as required by the City of Madison.
8 J. All COR documentation will be processed through the Construction Administration-Change Order Request
9 Library on the Project Management Web Site (PMWS).

10
11 **1.2. RELATED SPECIFICATION SECTIONS**

- 12 A. Section 01 26 13 Request for Information (RFI)
13 B. Section 01 26 46 Construction Bulletins (CB)
14 C. Section 01 26 63 Change Order (CO)
15 D. Section 01 31 23 Project Management Web Site
16 E. Section 01 91 00 Commissioning
17 F. Parts of this specification will reference articles within "The City of Madison Standard Specifications for Public
18 Works Construction".
19 1. Use the following link to access the Standard Specifications web page:
20 <http://www.cityofmadison.com/business/pw/specs.cfm>
21 a. Click on the "Part" chapter identified in the specification text. For example if the specification
22 says "Refer to City of Madison Standard Specification 210.2" click the link for Part II, the Part II
23 PDF will open.
24 b. Scroll through the index of Part II for specification 210.2 and click the text link which will take you
25 to the referenced text.
26

27 **1.3. DEFINITIONS AND STANDARDS**

- 28 A. LABOR: The amount of time and cost associated with the performance of human effort for a defined scope of
29 Work. Labor is further defined as follows:
30 1. Labor rate is the total hourly rate which includes the basic rate of pay, fringe benefits plus each
31 company's cost of required insurance, also referred to as a reimbursable labor rate.
32 2. Unit labor is the labor hours anticipated to install the corresponding unit of material.
33 3. Labor cost is the labor hours multiplied by the hourly labor rates.
34 B. MATERIAL: Actual material cost is the amount paid, or to be paid, by the GC for materials, supplies and
35 equipment entering permanently into the Work, including cost of transportation and applicable taxes. The cost
36 shall not exceed the usual and customary cost for such items available in the geographical area of the project
37 C. LARGE TOOLS AND MAJOR EQUIPMENT: Large tools and major equipment are those with an initial cost greater
38 than \$1,500, whether from the GC or other sources.
39 1. Tool and equipment use and time allowed is only for extra work associated with change orders.
40 a. Rental Rate is the machine cost associated with operating a piece of equipment for a defined
41 length of time (hour, day, week, or month) and shall not exceed the usual and customary amount
42 for such items available in the geographical area of the project.
43 b. Rental cost is the rental rate multiplied by the anticipated duration the equipment shall be
44 required.
45 2. The GC shall provide a breakdown of all rental rates to indicate what items and costs are associated with
46 the rate. Examples of items to include in the breakdown would be fuel consumption, lubrication,
47 maintenance and other similar expenses but not including profit and overhead.
48 3. When large tools and equipment needed for Change Order work are not already at the job site, the
49 actual cost to get the item there is also reimbursable.
50 D. BOND COST: The cost shall be calculated at 1% of the total proposed change order.
51 E. SUB-CONTRACTOR COSTS: Sub-contractor costs are for those labor, material, and equipment costs required by
52 subcontracted specialties to complete the Change Order work including allowable markups as outlined within
53 this specification.
54 F. OVERHEAD AND PROFIT Markup: The allowable markup percentage to a COR by the GC and Sub-contractors for
55 overhead and profit. All of the following are expenses associated with overhead and profit and shall not be
56 reimbursable as individual items on any COR:
57 1. CHANGE ORDER PREPARATION: All costs associated with the preparing and processing of the change
58 order.

- 1 2. DESIGN, ESTIMATING, AND SUPERVISION: All such efforts, unless specifically requested by Owner as
- 2 additional Work to be documented as a COR or portion thereof.
- 3 3. INSTALLATION LAYOUT: The layout required for the installation of material and equipment, and the
- 4 installation design, is the responsibility of the GC.
- 5 4. SMALL TOOLS AND SUPPLIES: The cost of small hand tools with an initial cost of \$1,500 or less, along
- 6 with consumable supplies and expendable items such as drill bits, saw blades, gasoline, lubricating or
- 7 cutting oil, and similar items.
- 8 5. GENERAL EXPENSE: The general expense, which is those items that are a specific job cost not associated
- 9 with direct labor and material such as job trailers, foreman truck, and similar items.
- 10 6. RECORD DRAWINGS: The preparation of record or as-built drawings.
- 11 7. OTHER COSTS: Any miscellaneous cost not directly assessable to the execution of the Change Order
- 12 including but not limited to the following:
- 13 a. All association dues, assessments, and similar items.
- 14 b. All education, training, and similar items.
- 15 c. All drafting and/or engineering, unless specifically requested by Owner as additional Work to be
- 16 documented as a Change Order proposal or portion thereof.
- 17 d. All other items including but not limited to review, coordination, estimating and expediting, field
- 18 and office supervision, administrative work, etc.
- 19 G. Contract Extension: The necessary amount of time to be added to the contract deadlines for the completion of a
- 20 change order.

21
22 **1.4. CONTRACT EXTENSION**

- 23 A. The GC shall not assume that every COR will require a Contract Extension. If the GC feels a contract extension is
- 24 warranted he/she shall provide sufficient scheduling information that shows how the COR being requested
- 25 impacts the critical path of the project.
- 26 B. The City of Madison strongly encourages the GC to explore alternative methods and practices prior to submitting
- 27 a COR with a request for contract extension.

28
29 **1.5. OVERHEAD AND PROFIT MARKUP**

- 30 A. Pursuant to the City of Madison Standard Specifications for Public Works Construction, Section 104.7, Extra
- 31 Work, the following maximum allowable markups shall be strictly enforced on all change orders associated with
- 32 the execution of this contract.
- 33 1. The total maximum overhead and profit shall not exceed fifteen percent (15%) of the total costs.
- 34 2. The total maximum overhead and profit shall be distributed as follows:
- 35 a. For work performed and materials provided solely by the General Contractor, fifteen percent
- 36 (15%) of the total costs.
- 37 b. For work performed and materials provided solely by Sub-contractors and supervised by the
- 38 General Contractor:
- 39 i. Supervision of the GC, five percent (5%) of the total Sub-contractor cost.
- 40 ii. Sub-contractors work and materials ten percent (10%) of the total Sub-contractor cost.

41
42 **1.6. PERFORMANCE REQUIREMENTS**

- 43 A. The GC shall become thoroughly familiar with this specification as it will identify procedures and expenses that
- 44 are or are not allowed under the Change Order and Change Order Request process.
- 45 B. The GC shall be responsible for all of the following:
- 46 1. Carefully reviewing the CB that is associated with the COR.
- 47 2. Collecting required supporting documentation from all contractors that quantify the need for a COR.
- 48 a. Labor hours and wage rates
- 49 b. Material costs
- 50 c. Equipment costs
- 51 C. The following shall apply to establishing prices for labor, materials, and equipment costs:
- 52 1. Where Work to be completed has previously been established by individual bid items in the contract bid
- 53 proposal the GC shall use the unit bid prices previously established.
- 54 2. Where Work to be completed was bid as a Lump Sum without individual bid items the GC shall provide a
- 55 breakdown of all labor, materials, equipment including unit rates and quantities required.
- 56 D. The completion date is determined by Owner. The schedule, however, is the responsibility of the GC. Time
- 57 extensions for extra Work will be considered when a schedule analysis of the critical path shows that the Change
- 58 Order Request places the Work beyond the completion date stated in the Contract.

1
2 **1.7. QUALITY ASSURANCE**

- 3 A. The GC shall be responsible for ensuring that all COR supporting documentation meets the following
4 requirements prior to completing the COR form on the Project Management Web Site:
5 1. Sufficiently indicates labor, material, and other expenses related to completing the intent of the CB.
6 2. No costs exceed the usual and customary amount for such items available in the geographical area of the
7 project, and no costs exceed those established under the contract.
8 B. The Project Architect (PA), Commissioning Agent (CxA), City Project Manager (CPM), other members of the
9 consulting staff, and city staff shall review all COR requests to ensure that the intent of the CB will be met under
10 the proposal of the COR or request additional information as necessary.
11

12 **PART 2 – PRODUCTS**

13
14 **2.1. CHANGE ORDER REQUEST FORM**

- 15 A. The COR form is located on the Project Management Web Site. The GC shall click the link in the left margin of
16 the project web site opening a new form. Follow additional instructions below in the execution section for filling
17 out the form.
18

19 **PART 3 - EXECUTION**

20
21 **3.1. ESTABLISHING A CHANGE ORDER REQUEST**

- 22 A. Upon receipt of a Construction Bulletin (CB) where the GC believes a significant change in contract scope
23 warrants the submittal of a COR the GC shall do all of the following within ten (10) working days after receipt of
24 the CB:
25 1. Review the CB with all necessary trades and sub-contractors required by the change in scope.
26 a. Additions or deletions to the contract scope shall be as directed within the CB.
27 b. Additions or deletions of labor and materials shall be determined by the GC based on the
28 directives of the CB.
29 2. Assemble all required back-up documentation for additions and deletions of materials, labor and other
30 related contract costs as previously outlined in this specification.
31 3. Submit a COR request form on the Project Management Web Site.
32 B. Submitting a COR does not obligate the GC to complete the work associated with the COR nor does it obligate
33 the Owner to approve the COR as a change to the contract.
34

35 **3.2. SUBMIT A CHANGE ORDER REQUEST FORM**

- 36 A. This specification shall provide a subject overview only. In depth instructions shall be provided to the awarded
37 Contractor in a PDF Instructional Manual.
38 B. The GC shall select the "Submit a COR" link on the Project Management Web Site.
39 C. The software will open a new COR form and the GC shall provide all of the following information:
40 1. DO NOT perform any calculations on this worksheet, only provide the raw data as requested below. All
41 calculations, totals, and markups shall be computed as described within this specification.
42 2. Provide a summary description of the COR request, and justification for any requested time extension to
43 the contract, indicate the number of calendar days being requested for the extension and add any
44 attachments to the form as needed.
45 3. Provide all GC self performance data including all of the following:
46 a. Materials description, quantities, and unit costs.
47 b. Labor hours and rates for all Foremen, Journeymen, and Apprentices by trade.
48 c. Equipment descriptions, quantities, unit costs and rates.
49 4. Provide all Sub-contractor data including all of the following:
50 a. Materials description, quantities, and unit costs.
51 b. Labor hours and rates for all Foremen, Journeymen, and Apprentices by trade.
52 c. Equipment descriptions, quantities, unit costs and rates.
53 5. Ensure all calculations performed by the form have been completed correctly. Contact the CPM directly
54 if you suspect an error before hitting the save button.
55 C. At any time after creating a COR you must at a minimum click "Save as Draft" to save your work.
56 D. When all data has been entered and verified click on the "Submit COR" button. This will kick off the COR Review
57 and Approval process.
58

1 **3.3. CHANGE ORDER REQUEST REVIEW, APPROVAL, AND PROCESSING**

- 2 A. The PA and CPM shall review all CORs submitted by the GC.
3 1. Additional consulting staff and city staff having knowledge of the components of the COR shall review
4 and advise the PA and CPM as to the accuracy of the items, quantities, and associated costs of the COR as
5 directed by the CB.
6 2. The CPM shall review the COR with the Owner.
7 B. If required the PA and CPM, shall in good faith, further negotiate the COR with the GC as necessary. All
8 amendments to any COR shall be documented within the Project Management Web Site software.
9 C. After final review of the COR the CPM and Owner may accept the COR.
10 D. The CPM shall prepare the COR in the form of an official Board of Public Works Change Order for final review and
11 approval as outlined in Section 01 26 63 Change Order (CO).
12 E. The GC shall not act upon any accepted COR until it has received final approval through the Public Works process
13 as an official CO to the Work unless instructed to do so by the CPM. Proceeding without the final approval of a
14 fully authorized Change Order is at the GC's own risk.
15

16 **3.4. EMERGENCY CHANGE ORDER REQUEST**

- 17 A. In the event Work is required due to an emergency as described in the Contract Documents, the GC must
18 request an equitable adjustment as soon as practicable, and in no case later than ten (10) working days of the
19 commencement of such emergency.
20 B. The GC shall provide full documentation of all labor, materials and equipment used during the period of
21 emergency as part of the COR submittal.

11 3.1. PREPARATION OF THE CHANGE ORDER 2
12 3.2. EXECUTION OF THE CHANGE ORDER 2
13

PART 1 – GENERAL

1.1. SUMMARY

- 17 A. Except in cases of emergency, no changes in the Work required by the Contract Documents may be made
18 by the General Contractor (GC) without having prior approval of the City Project Manager (CPM).
19 B. The City may at any time, without invalidating the Contract and without Notice to Sureties, order changes in
20 the Work by written Change Order. Such changes may include additions and/or deletions.
21 C. The Change Order (CO) is a Board of Public Works (BPW) form that is reviewed and approved by a specific
22 process.
23 D. The CO form is typically made up of multiple Change Order Requests (CORs) and/or Bid Items as appropriate
24 depending on the type of project and how the contract was bid.
25 E. All CO documentation shall be processed through the Construction Administration-Change Order Library and
26 digital workflow on the Project Management Web Site (PMWS).
27

33 E. Section 01 91 00 Commissioning
34

1.3. BOARD OF PUBLIC WORKS PROCEDURE

- 35
36 A. The Board of Public Works has a very explicit procedure for the review and approval of all change orders
37 associated with any Public Works Contract as follows:
38 1. The Supervisory Chain of the CPM shall review and approve any CO under \$10,000 provided it does not
39 include either of the following:
40 a. The CO does not request a time extension to the contract.
41 b. The CO does not cause the contract contingency sum to be exceeded.
42 2. The Board of Public Works shall review and approve any CO that requires any of the following:
43 a. Any CO over \$10,000.
44 b. Any CO requesting a time extension to the contract regardless of the monetary value of the CO.
45 c. Any CO that that causes the contract contingency sum to be exceeded.
46 B. The Board of Public Works generally meets every other week and only once in August and December. The GC is
47 cautioned that, under normal scheduling, a CO requiring a BPW review will take a minimum of two (2) weeks to
48 achieve final approval.
49 1. The City shall not be responsible for additional delays to the Work caused by the scheduling constraints
50 of the Board of Public Works.
51 C. **SPECIAL NOTE:** The GC is cautioned to never proceed unless told to do so by the CPM. Only in rare instances
52 may the CPM give a written notice to proceed on a COR without an approved CO. Proceeding without the
53 written notice of the CPM or an approved CO is at the GC's own risk.
54

1 **PART 2 – PRODUCTS**
2

3 **2.1. CHANGE ORDER FORM**

- 4 A. The CO form is located on the Project Management Web Site. The CPM shall click the link in the left margin of
5 the project web site opening a new form. Project information is pre-loaded, the CPM only needs to enter
6 information and make attachments as needed to complete the form.
7

8 **PART 3 - EXECUTION**
9

10 **3.1. PREPARATION OF THE CHANGE ORDER**

- 11 A. The CPM shall prepare the required CO forms in the Construction Administration-Change Order Library on the
12 Project Management Web Site as follows:
13 1. Provide information for all contract information.
14 2. Provide a general description of the items described within the change order.
15 3. Provide detailed information for each Item on the CO form. At the option of the CPM he/she may include
16 multiple Change Order Requests each as their own item.
17 4. Provide required pricing and accounting information as needed for the item.
18 5. Insert attachments of contractor/architect provided information that clarifies and quantifies the CO.
19 Attachments may include but not be limited to material lists, estimated labor, revised details or
20 specifications, and other documents that may be related to the requested change.
21 6. Save the final version of the completed CO.
22

23 **3.2. EXECUTION OF THE CHANGE ORDER**

- 24 A. Upon saving the CO as described in section 3.1 above the software associated with the Project Management
25 Web Site shall notify the GC that the CO has been drafted and is ready for review. The GC shall do the following:
26 1. Open the appropriate CO form in the Construction Administration-Change Order Library and review all
27 items on the form.
28 2. The GC shall notify the CPM immediately of any errors or discrepancies on the form and shall not sign or
29 save it.
30 a. The CPM shall make any corrections as needed, re-save the form, and notify the GC.
31 3. If/when the GC concurs with the CO form as drafted the GC shall digitally sign the form and click SAVE.
32 B. After the GC digitally signs/saves the CO it shall be routed through the Project Management Web Site for
33 additional review and/or approvals. The CPM shall do the following:
34 1. Monitor the review process to ensure the software is working properly at each review step.
35 2. Ensure that proper BPW procedures are executed as needed by the CO approval process.
36 a. Schedule the CO on the next available BPW agenda if required.
37 i. Attend the BPW meeting to speak on the CO to board members and answer questions.
38 ii. The GC and/or PA may be required to attend the BPW meeting to address specific
39 information as it relates to the Work and/or materials associated with the CO.
40 3. Monitor final approval and distribution of the CO.
41 4. Notify the GC that the CO has been completed.
42 5. Ensure that the CO is posted to the next Public Works payment schedule.
43 6. Verify that the GC's next Progress Payment-Schedule of Values show the CO as part of the contract sum.
44 C. Upon final approval of the CO the GC may proceed with executing the Work associated with the CO.
45
46

11 3.1. AIA DOCUMENT G702 – APPLICATION AND CERTIFICATE FOR PAYMENT 2
12 3.2. AIA DOCUMENT G703 – CONTINUATION SHEET 2
13 3.3. INITIAL SCHEDULE OF VALUES SUBMITTAL 3
14 3.4. SOV FOR PROGRESS PAYMENT REQUESTS 3
15

PART 1 – GENERAL

1.1. SUMMARY

- 19 A. The Schedule of Values (SOV) is a Contractor provided statement that allocates portions of the total contract
20 sum to various portions of the contracted work and shall be the basis for reviewing the Contractors Progress
21 Payment Requests.
22 B. AIA Document G702 – Application and Certificate for Payment and AIA Document G703 Continuation Sheet shall
23 be filled out in sufficient detail to be used as a guideline in determining work completed and materials stored on
24 site when verifying Progress Payment Requests.
25 C. The General Contractor shall be responsible for filling out, updating, and providing these work sheets with each
26 Progress Payment Request.
27

1.2. RELATED SPECIFICATIONS

- 29 A. Section 01 26 63 Change Order (CO)
30 B. Section 01 29 76 Progress Payment Procedures
31 C. Section 01 31 23 Project Management Web Site
32 D. Section 01 32 26 Construction Progress Reporting
33 E. Section 01 33 23 Submittals
34 F. Parts of this specification will reference articles within “The City of Madison Standard Specifications for Public
35 Works Construction”.
36 1. Use the following link to access the Standard Specifications web page:
37 <http://www.cityofmadison.com/business/pw/specs.cfm>
38 a. Click on the “Part” chapter identified in the specification text. For example if the specification
39 says “Refer to City of Madison Standard Specification 210.2” click the link for Part II, the Part II
40 PDF will open.
41 b. Scroll through the index of Part II for specification 210.2 and click the text link which will take you
42 to the referenced text.
43

1.3. RELATED DOCUMENTS

- 45 A. The following documents shall be used as the basis for initiating and maintaining the SOV worksheets throughout
46 the execution of this contract.
47 1. Drawing documents and specifications (including general provisions) as provided with the bid set
48 documents and any published addendums.
49 2. Documents associated with revisions or clarifications to number 1 above after awarding of the contract,
50 including but not limited to:
51 a. Construction Bulletins
52 b. Request for Information
53 c. Approved Change Orders
54 3. The latest daily/weekly Construction Progress Report
55 4. Other specifications as identified in Section 1.2 above

1
2 **1.4. BASIS OF VALUES**

- 3 A. The Contractor shall provide a breakdown of the Contract Sum in sufficient detail to assist the Architect and City
4 Project Manager in evaluating Progress Payment Requests. The breakdown detail may require a labor and
5 material breakdown for each division of work or trade or as directed by the CPM.
6 B. The total sum of all items shall equal the Contract Sum.
7

8 **PART 2 – PRODUCTS – THIS SECTION NOT USED**

9
10 **PART 3 - EXECUTION**

11
12 **3.1. AIA DOCUMENT G702 – APPLICATION AND CERTIFICATE FOR PAYMENT**

- 13 A. The Contractor shall use AIA Document G-702 Application and Certificate for Payment with each Progress
14 Payment Request.
15 B. Completely fill out the Project Information section as follows:
16 1. TO OWNER; provide all owner related information as provided in the contract documents.
17 2. PROJECT; provide all contract information including contract number, title and address.
18 3. FROM CONTRACTOR; provide all contractor related information.
19 4. VIA ARCHITECT; provide all the architect's related information including the architect's project reference
20 number if different from the owners.
21 5. Indicate the current APPLICATION NO., PERIOD TO date, and CONTRACT DATE.
22 C. Completely fill out the Contractors Application for Payment section.
23 1. Fill out lines 1 through 9 to reflect the current status of the contract through the payment date being
24 requested.
25 2. The City of Madison calculates retainage on Public Works Contracts as follows:
26 a. In general, across the duration of the contract, 2.5% of the total contract sum, including change
27 orders, is withheld for retainage as referenced from the City of Madison Standard Specification
28 110.2:
29 i. Beginning with Progress Payment 1, 5% retainage will be withheld until such time that 50%
30 of the total contract sum has been paid out.
31 ii. No additional retainage will be withheld after 50% of the total contract sum has been paid,
32 unless additional change orders have been approved after the 50% milestone has been
33 reached. Per City of Madison Standard Specification 110.2, additional retainage up to 10%,
34 may be held in the event there are holds placed by Affirmative Action or liquidated
35 damages by BPW.
36 iii. Retainage for additional change orders after the 50% milestone will be withheld at the rate
37 of 2.5% of the total cost of the change order.
38 iv. Retainage is based on the change orders posted to the City's contract worksheet at the
39 time the progress payment is processed.
40 D. Completely fill out the Change Order Summary section. Only change orders that have been finalized and posted
41 to the City of Madison's Application for Partial Payment worksheet may be itemized into the SOV documents.
42 E. The Contractor shall sign and date the application and it shall be properly notarized.
43 F. The Contractor shall not fill in any information in the Architects Certificate for Payment section.
44

45 **3.2. AIA DOCUMENT G703 – CONTINUATION SHEET**

- 46 A. The Contractor shall use AIA Document G-703 Continuation Sheet to itemize his/her SOV for this contract.
47 Provide additional sheets as necessary.
48 B. Provide information in Column A (Item No.), Column B (Description of Work), and Column C (Scheduled Value) by
49 any method that allocates portions of the total contract sum to various portions of the contracted work.
50 Possible methods include combinations of the following:
51 1. By division of work
52 2. By contractor, sub-contractor, sub sub-contractor
53 3. By specialty item or group
54 4. Other methods of breakdown as may be requested by the City Project Manager or City Construction
55 Manager at the pre-construction meeting.
56 C. Provide total cost of the item/description of work including proportionate shares of profit and overhead related
57 to the item.
58

1 **3.3. INITIAL SCHEDULE OF VALUES SUBMITTAL**

- 2 A. The Contractor shall upload his/her initial SOV to the Project Management Web Site, Submittals Library, no later
3 than five (5) working days after the Pre-construction Meeting.
4 1. The initial SOV shall provide information in Column A (Item No.), Column B (Description of Work), and
5 Column C (Scheduled Value) only.
6 2. The level of detail shall be as described in section 3.2 above.
7 B. The Project Architect (PA) and the City Project Manager (CPM) shall review the SOV as any other submittal and
8 may require modifications to reflect additional detail as necessary.
9 C. The Contractor shall resubmit the SOV as necessary until such time as the PPA and CPM have sufficient detail for
10 assessing and approving future Progress Payment Applications.
11 D. Progress Payment Application 1 will not be processed until such time as the Contractor has met this requirement
12 regardless of the amount of work completed per the application.
13

14 **3.4. SOV FOR PROGRESS PAYMENT REQUESTS**

- 15 A. The Contractor shall update the initial SOV with each Progress Payment Application as follows:
16 1. Initial items and values as part of Section 3.3 above will not be adjusted once the original Schedule of
17 Values submittal has been approved.
18 2. Change orders shall be added as additional items and values at the bottom of the SOV as they become
19 approved and posted to the City's contract worksheet. The value for each change order shall be the
20 value indicated on the SOV and shall stand alone. Values shall not be split out or combined with other
21 existing items with similar work descriptions on the original SOV.
22 3. Fill out Columns D, E, F and G to properly reflect the work completed and materials received since the last
23 Progress Payment Application.
24 4. Only materials delivered and stored on the project site may be reflected on SOV progress updates.
25 B. Provide updated G702 and G703 sheets with each Progress Payment application.
26 C. See Specification 01 29 76 Progress Payment Procedures for additional information on submitting Progress
27 Payment Applications.
28

15

PART 1 – GENERAL

1.1. SUMMARY

- 19 A. The General Contractor (GC) shall review this and all related specifications prior to submitting progress payment
20 requests.
21 B. Progress payment requests (Partial Payment-PP) for this contract shall be uploaded digitally by the GC to the
22 Project Management Web Site
23 C. The Project Architect (PA) and City Project Manager (CPM) shall review and amend or approve the PP on the
24 Project Management Web Site.
25 D. After approval of the PP by the CPM, he/she shall forward the PP to the appropriate agencies for BPW
26 contractual review and payment processing.
27

1.2. RELATED SPECIFICATIONS

44

1.3. RELATED DOCUMENTS

- 46 A. The following documents shall be used when evaluating PP requests.
47 1. Daily and weekly construction progress reports filed since the last payment request.
48 2. Contractors Schedule of Values as updated from the last payment request. See Specification 01 29 73.
49 3. Any document that may be required to be submitted for review and approval, as noted by the
50 specifications listed in Section 1.2 above, or the Progress Payment Milestone Schedule in Section 1.4
51 below, to achieve a required bench mark of contract progression or contract requirement.
52

1.4. PROGRESS PAYMENT MILESTONES

- 54 A. City Engineering-Facility Management has developed the Project Payment Milestone Schedule (Section 1.4
55 below) to assist the GC in providing required construction specific documentation and general contractual
56 documentation in a timely manner.
57 B. The Progress Payment Milestone Schedule is not an all inclusive list. Multiple agencies review progress payment
58 requests and contract closeout requests. Missing, incomplete, or incorrect documentation for any agency may

- 1 be a cause for not processing progress payments. It shall be the sole responsibility of the Contractor for
2 providing documentation as required or requested to the appropriate agencies.
3 C. The milestone schedule is based on the contract total sum and shall be valid for most contracts. Milestone
4 submittals will be required with whatever progress payment hits the percentage of contract total indicated in
5 the schedule.
6 D. The CPM shall review the milestone schedule with each progress payment request and at his/her option may
7 elect to hold processing the progress payment until such time as the contractor has met the requirements for
8 providing construction specific documentation.
9 E. It shall be the General Contractors responsibility to comply with all BPW Contract Administration requirements
10 and related deadlines as outlined in the Award Letter, Award Checklist, and Start Work Letter.
11

1.5. PROGRESS PAYMENT SUBMITTAL

- A. Each progress payment submittal shall be:
 - 1. Digital in PDF format
 - 2. PDF shall be in color
 - 3. Uploaded to the appropriate Project Management library and properly named per the tutorial instructions provided to the awarded contractor.
- B. Submit all required construction progress documentation to the appropriate Project Management Web Site library.
- C. In general the following shall apply to all PP requests:
 - 1. Materials or products:
 - a. On order, being shipped, etc. may not be invoiced.
 - b. Received and stored on the project site may be invoiced.
 - c. Being manufactured off site at any location may not be invoiced (example: cabinetry, ductwork, etc.)
 - d. Completed products stored off site locally waiting for delivery to the project site may be invoiced with prior approval by the CPM. All of the following conditions must be met to be allowed:
 - i. Items must be visually inspected by CPM to verify product is complete.
 - ii. Item must be stored inside a compatible structure and the structure and contents must be insured.
 - iii. Contractor is responsible for condition until installation is completed.
 - 2. All labor and equipment, including rental time for the current progress period may be invoiced.
 - 3. Only completed installations may be invoiced to 100% based on the Schedule of Values.
- D. DO NOT submit BPW Contract Administration Documentation for review with Progress Payment Requests, submit them directly to the correct agency and in the correct format as instructed from information in your BPW Contract Award Packet instructions.

PART 2 - PRODUCTS - THIS SECTION NOT USED

PART 3 - EXECUTION

3.1. GENERAL CONTRACTOR PROCEDURE

- A. The GC shall provide an updated version of his/her schedule of values (AIA documents G702 & G 703) with each PP request.
 - 1. The AIA - Application and Certificate for Payment (G702) shall be properly filled out and prepared for the Architects review. See specification 01 29 73, Schedule of Values for more information.
 - 2. The AIA - Continuation sheets (G703) shall be properly filled out and indicate the dollar value of the completed work to date for each item on the form. See specification 01 29 73, Schedule of Values for more information.
 - a. The GC shall subtotal the work completed to date for all of the original Schedule of Value items.
 - b. Divide the sub total of work completed by the Original Contract Total to obtain a percentage complete of the original Lump Sum Bid. This percentage may be taken out to five (5) decimal places (round fifth place up or down as needed).
 - i. Example: \$5,192.55 of completed work divided by \$10,000 original Contract Total = 0.519255, round this to 0.51926
 - c. Write the percentage in Column 10 on the City Tabular Sheet for the original lump sum bid item in RED ink.
 - 3. Ensure that any newly posted change orders from the City of Madison provided tabulation sheet have been entered on the G703 continuation sheets. Repeat steps a thru c above for each change order on the schedule of values and the City Tabular Sheet.
- B. The GC shall fill out the City of Madison Application and Certificate of Payment cover sheet as follows:
 - 1. The GC shall not change any pre-printed information and shall not write in the box that indicates previous progress payments.
 - 2. The GC shall sign and date the form where indicated.
 - 3. The GC shall provide the dates from and to for the PP being requested.

- 1 4. The GC shall provide the list of all contractors/sub-contractors that were actively working during the
- 2 dates indicated above.
- 3 a. All contractors/sub-contractors named must be in compliance with all City requirements (Pre-
- 4 qualified, Affirmative Action Plan on file, etc). The PP will be held and not processed by the City of
- 5 Madison until all contractors/sub-contractors are in compliance.
- 6 b. Do not list the names of suppliers or manufacturers, doing so will slow down processing and
- 7 require a re-submittal of the paperwork.
- 8 C. The General Contractor (GC) shall scan all of the documents listed below in the order shown, save the scan as a
- 9 single PDF file for each PP request.
- 10 1. City cover sheet – Application and Certificate for Payment
- 11 2. City tabulation sheet(s)
- 12 3. AIA G702 - Application and Certificate for Payment
- 13 4. AIA G703 - Continuation Sheet(s)
- 14 5. Any miscellaneous documents that may be requested as backup documentation for the pay request.
- 15 a. Lien waivers are not required and shall not be submitted.
- 16 b. Do not provide contractual administrative documents such as pay reports with pay requests.
- 17 c. Do not supply progress deliverables with pay requests.
- 18 F. Upload the pay request PDF to the Contract Documents-GC Partial Pay Apps library on the Project Management
- 19 Web Site.
- 20

3.2. PROJECT ARCHITECT PROCEDURE

- 22 A. The PA shall review the AIA-continuation sheets provided by the GC to determine if the Schedule of Values
- 23 accurately reflects the work completed for the inclusive dates indicated.
- 24 B. The PA shall advise the CPM of any discrepancies in the schedule of values.
- 25 C. The PA shall work with the GC and the CPM to resolve any issues prior to signing the AIA - Application and
- 26 Certificate for Payment.
- 27 D. When verified, the PA shall digitally sign the original PDF version of the AIA - Application and Certificate for
- 28 Payment on the Project Management Web Site.
- 29

3.3. CITY PROJECT MANAGER PROCEDURE

- 31 A. The CPM shall review all documents submitted by the GC and work with the PA to ensure the schedule of values
- 32 accurately reflects the work completed to date.
- 33 B. The CPM may elect to hold processing of any progress payment pending submittal of required progress payment
- 34 milestones.
- 35 C. When verified, the CPM shall digitally sign the City Cover Sheet and forward the required documentation to the
- 36 appropriate City agencies for further processing of the payment request.
- 37 D. The CPM shall add a scanned copy of any documents indicating the PP request processing was completed to the
- 38 PMWS.
- 39
- 40

PART 1 – GENERAL

1.1. SUMMARY

- 16 A. Project Coordination covers many areas within the execution of the Contract Documents and the requirements
17 of proper coordination are the applicable to all contractors executing the Work of this contract.
18 B. This specification provides general information regarding project coordination for the General Contractor and all
19 Sub-contractors. All contractors shall be familiar with project coordination requirements and responsibilities
20 that may be defined in other specification within these Contract Documents.
21 C. The General Contractor shall at all times be responsible for the project, project site, and execution of the
22 Contract Documents.
23

34 K. Section 01 91 00 Commissioning
35
36

1.3. GENERAL REQUIREMENTS

- 37 A. The following general requirements shall applicable to all contractors:
38 1. Cooperate with the Owner, all authorized Owner Representatives, Project Architect and all consultants of
39 the Owner.
40 2. Materials, products, and equipment shall be new, as specified and to industry standards except where
41 otherwise noted.
42 3. Labor and workmanship shall be of a high quality and to industry standards.
43 B. Existing conditions:
44 1. Verify all existing conditions noted in the contract documents with actual filed locations. Verify
45 dimensions, sizes and locations, of structural, equipment, mechanical and utility components.
46 2. Report any inconsistencies, errors, omissions, or code violations in writing to the General Contractor (GC)
47 immediately.
48 3. Annotate any inconsistencies, errors, omissions on the GC As-Built record drawings immediately for
49 future reference.
50 C. Contract Documents:
51 1. The Contract Documents are intended to include everything necessary to perform the work. Every item
52 required may not be specifically mentioned, shown, or detailed.
53 a. Except where specifically stated all systems and equipment shall be complete, installed, and fully
54 operable.
55 b. If a conflict exists within the contract documents the contractor shall furnish the item, system, or
56 workmanship of the highest quality, largest, largest quantity, or most closely fits the intent of the
57 contract documents.
58

- 1 c. Manufacturers recommended installation details shall be verified and used prior to installation of
- 2 products and equipment so as to not void warranties.
- 3 D. Errors and Omissions
- 4 1. No Contractor shall take any advantage of any apparent error or omission in the construction documents.
- 5 2. The City of Madison shall be permitted to make such corrections and interpretations as may be deemed
- 6 necessary for the fulfillment of the intent of the construction documents.
- 7 E. Owners Representatives
- 8 1. All contractors shall be familiar with various Owner Representatives having Quality Management
- 9 responsibilities for the duration of this project including but not limited to the following:
- 10 a. Project Architect, responsible for all decisions affecting the code compliance and design intent of
- 11 the construction documents.
- 12 b. Consulting Architects and Engineers, responsible for providing consulting services to the Project
- 13 Architect, Owner, and City Project Manager, also responsible for Quality Management of the
- 14 construction documents.
- 15 c. Owner, the designated representative of the City Agency that will occupy the project upon
- 16 completion.
- 17 d. City Project Manager, responsible for all day to day decisions regarding the execution and
- 18 performance of this Public Works Contract.
- 19 e. Consulting City Staff, responsible for providing consulting services to the Project Architect, Owner,
- 20 and City Project Manager, also responsible for Quality Management of the construction
- 21 documents.
- 22 f. Commissioning Agent (CxA), responsible for ensuring that the project is meeting the Owner's
- 23 Project Requirements and related quality assurance procedures.
- 24 2. Owner Representatives shall be attending progress meetings, pre-installation meetings, performing or
- 25 being present for final testing and acceptance and quality management reporting during the execution of
- 26 the contract documents as outlined in other specifications.
- 27

28 **1.4. GENERAL CONTRACTOR PERFORMANCE REQUIREMENTS**

- 29 A. Assume the responsibility for all Work specified in the Contract Documents except where specifically identified
- 30 to be performed by the Owner or other contractor separately hired by the Owner.
- 31 1. Coordinate all work by Owner, equipment provided Owner, or contractor hired by the Owner into the
- 32 project schedule.
- 33 B. Provide all construction management responsibilities as specified in other Division 1 specifications including but
- 34 not limited to:
- 35 1. Scheduling of work
- 36 2. Coordination of work between other Trades and Sub-contractors
- 37 3. Construction administration and management
- 38 4. Site layout, cleanliness, and protection of completed work/stored materials
- 39 5. Waste Management
- 40 6. Quality Assurance and Quality Control
- 41 C. Use Diggers Hotline and private utility locating companies to accurately locate all public and private utilities on
- 42 the property as needed. The GC is responsible for any repair or replacement to any public or private utility
- 43 damaged during the execution of the Work
- 44 D. Report any inconsistencies, errors, omissions, or code violations in writing to the Project Architect immediately.
- 45 Failure to report inconsistencies prior to beginning work shall indicate that the GC accepted all existing
- 46 conditions.
- 47 E. The GC shall be responsible for assigning work and related responsibilities where the Contract Documents may
- 48 not clearly state who is responsible for providing the work, material, or product.
- 49 F. Provide construction management oversight of all items described in Section 1.5 below.
- 50 G. Coordinate and assist CxA as outlined within 01 91 00 and as directed by Owner.
- 51

52 **1.5. SUB-CONTRACTOR PERFORMANCE REQUIREMENTS**

- 53 A. Be familiar with all of the contract documents as they pertain to your Work, adjacent work and the overall
- 54 progress of the project.
- 55 1. All Sub-contractors shall be familiar with all Division 1 specifications as they may apply to progress,
- 56 progress payments, quality control construction management, and closeout of the contract.
- 57 B. Coordinate your Work with all adjacent work and existing conditions.

1. Perform your work in proper sequence according to the GC's project schedule and in relation to the work of other trades.
 2. Notify other sub-contractors and trades whose work may be connected to, combined with, or influenced by your work and allow them reasonable time and access to complete their work.
 3. Join your work to the work of others in accordance with the intent of the Contract Documents.
 4. Order materials and schedule deliveries to facilitate the general progress of the Work.
- C. Cooperate with all other trades to facilitate the general progress of the work. This shall include providing every reasonable opportunity for the installation of work by others and the storage of their materials and equipment.
1. In no case shall any contractor exclude from the premises or work any Sub-contractor or their employees.
 2. In no case shall any contractor interfere with the execution or installation of Work by any other Sub-contractor or their employees.
- D. Arrange your work, equipment, and materials and dispose of your construction waste so as to not interfere with the work or storage of materials of others.
- E. Coordinate all work as indicated during pre-installation meetings with Owner Representatives, the GC and other trades. Any work improperly coordinated shall be relocated as designated by the Owner Representative at no additional cost to the City.
- F. Coordinate and assist CxA as outlined within 01 91 00 and as directed by Owner.

PART 1 – GENERAL

1.1. SUMMARY

- 21 A. The purpose of this specification is to identify various project related meetings and the responsible parties for
22 scheduling, agendas, minutes, and required attendance.
23 B. This specification is not intended to be inclusive of all meeting types or a complete list of required meetings.
24 C. This specification is not intended to cover planning and execution meetings between the General Contractor
25 (GC) and his/her sub-contractors.

1.2. RELATED SPECIFICATIONS

- 28 A. 01 31 23 Project Management Web Site
29 B. 01 32 16 Construction Progress Schedules
30 C. 01 43 39 Mockups
31 D. 01 91 00 Commissioning
32

1.3. PROJECT MEETING TYPES

- 34 A. The following project meeting types may be used but not limited to the following
35 1. Preconstruction Meeting
36 2. Project Management Web Site – Tutorial Meeting
37 3. Construction Progress Meetings
38 4. Pre-installation Meetings (including mock-up review meetings)
39 5. Weekly Trade Meetings
40 6. Special Meetings
41 7. Commissioning Meetings
42

1.4. GENERAL REQUIREMENTS

- 44 A. Representatives of Contractors, Subcontractors, and suppliers attending meetings shall be qualified and
45 authorized to act on behalf of the entity each represents.
46

PART 2 – PRODUCTS – NOT USED IN THIS SECTION

PART 3 - EXECUTION

3.1. PRECONSTRUCTION MEETING

- 52 A. After execution of the Contract the City Project Manager (CPM) shall schedule and conduct the Preconstruction
53 Meeting at the Owner’s facilities. The CPM shall coordinate the meeting agenda with the Project Architect and
54 the GC Project Manager.
55 B. The CPM shall be responsible for the final agenda.
56 C. The CPM and Project Architect shall take notes on the meeting and post completed meeting minutes.
57 D. Attendance shall be required by all of the following:

2. Architect and applicable sub consultant(s)
 3. General Contractor and applicable subcontractors and suppliers
 4. City Quality Management Staff
 5. Commissioning Agent
 6. Others, as may be invited for particular agenda items.
- E. Topics of the Preconstruction Meeting shall include but not be limited to the following:
1. Staff and contractor introductions
 2. Completion Date
 3. BPW Administrative requirements and due outs
 - a. Small Business Enterprise (SBE) (if applicable)
 - b. Certified payroll forms
 - c. Workforce profiles
 - d. Best Value Contracting (BVC)
 4. General Facility Management Division 1 Specifications, including:
 - a. Section 01 29 76 Progress Payment Procedures
 - b. Section 01 31 23 Project Management Web Site (overview)
 - c. Section 01 45 16 Field Quality Control Procedures
 - d. Section 01 77 00 Closeout Procedures
 - e. Section 01 91 00 Commissioning
 5. Project Meeting scheduling
 - a. Section 01 31 19 Project Meetings
 6. Construction Schedule
 7. Commissioning Process

3.2. PROJECT MANAGEMENT WEB SITE – TUTORIAL MEETING

- A. The CPM shall schedule and conduct a tutorial presentation of the PMWS prior to the beginning of construction.
- B. The CPM shall be responsible for the final agenda, there will be no minutes.
- C. The required attendance list in 3.1.D. above shall apply except for City Staff in items 1 and 4 who are already familiar with the PMWS system.
- D. It is recommended that all contractors bring their lap top, tablet or other internet capable device with them including a fully charged battery and internet connection devices as necessary.

3.3. CONSTRUCTION PROGRESS MEETINGS

- A. In general all of the following shall apply:
 1. Representatives of Contractors, Subcontractors, and suppliers attending meetings shall be qualified and authorized to act on behalf of the entity each represents.
 2. The attendance shall be from the required attendance list in 3.1.D. above.
- B. The General Contractor Project Manager (GCPM) shall:
 1. Schedule and conduct all construction progress meetings biweekly or more frequently as required.
 2. Prepare agenda for meetings including, but not limited to the following:
 - a. Safety
 - b. Current Schedule, including review of the critical path and 6-week look ahead schedule
 - c. Status of project related documentation (Submittals, RFIs, CBs, etc.)
 - d. Quality Observation Log and status of correction of deficient items
 - e. Project questions and issues from meeting attendees
 - f. BPW Administration Check
 - g. Other as needed
 - h. Status of CORs and COs to be reviewed outside the standard progress meeting time.
 3. Make physical arrangements for meetings.
 4. GCPM to post meeting agendas to the appropriate libraries on the Project Management Web Site (PMWS) no less than two (2) working days prior to the scheduled meeting. Notify all required attendees, applicable parties to the contract, and others affected of the posted meeting agenda.
 5. Preside at meetings.
 6. Route a meeting attendance roster for attendees to sign-in on.
 7. GCPM to record the minutes of the meeting; include significant proceedings and decisions. Post meeting minutes to the PMWS no more than two (2) working days after the completed meeting. Meeting minutes shall include a scanned copy of the attendance sign-in sheet. Notify all required meeting attendees, applicable parties to the contract, and others affected by decisions made at the meetings.

8. The above requirements do not apply to GC/sub-contractor meetings.

3.4. PRE-INSTALLATION MEETINGS

- A. The GCPM shall schedule and conduct all pre-installation meetings, including mockup reviews, before each construction activity that requires coordination with other trades.
- B. The GCPM shall be responsible for the final agenda and meeting minutes.
- C. The GCPM will work with all concerned parties to resolve issues as needed and submit RFI's if necessary.
- D. Required attendance shall be from the list in 3.1.D. above and shall be personnel having a stake in the outcome of the installation or knowledge of the system being installed.
- E. In the event the Contractor installs equipment or materials without a pre-installation meeting the Contractor shall be solely responsible for removing, replacing, repositioning materials and equipment as instructed by the Project Architect or City Project Manager at no additional cost to the City.

3.6 PRE-CONTRACT CLOSEOUT MEETINGS

- A. Two (2) Pre-contract Closeout Meetings shall be held to review the closeout procedures, requirements, and contract deliverables.
 - 1. Pre-contract Closeout Meeting #1 shall be scheduled prior to the 50% Progress Payment Request is being requested. This meeting shall discuss items such as closing out QMO reports, providing O&M drafts and finals, payroll and Affirmative Action documentation, and other contract deliverables.
 - 2. Pre-contract Closeout Meeting #2 shall be scheduled prior to the 80% Progress Payment Request is being requested. This meeting shall discuss, but not be limited to, the status of scheduling final regulatory inspections, cleaning up outstanding QMO's, demonstration and training, attic stock; and finalization review of payroll and other related documents.
- B. The GCPM shall schedule, coordinate, and make physical arrangements for both meetings.
- C. All of the following shall be required to attend both meetings:
 - 1. The GCPM and the GC Field superintendent
 - 2. All Subcontractor Project Managers regardless of the current status of their work.
 - a. The GCPM may excuse a Subcontractor PM if he is confident that all contractual requirements for closeout by the subcontractor have been completed and/or delivered to the GCPM. The list of attendees shall be reviewed and agreed upon with CPM ahead of the meeting.
 - b. At the option of these project managers the field supervisors may also attend.
 - 3. The Project Architect and at least one design consultant from each discipline represented by the plans and specifications to address open QMOs, final tests, reports, etc.
 - 4. The Owner
 - 5. The CPM
 - 6. Quality Management staff as needed to address open QMOs, final tests, reports, etc.
 - 7. The Commissioning Agent
- D. The CPM shall publish an agenda and chair the meeting.

3.7 OTHER SPECIAL MEETINGS

- A. The Contractor shall schedule special meetings per the requirements of the LEED Specification, the Project Quality Management Plan, the Commissioning Plan and as indicated by other specifications.
- B. Special meetings include but are not limited to the following:
 - 1. Waste Management Conference
 - 2. Equipment start up meetings
 - 3. Testing and balancing meetings
 - 4. Commissioning meetings
 - 5. Other meetings as necessitated by the contract documents

13

PART 1 – GENERAL

1.1. GENERAL DESCRIPTION

- 17 A. The City of Madison (CoM) has established a web based Project Management Tool (PMT) using a Microsoft
18 product called SharePoint (SP).
19 B. The software is used throughout the design, construction and warranty process of major remodels and new
20 construction projects executed as a City of Madison, Board of Public Works project.
21 C. Initially deployed in mid 2013, the PMT software has been successfully deployed on several projects, and we
22 continue to modify/update/enhance the PMT on a regular basis.

1.2. SHAREPOINT PROCEDURE OVERVIEW

- 25 A. The CoM PMT is a system of consolidated Document & Form Libraries and Data Lists that assist in performing
26 day to day functions of design/construction management while reducing the use of surface mail, email and email
27 attachments.
28 1. Document libraries store a wide variety of documents in many different formats including but not limited
29 to Word, Excel, PDF, photographs (all popular formats), etc.
30 2. Data Lists contain consolidated data information that can be generated and stored for further use. Punch
31 Lists and Warranty issues will be examples of Data Lists.
32 3. Form libraries contain snapshot information associated with a particular Data Entry form. An example of
33 this is the Quality Management Observation form.
34 B. The following libraries and sub-libraries on the PMWS are provided for specific workflows and contract
35 documentation. Related specification numbers are in "()" if applicable.
36

Contract Documents	Construction Administration	Construction Progress	LEED Documentation	Quality Control	Construction Closeout
<i>Signed Contract</i>	<i>Change Order Requests (COR Form) (01 26 57)</i>	<i>Schedules (01 32 16)</i>	<i>LEED Documents</i>	<i>Regulatory Inspections</i>	<i>Misc Closeout Documents</i>
<i>GC Partial Pay Apps (01 29 76)</i>	<i>Change Orders (CO Form) (01 26 63)</i>	<i>Progress Meetings (01 31 19)</i>	<i>Waste Management (01 74 19)</i>	<i>Commissioning Checklists</i>	<i>O & M Manuals (01 78 23)</i>
<i>Construction Documents</i>	<i>Construction Bulletins (CB Form) (01 26 46)</i>	<i>Daily Journal (DJ Form) (01 32 26)</i>		<i>System Performance Tests</i>	<i>Product Warranties /Guarantees (01 78 36)</i>
<i>Regulatory Documents</i>	<i>Request for Information (RFI Form) (01 26 13)</i>			<i>Quality Management Observation (QMO Form) (01 45 16)</i>	<i>As-Builts (01 78 39)</i>
<i>Testing Contract</i>	<i>Submittals (SUB Form) (01 33 23)</i>			<i>Safety and Incident Reports</i>	<i>Attic Stock (01 78 23)</i>
				<i>Material Testing & Field Reports</i>	<i>Demonstration and Training (01 79 00)</i>
					<i>Warranty Issues (WI Form) (01 78 23)</i>

- 1
2 C. A tutorial document on the web based PMT will be provided to the General Contractor (GC) who is awarded the
3 contract. Additional training will be provided as needed for the GC and Sub-Contractors (SC) by the CoM.
4 D. The PMT has predefined work flows that channel automated alerts as documents are uploaded, reviewed, and
5 completed. These workflows are designed for inbound information from the contractor as well as outbound
6 information from the Architectural/Engineer consultant and the Owner.
7 E. The GC will be required to receive email notifications, access the internet to review related documentation and
8 be able to upload/download documentation to the various project libraries.
9 F. The SC's will be required (at a minimum) to receive email notifications and access the internet to review related
10 documentation. Prior to setting up the final PMT the GC and CPM shall meet to review all SP workflows, the GC
11 will determine to what level over the minimum requirements the SC's will be involved.
12

13 1.3. RELATED SPECIFICATIONS

- 14 A. The following specification sections are directly related to the CoM PMT system.
15 1. 01 26 13 Request for Information (RFI)
16 2. 01 26 46 Construction Bulletins (CB)
17 3. 01 26 57 Change Order Request (COR)
18 4. 01 26 63 Change Order (CO)
19 5. 01 29 76 Progress Payment Procedures
20 6. 01 31 19 Project Meetings
21 7. 01 32 16 Construction Progress Schedules
22 8. 01 32 26 Construction Progress Reporting
23 9. 01 32 33 Photographic Documentation
24 10. 01 33 23 Submittals
25 11. 01 45 16 Field Quality Control Procedures (Owner)
26

27 PART 2 - PRODUCTS

28 2.1. SHAREPOINT SYSTEM RELATED PRODUCTS

- 29 A. SharePoint is a Microsoft Windows based software that requires no additional software installation, hardware or
30 other special requirements/applications for the users. There are no costs associated with the use of this system.
31 B. Currently the CoM is using SharePoint 2010.
32 1. SharePoint works best if the user's computer is running Windows versions 7 through 8.1.
33 2. SharePoint works best when used with Internet Explorer versions 7, 8 and 9 (32 bit).
34 a. At this time SharePoint is not fully supported by Internet Explorer versions 10 and 11.
35 b. At this time SharePoint is not entirely compatible with other internet browsers such as Fire Fox,
36 Google Chrome, and Safari.
37
38

39 PART 3 - EXECUTION

40 3.1. POST BID-OPENING

- 41 A. After bids have been opened, a successful bidder has been determined, and bid acceptance procedures have
42 been initiated the City Project Manager (CPM) will contact the GC to provide the following information.
43 1. Project Management Software Tutorial. This tutorial is in a PDF printable format with screen shots and
44 associated instructions on how to access and use the PMT.
45 a. Tutorial instructions will include but not be limited to the following:
46 i. Descriptions of various libraries, documents, and forms that will be used throughout the
47 construction project.
48 ii. Uploading procedures for various types of documents including standardized naming
49 conventions.
50 2. A blank Project Directory in an Excel spread sheet format. The contractor shall provide the following
51 information for GC and SC staffs as indicated on the spreadsheet. This will generally be the Project
52 Manager for the GC as well as the Sub-contractors and the GC Site Supervisor.
53 a. Last Name, First Name
54 b. Company Name
55 c. Email address (valid, work related)
56 d. Work Phone Number (required, include area code)
57 e. Cell Phone Number (not required, include area code)
58

- 1 3. The GC shall provide the above information for all SC's where the GC is not self-performing the work.
2 4. The GC may provide project foreperson information for work being self performed if he/she so desires.
3

4 **3.2. POST PRE-CONSTRUCTION MEETING**

- 5 A. The GCPM will return the completed Project Directory spread sheet to the CPM no later than the Pre-
6 construction meeting.
7 B. The CPM is responsible for uploading all project directory data into SharePoint and coordinating with CoM
8 Information Technology (CoM-IT) for creating the logins and passwords of non-city staff (GC/SC staffs).
9 C. All GC/SC staff will be notified through an automated email from CoM IT that logins and passwords are available.
10 It is the responsibility of each GC/SC to call the CoM-IT number provided in the email to receive his/her
11 login/password over the phone. Logins and passwords will not be released via email.
12 D. Once the GCPM has received his/her login/password uploading of contract related documents can begin. This
13 would include but not be limited to project schedules, submittals, RFI's, and other documents as needed.
14 E. All workflows, review of documentation, and general archiving of construction related documentation will be
15 conducted on the PMWS. These documents will generally not be emailed.
16 F. The following documents related to the execution of the contract will not be part of the PMWS:
17 1. All documentation related to executing the contract, such as:
18 a. Sub Contractors list
19 b. Affirmative Action documentation
20 c. Bonding documentation
21 d. Documentation associated with payroll verification
22 e. Final documentation associated with closing out the contract
23 2. Any documentation required/generated by ordinance, code or statute, such as;
24 a. Erosion Control inspections
25 b. Building Inspection Department inspections
26

10 3.2. 6 WEEK LOOK-OUT SCHEDULES (LOS) 1
11 3.3. PROJECT MANAGEMENT WEB SITE (PMWS) 2
12

PART 1 – GENERAL

1.1. SCOPE

- 16 A. This specification is to identify various project related schedules associated with indicating construction progress
17 and outlook. The following schedules are the responsibility of the General Contractor (GC).
18 1. Overall Project Schedule
19 2. 6 Week Look-out Schedule
20 B. This specification is not intended to include internal schedules generated by the contractors during their
21 planning and execution of the contract.
22

1.2. RELATED SPECIFICATIONS

- 23 A. Section 01 29 76 Progress Payment Procedures
24 B. Section 01 31 23 Project Management Web Site
25 C. Section 01 31 19 Progress Meetings
26 D. Section 01 74 13 Progress Cleaning
27 E. Section 01 77 00 Closeout Procedures

30 H. Section 01 78 39 As-Built Drawings
31 I. Section 01 78 43 Spare Parts and Extra Materials
32 J. Section 01 79 00 Demonstration and Training
33 K. Section 01 91 00 Commissioning
34 L. Other specification within the construction documents that may indicate the need for scheduling any event with
35 Owner, Project Architect, Owner Representatives, including any owner provided equipment.
36
37

PART 2 – PRODUCTS – THIS SECTION NOT USED

PART 3 - EXECUTION

3.1. OVERALL PROJECT SCHEDULE (OPS)

- 43 A. The GC shall prepare an OPS that covers the duration of the contract from the pre-construction meeting through
44 the end of construction to final contract closeout.
45 1. The GC shall review Specification 01 77 00 Closeout Procedures to become familiar with definitions,
46 differences, and requirements for closing out the construction and contract including the association with
47 progress payments.
48 B. The GC shall provide copies and lead a discussion on the OPS during the pre-construction meeting.
49 C. The OPS shall indicate start and end dates of each task associated with the project.
50 D. The OPS shall clearly indicate the critical path of the project.
51 E. The GC shall update the OPS as often as necessary during the duration of the project. Updates will be briefed as
52 needed during bi-weekly progress meetings.
53

3.2. 6 WEEK LOOK-OUT SCHEDULES (LOS)

- 54 A. The GC shall prepare the initial LOS to include detail of daily tasks for the first six (6) weeks of construction in
55 depth for the Pre-construction meeting. The LOS shall be compatible and complimentary to the OPS.
56 B. The GC shall provide copies and lead a discussion on the LOS during the pre-construction meeting.
57

- 1 C. The LOS shall indicate start and end dates of each major task, associated related sub-tasks, and required parallel
- 2 or pre-requisite tasks required to complete the major task on time.
- 3 D. The LOS shall also include identifying and scheduling such events as:
- 4 1. Pre-installation meetings and mock-up review meetings.
- 5 2. Quality management reviews of installations before they are covered.
- 6 3. Owner provided equipment as designated by the contract documents.
- 7 4. Work by others as designated by the contract documents.
- 8 5. Critical submittal dates.
- 9 E. The GC shall update the LOS prior to each bi-weekly progress meeting to indicate the next 6 weeks of scheduled
- 10 work. Updates will be briefed during each bi-weekly progress meeting.
- 11

12 **3.3. PROJECT MANAGEMENT WEB SITE (PMWS)**

- 13 A. The GC shall upload all project schedules and updates to the PMWS in an original PDF version of the scheduling
- 14 document. Scans will not be permitted.
- 15

SUBMITTALS SCHEDULE**

1
2
3
4 PART 1 – GENERAL 1
5 1.1. SUMMARY 1
6 1.2. RELATED SPECIFICATIONS 1
7 1.3. RELATED DOCUMENTS 1
8 1.4. SUBMITTAL DEFINITIONS 1
9 1.5. SUBMITTAL REQUIREMENTS 2
10 1.6. ADMINISTRATIVE SUBMITTALS 2
11 PART 2 – PRODUCTS – THIS SECTION NOT USED 2
12 PART 3 - EXECUTION 2
13 3.1. OVERALL RESPONSIBILITIES OF ALL CONTRACTORS 2
14 3.2. GENERAL CONTRACTORS RESPONSIBILITIES 2
15 3.3. STAFF REVIEW RESPONSIBILITIES 3
16

PART 1 – GENERAL

1.1. SUMMARY

- 20 A. The General Contractor shall submit a complete and comprehensive list of all submittals anticipated during the
21 execution of this contract.
22 B. The GC shall include the Administrative submittals identified in item 1.5 below and shall be required to up load
23 them to the Project Management Web Site.
24 C. The initial Submittals Schedule shall be based on the original contract documents used at the time of bidding and
25 any posted addenda through awarding of the contract.
26 D. The Submittal Schedule may be appended during the execution of the contract based on amendments to the
27 contract in the form of Change Orders, Construction Bulletins, and other related documents that add, or change
28 the scope of the work.
29

1.2. RELATED SPECIFICATIONS

- 30 A. Section 01 29 76 Progress Payment Procedures
31 B. Section 01 31 23 Project Management Web Site
32 C. Section 01 33 23 Submittals
33 D. Section 01 91 00 Commissioning
34
35

1.3. RELATED DOCUMENTS

- 36 A. The following documents shall be used as the basis for initiating the original Submittals Schedule.
37 1. Drawing documents and specifications (including general provisions) as provided with the bid set
38 documents and any published addenda.
39 B. The following documents shall be used to amend the submittals schedule as needed during the execution of this
40 contract.
41 1. Documents associated with revisions or clarifications to number A.1 above after awarding of the
42 contract, including but not limited to:
43 a. Construction Bulletins
44 b. Approved Change Orders
45
46

1.4. SUBMITTAL DEFINITIONS

- 47 A. Administrative Submittal: Any submittal that may be required by a Division 1 Specification and as noted in
48 Section 1.5 below.
49 B. Critical Path Submittal: Any early submittal that needs a priority review due to early construction use or long
50 lead times where a delay could affect the critical path of the construction schedule
51 C. Submittal: Any material, product, equipment, or general requirement as outlined in this and other specifications
52 that require a favorable review or acceptance prior to proceeding with procuring the item or proceeding with
53 the Work.
54
55

1.5. SUBMITTAL REQUIREMENTS

- A. The GC and all Sub-contractors shall review the construction documents including the specifications of their individual Division or Trade to compile a complete list of all materials, products, or equipment that will require a positively reviewed submittal to be completed prior to procurement and installation.
 - 1. Submittals shall include but not be limited to any of the following that may apply:
 - a. Shop Drawings
 - b. Product Data
 - c. Assembly Drawings
 - d. Engineered Drawings
 - e. Product Samples
- B. The following items will require an approved submittal, verify with specifications for specific needs and requirements:
 - 1. Contractor certifications for specialized work such as asbestos removal, well drilling, controls, AV, etc.

1.6. ADMINISTRATIVE SUBMITTALS

- A. The GC shall upload the following submittals within 15 working days of receipt of the City of Madison Start Work Letter. All Administrative Submittals shall be approved prior to requesting Progress Payment Number 1.
 - 1. Contractors Project Directory, see specification 01 31 23, discuss requirements with CPM
 - 2. Schedule of Values, see Specification 01 29 73
 - 3. Submittals Schedule, see Specification 01 32 19
 - 4. Waste Management Plan, see Specification 01 74 19
 - 5. Closeout Requirement Checklist, see Specification 01 77 00
 - 6. Warranty Checklist, see Specification 01 78 36

PART 2 – PRODUCTS – THIS SECTION NOT USED

PART 3 - EXECUTION

3.1. OVERALL RESPONSIBILITIES OF ALL CONTRACTORS

- A. All contractors shall be responsible for reviewing the drawings and specifications within their Divisions of Work to provide a complete and comprehensive list of submittals to the General Contractor.
- B. Each list shall indicate the title of the submittal, the associated specification of the submittal, whether the submittal can be considered an early/middle/late submittal, the anticipated date the submittal will be provided and the anticipated date the submittal needs to be approved.
- C. Contractors shall be aware that the goals for submittal review by the Architect staff and City staff will be as follows:
 - 1. For items on the Critical Path as identified by the GC, five (5) working days
 - 2. For most other submittals ten (10) working days
 - 3. Additional time may be needed for complex submittals or if re-submittals are required.
- D. The general format of the Submittal Schedule shall be tabular as per this example:

<u>Title</u>	<u>Specification</u>	<u>Critical Path (Y or N)</u>	<u>Date provided</u>	<u>Date required</u>	<u>Remarks</u>
Concrete Mix Design	03 30 00	Y	Oct 1, 2014	Oct 15, 2014	
Paint Draw Downs	09 90 00	N	Jan 2, 2015	Jan 20, 2015	

3.2. GENERAL CONTRACTORS RESPONSIBILITIES

- A. The General Contractor shall be responsible for all of the following:
 - 1. Consolidating all submittal lists from individual contractors into one master list.
 - 2. Reviewing all submitted lists for completeness, timing with the overall contract, etc. The GC shall meet with individual contractors to make changes as necessary.
 - 3. Upload the completed Submittals Schedule to the Submittal Library on the Project Management Web Site for review as SD 003.0. See Specification 01 33 23 Submittals for more information on this procedure.
 - 4. Resubmit the schedule as needed after initial reviews have been completed.
- B. The GC shall work with other contractors to amend the Submittals Schedule throughout the execution of the project based on changes and modifications as needed.
- C. The GC and Project Architect shall be responsible for reviewing and briefing the submittal schedule and submittals status at each bi-weekly construction meeting.

3.3. STAFF REVIEW RESPONSIBILITIES

- A. The Project Architect, consulting staff, Commissioning Agent (CxA), Owner, and city staff will review the Submittal Schedule for completeness per the plans and specifications within their divisions of work. The reviewing staff may provide comments as needed. Some examples might include the following:
 - 1. Submittal not required
 - 2. Provide photos of samples with digital submittal
 - 3. Insure one submittal for complete system
 - 4. Append the schedule to include...
 - 5. See Specification <xyz> for additional requirements
- B. The Project Architect and City Project Manager will finalize review comments regarding the Submittal Schedule. Re-submittal of the submittal schedule may be required.

10 3.1. DAILY PROGRESS JOURNAL 1
11 3.2. CONSTRUCTION PROGRESS MEETINGS 2
12

PART 1 – GENERAL

1.1. SUMMARY

- 16 A. Daily records of project activities, resources used, weather conditions, and other information related to the
17 ongoing progress of the project are extremely important at all levels of Construction Management.
18 B. Daily records provide the base for weekly progress reports and updating progress schedules.

1.2. RELATED SPECIFICATION SECTIONS

- 21 A. Section 01 31 19 Project Meetings
22 B. Section 01 31 23 Project Management Web Site
23 C. Section 01 32 23 Photographic Documentation
24

1.3. PERFORMANCE AND QUALITY ASSURANCE REQUIREMENTS

- 26 A. The General Contractor (GC) shall be responsible for all Construction Progress Reporting as outlined in this and
27 other specifications as noted.
28 B. The GC shall maintain daily progress journals in a format of his/her choosing provided it is legible and contains
29 the information as outlined in Section 3.1 below.
30 C. The journal shall be located in the job trailer and shall be reviewable by the Project Architect or City Project
31 Manager if so requested.
32

PART 2 – PRODUCTS - THIS SECTION NOT USED

PART 3 - EXECUTION

3.1. DAILY PROGRESS JOURNAL

- 38 A. The GC shall maintain a daily progress journal of daily Work activities for each day on which Work is performed
39 by any employee or entity for which the GC is responsible. Such reports shall include all relevant data
40 concerning the progress of Work activities the GC and Subcontractors are responsible for and the effect of that
41 activity on the time of performance of the Contract.
42 B. Journal entries shall be made on the Daily Work Report Form located in the Construction Progress-Daily Journal
43 Library on the Project Management Web Site. The form consists of the following areas:
44 1. Weather; include temperature, humidity, precipitation, wind and other related information such as
45 significant storm events, times, and details.
46 2. Work completed by trade
47 3. Delays encountered
48 4. Deliveries received or delayed
49 5. Hot issues that need to be addressed
50 6. Safety issues
51 7. Photograph progress and upload to the Photo Library on the Project Management Web Site.
52 8. Other including inspections, testing, etc.
53 9. Space for attaching documents
54 C. Daily Work activity reports shall be completed and signed by the GC's Job Superintendent or other on-site
55 representative authorized by the GC confirming each such report is current, accurate and complete.
56 D. If applicable the GC shall include schedules of quantities and costs, progress schedules, wage rates, reports,
57 estimates, invoices, records and other data as requested by the CPM concerning Work performed or to be

1 performed under this Contract if the CPM determines such information is needed to substantiate Change Order
2 proposals, claims, or to resolve disputes.
3

4 **3.2. CONSTRUCTION PROGRESS MEETINGS**

5 A. The GC shall provide a verbal summary of the previous two (2) weeks progress reports at each bi-weekly
6 construction progress meeting.
7

12

PART 1 – GENERAL

1.1. SCOPE

- 16 A. The General Contractor (GC) shall be required to take weekly digital photographs of construction progress and
17 upload the photos directly to the Project Management Web Site (PMWS).
18

1.2. RELATED SPECIFICATION SECTIONS

- 20 A. Section 01 31 23 Project Management Web Site
21 B. Section 01 32 26 Construction Progress Reporting
22

PART 2 – PRODUCTS - THIS SECTION NOT USED

PART 3 - EXECUTION

3.1. REQUIREMENTS FOR DIGITAL PHOTOGRAPHS

- 28 A. All digital photographs shall be taken with a good quality digital camera, cell phone, tablet, and other such digital
29 device.
30 B. Digital photographs shall be properly zoomed in/out to capture a specific level of detail as necessary.
31 C. Digital photographs shall be formatted to achieve a good, clear, and detailed image where the final file size is
32 between 600 KB and 1.2 MB (1200KB).
33 D. The camera default naming convention is acceptable. The GC does not need to rename or specifically identify
34 pictures in the title.
35 E. All digital photographs shall be saved in a JPEG (.jpg) format and uploaded directly to the PMWS.
36

3.2. PICTURE CONTENT

- 38 A. The GC shall take exterior photographs from at least two (2) different angles.
39 1. This requirement shall only be applicable when there is exterior work connected with the project.
40 2. When applicable this requirement shall begin prior to commencing any site work.
41 3. This requirement shall end when the exterior work has been substantially completed.
42 4. This requirement may be suspended due to weather conditions or substantial delays in exterior progress.
43 B. The GC shall take interior photographs of interior construction, equipment installation, rough-ins and other such
44 progress that helps document weekly progress reporting. Interior photographs should focus on specific
45 significant installations as well as general progress throughout the progress of the contract.
46

3.3. PROJECT MANAGEMENT WEB SITE

- 48 A. The GC shall upload the digital photographs to the appropriate progress folder in the Project Images Library.
49 B. Progress folders are labeled with the Construction Week Number and the date for Monday of that week.
50 C. The GC shall notify the City of Madison Project Manager if additional progress folders need to be created.

9 PART 3 - EXECUTION 2
10 3.1. GENERAL CONTRACTORS PROCEDURES 2
11 3.2. SUBMITTAL REVIEW 3
12 3.3. PROJECT ARCHITECTS REVIEW 3
13

PART 1 – GENERAL

1.1. SUMMARY

- 17 A. The General Contractor (GC) shall be responsible for providing submittals for review of all contractors and sub-
18 contractors as designated in the construction documents. Submittals shall include but not be limited to all of the
19 following:
20 1. Equipment specified and pre-approved in the specification; to ensure quality, construction, and
21 performance specifications have not changed since final design.
22 2. Equipment specified by performance in the specification; to ensure that the intended quality,
23 construction, and performance specified is met by the selected material or product.
24 3. Shop, piece, erection, and other such drawings as indicated in the specifications to ensure all structural,
25 dimensional, and assembly requirements are being met.
26 4. Submittals indicating installation sequencing
27 5. Submittals indicating control sequencing
28 6. Contractor licensing, certification, and other such regulatory documentation when required by a
29 specification.
30 7. Other submittals as may be required by individual specifications.
31 B. The submittal process shall not be used to determine alternates to specified products or equipment. All
32 considerations shall be reviewed during the bidding process and acceptable alternates shall be acknowledged by
33 addendum prior to the closing of bidding. See bidding instructions for the information on submitting alternates
34 for consideration.
35 D. In the event that a manufacturer has significantly changed a product (discontinued a model, changed dimension
36 or performance data changed available colors, etc.) since bid opening the GC shall submit a Request for
37 Information (RFI) to the Project Architect requesting other approved alternates prior to uploading a digital
38 submittal.
39 E. Contractors and sub-contractors shall be responsible for knowing the submittal requirements of ALL sections
40 within their scope of work under the contract. The Owner reserves the right to request documentation on any
41 materials, equipment, or product being installed where a submittal is not on file. If the material, equipment, or
42 product installed is determined not to meet the intent of the specification the contractor/sub-contractor shall be
43 required to remove and replace the items involved. The GC shall be solely responsible for all costs associated
44 with the removal and replacement.
45

1.2. RELATED REFERENCES

- 46 A. Section 01 29 76 Progress Payment Procedures
47 B. Section 01 31 23 Project Management Web Site
48 C. Section 01 32 19 Submittals Schedule
49 D. Section 01 32 26 Construction Progress Reporting
50 E. Section 01 91 00 Commissioning
51 F. All Technical Specifications, contract documents, construction drawings, and any published addendums during
52 the bidding process.
53 G. All contract documents generated during the execution of the contract including but not limited to Requests for
54 Information (RFI) and Construction Bulletins (CB).
55

1.3. SUBMITTAL REQUIREMENTS

- 56
57 A. A completed submittal shall meet the following requirements:
58

- 1 1. Digital submittal shall be original PDF of manufacturer's data sheets or high quality color scan of the
2 same.
- 3 a. Submittals shall not include sales fliers or other similar documents that typically do not provide
4 complete manufacturers data.
- 5 2. Documents within the PDF submittal shall be printable to a sized sheet no less than 8-1/2 by 11 inches
6 and no larger than 24 by 36 inches.
- 7 3. At the beginning of each submittal the contractor shall identify the plan reference (WC-1, EF-3, etc.) in
8 RED block letters that the submittal is for.
- 9 4. Where multiple model numbers appear in a table the contractor shall identify the specific model being
10 submitted by using a RED square, box, or other designation to distinguish the correct model from others
11 on the page.
- 12 B. A complete submittal will include all information associated with the product or equipment as presented in
13 plans, equipment tables, and specifications. Information shall include but not be limited to the following:
 - 14 1. Dimensional data
 - 15 2. Performance data
 - 16 3. Resource requirements, power, water, waste, etc
 - 17 4. Clearance and maintenance requirements
 - 18 5. Finish information, colors, textures, etc.
 - 19 6. Warranty information
- 20 C. Where a submittal includes material samples (carpet, tile, paint draw downs, etc.) the contractor shall do the
21 following:
 - 22 1. The Contractor shall submit the sample(s) as indicated in the specification.
 - 23 2. The Contractor shall include a quality photograph(s) of the product with the digital submittal.
24 Photographs shall meet the following requirements:
 - 25 a. Formatted to be between 500Kb and 1.0 Mb in file size
 - 26 b. Have no glare or flash reflection on the sample
 - 27 c. Sample fills the frame of the photo and shows detail as needed. Include multiple photos from
28 other angles as needed.
 - 29 d. Scanned copies of products or photos are not acceptable.
- 30 D. Uploaded submittals should be relative and related to a specific written specification.
 - 31 1. Do not upload submittals under a broad category or division (I.E. HVAC 23 00 00). Always upload by the
32 specific specification that identifies a required product or performance to be met.
 - 33 2. Group related items together if the specification is written that way. (I.E. all of the plumbing fixtures and
34 trim relative to one specific specification should be submitted together).
 - 35 3. Submittals shall be grouped and adhere to the divisions in the submittal schedule. Submittals that do not
36 conform to the submittal schedule and/or specification divisions will be rejected for re-submittal.

40 **PART 3 - EXECUTION**

41
42 **3.1. GENERAL CONTRACTORS PROCEDURES**

- 43 A. All required submittals will be uploaded to the Construction Administration-Submittal Drawings Library on the
44 Project Management Web Site (PMWS) by the GC.
 - 45 1. The GC shall open a new Submittal Form in the Submittals Drawings Library for each required submittal
46 from the Submittals schedule.
 - 47 2. Fill in required information on the form that will be used for routing the review and comments.
 - 48 3. Attach all documentation as described in Section 1.3 above.
 - 49 a. Submit samples under separate cover to the Project Architect when necessary.
- 50 B. Uploading the submittal indicates that the GC has reviewed and approved the submittal against the contract
51 document requirements.
- 52 C. The GC shall discuss submittal status at all progress meetings and shall monitor submittal review/approval/re-
53 submittal so as to not incur delays in the project schedule.
- 54 D. A completed upload of the submittal to the PMWS initiates the review process workflow.
- 55 E. The GC and sub-contractors shall provide re-submittals as required.

1 **3.2. SUBMITTAL REVIEW**

- 2 A. Upon completion of the submittal upload by the GC the PMWS automatically notifies the appropriate
3 Architect/Engineer and Owner Representative, including CxA, by Division/Specification number that there is a
4 submittal for review.
5 B. The submittal shall be reviewed internally by the required Architect/Engineer and Owner Representative and
6 CxA in a timely fashion and provide commentary on missing items, incorrect information, or incomplete shop
7 drawings, etc as needed.
8 C. When the internal review is completed the PMWS will notify the Project Architect the submittal is ready for final
9 review.

10
11 **3.3. PROJECT ARCHITECTS REVIEW**

- 12 A. Upon completion of the internal review the Project Architect shall review all internal review comments, confer
13 with the CPM and CxA as needed and determine the appropriate disposition status for the submittal (approved
14 or resubmit).
15 C. The Project Architect shall summarize final internal review comments onto the submittal cover sheet, provide a
16 final disposition of the submittal and update the review status of the submittal to "Complete..." (with or w/o
17 comments) or "Rejected".
18 D. A completed Final Review status initiates the PMWS to notify the GC and appropriate sub-contractor(s) that the
19 review of the submittal has been completed.

- 1.10 [SPECIAL TESTS AND INSPECTIONS](#)

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

- 1.1 [TEST AND INSPECTION LOG](#)
- 1.2 [REPAIR AND PROTECTION](#)

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes administrative and procedural requirements for quality assurance and quality control.
- B. Testing and inspection services are required to verify compliance with requirements specified or indicated. These services do not relieve Contractor of responsibility for compliance with the Contract Document requirements.
 - 1. Specified tests, inspections, and related actions do not limit Contractor's other quality-assurance and quality-control procedures that facilitate compliance with the Contract Document requirements.
 - 2. Requirements for Contractor to provide quality-assurance and quality-control services required by Architect, Owner, Commissioning Authority, or authorities having jurisdiction are not limited by provisions of this Section.

1.2 DEFINITIONS

- A. Experienced: When used with an entity or individual, "experienced" unless otherwise further described means having successfully completed a minimum of five previous projects similar in nature, size, and extent to this Project; being familiar with special requirements indicated; and having complied with requirements of authorities having jurisdiction.
- B. Field Quality-Control Tests: Tests and inspections that are performed on-site for installation of the Work and for completed Work.
- C. Installer/Applicator/Erector: Contractor or another entity engaged by Contractor as an employee, Subcontractor, or Sub-subcontractor, to perform a particular construction operation, including installation, erection, application, assembly, and similar operations.
 - 1. Use of trade-specific terminology in referring to a trade or entity does not require that certain construction activities be performed by accredited or unionized individuals, or that requirements specified apply exclusively to specific trade(s).
- D. Mockups: Full-size physical assemblies that are constructed on-site either as freestanding temporary built elements or as part of permanent construction. Mockups are constructed to verify selections made under Sample submittals; to demonstrate aesthetic effects and qualities of materials and execution; to review coordination, testing, or operation; to show interface between dissimilar materials; and to demonstrate compliance with specified installation tolerances. Mockups are not Samples. Unless otherwise indicated, approved mockups establish the standard by which the Work will be judged.
 - 1. Laboratory Mockups: Full-size physical assemblies constructed and tested at testing facility to verify performance characteristics.
 - 2. Integrated Exterior Mockups: Mockups of the exterior envelope constructed on-site as as part of permanent construction, consisting of multiple products, assemblies, and subassemblies.
 - 3. Room Mockups: Mockups of typical interior spaces complete with wall, floor, and ceiling finishes; doors; windows; millwork; casework; specialties; furnishings and equipment; and lighting.
- E. Preconstruction Testing: Tests and inspections performed specifically for Project before products and materials are incorporated into the Work, to verify performance or compliance with specified criteria.

- 1 F. Product Tests: Tests and inspections that are performed by a nationally recognized testing laboratory
2 (NRTL) according to 29 CFR 1910.7, by a testing agency accredited according to NIST's National
3 Voluntary Laboratory Accreditation Program (NVLAP), or by a testing agency qualified to conduct product
4 testing and acceptable to authorities having jurisdiction, to establish product performance and compliance
5 with specified requirements.
6 G. Source Quality-Control Tests: Tests and inspections that are performed at the source; for example, plant,
7 mill, factory, or shop.
8 H. Testing Agency: An entity engaged to perform specific tests, inspections, or both. Testing laboratory shall
9 mean the same as testing agency.
10 I. Quality-Assurance Services: Activities, actions, and procedures performed before and during execution of
11 the Work to guard against defects and deficiencies and substantiate that proposed construction will comply
12 with requirements.
13 J. Quality-Control Services: Tests, inspections, procedures, and related actions during and after execution of
14 the Work to evaluate that actual products incorporated into the Work and completed construction comply
15 with requirements. Contractor's quality-control services do not include contract administration activities
16 performed by Architect.

17 **1.3 DELEGATED-DESIGN SERVICES**

- 18 A. Performance and Design Criteria: Where professional design services or certifications by a design
19 professional licensed in the State of Wisconsin are specifically required of Contractor by the Contract
20 Documents, provide products and systems complying with specific performance and design criteria
21 indicated.

22 **1.4 CONFLICTING REQUIREMENTS**

- 23 A. Conflicting Standards and Other Requirements: If compliance with two or more standards or requirements
24 are specified and the standards or requirements establish different or conflicting requirements for minimum
25 quantities or quality levels, comply with the most stringent requirement. Refer conflicting requirements that
26 are different, but apparently equal, to Architect for direction before proceeding.
27 B. Minimum Quantity or Quality Levels: The quantity or quality level shown or specified shall be the minimum
28 provided or performed. The actual installation may comply exactly with the minimum quantity or quality
29 specified, or it may exceed the minimum within reasonable limits. To comply with these requirements,
30 indicated numeric values are minimum or maximum, as appropriate, for the context of requirements. Refer
31 uncertainties to Architect for a decision before proceeding.

32 **1.5 ACTION SUBMITTALS**

- 33 A. Delegated-Design Services Submittal: In addition to Shop Drawings, Product Data, and other required
34 submittals, submit a statement signed and sealed by the responsible design professional, for each product
35 and system specifically assigned to Contractor to be designed or certified by a design professional
36 currently licensed in the State of Wisconsin, indicating that the products and systems are in compliance
37 with performance and design criteria indicated. Include list of codes, loads, and other factors used in
38 performing these services.

39 **1.6 INFORMATIONAL SUBMITTALS**

- 40 A. Contractor's Statement of Responsibility: When required by authorities having jurisdiction, submit copy of
41 written statement of responsibility submitted to authorities having jurisdiction before starting work on the
42 following systems:
43 1. Seismic-force-resisting system, designated seismic system, or component listed in the Statement
44 of Special Inspections.
45 2. Main wind-force-resisting system or a wind-resisting component listed in the Statement of Special
46 Inspections.
47 B. Testing Agency Qualifications: For testing agencies specified in "Quality Assurance" Article to demonstrate
48 their capabilities and experience. Include proof of qualifications in the form of a recent report on the
49 inspection of the testing agency by a recognized authority.
50 C. Permits, Licenses, and Certificates: For Owner's record, submit copies of permits, licenses, certifications,
51 inspection reports, releases, jurisdictional settlements, notices, receipts for fee payments, judgments,
52 correspondence, records, and similar documents established for compliance with standards and
53 regulations bearing on performance of the Work.
54

- 1 **1.7 REPORTS AND DOCUMENTS**
- 2 A. Test and Inspection Reports: Prepare and submit certified written reports specified in other Sections.
- 3 Include the following:
- 4 1. Date of issue.
- 5 2. Project title and number.
- 6 3. Name, address, telephone number, and email address of testing agency.
- 7 4. Dates and locations of samples and tests or inspections.
- 8 5. Names of individuals making tests and inspections.
- 9 6. Description of the Work and test and inspection method.
- 10 7. Identification of product and Specification Section.
- 11 8. Complete test or inspection data.
- 12 9. Test and inspection results and an interpretation of test results.
- 13 10. Record of temperature and weather conditions at time of sample taking and testing and inspection.
- 14 11. Comments or professional opinion on whether tested or inspected Work complies with the Contract
- 15 Document requirements.
- 16 12. Name and signature of laboratory inspector.
- 17 13. Recommendations on retesting and reinspecting.
- 18 B. Manufacturer's Technical Representative's Field Reports: Prepare written information documenting
- 19 manufacturer's technical representative's tests and inspections specified in other Sections. Include the
- 20 following:
- 21 1. Statement on condition of substrates and their acceptability for installation of product.
- 22 2. Statement that products at Project site comply with requirements.
- 23 3. Summary of installation procedures being followed, whether they comply with requirements and, if
- 24 not, what corrective action was taken.
- 25 4. Results of operational and other tests and a statement of whether observed performance complies
- 26 with requirements.
- 27 5. Other required items indicated in individual Specification Sections.
- 28 C. Factory-Authorized Service Representative's Reports: Prepare written information documenting
- 29 manufacturer's factory-authorized service representative's tests and inspections specified in other
- 30 Sections. Include the following:
- 31 1. Statement that equipment complies with requirements.
- 32 2. Results of operational and other tests and a statement of whether observed performance complies
- 33 with requirements.
- 34 3. Other required items indicated in individual Specification Sections.
- 35 **1.8 QUALITY ASSURANCE**
- 36 A. General: Qualifications paragraphs in this article establish the minimum qualification levels required;
- 37 individual Specification Sections specify additional requirements.
- 38 B. Manufacturer Qualifications: A firm experienced in manufacturing products or systems similar to those
- 39 indicated for this Project and with a record of successful in-service performance, as well as sufficient
- 40 production capacity to produce required units. As applicable, procure products from manufacturers able to
- 41 meet qualification requirements, warranty requirements, and technical or factory-authorized service
- 42 representative requirements.
- 43 C. Fabricator Qualifications: A firm experienced in producing products similar to those indicated for this
- 44 Project and with a record of successful in-service performance, as well as sufficient production capacity to
- 45 produce required units.
- 46 D. Installer Qualifications: A firm or individual experienced in installing, erecting, applying, or assembling work
- 47 similar in material, design, and extent to that indicated for this Project, whose work has resulted in
- 48 construction with a record of successful in-service performance.
- 49 E. Professional Engineer Qualifications: A professional engineer who is legally qualified to practice in
- 50 jurisdiction where Project is located and who is experienced in providing engineering services of the kind
- 51 indicated. Engineering services are defined as those performed for installations of the system, assembly,
- 52 or product that are similar in material, design, and extent to those indicated for this Project.
- 53 F. Specialists: Certain Specification Sections require that specific construction activities shall be performed
- 54 by entities who are recognized experts in those operations. Specialists shall satisfy qualification
- 55 requirements indicated and shall be engaged for the activities indicated.
- 56 1. Requirements of authorities having jurisdiction shall supersede requirements for specialists.
- 57 G. Testing Agency Qualifications: An NRTL, an NVLAP, or an independent agency with the experience and
- 58 capability to conduct testing and inspection indicated, as documented according to ASTM E 329; and with
- 59 additional qualifications specified in individual Sections; and, where required by authorities having
- 60 jurisdiction, that is acceptable to authorities.

- 1 H. Manufacturer's Technical Representative Qualifications: An authorized representative of manufacturer who
2 is trained and approved by manufacturer to observe and inspect installation of manufacturer's products
3 that are similar in material, design, and extent to those indicated for this Project.
- 4 I. Factory-Authorized Service Representative Qualifications: An authorized representative of manufacturer
5 who is trained and approved by manufacturer to inspect installation of manufacturer's products that are
6 similar in material, design, and extent to those indicated for this Project.
- 7 J. Preconstruction Testing: Where testing agency is indicated to perform preconstruction testing for
8 compliance with specified requirements for performance and test methods, comply with the following:
9 1. Contractor responsibilities include the following:
10 a. Provide test specimens representative of proposed products and construction.
11 b. Submit specimens in a timely manner with sufficient time for testing and analyzing results to
12 prevent delaying the Work.
13 c. Build laboratory mockups at testing facility using personnel, products, and methods of
14 construction indicated for the completed Work.
15 d. When testing is complete, remove test specimens and test assemblies, mockups (unless
16 indicated to be part of the final work), and laboratory mockups; do not reuse products on
17 Project.
- 18 2. Testing Agency Responsibilities: Submit a certified written report of each test, inspection, and
19 similar quality-assurance service to Architect and Commissioning Authority, with copy to
20 Contractor. Interpret tests and inspections and state in each report whether tested and inspected
21 work complies with or deviates from the Contract Documents.
- 22 K. Mockups: Before installing portions of the Work requiring mockups, build mockups for each form of
23 construction and finish required to comply with the following requirements, using materials indicated for the
24 completed Work:
25 1. Build mockups of size indicated.
26 2. Build mockups in location indicated or, if not indicated, as directed by Architect or Owner.
27 3. Notify Architect and Owner seven days in advance of dates and times when mockups will be
28 constructed.
29 4. Employ supervisory personnel who will oversee mockup construction. Employ workers that will be
30 employed to perform same tasks during the construction at Project.
31 5. Demonstrate the proposed range of aesthetic effects and workmanship.
32 6. Obtain Architect's and Owner's approval of mockups before starting corresponding work,
33 fabrication, or construction.
34 a. Allow seven days for initial review and each re-review of each mockup.
35 7. Maintain mockups during construction in an undisturbed condition as a standard for judging the
36 completed Work.
37 8. Demolish and remove mockups when directed unless otherwise indicated.
- 38 L. Laboratory Mockups: Comply with requirements of preconstruction testing and those specified in individual
39 Specification Sections.

40 **1.9 QUALITY CONTROL**

- 41 A. Owner Responsibilities: Where quality-control services are indicated as Owner's responsibility, Owner will
42 engage a qualified testing agency to perform these services.
43 1. Owner will furnish Contractor with names, addresses, and telephone numbers of testing agencies
44 engaged and a description of types of testing and inspection they are engaged to perform.
45 2. Costs for retesting and reinspecting construction that replaces or is necessitated by work that failed
46 to comply with the Contract Documents will be charged to Contractor.
- 47 B. Contractor Responsibilities: Tests and inspections not explicitly assigned to Owner are Contractor's
48 responsibility. Perform additional quality-control activities, whether specified or not, to verify and document
49 that the Work complies with requirements.
50 1. Engage a qualified testing agency to perform quality-control services.
51 a. Contractor shall not employ same entity engaged by Owner, unless agreed to in writing by
52 Owner.
53 2. Notify testing agencies at least 48 hours in advance of time when Work that requires testing or
54 inspection will be performed.
55 3. Where quality-control services are indicated as Contractor's responsibility, submit a certified written
56 report, in duplicate, of each quality-control service.
57 4. Testing and inspection requested by Contractor and not required by the Contract Documents are
58 Contractor's responsibility.
59 5. Submit additional copies of each written report directly to authorities having jurisdiction, when they
60 so direct.
- 61 C. Retesting/Reinspecting: Regardless of whether original tests or inspections were Contractor's

- 1 responsibility, provide quality-control services, including retesting and reinspecting, for construction that
2 replaced Work that failed to comply with the Contract Documents.
- 3 D. Testing Agency Responsibilities: Cooperate with Architect, Commissioning Authority, Owner and
4 Contractor in performance of duties. Provide qualified personnel to perform required tests and inspections.
- 5 1. Notify Architect, Commissioning Authority, Owner and Contractor promptly of irregularities or
6 deficiencies observed in the Work during performance of its services.
- 7 2. Determine the locations from which test samples will be taken and in which in-situ tests are
8 conducted.
- 9 3. Conduct and interpret tests and inspections and state in each report whether tested and inspected
10 work complies with or deviates from requirements.
- 11 4. Submit a certified written report, in duplicate, of each test, inspection, and similar quality-control
12 service through Contractor.
- 13 5. Do not release, revoke, alter, or increase the Contract Document requirements or approve or
14 accept any portion of the Work.
- 15 6. Do not perform duties of Contractor.
- 16 E. Manufacturer's Field Services: Where indicated, engage a factory-authorized service representative to
17 inspect field-assembled components and equipment installation, including service connections. Report
18 results in writing as specified in Section 01 33 00 "Submittal Procedures."
- 19 F. Manufacturer's Technical Services: Where indicated, engage a manufacturer's technical representative to
20 observe and inspect the Work. Manufacturer's technical representative's services include participation in
21 preinstallation conferences, examination of substrates and conditions, verification of materials, observation
22 of Installer activities, inspection of completed portions of the Work, and submittal of written reports.
- 23 G. Associated Contractor Services: Cooperate with agencies and representatives performing required tests,
24 inspections, and similar quality-control services, and provide reasonable auxiliary services as requested.
25 Notify agency sufficiently in advance of operations to permit assignment of personnel. Provide the
26 following:
- 27 1. Access to the Work.
- 28 2. Incidental labor and facilities necessary to facilitate tests and inspections.
- 29 3. Adequate quantities of representative samples of materials that require testing and inspection.
30 Assist agency in obtaining samples.
- 31 4. Facilities for storage and field curing of test samples.
- 32 5. Preliminary design mix proposed for use for material mixes that require control by testing agency.
- 33 6. Security and protection for samples and for testing and inspection equipment at Project site.
- 34 H. Coordination: Coordinate sequence of activities to accommodate required quality-assurance and quality-
35 control services with a minimum of delay and to avoid necessity of removing and replacing construction to
36 accommodate testing and inspection.
- 37 1. Schedule times for tests, inspections, obtaining samples, and similar activities.

38 **1.10 SPECIAL TESTS AND INSPECTIONS**

- 39 A. Special Tests and Inspections: Owner will engage a qualified testing agency to conduct special tests and
40 inspections required by authorities having jurisdiction as the responsibility of Owner, and as follows:
- 41 1. Verifying that manufacturer maintains detailed fabrication and quality-control procedures and
42 reviewing the completeness and adequacy of those procedures to perform the Work.
- 43 2. Notifying Architect, Commissioning Authority, Owner, and Contractor promptly of irregularities and
44 deficiencies observed in the Work during performance of its services.
- 45 3. Submitting a certified written report of each test, inspection, and similar quality-control service to
46 Architect and Commissioning Authority, through Owner with copy to Contractor and to authorities
47 having jurisdiction.
- 48 4. Submitting a final report of special tests and inspections at Substantial Completion, which includes
49 a list of unresolved deficiencies.
- 50 5. Interpreting tests and inspections and stating in each report whether tested and inspected work
51 complies with or deviates from the Contract Documents.
- 52 6. Retesting and reinspecting corrected work.

1 **PART 2 - PRODUCTS (Not Used)**

2 **PART 3 - EXECUTION**

3 **3.1 TEST AND INSPECTION LOG**

- 4 A. Test and Inspection Log: Prepare a record of tests and inspections. Include the following:
- 5 1. Date test or inspection was conducted.
 - 6 2. Description of the Work tested or inspected.
 - 7 3. Date test or inspection results were transmitted to Architect.
 - 8 4. Identification of testing agency or special inspector conducting test or inspection.
- 9 B. Maintain log at Project site. Post changes and revisions as they occur. Provide access to test and
10 inspection log for Architect's, Commissioning Authority's, and Owner's reference during normal working
11 hours.
- 12 1. Submit log at Project closeout as part of Project Record Documents.

13 **3.2 REPAIR AND PROTECTION**

- 14 A. General: On completion of testing, inspection, sample taking, and similar services, repair damaged
15 construction and restore substrates and finishes.
- 16 1. Provide materials and comply with installation requirements specified in other Specification
17 Sections or matching existing substrates and finishes. Restore patched areas and extend
18 restoration into adjoining areas with durable seams that are as invisible as possible. Comply with
19 the Contract Document requirements for cutting and patching in Section 01 73 00 "Execution."
- 20 B. Protect construction exposed by or for quality-control service activities.
- 21 C. Repair and protection are Contractor's responsibility, regardless of the assignment of responsibility for
22 quality-control services.
- 23

PART 3 – EXECUTION

Not Used

PART 1 - GENERAL

1.1 DEFINITIONS

- A. General: Basic Contract definitions are included in the Conditions of the Contract.
- B. "Approved": When used to convey Architect's action on Contractor's submittals, applications, and requests, "approved" is limited to Architect's duties and responsibilities as stated in the Conditions of the Contract.
- C. "Directed": A command or instruction by Architect. Other terms including "requested," "authorized," "selected," "required," and "permitted" have the same meaning as "directed."
- D. "Indicated": Requirements expressed by graphic representations or in written form on Drawings, in Specifications, and in other Contract Documents. Other terms including "shown," "noted," "scheduled," and "specified" have the same meaning as "indicated."
- E. "Regulations": Laws, ordinances, statutes, and lawful orders issued by authorities having jurisdiction, and rules, conventions, and agreements within the construction industry that control performance of the Work.
- F. "Furnish": Supply and deliver to Project site, ready for unloading, unpacking, assembly, installation, and similar operations.
- G. "Install": Unload, temporarily store, unpack, assemble, erect, place, anchor, apply, work to dimension, finish, cure, protect, clean, and similar operations at Project site.
- H. "Provide": Furnish and install, complete and ready for the intended use.
- I. "Project Site": Space available for performing construction activities. The extent of Project site is shown on Drawings and may or may not be identical with the description of the land on which Project is to be built.

1.2 CITY OF MADISON STANDARD SPECIFICATIONS FOR PUBLIC WORKS

- A. All work performed in the Right-of-Way shall be performed in accordance with the current version of the City of Madison Standard Specifications for Public Works Construction which can be found at <http://www.cityofmadison.com/business/pw/documents/StdSpecs/2017>. Note that measurement and payment sections of these standard specifications are not applicable to this project.

1.3 INDUSTRY STANDARDS

- A. Applicability of Standards: Unless the Contract Documents include more stringent requirements, applicable construction industry standards have the same force and effect as if bound or copied directly into the Contract Documents to the extent referenced. Such standards are made a part of the Contract Documents by reference.
- B. Publication Dates: Comply with standards in effect as of date of the Contract Documents unless otherwise indicated.
- C. Copies of Standards: Each entity engaged in construction on Project should be familiar with industry standards applicable to its construction activity. Copies of applicable standards are not bound with the Contract Documents.
 - 1. Where copies of standards are needed to perform a required construction activity, obtain copies directly from publication source.

1.4 ABBREVIATIONS AND ACRONYMS

- A. Industry Organizations: Where abbreviations and acronyms are used in Specifications or other Contract Documents, they shall mean the recognized name of the entities indicated in Gale's "Encyclopedia of Associations: National Organizations of the U.S." or in Columbia Books' "National Trade & Professional Associations of the United States."
- B. Industry Organizations: Where abbreviations and acronyms are used in Specifications or other Contract Documents, they shall mean the recognized name of the entities in the following list.
1. AABC - Associated Air Balance Council; www.aabc.com.
 2. AAMA - American Architectural Manufacturers Association; www.aamanet.org.

14 3.2. MOCKUP CONSTRUCTION 2
15 3.3. MOCKUP REVIEW 2
16 3.4. FINAL SUBMITTAL 3
17

PART 1 – GENERAL

1.1. SUMMARY

- A. Definition
- Mockups are field samples constructed, applied, or assembled at the project site for review by the Owner, Owners Representative, Architect and Consultants.
 - Mockups are three dimensional, true scale models that illustrate materials and methods, equipment, workmanship, or location; based on plans, details, and assemblies.
- B. Approved mockups establish the standard of quality by which the final work will be judged.
- C. Approved mockups shall be properly documented and entered into the Submittal Library on the Project Management Web Site like any other required submittal. See section 3.4 below for more information.

1.2. RELATED SPECIFICATIONS

- A. Section 01 26 13 Request for Information (RFI)
- B. Section 01 26 46 Change Bulletin (CB)
- C. Section 01 26 63 Change Order (CO)
- D. Section 01 31 19 Project Meetings
- E. Section 01 32 16 Construction Progress Schedules
- F. Section 01 33 23 Submittals
- G. Section 01 45 00 Quality Control

1.3. RELATED DOCUMENTS

- A. The following documents shall be used for preparing mockups.
- All plans, specifications, and details including those derived as revisions (RFI, CB, CO).
 - Construction Progress Schedules. Mockups shall be done and completed in a timely fashion for review and approval so as to not impact the Contractors project schedule.
 - Any Manufacturers installation/assembly instructions.

1.4. PERFORMANCE REQUIREMENTS

- A. All Contractors shall be responsible for providing and constructing mockups as specified in their Division of Work in the plans and specifications.
- B. Materials to be used shall be as specified in the construction documents, full sized and properly assembled.
- C. Completed mockups shall be of sufficient size to provide visible detail of all components as needed for the sample.

1.5. QUALITY ASSURANCE

- A. The General Contractor (GC) shall be responsible for coordinating all of the following as needed:
- Designating the location for the mockup construction
 - Coordinating the work of all contractors and materials required to complete the mockup
 - Ensuring that the mockup meets the intent of the construction documents before scheduling the mockup review meeting.

1
2 **PART 2 - PRODUCTS**

3
4 **2.1. MATERIALS**

- 5 A. The materials used in mockups shall be only those materials indicated in the plans, specifications, and favorably
6 reviewed submittals.
7 B. Mockups shall be made of full scale materials as delivered to the project site.
8 C. All materials associated with a particular detail, construction method, manufacturer's installation instructions
9 shall be properly represented and visible in the mockup. This includes but is not limited to finished mortar joints,
10 sealants, backer rods, tie bars, rebar, etc.
11

12 **PART 3 - EXECUTION**

13
14 **3.1. REVIEW THE PLANS AND SPECIFICATIONS**

- 15 A. The GC shall review the plans and specifications with all required contractors prior to constructing the mockup.
16 1. Mockups that will be built and remain in place, if favorably reviewed, will be installed in an area easily
17 accessible for review.
18 2. Mockups that will not be built in place or will not remain will be constructed in a space on the project site
19 protected from weather, construction traffic, and other such disturbances until such time as the
20 associated work has been completed.
21 3. Insure all products being represented in the mockup meet the plans, specifications, and any published
22 changes.
23

24 **3.2. MOCKUP CONSTRUCTION**

- 25 A. Mockups shall be of sufficient size to show various material adjacencies, connectivity, patterns, and other such
26 related features.
27 B. Mockups shall be constructed in a layered fashion so that all products being used can be seen and evaluated.
28 C. The construction detail below is an example of a properly layered mockup.
29

- 30 D. Mockups required
31 1. Waterproofing systems
32 2. Air barrier systems
33 3. Flashings
34
35
36

37 **3.3. MOCKUP REVIEW**

- 38 A. The General Contractor and all associated Sub-contractors (Contracting Team) shall meet with the Owner,
39 Owners Representative, Architect and Consultants (Design Team) as necessary to review the mock-up.
40 Contractors shall be prepared to answer questions on materials and methods as necessary.
41 B. The Contracting and Design Teams shall review the mockup in detail for materials, methods, and workmanship
42 with respect to the intent of the contract documents. Improvements or adjustments shall be discussed as
43 needed.

- 1 C. If the mockup is incomplete or does not show sufficient detail of products and workmanship the General
2 Contractor shall resubmit a new mockup.
- 3 D. Re-submittal of mockups to meet the intent of the contract documents shall be the responsibility of the General
4 Contractor. No Change Orders will be processed for additional time or materials associated with re-submitting a
5 mockup for approval.
- 6 1. In the event that a submitted mockup meets the criteria of the contract documents but does not meet
7 the expectations of the design team and alternative methods or materials are discussed the following
8 procedure shall be used:
- 9 a. Project Architect shall publish a Construction Bulletin (CB) to detail the required/recommended
10 changes.
- 11 b. The GC shall prepare and submit a new mockup.
- 12

13 **3.4. FINAL SUBMITTAL**

- 14 A. The field approved mockup shall be submitted by the General Contractor as any other submittal for project
15 documentation purposes. The mockup submittal shall consist of the following:
- 16 1. Digitally photograph the field approved mockup. Take as many detailed photos as necessary to capture
17 the complexity of the mockup.
- 18 2. Provide a written summary of the approved mockup. Include all recommended adjustments, level of
19 expected workmanship, and other such detail as discussed during the mockup review.
- 20 3. Submit the mockup to the Project Management Web Site. See Specification 01 33 23 Submittals for
21 additional information.

AIR BARRIER SYSTEMS

PART 1 – GENERAL

- 1.1 [RELATED DOCUMENTS](#)
- 1.2 [SUMMARY](#)
- 1.3 [DEFINITIONS](#)
- 1.4 [PERFORMANCE REQUIREMENTS](#)
- 1.5 [SUBMITTALS](#)
- 1.6 [QUALITY ASSURANCE](#)
- 1.7 [PROJECT CONDITIONS](#)

PART 2 – PRODUCTS

Not Used

PART 3 – EXECUTION

- 3.1 [FIELD QUALITY CONTROL](#)
- 3.2 [REPAIR AND PROTECTION](#)

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:
 - 1. This section includes administrative and procedural requirements for accomplishing an airtight building enclosure that controls infiltration or exfiltration of air.
- B. Related Sections:
 - 1. Section 07 27 15.13 Non-Bituminous Self-Adhering Sheet Air Barriers.
 - 2. Requirements of this section relate to the coordination between subcontractors required to provide an airtight building enclosure, customized fabrication and installation procedures, not production of standard products.

1.3 DEFINITIONS

- A. The airtight components of the building enclosure and the joints, junctures and transitions between materials, products, and assemblies forming the air-tightness of the building enclosure are called “the air barrier system”. Services include coordination between the trades, the proper scheduling and sequencing of the work, pre-construction meetings, inspections, tests, and related actions, including reports performed by Contractor, by independent agencies, and by governing authorities. They do not include contract enforcement activities performed by Architect.

1.4 PERFORMANCE REQUIREMENTS

- A. General Performance: The Contractor shall ensure that the intent of constructing the building enclosure with a continuous air barrier system to control air leakage into, or out of the conditioned space is achieved. The air barrier system shall have the following characteristics:
 - 1. It shall be continuous, with all joints sealed.
 - 2. It shall be structurally supported to withstand positive and negative air pressures applied to the building enclosure.
 - 3. Continuity of the air barrier materials and products with joints to provide complete assemblies.
 - 4. Continuity of all the enclosure assemblies with joints and transition materials to provide a whole building air barrier system.
- B. Connection shall be made between:
 - 1. Foundation and walls.
 - 2. Walls and windows or doors.
 - 3. Different wall systems.
 - 4. Wall and roof.
 - 5. Wall and roof over unconditioned space.
 - 6. Walls, floor and roof across construction, control and expansion joints.
 - 7. Walls, floors and roof to utility, pipe and duct penetrations.

- C. Air Barrier Penetrations: All penetrations of the air barrier and paths of air infiltration / exfiltration shall be made air-tight.
- D. Compliance Requirements:
 - 1. Assemblies: an air permeance not to exceed 0.03 cfm/ft²p under a pressure differential of 0.3 in. water (1.57psf) (0.15 L/s.m² @ 75 Pa) when tested in accordance with ASTM E 1677.
 - 2. Materials: Materials used for the air barrier system in the opaque envelope shall have an air permeance not to exceed 0.004 cfm/ft² under a pressure differential of 0.3 in. water (1.57psf) (0.02 L/s.m² @ 75 Pa) when tested in accordance with ASTM E 2178. Or,
 - 3. Entire Building: The air leakage of the entire building shall not exceed 0.15 cfm/sf under a pressure differential of 0.3 in. water (1.57psf) (0.75 L/s.m² @ 75 Pa) when tested according to ASTM E 779.

1.5 SUBMITTALS

- A. Field quality-control reports.
- B. Report Data: Written reports of each inspection, test, or similar service include, but are not limited to, the following:
 - 1. Date of issue.
 - 2. Project title and number.
 - 3. Name, address, and telephone number of testing agency.
 - 4. Dates and locations of samples and tests or inspections.
 - 5. Names of individuals making the inspection or test.
 - 6. Designation of the Work and test method.
 - 7. Identification of product and Specification Section.
 - 8. Complete inspection or test data.
 - 9. Test results and an interpretation of test results.
 - 10. Ambient conditions at the time of sample taking and testing.
 - 11. Comments or professional opinion on whether inspected or tested Work complies with Contract Document requirements.
 - 12. Name and signature of laboratory inspector.
 - 13. Recommendations on retesting.

1.6 QUALITY ASSURANCE

- A. Requirement for Contractor to provide an airtight building enclosure is not limited by quality-control services required by Architect, Owner, or authorities having jurisdiction and are not limited by provisions of this section.
- B. Inspection and testing services are required to verify compliance with requirements specified or indicated. These services do not relieve Contractor of responsibility for compliance with Contract Document requirements.
 - 1. Qualifications for Air Barrier Testing and Inspection Agencies: Engage Air Barrier inspection and testing service agencies, including independent testing laboratories, that are prequalified and that specialize in the types of air barrier system inspections and tests to be performed.
- C. Specific quality-control requirements for individual construction activities are specified in the sections of the specifications. Requirements in those sections may also cover production of standard products. It is the Contractor's responsibility to ensure that each subcontractor is adequately and satisfactorily performing the quality assurance documentation, tests and procedures required by each section.
- D. Specified inspections, tests, and related actions do not limit Contractor's quality-control procedures that facilitate compliance with Contract Document requirements.

1.7 PROJECT CONDITIONS

- A. Contractor Responsibilities: Unless otherwise indicated as the responsibility of another identified entity, Contractor shall provide coordination of the trades, and the sequence of construction to ensure continuity of the air barrier system joints, junctures and transitions between materials and assemblies of materials and products, from substructure to walls to roof. Provide quality assurance procedures, testing and verification as specified herein. Facilitate inspections, tests, and other quality-control services specified elsewhere in the Contract Documents and required by authorities having jurisdiction or by the Owner. Costs for these services are included in the Contract Sum.

- B. Organize preconstruction meetings between the trades involved in the whole building's air barrier system to discuss where each trade begins and ends and the responsibility and sequence of installation of all the air-tight joints, junctures, and transitions between materials, products and assemblies of products specified in the different sections, to be installed by the different trades.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.1 FIELD QUALITY CONTROL

- A. Testing Agency: Contractor will engage a qualified testing agency to perform tests and inspections.
- B. Tests and Inspections:
 - 1. Qualitative Testing and Inspection:
 - b. Continuity of the air barrier system throughout the building enclosure with no gaps, holes.
 - c. Structural support of the air barrier system to withstand design air pressures.
 - d. Masonry and concrete surfaces are smooth, clean and free of cavities, protrusions and mortar droppings, with mortar joints struck flush, or as required by the manufacturer of the air barrier material.
 - e. Site conditions for application temperature and dryness of substrates.
 - f. Maximum length of exposure time of materials to ultra-violet deterioration.
 - g. Surfaces are properly primed.
 - h. Laps in material are 2" minimum, shingled in the correct direction (or mastic applied on exposed edges), with no fishmouths.
 - i. Mastic applied on cut edges.
 - j. Roller has been used to enhance adhesion.
 - k. Measure application thickness of liquid-applied materials to manufacturer's specifications for the specific substrate.
 - l. Materials used for compatibility.
 - m. Transitions at changes in direction, and structural support at gaps.
 - n. Connections between assemblies (membrane and sealants) for cleaning, preparation and priming of surfaces, structural support, integrity and continuity of seal.
 - o. All penetrations sealed.

3.2 REPAIR AND PROTECTION

- A. Upon completion of inspection, testing, sample taking and similar services, repair damaged construction and restore substrates and finishes. Comply with Contract Document requirements for Division 1 Section "Cutting and Patching."
- B. Protect construction exposed by or for quality-control service activities, and protect repaired construction.
- C. Repair and protection is Contractor's responsibility, regardless of the assignment of responsibility for inspection, testing, or similar services.

 16 3.5. CONSTRUCTION CLOSEOUT 3
 17

PART 1 – GENERAL

1.1. SUMMARY

- 21 A. The City of Madison has developed a multi-faceted Quality Management Program that begins with contract
 22 signing and runs through contract closeout to ensure the best quality materials, workmanship, and product are
 23 delivered for the contracted Work.
 24 1. The Progress Management Web Site is a Construction Management tool that provides contractors and
 25 staff a single on-line location for the daily operations and progression of the Work.
 26 2. The Quality Management Observation (QMO) is an ongoing observation of the construction process as it
 27 progresses. The City of Madison does not use a “Punch List” or “Corrections List” as it is typically known
 28 throughout the construction industry. The QMO process acts as an “in progress punch list”.
 29 a. By using the QMO process the City of Madison’s goal is to have a zero item punch list prior to the
 30 90% progress payment and owner occupancy.
 31 B. All contractors shall be required to review the specifications identified in Section 1.2 below, and other related
 32 specifications identified therein to become familiar with the terminology and expectations of this City of
 33 Madison Public Works contract.
 34 C. It is the intent of this specification to outline the requirements, expectations, and responsibilities of the General
 35 Contractor (GC), Project Architect, and other representatives of the Owner for items of Quality Assurance and
 36 Quality Control.
 37 1. This specification is not intended to conflict with Specification 01 40 00 Quality Requirements or other
 38 specifications requiring testing and inspecting services.
 39 2. This specification does not relieve the GC from any requirements associated with regulatory inspections
 40 performed by the City of Madison Building Inspection Unit, or inspectors from other agencies as required
 41 by code.
 42 3. Any testing performed by an Owner’s Representative does not relieve the GC from performing any
 43 testing that may be required by the construction documents.
 44

1.2. RELATED SPECIFICATION SECTIONS

- 46 A. Section 01 26 13 Request for Information (RFI)
 47 B. Section 01 29 76 Progress Payment Procedures
 48 C. Section 01 31 13 Project Coordination
 49 D. Section 01 31 23 Project Management Web Site
 50 E. Section 01 40 00 Quality Requirements
 51 F. Section 01 77 00 Closeout Procedures
 52 G. Section 01 78 13 Completion and Correction List
 53 H. Section 01 91 00 Commissioning
 54

1.3. PERFORMANCE REQUIREMENTS

- 56 A. All contractors shall be responsible for a proper quality assurance/quality control (QA/QC) program throughout
 57 the execution of the Work defined within the construction documents, including all recognized construction
 58 industry standards and all applicable regulatory codes.

- 1 B. The GC shall be responsible for all of the following:
2 1. Monitor the quality of all workmanship, supplies, materials, and products being installed by all
3 contractors and installers to ensure they meet or exceed the minimum requirements set forth by the
4 construction documents.
5 2. Submit a Request for Information (RFI) whenever manufacturers' instructions or referenced standards
6 conflict with the construction documents before proceeding with the Work.
7 3. Ensure that Work requiring special certifications or licensing is being performed by is being performed
8 and supervised by personnel that meet the appropriate requirements.
9 a. Ensure that all certificates and licenses are current throughout the execution of the project.
10 C. The CoM and its representatives shall perform quality assurance and quality control activities throughout the
11 execution of this project. This in no way relieves the GC of maintaining an acceptable QA/QC program. =
12

13 **1.4. QUALITY ASSURANCE**

- 14 A. The GC shall be responsible for the following:
15 1. All materials, equipment, and products shall be new, clean, undamaged, and meet the performance
16 specifications defined within the construction documents including favorably reviewed submittals.
17 a. Any material, equipment, or product that does not meet the requirements of the construction
18 documents shall be removed and replaced, including any adjacent and related work, at the GCs
19 expense.
20 2. All Work shall be performed by persons properly trained and/or qualified to produce workmanship of the
21 quality specified in the construction documents.
22 3. Providing access to updated as-builts, addenda, submittals, bulletins and other related construction
23 documents at the project site.
24 B. The CoM and its representatives may be responsible for any of the following:
25 1. Attend pre-installation meetings
26 2. Attend construction progress meetings
27 3. Review all submittals
28 4. Conduct field visits for QA/QC purposes, provide feedback to the GC and sub-contractors using Quality
29 Management Observation (QMO) reports.
30 5. Review delivered equipment
31 6. Witness equipment installations, startups, testing as specified in other specifications
32

33 **1.5. QUALITY MANAGEMENT OBSERVATION REPORT**

- 34 A. The Quality Management Observation report or QMO is used as a QA/QC tool by those entities responsible for
35 QA/QC activities, including but not limited to, the GC, CoM, PA, CX agent, etc.
36 B. QMOs are designed to be an early observation of non-conforming construction work before it becomes buried
37 by follow on work. As such it is most often used as an "in progress punch list".
38 C. QMO forms are part of the Quality Control Library on the Project Management Web Site.
39

40 **PART 2 – PRODUCTS - THIS SECTION NOT USED**

41 **PART 3 - EXECUTION**

42 **3.1. QUALITY MANAGEMENT RESPONSIBILITIES**

- 43
44 A. While making routine progress visits to the construction project the GC, CPM, CxA and A/E, and applicable others
45 shall observe the details of the construction and installations to ensure that the intent of the construction
46 documents is being followed.
47 B. If during the progress visit there is a determination of contract non-conformance a QMO report shall be initiated
48 to begin the documentation process.
49 1. The GC field superintendent shall be informed immediately of any issue that may cause harm, damage to
50 finished work, or be buried prior to properly filing a QMO report.
51 C. The following information when filing a QMO report:
52 1. Open a QMO report in the Quality Control Library on the Project Management Web Site
53 2. Enter the date and time of the field visit
54 2. Provide references to construction documents if any (examples; specification, drawing page, details,
55 approved submittals, RFI, CB, etc)
56 3. Provide a short title for the observation being made
57 4. Provide a detailed description of the observation being made
58

- 1 5. Select all categories (Sitework, Structure, Enclosure, Interior, etc) from the given list that may apply to
- 2 the observation being reported.
- 3 a. For each category selected additional boxes shall open with contractor names associated with
- 4 each category.
- 5 6. Select all contractors from the lists provided that may need to be aware of the observation.
- 6 7. Provide any attachments that may help provide reference to the observation.
- 7 8. Click the SAVE button before closing the form.
- 8 D. The software for the Project Management Website will email notifications that a QMO report has been initiated.
- 9 The software will automatically select and notify the following:
- 10 1. The GC, PA, and CPM for all observation reports being filed.
- 11 2. Others depending on the observation categories selected.
- 12 3. Contractors based on the selections made in the sub-contractors lists.

13
14 **3.2. RESPONDING TO A QMO**

- 15 A. All contractors receiving email notification of a QMO Observation shall review the details of the observation.
- 16 B. The GC shall be responsible for determining the course of action required to remedy the non-conforming issue
- 17 and shall coordinate and direct the contractor(s) responsible for any work related to the observation.
- 18 C. All contractors assigned to remedy the observation by the GC shall provide follow-up responses on the QMO
- 19 report as follows:
- 20 1. Open the QMO report in the Quality Control Library on the Project Management Web Site.
- 21 2. In the "Follow-Up Response" area enter a description of your follow-up response in the box provided.
- 22 a. Click "Insert Item" if additional boxes are required.
- 23 3. Add attachments (pictures) if needed to show the work has been completed.
- 24 4. Click the SAVE button before closing the form.

25
26 **3.3. GENERAL CONTRACTORS FOLLOW-UP**

- 27 A. The GC shall inspect the work to ensure that all assigned contractors have remedied the observation to the
- 28 intent of the construction documents.
- 29 B. The GC shall respond with any additional comments in his/her response box.
- 30 1. If no comments are to be made the GC at a minimum must date the response box to trigger the next
- 31 work flow.
- 32 C. Click the SAVE button before closing the form.
- 33 D. The software will email a notification to the CPM and the person who initiated the QMO that the issue has been
- 34 remedied.

35
36 **3.4. QMO CLOSEOUT PROCEDURE**

- 37 A. The person who initiated the QMO shall review the remedied work and if properly corrected shall close and date
- 38 the QMO form.
- 39 1. Click SAVE and the software will email a notification to the CPM that final review of the Observation is
- 40 required.
- 41 2. In the event there are still issues the Quality Manager can add additional comments in the response area,
- 42 click SAVE and re-issue the QMO for additional review as needed.
- 43 B. Once the person who initiated the QMO has closed the item the CPM shall review and verify with the PA that the
- 44 Observation has been properly remedied and provide final closure on the QMO.

45
46 **3.5. CONSTRUCTION CLOSEOUT**

- 47 A. The GC shall note that successful close out QMOs are required for construction closeout as follows:
- 48 1. Certain progress payments as identified in Specification 01 29 76 are contingent QMO reports being properly
- 49 closed out.
- 50 2. Specification 01 77 00 defines all construction closeout requirements.

SECTION 01 45 29
TESTING LABORATORY SERVICES

1
2
3
4 PART 1 – GENERAL 1
5 1.1. REQUIREMENTS INCLUDED 1
6 1.2. RELATED REQUIREMENTS 1
7 1.3. QUALIFICATION OF LABORATORY 1
8 1.4. LABORATORY DUTIES 1
9 1.5. LIMITATIONS OF AUTHORITY OF TESTING LABORATORY 2
10 1.6. CONTRACTOR’S RESPONSIBILITIES 2
11 1.7. SPECIFIC TEST, INSPECTIONS, AND METHODS REQUIRED 2
12 PART 2 – PRODUCTS – THIS SECTION NOT USED 4
13 PART 3 – EXECUTION – THIS SECTION NOT USED 4
14

PART 1 – GENERAL

1.1. REQUIREMENTS INCLUDED

- 17
18 A. The Contractor shall employ and pay for the services of an independent testing laboratory to perform specified
19 services and testing.
20 B. Testing Laboratory inspection, sampling and testing is required for:
21 1. Section 03 30 00: Cast-In-Place Concrete
22 2. Section 05 12 00: Structural Steel Framing
23 3. Section 05 40 00: Cold-Formed Steel Framing
24 4. Section 31 20 00: Earthwork
25

1.2. RELATED REQUIREMENTS

- 26
27 A. Conditions of the Contract: Inspections and testing required by laws, ordinances, rules, regulations, orders or
28 approvals of public authorities.
29 B. Related Requirements Specified in Other Sections:
30 1. Division 22 and 23: Testing of Mechanical Systems
31 2. Division 26: Testing of Electrical Systems
32

1.3. QUALIFICATION OF LABORATORY

- 33
34 A. Meet “Recommended Requirements of Independent Laboratory Qualification” published by American Council of
35 Independent Laboratories.
36 B. Meet basic requirements of ASTM E 329, “Standards of Recommended Practice for Inspection and Testing
37 Agencies for Concrete and Steel as Used in Construction.”
38 C. Authorized to operate in State in which the Project is located.
39

1.4. LABORATORY DUTIES

- 40
41 A. Cooperate with Owner, A/E and Contractor; provide qualified personnel after due notice.
42 B. Perform specified inspections, sampling and testing of materials and methods of construction:
43 1. Comply with specified standards.
44 2. Ascertain compliance of materials with requirements of Contract Documents.
45 C. Promptly notify the Owner, A/E and Contractor of observed irregularities or deficiencies of work or products.
46 D. Promptly submit written report of each test and inspection; one copy each to A/E, Consulting Engineer, Owner
47 and Contractor. Each report shall include:
48 1. Date issued.
49 2. Project Title and number.
50 3. Testing laboratory name, address and telephone number.
51 4. Name and signature of laboratory inspector.
52 5. Date and time of sampling or inspection.
53 6. Record of temperature and weather conditions.
54 7. Date of test.
55 8. Identification of product and specification section.
56 9. Location of sample or test in the Project.
57 10. Type of inspection or test.
58 11. Results of tests and compliance with Contract Documents.

- 1 12. Interpretation of test results, when requested by A/E or the Contractor.
2 E. Perform additional tests as required by Owner, A/E or the Contractor.
3
4 **1.5. LIMITATIONS OF AUTHORITY OF TESTING LABORATORY**
5 A. Laboratory is not authorized to:
6 1. Release, revoke, alter, or enlarge on requirements of Contract Documents.
7 2. Approve or accept any portions of the Work other than those portions of the Work scheduled for testing.
8 3. Perform any duties of the Contractor.
9
10 **1.6. CONTRACTOR'S RESPONSIBILITIES**
11 A. Cooperate with laboratory personnel, provide access to Work and to manufacturer's operations.
12 B. Secure and deliver to the laboratory, adequate quantities of representative samples of materials proposed to be
13 used and which require testing. Submit concrete mix designs to A/E for approval prior to pouring concrete.
14 C. Provide to the laboratory the preliminary design mix proposed to be used for concrete, and other material mixes
15 that require control by the testing laboratory.
16 D. Furnish copies of Product test reports as required.
17 E. Furnish incidental labor and facilities:
18 1. To provide access to Work to be tested.
19 2. To obtain and handle samples at the Project site or at the source of the product to be tested.
20 3. To facilitate inspections and tests.
21 4. For storage and curing of test samples.
22 F. Notify laboratory sufficiently in advance of operations to allow for laboratory assignment of personnel and
23 scheduling of tests.
24 G. Make arrangements with laboratory and pay for additional samples and tests required for Contractor's
25 convenience.
26 H. Employ and pay for the services of a separate, equally qualified independent testing laboratory to perform
27 additional inspections, sampling and testing required when initial tests indicate work does not comply with
28 Contract Documents.
29 I. Temporarily halt the progress of the Work when tested materials do not comply with Contract Documents and
30 promptly notify the Owner or his designated representative and A/E.
31 J. Remove and replace at no cost to the Owner, all defective materials discovered upon testing not to comply with
32 Contract Documents, including cost for retesting and re-inspecting replaced Work that failed to comply with the
33 Contract Documents.
34
35 **1.7. SPECIFIC TEST, INSPECTIONS, AND METHODS REQUIRED**
36 A. **Section 03 30 00: Cast-In-Place Concrete**
37 1. Secure sample of aggregates Contractor proposes to use and test for compliance with Specifications.
38 2. Certify compliance with Specifications of cement proposed for use by the Contractor.
39 3. Review and approve the Contractor's proposed concrete mix proportions for the required concrete
40 strengths using materials Contractor proposed to use on the project. Incorporate specified admixtures
41 and not less than amounts of cement specified.
42 4. Perform appropriate laboratory tests, including compression tests of cylinders and slump test to
43 substantiate mix designs.
44 5. Inspect and test materials during concrete work to substantiate compliance with Specifications and mix
45 requirements.
46 a. Testing:
47 i. Sample and test concrete in accordance with ASTM C 31, ASTM C 143, ASTM C 172, and
48 ASTM C 231.
49 ii. Perform slump tests in accord with ASTM C 143 from same concrete batch used for test
50 cylinders and record results and comments on compression test reports.
51 iii. Perform compression tests in accordance with ASTM C39.
52 iv. When air-entrained concrete is used, a minimum of one (1) air content test shall be
53 performed in accordance with ASTM C 231 for each set of test cylinders taken.
54 v. Identify all test cylinders with symbols to indicate location on the job where concrete test
55 was made. Record on project record drawings.
56 vi. Strength tests shall be made for: each day's pour; each class of concrete; each change of
57 supplies or sources; and for each 100 cubic yards of concrete or fraction thereof.

- 1 vii. One slump test shall be made for each set of test cylinders taken following the procedure
2 in ASTM C 143.
- 3 b. Test Cylinders for all Concrete
- 4 i. Each test shall consist of a minimum of four cylinders.
- 5 ii. Make test cylinders in conformity with ASTM C 31.
- 6 iii. After 24 hours three cylinders to be carefully transported to the testing laboratory for
7 moisture curing and one cylinder to be field cured.
- 8 iv. One field cured cylinder to be tested at 7 days and two laboratory cured cylinders to be
9 tested at 28 days. Reserve one cylinder for further testing.
- 10 v. The average of all strength tests representing each class of concrete, as well as the average
11 of any three consecutive strength tests for each class of concrete, shall be equal to or
12 greater than the specified strength.
- 13 vi. If the A/E has reason to believe that cylinder strength tests are not representative of the
14 strength of concrete in place, A/E shall require drilled cores to be cut and tested at the
15 Contractor's expense. Coring and testing shall be in accordance with ASTM C 42 Standard
16 Method of Obtaining and Testing Drilled Cores and Sawed Beams of Concrete.
- 17 B. **Section 05 12 00: Structural Steel Framing**
- 18 1. Welding:
- 19 a. Provide inspection of shop and field welding in accordance with Section 6 of AWS D1.1.
- 20 b. Visually inspect all welds, perform appropriate non-destructive tests on apparent defective welds.
21 Verify conformance with Specifications.
- 22 c. Non-destructive testing shall be performed on 20 percent of the total length of all full penetration
23 welds. If a sufficient number of welds are deficient, additional testing may be performed at the
24 discretion of the testing lab, at no cost to Owner.
- 25 2. Bolting:
- 26 a. Visually inspect all connections for proper number, size and type of bolt.
- 27 b. Review all bolted connections for compliance with "snug tight" requirements of AISC.
- 28 c. No Slip-critical (SC) connections/bolts are required for this project.
- 29 d. Shear Connectors, Headed/Deformed Bar Concrete Anchors:
- 30 i. Verify pre-production test records for installation of shear connectors, concrete anchors
31 and threaded studs.
- 32 ii. Shear connectors shall be struck with a hammer. Those not producing a "clean" pinging
33 sound indicative of a fully attached shear connector shall be bent 15 degrees off vertical
34 towards the nearest support by striking with a hammer. If shear connector does not
35 become loose and weld is not broken, it shall be considered acceptable, and shall be left in
36 the bent position. Replace failing shear connectors and test as before.
- 37 iii. A visual inspection shall be made of shear connectors and headed/deformed bar concrete
38 anchors after installation. If visual inspection reveals that a sound weld and a 360 degree
39 flash has not been obtained, the connector/anchor shall also be tested by bending a
40 minimum of 15 degrees off vertical opposite to the missing weld/flash, irrespective of the
41 results of the "ping" test required for shear connectors. If the connector/anchor does not
42 become loose it shall be considered acceptable and shall be left in this position. Replace
43 failing connector/anchors and inspect as before.
- 44 C. **Section 05 40 00: Cold Formed Steel Framing**
- 45 1. As directed by A/E, Contractor's testing agency may inspect the maintenance of a quality control program
46 including spot checking weldments and welding procedures in accordance with AWS standards.
- 47 D. **Section 31 20 00: Soil Compaction Control and Trenching and Backfilling**
- 48 1. Soils Engineer to be onsite during excavation operation.
- 49 2. Visually inspect, test, and certify that exposed undisturbed underlying soil is suitable for required footing
50 bearing capacity and placement of fills.
- 51 3. Maximum and minimum density of fill soil for compaction percentage of relative density and moisture
52 density shall be determined in accordance with ASTM Designation D 1557. Testing agency will test
53 compaction of soils in place according to ASTM D 1556, ASTM D 2167, ASTM D 2922, and ASTM D 2937,
54 as applicable.
- 55 4. Number of tests as follows:
- 56 a. Subgrade, Undisturbed and Demolition Surfaces: Visual inspection and probe; test if required.
- 57 b. Interior Fills: One test per 2,500 sq. ft for each two foot or less lift.
- 58 c. Exterior Fills: One test per 2,500 sq. ft for each two foot or less lift.

1 d. Utility Trenches: One test per 50 lineal feet for each two foot or less lift.

PART 1 – GENERAL

1.1. SUMMARY

- 30
31 A. This Section includes general procedural requirements for temporary facilities and controls including, but not
32 limited to the following:
33 1. Temporary Utilities
34 2. Telecommunications Services
35 3. Temporary Sanitary Facilities
36 4. Barriers
37 5. Fencing
38 6. Exterior Enclosures
39 7. Security
40 8. Vehicular Access and Parking
41 6. Waste Removal
42 7. Project Identification
43 8. Field Offices
44

1.2. RELATED SPECIFICATION SECTIONS

- 45
46 A. Section 01 31 19 Progress Meetings
47 B. Section 01 31 23 Project Management Web Site
48 C. Section 01 74 19 Construction Waste Management and Disposal
49

1.3. QUALITY ASSURANCE

- 50
51 A. Regulations: Comply with industry standards and applicable laws and regulations if authorities having
52 jurisdiction, including but not limited to:
53 1. Building Code requirements
54 2. Health and safety regulations
55 3. Utility company regulations
56 4. Police, Fire Department and Rescue Squad rules
57 5. Environmental protection regulations
58 6. Joint Commission - Hospital Accreditation Standards

- 1 B. Standards: Comply with NFPA 241 "Standard for Safeguarding Construction, Alterations, and Demolition
2 Operations," ANSI A10 Series standards for "Safety Requirements for Construction and Demolition," and NECA
3 Electrical Design Library "Temporary Electrical Facilities".
4 C. Electrical Service: Comply with NEMA, NECA, and UL standards and regulations for temporary electric service.
5 Install service in compliance with NFPA 70 "National Electric Code".
6

7 **1.4. TEMPORARY UTILITIES**

- 8 A. Contractor will provide the following:
9 1. Electrical power and metering
10 2. Water supply
11 a. 1. Use trigger-operated nozzles for water hoses, to avoid waste of water.
12
13 B. General:
14 2. New permanent facilities may be used.
15 C. Temporary Lighting: Electrical Contractor shall provide temporary lighting with local switching
16 1. Install and operate temporary lighting, minimum of 30 fc, to fulfill security and protection requirements,
17 without operating the entire system, and will provide adequate illumination for all areas of work,
18 including construction operations and traffic conditions.
19 F. Temporary Heat: General Contractor shall provide temporary heat required by construction activities, for curing
20 or drying of completed installations or protection of installed construction from adverse effects of low
21 temperatures or high humidity. Select safe equipment that will not have a harmful effect on completed
22 installations or elements being installed. Coordinate ventilation requirements to produce the ambient condition
23 required and minimize consumption of energy.
24 1. Heating Facilities: Except where use of the permanent system is authorized, provide vented self-
25 contained LP gas or fuel oil heaters with individual space thermostatic control.
26 a. Use of gasoline-burning space heaters, open flame, or salamander type heating units is
27 prohibited.
28

29 **1.5. TELECOMMUNICATIONS SERVICES AND WI-FI**

- 30 A. Provide, maintain, and pay for telecommunications services to field office at time of project mobilization through
31 construction closeout.
32 B. Telecommunications services shall include:
33 1. Windows-based personal computer dedicated to project telecommunications.
34 2. Shared access to the internet via WIFI or similar wireless connection.
35 a. Access must be capable to support minimum of 10 wireless devices.
36 3. Email Account/address dedicated for GC Project Manager of GC Supervisor on site.
37

38 **1.6. TEMPORARY SANITARY FACILITIES**

- 39 A. Provide and maintain required facilities and enclosures. Provide at time of project mobilization.
40 B. Temporary toilets: Comply with regulations and health codes for the type, number, location, operation, and
41 maintenance of fixtures and facilities. Install where facilities will best serve the Project's needs.
42 1. Provide toilet tissue, paper towels, paper cups, and similar disposable materials for each facility. Provide
43 covered waste containers for used material.
44 2. Toilets: Install self-contained toilet units. Shield toilets to ensure privacy.
45 C. Maintain daily in clean and sanitary condition
46 D. Water: Provide potable water approved by local health authorities
47

48 **1.7. BARRIERS**

- 49 A. Provide barriers to prevent unauthorized entry to construction areas, to prevent access to areas that could be
50 hazardous to workers or the public and to protect existing facilities and adjacent properties from damage from
51 construction operations and demolition.
52

53 **1.8. FENCING**

- 54 A. Construction: Refer to Plan Documents and Specification Section 01 76 00: Fencing Materials and Barricades
55

56 **1.9. EXTERIOR ENCLOSURES**

- 57 A. Provide temporary weather tight closure of exterior openings to accommodate acceptable working conditions
58 and protection for Products, to allow for temporary heating and maintenance of required ambient temperatures

1 identified in individual specification sections, and to prevent entry of unauthorized persons. Provide access doors
2 with self-closing hardware and locks.
3

4 **1.10. SECURITY**

- 5 A. Provide security and facilities to protect Work, existing facilities, and Owner's operations from unauthorized
6 entry, vandalism, or theft.
7

8 **1.11. VEHICULAR ACCESS AND PARKING**

- 9 A. Comply with regulations relating to use of streets and sidewalks, access to emergency facilities, and access for
10 emergency vehicles.
11 B. Coordinate access and haul routes with governing authorities and Owner.
12 C. Provide and maintain access to fire hydrants, free of obstructions.
13 D. Existing metered parking areas located at Government East Parking Ramp may be used for construction parking.
14

15 **1.12. WASTE REMOVAL**

- 16 A. See Section 01 74 19 - Waste Management, for additional requirements.
17 B. Provide waste removal facilities and services as required to maintain the site in clean and orderly condition.
18 C. Provide containers with lids. Remove trash from site periodically.
19 D. If materials to be recycled or re-used on the project must be stored on-site, provide suitable non-combustible
20 containers; locate containers holding flammable material outside the structure unless otherwise approved by the
21 authorities having jurisdiction.
22 E. Open free-fall chutes are not permitted. Terminate closed chutes into appropriate containers with lids.
23

24 **1.13. PROJECT IDENTIFICATION**

- 25 A. Provide project identification sign of design and construction indicated in Section 01 58 13.
26 B. Erect on site at location determined by Owner .
27 C. No other signs are allowed without Owner permission except those required by law.
28

29 **1.14. FIELD OFFICES**

- 30 A. Office: Weather tight, with lighting, electrical outlets, heating, cooling equipment, and equipped with sturdy
31 furniture, drawing rack and drawing display table.
32 B. Field Office shall be located in close proximity to the site.
33 C. Provide space for Project Meetings with table and chairs to accommodate a minimum of 15 persons.
34 D. Provide a minimum of a 40" LCD monitor or other digital projection device to be connected to the computer
35 identified in Section 1.4 Telecommunications Services (above), for use during progress meetings in connection
36 with reviewing construction progress information posted to the Project Management Web Site (Specification 01
37 31 23) hosted by the Owner.
38

39 **PART 2 - PRODUCTS**

40
41 **2.1. TEMPORARY PARTITIONS**

- 42 A. Provide dustproof partitions to limit dust and dirt migration and to separate occupied areas from fumes and
43 noise.
44 1. Non-fire rated partitions, standard
45 a. Wood stud framing, 6-mil polyethylene
46

47 **2.2. EQUIPMENT**

- 48 A. Temporary Lifts and Hoists: Contractors requiring temporary lifts and hoists shall provide facilities for hoisting
49 materials and employees.
50 B. Electrical Outlets: Electrical Contractor shall provide properly configured NEMA polarized outlets to prevent
51 insertion of 110-120 volt plugs into higher voltage outlets. Provide receptacle outlets equipped with ground-fault
52 circuit interrupters, reset button and pilot light, for connection of power tools and equipment.
53 C. Electrical Power Cords: Contractors requiring power cords shall provide grounded extension cords; use "hard-
54 service" cords where exposed to abrasion and traffic. Provide waterproof connectors to connect separate
55 lengths of electric cords, if single lengths will not reach areas where construction activities are in progress. Do
56 not exceed safe length-voltage ratio.

- 1 D. Lamps and Light Fixtures: Electrical Contractor shall provide general service incandescent lamps of wattage
- 2 required for adequate illumination. Provide guard cages or tempered glass enclosures, where exposed to
- 3 breakage. Provide exterior fixtures where exposed to moisture.
- 4 E. Heating Units: General Contractor shall provide temporary heating units that have been tested and labeled by
- 5 UL, FM or another recognized trade association related to the type of fuel being consumed.
- 6 F. First Aid Supplies: General Contractor shall provide first aid supplies complying with governing regulations.
- 7 G. Fire Extinguishers: General Contractor shall provide hand-carried, portable UL-rated, fire extinguishers of NFPA
- 8 recommended classes for the exposures, extinguishing agent and size required by location and class of fire
- 9 exposure.

10
11 **PART 3 - EXECUTION**

12
13 **3.1. TEMPORARY FIRE PROTECTION**

- 14 A. Until fire protection needs are supplied by permanent facilities, General Contractor shall install and maintain
- 15 temporary fire protection facilities of the types needed to protect against reasonably predictable and
- 16 controllable fire losses.
- 17 B. Comply with NFPA 10 "Standard for Portable Fire Extinguishers," and NFPA 241 "Standard for Safeguarding
- 18 Construction, Alterations and Demolition Operations".
- 19 C. Locate fire extinguishers where convenient and effective for their intended purpose.
- 20 D. Store combustible materials in containers in fire-safe locations.
- 21 E. Maintain unobstructed access to fire extinguishers, fire hydrants, temporary fire protection facilities, stairways
- 22 and other access routes for fighting fires.
- 23 F. Prohibit smoking on the premises.
- 24 G. Supervise welding operations, combustion-type temporary heating units, and similar sources of fire ignition
- 25 according to requirements of authorities having jurisdiction.
- 26 H. Develop and supervise an overall fire-prevention and -protection program for personnel at Project site
- 27 I. Review needs with local fire department and establish procedures to be followed. Instruct personnel in methods
- 28 and procedures. Post warnings and information.

29
30 **3.2. COLLECTION AND DISPOSAL OF WASTE**

- 31 A. Collect waste from construction areas and elsewhere daily
- 32 B. Comply with requirements of NFPA 241 for removal of combustible waste material and debris. Enforce
- 33 requirements strictly.
- 34 C. Do not hold materials more than 7 days during normal weather or 3 days when the temperature is expected to
- 35 rise above 80 deg F.
- 36 D. Handle hazardous, dangerous, or unsanitary waste materials separately from other waste by containerizing
- 37 properly. Dispose of material in a lawful manner.

38
39 **3.3. ENVIRONMENTAL PROTECTION**

- 40 A. Provide protection, operate temporary facilities and conduct construction in ways and by methods that comply
- 41 with environmental regulations, and minimize the possibility that air, waterways and subsoil might be
- 42 contaminated or polluted, or that other undesirable effects might result.
- 43 B. Avoid use of tools and equipment which produce harmful noise.
- 44 C. Restrict use of noise making tools and equipment to hours that will minimize complaints from persons or firms
- 45 near the site.

46
47 **3.4. REMOVAL OF TEMPORARY UTILITIES, FACILITIES, AND CONTROLS**

- 48 A. Remove temporary utilities, equipment, facilities, and materials prior to Substantial Completion inspection.
- 49 B. Remove underground installations to a minimum depth of 2 feet (600 mm). Grade site as indicated.
- 50 C. Clean and repair damage caused by installation or use of temporary work.
- 51 D. Restore existing facilities used during construction to original condition.
- 52 E. Restore new permanent facilities used during construction to specified condition.

53
54
55
56 **END OF SECTION**

SECTION 01 57 19.11
INDOOR AIR QUALITY (IAQ) MANAGEMENT

PART 1 – GENERAL

- 1.1 [SUMMARY](#)
- 1.2 [DEFINITIONS](#)
- 1.3 [SUBMITTALS](#)
- 1.4 [PRECONSTRUCTION MEETING](#)

PART 2 – PRODUCTS

Not Used

PART 3 – EXECUTION

- 3.1 [IAQ MANAGEMENT - EMISSIONS CONTROL](#)
- 3.2 [IAQ MANAGEMENT - MOISTURE CONTROL](#)

PART 1 - GENERAL

1.1 SUMMARY

- A. Section Includes:
 - 1. Special requirements for Indoor Air Quality (IAQ) management during construction operations.
 - a. Control of emissions during construction.
 - b. Moisture control during construction.
 - 2. Procedures for testing baseline IAQ. Baseline IAQ requirements specify maximum indoor pollutant concentrations for acceptance of the facility.
- B. Related Sections:
 - 1. 01 40 00 – Quality Requirements: Meetings and project coordination.

1.2 DEFINITIONS

- A. Definitions pertaining to sustainable development: As defined in ASTM E2114.
- B. Adequate ventilation: Ventilation, including air circulation and air changes, required to cure materials, dissipate humidity, and prevent accumulation of particulates, dust, fumes, vapors, or gases.
- C. Hazardous Materials: Any material that is regulated as a hazardous material in accordance with 49 CFR 173, requires a Material Safety Data Sheet (MSDS) in accordance with 29 CFR 1910.1200, or which during end use, treatment, handling, storage, transportation or disposal meets or has components which meet or have the potential to meet the definition of a Hazardous Waste in accordance with 40 CFR 261. Throughout this specification, hazardous material includes hazardous chemicals.
 - 1. Hazardous materials include: pesticides, biocides, and carcinogens as listed by recognized authorities, such as the Environmental Protection Agency (EPA) and the International Agency for Research on Cancer (IARC).
- D. Indoor Air Quality (IAQ): The composition and characteristics of the air in an enclosed space that affect the occupants of that space. The indoor air quality of a space refers to the relative quality of air in a building with respect to contaminants and hazards and is determined by the level of indoor air pollution and other characteristics of the air, including those that impact thermal comfort such as air temperature, relative humidity and air speed.
- E. Interior final finishes: Materials and products that will be exposed at interior, occupied spaces; including flooring, wall covering, finish carpentry, and ceilings.
- F. Packaged dry products: Materials and products that are installed in dry form and are delivered to the site in manufacturer's packaging; including carpets, resilient flooring, ceiling tiles, and insulation.
- G. Wet products: Materials and products installed in wet form, including paints, sealants, adhesives, special coatings, and other materials which require curing.

1.3 SUBMITTALS

- A. Indoor Air Quality (IAQ) Management Plan: Not less than 10 days before the Pre-construction meeting, prepare and submit an IAQ Management Plan including, but not limited to, the following:
 - 1. Procedures for control of emissions during construction.
 - a. Identify schedule for application of interior finishes.
 - 2. Procedures for moisture control during construction.
 - a. Identify porous materials and absorptive materials.
 - b. Identify schedule for inspection of stored and installed absorptive materials.
 - 3. Revise and resubmit Plan as required by Owner.
 - a. Approval of Contractor's Plan will not relieve the Contractor of responsibility for compliance with applicable environmental regulations.

- B. Product Data:
 - 1. Submit product data for filtration media used during construction and during operation. Include Minimum Efficiency Reporting Value (MERV).
 - 2. Submit air pressure difference maps for each mode of operation of HVAC.
 - 3. Material Safety Data Sheets: Submit MSDSs for inclusion in Operation and Maintenance Manual for the following products. Coordinate with Section 01 78 23.
 - a. Adhesives.
 - b. Floor and wall patching/leveling materials.
 - c. Caulking and sealants.
 - d. Insulating materials.
 - e. Fireproofing and firestopping.
 - f. Paint.
 - g. Lubricants.
 - h. Cleaning products.
- C. Inspection and Test Reports:
 - 1. Moisture control inspections.
 - 2. Moisture penetration testing.

1.4 PRECONSTRUCTION MEETING

- A. After award of Contract and prior to the commencement of the Work, schedule and conduct meeting with Owner and Architect to discuss the proposed IAQ Management Plan and to develop mutual understanding relative to details of environmental protection.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.1 IAQ MANAGEMENT - EMISSIONS CONTROL

- A. During construction operations, follow the recommendations in SMACNA IAQ Guidelines for Occupied Buildings under Construction, 2nd Edition, 2007, ANSI/SMACNA 008-2008 (Chapter 3).
- B. HVAC Protection:
 - 1. Provide temporary exhaust during construction operations.
 - 2. Do not use new HVAC equipment for construction ventilation without prior approval of Architect.
- C. Source Control: Provide low and zero VOC materials as specified.
- D. Pathway Interruption: Isolate areas of work as necessary to prevent contamination of clean or occupied spaces. Provide pressure differentials and/or physical barriers to protect clean or occupied spaces.
- E. Housekeeping: During construction, maintain project and building products and systems to prevent contamination of building spaces.
- F. Temporary Ventilation: Provide an ACH (air changes per hour) of 1.5 or more and as follows:
 - 1. Provide minimum 48 hour pre-ventilation of packaged dry products prior to installation. Remove from packaging and ventilate in a secure, dry, well-ventilated space free from strong contaminant sources and residues. Provide a temperature range of 60 degrees F minimum to 90 degree F maximum continuously during the ventilation period. Do not ventilate within limits of Work unless otherwise approved by Architect.
 - 2. Provide adequate ventilation during and after installation of interior wet products and interior final finishes.
 - 3. Provide filtration media with a Minimum Efficiency Reporting Value (MERV) of 8 as determined by ASHRAE 52.2 during construction. Coordinate with work of Division 23, Heating Ventilating and Air Conditioning (HVAC). If permanently installed air handlers are to be used for ventilation (with approval of Architect), such filtration must be provided at each return air opening.
- G. Scheduling: Schedule construction operations involving wet products prior to packaged dry products to the greatest extent possible.

- H. Flush-Out: After construction ends, prior to occupancy and with all interior finishes installed, perform a building flush-out by supplying a total air volume of 14,000 cu.ft. of outdoor air per sq.ft. of floor area while maintaining an internal temperature of at least 60 degrees F and relative humidity no higher than 60%.

3.2 IAQ MANAGEMENT - MOISTURE CONTROL

- A. Housekeeping:
1. Keep materials dry. Protect stored on-site and installed absorptive materials from moisture damage.
 2. Verify that installed materials and products are dry prior to sealing and weatherproofing the building envelope.
 3. Install interior absorptive materials only after building envelope is sealed and weatherproofed.
- B. Inspections: Document and report results of inspections; state whether or not inspections indicate satisfactory conditions.
1. Examine materials for dampness as they arrive. If acceptable to Architect/Owner, dry damp materials completely prior to installation; otherwise, reject materials that arrive damp.
 2. Examine materials for mold as they arrive and reject materials that arrive contaminated with mold.
 3. Inspect stored and installed absorptive materials regularly for dampness and mold growth. Inspect weekly,.
 - a. Where stored on-site or installed absorptive materials become wet, notify Architect. Inspect for damage. If acceptable to Architect/Owner, dry completely prior to closing in assemblies; otherwise, remove and replace with new materials.
 4. Basement: Monitor basement and crawlspace humidity, and dehumidify when relative humidity is greater than 85 percent for more than 2 weeks or at the first sign of mold growth.
 5. Site drainage: Verify that final grades of site work and landscaping drain surface water and ground water away from the building.
 6. Weather-proofing: Inspect moisture control materials as they are being installed. Include the following:
 - a. Air barrier: Verify air barrier is installed without punctures and/or other damage. Verify air barrier is sealed completely.
 - b. flashing: Verify correct shingling of the flashing for roof, walls, windows, doors, and other penetrations.
 - c. Insulation layer: Verify insulation is installed without voids.
 - d. Roofing: In accordance with ASTM D7186 Standard Practice for Quality Assurance Observation of Roof Construction and Repair.
 7. Plumbing: Verify satisfactory pressure test of pipes and drains is performed before closing in and insulating lines.
 8. HVAC: Inspect HVAC system as specified in Section 01 91 00 – Commissioning, and the following:
 - a. Condensate pans are sloped and plumbed correctly.
 - b. Access panels are installed to allow for inspection and cleaning of coils and ductwork downstream of coils.
 - c. Ductwork and return plenums are air sealed.
 - d. Duct insulation is installed and sealed.
- C. Schedule:
1. Schedule work such that absorptive materials, including but not limited to porous insulations, paper-faced gypsum board, ceiling tile, and finish flooring, are not installed until they can be protected from rain and construction-related water.
 2. Weather-proof as quickly as possible. Schedule installation of moisture-control materials, including but not limited to air barriers, flashing, exterior sealants and roofing, at the earliest possible time.

- D. Testing for Moisture Penetration:
 - 1. Horizontal Waterproofing (not roofing): Test as per ASTM D5957 Standard Guide for Flood Testing Horizontal Waterproofing Installations; acceptable upper limits are no leakage for 15 minutes.
 - 2. Exterior Walls:
 - a. Water Leakage: Review as per ASTM E2128 Standard Guide for Evaluating Water Leakage of Building Walls.

SECTION 01 58 13
TEMPORARY PROJECT SIGNAGE

1		
2		
3		
4	PART 1 – GENERAL	1
5	1.1. SECTION INCLUDES	1
6	1.2. QUALITY ASSURANCE	1
7	1.3. SUBMITTALS	1
8	PART 2 - PRODUCTS	1
9	2.1. SIGN MATERIALS	1
10	2.2. PROJECT IDENTIFICATION SIGN	1
11	PART 3 - EXECUTION	1
12	3.1. INSTALLATION	1
13	3.2. REMOVAL	1

PART 1 – GENERAL

1.1. SECTION INCLUDES

- A. Project identification sign.

1.2. QUALITY ASSURANCE

- A. Design sign and structure to withstand 50 miles/hr wind velocity.
- B. Sign Painter: Experienced as a professional sign painter for minimum three years.
- C. Finishes, Painting: Adequate to withstand weathering, fading, and chipping for duration of construction.

1.3. SUBMITTALS

- A. See Section 01 30 00 – Administrative Requirements for submittal procedures.
- B. Shop Drawing: Show content, layout, lettering, color, structure, sizes.

PART 2 - PRODUCTS

2.1. SIGN MATERIALS

- A. Structure and Framing: New, wood, structurally adequate.
- B. Sign Surfaces: Exterior grade plywood with medium density overlay, minimum 3/4" thick, standard large sizes to minimize joints.
- C. Rough Hardware: Galvanized

2.2. PROJECT IDENTIFICATION SIGN

- A. One painted sign, 32 sq ft area, bottom 6 feet above ground.
- B. Content:
 - 1. Project title, City of Madison, City Parking Utility logo and name of Owner as indicated on Contract Documents.
 - 2. Names and title of Architect.
 - 3. Name of Prime Contractor.
 - 4. Full color project rendering from high resolution image as furnished by Architect.

PART 3 - EXECUTION

3.1. INSTALLATION

- A. Install project identification sign within 30 days after date fixed by Notice to Proceed.
- B. Erect at designated location.
- C. Install sign surface plumb and level, with butt joints. Anchor securely.

3.2. REMOVAL

- A. Remove sign, framing supports, and foundations at completion of Project and restore the area.

PART 1 – GENERAL

1.1. SUMMARY

- 22 A. The purpose of this specification is to provide general guidelines and responsibilities related to the receiving,
23 handling, and storage of all materials and products from arrival on the job site through installation.
24 1. Immediate inspection of delivered goods means a timely replacement if damaged.
25 2. Proper storage helps prevent damage and loss by weather, vandalism, theft, and job site accidents.
26 3. Proper storage helps with job site performance and safety.
27 2. Proper handling helps prevent damage and job site accidents.
28 B. Each Contractor shall be directly responsible for the receiving, handling, and storage of all materials and
29 products associated with the Work of their Division or Trade.
30 C. Each Contractor responsible for Work associated with Owner provided materials or products shall be responsible
31 for the receiving, handling and storage of the material/product as outlined in Section 3.8 below..
32

1.2. RELATED SPECIFICATIONS

- 34 A. Parts of this specification will reference articles within “The City of Madison Standard Specifications for Public
35 Works Construction”.
36 1. Use the following link to access the Standard Specifications web page:
37 <http://www.cityofmadison.com/business/pw/specs.cfm>
38 a. Click on the “Part” chapter identified in the specification text. For example if the specification
39 says “Refer to City of Madison Standard Specification 210.2” click the link for Part II, the Part II
40 PDF will open.
41 b. Scroll through the index of Part II for specification 210.2 and click the text link which will take you
42 to the referenced text.
43 c. City Standard Detail Drawings (SDD) may be located from the index in Part VIII.
44 B. Section 01 57 21 Indoor Air Quality
45 C. Section 01 74 13 Progress Cleaning
46 D. Section 01 76 00 Protecting Installed Construction
47 E. Other Divisions and Specifications that may address more specifically the requirements for the storage and
48 handling of materials and products associated Work of other Divisions or Trades.
49

1.3. QUALITY ASSURANCE

- 51 A. The GC shall be responsible for ensuring that these minimum storage and handling requirements are met by all
52 contractors on the project site including but not limited to the following:
53 1. Receiving deliveries of materials, products, and equipment.
54 a. Inspect all deliveries upon arrival for damage, completeness, and compliance with the
55 construction documents.
56 i. Deliveries shall remain in original packaging or crates, shipping manifest shall be kept with
57 the delivery and the packaging shall have visible identification of the items within the
58 packaging.

- 1 b. Immediately report any damaged products or equipment to the GC, begin arrangements for
2 immediate replacement.
- 3 c. Materials or equipment that have been damaged, are incomplete, or do not comply with the
4 construction documents shall not be permitted to be installed.
- 5 2. All materials and products shall be stored within the designated limits of the project site. Only store the
6 amount of material necessary for upcoming operations so as not to interfere with other construction
7 activities and access to Work by the Owner and Architect. Any offsite storage shall be at the expense of
8 the contractor storing the material or product. All offsite storage requirements shall comply with this
9 specification. All offsite storage of materials is subject to Owner Representative Quality Management
10 review at any time.
- 11 3. Large storage containers may be used but shall be weather tight, securable, placed on concrete blocks,
12 timbers, or jack stands and shall be level.
- 13 4. When lifting equipment is required the equipment rating shall be greater than the loading requirements
14 of the item being lifted. In addition all of the following shall apply as necessary:
15 a. Only designated and/or designed lift points shall be used.
16 b. Large items shall have tag lines and handlers at all times during lifting operations.
17 c. Lift at multiple points as needed to prevent bending.
- 18 5. Materials and products stored inside of the structure shall comply with all of the following:
19 a. Storage shall not be allowed to impede the flow of work in progress.
20 b. Storage shall not be allowed to hide completed work from review and inspections.
21 c. Storage shall not exceed the design loads of the structural components it is being stored upon.
- 22 6. All materials and products shall be stored according the manufacturers minimum recommended
23 requirements. All of the following shall be considered before storing any product or material:
24 a. Dust and dirt
25 b. Moisture and humidity, including rain and snow
26 c. Excessive temperatures, direct sun, etc
27 d. Product or material weight and size
28 e. Potential for breakage
29 f. Product incompatibility with other products such as corrosiveness, chemical reactions,
30 flammability, etc.
31 g. Product or material value and replacement cost
- 32 7. The Contractor shall be responsible for providing fully functional tarps or plastic wrap, to protect
33 materials and products from the weather. All coverings shall be free of large holes and tears, and shall be
34 tied, strapped, or weighted down to resist blowing.
- 35 8. The Contractor shall be responsible for any temporary heating, cooling, or other utility requirement that
36 may be associated with the storage of a material or product.
- 37 9. The Contractor shall be responsible for securing materials and products of value such as copper, A/V
38 equipment, etc. Such items shall be stored in securable shipping containers, job trailers or other such
39 storage devices. Container shall be kept secured when not in use.
- 40 B. The GC shall inspect the job site daily to ensure that all products and materials stay weather tight and are
41 secured against vandalism or theft as required by this specification.
- 42 C. The Owners Representative may at any time request improvements regarding storage of any material or product
43 being provided under these construction documents.
- 44

45 **PART 2 – PRODUCTS – THIS SECTION NOT USED**

46

47 **PART 3 - EXECUTION**

48

49 **3.1. GENERAL CONTRACTOR REQUIREMENTS**

- 50 A. Designate material storage and handling areas as needed including all of the following:
51 1. Designate specific areas of the site for delivery and storage of materials to be used during the execution
52 of the Work.
53 2. Designated areas shall not be located so as to interfere with the installation of any Work including Work
54 by others such as the installation of utilities or the maintenance of existing utilities. This shall include not
55 storing items in active utility easements as designated by the site plan.
- 56 B. Arrange for openings in the building as needed to allow delivery and installation of large items. Openings shall
57 be appropriately sized to include the use of booms, slings, and other such lifting devices that may be larger than
58 the item being installed.

- 1 1. When openings are required in completed Work (new or existing) the GC shall be responsible for
2 providing an appropriate opening and for restoring the opening to the original or better condition upon
3 completion. Restoration shall be weather tight and complete.
4 C. Repeated moving and handling of items being stored shall not be allowed. The GC shall be responsible for any
5 damage and replacement because of mishandling or excessive handling.
6

7 **3.2. BULK MATERIAL**

- 8 A. Bulk material such as sand, gravel, top soil and other types of fill shall be stored away from the construction area
9 and shall be stock piled as follows:
10 1. All bulk material shall be piled safely and efficiently in as small an area as practical. Only store the
11 amount of material necessary for upcoming operations so as not to interfere with other construction
12 activities and access to Work by the Owner and Architect.
13 2. All stock piles shall have silt fence/sock properly installed around the perimeter to prevent erosion and
14 loss of material. Refer to City of Madison Standard Specification Section 210.1(f) and other related
15 specification or details.
16 3. Fine grained material shall be protected with tarps to prevent blowing. Tarps shall be weighted or staked
17 to stay in place.
18 B. Bulk material such as brick, concrete block, stone, and other palletized materials shall be stored on original
19 shipping pallets until ready for use.
20

21 **3.3. DRY PACKAGED MATERIAL**

- 22 A. Dry packaged material such as cement, mortar, etc shall be stored on pallets, on slightly elevated ground or clear
23 stone pad to keep water away from the base of the material being stored. Protect from moisture.
24

25 **3.4. STRUCTURAL AND FRAMING MATERIAL**

- 26 A. All structural and framing material shall be stored in an organized manner arranged by type, size and dimension.
27 Materials shall be stored on pallets or timbers as necessary and shall not be allowed to lie directly on the ground.
28 B. Long and heavy items shall be supported at several points to prevent bending and warping.
29

30 **3.5. EQUIPMENT**

- 31 A. Equipment delivered to the site shall be stored away from all construction activities until the item can either be
32 moved inside or properly installed.
33 B. Equipment shall be stored on slightly elevated ground or clear stone pad to keep water away from the base of
34 the equipment.
35

36 **3.6. FINISH PRODUCTS**

- 37 A. Finish products such as flooring, tile, counters, lockers, toilets, partitions, lighting, and other similar items should
38 not be delivered and stored until the structure has been enclosed, is weather tight, temperature controlled and
39 the contractor is ready for such items to be installed.
40 1. Storage of finished products outside for any length of time shall not be allowed.
41 B. Products that cannot be stored inside the structure shall be stored in secured containers or job trailers until such
42 time as they are ready to be installed.
43 C. Products with a high potential for breakage such as glass, mirrors, tiles, toilet fixtures, etc. shall be stored with
44 additional protection as necessary such as but not limited to the following:
45 1. Store in original shipping containers until ready for installation.
46 2. Do not store in high traffic areas.
47 3. Shield with other materials such as cardboard, plywood, or similar products.
48

49 **3.7. DUCTWORK, PIPING, AND CONDUIT**

- 50 A. All piping and conduit shall be stored horizontally unless otherwise specified by the manufacturer or Division and
51 Trade Specifications.
52 1. Do not store directly on grade.
53 2. Cover metal pipes and tubes to prevent rust and corrosion, allow ventilation to prevent condensation.
54 3. Whenever possible use pipe stands for storing pipe and conduit to prevent tripping and rolling hazards.
55 B. All ductwork shall be stored horizontally or vertically as necessary unless otherwise specified by the
56 manufacturer or Division and Trade Specifications.
57 1. During storage, both ends of each duct shall be protected with plastic sheathing to prevent dust and dirt
58 from getting inside the duct. Sheathing shall be sufficiently taped to the duct.

- 1 2. After installation, free/open ends shall remain protected with taped plastic sheathing and or temporary
2 filters as specified by division or Trade specifications.
3

4 **3.8. OWNER PROVIDED, CONTRACTOR INSTALLED EQUIPMENT**

- 5 A. Section 3.8.A. shall apply to all equipment being provided to any contractor directly from the Owner for
6 installation under the contract.
7 1. The Owner or Owners Representative shall do the following:
8 a. Inspect all deliveries upon receipt and notify manufacturer of any issues directly.
9 b. Review the received shipment with the contractor.
10 i. Only provide products or materials to the contractor that were not damaged through
11 shipping or handling.
12 ii. Confirm missing products or materials and anticipated delivery schedule if known.
13 2. The Contractor responsible for the installation of Work associated with Owner provided materials or
14 products shall “take ownership” and provide safe and secure storage and handling as previously
15 described within this specification.
16 i. The Contractor shall be liable for the repair or replacement of any material or product
17 damaged after taking ownership of the product from receipt through final acceptance.
18 B. Section 3.8.B. shall apply to all equipment being provided by the Owner but shipped directly to any sub-
19 contractor or the project site for installation under the contract.
20 1. The GC and/or Contractor responsible for the Work associated with the Owner provided materials or
21 products shall do the following:
22 a. Inspect all deliveries upon receipt and notify the Owner or Owners Representative of any issues
23 directly.
24 i. Owner or Owners Representative shall notify manufacturer of any issues directly.
25 b. Review the received shipment with the Owner or Owners Representative
26 i. Confirm missing products or materials and anticipated delivery schedule if known.
27 2. The Contractor shall “take ownership” and provide safe and secure storage and handling as previously
28 described within this specification.
29 i. The Contractor shall be liable for the repair or replacement of any material or product
30 damaged after taking ownership of the product from receipt through final acceptance.
31

**SECTION 01 71 23
FIELD ENGINEERING**

1
2
3
4 PART 1 – GENERAL 1
5 1.1. REQUIREMENTS INCLUDED 1
6 1.2. RELATED REQUIREMENTS 1
7 1.3. PROCEDURES 1
8 1.4. PROJECT SURVEY REQUIREMENTS 1
9 1.5. RECORDS 1
10 PART 2 – PRODUCTS – THIS SECTION NOT USED 1
11 PART 3 – EXECUTION – THIS SECTION NOT USED 1
12

PART 1 – GENERAL

1.1. REQUIREMENTS INCLUDED

- A. The Contractor shall provide and pay for field engineering services required for the Project:
1. Land surveying services required to execute the Work, to include building addition location and layout, and location and layout of pavements and all proposed site improvements.
 2. Verification of existing building dimensions, elevations, and relationship to proposed additions.
 3. Professional Engineering services to execute Contractor’s construction methods.
 4. Registered Professional Engineer in the State of Wisconsin to determine the load capacity of the existing structure for use of Contractors temporary facilities, equipment, lifts, machinery, material storage, etc.

1.2. RELATED REQUIREMENTS

- A. Conditions of the Contract

1.3. PROCEDURES

- A. A property survey has been prepared for the Owner and has been bound with Contract Drawings. Surveys shall describe physical characteristics, legal limitations and utility locations for the site of the Project, and a legal description of the site. If information is incomplete, notify Owner to furnish additional information. Verify easement locations, front, side, and rear yard restrictions, if any; and property line locations. Verify control points, and establish bench marks. Locate and layout roads, walks, parking areas and all civil structures and all proposed site improvements.
- B. Verify locations of underground services, utilities, structures, etc. which may be encountered or affected by the Work.

1.4. PROJECT SURVEY REQUIREMENTS

- A. Using datum, the lot lines and present levels have been established as indicated on the Drawings. Other grades, lines, levels and benchmarks, shall be established and maintained by the Contractor, who shall be responsible for them. As work progresses, the Contractor shall layout on forms and floor, the locations of all partitions, walls and fix column centerlines as a guide to all trades. The Contractor shall make provision to preserve property line stakes, benchmarks, or datum point. If any are lost, displaced or disturbed through neglect of any Contractor, Contractor’s agents or employee, the Contractor responsible shall pay the cost of restoration.
- B. Establish lines and levels, locate and layout, by instrumentation and similar appropriate means, additions, column locations, floor levels, stakes for walks, etc.
- C. Provide data to all Subcontractors for their use as applicable.
- D. From time to time, verify layouts by same methods.

1.5. RECORDS

- A. Maintain a complete, accurate log of all control and survey work as it progresses.

SECTION 01 73 00
EXECUTION

PART 1 – GENERAL

- 1.1 [SUMMARY](#)
- 1.2 [INFORMATIONAL SUBMITTALS](#)
- 1.3 [QUALITY ASSURANCE](#)

PART 2 – PRODUCTS

- 2.1 [MATERIALS](#)

PART 3 – EXECUTION

- 3.1 [EXAMINATION](#)
- 3.2 [PREPARATION](#)
- 3.3 [CONSTRUCTION LAYOUT](#)
- 3.4 [FIELD ENGINEERING](#)
- 3.5 [INSTALLATION](#)
- 3.6 [PROGRESS CLEANING](#)
- 3.7 [STARTING AND ADJUSTING](#)
- 3.8 [PROTECTION OF INSTALLED CONSTRUCTION](#)

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes general administrative and procedural requirements governing execution of the Work including, but not limited to, the following:
 - 1. Construction layout.
 - 2. Field engineering and surveying.
 - 3. Installation of the Work.
 - 4. Cutting and patching.
 - 5. Progress cleaning.
 - 6. Starting and adjusting.
 - 7. Protection of installed construction.
- B. Related Requirements:
 - 1. Section 01 10 00 "Summary" for limits on use of Project site.
 - 2. Section 01 77 00 "Closeout Procedures" for submitting final property survey with Project Record Documents, recording of Owner-accepted deviations from indicated lines and levels, replacing defective work, and final cleaning.

1.2 INFORMATIONAL SUBMITTALS

- A. Certificates: Submit certificate signed by **professional engineer licensed in the State of Wisconsin** certifying that location and elevation of improvements comply with requirements.
- B. Landfill Receipts: Submit copy of receipts issued by a landfill facility, licensed to accept hazardous materials, for hazardous waste disposal.

1.3 QUALITY ASSURANCE

- A. Land Surveyor Qualifications: A professional land surveyor who is legally qualified to practice in jurisdiction where Project is located and who is experienced in providing land-surveying services of the kind indicated.
- B. Cutting and Patching: Comply with requirements for and limitations on cutting and patching of construction elements.
 - 1. Structural Elements: When cutting and patching structural elements, notify Architect of locations and details of cutting and await directions from Architect before proceeding. Shore, brace, and support structural elements during cutting and patching. Do not cut and patch structural elements in a manner that could change their load-carrying capacity or increase deflection.
 - 2. Operational Elements: Do not cut and patch operating elements and related components in a manner that results in reducing their capacity to perform as intended or that results in increased maintenance or decreased operational life or safety.
 - 3. Other Construction Elements: Do not cut and patch other construction elements or components in a manner that could change their load-carrying capacity, that results in reducing their capacity to perform as intended, or that results in increased maintenance or decreased operational life or safety.

4. Visual Elements: Do not cut and patch construction in a manner that results in visual evidence of cutting and patching. Do not cut and patch exposed construction in a manner that would, in Architect's opinion, reduce the building's aesthetic qualities. Remove and replace construction that has been cut and patched in a visually unsatisfactory manner.
- C. Manufacturer's Installation Instructions: Obtain and maintain on-site manufacturer's written recommendations and instructions for installation of products and equipment.

PART 2 - PRODUCTS

2.1 MATERIALS

- A. General: Comply with requirements specified in other Sections.
1. For projects requiring compliance with sustainable design and construction practices and procedures, use products for patching that comply with sustainable design requirements.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Existing Conditions: The existence and location of underground and other utilities and construction indicated as existing are not guaranteed. Before beginning sitework, investigate and verify the existence and location of underground utilities, and other construction affecting the Work.
1. Before construction, verify the location and invert elevation at points of connection of sanitary sewer, storm sewer, and water-service piping; underground electrical services; and other utilities.
 2. Furnish location data for work related to Project that must be performed by public utilities serving Project site.
- B. Examination and Acceptance of Conditions: Before proceeding with each component of the Work, examine substrates, areas, and conditions, with Installer or Applicator present where indicated, for compliance with requirements for installation tolerances and other conditions affecting performance. Record observations.
1. Examine roughing-in for mechanical and electrical systems to verify actual locations of connections before equipment and fixture installation.
 2. Examine walls, floors, and roofs for suitable conditions where products and systems are to be installed.
 3. Verify compatibility with and suitability of substrates, including compatibility with existing finishes or primers.
- C. Proceed with installation only after unsatisfactory conditions have been corrected. Proceeding with the Work indicates acceptance of surfaces and conditions.

3.2 PREPARATION

- A. Existing Utility Information: Furnish information to local utility and Owner that is necessary to adjust, move, or relocate existing utility structures, utility poles, lines, services, or other utility appurtenances located in or affected by construction. Coordinate with authorities having jurisdiction.
- B. Field Measurements: Take field measurements as required to fit the Work properly. Recheck measurements before installing each product. Where portions of the Work are indicated to fit to other construction, verify dimensions of other construction by field measurements before fabrication. Coordinate fabrication schedule with construction progress to avoid delaying the Work.
- C. Space Requirements: Verify space requirements and dimensions of items shown diagrammatically on Drawings.
- D. Review of Contract Documents and Field Conditions: Immediately on discovery of the need for clarification of the Contract Documents caused by differing field conditions outside the control of Contractor, submit a request for information to Architect according to requirements in Section 01 31 00 "Project Management and Coordination."

3.3 CONSTRUCTION LAYOUT

- A. Verification: Before proceeding to lay out the Work, verify layout information shown on Drawings, in relation to the property survey and existing benchmarks. If discrepancies are discovered, notify Architect promptly.
- B. General: Engage a professional engineer licensed in the State of Wisconsin to lay out the Work using accepted surveying practices.
1. Establish benchmarks and control points to set lines and levels at each story of construction and

- elsewhere as needed to locate each element of Project.
- 2. Establish limits on use of Project site.
- 3. Establish dimensions within tolerances indicated. Do not scale Drawings to obtain required dimensions.
- 4. Inform installers of lines and levels to which they must comply.
- 5. Check the location, level and plumb, of every major element as the Work progresses.
- 6. Notify Architect when deviations from required lines and levels exceed allowable tolerances.
- 7. Close site surveys with an error of closure equal to or less than the standard established by authorities having jurisdiction.
- C. Site Improvements: Locate and lay out site improvements, including pavements, grading, fill and topsoil placement, utility slopes, and rim and invert elevations.
- D. Building Lines and Levels: Locate and lay out control lines and levels for structures, building foundations, column grids, and floor levels, including those required for mechanical and electrical work. Transfer survey markings and elevations for use with control lines and levels. Level foundations and piers from two or more locations.
- E. Record Log: Maintain a log of layout control work. Record deviations from required lines and levels. Include beginning and ending dates and times of surveys, weather conditions, name and duty of each survey party member, and types of instruments and tapes used. Make the log available for reference by Architect.

3.4 FIELD ENGINEERING

- A. Identification: Owner will identify existing benchmarks, control points, and property corners.
- B. Reference Points: Locate existing permanent benchmarks, control points, and similar reference points before beginning the Work. Preserve and protect permanent benchmarks and control points during construction operations.
- C. Benchmarks: Establish and maintain a minimum of two permanent benchmarks on Project site, referenced to data established by survey control points. Comply with authorities having jurisdiction for type and size of benchmark.
 - 1. Record benchmark locations, with horizontal and vertical data, on Project Record Documents.
- D. Certified Survey: On completion of foundation walls, major site improvements, and other work requiring field-engineering services, prepare a certified survey showing dimensions, locations, angles, and elevations of construction and sitework.

3.5 INSTALLATION

- A. General: Locate the Work and components of the Work accurately, in correct alignment and elevation, as indicated.
 - 1. Make vertical work plumb and make horizontal work level.
 - 2. Where space is limited, install components to maximize space available for maintenance and ease of removal for replacement.
 - 3. Conceal pipes, ducts, and wiring in finished areas unless otherwise indicated.
- B. Comply with manufacturer's written instructions and recommendations for installing products in applications indicated.
- C. Install products at the time and under conditions that will ensure the best possible results. Maintain conditions required for product performance until Substantial Completion.
- D. Conduct construction operations so no part of the Work is subjected to damaging operations or loading in excess of that expected during normal conditions of occupancy.
- E. Sequence the Work and allow adequate clearances to accommodate movement of construction items on site and placement in permanent locations.
- F. Tools and Equipment: Where possible, select tools or equipment that minimize production of excessive noise levels.
- G. Templates: Obtain and distribute to the parties involved templates for work specified to be factory prepared and field installed. Check Shop Drawings of other portions of the Work to confirm that adequate provisions are made for locating and installing products to comply with indicated requirements.

- H. Attachment: Provide blocking and attachment plates and anchors and fasteners of adequate size and number to securely anchor each component in place, accurately located and aligned with other portions of the Work. Where size and type of attachments are not indicated, verify size and type required for load conditions.
 - 1. Mounting Heights: Where mounting heights are not indicated, mount components at heights directed by Architect.
 - 2. Allow for building movement, including thermal expansion and contraction.
 - 3. Coordinate installation of anchorages. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors, that are to be embedded in concrete or masonry. Deliver such items to Project site in time for installation.
- I. Joints: Make joints of uniform width. Where joint locations in exposed work are not indicated, arrange joints for the best visual effect. Fit exposed connections together to form hairline joints.
- J. Remove and replace damaged, defective, or non-conforming Work.

3.6 PROGRESS CLEANING

- A. General: Clean Project site and work areas daily, including common areas. Enforce requirements strictly. Dispose of materials lawfully.
 - 1. Comply with requirements in NFPA 241 for removal of combustible waste materials and debris.
 - 2. Do not hold waste materials more than seven days during normal weather or three days if the temperature is expected to rise above 80 deg F.
 - 3. Containerize hazardous and unsanitary waste materials separately from other waste. Mark containers appropriately and dispose of legally, according to regulations.
 - a. Use containers intended for holding waste materials of type to be stored.
 - 4. Coordinate progress cleaning for joint-use areas where Contractor and other contractors are working concurrently.
- B. Site: Maintain Project site free of waste materials and debris.
- C. Work Areas: Clean areas where work is in progress to the level of cleanliness necessary for proper execution of the Work.
 - 1. Remove liquid spills promptly.
 - 2. Where dust would impair proper execution of the Work, broom-clean or vacuum the entire work area, as appropriate.
- D. Installed Work: Keep installed work clean. Clean installed surfaces according to written instructions of manufacturer or fabricator of product installed, using only cleaning materials specifically recommended. If specific cleaning materials are not recommended, use cleaning materials that are not hazardous to health or property and that will not damage exposed surfaces.
- E. Concealed Spaces: Remove debris from concealed spaces before enclosing the space.
- F. Exposed Surfaces in Finished Areas: Clean exposed surfaces and protect as necessary to ensure freedom from damage and deterioration at time of Substantial Completion.
- G. Waste Disposal: Do not bury or burn waste materials on-site. Do not wash waste materials down sewers or into waterways. Comply with waste disposal requirements in Section 01 50 00 "Temporary Facilities and Controls" and Section 01 74 19 "Construction Waste Management and Disposal."
- H. During handling and installation, clean and protect construction in progress and adjoining materials already in place. Apply protective covering where required to ensure protection from damage or deterioration at Substantial Completion.
- I. Clean and provide maintenance on completed construction as frequently as necessary through the remainder of the construction period. Adjust and lubricate operable components to ensure operability without damaging effects.
- J. Limiting Exposures: Supervise construction operations to ensure that no part of the construction, completed or in progress, is subject to harmful, dangerous, damaging, or otherwise deleterious exposure during the construction period.

3.7 STARTING AND ADJUSTING

- A. Coordinate startup and adjusting of equipment and operating components with requirements in Section 01 91 00 "Commissioning."
- B. Start equipment and operating components to confirm proper operation. Remove malfunctioning units, replace with new units, and retest.
- C. Adjust equipment for proper operation. Adjust operating components for proper operation without binding.
- D. Test each piece of equipment to verify proper operation. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
- E. Manufacturer's Field Service: Comply with qualification requirements in Section 01 40 00 "Quality Requirements."

3.8 PROTECTION OF INSTALLED CONSTRUCTION

- A. Provide final protection and maintain conditions that ensure installed Work is without damage or deterioration at time of Substantial Completion.
- B. Protection of Existing Items: Provide protection and ensure that existing items to remain undisturbed by construction are maintained in condition that existed at commencement of the Work.
- C. Comply with manufacturer's written instructions for temperature and relative humidity.

6 1.2. RELATED SPECIFICATION SECTIONS 1
7 1.3. DEFINITIONS 1
8 1.4. QUALITY ASSURANCE 1
9 1.5. WARRANTY 2
10 PART 2 - MATERIALS 2
11 2.1. GENERAL 2
12 PART 3 - EXECUTION 2
13 3.1. EXAMINATION 2
14 3.2. PREPARATION 2
15 3.3. PERFORMANCE 2
16 3.4. CLEANUP AND RESTORATION 3
17

PART 1 – GENERAL

1.1. SUMMARY

- 20
21 A. This Section includes general procedural requirements for cutting and patching including, but not limited to the
22 following:
23 1. Examination
24 2. Preparation
25 3. Performance
26 4. Cleanup and Restoration
27

1.2. RELATED SPECIFICATION SECTIONS

- 28
29 A. Divisions 02 through 32 Sections for specific requirements and limitations applicable to cutting and patching
30 individual parts of the Work.
31 B. Division 07 Section "Penetration Fire Stopping" for patching fire-rated construction.
32

1.3. DEFINITIONS

- 33
34 A. Cutting: Removal of in-place construction necessary to permit installation or performance of other Work.
35 B. Patching: Fitting and repair work required to restore surfaces to original conditions after installation of other
36 Work.
37 C. Level Alpha
38

1.4. QUALITY ASSURANCE

- 39
40 A. Structural Elements: Do not cut and patch structural elements in a manner that could change their load-carrying
41 capacity or load-deflection ratio.
42 B. Operational Elements: Do not cut and patch operating elements and related components in a manner that results
43 in reducing their capacity to perform as intended or that may result in increased maintenance or decreased
44 operational life or safety.
45 C. Miscellaneous Elements: Do not cut and patch miscellaneous elements or related components in a manner that
46 could change their load-carrying capacity that results in reducing their capacity to perform as intended, or that
47 may result in increased maintenance or decreased operational life or safety. Some miscellaneous elements
48 include the following:
49 1. Water, moisture, or vapor barriers
50 2. Membranes and flashings
51 3. Exterior curtain-wall construction
52 4. Equipment supports
53 5. Piping, ductwork, vessels, and equipment
54 6. Noise and vibration control elements and systems
55 D. Visual Requirements: Do not cut and patch construction in a manner that results in visual evidence of cutting and
56 patching. Do not cut and patch construction exposed on the exterior or in occupied spaces in a manner that
57 would, in Architect's opinion, reduce the building's aesthetic qualities. Remove and replace construction that has
58 been cut and patched in a visually unsatisfactory manner.

1 **1.5. WARRANTY**

- 2 A. Existing Warranties: Remove, replace, patch, and repair materials and surfaces cut or damaged during cutting
3 and patching operations, by methods and with materials so as not to void existing warranties.
4 B. All cutting and patching work performed under this contract shall be warranted like new work as defined by the
5 Specification governing the work.
6

7 **PART 2 - MATERIALS**

8
9 **2.1. GENERAL**

- 10 A. Comply with requirements specified within other sections of the Specifications.
11 B. In-Place Materials: Use materials identical to existing in-place materials. For exposed surfaces use materials that
12 visually match in-place adjacent surfaces to the fullest extent possible.
13 1. If identical materials are unavailable or cannot be used, use materials that, when installed, will match the
14 visual and functional performance of in-place materials.
15

16 **PART 3 - EXECUTION**

17
18 **3.1. EXAMINATION**

- 19 A. Examine surfaces to be cut and patched and conditions under which cutting and patching are to be performed.
20 1. Compatibility: Before patching, verify compatibility with and suitability of substrates, including
21 compatibility with in-place finishes or primers.
22 2. Proceed with installation only after unsafe or unsatisfactory conditions have been corrected.
23

24 **3.2. PREPARATION**

- 25 A. Temporary Support: Provide temporary support of Work to be cut.
26 B. Protection: Protect in-place construction and existing conditions during cutting and patching to prevent damage.
27 Provide protection from adverse weather conditions for portions of Project that might be exposed during cutting
28 and patching operations. If the failure to protect, or the lack of protection, of in-place construction and/or
29 existing conditions results in damage, the contractor shall be responsible for repair to previous condition.
30 C. Adjoining Areas: Avoid interference with use of adjoining areas or interruption of free passage to adjoining areas.
31 D. Existing Utility Services and Mechanical/Electrical Systems: Where existing services/systems are required to be
32 removed, relocated, or abandoned, bypass such services/systems before cutting to eliminate interruption to
33 occupied areas.
34

35 **3.3. PERFORMANCE**

- 36 A. General: Employ skilled workers to perform cutting and patching. Proceed with cutting and patching at the
37 earliest feasible time, and complete without delay.
38 1. Cut in-place construction to provide for installation of other components or performance of other
39 construction, and subsequently patch as required to restore surfaces to their original condition.
40 B. Cutting: Cut in-place construction by sawing, drilling, breaking, chipping, grinding, and similar operations,
41 including excavation, using methods least likely to damage elements retained or adjoining construction. If
42 possible, review proposed procedures with original Installer; comply with original Installer's written
43 recommendations.
44 1. In general, use hand or small power tools designed for sawing and grinding, not hammering and
45 chopping. Cut holes and slots as small as possible, neatly to size required, and with minimum disturbance
46 of adjacent surfaces. Temporarily cover openings when not in use.
47 2. Finished Surfaces: Cut or drill from the exposed or finished side into concealed surfaces.
48 3. Concrete or Masonry: Cut using a cutting machine, such as an abrasive saw or a diamond-core drill.
49 4. Excavating and Backfilling: Comply with requirements in applicable Division 31 Sections where required by
50 cutting and patching operations.
51 5. Mechanical and Electrical Services: Cut off pipe or conduit in walls or partitions to be removed. Cap,
52 valve, or plug and seal remaining portion of pipe or conduit to prevent entrance of moisture or other
53 foreign matter after cutting.
54 6. Proceed with patching after construction operations requiring cutting are complete.
55 C. Patching: Patch construction by filling, repairing, refinishing, closing up, and similar operations following
56 performance of other Work. Patch with durable seams that are as invisible as possible. Provide materials and
57 comply with installation requirements specified in other Sections.

1 D. Inspection: Where feasible, test and inspect patched areas after completion to demonstrate integrity of
2 installation.
3

4 **3.4. CLEANUP AND RESTORATION**

- 5 A. Restore exposed finishes of patched areas and extend finish restoration into retained adjoining construction in a
6 manner that will eliminate evidence of patching and refinishing.
- 7 1. Clean piping, conduit, and similar features before applying paint or other finishing materials.
 - 8 2. Restore damaged pipe covering to its original condition.
 - 9 3. Floors and Walls: Where walls or partitions that are removed extend one finished area into another,
10 patch and repair floor and wall surfaces in the new space. Provide an even surface of uniform finish,
11 color, texture, and appearance. Remove in-place floor and wall coverings and replace with new
12 materials, if necessary, to achieve uniform color and appearance.
 - 13 4. Where patching occurs in a painted surface, apply primer and intermediate paint coats over the patch
14 and apply final paint coat over entire unbroken surface containing the patch. Provide additional coats
15 until patch blends with adjacent surfaces.
 - 16 5. Ceilings: Patch, repair, or re-hang in-place ceilings as necessary to provide an even-plane surface of
17 uniform appearance.
 - 18 6. Exterior Building Enclosure: Patch components in a manner that restores enclosure to a weather tight
19 condition.
 - 20 7. Cleaning: Clean areas and spaces where cutting and patching are performed. Completely remove paint,
21 mortar, oils, putty, and similar materials.
 - 22 8. Any smoke and fire caulking that has been disturbed must be replaced by the Contractor as required by
23 code.

PROGRESS CLEANING**

1
2
3
4 PART 1 – GENERAL 1
5 1.1. SUMMARY 1
6 1.2. RELATED SPECIFICAITONS 1
7 1.3. QUALITY ASSURANCE 1
8 PART 2 - PRODUCTS 1
9 2.1. CLEANING MATERIALS AND EQUIPMENT..... 1
10 PART 3 - EXECUTION 1
11 3.1. SAFETY CLEANING 1
12 3.2. PROJECT SITE CLEANING 2
13 3.3. PROGRESS CLEANING 2
14 3.4. FINAL CLEANING..... 3
15 3.5. CALL BACK WORK 4
16

PART 1 – GENERAL

1.1. SUMMARY

- 20 A. Throughout the execution of this contract all contractors shall be responsible for maintaining the project site in a
21 standard of cleanliness as described in this specification.
22 B. All contractors shall also comply with the requirements for cleaning as described in other specifications.
23 C. Work included in this specification shall include but not be limited to:
24 1. Safety Cleaning
25 2. Project Site Cleaning
26 3. Progress Cleaning
27 4. Final Cleaning
28

1.2. RELATED SPECIFICAITONS

- 30 A. Section 01 35 00 Special Procedures
31 B. Section 01 60 00 Product Requirements
32 C. Section 01 74 19 Construction Waste Management and Disposal
33 D. Section 01 76 00 Protecting Installed Construction
34

1.3. QUALITY ASSURANCE

- 36 A. The General Contractor (GC) shall conduct daily inspections, more often if necessary, of the entire project site to
37 ensure the requirements of cleanliness are being met as described within these specifications.
38 B. All contractors shall comply with other regulatory requirements as they apply to waste recycling, reuse, hauling,
39 and disposal requirements of any governmental authority having jurisdiction.
40 C. The Owner reserves the right to have work done by others in the event any contractor fails to perform cleaning
41 as described within these specifications. The cost of any Owner provided cleaning shall be charged to the
42 contractor through a deduct change order.
43

PART 2 - PRODUCTS

2.1. CLEANING MATERIALS AND EQUIPMENT

- 47 A. The Contractor shall provide all required personnel, equipment, and materials necessary to maintain the
48 required level of cleanliness as described in this specification.
49 B. Use only cleaning materials and equipment that are compatible with the surface being cleaned, as
50 recommended by the manufacturer, or as approved by the A/E.
51 C. Use only cleaning materials, equipment, and methods as recommended in the manufacturers care and use guide
52 of the material, finish or equipment being cleaned.
53

PART 3 - EXECUTION

3.1. SAFETY CLEANING

- 57 A. All Contractors shall be responsible for safety cleaning as required by OSHA and other regulatory requirements
58 as applicable.

- 1 B. Safety Cleaning shall include but not be limited to the following:
- 2 1. All work areas, passageways, ramps, and stairs shall be kept free of debris, scrap materials, pallets, and
- 3 other large items that would obstruct exiting routes. Small items such as tools, electrical cords, etc are
- 4 picked up when not in use.
- 5 2. Form and scrap lumber shall have nails/screws removed or bent over. Lumber shall be neatly stacked in
- 6 an area designated by the GC.
- 7 3. Spills of oil, grease, and other such liquids shall be cleaned immediately or sprinkled with sand/oil-dry
- 8 first, then cleaned.
- 9 4. Oily, flammable, or hazardous items shall be stored in appropriate covered containers and storage
- 10 devices unless actively being used.
- 11 5. Oily, or flammable rags, and other such waste shall only be disposed of in authorized covered containers.
- 12 6. Disposal by burning shall not be allowed at any time.
- 13

14 **3.2. PROJECT SITE CLEANING**

- 15 A. This section applies to the general cleanliness of the project site as a whole for the duration of the execution of
- 16 this contract.
- 17 B. Exterior Project Site Areas
- 18 1. The GC and other Contractors as appropriate shall ensure the following levels of cleanliness are applied
- 19 to the exterior project site areas.
- 20 a. The overall appearance of the project site is neat and orderly. Defined areas for material storage,
- 21 material waste, job trailers, and the project area are clean and well maintained.
- 22 b. The construction fence is maintained, erect with no gaps, and properly posted per all regulatory
- 23 requirements.
- 24 c. All erosion control measures are properly maintained, cleaned, and repaired as necessary.
- 25 d. All loose materials (construction or waste) are properly tied or weighted down to resist blowing.
- 26 e. All construction materials are properly covered with fully functional tarps or plastic wrap,
- 27 protected from the weather, coverings are tied, strapped, or weighted down to resist blowing.
- 28 f. Dust control is applied as necessary or as required by any regulatory requirement.
- 29 C. Interior Project Site Areas
- 30 1. All Contractors shall ensure the following levels of cleanliness are applied to the interior project site
- 31 areas.
- 32 a. The overall appearance of the project site is neat and orderly. Defined areas for material storage,
- 33 material waste, and project area are clean and well maintained.
- 34 b. Stored materials are kept in original shipping containers whenever possible. Stored materials not
- 35 in shipping containers are properly stored and protected according to other applicable
- 36 specifications.
- 37 c. All scraps and debris shall be properly disposed of as often as necessary to keep work areas,
- 38 passageways, stairs, and ramps free of debris and clear for emergency exiting.
- 39 d. Boxes, pallets, and other such shipping containers, are broken down, stored in a consolidated area
- 40 or, disposed of as often as is necessary.
- 41 e. Hand tools, supplies, materials, electrical cords not being used are picked up and stored in gang
- 42 boxes, not left as walking hazards in work areas, passageways, etc.
- 43 D. Job Trailer
- 44 1. The interior of the job trailer shall be kept clean and available as a work space at all times. The GC shall
- 45 ensure that the following is provided for within the job trailer:
- 46 a. Meeting space including tables and chairs.
- 47 b. Sufficient space for all contractors to access the official construction documents, provide updates,
- 48 etc.
- 49

50 **3.3. PROGRESS CLEANING**

- 51 A. This sub-section shall apply to all Progress Cleaning prior to the installation of finishes, fixtures, and trim (IE
- 52 rough-in).
- 53 1. For the purposes of this section "clean" shall be defined as a level of cleanliness free of dust and other
- 54 material capable of being removed by use of reasonable effort using a good quality janitor broom and
- 55 shop-vac.
- 56 2. Daily cleanings shall be conducted by all contractors at the end of the work day as follows:
- 57 a. Debris in excavated areas shall be removed prior to backfill and compaction.
- 58 b. Debris in wall cavities, chase spaces, etc shall be removed prior to enclosing the spaces.

- 1 c. Large items shall be properly stored, returned to designated areas, or disposed of as necessary.
2 d. Loose materials shall be properly secured.
3 e. Flammable or hazardous materials are properly stored or disposed of.
4 3. Weekly cleaning shall be conducted by all contractors as designated by the GC. Weekly cleanings shall
5 include all the above for a daily cleaning and other necessary cleaning as designated by the GC.
6 B. This sub-section shall apply to Progress Cleaning in preparation for the installation of finishes, fixtures, and trim.
7 a. Surfaces receiving finishes shall be thoroughly cleaned prior to contractors applying finish
8 materials. The GC shall be responsible for inspecting the area and surfaces being cleaned for
9 finish prior to the sub-contractor applying the finish. This shall include but not be limited to the
10 following:
11 i. Wall surfaces shall be wiped clean of dirt and oily residues, vacuumed free of dust, and
12 shall be free of surface imperfections prior to painting or installing wall coverings.
13 ii. Metal surfaces shall be wiped clean of dirt and oily residues, and be free of surface
14 imperfections prior to painting.
15 iii. Flooring shall be broom swept of large and loose items then vacuumed clean of dust and
16 small particles, and damp mopped clean and dried prior to installing any flooring finish.
17 Additional cleaning may be required depending on the preparation requirements
18 recommended by the flooring material manufacturer.
19 C. This sub-section shall apply to Progress Cleaning after the installation of finishes, fixtures, and trim.
20 1. For the purposes of this section "clean" shall be defined as a level of cleanliness free of dust and other
21 material capable of damaging or visually disfiguring finished work, finishes, fixtures, and trim.
22 2. Progress Cleaning at this point in the contract shall be conducted immediately as follows:
23 a. Dust, dirt, etc shall be swept and vacuumed off of finish flooring and trim.
24 b. Liquid spills shall be cleaned up according to the spill type. This shall include drips and spills
25 caused by paint, stain, sealants, and other such items.
26 3. The Contractor(s) at no additional cost to the Owner shall be responsible for replacing any finished work,
27 finishes, fixtures, and trim damaged or disfigured because of inadequate or improper cleaning.
28

29 3.4. FINAL CLEANING

- 30 A. As noted in Specification 01 29 76 Progress Payment Procedures, Progress Payment Milestone Schedule, Final
31 Cleaning shall not be conducted prior to requesting the 90% contract total progress payment and all of the
32 following shall be complete:
33 1. All final regulatory inspections including but not limited to Building Inspection Department and Madison
34 Fire Department inspections have been successfully completed.
35 2. All Quality Management Observation (QMO) reports have been closed out.
36 3. All Demonstration and Training has been completed.
37 4. All Attic Stock has been consolidated and located to its designated area
38 5. All protection for installed construction shall be removed prior to final cleaning by the contractor
39 responsible for providing the protections. This shall include the removal of any adhesive residues left
40 behind from tapes. Contractors shall only use manufacturer authorized cleaning materials for removing
41 adhesives, etc.
42 B. For the purposes of this section "clean" shall be defined as a level of cleanliness generally provided by skilled
43 cleaners using commercial quality building maintenance equipment and materials.
44 C. The GC shall be responsible for ensuring that all requirements under this section are being met.
45 D. General Requirements
46 1. Employ experienced personnel or professional cleaners for final cleaning as necessary for the areas or
47 equipment being cleaned.
48 2. Cleaning equipment used shall be commercial grade equipment commonly used by professional cleaners.
49 3. Cleaning equipment and materials shall be cleaned, rinsed, or replaced to ensure a uniform level of
50 cleanliness is being maintained during the final cleaning. This shall include but not be limited to the
51 following:
52 a. Vacuum cleaner bags and/or filters are changed and/or cleaned as often as necessary.
53 b. Dust & wipe down rags are washed, rinsed, or replaced before starting each room.
54 c. Mopping equipment
55 i. Mop water for washing shall have cleaning solution added to the amount and temperature
56 per manufacturer's recommendations. Mop washing water shall be replaced often to
57 maintain the levels of the cleaning solution and temperature required.
58 ii. Mop water for rinsing shall remain clean, clear, and be replaced as often as necessary.

- iii. Mop heads shall be rinsed often and replaced as necessary.
 - iv. Mop heads and buckets shall be thoroughly rinsed with each change of water.
 - v. Only new mop heads shall be used for rinsing.
 - E. Refer to all other specifications in this contract for specific requirements regarding final cleaning of finishes, fixtures, equipment, etc.
 - F. Exterior Cleaning shall include but not be limited to the following:
 1. All exterior glazing surfaces have been professionally cleaned and are free of dust and streaking.
 2. Metal roofs, siding, and other surfaces shall be clean of dirt and free of splashed or excess materials such as sealants, mortar, paint, etc.
 3. All exterior furnishings shall be clean, waste receptacles shall be empty.
 4. Paved areas shall be clean, free of dirt, oily stains and other such blemishes
 5. Exterior lights and diffusers are clean and free of dust.
 - G. Interior Cleaning shall include but not be limited to the following:
 1. Remove all labels, stickers, tags, and other such items which are not required by code as permanent labels.
 2. All interior glazing surfaces, including mirrors, have been professionally cleaned and are free of dust and streaking.
 3. All interior surfaces have been cleaned of excess materials such as paint, sealants, etc and have been wiped free of dust.
 4. Interior metals, fixtures, and trim have been cleaned free of dust and oily residues
 5. Carpet flooring has been thoroughly cleaned; vacuumed free of dust, excess glues and other stains removed per manufacturers use and care instructions.
 6. Resilient flooring has been thoroughly cleaned; vacuumed free of dust, excess glues and other stains removed, mopped and buffed per manufacturers use and care instructions.
 7. Interior non-occupied concrete floors shall be broom cleaned, vacuumed free of dust, excess glues and other stains removed per manufacturers use and care instructions.
 8. Light fixtures, lamps, diffusers and other such items have been dusted and cleaned as necessary.

3.5. CALL BACK WORK

- A. The GC shall be responsible for ensuring that any contractor returning to the project site for completion or correction work has re-cleaned and restored the area to the levels described in section 3.4 above upon completion of the work. This shall include but not be limited to the following:
 1. The immediate area(s) where work was completed.
 2. Adjacent areas where dust or debris may have traveled.
 3. Other areas occupied during the completion of the call back work.
 4. Path of entrance/exit, to/from the area(s) of work.

20

PART 1 – GENERAL

1.1. SUMMARY

- 24 A. This specification includes administrative and procedural requirements for the recycling, re-use, salvaging, and
25 disposal of non-hazardous construction and demolition waste.
26 B. The General Contractor (GC) shall be fully responsible for complying with all applicable ordinances and other
27 such regulatory requirements during the execution of this contract.
28

1.2. RELATED SPECIFICAITONS

- 30 A. 01 29 76 Progress Payment Procedures
31 B. 01 31 23 Project Management Web site
32 C. 01 32 19 Submittals Schedule
33 D. 01 33 23 Submittals
34 E. 01 77 00 Closeout Procedures
35 F. Other Divisions and Specifications that may address the proper disposal of construction or demolition waste as it
36 pertains to work being conducted under that particular specification.
37

1.3. CITY ORDINANCES

- 39 A. There are two (2) Madison General Ordinances (MGO) that the City of Madison has regarding construction and
40 demolition waste.
41 1. MGO 10.185, Recycling and Reuse of Construction and Demolition Debris, describes the requirements
42 associated with this ordinance including definitions, documentation requirements, and penalties.
43 2. MGO 28.185, Approval of Demolition (Razing, Wrecking) and Removal, describes the requirements
44 associated with applying for and receiving a demolition permit.
45 B. All City of Madison, Board of Public Works, contracts being conducted by City Engineering, Facility Management,
46 for construction, remodeling, or demolition shall comply with the above ordinances regardless of project type or
47 size.
48

1.4. DEFINITIONS

- 50 A. Clean: Untreated and unpainted material, free of contamination caused by oils, solvents, caulks, and other
51 chemicals.
52 B. Construction and Demolition Debris: Materials resulting from the construction, remodeling, repair, and
53 demolition of utilities, structures, buildings, and roads.
54 C. Disposal: Off-site removal of construction and demolition debris and the subsequent sale, recycling, reuse, or
55 deposit in authorized landfill or incinerator.
56 D. Hazardous: Exhibiting the characteristics of hazardous substance, i.e. ignitability, corrosiveness, toxicity, or
57 reactivity and including but not limited to asbestos containing materials, lead, mercury and PCBs.
58 E. Non-hazardous: Exhibiting none of the characteristics of a hazardous substance.

- 1 F. Nontoxic: Not immediately poisonous to humans or poisonous after a long period of exposure.
- 2 G. Recyclable: The ability of a product or material to be recovered at the end of its life cycle and remanufactured
- 3 into a new product.
- 4 H. Recycle: Any process by which construction or demolition debris is diverted from final disposal as solid waste at
- 5 a permitted landfill and instead is collected, separated, and/or processed into raw materials for new, reused, or
- 6 reconstituted products; or for the recovery of materials for energy production processes.
- 7 I. Recycler: Any recycling facility, transfer station, or other waste handling facility which accepts construction and
- 8 demolition debris for recycling, or for other transferring to a recycling facility.
- 9 J. Recycling: The process of sorting, cleaning, treating, or reconstituting solid waste and other discarded materials
- 10 for the purpose of preparing the material to be recyclable. Recycling does not include burning, incinerating or
- 11 thermally destroying waste.
- 12 K. Return: To give back reusable items or unused products to vendors for credit.
- 13 L. Reuse: Shall mean any of the following:
- 14 1. The on-site use of reprocessed construction and demolitions debris.
- 15 2. The off-site redistribution of a material, for use in the same manner or similar manner at another
- 16 location.
- 17 3. The use of non-toxic, clean wood as an alternative fuel source.
- 18 M. Salvage: To remove a waste material from the project site for resale or reuse by the Owner or others.
- 19 N. Toxic: Poisonous to humans either immediately or after a long period of exposure.
- 20 O. Trash: Any product or material unable to be re-used, returned, recycled, or salvaged.
- 21 P. Waste: Extra materials or products that have reached the end of its useful life or its intended use. Waste
- 22 includes salvageable, returnable, recyclable and re-useable construction and demolition materials, and trash.
- 23

24 1.5. PERFORMANCE REQUIREMENTS

- 25 A. The GC shall develop a Waste Management Plan that results in end-of-project rates for salvage/recycling/reuse
- 26 of 95 percent (minimum) by weight of the total waste generated by the Work. Percentages may be adjusted on
- 27 a project by project basis depending on selected LEED goals associated with the project.
- 28 B. The GC shall salvage or recycle 100 percent of all uncontaminated packaging materials including but not limited
- 29 to the following:
- 30 1. Paper
- 31 2. Cardboard
- 32 3. Beverage containers
- 33 4. Boxes
- 34 5. Plastic Sheet and film
- 35 6. Polystyrene packaging
- 36 7. Wood crates and pallets
- 37 8. Plastic pails and buckets
- 38 C. Promote a resourceful use of supplies and materials through proper planning and handling. Generate the least
- 39 amount of waste possible by minimizing errors, poor planning, breakage, mishandling, contamination or other
- 40 similar factors.
- 41 D. Use all reasonable means to divert construction waste from landfills and incinerators through recycling, reuse, or
- 42 salvage as appropriate.
- 43

44 1.6. SUBMITTALS AND DELIVERABLES

- 45 A. The GC shall provide his/her completed Waste Management Plan to the Project Management Web Site as a
- 46 submittal for review by the Project Architect and City Project Manager.
- 47 1. See item 1.8 below for Waste Management Plan submittal requirements.
- 48 2. The Waste Management Plan shall be completed, submitted, and approved as a pre-requisite for
- 49 Progress Payment number 1.
- 50 3. Copies of all documentation required by this specification shall be submitted to the appropriate Project
- 51 Management Web Site Library. Documentation shall be reviewed by the City Project Manager during all
- 52 Progress Payment reviews for compliance and accuracy.
- 53 B. The Waste Management Coordinator shall provide copies of items 1 through 5 below to the appropriate Project
- 54 Management Web Site Library and shall update the Waste Management Summary Log to reflect the records
- 55 being submitted.
- 56 1. Records of Donations: Indicate receipt and acceptance of itemized salvageable waste donated to
- 57 individuals or organizations. Indicate if the organization is tax exempt.

- 1 2. Records of Sales: Indicate receipt and acceptance of itemized salvageable waste sold to individuals or
- 2 organizations. Indicate if the organization is tax exempt.
- 3 3. Recycling and Processing Facility Records: Indicate receipt and acceptance of recyclable waste by
- 4 recycling and processing facilities licensed to accept them. Include manifests, weight tickets, receipts and
- 5 invoices.
- 6 4. Landfill and Incinerator Disposal Records: Indicate receipt and acceptance of waste by landfills and
- 7 incinerator facilities licensed to accept them. Include manifests, weight tickets, receipts and invoices.
- 8 5. Statement of Refrigerant Recovery: The Refrigerant Recovery Technician responsible for recovering
- 9 refrigerant shall provide the GC with a statement indicating all of the following:
- 10 a. All recovery was performed according to EPA Regulations.
- 11 b. All refrigerant present was recovered; indicate the total quantity recovered by unit.
- 12 c. Date of Recovery.
- 13 d. Name, address, company name, and phone number of technician performing the recovery.
- 14 e. Technician shall sign and date the statement.
- 15 C. LEED Submittal: The GC shall provide the following information using the appropriate LEED letter template upon
- 16 project completion: indicating that the requirements of the credit have been met. *NOTE: This requirement shall*
- 17 *only apply to projects having a LEED certification goal.*
- 18 1. Total waste material generated.
- 19 2. Total waste material diverted by diversion method; recycling, salvage, re-use, etc.
- 20 3. Statement that the credit requirements have been met.
- 21 4. GC shall sign the letter.
- 22

23 **1.7. QUALITY ASSURANCE**

- 24 A. Waste Management Coordinator: The GC shall be responsible for designating a Waste Management
- 25 Coordinator. Coordinator may be the GC Supervisor, GC Project Manager or other member of the GC staff
- 26 having knowledge of proper waste management procedures and all applicable regulations.
- 27 B. Regulatory Requirements: comply with all hauling and disposal regulations of authorities having jurisdiction.
- 28 C. The Waste Management Coordinator shall comply with Specification 01 31 19 Project Meetings, Section 3.7.B.1
- 29 and conduct a Waste Management Conference at the job site. This conference shall be repeated as necessary as
- 30 additional trades are added to the Work. The conference shall include but not be limited to the following:
- 31 1. Identify the Waste Management Coordinator; provide trade contractors with name, phone, and email
- 32 information.
- 33 2. Review and discuss the Waste Management Plan and the roles of the Coordinator.
- 34 3. Review the requirements for documenting and reporting procedures of each type of waste and its
- 35 disposition.
- 36 4. Review procedures for material separation; indicate availability and locations of containers and bins.
- 37 5. Review procedures for periodic waste collection and transportation to recycling and disposal facilities.
- 38 6. Review waste management procedures specific to each trade.
- 39 D. Refrigerant Recovery Technician Qualifications: Certified by EPA-approved certification program.
- 40

41 **1.8. WASTE MANAGEMENT PLAN**

- 42 A. Develop a plan consisting of waste identification, a waste reduction work plan, and cost/revenue analysis.
- 43 Indicate quantities by weight or volume. Use the same units of measure throughout the waste management
- 44 plan.
- 45 1. Waste Identification: Indicate anticipated types and quantities of site clearing, demolition waste, and
- 46 construction waste that will be generated during the execution of this contract. Include assumptions for
- 47 the estimates.
- 48 2. Waste Reduction Work Plan: The work plan shall consist of but not be limited to all of the following:
- 49 a. Identify methods for reducing construction waste. Re-using, framing and forming materials, re-
- 50 planning material cuts to minimize waste, etc.
- 51 b. Identify what types of materials will be recycled. Provide lists of local companies that receive
- 52 and/or process the materials. Include names, addresses, and phone numbers.
- 53 c. Identify what types of materials will be disposed of and whether it will be disposed of in a landfill
- 54 facility or by incineration facility. Provide lists of local companies that receive and/or process the
- 55 materials. Include names, addresses, and phone numbers.
- 56 d. Identify methods to be used on site for separating waste including all of the following:
- 57 i. Sizes of containers to be used.
- 58 ii. Labels to be used on the containers to identify the type of waste allowed in the container.

- 1 iii. Designated locations on the project site for waste material containers.
- 2 B. If project requires demolition incorporate the ordinance required (MGO 28.185) Recycling and Reuse Plan into
- 3 the Waste Management Plan.
- 4 C. Provide all of the following for the Waste Management Coordinator:
- 5 1. Name, employer, employer address, phone number, and email address of the designated coordinator.
- 6 a. The GC shall also provide this information with the required Project Directory Submittal at the
- 7 beginning of the project.
- 8 D. If at the option of the GC, he/she chooses to contract with a Waste Management Disposal Company that allows
- 9 comingled and unsorted waste materials, the GC shall include with his/her Waste Management Plan the
- 10 following:
- 11 1. Name, address, phone number, state permitting information, and other pertinent information about the
- 12 disposal company.
- 13 2. Documentation from the disposal company indicating company policies and procedures regarding
- 14 comingled and unsorted waste materials to include:
- 15 a. GC responsibilities on the project site.
- 16 b. Disposal company procedures for receiving, sorting, recycling, and disposing of comingled and
- 17 unsorted waste material.
- 18

19 **PART 2 – PRODUCTS – THIS SECTION NOT USED**

20

21 **PART 3 - EXECUTION**

22

23 **3.1. PLAN IMPLEMENTATION**

- 24 A. Implement the approved waste management plan. Provide adequate containers, storage space, signage,
- 25 transportation and other items required to implement the plan during the execution of this contract.
- 26 B. The GC and Waste Management Coordinator shall be responsible for monitoring and reporting the status of the
- 27 Waste Management Plan and shall monitor the waste management practices on site as frequently as needed.
- 28 C. Train all workers, sub-contractors, and suppliers on proper waste management procedures as appropriate for
- 29 the work being conducted on the project site.
- 30 1. Distribute the waste management plan to everyone concerned within seven (7) days of submittal
- 31 approval.
- 32 2. Distribute the waste management plan to new workers, sub-contractors, and suppliers when they first
- 33 appear on the project site.
- 34 3. Conduct additional training as needed during the execution of the contract to keep a positive focus on
- 35 the waste management plan.
- 36 D. Conduct waste management operations to ensure minimum interference with roads, streets, walks, walkways,
- 37 and other adjacent and used facilities.
- 38 1. Designate and label specific areas on the project site necessary for separating materials to be salvaged,
- 39 recycled, reused, donated, and sold.
- 40 2. Comply with any specification or regulatory requirements pertaining to dust, dirt, environmental
- 41 protection, and noise control.
- 42

43 **3.2. HAZARDOUS AND TOXIC WASTE**

- 44 A. The Owner shall be responsible under separate contract for the removal of any asbestos related materials. All
- 45 other materials shall be removed by the GC.
- 46 B. All hazardous and toxic waste shall be separated, stored, and disposed of according to all applicable regulations.
- 47 C. All hazardous and toxic materials on site shall have a Material Safety and Data Sheet (MSDS) available that
- 48 indicates storage requirements, emergency information, and disposal requirements as necessary.
- 49

50 **3.3. GENERAL GUIDELINES FOR ALL WASTES**

- 51 A. Recycle all paper and beverage containers used by workers, sub-contractors, suppliers and visitors to the project
- 52 site.
- 53 B. All revenues, savings, rebates, tax credits, and other such incentives received from recycling, reusing, or
- 54 salvaging waste materials shall accrue to the GC unless specified otherwise in the contract documents.
- 55 C. Separate recyclable, reusable, and salvageable waste from other waste materials, trash, and debris except where
- 56 Waste Management Disposal Company allows comingled waste materials, see section 1.8.D above.
- 57 1. Separate by type in appropriate containers or designated areas according to the approved waste
- 58 management plan away from the construction area. Do not store within the drip lines of existing trees.

- 1 2. Inspect containers and bins frequently for contamination and inappropriately sorted materials. Remove
- 2 contaminated materials and resort as necessary.
- 3 3. Stockpile bulk materials such as sand, topsoil, stone, etc., on site away from the construction area and
- 4 without intermixing with other materials. Place, grade, and shape stockpiles to drain surface water, and
- 5 cover to prevent windblown dust. Do not store within the drip lines of existing trees.
- 6 4. Whenever possible store items off the ground and/or protect them from the weather.
- 7

8 **3.4. GUIDELINES FOR RECYCLABLE, RE-USABLE, AND SALVAGEABLE WASTE**

- 9 A. The following guidelines is not a complete or all inclusive list and shall be adjusted as needed by the methods
- 10 and procedures identified in the Waste Management Plan.
- 11 B. Asphalt Paving: Break-up into transportable pieces or grind, transport to an authorized recycling facility.
- 12 C. Carpet and Pad: Separate carpet and pad scraps, containerize and transport to an authorized recycling facility.
- 13 D. Ceiling System Components: Suspended ceiling system components shall be sorted by material type as follows:
- 14 1. Broken, cut, or damaged tiles shall be containerized, transport to an authorized recycling facility.
- 15 2. Damaged, or cut tracks, trim and other metal grid system components shall be sorted with other metals
- 16 of similar types, palletize, transport to an authorized recycling facility.
- 17 E. Clean Fill: When allowed by Division 31 Specifications; concrete, masonry, stone, asphalt pavement, sand and
- 18 other such materials may be used as clean fill on this project site. The GC shall verify with the Project Architect,
- 19 Structural Engineer, or Civil Engineer as necessary prior to using any materials as clean fill. Materials shall be
- 20 processed, placed, and compacted as specified. If not being re-used on site, transport to an authorized recycling
- 21 facility.
- 22 F. Clean Wood Materials: Including but not limited framing cutoffs, wood sheathing or paneling materials,
- 23 structural or engineered wood products, and pallets or crates. Clean Wood shall be free of paints, stains, oils,
- 24 preservatives and other such contaminants.
- 25 1. Useable pieces shall be sorted by type and dimension, bundled and transported off site by the GC or
- 26 returned to the supplier.
- 27 2. Non-useable pieces shall be palletized or containerized, transport to an authorized recycling facility.
- 28 3. Clean, uncontaminated sawdust and wood shavings shall be bagged, transport to an authorized recycling
- 29 facility.
- 30 G. Concrete: Break-up into transportable pieces, remove all reinforcing and other metals, transport to an
- 31 authorized recycling facility.
- 32 H. Glass Products: Shall be sorted by types, do not include light fixture lamps and bulbs. Products broken in
- 33 shipment shall be returned to the supplier. Broken or cracked items still in frames shall be taped to prevent
- 34 further breakage and injury to workers. Transport to an authorized recycling facility.
- 35 I. Gypsum Board: Stack large clean pieces on wooden pallets or container, store in a dry location, transport to an
- 36 authorized recycling facility.
- 37 J. Light Fixture Lamps and Bulbs: Fluorescent tubes shall be containerized, transport to an authorized recycling
- 38 facility.
- 39 K. Masonry and CMU: Remove all metal reinforcing, anchors, and ties, clean undamaged pieces and neatly stack on
- 40 pallets, transport damaged pieces to an authorized recycling facility.
- 41 L. Metals: Sort metals by type as follows, this does not include piping:
- 42 1. Architectural metals including but not limited to siding, soffit, and roofing panels shall be sorted by
- 43 material, palletize or bundle as needed and transport to an authorized recycling facility.
- 44 2. Structural steel, sort by size and type; palletize and transport to an authorized recycling facility.
- 45 3. Miscellaneous metals such as aluminum, brass, bronze, etc shall be sorted by type, containerized or
- 46 palletized as necessary, transport to an authorized recycling facility.
- 47 M. Packaging and shipping materials
- 48 1. Cardboard boxes and containers: Breakdown all cardboard boxes and containers into flat sheets. Bundle
- 49 and store in a dry location until transported for recycling.
- 50 2. Pallets:
- 51 a. Whenever possible require deliveries using pallets to remove them from the project site.
- 52 b. Neatly stack pallets in preparation for reusing them or providing them to other companies for
- 53 salvage or re-use.
- 54 c. Break down pallets into component wood pieces that comply with the requirements for recycling
- 55 clean wood materials. Neatly stack or palletize pieces in preparation for transportation.
- 56 3. Crates: Break down crates into component wood pieces that comply with the requirements for recycling
- 57 clean wood materials. Neatly stack or palletize pieces in preparation for transportation.
- 58 4. Polystyrene Packaging: Separate and bag materials.

- 1 N. Piping and conduit: Reduce all piping and conduit to straight lengths, sort and store by size, material and type.
2 Remove supports, hangers, valves, boxes, sprinkler heads, and other such components, sort and store by size,
3 material and type. Transport to authorized recycling facilities according to material types.
4 O. Roofing: Roofing materials shall be sorted and containerized by type, transport to authorized recycling facilities
5 according to material types.
6 P. Site-Clearing Waste: Sort all site waste by type.
7 1. Only stockpile soils types and quantities required for re-use on the project site. All remaining quantities
8 shall be transported off site to an authorized facility that receives such materials.
9 2. Brush, branches, and trees with no marketable re-use shall be transported to facilities for chipping into
10 mulch.
11 3. Trees with a marketable re-use shall be salvaged and transported to facilities that specialize in processing
12 trees for future use as wood products.
13

14 **3.5. GUIDELINES FOR DISPOSAL OF WASTES**

- 15 A. The following guidelines shall be adjusted as needed by the methods and procedures identified in the Waste
16 Management Plan.
17 B. Any waste that is contaminated, organic, or cannot be recycled, re-used, or salvaged shall be legally disposed of
18 in an authorized landfill or incinerator. Disposal methods shall follow all applicable regulatory requirements.
19 C. No waste material of any kind, except those types designated as clean fill in section 3.4 above, shall be allowed
20 to be buried on the project site at any time.
21 D. No burning of any kind of waste material shall be permitted on this project site at any time.
22 E. Paint and Stain: Paints, stains, and their containers shall be disposed of as follows:
23 1. Whenever possible containers should be thoroughly cleaned immediately after emptying and sorted with
24 as appropriate (metal or plastic) for recycling
25 2. Empty containers, regardless of type or base material, may be disposed of with lids off with general
26 garbage.
27 3. Latex paint may be placed with general garbage if properly solidified as follows:
28 a. Small amounts (an inch or less in can): Remove lids and allow paint to dry out in the can and
29 harden. Protect cans from rain and freezing.
30 b. Large amounts (more than one inch): Mix paint with equal amounts of cat litter, stir and allow to
31 completely dry. Alternate method: mix with commercial paint hardener.
32 4. Oil-based or combustible paints and stains, regardless of liquid or solid, shall be transported to an
33 approved facility that takes such items such as Dane County Clean Sweep Sites.
34 F. Treated Wood Materials: Treated wood materials including but not limited to wood that has been painted,
35 stained, or chemically treated shall not be recycled or incinerated.

20 3.8. PROTECT WORK - INTERIOR 5

PART 1 – GENERAL

1.1. SUMMARY

- 25 A. The purpose of this specification is to provide clear responsibilities, guide lines, and requirements related to
26 providing protection to already installed construction.
27 B. Already installed construction shall include but not be limited to the following:
28 1. Any existing site feature such as pavement, curbs, drainage features, utilities, landscaping features (trees,
29 shrubbery, plantings, flagpoles, etc) and other such exterior items not associated with the building
30 whether on or adjacent to the project site.
31 2. Any existing structure on or adjacent to the project site.
32 3. Any existing interior work that may be adjacent to the new work including all paths of ingress/egress to
33 areas associated with accessing the Work.
34 4. Any existing feature of any kind within the public right-of-way that may be on the project site property,
35 adjacent to the project site or across the street from the project site.
36 C. All contractors shall be familiar with the specifications of their Division of Work for specific requirements on
37 protection of the Work.
38 D. The requirements noted within this specification do not relieve any contractor of the responsibility for
39 compliance with any code, statute, ordinance, or other such regulatory requirement having jurisdictional
40 authority over these contract documents.

1.2. QUALITY ASSURANCE

- 43 A. It shall be the responsibility of every contractor and worker assigned to the project to be diligent in protecting all
44 existing work, and newly installed construction.
45 B. It shall be the General Contractors' (GC) responsibility under the contract to provide all reasonable protection
46 methods, materials, or precautionary measures required to protect new or existing construction as described in
47 within this specification to the project as a whole.
48 1. The GC shall be responsible to ensure any damaged new or existing construction is repaired or replaced
49 at no additional cost to the Contract.
50 2. The GC at his/her discretion may direct other contractors to provide and maintain protection of
51 completed work associated with their Division of Work. I.E.: The carpet installer may be required by the
52 GC to provide carpet protection along traveled paths, ingress/egress, etc after installation.
53 C. It shall be the responsibility of the GC to ensure that all materials being used to protect installed construction are
54 compatible with, and/or adjacent to, the materials being protected. This shall include but not be limited to the
55 material used as covering, tapes used to fasten protective materials, etc.

1
2 **1.3. RELATED SPECIFICATIONS**

- 3 A. Parts of this specification will reference articles within “The City of Madison Standard Specifications for Public
4 Works Construction”.
- 5 1. Use the following link to access the Standard Specifications web page:
6 <http://www.cityofmadison.com/business/pw/specs.cfm>
- 7 a. Click on the “Part” chapter identified in the specification text. For example if the specification
8 says “Refer to City of Madison Standard Specification 210.2” click the link for Part II, the Part II
9 PDF will open.
- 10 b. Scroll through the index of Part II for specification 210.2 and click the text link which will take you
11 to the referenced text.
- 12 c. City Standard Detail Drawings (SDD) may be located from the index in Part VIII.
- 13 B. Section 01 60 00 Product Requirements
- 14 C. Section 01 74 13 Progress Cleaning
- 15

16 **PART 2 - PRODUCTS**

17

18 **2.1. FENCING MATERIALS AND BARRICADES**

- 19 A. Except where noted in other areas of the construction documents, the responsible contractor shall provide a six
20 foot galvanized chain link fence including full height mesh screen at the project lines as shown on the Civil
21 Drawings. For temporary barricade situations, the responsible contractor may provide one of the following that
22 sufficiently provide a sturdy physical barrier and/or visual barrier as necessary for the intended application.
- 23 1. Standard orange construction barrels each with a standard rubber base ring and reflective tape
24 a. Provide flashing amber lights as needed to increase night time visibility
- 25 2. Steel “T” style fence posts
- 26 3. 4’0” high standard orange construction fence
- 27 4. Traffic barricades
- 28 5. Jersey barriers
- 29 6. Other types of fencing or barricades typically used in the construction industry
- 30 B. The contractor responsible for providing the fencing materials and barricades shall also be responsible for
31 maintaining them. This shall include but not limited to fixing damaged fencing, standing up barrels that have
32 been knocked over, realigning barrels, and ensuring flashing lights are fully operational at all times.
- 33 C. The following fencing and barricade designations, and their use descriptions shall be used throughout this
34 specification to provide uniformity in describing protection requirements.
- 35 1. Type A, Jersey Barriers, to be used as permanent blocking devices to deny access to alternate project site
36 entrances or exits.
- 37 2. Type B, Traffic Barricades, to be used as temporary blocking devices to deny access to alternate project
38 site entrances or exits.
- 39 3. Type C, Construction Barrels without construction fencing shall be used for lane closures, temporary
40 blocking devices to deny access and the protection of single locations (I.E. identify the location of an
41 access structure) that do not require fencing.
- 42 4. Type D, Construction Barrels with construction fencing where it becomes necessary to surround an object
43 with a complete visual barricade and it is impractical or unacceptable to install fence posts. The surround
44 shall be constructed in such a manner as to provide a buffer zone around and access to the item being
45 protected.
- 46 5. Type E, Steel “T” Fence Posts shall be used at the project lines, as indicated on the Civil Drawings, with six
47 foot galvanized chain link fencing to surround an object with a complete visual barricade and it is
48 practical to install fence posts. The surround shall be constructed in such a manner as to provide a buffer
49 zone around and access to the item being protected. All posts shall be driven installed. Surface mounted
50 posts to only be used for temporary barricades.
- 51 6. Type X, Other fencing or barricade types that may be designated and detailed within the construction
52 documents shall use additional alpha numeric designations.
- 53

54 **2.2. EROSION CONTROL PROTECTION**

- 55 A. Refer to City of Madison Standard Specification 210.2 for authorized materials associated with erosion control
56 materials.
- 57

1 **2.3. INTERIOR FINISH PROTECTION MATERIALS**

- 2 A. Except where noted in other areas of the construction documents or this specification the responsible
3 contractor:
4 1. Shall not provide the cheapest or least effective method as an effort to meet any protection requirement.
5 2. Shall provide materials of sufficient quality, and durability to provide adequate protection based on the
6 seasonal conditions and the anticipated duration at the time the protection will be needed.
7 3. Shall provide sufficient quantity of protection material to protect the construction as needed.
8 B. Prior to installing protective measures the responsible contractor shall propose to the GC, Project Architect (PA)
9 and City Project Manager (CPM) the proposed plan for protection, materials to be used and samples as
10 necessary.
11 1. The PA and CPM reserve the right to disapprove any proposed method and/or material and/or make
12 alternate proposals.
13

14 **PART 3 - EXECUTION**

15
16 **3.1. GENERAL EXECUTION REQUIREMENTS**

- 17 A. The GC shall be responsible for ensuring all of the following procedures and requirements are implemented as
18 needed for the duration of the Work performed under this contract.
19 B. The GC shall also be responsible for the following:
20 1. Reporting any incident of damage to existing property, right-of-way, or utility to the CPM immediately
21 upon rendering the incident safe, and notifying emergency response teams, and emergency utility crews
22 as needed.
23 2. Conduct a site walk through prior to leaving at the end of each day to assess:
24 a. Protection measures are properly in place, provide correction actions as necessary.
25 b. Note damage to existing completed work and schedule repair/replacement as needed.
26 3. Ensure all contractors and workers are being diligent in protecting existing work, and newly installed
27 construction.
28

29 **3.2. PROTECT ADJACENT PROPERTIES**

- 30 A. Whenever possible through the design process the City of Madison shall have previously provided notice to
31 adjacent property owners that work will be occurring on or near their property. The City of Madison shall also
32 have obtained any permanent or temporary easements that may be necessary to complete any Work on
33 adjacent properties.
34 B. It shall be the responsibility of the GC to do the following for all Work under this contract being performed on or
35 adjacent to the property line:
36 1. Contact the adjacent property owner and provide him/her with information on the work to be done,
37 equipment to be used, and estimated duration of the work. Information to be updated and
38 communicated to property owner(s) as construction progresses and site conditions change.
39 a. If any adjacent property is a rented or leased space the GC shall also make contact and provide
40 the same information to the tenants.
41 b. Determine from the owner and/or tenants if there are any concerns for children, pets, special
42 plantings, or other concerns.
43 2. Discuss the following with all contractors performing work on or near the property line.
44 a. Work to be completed and timeline.
45 b. Concerns of adjacent property owners/tenants from item 1 above.
46 c. Which protective measures will be necessary to protect adjacent properties and address the
47 concerns of adjacent property owners/tenants.
48 3. Ensure all protective measures are placed and maintained during the execution of Work on or adjacent to
49 the property line. Interact with the adjacent property owners/tenants as needed.
50 C. Any contractor doing work on or adjacent to the property line shall install and maintain any protective measure
51 identified in the contract documents, this specification, or as directed by the GC.
52 D. The GC shall be responsible for restoring any damage to structure and property located on or adjacent to the
53 property line.
54 1. Restoration shall include but not be limited to repair or replacement using like materials and finishes to
55 its original condition or better.
56 2. Restoration of landscaping materials shall include watering of any seed, sod, or other planting of any kind
57 for a reasonable period of time to encourage germination and root development.
58 E. The GC shall keep the CPM informed directly to any issues pertaining to adjacent property owners and tenants.

3.3. PROTECT LANDSCAPING FEATURES

- A. Except where specifically stated in other areas of the construction documents the following minimal protection requirements shall apply under this section.
 - 1. Whenever possible do not install new landscape features until exterior building construction has been completed, equipment such as scaffolding and lifts are no longer needed and have been removed, and heavy equipment operation is no longer required.
 - 2. Whenever possible remove and temporarily store all existing landscape features such as benches, waste receptacles, signage, and other such features that will be within the area of Work that can be removed.
 - 3. Landscape features that cannot be removed such as flag poles, light poles, light bollards, etc. shall be protected with Type D fencing for areas on pavement or Type E fencing for areas on soil.
 - 4. Planting beds shall be protected using Type E fencing around the exposed perimeter of the planting bed as needed.
 - 5. The City of Madison Standard Specification 107.13 shall apply to all tree protection in and around the project site at all times.

3.4. PROTECT UTILITIES

- A. The contractor shall be responsible for notifying all utilities to determine emergency response procedures and protection requirements prior to installing any construction protection.
 - 1. This includes requesting utility marking through Diggers Hotline.
 - a. Call 811 or 1-800-242-8511 to request a public utility locate
 - b. For emergency locate call (262) 432-7910 or (877) 500-9592
 - 2. Contact the Owner and CPM for any available private utility information on the property that may be available prior to calling a private utility locating company.
- B. Except where specifically stated in other areas of the construction documents the following minimal protection requirements shall apply under this section.
 - 1. Hydrants, lamp posts, electrical transformers, and other utility pedestals shall be protected with Type D fencing for areas on pavement or Type E fencing for areas on soil. Fence posts shall be located so as to not be directly over the utility main.
 - 2. Storm sewer structures in pavement shall have proper inlet protection according to City of Madison Standard Specification 210.1(g) and Type C Construction Barrels when necessary.
 - 3. Storm sewer structures in turf and other landscaped areas shall have proper inlet protection according to City of Madison Standard Specification 210.1(g) and Type E fencing for areas on soil.
 - 4. Stormwater management features such as greenways, retention/detention ponds, bio-filtration ponds and other such features shall be properly protected according to the appropriate erosion control measure specified on the Erosion Control Plan. See multiple sections of City of Madison Standard Specification 210.1
 - a. For the protection of hard to see items such as structures, castings, inlets, etc. in grassy areas provide Type E fencing for areas on soil.
 - c. For the protection of storm water management features having special soils and plants such as bio-filtration ponds provide Type E fencing for areas on soil.
 - 5. Other structures and covers including but not limited to cleanouts, wiring hand holes, valve boxes, access structures, grease trap structures, etc shall be protected as follows:
 - a. Provide Type E fencing for areas on soil.
 - b. When paving operations are complete provide a construction barrel or cone near structures as necessary depending on required heavy construction traffic.

3.5. PROTECT PUBLIC RIGHT OF WAY

- A. Except where specifically stated in other areas of the construction documents the following minimal protection requirements shall apply under this section.
 - 1. All public right-of-way (area from behind the sidewalk to the centerline of the street) shall remain open and accessible except during periods of active work. At such times the public right of way shall be properly closed and signed as referenced in City of Madison Standard Specification 107.9.
 - 2. Bus stops and bus stop structures shall remain accessible at all times.
 - 3. Traffic signage and traffic signals, traffic control boxes shall be protected with Type D fencing for areas on pavement or Type E fencing for areas on soil.
 - a. Protection at traffic signage/signals shall not obstruct the viewing of the sign/signal for its intended purpose at any time.

- 1 B. When additional protection for traffic control is required, the use of barricades, guardrails, lane closures and
2 other such procedures will be detailed within the construction documents.
3 C. When additional protection for overhead sidewalk cover is required the contract documents shall indicate the
4 specific location and structural requirements of the protective structure.
5

6 **3.6. PROTECT STORED MATERIALS**

- 7 A. All contractors shall refer to Specification 01 60 00 Product Requirements for all storage and protection
8 requirements of building materials and products delivered to the site.
9

10 **3.7. PROTECT WORK - EXTERIOR**

- 11 A. Provide all temporary services that may be required to protect the installed material from heat, cold, humidity,
12 etc, while materials such as concrete, mortar, sealants, paints, etc, are drying and/or curing.
13 B. Open trenches, pits, and other such excavations shall be properly covered, lined, or shored as needed during
14 periods of inclement weather to prevent the caving of soils onto existing work in progress. Refer to the
15 appropriate specifications and/or regulatory requirements governing this type of work as necessary.
16 C. Provide adequate protection at all openings with heavy duty tarps, plastic sheathing, or wood framing and
17 sheathing as needed to protect interior work in progress from inclement weather as needed.
18 D. Protect exterior finishes of all kinds with heavy duty tarps or plastic sheathing as needed while landscaping is
19 being installed through full germination of seeded areas or installation of filter fabric and mulches to keep dust,
20 dirt, and mud off of finished exterior surfaces.
21 E. Designate specific curb mounting points and provide wood blocking where small vehicles, skid loaders and other
22 such equipment may need access to areas being landscaped.
23 F. Provide plywood turning pads for skid loaders to turn on to prevent tire marking on new pavement.
24 G. Do not permit the parking of vehicles with any kind of fluid leaks to park on new pavement.
25 H. The contractor shall be responsible for cleaning, repairing, or replacing any completed work or work in progress
26 under this specification as deemed necessary by the CPM without additional cost to the contract.
27

28 **3.8. PROTECT WORK - INTERIOR**

- 29 A. The GC shall do all of the following:
30 1. Provide all temporary services that may be required to protect the installed material from heat, cold,
31 humidity, etc, while materials such as concrete, mortar, sealants, paints, etc, are drying and/or curing.
32 2. Provide adequate visual and/or physical protection as needed to protect newly completed interior work
33 such as paint, flooring material, sealants, grouts, etc that may be drying and/or curing.
34 3. Provide adequate space and materials for cleaning boots, tool boxes, supplies, and other items coming
35 into the project site once finish work has begun.
36 4. Clean dirtied areas and repair/replace damaged areas immediately.
37 B. The contractors responsible for interior work shall be responsible for protecting their work and finishes from dirt,
38 mud, snow, spills, splatters, and physical damage after installation as follows:
39 1. Protect vinyl composite, rubber composite, painted/stained concrete, and tiled flooring as follows:
40 a. Define foot traffic areas and protect with Ramboard Temporary Floor Protection products as a
41 minimum basis of design or other protection product(s) compatible with installed flooring product
42 if Ramboard is not compatible. Products to be used shall be new.
43 i. Tape all edges, seams, etc with a good quality tape that does not leave sticky residue. Do
44 not allow any debris or other material between the installed flooring and the protection
45 material.
46 ii. Repair tears immediately, replace worn areas with like material as necessary.
47 2. Protect carpeted areas as follows:
48 a. Define foot traffic areas and protect with a minimum of 6mil, clear, polyethylene sheeting 3 feet
49 wide. Products to be used shall be new.
50 i. Tape all edges, seams, etc with a good quality tape that does not leave sticky residue. Do
51 not allow any debris or other material between the installed flooring and the protection
52 material.
53 ii. Repair tears immediately, replace worn areas with like materials as necessary.
54 3. Protect all finished walls in high traffic areas with Ramboard Temporary Wall protection products or
55 approved equal.
56 i. Tape all edges, seams, etc with a good quality tape that does not leave sticky residue. Do
57 not allow any debris or other material between the installed flooring and the protection
58 material.

15 3.4. CONTRACT CLOSEOUT REQUIREMENTS 4
16 3.5. CONTRACT CLOSEOUT PROCEDURE 4
17

PART 1 – GENERAL

1.1. SUMMARY

- 21 A. The purpose of this specification is to clearly define and quantify the requirements associated with closing a City
22 of Madison Public Works Contract for facility related work.
23 B. All contracts have two distinct but related paths. Each path needs to be properly closed independently in order
24 to close the contract as a whole.
25 1. Construction closeout is related to closing out all of the Work associated with the construction
26 documents.
27 a. It shall be the responsibility of all contractors to be fully aware of the required Work and closeout
28 requirements involved in their individual trades.
29 2. Contract closeout is related to closing out all of the administrative aspects of the contract in general.
30 a. It shall be the responsibility of all contractors to be fully aware of the administrative requirements
31 required by the contract and to provide the supporting documentation required.
32 3. Construction Closeout must be completed before Contract Closeout can begin.
33 C. This specification will provide general knowledge associated with the following areas:
34 1. Construction Closeout Requirements
35 2. Construction Closeout Procedure
36 3. Contract Closeout Requirements
37 4. Contract Closeout Procedure
38 5. Final Payment and Certificate of Completion
39

1.2. RELATED SPECIFICATIONS

- 41 A. Contractors shall review all references to other specifications including specifications relating to the execution of
42 the Work associated with their Division or Trade.
43 B. Section 01 29 76 Progress Payment Procedures
44 C. Section 01 31 23 Project Management Web Site
45 D. Section 01 32 26 Construction Progress Reporting
46 E. Section 01 45 16 Field Quality Control Procedures
47 F. Section 01 74 13 Progress Cleaning
48 G. Section 01 45 16 Construction Waste Management and Disposal
49 H. Section 01 76 00 Protecting Installed Construction
50 I. Section 01 78 13 Completion and Correction List
51 J. Section 01 78 23 Operation and Maintenance Data
52 K. Section 01 78 36 Warranties
53 L. Section 01 78 39 As-Built Drawings
54 M. Section 01 78 43 Spare Parts and Extra Materials
55 N. Section 01 79 00 Demonstration and Training
56 O. Section 01 91 00 Commissioning
57 P. Other requirements as noted in the contract documents signed by the General Contractor
58

1 **1.3. DEFINITIONS**

- 2 A. **Substantial Compliance:** A letter provided to the City of Madison Building Inspection and signed by the Project
3 Architect indicating that all Work has been completed to a level that would allow Owner Occupancy and that all
4 construction is in compliance with the construction documents. A copy of this letter is also provided to the
5 State of Wisconsin Department of Health and Safety as necessary to clear plan review requirements. This letter
6 does not represent construction closeout.
- 7 B. **Certificate of Occupancy:** The Regulatory letter from the City of Madison Building Inspection Department
8 indicating that all regulatory requirements and inspections have been completed and the building may now be
9 occupied for its intended use. This letter does not represent construction closeout.
- 10 C. **Certificate of Substantial Completion:** A letter provided by the Department of Public Works, signed by the City
11 Engineer indicating that Construction activities are substantially complete. This letter does represent
12 construction closeout and the date of this letter begins the date of the Warranty Period.
- 13 D. **Construction Closeout:** The point in the contract where all contractual requirements associated the execution of
14 the Work as described in the plans, specifications, and other documents have been successfully met and the
15 items described in 1.3.A, .B, and .C above have been completed.
- 16 E. **Final Progress Payment:** The progress payment associated with achieving Construction closeout as described in
17 1.3.D above. At this point the contractor may request all monies associated with the contract be paid with the
18 exception of held retainage.
- 19 F. **Contract Closeout:** The point in the contract where all contractual requirements associated with the City of
20 Madison, Board of Public Works contract has been successfully met.
- 21 G. **Final Payment:** The final contract payment submittal that may be approved by the City of Madison after all
22 contractual requirements of the Public Works Contract have been met and any remaining monies (retainage)
23 due to the contractor may be released for the Final Payment.

24
25 **1.4. QUALITY ASSURANCE – CONSTRUCTION CLOSEOUT**

- 26 A. All contractors shall be responsible for properly executing the construction closeout requirements associated
27 with their Work as described in the specifications governing their Work.
- 28 B. The GC shall be responsible for all of the following:
- 29 1. Ensuring that all contractors have met the construction closeout requirements associated with their
30 Work.
 - 31 2. Coordinate the collection of all construction closeout deliverables from all contractors, provide the
32 deliverables to the Project Architect and City Project Manager for review as necessary, and ensure all
33 contractors correct deficiencies of deliverables and resubmit as needed for final acceptance.
 - 34 3. Ensure all closeout requirements identified in the Construction Closeout Checklist below have been
35 completed as intended by the construction documents.

36
37 **1.5. QUALITY ASSURANCE – CONTRACT CLOSEOUT**

- 38 A. The City of Madison, Department of Civil Rights (DCR) monitors contract compliance for construction and
39 procurement contracts to ensure that local, state and federal regulations are followed by contractors working on
40 City of Madison Public Works (PW) projects. DCR will monitor all PW projects from contract award through the
41 final payment at the close of the project. Contractors will be required to submit reporting paperwork
42 throughout the PW project process.
- 43 1. Contractors are encouraged to visit the web site identified below for additional information, checklists,
44 forms, and other information provided by DCR as it relates to Contract Compliance.
45 <http://www.cityofmadison.com/Business/PW/contractCompliance.cfm>
 - 46 2. Questions regarding the process should be directed to parties and offices as identified on the various
47 forms, documents, and instructions or contact:
48 City of Madison, Department of Civil Rights
49 210 Martin Luther King Jr. Blvd., Room 523
50 Madison, WI 53703
51 (608) 266-4910
- 52 B. All Sub-Contractors have submitted the applicable required documents described in item 1.5.D below to the
53 General Contractor (GC) for Contract Closeout.
- 54 C. The GC has submitted the required applicable documents described in item 1.5.D below for all contractors to the
55 appropriate City of Madison Agency per instructions associated with each submittal.
- 56 D. The documents required for submittal to the City of Madison for Contract Closeout may include any/all of the
57 items listed below depending on contract type. It is the sole responsibility of all contractors to know and submit
58 the required and complete documentation in a timely fashion.

- 1 1. Weekly Payroll Reports
- 2 2. Employee Utilization Reports
- 3 3. Agent or Subcontractor Affidavit of Compliance with Prevailing Wage Rate Determination
- 4 4. Prime Contractor Affidavit of Compliance with Prevailing Wage Rate Determination
- 5 5. Documentation required for Small Business Enterprise (SBE) goals
- 6 6. Other documents as maybe required or requested through the Finalization Review Process

PART 2 – PRODUCTS – THIS SECTION NOT USED

PART 3 - EXECUTION

3.1. CONSTRUCTION CLOSEOUT CHECKLIST

- A. All contractors shall be responsible for reviewing the drawings and specifications within their Divisions of Work to provide a complete and comprehensive list of all Construction Closeout Requirements to the GC.
 1. The checklist shall include all items identified within the construction documents that require any of the following (and examples) prior to moving into Contract Closeout Procedures:
 - a. Documents indicating a specified level of performance has been achieved, such as:
 - i. Test reports of all types
 - ii. Startup reports
 - b. Required documentation, such as:
 - i. As-builts and record drawings
 - ii. Operation and maintenance data
 - c. Physical items to be turned over to the owner, such as:
 - i. Attic stock
 - ii. Keys
 - d. Required maintenance completed, such as:
 - i. Ducts cleaned
 - ii. Filters replaced
 - e. Commissioning and LEED related items and submittals
 - f. Owner and Maintenance Training
- B. Each list shall indicate the title of the closeout requirement, the associated specification of the requirement, the required result or deliverable, the responsible contractor(s), and a column to verify the item has been turned in and completed.
- C. The GC shall be responsible for all of the following:
 1. Consolidating all the closeout lists into one master Construction Closeout Checklist.
 - a. The checklist shall be in a tabular data format similar to the sample below
 2. Upload the completed checklist to the Contract Closeout-Miscellaneous Documents Library on the Project Management Web Site for review.
 3. Resubmit the checklist as needed after initial reviews have been completed.
- D. The GC shall work with all contractors to amend the Construction Closeout Checklist throughout the execution of the project based on changes and modifications as necessary.

<u>Title</u>	<u>Specification</u>	<u>Description</u>	<u>Responsibility</u>	<u>Completed</u>
Quality Management Observation Reports	01 45 16	All QMO reports have been properly responded to, reviewed and closed by the CPM.	All, GC	
As-Built Drawings	01 78 39	As-Built drawings have been reviewed and accepted per the specification	All, GC	
Testing and Balancing of HVAC	23 09 23	Provide final TnB reports indicating design performance has been achieved	HVAC	

3.2. CONSTRUCTION CLOSEOUT REQUIREMENTS

- A. The timely submittal or completion of closeout requirements shall go hand in hand with the Progress Payment Milestone Schedule that can be found in Specification 01 29 76 Progress Payments. No payments shall be made until all requirements for that payment have been met.
 1. The GC and all major Subcontractors, PA, and CPM, shall review all requirements for Construction/Contract Closeout during two (2) special meetings.

- 1 a. The first meeting shall be held at the 50% Contract Total Payment milestone. This meeting shall
2 discuss the requirements associated with various construction/contract closeout documentation
3 and events when they are due with respect to progress payments.
4 b. The second meeting shall be held at the 70% Contract Total Payment milestone. This meeting
5 shall review the contractors progress regarding the closeout checklist, begin making plans for
6 upcoming deadlines such as scheduling training, where to put attic stock, and when they are due
7 with respect to progress payments.
8 2. The GC, PA, and CPM, shall utilize the Construction Closeout checklist to ensure that all construction
9 closeout requirements have been met.

10
11 **3.3. CONSTRUCTION CLOSEOUT PROCEDURE**

- 12 A. Upon successful completion and final acceptance of all Construction Closeout Requirements the GC may submit
13 to the CPM and PA the request for Final Progress Payment (100% contract total, less retainage).
14 B. The PA will confirm with the design consultants, CPM, and other City of Madison staff that all requirements of
15 the Work have been completed and will do the following:
16 1. Approve the final progress payment application
17 2. Provide the required signed payment documents to the CPM
18 3. Provide the required Letter of Substantial Compliance to the following as required:
19 a. State Safety and Building Division
20 b. Local Building Inspection office
21 c. GC
22 d. CPM
23 C. The CPM shall draft the City Letter of Substantial Completion for signature by the City Engineer. This letter shall
24 state any of the following that may still be tied to the contract and/or warranty:
25 1. Indicate that the date of the letter shall also be the beginning of the Warranty period.
26 2. Indicate any allowed due outs, reasons for them, and anticipated dates of finalization.
27 a. QMO issues such as off season testing of equipment
28 b. Off season training of equipment
29 D. The GC and all subcontractors shall finalize all warranty letters associated with their Work using the date noted
30 on the City Letter of Substantial Completion, and provide the CPM with all warranties as described in
31 Specification 01 78 36 Warranties. Upon receipt and final approval of the Warranties the CPM may initiate final
32 processing of the Final Progress Payment (100% contract total, less retainage).
33

34 **3.4. CONTRACT CLOSEOUT REQUIREMENTS**

- 35 A. The GC and all sub-contractors shall follow all requirements associated with documenting contract compliance
36 and provide documentation as required or requested by DCR or PW staff. All contractors are encouraged to stay
37 current with submissions of the following documentation:
38 1. Weekly Payroll Reports no later than the Progress Payment equal to 50% of the contract total.
39 2. Employee Utilization Reports
40 3. Agent or Subcontractor Affidavit of Compliance with Prevailing Wage Rate Determination
41 4. Prime Contractor Affidavit of Compliance with Prevailing Wage Rate Determination
42 5. Documentation required for Small Business Enterprise (SBE) goals
43 6. Other documents as maybe required or requested through the Finalization Review Process
44 B. Near the Progress Payment equal to 80% of the contract total the GC shall request in writing a Finalization
45 Review. At that time DCR or PW staff shall prepare a report of all contract documentation submitted to date. A
46 list of missing items or outstanding issues will be emailed to the GC. No additional follow-up will be generated
47 by DCR or PW Staff.
48

49 **3.5. CONTRACT CLOSEOUT PROCEDURE**

- 50 A. The Contract Closeout Procedure will not begin until the Construction Closeout Procedure has been completed.
51 B. When the GC feels he/she has successfully met all of the Contract Closeout Requirements associated with
52 Section 3.3 above the GC may submit to the request for Final Payment to the CPM.
53 C. The CPM shall sign and submit the Final Payment request for processing.
54 D. DCR and PW staff shall do a complete review of all documentation associated with item 3.3.A above.
55 E. The GC shall be notified directly by DCR or PW Staff of any documentation that may still be missing, have
56 incomplete information, or other outstanding issues. It shall be the responsibility of the GC to continue follow-
57 up with DCR and PW staff until all documentation has been successfully submitted and accepted.

- 1 F. When all required documentation associated with Contract Closeout has been successfully submitted and
2 accepted by DCR and PW Staff the City of Madison shall process the Final Payment of any remaining monies
3 including retainage.

PART 1 – GENERAL 1
1.1. SUMMARY 1
1.2. RELATED SPECIFICATIONS 1
PART 2 – PRODUCTS – THIS SECTION NOT USED 1
PART 3 – EXECUTION – THIS SECTION NOT USED 1

PART 1 – GENERAL

1.1. SUMMARY

- A. The City of Madison has developed a multi-faceted Quality Management Program that begins with contract signing and runs through contract closeout to ensure the best quality materials, workmanship, and product are delivered for the contracted Work.
 - 1. The Progress Management Web Site is a Construction Management tool that provides contractors, consultants, and staff a single on-line location for the daily operations and progression of the Work.
 - 2. The Quality Management Observation (QMO) is an ongoing observation of the construction process as it progresses. The City of Madison does not use a "Punch List" or "Corrections List" as it is typically known throughout the construction industry. The QMO process acts as an "in progress punch list". Work identified as not in compliance with the contract documents by the Owner, Owner Representatives, Owner Consultants, etc. shall be resolved immediately at the Contractor's expense. Unresolved issues will be subject to withholding of progress payment(s) until completed.
 - 3. Very stringent expectations are tied to Construction Closeout and Contract Closeout procedures. Specific milestones throughout the project need to be met and the milestones are tied to the Progress Payment Schedule.
- B. All contractors shall be required to review the specifications identified in Section 1.2 below, and other related specifications identified therein to become familiar with the terminology and expectations of this City of Madison Public Works contract.

PART 1 – GENERAL

1.1. SUMMARY

- 19
20 A. The purpose of this specification is to provide clear responsibilities and guide lines related to providing well
21 documented and complete Operation and Maintenance (O&M) Data related to general facility use, equipment,
22 systems, finishes, and materials to City of Madison Staff (Owner, Owner Representatives, Maintenance, and
23 Custodial Personnel) as needed.
24 B. Operation and Maintenance Data shall apply to both of the following categories except where specific
25 requirements are noted under their separate titles as follows:
26 1. Operation and Maintenance Data: Generally shall mean the owner manual that provides information on
27 start-up, shut-down, operation, troubleshooting, maintenance, parts, and other such documentation as it
28 pertains to all equipment and systems installed under the Work.
29 2. Use and Care instructions: Where applicable use and care instructions shall also be considered O&M for
30 such things as flooring, tile, partitions, and other such finishes and trim related items, installed under the
31 Work.
32

39 F. Section 01 78 36 Warranties
40 G. Section 01 79 00 Demonstration and Training
41 H. Section 01 91 00 Commissioning
42 I. Other Divisions and Specifications that may address more specifically the requirements for O&M Data.
43

1.3. QUALITY ASSURANCE

- 44
45 A. All O&M Data shall meet the requirements identified in Section 1.4 below.
46 B. All contractors shall provide O&M Data for each piece of equipment, system, or finish installed during the
47 installation of the Work. O&M Data shall be provided to the General Contractor (GC) for verification and
48 submittal.
49 C. The GC shall be responsible for receiving all required O&M Data files from all contractors for verifying that all
50 files submitted meet the requirements in Section 1.4 below.
51

1.4. O&M DATA REQUIREMENTS

- 52
53 A. O&M Data shall be provided in digital PDF format as follows:
54 1. PDF files shall be complete first generation consumer useable editions of PDF documents as provided by
55 any of the following:
56 a. Product manufacturer
57 b. Supplier of product
58 c. Product manufacturer internet site

- 1 2. Acceptable PDF files shall have the following functionality:
- 2 a. Word searchable
- 3 b. Key areas are bookmarked
- 4 c. Table of Contents and/or Index linked to content is preferred whenever possible.
- 5 3. Scanned printed material, with word searchable capabilities, saved as a PDF, is not acceptable and will be
- 6 rejected without further review.
- 7 B. O&M Data shall include but not be limited to the following manufacturers' published information as appropriate
- 8 for the equipment, system, material, or finish:
- 9 1. Installation instructions
- 10 2. Parts lists, assembly diagrams, explosion diagrams
- 11 3. Wiring diagrams
- 12 4. Start-up, shut-down, troubleshooting and other related operation procedures
- 13 5. Lubrication, testing, parts replacement, and other such maintenance procedures
- 14 6. General use, care, and cleaning instructions
- 15 7. Special precautions and safety requirements
- 16 8. A list of certified equipment vendors, service companies, parts suppliers including company name,
- 17 address, and phone number
- 18 9. A list of the recommended spare parts to have on hand at all times
- 19 10. A list by type of all recommended lubes, oils, packing material, and other maintenance supplies
- 20 11. Copies of final test reports, balance reports, and other related documentation
- 21 12. Warranty information for equipment and systems
- 22

23 1.5. O&M DATA SUBMITTALS

- 24 A. O&M Data shall be prepared as identified in this specification and shall be submitted for review as per the
- 25 schedule identified in Specification Section 01 29 76, Progress Payment Procedures.
- 26 B. O&M Data Draft submittals will be reviewed for content, procedure, and compliance only. A general critique
- 27 with recommendations for improvement will be made but re-submittals will not be required.
- 28 C. O&M Data Final submittals will be reviewed for content, procedure, and compliance. Re-submittals will be
- 29 required until such time as each submittal is accepted.
- 30

31 *NOTE: Acceptance of O&M Data Final submittals is required to be complete prior to scheduling and conducting owner*
32 *related training and construction closeout.*

34 **PART 2 – PRODUCTS – THIS SECTION NOT USED**

36 **PART 3 - EXECUTION**

38 3.1. O&M DATA PREPARATION - GENERAL

- 39 A. All contractors shall prepare O&M Data for draft and final submission as follows:
- 40 1. Obtain digital PDF files for each piece of equipment, system, material or finish as described in Sections
- 41 1.4.A.1 and 1.4.A.2 above.
- 42 2. Verify that all information as described in Section 1.4.B above is included with the PDF file. Obtain
- 43 missing information as necessary for a complete submittal.
- 44 B. Rename each individual PDF file as follows.
- 45 1. Do not use special characters such as #, %, &, /, etc. These characters are reserved by the Project
- 46 Management Web Site software the City of Madison uses; however the under-score (or under-bar) ' _ ' is
- 47 an allowed character.
- 48 2. Use the following format and examples for renaming your file:
- 49 a. Format: ***Equipment name_What_JUDGE DOYLE GARAGE_Contract number_Year***
- 50 i. *Equipment Name* represents the name of any equipment, system, material or finish as
- 51 designated in the Contract Documents.
- 52 ii. *What* represents what the file is about
- 53 iii. *JUDGE DOYLE GARAGE* represents the title of the project or contract. A shortened version
- 54 of the title may be identified by the City Project Manager to be used by all contractors.
- 55 iv. *Contract number* is the specific identification number the Work was bid under and appears
- 56 on the plan set title sheet and in each sheet title block
- 57 v. *Year* represents the year the contract will be closed out
- 58 b. Examples of file names

- 1 i. AHU 2_Operation Manual_Fire Admin_1234_2015
 2 ii. CPT 2_Use and Care_MPD West_9876_2011
 3 C. All contractors shall submit the completed digital PDF files to the GC in sufficient time for the GC to meet the
 4 O&M Data submission deadlines as described in Specification Section 01 29 76, Progress Payment Procedures.
 5 D. O&M Data shall be submitted and reviewed as described in sections 3.2 and 3.3 below.
 6

7 **3.2. O&M DATA DRAFT SUBMITTAL**

- 8 A. All contractors shall prepare and submit the following for an O&M Data Draft review submittal:
 9 1. Prepare three (3) complete O&M Data file samples as described in section 3.1 above.
 10 2. Review all specifications within his/her Division of Work and prepare a complete O&M Data checklist
 11 listing all equipment, systems, materials, or finishes. Checklist shall be in tabular form similar to the
 12 example below and shall indicate the title (and plan identifier when applicable) of the O&M Data, the
 13 associated specification, and a column to verify the item has been turned in and completed.
 14 B. The GC shall be required to review all contractors' samples and checklists for compliance with this specification
 15 and shall return any to the originating contractor that are insufficient for re-submittal.
 16 1. When acceptable to the GC, he/she shall upload each O&M Data draft submittal file to the O&M Draft
 17 library on the Project Management Web Site.
 18 C. The Project Architect, City Project Manager, CxA, Consulting Staffs and Owner Representatives shall review the
 19 O&M Data draft submittals and checklist within fifteen 15 working days as follows:
 20 1. Provide general critique comments by Division on O&M Data samples submitted. Critique is intended to
 21 provide all contractors with information on strengths and weaknesses of their submittals.
 22 a. Re-submittal of the O&M Data samples will not be required.
 23 2. Review in detail the O&M Data Checklist for completeness. Provide comments as needed.
 24 a. Re-submittal of the O&M Checklist will be required until accepted.
 25

<u>Title</u>	<u>Specification</u>	<u>Completed</u>
Overhead Door Operator	08 36 00	
Air Handling Unit (AHU-3)	23 00 00	
Water Heater (WH-1)	22 30 00	

26
 27 **3.3. O&M DATA FINAL SUBMITTAL**

- 28 A. All contractors shall prepare and submit the following for an O&M Data Final review submittal:
 29 1. Prepare complete O&M Data files as described in Section 3.1 above according to their approved checklist
 30 as described in Section 3.2 above.
 31 2. Submit completed checklist and all final O&M Data files to the GC for final submittal review.
 32 B. The GC shall be required to spot check all contractors' submittals for completeness against their checklists and
 33 for compliance with this specification and shall return any to the originating contractor that are insufficient for
 34 re-submittal.
 35 1. When acceptable to the GC, he/she shall upload each O&M Data final submittal file to the O&M Final
 36 library on the Project Management Web Site.
 37 C. The Project Architect, City Project Manager, CxA, Consulting Staffs and Owner Representatives shall review the
 38 O&M Data final submittals and checklist within fifteen (15) working days as follows:
 39 1. Review the files submitted against the checklist and request any missing files through the GC.
 40 2. Review in detail all of the O&M Data files for completeness.
 41 a. Submittals shall be accepted or rejected as individual PDF files.
 42 b. Contractors shall re-submit entire O&M submittal if any portion is rejected or incomplete.
 43

44 **3.4. CONSTRUCTION CLOSEOUT**

- 45 A. All contractors shall review Specification 01 77 00, Closeout Procedures and Specification 01 79 00
 46 Demonstration and Training.
 47 1. Acceptance of all final O&M Data submittals is required prior to scheduling Demonstration and Training
 48 Sessions.
 49 2. Completion of all Demonstration and Training Sessions is required to receive the Substantial Compliance
 50 for Occupancy Certificate, and to begin Construction Closeout procedures.

16

PART 1 – GENERAL

1.1. SUMMARY

- 19
20 A. The purpose of this specification is to provide clear responsibilities and guide lines related to providing all
21 Warranties and Guarantees related to the Work, workmanship, materials, equipment, and other such items
22 required by the Construction Documents.
23 B. Manufacturers’ disclaimers and limitations on product warranties do not relieve any contractor of the warranty
24 on the Work that includes the product.
25 C. Manufacturers’ disclaimers and limitations on product warranties do not relieve suppliers, manufacturers and
26 any contractor required to provide special warranties under the contract documents.
27

33 E. Section 01 91 00 Commissioning
34 F. Other Divisions and Specifications that may address more specifically the requirements for Warranties related to
35 the installation of all items and equipment installed under the execution of the Work.
36

1.3. DEFINITIONS

- 37
38 A. See specification 01 77 00 for the definitions of the following terms that may also be used in this specification:
39 1. Substantial Compliance
40 2. Certificate of Occupancy
41 3. Certificate of Substantial Completion
42 4. Construction Closeout
43 5. Contract Closeout
44 B. Emergency Repair: The Owner or Owner Representative reserves the right to make emergency repairs as
45 required to keep equipment or materials in operation or to prevent damage to property and injury to persons
46 without voiding the contractors warranty or bond or relieving the contractor of his/her responsibilities during
47 the warranty period.
48 C. Installer: The company or contractor hired to install a finished product that was manufactured and supplied
49 specifically for the Work within this contract. The Installer may or may not be the same company that supplied
50 the product. See the definition for supplier.
51 D. Supplier: Any company that makes a specific finished product for the Work from information within the Contract
52 Documents. Examples of suppliers would include custom cabinets, steel stairs and railings, etc. A supplier would
53 not be a company that distributes items manufactured by others such as an electrical or plumbing supplier.
54 E. Warranty: A written guarantee from the manufacturer to the owner on the integrity of a product and its
55 installation, and the manufacturers’ responsibility to repair or replace the defective product or components
56 within a specified time from the date of ownership. Warranty may also be used interchangeably with
57 Guarantee. The following warranty types may be part of any specification within the Work associated with the
58 Construction Documents:

1. Expressed Warranty: A warranty that provides specific repair or replacement for covered components of a product over a specified length of time.
 2. Implied Warranty: A warranty that is not stated explicitly by a seller or manufacturer that the product is merchantable and fit for the intended purpose.
 3. Standard Product Warranty: Preprinted written warranties published by individual manufacturers for particular products and are specifically endorsed by the manufacturer to the Owner. Standard warranties may be for any amount of time but shall not be for anything less than one (1) year from the warranty date.
 4. Special Warranty: A written warranty required by the Contract Documents either to extend the time limit provided under a standard warranty or to provide greater rights to the Owner.
- F. Warranty Date: The effective date that begins all warranty periods required for products, installations, and work-manship associated with the execution of the Work for this contract. The Warranty Date shall be set by the CPM.
- G. Related Damages and Losses: When correcting failed or damaged Warranted Work, remove and reinstall (or replace if necessary) the construction that has been damaged as a result of the failure or the construction that must be removed and replaced to obtain access for the correction of Warranted Work.
- H. Reinstatement of Warranty: When Work covered by a warranty has failed and been corrected reinstate the warranty by a new written endorsement. The reinstated warranty shall be equal to the original warranty with an equitable adjustment for depreciation unless specifically noted otherwise in a specification.
- I. Replacement Cost: All costs that may be associated with Work being replaced under warranty including but not limited to the following:
1. Related damages and losses
 2. Labor, material and equipment
 3. Permits and inspection fees
 4. This shall be regardless of any benefit the Owner may have had from the Work through any portion of its anticipated useful service life.
- J. Replacement Work: All materials, products, required labor, and equipment necessary to replace failed or damaged warranted to an acceptable condition that complies with the requirements of the original Construction Documents.
- K. Owners Recourse: Expressed warranties made to the Owner are in addition to implied warranties and shall not limit the duties, obligations, rights, and remedies otherwise available under the law. Expressed warranty periods shall not be interpreted as limitations on the time in which the Owner can enforce such other duties, obligations, rights, and remedies.
1. Rejection of Warranties: The Owner reserves the right to reject any warranty and to limit the selection of products with warranties not in conflict with the requirements of the contract documents.
 2. Where the Contract Documents require a Special Warranty or similar commitment on the Work or product, the Owner reserves the right to refuse acceptance of the Work until the Contractor presents evidence the entities required to countersign such required commitments have done so.

1.4. GENERAL CONTRACTORS RESPONSIBILITIES

- A. The General Contractor (GC) shall be responsible to remedy, at his/her expense, any defect in the Work and any damage to City owned or controlled real or personal property when the damage is a result of:
 1. The GC's failure to conform to Contract Document requirements.
 - a. Any substitutions not properly approved and authorized may be considered defective.
 2. Any defect in workmanship, materials, equipment, or design furnished by the GC or Sub-contractors.
- B. All warranties as described in this specification and these Contract Documents shall take effect on the date established by the CPM, as noted in Section 1.3F above.
 1. All warranties shall remain in effect for one (1) year thereafter unless specifically stated otherwise in the Contract Documents or where standard manufacturer warranties are greater.
- C. The GC's warranty with respect to Work repaired or replaced, including restored or replaced Work due to damage, will run for one (1) year from the date of Owner Acceptance of said repair or replacement.
 1. This shall be regardless of any benefit the Owner may have had from the Work through any portion of its anticipated useful service life.
- D. Warranty Response
 1. See Section 3.5 of this specification.

1 **PART 2 – PRODUCTS - THIS SECTION NOT USED**

2
3 **PART 3 - EXECUTION**

4
5 **3.1. WARRANTY CHECKLIST**

- 6 A. All contractors shall be responsible for reviewing the drawings and specifications within their Divisions of Work
7 to provide a complete and comprehensive list of all Warranty Requirements to the GC.
8 B. Each list shall indicate the title (and plan identifier when applicable) of the warranted item, the associated
9 specification of the warranted item, the terms of the warranty (years), and a column to verify the item has been
10 turned in and completed.
11 C. The GC shall be responsible for all of the following:
12 1. Consolidating all the warranty lists into one master Warranty Checklist.
13 a. The checklist shall be in a tabular data format similar to the sample below.
14 2. Upload the completed checklist to the Submittal Library on the Project Management Web Site for review.
15 See Specification 01 33 23 Submittals for more information on this procedure.
16 3. Resubmit the schedule as needed after initial reviews have been completed.
17 D. The GC shall work with all contractors to amend the Warranty Checklist throughout the execution of the project
18 based on changes and modifications as necessary.
19

<u>Title</u>	<u>Specification</u>	<u>Terms</u>	<u>Completed</u>
Overhead Door Operator	08 36 00	MFR 2yr	
Exterior Bench and Trash Receptacles	12 93 00	MFR 3 year warranty on finish	
Kitchen Sink (SK-1)	22 42 00	MFR 5 year	
Disposal (D-1)	22 42 00	MFR 7 year parts and in-home service	
Toilet (WC-1)	22 42 00	MFR 1 year limited	

20
21 **3.2. LETTERS OF WARRANTY**

- 22 A. All letters of warranty shall be in a typed letter format and provide the following information:
23 1. The letter shall be on official company stationary including company name, address, and phone number.
24 2. Indicate JUDGE DOYLE GARAGE, contract number, and contract address the warranty is for on the
25 reference line.
26 3. Provide a description of the warranty(ies) being provided.
27 a. Include Division, Trade, or Specification information as necessary.
28 b. Only combine warranties of related Divisional Work together. Create new letters for additional
29 Divisions as necessary.
30 4. Indicate the effective Warranty Date. As noted in Section 1.3.F above, the Warranty Date shall be the
31 date the Certificate of Substantial Completion was signed by the City Engineer.
32 5. Contractor Letters of Warranty shall only be signed by a principal officer of the company.
33 6. After signing the letter provide the GC with a high quality color scanned image in PDF format and the
34 original signed letter.
35 B. The GC shall be responsible for the Final Warranty submittal as identified in Section 3.4 below.
36 C. The GC shall obtain letters of warranty from all of the following:
37 1. The General Contractor shall provide warranty letters for all Work that was self performed under the
38 contract documents, identify all trades or Divisions of Work.
39 2. All Sub-contractors shall provide warranty letters for Work performed under the contract documents;
40 identify all trades or Divisions of Work.
41 3. Suppliers, as required by other specifications within the Construction Documents where the manufacture
42 of a specific product unique to the Work of this contract was required.
43 a. The terms and conditions of the Supplier Letter of Warranty shall be as defined by the
44 specifications associated with the Work but shall not be less than the industry standard of repair,
45 or replace defective materials and workmanship within one (1) year of the warranty date.
46 b. When the supplier is also the installer a single written letter may be submitted identifying both
47 the warranty for the manufacture of the product and the warranty for the installation of the
48 product.
49 4. Installers as required by other specifications within the Construction Documents where the installation of
50 a specific product unique to the Work of this contract was required.

1. The terms and conditions of the Installer Letter of Warranty shall be as defined by the specifications associated with the Work but shall not be less than the industry standard of repair, or replace defective materials and workmanship associated with the installation of the product within one (1) year of the warranty date.
5. Special Letters of Warranty shall be required from any contractor, supplier, installer or manufacturer who agrees to provide warranty services required by any Division Specification in excess of their Standard Product Warranty.

3.3. STANDARD PRODUCT WARRANTY

- A. All contractors shall be responsible for collecting and providing copies of all standard product warranties for commercially available products purchased and installed under this contract.
- B. Only one copy of the manufacturers' standard warranty needs to be submitted as representative for all quantities of the same model number used throughout the Work.
- C. Provide the manufacturers certificate, letter, or other standard documentation for each Standard Product Warranty submitted as follows:
 1. Whenever possible a PDF version of the document shall be used.
 - a. If a PDF version is used all additional information shall be completed using simple PDF editing tools such as text boxes, highlight, etc.
 - b. If a PDF version is not available and an original document is furnished the additional information shall be neatly hand written and highlighted on the document in such a fashion so that it does not obscure any part of the written warranty.
 2. Provide the following additional information on each warranty document:
 - a. Contract warranty date.
 - b. Provide the manufacturer name and model number of the product if not specified within the warranty.
 - i. Where the manufacturer name and model number is specified within the warranty it shall be highlighted for visibility.
 - c. Provide the plan identifier (LAV-1, WC-2, etc) when applicable.
- D. Each completed warranty shall be saved as a digital PDF. The file shall be named using the specification number and item description. I.E. 22 42 00 Toilet (WC-1).pdf
 - a. Where an original certificate was furnished provide a high quality colored scan of the completed document with the additional information. Save the scanned image in PDF format and use the same naming convention as indicated above.
- E. Provide all PDF files and any original documents to the GC for final consolidation to be provided to the Owner.

3.4. FINAL WARRANTY SUBMITTAL

- A. The GC shall receive all required warranties (digital PDF and any original documents) from all contractors, suppliers, installers and manufacturers.
- B. The GC shall inventory all received warranties with the Warranty Submittal List to ensure all required warranties have been received and all warranty periods are correct according to the specifications.
- C. Provide with each Operation and Maintenance Manual a complete copy of any associated warranty.
- D. Scan all warranties into a single organized electronic PDF file as follows:
 1. Organize the PDF file into an orderly sequence based on the table of contents of the Specifications.
 2. Provide a typed Table of Contents for the entire file at the front of the document.
 3. Provide bookmarks and links to each individual PDF to enable quick navigation through the PDF document.
- E. Upload the warranty submittal to the appropriate document library on the Project Management Web Site for review by the PA and CPM.
- F. Correct any deficiencies or omissions and resubmit as necessary.

3.5. WARRANTY NOTIFICATION, RESPONSE, EXECUTION AND FOLLOW-UP

- A. Warranty Notification:
 1. The City of Madison, Project Management Web Site, uses an email notification system for all warranty related issues. The GC will be required to provide, and keep current during the warranty period, a minimum of two (2) email addresses and phone numbers of current employees to receive email notifications and provide response regarding Work associated with these construction documents.
 - a. In the event a Warranty Issue is deemed by the City of Madison to be an emergency, the GC shall first receive a phone call with a follow-up email from the Project Management Web Site.

- 1 b. The Contract Closeout-Warranty Issue Library on the Project Management Web Site uses a form
2 for each warranty issue that is logged into the system.
- 3 i. The GC shall open each warranty issue form, review the issue description and any attached
4 documentation or photos.
- 5 ii. The GC shall also notify any other sub-contractor, supplier, or installer that may be
6 required to review the warranty issue.
- 7 B. Warranty Response:
- 8 1. The GC shall upon notification by the City of Madison provide warranty response as follows:
- 9 a. Critical Systems or equipment: Where damage to equipment and other building components, or
10 injury to personnel is probable provide immediate emergency shut-down information and an on-
11 site response team as soon as possible but in no case shall on-site response exceed 24 hours.
- 12 b. For non-critical responses where damage or injury is unlikely provide on-site response no later
13 than the next business day.
- 14 c. Where Technical Assistance support is part of the written warranty provide all assistance
15 necessary via phone, text, or internet systems as indicated by the warranty. If issues cannot be
16 resolved provide on-site response no later than the next business day.
- 17 d. If the request cannot be supported in sufficient time as outlined above the Owner (or Owner
18 Representative) reserves the right to contact other contractors or service companies having
19 similar capability to expedite the repair or replacement and shall invoice all associated costs to
20 the Owner back to the GC.
- 21 C. Warranty Execution:
- 22 1. The GC shall provide all repairs or replacements as necessary to restore broken or damaged Work to the
23 original level of acceptance as intended by the Contract Documents.
- 24 a. Provide all materials, equipment, products, and labor necessary to complete the repair or
25 replacement associated with the Warranty Issue.
- 26 b. Provide all cleaning services as may be required before, during, and after the repair or
27 replacement as per Specification 01 74 13 Progress Cleaning.
- 28 c. Provide any protection necessary for existing construction as per Specification 01 76 00 Protecting
29 Installed Construction
- 30 d. Provide new letters of warranty when required.
- 31 D. Warranty Follow-up:
- 32 1. Logged Warranty Issues:
- 33 a. The GC shall provide complete documented responses of all logged Warranty Issues. Responses
34 shall provide a description of work completed, by who, inclusive dates, and photos of completed
35 or repaired work.
- 36 i. Provide call back response if work is not acceptable.
- 37 b. The City Project Manager shall review the submitted response documentation and do a field
38 inspection if necessary.
- 39 i. If work is not acceptable, contact GC to review details and expectations of the repair as
40 needed.
- 41 ii. If work is acceptable close the Warranty Issue.
- 42 2. Quarterly Warranty Reviews:
- 43 a. The GC shall be responsible for scheduling quarterly on-site review with all of the following:
- 44 i. City Project Manager, and other City staff as needed
- 45 ii. Owner and Owner Tenant Representative
- 46 iii. Commissioning Agent (CxA)
- 47 iv. Plumbing, Heating, Electrical Sub-contractors
- 48 v. Other Sub-contractors that may be responsible for open Warranty issues
- 49 b. Quarterly reviews shall be scheduled at 3 months, 6 months, and 11 months after the effective
50 date of the warranty. The review meetings shall:
- 51 i. Review the status of all open Warranty Issues, determine course of action and estimated
52 date of completion.
- 53 ii. In the appropriate quarter, provide shut-down, start-up, testing, and training of off-season
54 equipment as required by the contract documents.
- 55 iii. The 11th month review shall review all open Warranty Issues, final plan for resolution, and
56 all Warranty Issues where a new letter of warranty may have been issued.
- 57
- 58

18

PART 1 – GENERAL

1.1. SUMMARY

- 22 A. This specification is intended to provide clear guidelines and identify the responsibilities of all contractors as they
23 pertain to City of Madison contract procedures regarding the accurate recording of the Work associated with the
24 execution of this contract. This shall include but not be limited to work that will be hidden, concealed, or buried.
25 B. Each contractor shall be responsible for maintaining an accurate record of all installations, locations, and
26 changes to the contract documents during the execution of this contract as it may relate to their specific division
27 or trade.
28 C. The General Contractor (GC) shall be responsible for ensuring all contractors provide as-built record information
29 to the Master As-Built Document Set as described in this specification.
30

1.2. RELATED SPECIFICATIONS

- 32 A. 00 31 21 Survey Information
33 B. 01 26 13 Request for Information
34 C. 01 31 23 Construction Bulletin
35 D. 01 32 33 Photographic Documentation
36 E. 01 26 63 Change Orders
37 F. 01 29 76 Progress Payment Procedures
38 G. 01 31 23 Project Management Web Site
39 H. 01 33 23 Submittals
40 I. 01 77 00 Closeout Procedures
41 J. 01 91 00 Commissioning
42 K. Other Divisions and Specifications that may address more specifically the requirements for field recording the
43 installation of all items associated with the execution of this contract by Division or Trade.
44

1.3. RELATED DOCUMENTS

- 46 A. Other related documents shall include but not be limited to the following:
47 1. Bidding documents including drawings, specifications, and addenda.
48 2. Required regulatory documents of conditional approval.
49 3. Field orders, verbal or written by inspectors having regulatory jurisdiction.
50 4. Shop drawings and installation drawings.
51

1.4. PERFORMANCE REQUIREMENTS

- 53 A. The GC shall be responsible for maintaining the “Master As-Built Document Set” in the job trailer at all times
54 during the execution of this contract. This document set shall include all of the following:
55 1. Master As-Built Plan Set
56 2. Master As-Built Specification Set
57 3. Other Document Sets

- 1 B. The GC shall designate one person of the GC staff to be responsible for maintaining the Master As-Built
2 Document Set at the job trailer. This shall include, posting updates, revisions, deletions and the monitoring of all
3 contractors posting as-built information as described in this specification.
4 C. All contractors shall use this specification as a general guideline regarding the requirements for documenting
5 their completed Work. Contractors shall explicitly follow additional specification requirements within their own
6 Division of Trade as it may apply to this specification.
7

8 **1.5. QUALITY ASSURANCE**

- 9 A. The GC shall be responsible for all of the following:
10 a. Spot checking all sub-contractors field documents to insure daily information is being recorded as
11 work progresses.
12 b. Discuss as-built recording to the plan set at weekly job meetings with all sub-contractors on site.
13 c. Schedule time with sub-contractors in the job trailer for recording as-built information to the plan
14 set.
15 d. Insure that all sub-contractors are providing clear and accurate information to the plan set in a
16 neat and organized manner.
17 e. Insure sub-contractors who have completed work have finalized recording all as-built information
18 to the plan set before releasing them from the project site.
19 B. The Project Architect, the City Project Manager, Commissioning Agent and other design team staff will perform
20 random checks of the Master As-Built Document Set during the execution of this contract to ensure as-built
21 information is being recorded in a timely fashion as the Work progresses. An updated and current Master As-
22 Built Document Set is a stipulation for approval of the progress payment.
23

24 **PART 2 – PRODUCTS**

25 **2.1. OFFICE SUPPLIES**

- 26 A. The GC shall provide a sufficient supply of office products in the job trailer at all times for all contractors to use in
27 recording as-built information into the plan set. This shall include but not be limited to the following:
28 a. Red ink pens, medium point. Pens that bleed through paper, markers, and felt tips will not be
29 accepted.
30 b. The use of highlighters is acceptable. Assign colors to various trades for consistency in recording
31 information.
32 c. Straight edges of various lengths for drawing dimension, extension and other lines.
33 d. Civil and Architectural scales
34 e. Clear transparent, non-yellowing, single sided tape.
35 f. Correction tape or correction fluid for correcting small errors.
36
37

38 **PART 3 - EXECUTION**

39 **3.1. FIELD DOCUMENT AS-BUILTS**

- 40 A. The GC and all Sub-contractors shall be responsible for keeping their own field set of as-built documents
41 including plans, specifications and published changes.
42 B. Field sets shall be kept dry and in good condition at all times.
43 C. No Work shall be buried, covered, or hidden, by any additional Work, regardless of Contractor or Trade, until
44 locations of all materials and equipment has been properly documented as described below.
45 D. All contractors shall be required to record the following as-built information:
46 a. Notes on the daily installation of materials and equipment.
47 b. Sketches, corrections, and markups indicating final location, positioning, and arrangement of
48 materials and equipment such as pipes, conduits, valves, cleanouts, pull boxes and other such
49 items. Note all final locations on plan sheets, indicate dimension off identifiable building features.
50 Riser diagrams need only be corrected for significant changes in locations, routing or
51 configuration.
52 i. The use of photographs in lieu of hand drawn sketches is acceptable.
53 ii. Photos shall be taken according to Specification 01 32 33 Photographic Documentation
54 iii. Print photo and markup with dimensions or notes as necessary.
55 c. Identify by the use of existing plan symbology and notes the size, type, quantity, and use as
56 applicable of materials such as pipes, valves, conduits, etc.
57

- 1 d. Note whether horizontal runs are below slab or above ceiling, include dimensions above or below
2 finished floor elevation.
- 3 E. All contractors shall be responsible for transferring the information from their field set of documents to the
4 Master As-Built Plan Set kept in the GC job trailer. See Section 3.3.D. below for the proper procedure.
- 5 F. All contractors shall update the GC Master Plan Set as often as necessary, but not less than once per work week.
- 6

7 **3.2. SITE SURVEY AS-BUILT**

- 8 A. The Land Surveyor Sub-Contractor shall provide digital as-built information including but not be limited to the
9 following:
- 10 a. For underground buried utility laterals and services of all types locate all of the following that may
11 apply:
- 12 i. Connection points at all mains
- 13 ii. Storm discharge points to open air
- 14 iii. All corners and bends regardless of angle, large radius sweeps shall have multiple point
15 locations sufficient to define the sweep.
- 16 iv. All vertical drops
- 17 v. All wells
- 18 vi. Private buried utilities such as buried electrical cables, irrigation systems, etc.
- 19 v. Other information that may need to be located in the future by the owner prior to digging
- 20 b. Record all surface features including but not limited to the following:
- 21 i. Building corners, pavement edges, and other permanent structural features.
- 22 ii. All surface covers for inlets, catch basins, cleanouts, access structures, curb stops and
23 other such devices.
- 24 iii. Other permanent surface features such as hydrants, lamp posts, and other permanent site
25 amenities.
- 26 c. The following data shall be recorded while locating items in sub-sections 3.2.a and 3.2.b above:
- 27 i. Flow lines at both ends of pipes
- 28 ii. Pipe sizes and material types
- 29 iii. Rim elevations for all covers
- 30 iv. Sump elevations and invert elevations of all structures
- 31 v. Spot elevations for all pads, driveways, walks, stoops, and floors
- 32 B. The Surveyor shall provide the final digital as-built on a media and in a format specified in Specification 00 31 21
33 Survey Information to the GC for turn in to the Project Architect and the Civil Engineer.
- 34 C. The Surveyor shall provide two printed as-built site plans to the GC for inclusion in the Master As-Built Plan Set
35 as follows:
- 36 1. One sheet to show all features (but not contour information) with text neatly organized for each item
37 identified.
- 38 2. One sheet showing contours, contour labels, and features from item 1 above, but with no additional text.
- 39

40 **3.3. MASTER AS-BUILT DOCUMENT SET**

- 41 A. The GC shall be responsible for maintaining the Master As-Built Document Set in the job trailer at all times.
- 42 1. The Master As-Built Plan Set (Plan Set) shall begin with one complete bid set of drawings and any
43 additional sheets that were supplied by published addenda during the bidding process. The cover sheet
44 shall be titled as the "Master As-Built Plan Set" in large bold red letters approximately 2" in height and
45 shall not be used for any other purpose.
- 46 a. The Plan Set shall be kept dry, legible, and in good condition at all times.
- 47 b. The Plan Set shall be kept up to date with new revisions within two (2) working days of
48 supplemental drawings being issued. Revisions shall be posted as follows:
- 49 i. Insert new, revised sheets into the plan set. Void old sheets but do not remove them from
50 the plan set. Indicate date received and what document (RFI, CB, CO, etc) caused the
51 change.
- 52 ii. Insert new, revised individual details into the plan set. Void old details, tape new details
53 over the old details with a "tape hinge" to allow them to be viewed. Indicate date
54 received and what document (RFI, CB, CO, etc) caused the change.
- 55 iii. Add new details in appropriate white space on relevant sheets. If no space is available use
56 the back side of the previous sheet or insert a new sheet. Indicate date received and what
57 document (RFI, CB, CO, etc) caused the change.

- 1 c. The Plan Set shall be available at anytime for easy reference during progress meetings and for
2 emergency location information of new work already completed.
- 3 2. The Master As-Built Specification Set (Spec Set) shall begin with one complete bid set of specifications
4 and any additional specifications that were supplied by published addenda during the bidding process.
5 The Spec Set shall be provided in three "D" ring type binders of sufficient thickness to accommodate the
6 specification set. Multiple binders are allowed as necessary. Label the front cover and binding edge with
7 "Master As-Built Specifications" in bold red letters. Provide other information as necessary to distinguish
8 the contents of multi-volume sets.
- 9 a. The Spec Set shall be kept dry, legible, and in good condition at all times.
10 b. The Spec Set shall be kept up to date with new revisions within two (2) working days of
11 supplemental drawings being issued.
- 12 c. The Spec Set shall be available at anytime for easy reference during progress meetings.
- 13 3. Other Document Sets may be kept at the GCs option in three "D" ring type binders of sufficient thickness
14 to accommodate the documentation. Other documentation sets may include but not be limited to RFIs,
15 CBs, COs, etc.
- 16 C. The Land Surveyor Sub-Contractor shall be required to use digital surveying for all exterior site surveying, and
17 provide deliverable digital as-builts as specified in Specification 00 31 21 Survey Information. As soon as practical
18 the surveyor shall provide the GC with a preliminary copy of installed buried utilities for inclusion with the plan
19 set in the job trailer. The surveyor shall provide final digital as builts as per section 3.2 above.
- 20 D. All contractors shall be responsible for updating the Plan Set from their field sets at least once per work week.
21 Updates shall include but not be limited to the following procedures:
- 22 a. All updates shall be done only in red ink. Place a "cloud" around small areas of correction to call
23 attention to the change.
- 24 b. Whenever possible place general work notes, field sketches, supplemental details, photos, and
25 other such information on the reverse side of the preceding sheet. Installation notes including
26 dates shall be kept neatly organized in chronological order as necessary.
- 27 c. Accurately locate items on the plan set as follows:
- 28 i. For items that are located as dimensioned provide a check mark or circle indicating the
29 dimension was verified.
- 30 ii. For items that are within 5 feet of the location indicated on the plans leave as shown and:
31 • Provide correct dimensions to existing dimension strings or,
32 • Accurately locate with new dimension strings
- 33 iii. For items that are more than 5 feet from the location indicated on the plans
34 • Accurately draw the items in the new location as installed and,
35 • Accurately locate with new dimension strings and,
36 • Note that the existing location is void.
- 37 d. Include dimensioned locations for items that will be buried, concealed, or hidden in the ground,
38 under floors, in walls or above ceilings.
- 39 i. Dimensions shall be pulled from identifiable building features, not from centers of columns
40 or other buried features.
- 41 ii. When necessary pull more dimensions as needed from opposing directions to properly
42 locate single items.

3.4. AS-BUILT REVIEW AND ACCEPTANCE

- 45 A. The GC shall provide the Master As-Built Plan Set to the Project Architect (PA), the City Project Manager (CPM),
46 the Commissioning Agent (CxA) and other design team staff for content review prior to the Progress Payment
47 Milestone indicated in Specification 01 29 76 Progress Payment Procedures. The submitted plan set shall include
48 the digital survey information produced under Section 3.2 above.
- 49 1. If the plan set is not approved:
- 50 a. The PA and CPM shall only be required to generalize deficiencies by trade there shall be no
51 requirement or expectation to generate a "punch list" of required corrections.
- 52 b. The GC and Sub-contractors as necessary shall be responsible for inspecting the installation and
53 correcting the drawings as needed.
- 54 c. The GC shall re-submit the plan set for review.
- 55 2. If the plan set is approved the PA shall take possession of the plan set to be used in providing the owner
56 with digital CAD record drawings. Upon completion of transferring the information to CAD the PA shall
57 provide the Owner with CAD record drawings, record PDFs, and the Master As-Built Plan Set.
- 58

- 1 **3.5. CHANGES AFTER ACCEPTANCE**
2 A. No Contractor shall be responsible for making changes to the As-Built record documents after acceptance by the
3 PA and CPM except when necessitated by changes resulting from any Work made by the Contractor as part of
4 his/her guarantee.

15 3.4. STORAGE 3
16 3.5. CLOSEOUT PROCEDURE 3
17

PART 1 – GENERAL

1.1. SUMMARY

- 21 A. This specification is intended to provide clear guidelines and identify the responsibilities of all contractors as they
22 pertain to City of Madison contract procedures regarding spare parts, special tools, special materials, and extra
23 materials.
24 B. Each contractor shall be responsible for knowing the specific requirements of their Division Specifications as they
25 may relate to the general information provided in this specification.
26 C. The General Contractor (GC) shall be responsible for ensuring all contractors provide spare parts and extra
27 materials as described in this specification.
28

1.2. RELATED SPECIFICAITONS

- 30 A. 01 29 76 Progress Payment Procedures
31 B. 01 31 23 Project Management Web Site
32 C. 01 77 00 Closeout Procedures
33 D. Other Divisions and Specifications that may address more specifically how to proceed with spare parts, special
34 tools, special materials, and extra materials.
35

1.3. DEFINITIONS

- 37 A. Spare Parts: Any component of a product or assembly that comes pre-packaged or was specially ordered for the
38 explicit use of the product or assembly. This shall include but not be limited to fastening devices, mounting
39 brackets, replacement parts, wheels, pulleys, wiring, alternate assembly pieces, etc.
40 B. Special Tools: Any tool of any kind that was pre-packaged or specially ordered, and is required to be used for the
41 installation or maintenance of an installed product or assembly as part of this contract.
42 C. Special Materials: Any oil, lubricant, glue, touch-up paint, or other such material that comes pre-packaged or
43 was specially ordered and is required to be used for the installation or maintenance of an installed product or
44 assembly as part of this contract.
45 D. Extra Materials (Attic Stock): Any surplus materials in new and useable condition that was installed a part of this
46 contract. Attic Stock shall include but not be limited to the following: ceiling tiles, paint, stain, floor coverings,
47 ceramic tiles, light bulbs/lamps, filters, strainers, etc. Attic Stock shall include partially opened bulk items and
48 additional unopened quantities as directed by other specifications.
49

1.4. PERFORMANCE REQUIREMENTS

- 51 A. All contractors shall be responsible for consolidating spare parts, special tools, special materials, and attic stock
52 as it pertains to the specific Work within their Division or Trade.
53 B. All contractors shall use this specification as a general guideline regarding the requirements for turning spare
54 parts, special tools, special materials, and attic stock over to the owner. Contractors shall explicitly follow
55 specification requirements within their own Division of Trade.
56

1.5. QUALITY ASSURANCE

- 58 A. The General Contractor (GC) shall be responsible for all of the following:

- 1 1. Coordinate the location for and the delivery of all spare parts, special tools, special materials, and attic
2 stock being provided by all contractors under this contract to one centralized location as designated by
3 the Owner.
- 4 2. Verify that all items being delivered are:
 - 5 a. Clean, new, and in a usable condition.
 - 6 b. Properly sealed, protected, and labeled
 - 7 c. Properly documented

8
9 **PART 2 – PRODUCTS – THIS SECTION NOT USED**

10
11 **PART 3 - EXECUTION**

12
13 **3.1. PACKAGING**

- 14 A. Whenever possible all surplus items should remain in their original packaging such as parts envelopes.
- 15 B. Package small parts in re-sealable plastic bags (Ziploc) or envelopes with clasp fasteners. Do not use envelopes
16 that seal with glue or tape envelopes closed. Do not leave packaging unsealed.
- 17 C. Package like parts together for products or assemblies. I.E. keep all spare parts for flushometers together.
- 18 D. Many small packages may be grouped together into a larger container by trade.
- 19 E. Do not use unrelated boxes or containers for packaging spare items. I.E. do not use a light fixture box for spare
20 breakers, or flushometers parts.

21
22 **3.2. LABELING**

- 23 A. Whenever possible the original labeling indicating part numbers and other pertinent information shall remain on
24 the original packaging.
- 25 B. If original labeling is not available the contractor shall label all parts and packages using tape or labels and
26 permanent black markers. Tape or labels being used shall absorb the permanent marker without bleeding or
27 allowing ink to be smeared or rubbed off.
- 28 C. Labels shall include the name of the product or equipment the item belongs to, part number and/or name, and
29 any other information that would assist maintenance personnel in identifying the piece and related product.
- 30 D. Labels shall include plan or specification designations (WC-1, LAV-3, DF-2, CPT-1, etc) that identify the particular
31 product or finish material it represents.
- 32 E. Labels for parts stored in clear re-sealable plastic bags may be placed inside the bag. Label shall face out and be
33 able to be read from one side. Multiple bags shall be numbered individually for identification.
- 34 F. Label the outside of large containers with the trade name (Plumbing, Electrical, etc).

35
36 **3.3. INVENTORY**

- 37 A. All contractors shall provide the GC with complete inventories of all spare parts, special tools, special materials,
38 and attic stock that they are providing at the end of the contract. The inventories shall be organized as follows:
 - 39 1. The cover sheet shall indicate the Contractors name, address, phone number, identify that the document
40 is the "Spare Parts and Extra Materials Inventory", and identify the Division or Trade the inventory is for.
 - 41 2. Provide an inventory in a tabular format of all items being provided under this and other specifications.
42 The minimum information to be provided for each item on the inventory shall be as follows:
 - 43 a. Bag or container number, all items of one bag or container shall be grouped together on the
44 inventory
 - 45 b. Item description
 - 46 c. Item size (if applicable)
 - 47 d. Total quantity provided
 - 48 e. Identify if item is a spare part, tool, special material, or attic stock
- 49 B. The GC shall consolidate inventories from all sub-contractors into one tabular data sheet organized by Division or
50 Trade of Work.
 - 51 1. Upon completing the consolidated list the GC shall upload the completed inventory to the Contract
52 Closeout-Attic Stock Library on the Project Management Web Site.
 - 53 2. The GC shall notify the Project Architect and City Project Manager that the scans have been uploaded.
 - 54 3. Consulting Staff and Owner Staff shall review the inventories prior to Final Review to verify that minimum
55 required quantities have been met. Deficiencies shall be noted and returned back to the GC for
56 corrective action.

3.4. STORAGE

- A. Prior to the 80% Progress Payment milestone the GC shall coordinate with the City Project Manager and Maintenance Personnel where spare parts, special tools, special materials, and attic stock shall be stored.
- B. The GC shall instruct all contractors as to the location and proper storage procedures.
- C. The GC shall be responsible for ensuring the storage area is kept neat and orderly as follows:
 - 1. Like items are stored together by material, product, or trade as necessary.
 - 2. Liquids are stored in sealable containers and the lids have been properly installed to prevent drying out, spillage, etc.
 - 3. All labels are clearly visible and provide the required information.
- D. Large items shall be stored so as not to damage other items. Do not stack heavy items or items with distinct shapes/outlines on softer items that may get crushed or imprinted.

3.5. CLOSEOUT PROCEDURE

- A. Prior to the 90% Progress Payment milestone the GC shall review all attic stock already stored by the contractors to ensure the following:
 - 1. Materials are stored in the proper location(s).
 - 2. All boxes, containers and items are properly labeled according to the submitted/approved inventory.
 - 3. Quantities are correct according to the submitted/approved inventory.
- B. The GC shall ensure that all deficiencies are corrected prior to conducting Demonstration and Training Sessions.
- C. The GC shall review with Maintenance Staff all inventories and labeling during the scheduled Demonstration and Training Sessions.
- D. Any discrepancies associated with Attic Stock shall be resolved and verified prior to the CPM releasing the 90% CT progress payment.

15 3.6. CLOSEOUT PROCEDURE 4
16

PART 1 – GENERAL

1.1. SUMMARY

- 19
20 A. The purpose of this specification is to provide clear responsibilities and guidelines related to providing
21 Demonstration and Training (D&T) Sessions related to general facility use, equipment, systems, finishes, and
22 materials to City of Madison Staff (Owner, Owner Representatives, Maintenance, and Custodial Personnel) as
23 needed.
24 B. All D&T shall be coordinated through the General Contractor (GC), Project Architect (PA) and City Project
25 Manager (CPM), and will be based on or customized to the needs of City of Madison Staff being trained. New
26 equipment and systems may have complete D&T sessions as described in this specification while equipment or
27 systems staff is familiar with may have sessions more focused on maintenance only.
28

1.2. RELATED SPECIFICATIONS

- 29
30 A. Section 01 29 76 Progress Payment Procedures
31 B. Section 01 78 13 Completion and Correction List
32 C. Section 01 78 19 Maintenance Contracts
33 D. Section 01 78 23 Operation and Maintenance Data
34 E. Section 01 78 36 Warranties
35 F. Section 01 78 39 As-Built Drawings
36 G. Section 01 78 43 Spare Parts and Extra Materials
37 H. Section 01 91 00 Commissioning
38 I. Other Divisions and Specifications that may address more specifically the requirements for D&T sessions related
39 to the installation of all items and equipment installed under the execution of the Work.
40

1.3. QUALITY ASSURANCE

- 41
42 A. All contractors shall have the responsibility of preparing for and conducting D&T sessions as determined by this
43 and other Division or Trade related specifications, Owner Operation and Maintenance Manuals, and other such
44 documentation related to the Work.
45 B. The GC shall have responsibility for:
46 1. Ensuring that all contractors required to conduct a D&T session have successfully completed all of the
47 following:
48 a. Turned in all required documentation for review and documentation has been approved/accepted
49 prior to scheduling D&T sessions.
50 b. Other required documentation as needed is available and ready for use during the D&T session.
51 c. All systems have been started, tested, and running as per appropriate specification and/or
52 manufacturers recommendations prior to scheduling D&T sessions.
53 d. All contractors are sufficiently prepared for their D&T session
54 e. Documents the D&T session including date, time, contractor and company name, attendees and
55 other information regarding the session
56 2. Organizing the coordination and scheduling of all D&T sessions between all contractors and the
57 appropriate representatives of the Owner. These representatives may include any of the following
58 depending on the Work of the Contract:

- a. Owner – end users
- b. Facility Maintenance personnel
 - i. Facility general operation procedures including custodial services
 - ii. Electrical
 - iii. Mechanical
 - iv. Plumbing
 - v. Site
- c. Information Technology (IT) Department
- d. Traffic Engineering – Radio Shop
- e. Architects, Engineers and Facility Management staff as project completion overview

PART 2 – PRODUCTS – THIS SECTION NOT USED

PART 3 - EXECUTION

3.1. GENERAL REQUIREMENTS

- A. The GC shall develop a specific D&T plan to be scheduled and conducted as described below but no sooner than the meeting discussed in 3.2.A.2 below.
- C. The GC shall not schedule D&T sessions to preclude required personnel from attending multiple sessions.

3.2. COORDINATING AND SCHEDULING THE TRAINING

- A. The GC, PA, CxA and CPM, shall review all Training and Demonstration requirements during two (2) special meetings.
 - 1. The first meeting shall be held at the 50% Contract Total Payment. During this meeting the following shall be discussed:
 - a. Preliminary schedule of training dates to be completed prior to beginning construction closeout.
 - b. List of documentation and items that need to be completed and available before and during the training session.
 - c. Who (Owner, Maintenance, etc) will be attending what training session(s).
 - 2. The second meeting shall be held at the 80% Contract Total Payment. This meeting shall review due outs that have not yet been completed for the 90% Contract Total Payment and the requirements necessary for Construction Closeout. All Demonstration and Training sessions shall be completed prior to receiving the 90% progress payment and beginning Construction Closeout Procedures (see Specification 01 77 00).
 - a. This does not include any requirement associated with off season equipment preparation and/or demonstration and Training Sessions.
- B. All of the Construction Work shall be operationally ready prior to conducting training as follows:
 - 1. All contractors shall have their As-Built Drawing Records available for reviewing locations of system components during training.
 - 2. All final and approved Operations and Maintenance Data shall be completed no less than two (2) full weeks prior to the scheduled training.
 - 3. All systems shall have been started, functionally tested, balanced, and fully operational, and all piping and equipment labeling complete at least two (2) days prior to the scheduled training.
 - a. Seasonal equipment shall not be trained out of season. Contractors having seasonal equipment shall work with the GC and CPM for coordinating additional training sessions as appropriate for seasonal equipment.
- C. Correction list items that prevent a piece of equipment or system from being fully operational for training shall be corrected prior to conducting the training.

3.3. TRAINING OBJECTIVES

- A. For each piece of equipment or system installed train on the following objectives/topics as applicable:
 - 1. System design, concept, and capabilities
 - 2. Review of related contractor as-built drawings
 - 3. Facility walkthrough to identify key components of the system
 - 4. System operation and programming including weekly, monthly, annual test procedures
 - 5. System maintenance requirements
 - 6. System troubleshooting procedures
 - 7. Testing, inspection, and reporting requirements associated with any regulatory requirements
 - 8. Identification of any correction list items still outstanding

- 1 9. Review of system documentation including the following:
- 2 a. Operation and maintenance data
- 3 b. Warranties
- 4 c. Valve charts, tags, and pipe identification markers
- 5 B. For each piece of specialty equipment train on the following objectives/topics as applicable:
- 6 1. Manufacturers operations instructions
- 7 2. Manufacturers use and care instructions
- 8 3. Manufacturers maintenance and troubleshooting instructions
- 9 4. System operation and programming including weekly, monthly, annual test procedures
- 10 5. Identification of any correction list items still outstanding
- 11 6. Review of system documentation including the following:
- 12 a. Operation and maintenance data
- 13 b. Warranties
- 14 C. End User Orientation
- 15 1. Facility walkthrough
- 16 2. Security and emergency features
- 17 3. General facility operation procedures
- 18 D. Facility General Use and Custodial Services – if requested
- 19 1. Facility walkthrough
- 20 2. Security and emergency features
- 21 3. General facility operation procedures
- 22 4. Care and maintenance of specialty items, finishes, etc as requested
- 23 5. Attic stock inventory and material designations
- 24

25 3.4. DEMONSTRATION AND TRAINING PROGRAM PREPARATION

- 26 A. Each contractor having a responsibility for providing D&T sessions shall meet with the GC, CPM, and other City
- 27 Staff as needed to review the extent of the Training Objectives in section 3.3 above needed for each piece of
- 28 equipment, system, finish, etc. This meeting shall occur no less than four (4) weeks prior to the anticipated
- 29 training session.
- 30 B. The contractor shall use the information from item 3.4.A above to prepare a formal training program for each
- 31 piece of equipment or system based on the Training Objectives in 3.3 above.
- 32 1. The formal training program shall include the following information:
- 33 a. Session title
- 34 b. List of systems, equipment, use, care, etc to be covered during the session
- 35 c. Provide the following for each systems, equipment, use, care, etc to be covered during the session
- 36 i. Name and affiliation of each instructor to be used. As needed and discretion of the Owner
- 37 the GC to require attendance by the installing technician, installing Contractor and the
- 38 appropriate trade or manufacturer’s representative.
- 39 ii. Qualifications of each instructor to be used. Practical building operation expertise as well
- 40 as in-depth knowledge of all modes of operation of the specific piece of equipment as
- 41 installed in this project is required by the training personnel. If Owner determines training
- 42 was not adequate, the training shall be repeated until acceptable to Owner.
- 43 iii. A checklist of all documentation and system/equipment requirements necessary to
- 44 complete a successful training session and the current status of each
- 45 iv. Any additional documents, training aids, video or other items to be used to complete the
- 46 training
- 47 v. Any special requirements or needs associated with item iv above to complete the training
- 48 d. The intended audience for the training
- 49 e. The approximate duration of each objective or topic to be covered
- 50 2. Submit the completed training program to the GC for review and approval by the PA and CPM.
- 51 C. The PA and CPM shall work with staff as necessary to ensure all points of anticipated training needs have been
- 52 met. The PA and CPM will approve the program as submitted or recommend changes for re-submittal as
- 53 necessary.
- 54

55 3.5. CONDUCTING A DEMONSTRATION AND TRAINING SESSION

- 56 A. All contractors shall conduct their required D&T Sessions as follows:
- 57 1. Begin with a classroom session
- 58 a. Provide a sign in sheet indicating all training to be conducted, instructors, etc.

- 1 b. Provide an overview of the training to be conducted including the approximate schedule.
- 2 2. Conduct a general walk-through of the site.
- 3 a. Point out locations of various equipment, valves, charts, and other related items.
- 4 b. Use the Division or Trade As-Built record drawings to indicate locations of hidden or buried items.
- 5 3. Provide a demonstration of general equipment/system operation including using the O&M manual.
- 6 a. Startup and shutdown procedures.
- 7 b. Normal operational levels as depicted by any gauges, software, etc.
- 8 c. Indicate warning devices, signs etc. and demonstrate emergency shut-down procedures.
- 9 4. Provide a demonstration of all owner level maintenance using the O&M manual.
- 10 a. Indicate frequency of maintenance.
- 11 b. Provide and review all spare parts, special tools, and special materials.
- 12 5. Provide and review all spare parts, special tools, special materials, or attic stock as applicable.
- 13 6. While conducting D&T sessions:
- 14 a. Allow hands on training whenever practical.
- 15 b. Answer questions promptly
- 16 c. Repeat demonstrations and procedures as necessary.
- 17 B. Within two (2) working days of completing the D&T session the contractor responsible for the session shall turn-
- 18 in any documentation generated including the sign in roster to the GC.
- 19 C. The GC shall turn over all training documentation to the PA and CPM upon completion of D&T sessions.
- 20 D. Re-schedule any training that has been determined to be inadequate or inappropriate for any reason including
- 21 but not limited to any of the following;
- 22 1. Unqualified instructor
- 23 2. System installation incomplete or untested to the specifications
- 24 3. Equipment failure during demonstration
- 25 4. Un-expected cancellation

26
27 **3.6. CLOSEOUT PROCEDURE**

- 28 A. Prior to receiving the 90% Progress payment the GC shall:
- 29 1. Verify with the PA and CPM that each Demonstration and Training Session was conducted properly and
- 30 according to the submitted plan.
- 31 2. Any required "Off Season" equipment testing, balancing, and Demonstration and Training Sessions have
- 32 been tentatively scheduled with the GC, necessary sub-contractors, instructors and Owner/Owner
- 33 Representatives as necessary.
- 34
- 35

36 **END OF SECTION**

SECTION 01 81 13.13
SUSTAINABLE DESIGN REQUIREMENTS

PART 1 – GENERAL

- 1.1 [SUMMARY](#)
- 1.2 [DEFINITIONS](#)
- 1.3 [PREINSTALLATION MEETINGS](#)
- 1.4 [ADMINISTRATIVE REQUIREMENTS](#)
- 1.5 [ACTION SUBMITTALS](#)
- 1.6 [INFORMATIONAL SUBMITTALS](#)
- 1.7 [QUALITY ASSURANCE](#)

PART 2 – PRODUCTS

- 2.1 [MATERIALS, GENERAL](#)
- 2.2 [RECYCLED CONTENT OF MATERIALS](#)
- 2.3 [REGIONAL MATERIALS](#)
- 2.4 [LOW-EMITTING MATERIALS](#)

PART 3 – EXECUTION

- 3.1 [NONSMOKING BUILDING](#)
- 3.2 [CONSTRUCTION INDOOR-AIR-QUALITY MANAGEMENT](#)
- 3.3 [INDOOR-AIR-QUALITY ASSESSMENT](#)

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes general requirements and procedures for compliance with certain Parksmart Certification Standard prerequisites and credits needed for Project to obtain Bronze certification based on Parksmart Certification Standard Version 1.0 with Addenda.
 - 1. Other Parksmart prerequisites and credits needed to obtain Parksmart certification depend on product selections and may not be specifically identified as Parksmart requirements. Compliance with requirements needed to obtain Parksmart prerequisites and credits may be used as one criterion to evaluate substitution requests and comparable product requests.
 - 2. A copy of Parksmart Project checklist is attached at the end of this Section for information only.
 - a. Some Parksmart prerequisites and credits needed to obtain the indicated Parksmart certification depend on Architect's design and other aspects of Project that are not part of the Work of the Contract.

1.2 DEFINITIONS

- A. Parksmart Certification Standard Version 1.0 with Addenda.
 - 1. Definitions that are a part of "Parksmart Certification Standard" apply to this Section.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at Project site.

1.4 ADMINISTRATIVE REQUIREMENTS

- A. Respond to questions and requests from Architect about Parksmart prerequisites and credits that are the responsibility of the Contractor, that depend on product selection or product qualities, or that depend on Contractor's procedures until a determination on Project's Parksmart certification application. Document responses as informational submittals.
- B. Submit documentation to Parksmart and respond to questions and requests from Parksmart about Parksmart prerequisites and credits that are the responsibility of the Contractor, that depend on product selection or product qualities, or that depend on Contractor's procedures until Parksmart has made its determination on Project's Parksmart certification application.
 - 1. Document correspondence with Parksmart as informational submittals.

1.5 ACTION SUBMITTALS

- A. Sustainable Design Documentation Submittals:
1. Product Data and wiring diagrams for sensors and data collection system used to provide continuous metering of building energy-consumption performance over time.
 2. Product Data for recycled content indicating postconsumer and preconsumer recycled content and cost.
 3. Product Data for regional materials indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each regional material.
 4. IAQ (Refer to Section 01 57 19.11 - Indoor Air Quality (IAQ) Management):
 - a. Construction indoor-air-quality management plan.
 - b. Product Data for temporary filtration media.
 - c. Product Data for filtration media used during occupancy.
 5. Product Data for adhesives and sealants used inside the weatherproofing system indicating VOC content of each product used.
 6. Product Data for paints and coatings used inside the weatherproofing system indicating VOC content of each product used.
 7. Product Data for products containing composite wood or agrifiber products or wood glues indicating that they do not contain urea-formaldehyde resin.

1.6 INFORMATIONAL SUBMITTALS

- A. Sustainable Design Action Plans: Provide preliminary submittals within **14** days of date established for the Notice to Proceed indicating how the following requirements will be met:
1. List of proposed materials with recycled content. Indicate cost, postconsumer recycled content, and preconsumer recycled content for each product having recycled content.
 2. List of proposed regional materials. Identify each regional material, including its source, cost, and the fraction by weight that is considered regional.
 3. Construction indoor-air-quality management plan.
- B. Sustainable Design Progress Reports: Concurrent with each Application for Payment, submit reports comparing actual construction and purchasing activities with sustainable design action plans.

1.7 QUALITY ASSURANCE

- A. Parksmart Coordinator: Engage an experienced LEED-Accredited Professional to coordinate Parksmart requirements. Parksmart coordinator may also serve as waste management coordinator.

PART 2 - PRODUCTS

2.1 MATERIALS, GENERAL

- A. Provide products and procedures necessary to obtain Parksmart credits required in this Section. Although other Sections may specify some requirements that contribute to these Parksmart credits, Contractor shall provide additional materials and procedures necessary to obtain Parksmart credits indicated.

2.2 RECYCLED CONTENT OF MATERIALS

- A. Building materials shall have recycled content such that postconsumer recycled content plus one-half of pre-consumer recycled content for Project constitutes a minimum of 10 percent of cost of materials used for Project.
1. Cost of postconsumer recycled content plus one-half of pre-consumer recycled content of an item shall be determined by dividing weight of postconsumer recycled content plus one-half of pre-consumer recycled content in the item by total weight of the item and multiplying by cost of the item.
 2. Do not include plumbing, mechanical and electrical components, and specialty items such as elevators and equipment in the calculation.

2.3 REGIONAL MATERIALS

- A. Not less than 50 percent of building materials (by cost) shall be regional materials.

2.4 LOW-EMITTING MATERIALS

- A. For field applications that are inside the weatherproofing system, paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:
1. Flat Paints and Coatings: VOC not more than 50 g/L.
 2. Nonflat Paints and Coatings: VOC not more than 150 g/L.
 3. Dry-Fog Coatings: VOC not more than 400 g/L.
 4. Primers, Sealers, and Undercoaters: VOC not more than 200 g/L.
 5. Anticorrosive and Antirust Paints Applied to Ferrous Metals: VOC not more than 250 g/L.
 6. Zinc-Rich Industrial Maintenance Primers: VOC not more than 340 g/L.
 7. Pretreatment Wash Primers: VOC not more than 420 g/L.
 8. Clear Wood Finishes, Varnishes: VOC not more than 350 g/L.
 9. Clear Wood Finishes, Lacquers: VOC not more than 550 g/L.
 10. Floor Coatings: VOC not more than 100 g/L.
 11. Shellacs, Clear: VOC not more than 730 g/L.
 12. Shellacs, Pigmented: VOC not more than 550 g/L.
 13. Stains: VOC not more than 250 g/L.

PART 3 - EXECUTION

3.1 NONSMOKING BUILDING

- A. Smoking is not permitted within the building or within 25 feet of entrances, operable windows, or outdoor-air intakes.

3.2 CONSTRUCTION INDOOR-AIR-QUALITY MANAGEMENT

- A. Comply with SMACNA's "SMACNA IAQ Guideline for Occupied Buildings under Construction."
1. Replace air filters immediately prior to occupancy.

3.3 INDOOR-AIR-QUALITY ASSESSMENT:

- A. Flush-Out (Enclosed spaces only):
1. After construction ends, prior to occupancy and with all interior finishes installed, perform a building flush-out by supplying a total volume of 14,000 cu. ft. (4 300 000 L) of outdoor air per sq. ft. (sq. m) of floor area while maintaining an internal temperature of at least 60 deg F (16 deg C) and a relative humidity no higher than 60 percent. Per the Mechanical Engineer, time required for this flush out is 18 days at 24 hours a day.

- A. ASHRAE Guideline 1.1-2007, "HVAC&R Technical Requirements for The Commissioning Process".
B. ASHRAE Guideline 0-2005, "The Commissioning Process".
C. NEBB – Procedural Standards for Building Systems Commissioning.

1.4 DEFINITIONS

- A. Acceptance Phase. Phase of construction after startup and initial checkout when functional performance tests are performed.
B. Commissioning Authority (CxA). An independent entity, not otherwise associated with the A/E team members or the Contractor and reports directly to the Owner. The CxA directs and coordinates the commissioning activities.

- 1 C. Commissioning Plan (Cx Plan). An overall plan, developed before or after bidding, that provides the structure,
2 schedule and coordination planning for the commissioning process. The Cx Plan is included in the bid documents
3 and is to be reviewed by all contractors before submitting their bid.
- 4 D. Contract Documents. The documents binding on parties involved in the construction of this project (drawings,
5 specifications, change orders, amendments, contracts, Cx Plan, etc.).
- 6 E. Construction Checklist (CC). a list of items to inspect and test equipment and components to verify proper
7 installation of equipment. The CCs are provided by the CxA to the Sub.
- 8 F. Datalogging. - Monitoring flows, currents, status, pressures, etc. of equipment using stand-alone dataloggers
9 separate from the control system.
- 10 G. Deferred System Performance Tests. SPT's that are performed later, after substantial completion, due to partial
11 occupancy, equipment, seasonal requirements, design or other site conditions that prevent the tests from being
12 performed earlier.
- 13 H. Deficiency. A condition in the installation or function of a component, piece of equipment or system that is not in
14 compliance with the Contract Documents (that is, does not perform properly or is not complying with the
15 Owner's Project Requirements).
- 16 I. Factory Testing. Testing of equipment on-site or at the factory by factory personnel with an Owner's
17 representative present.
- 18 J. Indirect Indicators. Indicators of a response or condition, such as a reading from a control system screen
19 reporting a damper to be 100% closed.
- 20 K. Manual Test. Using hand-held instruments, immediate control system readouts or direct observation to verify
21 performance (contrasted to analyzing monitored data taken over time to make the "observation").
- 22 L. Monitoring. Recording parameters (flow, current, status, pressure, etc.) of equipment operation using
23 dataloggers or the trending capabilities of control systems.
- 24 M. Over-written Value. Writing over a sensor value in the control system to see the response of a system (e.g.,
25 changing the outside air temperature value from 75F to 50F to verify economizer operation). See also "Simulated
26 Signal."
- 27 N. Owner's Project Requirements (OPR). A document that describes what the Owner and stakeholders want to
28 achieve with this project and what expectations they have of the completed project.
- 29 O. Sampling. Reviewing or testing only a fraction of the total number of identical or near identical pieces of
30 equipment.
- 31 P. Seasonal Performance Tests. SPT's that are deferred until the system(s) will experience conditions closer to their
32 design conditions.
- 33 Q. Simulated Condition. Condition that is created for the purpose of testing the response of a system (e.g., applying
34 a hair blower to a space sensor to see the response in a VAV box).
- 35 R. Simulated Signal. Disconnecting a sensor and using a signal generator to send an amperage, resistance or
36 pressure to the transducer and DDC system to simulate a sensor value.
- 37 S. System Performance Test (SPT). Dynamic testing of entire systems (rather than just components of the system)
38 under full operation.
- 39 T. Trending. Monitoring of control points using the building automation system.

40
41 **1.5 DESCRIPTION**

- 42 A. General: Commissioning (Cx) is a systematic process of verifying that all building systems perform interactively to
43 meet the Owner's Project Requirements (OPR). This is achieved by beginning in the planning phase with
44 documenting the OPR and continuing through design, construction, acceptance, and the warranty period with
45 verification of performance. The Cx process shall encompass and coordinate the traditionally separate functions
46 of system documentation, equipment startup, control system calibration, tesTing and balancing, performance
47 testing and training. Cx during the construction phase is intended to achieve the following specific objectives
48 according to the Contract Documents:
 - 49 1. Verify that applicable equipment and systems are installed according to the manufacturer's
50 recommendations and to industry accepted minimum standards and that they receive adequate
51 operational checkout by installing contractors.
 - 52 2. Verify and document proper performance of equipment and systems.
 - 53 3. Verify that O&M documentation is complete.
 - 54 4. Verify that the Owner's operating personnel are adequately trained.
- 55 B. The Cx process does not take away from or reduce the responsibility of the system designers or installing
56 contractors to provide a finished and fully functioning product.
- 57 C. The commissioning authority (CxA) has no authority to change, modify or direct any work. The CxA can only
58 provide comments and suggestions.

- 1 D. Commissioning Plan. The Cx Plan provides guidance in the execution of the Cx process. The CxA will update the
2 Cx Plan regularly as the project progresses. The Drawings and Specifications will take precedence over the Cx
3 Plan.
4

5 **1.6 RESPONSIBILITIES**

6 A. General Contractor (GC) and Subcontractors (Subs)

7 1. Construction and Acceptance Phase

- 8 a. Provide assistance to the Construction Manager CM in the coordination of the Cx work by
9 the CxA, and with the CM and CxA ensure that Cx activities are being scheduled into the
10 master schedule.
11 b. Provide an updated construction schedule to the CxA any time the schedule changes.
12 c. Include the Cx activities in the contract.
13 d. Furnish a copy of all submittals and shop drawings pertaining to the commissioned
14 systems for review concurrently with the Architect and Engineers.
15 e. Furnish a copy of all construction meeting agendas and minutes to the CxA.
16 f. In each purchase order or subcontract written, include requirements for submittal data,
17 O&M data, Cx tasks and training.
18 g. GC will ensure that all Subs execute their Cx responsibilities according to the Contract
19 Documents and schedule.
20 h. A representative from the GC and each sub associated with the Cx process shall attend the
21 Cx pre- construction meeting and the regular Cx meetings scheduled by the CxA to
22 facilitate the Cx process.
23 i. Coordinate and execute the training of Owner personnel.
24 j. Prepare O&M manuals, according to the Contract Documents, including clarifying and
25 updating the original sequences of operation to as-built conditions.
26 k. Prepare and submit draft forms, including but not limited to start-up procedures, Testing
27 and Balancing (TAB) forms, calibration forms, etc. for review by the CxA before execution.
28 l. Submit test reports to the CxA of all tests performed on components and equipment to be
29 commissioned that are not included as part of the Construction Checklist and SPT
30 procedures.
31 m. Complete all construction checklist and functional performance test forms as required by
32 the Cx process.
33 n. Support the CxA with verification of the completion of construction checklist and
34 functional performance tests as outlined in PART 3.
35 o. Complete and inspect all installations. Certify that all components and systems are
36 operating as intended per Contract Documents.
37 p. Remedy all deficiencies immediately as they are identified throughout construction.
38 q. Demonstrate functionality of all systems and equipment.
39 r. Maintain an updated set of record drawings (on a daily basis) on the construction site.
40 s. Provide support and instrumentation to verify TAB reports, start-up reports, calibration
41 reports, and any other report pertinent to the commissioned equipment and systems.
42 t. Notify the CxA no less than 21 days before all testing, start-up, and training.
43 u. Update the CxA on a weekly basis on the progress of the Cx activities.
44 v. Submit trend data in electronic format or allow access to trending data by internet
45 connection as requested by the CxA.
46 w. Install access points by every sensor such that the sensor can be calibrated without
47 removal (P/T plugs, plugged holes in ducts etc.).
- 48 2. Warranty Period
- 49 a. Execute seasonal or deferred functional performance testing, witnessed by the CxA,
50 according to the specifications.
51 b. Correct deficiencies and make necessary adjustments to O&M manuals and record
52 drawings for applicable issues identified in any seasonal testing.

53 B. Equipment Suppliers

- 54 1. Provide all requested submittal data, including detailed start-up procedures and specific
55 responsibilities of the Owner to keep warranties in force.
56 2. Assist in equipment testing per agreements with Subs.
57 3. Include all special tools and instruments (only available from vendor, specific to a piece of
58 equipment) required for testing equipment according to these Contract Documents in the base

- 1 bid price to the Contractor, except for stand-alone data logging equipment that may be used by
2 the CxA.
3 4. Provide information requested by CxA regarding equipment sequence of operation and testing
4 procedures.
5 5. Review test procedures for equipment installed by factory representatives.
6

7 **1.7 SYSTEMS TO BE COMMISSIONED**

- 8 A. The entire Heating, Ventilation and Air Conditioning (HVAC) system (boilers, chillers, pumps, piping and air
9 distribution systems)
10 B. Building Automation System (BAS) for the HVAC system
11 C. Domestic Hot Water
12 D. Building envelope and roofing system as it pertains to HVAC
13 E. Lighting and Lighting Controls
14 H. Emergency Power System
15

16 **PART 2 – PRODUCTS**

17
18 **2.1 TEST INFORMATION**

- 19 A. All instruments needed to verify sensor readings, component performance, and system performance will be
20 provided by GC and Subs and be available to the CxA. These instruments will not be beyond what the contractors
21 need to complete the work specified in these construction documents. Any data logging equipment required in
22 addition to the BAS will be provided by the CxA.
23 B. All instruments shall be of sufficient quality and accuracy to test and/or measure system performance with the
24 tolerances specified in the Contract Documents. Refer to specification section 23 05 93- Testing, Adjusting, and
25 Balancing for required instrument tolerances.
26

27 **PART 3 - EXECUTION**

28
29 **3.1 COMMISSIONING TEAM**

- 30 A. The members of the commissioning team consist of the Commissioning Authority (CxA), the Owner's Project
31 Manager (PM), the designated representative of the Owner's Construction Management team (CM), the General
32 Contractor (GC or Contractor), the architect and design engineers, the Mechanical Contractor, the Electrical
33 Contractor, the TAB Contractor, the Controls Contractor, any other installing subcontractors or suppliers of
34 equipment.
35 B. Each Cx Team member shall designate one person who is responsible for coordinating the commissioning efforts
36 with the CxA.
37

38 **3.2 SCHEDULING AND MEETINGS**

- 39 A. Scheduling. The CxA will work with the other members of the Cx Team according to established protocols to
40 schedule the Cx activities. The CxA will provide sufficient notice to the Cx Team for scheduling Cx activities. The
41 GC will integrate all Cx activities into the master schedule. All parties will address scheduling problems and make
42 necessary notifications in a timely manner in order to expedite the Cx process.
43 B. The CxA will provide the initial schedule of primary Cx events at the Cx pre-construction meeting. The Cx Plan
44 provides a format for this schedule. As construction progresses more detailed schedules are developed by the
45 CxA. The Cx Plan also provides a format for detailed schedules.
46 C. Pre-Construction Meeting. Within 60 days of selection of the GC, the CxA will schedule, plan, and conduct a Cx
47 pre-construction meeting with the entire Cx team in attendance. Meeting minutes will be distributed to all
48 parties by the CxA. Information gathered from this meeting will allow the CxA to revise the Cx Plan which will
49 also be distributed to all parties.
50 D. Meetings. The Cx meetings will be scheduled approximately once a month during construction. These meetings
51 will be scheduled directly before or after the regular construction meetings if practical. These meetings will cover
52 coordination, deficiency resolution and planning issues with particular Subs. The CxA will plan these meetings
53 and will minimize unnecessary time being spent by Subs
54

55 **3.3 REPORTING**

- 56 A. The CxA will provide regular reports to the Owner as construction and Cx progresses. Standard forms are
57 provided and referenced in the Cx Plan.

- 1 B. The CxA will regularly communicate with all members of the Cx team, keeping them apprised of Cx progress and
2 scheduling changes through memos, progress reports, etc.
3 C. Testing or review approvals and non-conformance and deficiency reports are made regularly with the review and
4 testing as described in later sections.
5

6 **3.4 RECORD DRAWINGS**

- 7 A. The CxA will verify that the record drawings are updated throughout the construction. If a discrepancy is found
8 between the record drawings and the installations, the CxA will notify the GC immediately. It is the GC and
9 subcontractors responsibility to then inspect the installations and immediately and completely update the record
10 drawings such that they accurately reflect the installation.
11

12 **3.5 CONSTRUCTION COMMISSIONING PROCEDURES**

- 13 A. The following procedures apply to all equipment to be commissioned.
14 B. General. Construction checklists are important to ensure that the equipment and systems are hooked up and
15 operational. It ensures that system performance testing (in-depth system checkout) may proceed without
16 unnecessary delays. Each piece of equipment receives full checkout. No sampling strategies are used. All
17 construction checklists for a given system must be successfully completed prior to formal system performance
18 testing of equipment or subsystems of the given system.
19 C. Construction Checklists.
20 1. The primary purpose of the construction checklists is to provide the individual workers with the
21 key criteria for a successful installation. The secondary purpose is to track the progress of the
22 delivery and installation.
23 2. The CxA will develop construction checklists for all commissioned equipment and distribute these
24 to the responsible contractor. The GC and Subs will review the construction checklists for each
25 equipment type and provide comments to the CxA. The CxA will then print and distribute the
26 construction checklist for each individual component.
27 3. The GC and Subs are responsible for all requirements in the specification, not only the
28 requirements listed on the checklists.
29 4. The checklists answer format will be to circle yes /no or provide a brief answer such as providing
30 the model or serial numbers.
31 5. These checklists are provided by the CxA to the GC. The GC determines which trade is responsible
32 for executing and documenting each of the line item tasks and notes that trade on the form. Each
33 form may have more than one trade responsible for its execution.
34 6. The construction checklists shall be completed as delivery is completed and the installation
35 progresses.
36 7. Only individuals who have direct knowledge and witnessed that a line item task on the
37 construction checklist was actually performed shall initial or check that item off. It is not
38 acceptable for supervisors without direct knowledge or who have not witnessed the line item task
39 on the construction checklist to fill out these forms.
40 8. Any negative response shall immediately be brought to the attention of the CxA. All negative
41 replies shall be explained in detail on the construction checklist.
42 9. The GC and Subs are responsible for recording the completion of the checklists. Checklists shall be
43 submitted electronically to SharePoint in .pdf format in separate files by Division. Each file shall be
44 bookmarked by checklist tag.
45 10. Non-itemized installations such as wiring, ductwork, piping etc. will not have checklists to be
46 completed, but the GC and Subs will be provided the key criteria for successful installation.
47 11. The CxA will verify the construction checklist completion by a sampling of the delivered and
48 installed equipment. The sampling process will be described in the Cx Plan.
49 D. Sensor Calibration. Calibration of all sensors shall be included as part of the construction checklists performed by
50 the Contractors. Calibration information is provided in specification Section 23 09 23 - Direct Digital Control
51 System for HVAC
52 E. Deficiencies, Non-Conformance and Approval in Checklists and Startup.
53 1. The Subs shall clearly list any outstanding items of the construction checklist that were not
54 completed successfully, at the bottom of the procedures form or on an attached sheet. The
55 procedures form and any outstanding deficiencies are provided to the CxA within two days of task
56 completion.
57 2. The CxA reviews the report and submits either a non-compliance report or an approval form to
58 the Sub or CM. The CxA shall work with the Subs and vendors to correct deficiencies or

- 1 uncompleted items. The CxA will involve the CM and others as necessary. The installing Subs or
2 vendors shall correct all areas that are deficient or incomplete in the checklists and tests in a
3 timely manner, and shall notify the CxA as soon as outstanding items have been corrected and
4 include a Statement of Correction on the original non-compliance report. When satisfactorily
5 completed, the CxA recommends approval of the completion of the checklists to the CM using a
6 standard form.
- 7 3. Items left incomplete, which later cause deficiencies or delays during functional testing may result
8 in back charges to the responsible party.
- 9 F. System Performance Tests (SPT). SPTs shall be performed to demonstrate that each system is operating
10 according to the documented OPR and Contract Documents. System testing differs to the tests required in the
11 Construction Checklist in that they facilitate bringing all the individual components together to verify that they
12 operate collectively on a system level to provide the required design conditions.
- 13 1. Development of Test Procedures. The CxA shall prepare the SPT forms and procedures in
14 accordance with the criteria defined in the Cx Plan. The GC and Subs shall assist the CxA in the
15 preparation of these procedures by answering queries and forwarding site-specific information. A
16 sample System Performance Test form is provided at the end of this specification section.
- 17 2. Participation: The GC and the Subs are responsible for testing all systems to be commissioned
18 such that they function as described in the contract documents. The CxA will verify the
19 performance of the systems. The CxA will direct, witness and document the SPT verification and
20 GC and Subs will execute the verification tests.
- 21 G. Problem Solving. The CxA will recommend solutions to problems found, however the burden of responsibility to
22 solve, correct and retest problems is with the GC, Subs and A/E.
- 23 H. Seasonal Testing. During the warranty period, seasonal testing (tests delayed until weather conditions are closer
24 to the system's design) shall be completed as part of this contract. The CxA shall coordinate this activity. Tests
25 will be executed, documented and deficiencies corrected by the appropriate Subs, with facilities staff and the
26 CxA witnessing. Any final adjustments to the O&M manuals and record documents due to the testing will be
27 made.
- 28 I. Unforeseen Deferred Tests. If any check or test cannot be completed due to the building structure, required
29 occupancy condition or other deficiency, execution of checklists and functional testing may be delayed upon
30 approval of the PM. These tests will be conducted in the same manner as the seasonal tests.

31 32 **3.6 SENSOR AND ACTUATOR CALIBRATION**

- 33 A. Calibrate all field-installed temperature, relative humidity, carbon monoxide, carbon dioxide, and pressure
34 sensors and gages, and all actuators (dampers and valves) on this piece of equipment shall be calibrated. Sensors
35 installed in the unit at the factory with calibration certification provided need not be field calibrated.
- 36 B. Calibrate using the methods described below; alternate methods may be used, if approved by Owner
37 beforehand. See PART 2 for test instrument requirements. Record methods used on the relevant Construction
38 Checklist or other suitable forms, documenting initial, intermediate and final results.
- 39 C. All Sensors:
- 40 1. Verify that sensor location is appropriate and away from potential causes of erratic operation.
41 2. Verify that sensors with shielded cable are grounded only at one end.
42 3. For sensor pairs that are used to determine a temperature or pressure difference, for
43 temperature make sure they are reading within 0.2 degree F (0.1 degree C) of each other, and for
44 pressure, within tolerance equal to 2 percent of the reading, of each other.
45 4. Tolerances for critical applications may be tighter.
- 46 D. Sensors without Transmitters - Standard Application:
- 47 1. Make a reading with a calibrated test instrument within 6 inches (150 mm) of the site sensor.
48 2. Verify that the sensor reading, via the permanent thermostat, gage or building automation
49 system, is within the tolerances in the table below of the instrument-measured value.
50 3. If not, install offset, calibrate or replace sensor.
- 51 E. Sensors with Transmitters - Standard Application.
- 52 1. Disconnect sensor.
53 2. Connect a signal generator in place of sensor.
54 3. Connect ammeter in series between transmitter and building automation system control panel.
55 4. Using manufacturer's resistance-temperature data, simulate minimum desired temperature.
56 5. Adjust transmitter potentiometer zero until 4 mA is read by the ammeter.
57 6. Repeat for the maximum temperature matching 20 mA to the potentiometer span or maximum
58 and verify at the building automation system.

7. Record all values and recalibrate controller as necessary to conform with specified control ramps, reset schedules, proportional relationship, reset relationship and P/I reaction.
 8. Reconnect sensor.
 9. Make a reading with a calibrated test instrument within 6 inches (150 mm) of the site sensor.
 10. Verify that the sensor reading, via the permanent thermostat, gage or building automation system, is within the tolerances in the table below of the instrument-measured value.
 11. If not, replace sensor and repeat.
 12. For pressure sensors, perform a similar process with a suitable signal generator.
- F. Sensor Tolerances for Standard Applications: Plus/minus the following maximums:
1. Watthour, Voltage, Amperage: 1 percent of design.
 2. Pressure, Air, Water, Gas: 3 percent of design.
 3. Air Temperatures (Outside Air, Space Air, Duct Air): 0.4 degrees F (0.2 degree C).
 4. Relative Humidity: 4 percent of design.
 5. Barometric Pressure: 0.1 inch of Hg (340 Pa).
 6. Flow Rate, Air: 10 percent of design.
 7. Flow Rate, Water: 4 percent of design.
 8. Flow Rate, Steam: 3 percent of design.
 9. AHU Wet Bulb and Dew Point: 2.0 degrees F (1.1 degrees C).
 10. Hot Water Coil and Boiler Water Temperature: 1.5 degrees F (0.8 degrees C).
 11. Cooling Coil, Chilled and Condenser Water Temperatures: 0.4 degrees F (0.2 degree C).
 12. Combustion Flue Temperature: 5.0 degrees F (2.8 degrees C).
 13. Oxygen and CO2 Monitors: 0.1 percentage points.
 14. CO Monitor: 0.01 percentage points.
 15. Natural Gas and Oil Flow Rate: 1 percent of design.
- G. Critical Applications: For some applications more rigorous calibration techniques may be required for selected sensors. Describe any such methods used on an attached sheet.
- H. Valve/Damper Stroke Setup and Check:
1. For all valve/damper actuator positions checked, verify the actual position against the control system readout.
 2. Set pump/fan to normal operating mode.
 3. Command valve/damper closed; visually verify that valve/damper is closed and adjust output zero signal as required.
 4. Command valve/damper to open; verify position is full open and adjust output signal as required.
 5. Command valve/damper to a few intermediate positions.
 6. If actual valve/damper position does not reasonably correspond, replace actuator
- I. Isolation Valve or System Valve Leak Check: For valves not associated with coils.
1. With full pressure in the system, command valve closed.
 2. Use an ultra-sonic flow meter to detect flow or leakage.

3.7 NON-CONFORMANCE

- A. All deficiencies or non-conformance issues shall be noted and reported by the GC to the CM on a standard non-compliance form.
- B. Corrections of minor deficiencies identified may be made during the tests at the discretion of the CxA. In such cases the deficiency and resolution will be documented on the procedure form.
- C. Every effort will be made to expedite the testing process and minimize unnecessary delays, while not compromising the integrity of the procedures. However, the CxA will not be pressured into overlooking deficient work or loosening acceptance criteria to satisfy scheduling or cost issues, unless there is an overriding reason to do so at the request of the CM and the Owner.
- D. As tests progress and a deficiency is identified, the CxA discusses the issue with the executing contractor.
 1. When there is no dispute on the deficiency and the Sub accepts responsibility to correct it:
 - a. The CxA documents the deficiency and the Sub's response and intentions and they go on to another test or sequence. After the day's work, the CxA submits the non-compliance reports to the CM for signature, if required. A copy is provided to the Sub and CxA. The Sub corrects the deficiency, signs the statement of correction at the bottom of the non-compliance form certifying that the equipment is ready to be retested and sends it back to the CxA.
 - b. The CxA reschedules the test and the test is repeated.
 2. If there is a dispute about a deficiency, regarding whether it is a deficiency or who is responsible:

- 1 a. The deficiency shall be documented on the non-compliance form with the Sub's response
2 and a copy given to the CM and to the Sub representative assumed to be responsible.
3 b. Resolutions are made at the lowest management level possible. Other parties are brought
4 into the discussions as needed. Final interpretive authority is with the A/E. Final
5 acceptance authority is with the Project Manager.
6 c. The CxA documents the resolution process.
7 d. Once the interpretation and resolution have been decided, the appropriate party corrects
8 the deficiency, signs the statement of correction on the non-compliance form and provides
9 it to the CxA. The CxA reschedules the test and the test is repeated until satisfactory
10 performance is achieved.
- 11 3. Cost of Retesting.
- 12 a. The cost incurred by the Subs to retest a construction checklist item or functional test, if
13 they are responsible for the deficiency, shall be theirs. If they are not responsible, any cost
14 recovery for retesting costs shall be negotiated with the GC.
- 15 b. For a deficiency identified, not related to any construction checklist or start-up fault, the
16 following shall apply: The CxA and CM will direct the retesting of the equipment once at no
17 "charge" to the GC for their time. However, the CxA's and CM's time for a second retest
18 will be charged to the GC, who may choose to recover costs from the responsible Sub.
- 19 c. The time for the CxA and CM to direct any retesting required because a specific
20 construction checklist or start-up test item, reported to have been successfully completed,
21 but determined during functional testing to be faulty, will be backcharged to the GC, who
22 may choose to recover costs from the party responsible for executing the faulty
23 installation or test.
- 24 d. The Contractor shall respond in writing to the CxA and CM at least as often as Cx meetings
25 are being scheduled concerning the status of each apparent outstanding discrepancy
26 identified during Cx. Discussion shall cover explanations of any disagreements and
27 proposals for their resolution.
- 28 e. The CxA retains the original non-conformance forms until the end of the project.
- 29 f. Failure Due to Manufacturer Defect. If 10%, or three, whichever is greater, of identical
30 pieces (size alone does not constitute a difference) of equipment fail to perform to the
31 Contract Documents (mechanically or substantively) due to manufacturing defect, not
32 allowing it to meet its submitted performance spec, all identical units may be considered
33 unacceptable by the CM or PM. In such case, the Contractor shall provide the Owner with
34 the following:
- 35 g. Within one week of notification from the CM or PM, the Contractor or manufacturer's
36 representative shall examine all other identical units making a record of the findings. The
37 findings shall be provided to the CM or PM within two weeks of the original notice.
- 38 h. Within two weeks of the original notification, the Contractor or manufacturer shall provide
39 a signed and dated, written explanation of the problem, cause of failures, etc. and all
40 proposed solutions which shall include full equipment submittals. The proposed solutions
41 shall not significantly exceed the specification requirements of the original installation. The
42 CM or PM will determine whether a replacement of all identical units or a repair is
43 acceptable.
- 44 i. Two examples of the proposed solution will be installed by the Contractor and the CM will
45 be allowed to test the installations for up to one week, upon which the CM or PM will
46 decide whether to accept the solution.
- 47 j. Upon acceptance, the Contractor and/or manufacturer shall replace or repair all identical
48 items, at their expense and extend the warranty accordingly, if the original equipment
49 warranty had begun. The replacement/repair work shall proceed with reasonable speed
50 beginning within one week from when parts can be obtained.
- 51 E. Approval. The CxA notes each satisfactorily demonstrated function on the test form. Formal approval of the
52 functional test is made later after review by the CxA and by the CM, if necessary. The CxA recommends
53 acceptance of each test to the CM using a standard form. The CM gives final approval on each test using the
54 same form, providing a signed copy to the CxA and the Contractor.
- 55

18 3.5 DDC TRENDS 3

PART 1 – GENERAL

1.1 SUMMARY

A. Purpose: This section includes general requirements that apply to implementation of measurement and verification.

B. RELATED WORK AND REQUIREMENTS

1. Section 01 31 13 Project Coordination
2. Section 01 31 19 Project Meetings
3. Section 01 31 23 Project Management Web Site
4. Section 01 91 00 Commissioning
5. Section 23 09 00 Instrumentation and Control for HVAC
6. Section 23 09 23 Direct Digital Control (DDC) System for HVAC
7. Section 23 09 93 Sequence of Operations for HVAC DDC
8. Section 26 24 13 Switchboards
9. Section 26 24 16 Panelboards

1.2 DEFINITIONS

- A. BAS - Building Automation System
- B. DHW - Domestic Hot Water
- C. M&V - Measurement and Verification
- D. kW - Electric power read from utility meter
- E. KWh - Electric energy consumption read from utility meter
- F. Plug Loads – Electric power and consumption from wall receptacles

1.3 MECHANICAL CONTRACTOR RESPONSIBILITIES

A. Contractor shall assign representatives with expertise and authority to act on its behalf and shall schedule them to participate in and perform M&V activities including, but not limited to, the following:

1. Follow activities identified in the M&V Plan.
2. Coordinate connection of gas and DHW monitoring equipment with BAS.
3. Cooperate with the M&V Provider and Controls Contractor for resolution of issues related to data collection.
4. Attend team meetings during construction and post-construction M&V period (1 year).

1.4 ELECTRICAL CONTRACTOR RESPONSIBILITIES

A. Contractor shall assign representatives with expertise and authority to act on its behalf and shall schedule them to participate in and perform M&V activities including, but not limited to, the following:

1. Follow activities identified in the M&V Plan.
2. Coordinate connection of electrical monitoring equipment with BAS

3. Cooperate with the M&V Provider and Controls Contractor for resolution of issues related to data collection.
4. Attend team meetings during construction and post-construction M&V period (1 year).

1.5 CONTROLS CONTRACTOR RESPONSIBILITIES

- A. Contractor shall assign representatives with expertise and authority to act on its behalf and shall schedule them to participate in and perform M&V activities including, but not limited to, the following:
 1. Follow activities identified in the M&V Plan.
 2. Coordinate connection of electrical, gas, and DHW monitoring equipment with BAS
 3. Cooperate with the M&V Provider Mechanical Contractor and Electrical Contractor for resolution of issues related to establishing connection between BAS and monitoring meters and equipment.
 4. Attend team meetings during construction and post-construction M&V period (1 year).

1.6 M&V PROVIDERS RESPONSIBILITIES

- A. Providers responsibilities include:
 1. Organize and lead the M&V team.
 2. Provide M&V plan.
 3. Convene M&V meetings as needed.
 4. Cooperate with the Mechanical Contractor, Electrical Contractor, and Controls Contractor for resolution of issues related to establishing connection between BAS and monitoring meters and equipment.
 5. Provide an M&V report at 1 year post construction.

PART 2 – PRODUCTS – THIS SECTION NOT USED

2.1 METERS AND SUB-METERS

- A. Monitoring meters and sub-meters, both gas and electric, to have the ability to connect to the BAS and provide data to BAS at a minimum of 15 minute intervals. It is acceptable to use the utility for this purpose if allowable by utility company.

PART 3 - EXECUTION

3.1 METER

- A. Provide real-time monitoring of the whole building electricity kW and kWh use by using a signal from the building utility meter serving the HVAC, lighting, and plug loads and provide the data input to the Building Automation System (BAS). The BAS must be capable of trending this kW and kWh data. Data is to be collected in 15 minute intervals. Storage of at least 3 months of 15 minute data is required on the BAS. Data older than 3 months is to be automatically saved and archived on the BAS computer without being overwritten. Data older than 5 years can be overwritten. It is the responsibility of the electrical contractor to coordinate this work.

3.2 NATURAL GAS

- A. Provide real-time monitoring of whole building natural gas consumption by using a signal from the building utility meter to provide the data input to the BAS. The BAS must be capable of trending gas consumption. Data is to be collected in 15 minute intervals. Storage of at least 3 months of 15 minute data is required on the BAS. Data older than 3 months is to be automatically saved and archived on the BAS computer without being overwritten. Data older than 5 years can be overwritten. It is the responsibility of the mechanical contractor to coordinate this work.

3.3 DOMESTIC HOT WATER

- A. Provide real-time monitoring of the domestic hot water (DHW) system by measuring water flow to DHW heater and DHW supply and return temperatures and providing data input to the BAS. The BAS must be capable of trending gas consumption. Data is to be collected in 15 minute intervals. Storage of at least 3 months of 15 minute data is required on the BAS. Data older than 3 months is to be automatically saved and archived on the BAS computer without being overwritten. Data older than 5 years can be overwritten. It is the responsibility of the mechanical contractor to coordinate this work.

- 1 **3.4 TEMPORARY MONITORING**
2 A. Provide easy access to allow for the temporary installation of split-core current sensors and voltage sensors for
3 the electrical measurement and datalogging on the following systems:
4 1. Lighting
5 2. Plug loads
6 3. HVAC equipment including chillers, fans, circulation pumps, and air handling units
7 4. DHW equipment
8

- 9 **3.5 DDC TRENDS**
10 A. The Controls Contractor is to provide provision for remote access to BAS to view status of building and the ability
11 to download trendable points.
12

51 PART 1 - GENERAL

52 1.1 RELATED DOCUMENTS

- 53 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 54 Division 01 Specification Sections, apply to this Section.

55 **1.2 SUMMARY**

- 56 A. Section includes cast-in-place concrete, including formwork, reinforcement, concrete materials, mixture
57 design, placement procedures, and finishes for the following:
58 1. Footings.
59 2. Foundation walls.
60 3. Slabs-on-grade.
61 4. Suspended slabs.
62 5. Concrete toppings.
63 6. Building frame members.
64 7. Building walls.
65 B. Related Requirements:
66 1. Section 03 38 16 "Unbonded Post-Tensioned Concrete".
67 2. Section 31 20 00 "Earth Moving" for drainage fill under slabs-on-grade.

68 **1.3 DEFINITIONS**

- 69 A. Cementitious Materials: Portland cement alone or in combination with one or more of the following: blended
70 hydraulic cement, fly ash, slag cement, other pozzolans, and silica fume; materials subject to compliance
71 with requirements.
72 B. W/C Ratio: The ratio by weight of water to cementitious materials.

73 **1.4 PREINSTALLATION MEETINGS**

- 74 A. Preinstallation Conference: Conduct conference at Project site.
75 1. Before submitting design mixtures, review concrete design mixture and examine procedures for
76 ensuring quality of concrete materials. Require representatives of each entity directly concerned with
77 cast-in-place concrete to attend, including the following:
78 a. Contractor's superintendent.
79 b. Independent testing agency responsible for concrete design mixtures.
80 c. Ready-mix concrete manufacturer.
81 d. Concrete Subcontractor.
82 e. Special concrete finish Subcontractor.
83 2. Review special inspection and testing and inspecting agency procedures for field quality control, early
84 strength determination procedures, concrete finishes and finishing, cold- and hot-weather concreting
85 procedures, curing procedures, construction contraction and isolation joints, and joint-filler strips,
86 semirigid joint fillers, forms and form removal limitations, shoring and reshoring procedures, vapor-
87 retarder installation, anchor rod and anchorage device installation tolerances, steel reinforcement
88 installation, methods for achieving specified floor and slab flatness and levelness floor and slab
89 flatness and levelness measurement, concrete repair procedures, and concrete protection.
90 3. Hold a pre-construction conference two weeks prior to first placement of low shrinkage concrete.
91 Agenda for meeting shall include concrete handling, placing, finishing, curing, and optimum working
92 conditions to coordinate this work with related and adjacent work.

93 **1.5 ACTION SUBMITTALS**

- 94 A. Product Data: For each type of product.
95 B. Sustainable Design Submittals:
96 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
97 cost.
98 2. Product Certificates: For regional materials, indicating location of material manufacturer and point of
99 extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each
100 regional material.
101 3. Laboratory Test Reports: For liquid floor treatment and curing and sealing compounds, indicating
102 compliance with requirements for low-emitting materials.
103 C. Design Mixtures: Prior to beginning the work and within 14 days of the notice to proceed, the Contractor
104 shall submit to the Engineer, for review, previous independent laboratory generated data detailing
105 performance (measures of performance as defined below) of the proposed mix design. Contractor shall also
106 provide certification that materials used and their proportions are to be essentially unchanged from the
107 mixture for which the data was generated. If independent laboratory data is not available, the proposed mix
108 design shall be checked by an independent laboratory acceptable to the Engineer. All costs related to such
109 testing shall be borne by the Contractor. Since laboratory trial batches require 35 calendar days to complete,

- 110 the Contractor may consider testing more than one mix design for each class of concrete. Include the
111 following information for each mix design:
112 1. Water / cementitious materials ratio.
113 2. Slump as per ASTM C 143
114 3. Air content as per ASTM C 231 (pressure method), or ASTM C 173 (volumetric method)
115 4. Unit weight of concrete as per ASTM C 138
116 5. Compressive strength at 3, 7, and 28 days per ASTM C 39
117 6. Shrinkage (length change) as measured in accordance with section 1.8.B of this specification
118 D. Design Mixtures: For each concrete mixture. Submit alternate design mixtures when characteristics of
119 materials, Project conditions, weather, test results, or other circumstances warrant adjustments.
120 1. Indicate amounts of mixing water to be withheld for later addition at Project site.
121 E. Steel Reinforcement Shop Drawings: Placing Drawings that detail fabrication, bending, and placement.
122 Include bar sizes, lengths, material, grade, bar schedules, stirrup spacing, bent bar diagrams, bar
123 arrangement, splices and laps, mechanical connections, tie spacing, hoop spacing, and supports for
124 concrete reinforcement.
125 F. Construction Joint Layout: Indicate proposed construction joints required to construct the structure.
126 1. Location of construction joints is subject to approval of the Architect.
127 G. Coordinated slab opening/embedded utilities shop drawings: placing drawings that dimension all slab
128 openings, box-outs, and sleeves required by other trades, and size and locate all embedded elements not
129 specified on the structural drawings.

130 **1.6 INFORMATIONAL SUBMITTALS**

- 131 A. Qualification Data: For installer and manufacturer.
132 B. Welding certificates.
133 C. Material Certificates: For each of the following, signed by manufacturers:
134 1. Cementitious materials.
135 2. Admixtures.
136 3. Form materials and form-release agents.
137 4. Steel reinforcement and accessories.
138 5. Fiber reinforcement.
139 6. Waterstops.
140 7. Curing compounds.
141 8. Floor and slab treatments.
142 9. Bonding agents.
143 10. Adhesives.
144 11. Vapor retarders.
145 12. Semirigid joint filler.
146 13. Joint-filler strips.
147 14. Repair materials.
148 D. Material Test Reports: For the following, from a qualified testing agency:
149 1. Aggregates: Include service record data indicating absence of deleterious expansion of concrete due
150 to alkali aggregate reactivity.
151 E. Formwork Shop Drawings: Prepared by or under the supervision of a qualified professional engineer,
152 detailing fabrication, assembly, and support of formwork.
153 1. Shoring and Reshoring: Indicate proposed schedule and sequence of stripping formwork, shoring
154 removal, and reshoring installation and removal.
155 F. Floor surface flatness and levelness measurements indicating compliance with specified tolerances.
156 G. Field quality-control reports.
157 H. Minutes of preinstallation conference.

158 **1.7 QUALITY ASSURANCE**

- 159 A. Installer Qualifications: A qualified installer who employs on Project personnel qualified as ACI-certified
160 Flatwork Technician and Finisher and a supervisor who is an ACI-certified Concrete Flatwork Technician.
161 B. Manufacturer Qualifications: A firm experienced in manufacturing ready-mixed concrete products and that
162 complies with ASTM C 94/C 94M requirements for production facilities and equipment.
163 1. Manufacturer certified according to NRMCA's "Certification of Ready Mixed Concrete Production
164 Facilities."
165 C. Testing Agency Qualifications: An independent agency, qualified according to ASTM C 1077 and
166 ASTM E 329 for testing indicated.

- 167 1. Personnel conducting field tests shall be qualified as ACI Concrete Field Testing Technician,
168 Grade 1, according to ACI CP-1 or an equivalent certification program.
169 2. Personnel performing laboratory tests shall be ACI-certified Concrete Strength Testing Technician
170 and Concrete Laboratory Testing Technician, Grade I. Testing agency laboratory supervisor shall be
171 an ACI-certified Concrete Laboratory Testing Technician, Grade II.
172 D. Source Limitations: Obtain each type or class of cementitious material of the same brand from the same
173 manufacturer's plant, obtain aggregate from single source, and obtain admixtures from single source from
174 single manufacturer.
175 E. Welding Qualifications: Qualify procedures and personnel according to AWS D1.4/D 1.4M.
176 F. Mockups: Cast concrete slab-on-grade and formed-surface panels to demonstrate typical joints, surface
177 finish, texture, tolerances, floor treatments, and standard of workmanship.
178 1. Build panel approximately 200 sq. ft. for slab-on-grade and 100 sq. ft. for formed surface in the
179 location indicated or, if not indicated, as directed by Architect.
180 2. Subject to compliance with requirements, approved mockups may become part of the completed
181 Work if undisturbed at time of Substantial Completion.
182 G. Manufacturer's Representative: A representative of the admixture manufacturer shall be present during initial
183 concrete placement. Engineer may waive requirement for manufacturer's representative if Contractor
184 provides sufficient evidence that Producer and Finisher have adequate experience with admixtures required.

185 **1.8 PRECONSTRUCTION TESTING**

- 186 A. Preconstruction Testing Service: Engage a qualified testing agency to perform preconstruction testing on
187 concrete mixtures.
188 B. Shrinkage Testing Procedure: Testing and reporting shall conform to ASTM C 157-93 with the following
189 modifications:
190 1. Wet cure specimens for a period of 7 days (including the period of time the specimens are in the
191 mold). Wet cure may be achieved either through storage in a moist cabinet or room in accordance
192 with ASTM C 511, or through storage in lime saturated water.
193 2. Slump of concrete for testing shall match job requirements and need not be limited to restrictions as
194 stated in ASTM C 157 section 7.4.
195 3. Report results in accordance with ASTM C 157 at 0, 7, 14 & 28 days of drying.

196 **1.9 DELIVERY, STORAGE, AND HANDLING**

- 197 A. Steel Reinforcement: Deliver, store, and handle steel reinforcement to prevent bending and damage. Avoid
198 damaging coatings on steel reinforcement.
199 B. Waterstops: Store waterstops under cover to protect from moisture, sunlight, dirt, oil, and other
200 contaminants.

201 **1.10 FIELD CONDITIONS**

- 202 A. Cold-Weather Placement: Comply with ACI 306.1 and as follows. Protect concrete work from physical
203 damage or reduced strength that could be caused by frost, freezing actions, or low temperatures.
204 1. When average high and low temperature is expected to fall below 40 deg F for three successive
205 days, maintain delivered concrete mixture temperature within the temperature range required by ACI
206 301.
207 2. Do not use frozen materials or materials containing ice or snow. Do not place concrete on frozen
208 subgrade or on subgrade containing frozen materials.
209 3. Do not use calcium chloride, salt, or other materials containing antifreeze agents or chemical
210 accelerators unless otherwise specified and approved in mixture designs.
211 B. Hot-Weather Placement: Comply with ACI 301 and as follows:
212 1. Maintain concrete temperature below 95 deg F at time of placement. Chilled mixing water or chopped
213 ice may be used to control temperature, provided water equivalent of ice is calculated to total amount
214 of mixing water. Using liquid nitrogen to cool concrete is Contractor's option.
215 2. Fog-spray forms, steel reinforcement, and subgrade just before placing concrete. Keep subgrade
216 uniformly moist without standing water, soft spots, or dry areas.

217 **PART 2 - PRODUCTS**

218 **2.1 CONCRETE, GENERAL**

- 219 A. ACI Publications: Comply with the following unless modified by requirements in the Contract Documents:
220 1. ACI 301.
221 2. ACI 117.

222 **2.2 FORM-FACING MATERIALS**

- 223 A. Smooth-Formed Finished Concrete: Form-facing panels that provide continuous, true, and smooth concrete
224 surfaces. Furnish in largest practicable sizes to minimize number of joints.
225 1. Plywood, metal, or other approved panel materials.
226 2. Exterior-grade plywood panels, suitable for concrete forms, complying with DOC PS 1, and as
227 follows:
228 a. High-density overlay, Class 1 or better.
229 b. Medium-density overlay, Class 1 or better; mill-release agent treated and edge sealed.
230 c. Structural 1, B-B or better; mill oiled and edge sealed.
231 d. B-B (Concrete Form), Class 1 or better; mill oiled and edge sealed.
232 B. Rough-Formed Finished Concrete: Plywood, lumber, metal, or another approved material. Provide lumber
233 dressed on at least two edges and one side for tight fit.
234 C. Forms for Cylindrical Columns, Pedestals, and Supports: Metal, glass-fiber-reinforced plastic, paper, or fiber
235 tubes that produce surfaces with gradual or abrupt irregularities not exceeding specified formwork surface
236 class. Provide units with sufficient wall thickness to resist plastic concrete loads without detrimental
237 deformation.
238 D. Pan-Type Forms: Glass-fiber-reinforced plastic or formed steel, stiffened to resist plastic concrete loads
239 without detrimental deformation.
240 E. Chamfer Strips: Wood, metal, PVC, or rubber strips, 3/4 by 3/4 inch, minimum.
241 F. Form-Release Agent: Commercially formulated form-release agent that does not bond with, stain, or
242 adversely affect concrete surfaces and does not impair subsequent treatments of concrete surfaces.
243 1. Formulate form-release agent with rust inhibitor for steel form-facing materials.
244 G. Form Ties: Factory-fabricated, removable or snap-off glass-fiber-reinforced plastic or metal form ties
245 designed to resist lateral pressure of fresh concrete on forms and to prevent spalling of concrete on removal.
246 1. Furnish units that leave no corrodible metal closer than 1 inch to the plane of exposed concrete
247 surface.
248 2. Furnish ties that, when removed, leave holes no larger than 1 inch in diameter in concrete surface.
249 3. Furnish ties with integral water-barrier plates to walls indicated to receive dampproofing or
250 waterproofing.

251 **2.3 STEEL REINFORCEMENT**

- 252 A. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled
253 content not less than 25 percent.
254 B. Reinforcing Bars: ASTM A 615, Grade 60, deformed.
255 C. Low-Alloy-Steel Reinforcing Bars: ASTM A 706, deformed.
256 D. Epoxy-Coated Reinforcing Bars: ASTM A 615, Grade 60, deformed bars, ASTM A 775 or ASTM A 934,
257 epoxy coated, with less than 2 percent damaged coating in each 12-inch bar length.
258 E. Epoxy-Coated Wire: ASTM A 884, Class A, Type 1 coated, as-drawn, plain steel wire, with less than 2
259 percent damaged coating in each 12-inch wire length.
260 F. Epoxy-Coated Welded-Wire Reinforcement: ASTM A 884, Class A coated, Type 1, plain and deformed
261 steel.
262 G. Headed Shear Stud Reinforcement: ASTM A 1044.

263 **2.4 REINFORCEMENT ACCESSORIES**

- 264 A. Epoxy-Coated Joint Dowel Bars: ASTM A 615, Grade 60, plain-steel bars, ASTM A 775 epoxy coated.
265 B. Epoxy Repair Coating: Liquid, two-part, epoxy repair coating; compatible with epoxy coating on
266 reinforcement and complying with ASTM A 775.
267 C. Bar Supports: Bolsters, chairs, spacers, and other devices for spacing, supporting, and fastening reinforcing
268 bars and welded-wire reinforcement in place. Manufacture bar supports from steel wire, plastic, or precast
269 concrete according to CRSI's "Manual of Standard Practice," of greater compressive strength than concrete
270 and as follows:

- 271 1. For concrete surfaces exposed to view, where legs of wire bar supports contact forms, use CRSI
272 Class 1 plastic-protected steel wire or CRSI Class 2 stainless-steel bar supports.
273 2. For epoxy-coated reinforcement, use epoxy-coated or other dielectric-polymer-coated wire bar
274 supports.

275 **2.5 CONCRETE MATERIALS**

- 276 A. Regional Materials: Concrete shall be manufactured within 500 miles of Project site.
277 B. Source Limitations: Obtain each type or class of cementitious material of the same brand from the same
278 manufacturer's plant, obtain aggregate from single source, and obtain admixtures from single source from
279 single manufacturer.
280 C. Cementitious Materials:
281 1. Portland Cement: ASTM C 150/C 150M, Type I.
282 2. Fly Ash: ASTM C 618, Class F or C.
283 3. Slag Cement: ASTM C 989, Grade 100 or 120.
284 4. Silica Fume: ASTM C 1240, amorphous silica.
285 D. Normal-Weight Aggregates: ASTM C 33, Class 3S coarse aggregate or better, graded. Provide aggregates
286 from a single source with documented service record data of at least 10 years' satisfactory service in similar
287 applications and service conditions using similar aggregates and cementitious materials.
288 1. Maximum Coarse-Aggregate Size: 3/4 inch nominal.
289 2. Fine Aggregate: Free of materials with deleterious reactivity to alkali in cement.
290 E. Air-Entraining Admixture: ASTM C 260.
291 F. Chemical Admixtures: Certified by manufacturer to be compatible with other admixtures and that do not
292 contribute water-soluble chloride ions exceeding those permitted in hardened concrete. Do not use calcium
293 chloride or admixtures containing calcium chloride.
294 1. Water-Reducing Admixture: ASTM C 494/C 494M, Type A.
295 2. Retarding Admixture: ASTM C 494/C 494M, Type B.
296 3. Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type D.
297 4. High-Range, Water-Reducing Admixture: ASTM C 494/C 494M, Type F.
298 5. High-Range, Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type G.
299 6. Plasticizing and Retarding Admixture: ASTM C 1017/C 1017M, Type II.
300 G. Shrinkage Reducing Admixture (SRA): ASTM WK23938, with testing per section 1.8.B of this specification
301 (ASTM C 157 and ASTM C 511.)
302 1. Products: Subject to compliance with requirements, available products that may be incorporated into
303 the Work include, but are not limited to the following:
304 a. GCP Applied Technologies (formerly W.R. Grace & Co.) Eclipse 4500
305 H. Set-Accelerating Corrosion-Inhibiting Admixture: Commercially formulated, anodic inhibitor or mixed
306 cathodic and anodic inhibitor; capable of forming a protective barrier and minimizing chloride reactions with
307 steel reinforcement in concrete and complying with ASTM C 494/C 494M, Type C.
308 1. Products: Subject to compliance with requirements, available products that may be incorporated into
309 the Work include, but are not limited to the following:
310 a. BASF Corporation; Construction Systems; MasterLife CI 30
311 b. Euclid Chemical Company (The); an RPM company; EUCON BCN or EUCON CIA.
312 c. GCP Applied Technologies (formerly W.R. Grace & Co.); DCI.
313 d. Sika Corporation; Sika CNI.
314 I. Non-Set-Accelerating Corrosion-Inhibiting Admixture: Commercially formulated, non-set-accelerating,
315 anodic inhibitor or mixed cathodic and anodic inhibitor; capable of forming a protective barrier and minimizing
316 chloride reactions with steel reinforcement in concrete.
317 1. Products: Subject to compliance with requirements, available products that may be incorporated into
318 the Work include, but are not limited to the following:
319 a. BASF Corporation; Construction Systems; MasterLife CI 222.
320 b. GCP Applied Technologies (formerly W.R. Grace & Co.); DCI-S.
321 J. Water: ASTM C 94/C 94M and potable.

322 **2.6 FIBER REINFORCEMENT**

- 323 A. Synthetic Macro-Fiber: Polyolefin macro-fibers engineered and designed for use in concrete, complying with
324 ASTM C 1116/C 1116M, Type III, 1 to 2-1/4 inches long.
325 1. Products: Subject to compliance with requirements, available products that may be incorporated into
326 the Work include, but are not limited to the following:
327 a. Euclid Chemical Company (The); an RPM company; [Tuf-Strand Max Ten][Tuf-Strand SF].

- 328 b. FORTA Corporation; FORTA FERRO.
- 329 c. Grace Construction Products; W.R. Grace & Co. -- Conn.; Strux 90/40.
- 330 d. Nycon, Inc.; [Nycon-XL][Nycon-XL-100][Nycon-XL-200][Nycon-XL-Plus].
- 331 e. Propex Operating Company, LLC; [Enduro 600][Fibermesh 650].
- 332 f. Sika Corporation; [Sika Fiber MS][Sika Fiber MS10].

333 2.7 WATERSTOPS

- 334 A. Flexible PVC Waterstops: CE CRD-C 572, with factory-installed metal eyelets for embedding in concrete to
- 335 prevent passage of fluids through joints. Factory fabricate corners, intersections, and directional changes.
- 336 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
- 337 that may be incorporated into the Work include, but are not limited to the following:
- 338 a. BoMetals, Inc.
- 339 b. Paul Murphy Plastics Company.
- 340 c. Sika Greenstreak.
- 341 d. Vinylex Waterstop & Accessories.
- 342 2. Profile: Ribbed with center bulb.
- 343 3. Dimensions: 6 inches by 3/8 inch thick; nontapered.
- 344 B. Self-Expanding Butyl Strip Waterstops: Manufactured rectangular or trapezoidal strip, butyl rubber with
- 345 sodium bentonite or other hydrophilic polymers, for adhesive bonding to concrete, 3/4 by 1 inch.
- 346 1. Products: Subject to compliance with requirements, available products that may be incorporated into
- 347 the Work include, but are not limited to the following:
- 348 a. Barrier-Bac; Inteplast Group, Ltd.; Waterstop.
- 349 b. Carlisle Coatings & Waterproofing Inc; MiraSTOP.
- 350 c. CETCO, a Minerals Technologies company; Waterstop-RX-101.
- 351 d. Concrete Sealants Inc.; Conseal CS-231.
- 352 e. Henry Company, Sealants Division; Hydro-Flex.
- 353 f. JP Specialties, Inc.; Earth Shield Type 20.
- 354 g. Sika Greenstreak; Swellstop.

355 2.8 VAPOR RETARDERS

- 356 A. Sheet Vapor Retarder: ASTM E 1745, Class C[, except with maximum water-vapor permeance of <Insert
- 357 rating>]. Include manufacturer's recommended adhesive or pressure-sensitive joint tape.
- 358 1. Products: Subject to compliance with requirements, available products that may be incorporated into
- 359 the Work include, but are not limited to the following:
- 360 a. Insulation Solutions, Inc.; Viper VaporCheck II 10 mil.
- 361 b. Raven Industries, Inc; Vapor Block VB6.
- 362 c. Reef Industries, Inc; Griffolyn Type-65.
- 363 d. Stego Industries, LLC; Stego Wrap, 10 mil Class C.
- 364 e. Tex-Trude, Inc.; Xtreme 10 mil Class C.
- 365 B. Granular Fill: Clean mixture of crushed stone or crushed or uncrushed gravel; ASTM D 448, Size 57, with
- 366 100 percent passing a 1-1/2-inch sieve and 0 to 5 percent passing a No. 8 sieve.
- 367 C. Fine-Graded Granular Material: Clean mixture of crushed stone, crushed gravel, and manufactured or
- 368 natural sand; ASTM D 448, Size 10, with 100 percent passing a 3/8-inch sieve, 10 to 30 percent passing a
- 369 No. 100 sieve, and at least 5 percent passing No. 200 sieve; complying with deleterious substance limits of
- 370 ASTM C 33 for fine aggregates.

371 2.9 LIQUID FLOOR TREATMENTS

- 372 A. Penetrating Liquid Floor Treatment: Clear, chemically reactive, waterborne solution of inorganic silicate or
- 373 silicate materials and proprietary components; odorless; that penetrates, hardens, and densifies concrete
- 374 surfaces.
- 375 1. Products: Subject to compliance with requirements, available products that may be incorporated into
- 376 the Work include, but are not limited to the following:
- 377 a. AWRC Corporation; AMERI-SHIELD Shield-Proof.
- 378 b. BASF Corporation; Construction Systems; [MasterKure HD 200 WB (Pre-2014: Kure-N-
- 379 Harden)][MasterKure HD 300 WB (Pre-2014: Lapidolith)].
- 380 c. ChemMasters, Inc; Chemisil Plus.
- 381 d. ChemTec Int'l; ChemTec One.
- 382 e. Curecrete Distribution Inc.; Ashford Formula.

- 383 f. Dayton Superior; [Pentra-Hard Densifier][Pentra-Hard Finish][Pentra-Hard Guard][Sure Hard
384 Densifier J17].
385 g. Euclid Chemical Company (The); an RPM company; [Euco Diamond Hard][EucoSil].
386 h. Kaufman Products, Inc; SureHard.
387 i. L&M Construction Chemicals, Inc; Seal Hard.
388 j. Metalcrete Industries; Floorsaver.
389 k. NewLook International, Inc.; Drivehard Pro.
390 l. Nox-Crete Products Group; Duro-Nox.
391 m. PROSOCO, Inc; Consolideck LS.
392 n. SpecChem, LLC; SpecHard.
393 o. US SPEC, Division of US MIX Company; US SPEC Industraseal.
394 p. Vexcon Chemicals Inc.; Vexcon StarSeal PS Clear.
395 q. W. R. Meadows, Inc; [INTRAGUARD][LIQUI-HARD].
396 2. Products shall comply with the requirements of the California Department of Public Health's
397 "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor
398 Sources Using Environmental Chambers."

399 **2.10 CURING MATERIALS**

- 400 A. Evaporation Retarder: Waterborne, monomolecular film forming, manufactured for application to fresh
401 concrete.
402 1. Products: Subject to compliance with requirements, available products that may be incorporated into
403 the Work include, but are not limited to the following:
404 a. BASF Corporation; Construction Systems; Confilm.
405 b. Bon Tool Co.; 32-301-B7 BonWay Evaporation Retarder.
406 c. Brickform; a division of Solomon Colors; Evaporation Retarder.
407 d. ChemMasters, Inc; Spray-Film.
408 e. Dayton Superior; [AquaFilm Concentrate J74][AquaFilm J74RTU].
409 f. Euclid Chemical Company (The); an RPM company; Eucobar.
410 g. Kaufman Products, Inc; VaporAid.
411 h. L&M Construction Chemicals, Inc; E-CON.
412 i. Lambert Corporation; LAMBCO Skin.
413 j. Metalcrete Industries; Waterhold.
414 k. Nox-Crete Products Group; MONOFILM.
415 l. Sika Corporation; [Caltexol CIMFILM][SikaFilm].
416 m. SpecChem, LLC; Spec Film.
417 n. TK Products; TK-2120 TRI-FILM.
418 o. Vexcon Chemicals Inc.; Certi-Vex EnvioAssist.
419 p. W. R. Meadows, Inc; EVAPRE.
420 B. Absorptive Cover: AASHTO M 182, Class 2, burlap cloth made from jute or kenaf, weighing approximately
421 9 oz./sq. yd. when dry.
422 C. Moisture-Retaining Cover: ASTM C 171, polyethylene film or white burlap-polyethylene sheet.
423 D. Water: Potable.
424 E. Clear, Waterborne, Membrane-Forming Curing Compound: ASTM C 309, Type 1, Class B, dissipating.
425 1. Products: Subject to compliance with requirements, available products that may be incorporated into
426 the Work include, but are not limited to the following:
427 a. Anti-Hydro International, Inc; A-H Curing Compound #2 DR WB.
428 b. BASF Corporation; Construction Systems; [MasterKure CC 160 WB (Pre-2014: Kure N Seal
429 WB)][MasterKure CC 180 WB (Pre-2014: Kure N Seal VOC)][MasterKure CC 200 WB (Pre-
430 2014: Kure N Seal W)].
431 c. ChemMasters, Inc; Safe-Cure Clear DR.
432 d. Dayton Superior; [Clear Cure VOC J7WB][Clear Resin Cure J11W].
433 e. Euclid Chemical Company (The); an RPM company; [Aqua-Cure VOX][Diamond Clear
434 VOX][Kurez DR VOX].
435 f. Kaufman Products, Inc; [DR Cure][Thinfil 420].
436 g. L&M Construction Chemicals, Inc; L&M CURE R.
437 h. Lambert Corporation; AQUA KURE - CLEAR.
438 i. Nox-Crete Products Group; [Res-Cure DH][Res-Cure DS][Resin Cure E].
439 j. Right Pointe; Clear Water Resin.
440 k. SpecChem, LLC; [PaveCure Rez][SpecRez].

- 441 I. TK Products; TK-2519 DC WB.
442 m. Vexcon Chemicals Inc.; Certi-Vex Enviocure 100.
443 n. W. R. Meadows, Inc; 1100-CLEAR SERIES.
444 F. Clear, Waterborne, Membrane-Forming Curing and Sealing Compound: ASTM C 1315, Type 1, Class A.
445 1. Products: Subject to compliance with requirements, available products that may be incorporated into
446 the Work include, but are not limited to the following:
447 a. AWRC Corporation; [AMERI-SHIELD Shield-Sheen WB 25][AMERI-SHIELD Shield-Sheen
448 WB 30].
449 b. BASF Corporation; Construction Systems; <Insert product designation>.
450 c. ChemMasters, Inc; Polyseal WB.
451 d. Dayton Superior; [Cure & Seal 1315 EF][Cure & Seal 1315 J22WB].
452 e. Euclid Chemical Company (The); an RPM company; Super Diamond Clear VOX.
453 f. Kaufman Products, Inc; [Krystal 25 Emulsion][Krystal 25 OTC].
454 g. L&M Construction Chemicals, Inc; Lumiseal WB Plus.
455 h. Lambert Corporation; UV Safe Seal.
456 i. Metalcrete Industries; Metcure 30.
457 j. Right Pointe; Right Sheen WB30.
458 k. SpecChem, LLC; Cure & Seal WB 25.
459 l. TK Products; Bright Kure & Seal 1315 VOC.
460 m. Vexcon Chemicals Inc.; Vexcon Starseal 1315.
461 n. W. R. Meadows, Inc; Vocomp-30.
462 2. Products shall comply with the requirements of the California Department of Public Health's
463 "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor
464 Sources Using Environmental Chambers."

465 **2.11 RELATED MATERIALS**

- 466 A. Expansion- and Isolation-Joint-Filler Strips: ASTM D 1751, asphalt-saturated cellulosic fiber.
467 B. Semirigid Joint Filler: Two-component, semirigid, 100 percent solids, epoxy resin with a Type A shore
468 durometer hardness of 80 according to ASTM D 2240.
469 C. Bonding Agent: ASTM C 1059/C 1059M, Type II, nonredispersible, acrylic emulsion or styrene butadiene.
470 D. Epoxy Bonding Adhesive: ASTM C 881, two-component epoxy resin, capable of humid curing and bonding
471 to damp surfaces, of class suitable for application temperature and of grade to suit requirements, and as
472 follows:
473 1. Types IV and V, load bearing, for bonding hardened or freshly mixed concrete to hardened concrete.
474 E. Reglets: Fabricate reglets of not less than 0.022-inch-thick, galvanized-steel sheet. Temporarily fill or cover
475 face opening of reglet to prevent intrusion of concrete or debris.
476 F. Dovetail Anchor Slots: Hot-dip galvanized-steel sheet, not less than 0.034 inch thick, with bent tab anchors.
477 Temporarily fill or cover face opening of slots to prevent intrusion of concrete or debris.

478 **2.12 REPAIR MATERIALS**

- 479 A. Repair Underlayment: Cement-based, polymer-modified, self-leveling product that can be applied in
480 thicknesses from 1/8 inch and that can be feathered at edges to match adjacent floor elevations.
481 1. Cement Binder: ASTM C 150/C 150M, portland cement or hydraulic or blended hydraulic cement as
482 defined in ASTM C 219.
483 2. Primer: Product of underlayment manufacturer recommended for substrate, conditions, and
484 application.
485 3. Aggregate: Well-graded, washed gravel, 1/8 to 1/4 inch or coarse sand as recommended by
486 underlayment manufacturer.
487 4. Compressive Strength: Not less than [4100 psi] at 28 days when tested according to
488 ASTM C 109/C 109M.
489 B. Repair Overlay: Cement-based, polymer-modified, self-leveling product that can be applied in
490 thicknesses from 1/4 inch and that can be filled in over a scarified surface to match adjacent floor elevations.
491 1. Cement Binder: ASTM C 150/C 150M, portland cement or hydraulic or blended hydraulic cement as
492 defined in ASTM C 219.
493 2. Primer: Product of topping manufacturer recommended for substrate, conditions, and application.
494 3. Aggregate: Well-graded, washed gravel, 1/8 to 1/4 inch or coarse sand as recommended by topping
495 manufacturer.
496 4. Compressive Strength: Not less than 5000 psi at 28 days when tested according to
497 ASTM C 109/C 109M.

- 498 **2.13 CONCRETE MIXTURES, GENERAL**
499 A. Prepare design mixtures for each type and strength of concrete, proportioned on the basis of laboratory trial
500 mixture or field test data, or both, according to ACI 301.
501 1. Use a qualified independent testing agency for preparing and reporting proposed mixture designs
502 based on laboratory trial mixtures.
503 B. Cementitious Materials: Limit percentage, by weight, of cementitious materials other than portland cement
504 in concrete as follows:
505 1. Fly Ash: 25 percent.
506 2. Slag Cement: 25 percent.
507 3. Silica Fume: 10 percent.
508 C. Limit water-soluble, chloride-ion content in hardened concrete to 0.15 percent by weight of cement.
509 D. Admixtures: Use admixtures according to manufacturer's written instructions.
510 1. Use water-reducing high-range water-reducing or plasticizing admixture in concrete, as required, for
511 placement and workability.
512 2. Use water-reducing and -retarding admixture when required by high temperatures, low humidity, or
513 other adverse placement conditions.
514 3. Use water-reducing admixture in pumped concrete, concrete for heavy-use industrial slabs and
515 parking structure slabs, concrete required to be watertight, and concrete with a w/c ratio below 0.50.
516 4. Use shrinkage reducing admixture (SRA) in concrete, as required, to meet shrinkage requirements.
517 5. Use corrosion-inhibiting admixture in concrete mixtures where indicated.
- 518 **2.14 CONCRETE MIXTURES FOR BUILDING ELEMENTS**
519 A. Footings: Normal-weight concrete.
520 1. Minimum Compressive Strength: As indicated at 28 days.
521 2. Maximum W/C Ratio: 0.50.
522 3. Slump Limit: 5 inches, or 8 inches for concrete with verified slump of 3 to 5 inches before adding
523 high-range water-reducing admixture or plasticizing admixture, plus or minus 1 inch.
524 B. Foundation Walls: Normal-weight concrete.
525 1. Minimum Compressive Strength: As indicated at 28 days.
526 2. Maximum W/C Ratio: 0.40.
527 3. Slump Limit: 8 inches for concrete with verified slump of 2 to 4 inches before adding high-range
528 water-reducing admixture or plasticizing admixture, plus or minus 1 inch.
529 4. Air Content: 6 percent, plus or minus 1.5 percent at point of delivery for 3/4-inch nominal maximum
530 aggregate size.
531 5. Shrinkage Requirement: Concrete shall be proportioned such that the results of shrinkage test as
532 defined in section 1.8.B of this specification do not exceed 0.030 % at 28 days of drying for laboratory
533 cast specimens.
534 C. Slabs-on-Grade: Normal-weight concrete.
535 1. Minimum Compressive Strength: As indicated at 28 days.
536 2. Maximum W/C Ratio: 0.40.
537 3. Minimum Cementitious Materials Content: 520 lb/cu. yd.
538 4. Slump Limit: 5 inches, plus or minus 1 inch.
539 5. Air Content: 7.5 percent, plus or minus 1.5 percent at point of delivery for 3/4-inch nominal maximum
540 aggregate size.
541 6. Air Content: Do not allow air content of trowel-finished floors to exceed 3 percent.
542 7. Shrinkage Requirement: Concrete shall be proportioned such that the results of shrinkage test as
543 defined in section 1.8.B of this specification do not exceed 0.030 % at 28 days of drying for laboratory
544 cast specimens.
545 8. Synthetic Macro-Fiber: Uniformly disperse in concrete mixture at manufacturer's recommended rate,
546 but not less than a rate of 5 lb/cu. yd.
547 D. Suspended Slabs and Beams: Normal-weight concrete.
548 1. Minimum Compressive Strength: As indicated at 28 days.
549 2. Maximum W/C Ratio: 0.40.
550 3. Minimum Cementitious Materials Content: 540 lb/cu. yd.
551 4. Minimum 20% Fly Ash
552 5. Minimum 25% Slag Cement
553 6. Slump Limit: 5 inches, plus or minus 1 inch.
554 7. Air Content: 7.5 percent, plus or minus 1.5 percent at point of delivery for 3/4-inch nominal maximum
555 aggregate size.

- 556 8. Air Content: Do not allow air content of trowel-finished floors to exceed 3 percent.
557 9. Shrinkage Requirement: Concrete shall be proportioned such that the results of shrinkage test as
558 defined in section 1.8.B of this specification do not exceed 0.030 % at 28 days of drying for laboratory
559 cast specimens.
560 10. Synthetic Macro-Fiber: Uniformly disperse in concrete mixture at manufacturer's recommended rate,
561 but not less than a rate of 5 lb/cu. yd.
562 E. Concrete Toppings, curbs, and equipment pads: Normal-weight concrete.
563 1. Minimum Compressive Strength: 4000 psi.
564 2. Minimum Cementitious Materials Content: 540 lb/cu. yd.
565 3. Slump Limit: 4 inches, plus or minus 1 inch.
566 4. Air Content: 6 percent, plus or minus 1.5 percent at point of delivery for 3/4-inch nominal maximum
567 aggregate size.
568 5. Air Content: Do not allow air content of trowel-finished toppings to exceed 3 percent.
569 F. Columns: Normal-weight concrete.
570 1. Minimum Compressive Strength: As indicated at 28 days.
571 2. Maximum W/C Ratio: 0.40.
572 3. Slump Limit: 8 inches for concrete with verified slump of 2 to 4 inches before adding high-range
573 water-reducing admixture or plasticizing admixture, plus or minus 1 inch.
574 4. Air Content: 6 percent, plus or minus 1.5 percent at point of delivery for 3/4-inch nominal maximum
575 aggregate size.
576 G. Shear Walls and Link Beams: Normal-weight concrete.
577 1. Minimum Compressive Strength: As indicated at 28 days.
578 2. Maximum W/C Ratio: 0.40.
579 3. Slump Limit: 8 inches for concrete with verified slump of 2 to 4 inches before adding high-range
580 water-reducing admixture or plasticizing admixture, plus or minus 1 inch.
581 4. Air Content: 6 percent, plus or minus 1.5 percent at point of delivery for 3/4-inch nominal maximum
582 aggregate size.

583 **2.15 FABRICATING REINFORCEMENT**

- 584 A. Fabricate steel reinforcement according to CRSI's "Manual of Standard Practice."

585 **2.16 CONCRETE MIXING**

- 586 A. Ready-Mixed Concrete: Measure, batch, mix, and deliver concrete according to ASTM C 94/C 94M and
587 ASTM C 1116/C 1116M, and furnish batch ticket information.
588 1. When air temperature is between 85 and 90 deg F, reduce mixing and delivery time from 1-1/2 hours
589 to 75 minutes; when air temperature is above 90 deg F, reduce mixing and delivery time to 60
590 minutes.

591 **PART 3 - EXECUTION**

592 **3.1 FORMWORK INSTALLATION**

- 593 A. Design, erect, shore, brace, and maintain formwork, according to ACI 301, to support vertical, lateral, static,
594 and dynamic loads, and construction loads that might be applied, until structure can support such loads.
595 B. Construct formwork so concrete members and structures are of size, shape, alignment, elevation, and
596 position indicated, within tolerance limits of ACI 117.
597 C. Limit concrete surface irregularities, designated by ACI 347 as abrupt or gradual, as follows:
598 1. Class A, 1/8 inch for smooth-formed finished surfaces, at Grid 1.5 and 11.5 shear walls at exposed
599 surfaces of elevator entries.
600 2. Class B, 1/4 inch for formed surfaces exposed to view.
601 3. Class C, 1/2 inch for rough-formed finished surfaces not exposed to view.
602 D. Construct forms tight enough to prevent loss of concrete mortar.
603 E. Construct forms for easy removal without hammering or prying against concrete surfaces. Provide crush or
604 wrecking plates where stripping may damage cast-concrete surfaces. Provide top forms for inclined surfaces
605 steeper than 1.5 horizontal to 1 vertical.
606 1. Install keyways, reglets, recesses, and the like, for easy removal.
607 2. Do not use rust-stained steel form-facing material.

- 608 F. Set edge forms, bulkheads, and intermediate screed strips for slabs to achieve required elevations and
609 slopes in finished concrete surfaces. Provide and secure units to support screed strips; use strike-off
610 templates or compacting-type screeds.
611 G. Provide temporary openings for cleanouts and inspection ports where interior area of formwork is
612 inaccessible. Close openings with panels tightly fitted to forms and securely braced to prevent loss of
613 concrete mortar. Locate temporary openings in forms at inconspicuous locations.
614 H. Chamfer exterior corners and edges of permanently exposed concrete.
615 I. Form openings, chases, offsets, sinkages, keyways, reglets, blocking, screeds, and bulkheads required in
616 the Work. Determine sizes and locations from trades providing such items.
617 J. Clean forms and adjacent surfaces to receive concrete. Remove chips, wood, sawdust, dirt, and other debris
618 just before placing concrete.
619 K. Retighten forms and bracing before placing concrete, as required, to prevent mortar leaks and maintain
620 proper alignment.
621 L. Coat contact surfaces of forms with form-release agent, according to manufacturer's written instructions,
622 before placing reinforcement.

623 **3.2 EMBEDDED ITEM INSTALLATION**

- 624 A. Place and secure anchorage devices and other embedded items required for adjoining work that is attached
625 to or supported by cast-in-place concrete. Use setting drawings, templates, diagrams, instructions, and
626 directions furnished with items to be embedded.
627 1. Install anchor rods, accurately located, to elevations required and complying with tolerances in
628 Section 7.5 of AISC 303.
629 2. Install reglets to receive waterproofing and to receive through-wall flashings in outer face of concrete
630 frame at exterior walls, where flashing is shown at lintels, shelf angles, and other conditions.
631 3. Install dovetail anchor slots in concrete structures as indicated.

632 **3.3 REMOVING AND REUSING FORMS**

- 633 A. General: Formwork for sides of beams, walls, columns, and similar parts of the Work that does not support
634 weight of concrete may be removed after cumulatively curing at not less than 50 deg F for 24 hours after
635 placing concrete. Concrete has to be hard enough to not be damaged by form-removal operations, and
636 curing and protection operations need to be maintained.
637 1. Leave formwork for beam soffits, joists, slabs, and other structural elements that support weight of
638 concrete in place until concrete has achieved at least 70 percent of its 28-day design compressive
639 strength.
640 2. Remove forms only if shores have been arranged to permit removal of forms without loosening or
641 disturbing shores.
642 B. Clean and repair surfaces of forms to be reused in the Work. Split, frayed, delaminated, or otherwise
643 damaged form-facing material are not acceptable for exposed surfaces. Apply new form-release agent.
644 C. When forms are reused, clean surfaces, remove fins and laitance, and tighten to close joints. Align and
645 secure joints to avoid offsets. Do not use patched forms for exposed concrete surfaces unless approved by
646 Architect.

647 **3.4 SHORING AND RESHORING INSTALLATION**

- 648 A. Comply with ACI 318 and ACI 301 for design, installation, and removal of shoring and reshoring.
649 1. Do not remove shoring or reshoring until measurement of slab tolerances is complete.
650 B. In multistory construction, extend shoring or reshoring over a sufficient number of stories to distribute loads
651 in such a manner that no floor or member will be excessively loaded or will induce tensile stress in concrete
652 members without sufficient steel reinforcement.
653 C. Plan sequence of removal of shores and reshore to avoid damage to concrete. Locate and provide adequate
654 reshoring to support construction without excessive stress or deflection.

655 **3.5 VAPOR-RETARDER INSTALLATION**

- 656 A. Sheet Vapor Retarders: Place, protect, and repair sheet vapor retarder according to ASTM E 1643 and
657 manufacturer's written instructions.
658 1. Lap joints 6 inches and seal with manufacturer's recommended tape.

- 659 **3.6 STEEL REINFORCEMENT INSTALLATION**
- 660 A. General: Comply with CRSI's "Manual of Standard Practice" for fabricating, placing, and supporting
661 reinforcement.
- 662 1. Do not cut or puncture vapor retarder. Repair damage and reseal vapor retarder before placing
663 concrete.
- 664 B. Clean reinforcement of loose rust and mill scale, earth, ice, and other foreign materials that reduce bond to
665 concrete.
- 666 C. Accurately position, support, and secure reinforcement against displacement. Locate and support
667 reinforcement with bar supports to maintain minimum concrete cover. Do not tack weld crossing reinforcing
668 bars.
- 669 1. Weld reinforcing bars according to AWS D1.4/D 1.4M, where indicated.
- 670 D. Set wire ties with ends directed into concrete, not toward exposed concrete surfaces.
- 671 E. Install welded-wire reinforcement in longest practicable lengths on bar supports spaced to minimize sagging.
672 Lap edges and ends of adjoining sheets at least one mesh spacing. Offset laps of adjoining sheet widths to
673 prevent continuous laps in either direction. Lace overlaps with wire.
- 674 F. Reinforcing shall be epoxy coated and shall conform to the standards of ASTM A775 in any location where
675 the reinforcing and/or reinforced system have the potential to come in contact with corrosive and/or
676 damaging environmental elements. These areas include, but are not limited to the following:
677 a. All locations.
- 678 G. Epoxy-Coated Reinforcement: Repair cut and damaged epoxy coatings with epoxy repair coating according
679 to ASTM D 3963/D 3963M. Use epoxy-coated steel wire ties to fasten epoxy-coated steel reinforcement.
- 680 **3.7 JOINTS**
- 681 A. General: Construct joints true to line with faces perpendicular to surface plane of concrete.
- 682 B. Construction Joints: Install so strength and appearance of concrete are not impaired, at locations indicated
683 or as approved by Architect.
- 684 1. Place joints perpendicular to main reinforcement. Continue reinforcement across construction joints
685 unless otherwise indicated. Do not continue reinforcement through sides of strip placements of floors
686 and slabs.
- 687 2. Form keyed joints as indicated. Embed keys at least 1-1/2 inches into concrete.
- 688 3. Locate joints for beams, slabs, joists, and girders in the middle third of spans. Offset joints in girders
689 a minimum distance of twice the beam width from a beam-girder intersection.
- 690 4. Locate horizontal joints in walls and columns at underside of floors, slabs, beams, and girders and
691 at the top of footings or floor slabs.
- 692 5. Space vertical joints in walls as indicated. Locate joints beside piers integral with walls, near corners,
693 and in concealed locations where possible.
- 694 6. Use a bonding agent at locations where fresh concrete is placed against hardened or partially
695 hardened concrete surfaces.
- 696 C. Contraction Joints in Slabs-on-Grade: Form weakened-plane contraction joints, sectioning concrete into
697 areas as indicated. Construct contraction joints for a depth equal to at least one-fourth of concrete thickness
698 as follows:
- 699 1. Grooved Joints: Form contraction joints after initial floating by grooving and finishing each edge of
700 joint to a radius of 1/8 inch. Repeat grooving of contraction joints after applying surface finishes.
701 Eliminate groover tool marks on concrete surfaces.
- 702 2. Sawed Joints: Form contraction joints with power saws equipped with shatterproof abrasive or
703 diamond-rimmed blades. Cut 1/8-inch-wide joints into concrete when cutting action does not tear,
704 abrade, or otherwise damage surface and before concrete develops random contraction cracks.
- 705 D. Isolation Joints in Slabs-on-Grade: After removing formwork, install joint-filler strips at slab junctions with
706 vertical surfaces, such as column pedestals, foundation walls, grade beams, and other locations, as
707 indicated.
- 708 1. Extend joint-filler strips full width and depth of joint, terminating flush with finished concrete surface
709 unless otherwise indicated.
- 710 2. Terminate full-width joint-filler strips not less than 1/2 inch or more than 1 inch below finished concrete
711 surface where joint sealants, specified in Section 07 92 00 "Joint Sealants," are indicated.
- 712 3. Install joint-filler strips in lengths as long as practicable. Where more than one length is required, lace
713 or clip sections together.
- 714 E. Doweled Joints: Install dowel bars and support assemblies at joints where indicated. Lubricate or asphalt
715 coat one-half of dowel length to prevent concrete bonding to one side of joint.

- 716 **3.8 WATERSTOP INSTALLATION**
717 A. Flexible Waterstops: Install in construction joints and at other joints indicated to form a continuous
718 diaphragm. Install in longest lengths practicable. Support and protect exposed waterstops during progress
719 of the Work. Field fabricate joints in waterstops according to manufacturer's written instructions.
720 B. Self-Expanding Strip Waterstops: Install in construction joints and at other locations indicated, according to
721 manufacturer's written instructions, adhesive bonding, mechanically fastening, and firmly pressing into
722 place. Install in longest lengths practicable.
- 723 **3.9 CONCRETE PLACEMENT**
724 A. Before placing concrete, verify that installation of formwork, reinforcement, and embedded items is complete
725 and that required inspections are completed. Examine conditions of substrates and other conditions under
726 which work is to be performed and notify Owner, in writing, of circumstances detrimental to the proper
727 completion of the work. Do not proceed until unsatisfactory conditions are corrected.
728 B. Do not add water to concrete during delivery, at Project site, or during placement unless approved by
729 Architect.
730 C. Before test sampling and placing concrete, water may be added at Project site, subject to limitations of ACI
731 301.
732 1. Do not add water to concrete after adding high-range water-reducing admixtures to mixture.
733 D. Deposit concrete continuously in one layer or in horizontal layers of such thickness that no new concrete is
734 placed on concrete that has hardened enough to cause seams or planes of weakness. If a section cannot
735 be placed continuously, provide construction joints as indicated. Deposit concrete to avoid segregation.
736 1. Deposit concrete in horizontal layers of depth not to exceed formwork design pressures and in a
737 manner to avoid inclined construction joints.
738 2. Consolidate placed concrete with mechanical vibrating equipment according to ACI 301.
739 3. Do not use vibrators to transport concrete inside forms. Insert and withdraw vibrators vertically at
740 uniformly spaced locations to rapidly penetrate placed layer and at least 6 inches into preceding
741 layer. Do not insert vibrators into lower layers of concrete that have begun to lose plasticity. At each
742 insertion, limit duration of vibration to time necessary to consolidate concrete and complete
743 embedment of reinforcement and other embedded items without causing mixture constituents to
744 segregate.
745 E. Deposit and consolidate concrete for floors and slabs in a continuous operation, within limits of construction
746 joints, until placement of a panel or section is complete.
747 1. Consolidate concrete during placement operations, so concrete is thoroughly worked around
748 reinforcement and other embedded items and into corners.
749 2. Maintain reinforcement in position on chairs during concrete placement.
750 3. Screed slab surfaces with a straightedge and strike off to correct elevations.
751 4. Slope surfaces uniformly to drains where required.
752 5. Begin initial floating using bull floats or darbies to form a uniform and open-textured surface plane,
753 before excess bleedwater appears on the surface. Do not further disturb slab surfaces before starting
754 finishing operations.
- 755 **3.10 FINISHING FORMED SURFACES**
756 A. Rough-Formed Finish: As-cast concrete texture imparted by form-facing material with tie holes and defects
757 repaired and patched. Remove fins and other projections that exceed specified limits on formed-surface
758 irregularities.
759 1. Apply to concrete surfaces not exposed to public view.
760 B. Formed Finish: As-cast concrete texture imparted by form-facing material, arranged in an orderly and
761 symmetrical manner with a minimum of seams. Repair and patch tie holes and defects. Remove fins and
762 other projections that exceed specified limits on formed-surface irregularities.
763 1. Apply to concrete surfaces exposed to public view, to receive a rubbed finish, or to be covered with
764 a coating or covering material applied directly to concrete.
765 C. Smooth-Formed Finish: As-cast concrete texture imparted by form-facing material, arranged in an orderly
766 and symmetrical manner with a minimum of seams. Repair and patch tie holes and defects. Remove fins
767 and other projections that exceed specified limits on formed-surface irregularities.
768 1. Apply to concrete surfaces exposed to public view/touch at Grid 1.5 and 11.5 shear walls at exposed
769 surfaces of elevator entries.
770 D. Related Unformed Surfaces: At tops of walls, horizontal offsets, and similar unformed surfaces adjacent to
771 formed surfaces, strike off smooth and finish with a texture matching adjacent formed surfaces. Continue

772 final surface treatment of formed surfaces uniformly across adjacent unformed surfaces unless otherwise
773 indicated.

774 **3.11 FINISHING FLOORS AND SLABS**

- 775 A. General: Comply with ACI 302.1R recommendations for screeding, restraightening, and finishing operations
776 for concrete surfaces. Do not wet concrete surfaces.
- 777 B. Scratch Finish: While still plastic, texture concrete surface that has been screeded and bull-floated or
778 darbied. Use stiff brushes, brooms, or rakes to produce a profile amplitude of 1/4 inch in one direction.
- 779 1. Apply scratch finish to surfaces indicated and to receive mortar setting beds for bonded cementitious
780 floor finishes.
- 781 C. Float Finish: Consolidate surface with power-driven floats or by hand floating if area is small or inaccessible
782 to power-driven floats. Restraighten, cut down high spots, and fill low spots. Repeat float passes and
783 restraightening until surface is left with a uniform, smooth, granular texture.
- 784 1. Apply float finish to surfaces to receive trowel finish and to be covered with fluid-applied or sheet
785 waterproofing, built-up or membrane roofing, or sand-bed terrazzo.
- 786 D. Trowel Finish: After applying float finish, apply first troweling and consolidate concrete by hand or power-
787 driven trowel. Continue troweling passes and restraighten until surface is free of trowel marks and uniform
788 in texture and appearance. Grind smooth any surface defects that would telegraph through applied coatings
789 or floor coverings.
- 790 1. Apply a trowel finish to surfaces exposed to view or to be covered with resilient flooring, carpet,
791 ceramic or quarry tile set over a cleavage membrane, paint, or another thin-film-finish coating system.
- 792 2. Finish surfaces to the following tolerances, according to ASTM E 1155, for a randomly trafficked floor
793 surface:
- 794 a. Specified overall values of flatness, F(F) 30; and of levelness, F(L) 20; with minimum local
795 values of flatness, F(F) 24; and of levelness, F(L) 15; for slabs.
- 796 E. Trowel and Fine-Broom Finish: Apply a first trowel finish to surfaces where ceramic or quarry tile is to be
797 installed by either thickset or thinset method. While concrete is still plastic, slightly scarify surface with a fine
798 broom.
- 799 1. Comply with flatness and levelness tolerances for trowel-finished floor surfaces.
- 800 F. Broom Finish: Apply a broom finish to exterior concrete platforms, steps, ramps, and elsewhere as indicated.
- 801 1. Immediately after float finishing, slightly roughen trafficked surface by brooming with fiber-bristle
802 broom perpendicular to main traffic route. Coordinate required final finish with Architect before
803 application.

804 **3.12 MISCELLANEOUS CONCRETE ITEM INSTALLATION**

- 805 A. Filling In: Fill in holes and openings left in concrete structures after work of other trades is in place unless
806 otherwise indicated. Mix, place, and cure concrete, as specified, to blend with in-place construction. Provide
807 other miscellaneous concrete filling indicated or required to complete the Work.
- 808 B. Curbs: Provide monolithic finish to interior curbs by stripping forms while concrete is still green and by steel-
809 troweling surfaces to a hard, dense finish with corners, intersections, and terminations slightly rounded.
- 810 C. Equipment Bases and Foundations:
- 811 1. Coordinate sizes and locations of concrete bases with actual equipment provided.
- 812 2. Construct concrete bases 4 inches high unless otherwise indicated, and extend base not less than 6
813 inches in each direction beyond the maximum dimensions of supported equipment unless otherwise
814 indicated or unless required for seismic anchor support.
- 815 3. Minimum Compressive Strength: 4000 psi at 28 days.
- 816 4. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install
817 dowel rods on 18-inch centers around the full perimeter of concrete base.
- 818 5. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base and
819 anchor into structural concrete substrate.
- 820 6. Prior to pouring concrete, place and secure anchorage devices. Use setting drawings, templates,
821 diagrams, instructions, and directions furnished with items to be embedded.
- 822 7. Cast anchor-bolt insert into bases. Install anchor bolts to elevations required for proper attachment
823 to supported equipment.
- 824 D. Concrete Stairs: Provide stairs with concrete treads, landings, and associated items. Cast-in inserts and
825 accessories as shown on Drawings. Screed, tamp, and trowel finish concrete surfaces

826 **3.13 CONCRETE PROTECTING AND CURING**

- 827 A. General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures.
828 Comply with ACI 306.1 for cold-weather protection and ACI 301 for hot-weather protection during curing.
- 829 B. Evaporation Retarder: Apply evaporation retarder to unformed concrete surfaces if hot, dry, or windy
830 conditions cause moisture loss approaching 0.2 lb/sq. ft. x h before and during finishing operations. Apply
831 according to manufacturer's written instructions after placing, screeding, and bull floating or darbying
832 concrete, but before float finishing.
- 833 C. Formed Surfaces: Cure formed concrete surfaces, including underside of beams, supported slabs, and other
834 similar surfaces. If forms remain during curing period, moist cure after loosening forms. If removing forms
835 before end of curing period, continue curing for remainder of curing period.
- 836 D. Unformed Surfaces: Begin curing immediately after finishing concrete. Cure unformed surfaces, including
837 floors and slabs, concrete floor toppings, and other surfaces.
- 838 E. Cure concrete according to ACI 308.1, by one or a combination of the following methods. Concrete shall be
839 wet cured for seven days as a minimum requirement:
- 840 1. Moisture Curing: Keep surfaces continuously moist for not less than seven days with the following
841 materials:
- 842 a. Water.
- 843 b. Continuous water-fog spray.
- 844 c. Absorptive cover, water saturated, and kept continuously wet. Cover concrete surfaces and
845 edges with 12-inch lap over adjacent absorptive covers.
- 846 2. Moisture-Retaining-Cover Curing: Cover concrete surfaces with moisture-retaining cover for curing
847 concrete, placed in widest practicable width, with sides and ends lapped at least 12 inches, and
848 sealed by waterproof tape or adhesive. Cure for not less than seven days. Immediately repair any
849 holes or tears during curing period, using cover material and waterproof tape.
- 850 a. Moisture cure or use moisture-retaining covers to cure concrete surfaces to receive floor
851 coverings.
- 852 b. Moisture cure or use moisture-retaining covers to cure concrete surfaces to receive
853 penetrating liquid floor treatments.
- 854 c. Cure concrete surfaces to receive floor coverings with either a moisture-retaining cover or a
855 curing compound that the manufacturer certifies does not interfere with bonding of floor
856 covering used on Project.
- 857 3. Curing Compound: Apply uniformly in continuous operation by power spray or roller according to
858 manufacturer's written instructions. Recoat areas subjected to heavy rainfall within three hours after
859 initial application. Maintain continuity of coating and repair damage during curing period.
- 860 a. Removal: After curing period has elapsed, remove curing compound without damaging
861 concrete surfaces by method recommended by curing compound manufacturer unless
862 manufacturer certifies curing compound does not interfere with bonding of floor covering used
863 on Project].
- 864 4. Curing and Sealing Compound: Apply uniformly to floors and slabs indicated in a continuous
865 operation by power spray or roller according to manufacturer's written instructions. Recoat areas
866 subjected to heavy rainfall within three hours after initial application. Repeat process 24 hours later
867 and apply a second coat. Maintain continuity of coating and repair damage during curing period.

868 **3.14 LIQUID FLOOR TREATMENT APPLICATION**

- 869 A. Penetrating Liquid Floor Treatment: Prepare, apply, and finish penetrating liquid floor treatment according
870 to manufacturer's written instructions.
- 871 1. Remove curing compounds, sealers, oil, dirt, laitance, and other contaminants and complete surface
872 repairs.
- 873 2. Do not apply to concrete that is less than 14 days' old.
- 874 3. Apply liquid until surface is saturated, scrubbing into surface until a gel forms; rewet; and repeat
875 brooming or scrubbing. Rinse with water; remove excess material until surface is dry. Apply a second
876 coat in a similar manner if surface is rough or porous.

877 **3.15 JOINT FILLING**

- 878 A. Prepare, clean, and install joint filler according to manufacturer's written instructions.
- 879 1. Defer joint filling until concrete has aged at least one month(s). Do not fill joints until construction
880 traffic has permanently ceased.
- 881 B. Remove dirt, debris, saw cuttings, curing compounds, and sealers from joints; leave contact faces of joints
882 clean and dry.

883 C. Install semirigid joint filler full depth in saw-cut joints and at least 2 inches deep in formed joints. Overfill joint
884 and trim joint filler flush with top of joint after hardening.

885 **3.16 CONCRETE SURFACE REPAIRS**

886 A. Defective Concrete: Repair and patch defective areas when approved by Architect and Engineer. Remove
887 and replace concrete that cannot be repaired and patched to Structural Engineer's and Architect's approval.

888 B. Patching Mortar: Mix dry-pack patching mortar, consisting of 1 part portland cement to 2-1/2 parts fine
889 aggregate passing a No. 16 sieve, using only enough water for handling and placing.

890 C. Repairing Formed Surfaces: Surface defects include color and texture irregularities, cracks, spalls, air
891 bubbles, honeycombs, rock pockets, fins and other projections on the surface, and stains and other
892 discolorations that cannot be removed by cleaning.

893 1. Immediately after form removal, cut out honeycombs, rock pockets, and voids more than 1/2 inch in
894 any dimension to solid concrete. Limit cut depth to 3/4 inch. Make edges of cuts perpendicular to
895 concrete surface. Clean, dampen with water, and brush-coat holes and voids with bonding agent. Fill
896 and compact with patching mortar before bonding agent has dried. Fill form-tie voids with patching
897 mortar or cone plugs secured in place with bonding agent.

898 2. Repair defects on surfaces exposed to view by blending white portland cement and standard portland
899 cement so that, when dry, patching mortar matches surrounding color. Patch a test area at
900 inconspicuous locations to verify mixture and color match before proceeding with patching. Compact
901 mortar in place and strike off slightly higher than surrounding surface.

902 3. Repair defects on concealed formed surfaces that affect concrete's durability and structural
903 performance as determined by Architect.

904 D. Repairing Unformed Surfaces: Test unformed surfaces, such as floors and slabs, for finish and verify surface
905 tolerances specified for each surface. Correct low and high areas. Test surfaces sloped to drain for trueness
906 of slope and smoothness; use a sloped template.

907 1. Repair finished surfaces containing defects. Surface defects include spalls, popouts, honeycombs,
908 rock pockets, crazing and cracks in excess of 0.01 inch wide or that penetrate to reinforcement or
909 completely through unreinforced sections regardless of width, and other objectionable conditions.

910 2. After concrete has cured at least 14 days, correct high areas by grinding.

911 3. Correct localized low areas during or immediately after completing surface finishing operations by
912 cutting out low areas and replacing with patching mortar. Finish repaired areas to blend into adjacent
913 concrete.

914 4. Correct other low areas scheduled to receive floor coverings with a repair underlayment. Prepare,
915 mix, and apply repair underlayment and primer according to manufacturer's written instructions to
916 produce a smooth, uniform, plane, and level surface. Feather edges to match adjacent floor
917 elevations.

918 5. Correct other low areas scheduled to remain exposed with a repair topping. Cut out low areas to
919 ensure a minimum repair topping depth of 1/4 inch to match adjacent floor elevations. Prepare, mix,
920 and apply repair topping and primer according to manufacturer's written instructions to produce a
921 smooth, uniform, plane, and level surface.

922 6. Repair defective areas, except random cracks and single holes 1 inch or less in diameter, by cutting
923 out and replacing with fresh concrete. Remove defective areas with clean, square cuts and expose
924 steel reinforcement with at least a 3/4-inch clearance all around. Dampen concrete surfaces in
925 contact with patching concrete and apply bonding agent. Mix patching concrete of same materials
926 and mixture as original concrete, except without coarse aggregate. Place, compact, and finish to
927 blend with adjacent finished concrete. Cure in same manner as adjacent concrete.

928 7. Repair random cracks and single holes 1 inch or less in diameter with patching mortar. Groove top
929 of cracks and cut out holes to sound concrete and clean off dust, dirt, and loose particles. Dampen
930 cleaned concrete surfaces and apply bonding agent. Place patching mortar before bonding agent
931 has dried. Compact patching mortar and finish to match adjacent concrete. Keep patched area
932 continuously moist for at least 72 hours.

933 E. Perform structural repairs of concrete, subject to Architect's and Structural Engineer's approval, using epoxy
934 adhesive and patching mortar.

935 F. Repair materials and installation not specified above may be used, subject to Architect's approval.

936 **3.17 FIELD QUALITY CONTROL**

937 A. Testing Agency: Engage a qualified testing and inspecting agency to perform tests and inspections and to
938 submit reports.

939 B. Inspections:

- 940 1. Steel reinforcement placement.
941 2. Steel reinforcement welding.
942 3. Headed bolts and studs.
943 4. Verification of use of required design mixture.
944 5. Concrete placement, including conveying and depositing.
945 6. Curing procedures and maintenance of curing temperature.
946 7. Verification of concrete strength before removal of shores and forms from beams and slabs.
947 C. Concrete Tests: Testing of composite samples of fresh concrete obtained according to ASTM C 172/C 172M
948 shall be performed according to the following requirements:
949 1. Testing Frequency: Obtain at least one composite sample for each 100 cu. yd. or fraction thereof of
950 each concrete mixture placed each day.
951 a. When frequency of testing provides fewer than five compressive-strength tests for each
952 concrete mixture, testing shall be conducted from at least five randomly selected batches or
953 from each batch if fewer than five are used.
954 2. Slump: ASTM C 143/C 143M; one test at point of placement for each composite sample, but not less
955 than one test for each day's pour of each concrete mixture. Perform additional tests when concrete
956 consistency appears to change.
957 3. Air Content: ASTM C 231/C 231M, pressure method, for normal-weight concrete;
958 ASTM C 173/C 173M, volumetric method, for structural lightweight concrete; one test for each
959 composite sample, but not less than one test for each day's pour of each concrete mixture.
960 4. Concrete Temperature: ASTM C 1064/C 1064M; one test hourly when air temperature is 40 deg F
961 and below or 80 deg F and above, and one test for each composite sample.
962 5. Unit Weight: ASTM C 567/C 567M, fresh unit weight of structural lightweight concrete; one test for
963 each composite sample, but not less than one test for each day's pour of each concrete mixture.
964 6. Compression Test Specimens: ASTM C 31/C 31M.
965 a. For concrete with a specified minimum compressive strength of 6,000 psi or less, cast and
966 laboratory cure one set of five standard cylinder specimens for each composite sample.
967 b. For concrete with a specified minimum compressive strength greater than 6,000 psi, cast and
968 laboratory cure one set of seven standard cylinder specimens for each composite sample.
969 7. Compressive-Strength Tests: ASTM C 39/C 39M; test laboratory-cured specimens as follows:
970 a. For concrete with a specified minimum compressive strength of 6,000 psi or less, test one
971 laboratory-cured specimen at 7 days and one set of two specimens at 28 days, utilizing the
972 remaining two specimens as reserves.
973 b. For concrete with a specified minimum compressive strength greater than 6,000 psi, test one
974 laboratory-cured specimen at 7 days, one set of two specimens at 28 days, and one set of
975 two specimens at 56 days, utilizing the remaining two specimens as reserves.
976 c. A compressive-strength test shall be the average compressive strength from a set of two
977 specimens obtained from same composite sample and tested at age indicated.
978 8. When strength of field-cured cylinders is less than 85 percent of companion laboratory-cured
979 cylinders, Contractor shall evaluate operations and provide corrective procedures for protecting and
980 curing in-place concrete.
981 9. Strength of each concrete mixture will be satisfactory if every average of any three consecutive
982 compressive-strength tests equals or exceeds specified compressive strength and no compressive-
983 strength test value falls below specified compressive strength by more than 500 psi.
984 10. Test results shall be reported in writing to Architect, concrete manufacturer, and Contractor within 48
985 hours of testing. Reports of compressive-strength tests shall contain Project identification name and
986 number, date of concrete placement, name of concrete testing and inspecting agency, location of
987 concrete batch in Work, design compressive strength at 28 days, concrete mixture proportions and
988 materials, compressive breaking strength, and type of break for both 7- and 28-day tests.
989 11. Nondestructive Testing: Impact hammer, sonoscope, or other nondestructive device may be
990 permitted by Architect but will not be used as sole basis for approval or rejection of concrete.
991 12. Additional Tests: Testing and inspecting agency shall make additional tests of concrete when test
992 results indicate that slump, air entrainment, compressive strengths, or other requirements have not
993 been met, as directed by Architect. Testing and inspecting agency may conduct tests to determine
994 adequacy of concrete by cored cylinders complying with ASTM C 42/C 42M or by other methods as
995 directed by Architect.
996 13. Additional testing and inspecting, at Contractor's expense, will be performed to determine compliance
997 of replaced or additional work with specified requirements.

- 998 14. Correct deficiencies in the Work that test reports and inspections indicate do not comply with the
999 Contract Documents.
1000 D. Measure floor and slab flatness and levelness according to ASTM E 1155 within 24 hours of finishing.

1001 **3.18 PROTECTION OF LIQUID FLOOR TREATMENTS**

- 1002 A. Protect liquid floor treatment from damage and wear during the remainder of construction period. Use
1003 protective methods and materials, including temporary covering, recommended in writing by liquid floor
1004 treatments installer.
1005 B. Protect completed work from damage and construction operations throughout finishing and curing
1006 operations.
1007

30 **PART 1 - GENERAL**

31 **1.1 RELATED DOCUMENTS**

- 32 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 33 Division 01 Specification Sections, apply to this Section.

34 **1.2 SUMMARY**

- 35 A. Section Includes:
- 36 1. Post-tensioning reinforcement and accessories including prestressing tendons, pocket formers,
- 37 support bars, bar chairs, and slab bolsters.
- 38 2. Post-tensioning operations including stressing, recording tendon elongations and gage pressures,
- 39 and finishing tendons.

40 **1.3 DEFINITIONS**

- 41 A. Strand Tail: Excess strand length extending past the anchorage device.
- 42 B. Stressing Pocket: Void formed by pocket former at stressing-end anchorage to provide required cover
- 43 over wedges and strand tail.
- 44 C. Wedge Cavity: Cone-shaped hole in anchorage device designed to hold the wedges that anchor the
- 45 strand.

46 **1.4 COORDINATION**

- 47 A. Attachments and Penetrations:
- 48 1. Attach permanent construction such as curtain-wall systems, handrails, fire-protection equipment,
- 49 lights, and security devices to the post-tensioned slab using embedded anchors.

- 50 2. Drilled anchors, power-driven fasteners, and core drilling for sleeves or other penetrations are not
51 allowed unless authorized in writing by Architect.
52 3. Form penetrations within 18 inches of an anchorage with ASTM A 53/A 53M, Schedule 40 steel
53 pipe.

54 **1.5 PREINSTALLATION MEETINGS**

- 55 A. Preinstallation Conference: Conduct conference at Project site.
56 1. Review methods and procedures related to installation and stressing of post-tensioning tendons
57 including, but not limited to, the following:
58 a. Construction schedule and availability of materials, personnel, and equipment needed to make
59 progress and avoid delays.
60 b. Storage of post-tensioning materials on-site.
61 c. Structural load limitations.
62 d. Coordination of post-tensioning installation drawings and nonprestressed reinforcing steel
63 placing drawings.
64 e. Coordination of reinforcement drawings and Contractor-prepared slab penetration drawings.
65 f. Horizontal and vertical tolerances on tendons and nonprestressed reinforcement placement.
66 g. Marking and measuring of elongations.
67 h. Submittal of stressing records and requirements for tendon finishing.
68 i. Removal of formwork.

69 **1.6 ACTION SUBMITTALS**

- 70 A. Product Data: For the following:
71 1. Post-tensioning coating.
72 2. Tendon sheathing.
73 3. Anchorage devices.
74 4. Tendon couplers.
75 5. Bar and tendon supports.
76 6. Pocket formers.
77 7. Sheathing repair tape.
78 8. Stressing-pocket patching material.
79 9. Encapsulation system.
80 B. Shop Drawings: Include the following, prepared by or under the supervision of a qualified professional
81 engineer, detailing tendon layout and installation procedures:
82 1. Installation drawings including plans, elevations, sections, and details.
83 2. Numbers, arrangement, and designation of post-tensioning tendons.
84 3. Tendon profiles and method of tendon support including chair heights and locations. Show tendon
85 profiles at sufficient scale to clearly indicate all support points, with their associated heights.
86 4. Tendon anchorage details including bundled tendon flaring.
87 5. Tendon clearances around slab openings and penetrations.
88 6. Construction joint locations, pour sequence, locations of anchorages and blockouts required for
89 stressing.
90 7. Stressing procedures and jacking force to result in final effective forces used in determining number
91 of tendons required.
92 8. Calculated elongations for each tendon.
93 9. Details for horizontal curvature around openings and at anchorages.
94 10. Details for corners and other locations where tendon layouts may conflict with one another or
95 nonprestressed reinforcing steel.
96 11. Locations of nonprestressed reinforcement required for installing post-tensioning tendons including,
97 but not limited to, the following:
98 a. Support bars.
99 b. Backup bars and hairpins at anchorages.
100 c. Hairpins at locations of horizontal curvature.
101 d. Supplemental reinforcement at blockouts.

- 102 C. Delegated-Design Submittal: For post-tensioning system.
103 1. Sealed design calculations prepared by a licensed structural engineer in the state of Wisconsin,
104 indicating method of elongation calculation including values used for friction coefficients, anchorage
105 seating loss, elastic shortening, creep, relaxation, and shrinkage.

106 **1.7 INFORMATIONAL SUBMITTALS**

- 107 A. Qualification Data: For Installer. Include resume of individual supervising installation and stressing of
108 post-tensioning tendons.
109 B. Sustainable Design Submittals:
110 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content
111 and cost.
112 C. Product Certificates:
113 1. For each type of anchorage device and coupler.
114 2. For each type of encapsulation system.
115 D. Mill Test Reports: Certified mill test reports for prestressing strand used on Project indicating that
116 strand is low relaxation and including the following:
117 1. Coil numbers or identification.
118 2. Breaking load.
119 3. Load at 1 percent extension.
120 4. Elongation at failure.
121 5. Modulus of elasticity.
122 6. Diameter and net area of strand.
123 E. Field quality-control reports.
124 F. Procedures Statement: Procedures for cutting excess strand tail and patching stressing pocket.
125 G. Stressing Jack Calibration: Calibration certificates for jacks and gages to be used on Project. Calibrate
126 each jack-and-gage set as a pair.
127 H. Stressing Records: Submit the same day as stressing operations.

128 **1.8 QUALITY ASSURANCE**

- 129 A. Manufacturer Qualifications: Fabricating plant certified by PTI according to procedures set forth in PTI's
130 "Manual for Certification of Plants Producing Unbonded Single Strand Tendons."
131 B. Installer Qualifications: A qualified installer whose full-time Project superintendent has successfully
132 completed PTI's Level 1 - Field Fundamentals course or has equivalent verifiable experience and
133 knowledge acceptable to Architect.
134 1. Superintendent must receive training from post-tensioning supplier in the operation of stressing
135 equipment to be used on Project.
136 C. Testing Agency Qualifications: Qualified according to ASTM E 329 for testing indicated.
137 1. Testing Agency Inspector: Personnel performing field inspections and measuring elongations shall
138 have successfully completed PTI's Level 1 - Field Fundamentals course or shall have equivalent
139 verifiable experience and knowledge acceptable to Architect.

140 **1.9 DELIVERY, STORAGE, AND HANDLING**

- 141 A. Deliver, store, and handle post-tensioning materials according to PTI's "Field Procedures Manual for
142 Unbonded Single Strand Tendons."
143 B. Immediately remove damaged components from Project site.

144 **PART 2 - PRODUCTS**

145 **2.1 MANUFACTURERS**

- 146 A. Source Limitations: Obtain post-tensioning materials and equipment from single source.
147 1. Stressing jacks not provided by post-tensioning supplier must be calibrated and approved for use
148 on Project by post-tensioning supplier.

149 **2.2 PRESTRESSING TENDONS**

- 150 A. ACI Publications: Comply with ACI 423.6, "Specification for Unbonded Single Strand Tendons," unless
151 otherwise indicated in the Contract Documents.
- 152 B. Prestressing Strand: ASTM A 416/A 416M, Grade 270, uncoated, seven-wire, low-relaxation, 0.5-inch-
153 diameter strand.
- 154 C. Post-Tensioning Coating: Compound with friction-reducing, moisture-displacing, and corrosion-
155 inhibiting properties; chemically stable and nonreactive with prestressing steel, nonprestressed
156 reinforcement, sheathing material, and concrete.
- 157 1. Minimum Coating Weight: 2.5 lb for 0.5-inch-diameter strand per 100 feet of strand.
- 158 2. Completely fill annular space between strand and sheathing over entire tendon length with post-
159 tensioning coating.
- 160 D. Tendon Sheathing:
- 161 1. Minimum Thickness: 0.050 inch for polyethylene or polypropylene with a minimum density of 0.034
162 lb/cu. in.
- 163 2. Continuous over length of tendon to provide watertight encapsulation of strand.
- 164 E. Anchorage Device and Coupler Assembly: Assembly of strand, wedges, and anchorage device or
165 coupler complying with static and fatigue testing requirements and capable of developing 95 percent of
166 actual breaking strength of strand.
- 167 1. Anchorage Bearing Stresses: Comply with ACI 423.6 for stresses at transfer load and service load.
- 168 2. Fixed-End Anchorage Device Assemblies: Plant fabricated with wedges seated at a load of not
169 less than 80 percent and not more than 85 percent of breaking strength of strand.
- 170 F. Encapsulation System: Watertight encapsulation of prestressing strand consisting of the following:
- 171 1. Wedge-Cavity Caps: Attached to anchorages with a positive mechanical connection and
172 completely filled with post-tensioning coating.
- 173 a. Caps for Fixed- and Stressing-End Anchorage Devices: Designed to provide watertight
174 encapsulation of wedge cavity. Sized to allow required extension of strand past the
175 wedges.
- 176 1) Attach cap for fixed-end anchorage device in fabricating plant.
- 177 b. Caps at Intermediate Anchorages: Open to allow passage of strand.
- 178 2. Sleeves: Attached to anchorage device with positive mechanical connection; overlapped a
179 minimum of 4 inches with sheathing and completely filled with post-tensioning coating.

180 **2.3 NONPRESTRESSED STEEL BARS**

- 181 A. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer
182 recycled content a minimum of 25 percent.
- 183 B. Support Bars, Reinforcing Bars, Hairpins:
- 184 1. Epoxy-Coated Steel: ASTM A 615, Grade 60, deformed bars, ASTM A 775 epoxy coated with less
185 than 2 percent damaged coating in each 12-inch bar length.
- 186 a. Epoxy Repair Coating: Liquid, two-part, epoxy repair coating; compatible with epoxy coating
187 on bars and complying with ASTM A 775/A 755M. Repair damaged areas according to
188 ASTM D 3963/D 3963M.
- 189 C. Supports: Bolsters, chairs, spacers, and other devices for spacing, supporting, and fastening tendons
190 and tendon support bars in place. Manufacture bar supports, according to CRSI's "Manual of Standard
191 Practice," from steel wire, plastic, or precast concrete of greater compressive strength than concrete,
192 and as follows:
- 193 1. For epoxy-coated bars, use CRSI Class 1A epoxy-coated bar supports.

194 **2.4 ACCESSORIES**

- 195 A. Pocket Formers: Capable of completely sealing wedge cavity; sized to provide the required cover over
196 the anchorage and allow access for cutting strand tail.
- 197 B. Anchorage Fasteners: Galvanized -steel nails, wires, and screws used to attach anchorage devices to
198 formwork.
- 199 C. Sheathing Repair Tape: Elastic, self-adhesive, moistureproof tape with minimum width of 2 inches, in
200 contrasting color to tendon sheathing; nonreactive with sheathing, coating, or prestressing steel.
- 201 1. Products: Subject to compliance with requirements, available products that may be incorporated
202 into the Work include, but are not limited to, the following:

- 203 a. Adhesive Tape Products, Ltd.; PWT-20.
204 b. Covalence Adhesives; Polyken 826.
205 c. 3M; Tape 226.

206 **2.5 PATCHING MATERIAL**

- 207 A. One-component, polymer-modified, premixed patching material containing selected silica aggregates
208 and portland cement, suitable for vertical and overhead applications. Do not use material containing
209 chlorides or other chemicals known to be deleterious to prestressing steel or material that is reactive
210 with prestressing steel, anchorage device material, or concrete.
- 211 1. Products: Subject to compliance with requirements, available products that may be incorporated
212 into the Work include, but are not limited to, the following:
- 213 a. BASF Construction Chemicals, LLC - Building Systems; Emaco R350 CI.
214 b. Euclid Chemical Company (The); Verticoat Supreme.
215 c. Fox Industries, Inc.; FX-228.
216 d. Kaufman Products, Inc.; Patchwell Kit V/O.
217 e. Sika Corporation, Inc.; SikaMonoTop 611.

218 **PART 3 - EXECUTION**

219 **3.1 FORMWORK**

- 220 A. Provide formwork for post-tensioned elements as specified Section 03 30 00 "Cast-in-Place Concrete."
221 Design formwork to support load redistribution that may occur during stressing operation. Ensure that
222 formwork does not restrain elastic shortening, camber, or deflection resulting from application of
223 prestressing force.
- 224 B. Do not remove forms supporting post-tensioned elements until tendons have been fully stressed and
225 elongations have been approved by Architect.
- 226 C. Do not place concrete in supported floors until tendons on supporting floors have been stressed and
227 elongations have been approved by Architect.

228 **3.2 NONPRESTRESSED STEEL REINFORCEMENT PLACEMENT**

- 229 A. Placement of nonprestressed steel reinforcement is specified in Section 03 30 00 "Cast-in-Place
230 Concrete." Coordinate placement of nonprestressed steel reinforcement with installation of post-
231 tensioning tendons.

232 **3.3 TENDON INSTALLATION**

- 233 A. Install tendons according to installation drawings and procedures stated in PTI's "Field Procedures
234 Manual for Unbonded Single Strand Tendons."
- 235 1. Tolerances: Comply with tolerances in ACI 423.6 for beams and slabs.
- 236 B. Tendon Supports: Provide continuous slab bolsters or bars supported on individual high chairs spaced
237 at a maximum of 42 inches o.c. to ensure tendons remain in their designated positions during
238 construction operations and concrete placement.
- 239 1. Support tendons as required to provide profiles shown on installation drawings. Position supports
240 at high and low points and at intervals not exceeding 48 inches. Ensure that tendon profiles
241 between high and low points are smooth parabolic curves.
- 242 2. Attach tendons to supporting chairs and reinforcement without damaging tendon sheathing.
- 243 3. Support slab tendons independent of beam reinforcement.
- 244 C. Maintain tendon profile within maximum allowable deviations from design profile as follows:
- 245 1. 1/8 inch for member depth less than or equal to 8 inches.
246 2. 3/8 inch for member depth greater than 8 inches and less than or equal to 24 inches.
247 3. 1/2 inch for member depth greater than 24 inches.
- 248 D. Maintain minimum radius of curvature of 480-strand diameters for lateral deviations to avoid openings,
249 ducts, and embedded items. Maintain a minimum of 2 inches of separation between tendons at
250 locations of curvature.

- 251 E. Limit tendon bundles to five tendons. Do not twist or entwine tendons within a bundle. Maintain a
252 minimum distance of 12 inches between centers of adjacent bundles.
- 253 F. If tendon locations conflict with nonprestressed reinforcement or embedded items, tendon placement
254 governs. Obtain Architect's approval before relocating tendons or tendon anchorages that interfere with
255 one another.
- 256 G. Deviations in horizontal spacing and location of slab tendons are permitted when required to avoid
257 openings and inserts.
- 258 H. Installation of Anchorage Devices:
- 259 1. Place anchorage devices at locations shown on approved installation drawings.
- 260 2. Do not switch fixed- and stressing-end anchorage locations.
- 261 3. Attach pocket formers, intermediate anchorage devices, and stressing-end anchorage devices
262 securely to bulkhead forms. Install stressing-end and intermediate anchorage devices
263 perpendicular to tendon axis.
- 264 4. Install tendons straight, without vertical or horizontal curvature, for a minimum of 12 inches behind
265 stressing-end and intermediate anchorages.
- 266 5. Embed intermediate anchorage devices at construction joints in first concrete placed at joint.
- 267 6. Minimum splice length in reinforcing bars at anchorages is 24 inches. Stagger splices a minimum
268 of 60 inches.
- 269 7. Place fixed-end anchorage devices in formwork at locations shown on installation drawings.
270 Support anchorages firmly to avoid movement during concrete placement.
- 271 8. Remove loose caps on fixed-end anchorages, refill with post-tensioning coating, and re-attach caps
272 to achieve a watertight enclosure.
- 273 I. Maintain minimum concrete cover as follows:
- 274 1. From Exterior Edge of Concrete to Wedge Cavity: 1-1/2 inches.
- 275 2. From Exterior Edge of Concrete to Strand Tail: 3/4 inch.
- 276 3. From Exterior Edge of Concrete to Wedge-Cavity Cap: 1 inch.
- 277 4. Top, Bottom, and Edge Cover for Anchorage Devices: 3/4 inch.
- 278 J. Maintain minimum clearance of 6 inches between tendons and openings.
- 279 K. Prior to concrete placement, mark tendon locations on formwork with spray paint.
- 280 L. Do not install sleeves within 36 inches of anchorages after tendon layout has been inspected.
- 281 M. Do not install conduit, pipe, or embeds requiring movement of tendons after tendon layout has been
282 inspected.
- 283 N. Do not use couplers unless location has been approved by Architect.

284 3.4 SHEATHING INSPECTION AND REPAIR

- 285 A. Inspect sheathing for damage after installing tendons. Repair damaged areas by restoring post-
286 tensioning coating and repairing or replacing tendon sheathing.
- 287 1. Ensure that sheathing is watertight and there are no air voids.
- 288 2. Follow tape repair procedures in PTI's "Field Procedures Manual for Unbonded Single Strand
289 Tendons."
- 290 B. Maximum length of exposed strand behind anchorages is as follows:
- 291 1. Fixed End: 12 inches.
- 292 2. Intermediate and Stressing End: 1 inch.
- 293 a. Cover exposed strand with encapsulation sleeve to prevent contact with concrete.
- 294 C. Immediately remove and replace tendons that have damaged strand.

295 3.5 CONCRETE PLACEMENT

- 296 A. Do not place concrete until placement of tendons and nonprestressed-steel reinforcement has been
297 inspected by special inspector of testing agency.
- 298 B. Provide Architect and testing agency a minimum of 48 hours' notice before concrete placement.
- 299 C. Place concrete as specified in Section 03 30 00 "Cast-in-Place Concrete." Ensure compaction of
300 concrete around anchorages.
- 301 D. Ensure that position of tendon and nonprestressed-steel reinforcement does not change during
302 concrete placement. Reposition tendons and nonprestressed-steel reinforcement moved during
303 concrete placement to original location.

304 E. Ensure that method of concrete placement does not damage tendon sheathing. Do not support pump
305 lines, chutes, or other concrete-placing equipment on tendons.

306 **3.6 TENDON STRESSING**

307 A. Calibrate stressing jacks and gages at start of project and at least every six months thereafter. Keep
308 copies of calibration certificates for each jack-and-gage pair on Project site that are available for
309 inspection. Exercise care in handling stressing equipment to ensure that proper calibration is
310 maintained.

311 B. Stress tendons only under supervision of a qualified post-tensioning superintendent.

312 C. Do not begin stressing operations until concrete strength has reached 3000 psi as indicated by
313 compression tests of field-cured cylinders.

314 D. Complete stressing within 96 hours of concrete placement.

315 E. If concrete has not reached required strength, obtain Architect's approval to partially stress tendons and
316 delay final stressing until concrete has reached required strength.

317 F. Stage stress transfer girders according to schedule shown on the Contract Drawings.

318 G. If detensioning and restressing of tendon is required, discard wedges used in original stressing and
319 provide new wedges.

320 H. Mark and measure elongations according to PTI's "Field Procedures Manual for Unbonded Single
321 Strand Tendons." Measure elongations to closest 1/8 inch.

322 I. Submit stressing records within one day of completion of stressing. If discrepancies between measured
323 and calculated elongations exceed plus or minus 7 percent, resolve these discrepancies to satisfaction
324 of Architect.

325 J. Prestressing will be considered acceptable if gage pressures shown on stressing record correspond to
326 required stressing force and calculated and measured elongations agree within 7 percent.

327 K. If measured elongations deviate from calculated elongations by more than 7 percent, additional testing,
328 restressing, strengthening, or replacing of affected elements may be required.

329 L. Stressing Records: Testing agency shall record the following information during stressing operations:

330 1. Name of Project.

331 2. Date of approved installation drawings used for installation and stressing.

332 3. Floor number and concrete placement area.

333 4. Date of stressing operation.

334 5. Weather conditions including temperature and rainfall.

335 6. Name and signature of inspector.

336 7. Name of individual in charge of stressing operation.

337 8. Serial or identification numbers of jack and gage.

338 9. Date of jack-and-gage calibration certificates.

339 10. Gage pressure to achieve required stressing force per supplied calibration chart.

340 11. Tendon identification mark.

341 12. Calculated tendon elongation.

342 13. Actual tendon elongation.

343 14. Actual gage pressure.

344 **3.7 TENDON FINISHING**

345 A. Do not cut strand tails or cover anchorages until stressing records have been reviewed and approved
346 by Architect.

347 B. Cut strand tails as soon as possible after approval of elongations.

348 C. Cut strand tail between 1/2 and 3/4 inch from wedges. Do not damage tendon or concrete during
349 removal of strand tail. Acceptable methods of cutting strand tail include the following:

350 1. Oxyacetylene flame.

351 2. Abrasive wheel.

352 3. Hydraulic shears.

353 4. Plasma cutting.

354 D. Install caps and sleeves on intermediate anchorages within one day of stressing.

355 E. Cut strand tails and install caps on stressing-end anchorages within one day of Architect's acceptance
356 of elongations.

357 F. Patch stressing pockets within one day of cutting strand tail. Clean inside surface of pocket to remove
358 laitance or post-tensioning coating before installing patch material. Finish patch material flush with
359 adjacent concrete.

360 **3.8 FIELD QUALITY CONTROL**

- 361 A. Testing Agency: Owner will engage a qualified testing agency to perform tests and inspections.
- 362 1. Before concrete placement, special inspector will inspect the following for compliance with post-
363 tensioning installation drawings and the Contract Documents:
- 364 a. Location and number of tendons.
- 365 b. Tendon profiles and cover.
- 366 c. Installation of backup bars, hairpins, and other nonprestressed reinforcement shown on post-
367 tensioning installation drawings.
- 368 d. Installation of pocket formers and anchorage devices.
- 369 e. Repair of damaged sheathing.
- 370 f. Connections between sheathing and anchorage devices.
- 371 2. Special inspector will record tendon elongations during stressing.
- 372 3. Special inspector will immediately report deviations from the Contract Documents to Architect.
- 373 B. Prepare test and inspection reports.

374 **3.9 PROTECTION**

- 375 A. Do not expose tendons to electric ground currents, welding sparks, or temperatures that would degrade
376 components.
- 377 B. Protect exposed components within one workday of their exposure during installation.
- 378 C. Prevent water from entering tendons during installation and stressing.
- 379 D. Provide weather protection to stressing-end anchorages if strand tails are not cut within 10 days of
380 stressing the tendons.

381 **3.10 REPAIRS**

- 382 A. Submit repair procedure to Architect for evaluation and approval.
- 383 B. Do not proceed with repairs requiring removal of concrete unless authorized in writing by Architect.

31 **PART 1 - GENERAL**

32 **1.1 SUMMARY**

- 33 A. Section Includes:
- 34 1. Concrete masonry units.
- 35 B. Related Sections:
- 36 1. Steel and concrete lintels: Refer to Structural General Notes and Drawings.

37 **1.2 DEFINITIONS**

- 38 A. CMU(s): Concrete masonry unit(s).
- 39 B. Indigenous Materials: Materials and products that are manufactured within 300 miles (482 km) of Project
- 40 site from materials that have been extracted, harvested, or recovered, as well as manufactured, within 300
- 41 miles (482 km) of Project site.

42 **1.3 ACTION SUBMITTALS**

- 43 A. Product Data: For each type of product.
- 44 B. Sustainable Design Submittals:
- 45 1. Product Certificates: For regional materials, indicating location of material manufacturer and point of
- 46 extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each
- 47 regional material.
- 48 C. Samples: For each type and color of the following:
- 49 1. Exposed CMUs.
- 50 2. Pigmented and colored-aggregate mortar.
- 51

- 1 **1.4 INFORMATIONAL SUBMITTALS**
- 2 A. Material Certificates: For each type and size of product. For masonry units, include data on material
- 3 properties and material test reports substantiating compliance with requirements.
- 4 B. Mix Designs: For each type of mortar, Include description of type and proportions of ingredients.
- 5 1. Include test reports for mortar mixes required to comply with property specification. Test according
- 6 to ASTM C 109/C 109M for compressive strength, ASTM C 1506 for water retention, and
- 7 ASTM C 91/C 91M for air content.
- 8 2. Include test reports, according to ASTM C 1019, for grout mixes required to comply with compressive
- 9 strength requirement.
- 10 **1.5 QUALITY ASSURANCE**
- 11 A. Comply with the applicable recommendations of the TEK Information Series, National Concrete Masonry
- 12 Association, (N.C.M.A.), current editions, in addition to the requirements specified herein.
- 13 B. Comply with the requirements of TMS 402/ACI 530/ASCE 5, Building Code Requirements for Masonry
- 14 Structures & TMS 602/ACI 530.1/ASCE 6, Specifications for Masonry Structures, current editions.
- 15 C. Sample Panels: Build sample panels to verify selections made under Sample submittals and to demonstrate
- 16 aesthetic effects. Comply with requirements in Section 01 43 39 "Quality Requirements" for mockups.
- 17 1. Build sample panels for typical exterior stone veneer faced walls and interior burnished concrete
- 18 masonry walls in sizes approximately 60 inches long by 48 inches high by full thickness.
- 19 **1.6 FIELD CONDITIONS**
- 20 A. Cold-Weather Requirements: Do not use frozen materials or materials mixed or coated with ice or frost. Do
- 21 not build on frozen substrates. Remove and replace unit masonry damaged by frost or by freezing conditions.
- 22 Comply with cold-weather construction requirements contained in TMS 602/ACI 530.1/ASCE 6.
- 23 B. Hot-Weather Requirements: Comply with hot-weather construction requirements contained in
- 24 TMS 602/ACI 530.1/ASCE 6.

25 **PART 2 - PRODUCTS**

- 26 **2.1 UNIT MASONRY, GENERAL**
- 27 A. Masonry Standard: Comply with TMS 602/ACI 530.1/ASCE 6, except as modified by requirements in the
- 28 Contract Documents.
- 29 B. Defective Units: Referenced masonry unit standards may allow a certain percentage of units to contain
- 30 chips, cracks, or other defects exceeding limits stated. Do not use units where such defects are exposed in
- 31 the completed Work.
- 32 C. Fire-Resistance Ratings: Comply with requirements for fire-resistance-rated assembly designs indicated.
- 33 1. Where fire-resistance-rated construction is indicated, units shall be listed and labeled by a qualified
- 34 testing agency acceptable to authorities having jurisdiction.
- 35 2. Tests shall comply with UL 618 "Standards of Concrete Masonry Units".
- 36 3. Each unit shall be stamped "Classified UL--See Certificate".
- 37 **2.2 CONCRETE MASONRY UNITS**
- 38 1. 6" Nominal width: CMU-1
- 39 2. 8" Nominal width: CMU-2,
- 40 B. Regional Materials: CMUs shall be manufactured within 300 miles of Project site.
- 41 C. Shapes: Provide shapes indicated and as follows, with exposed surfaces matching exposed faces of
- 42 adjacent units unless otherwise indicated.
- 43 1. Provide special shapes for lintels, corners, jambs, sashes, movement joints, headers, bonding, and
- 44 other special conditions.
- 45 D. Integral Water Repellent: Provide units made with integral water repellent for exposed units and where
- 46 indicated.
- 47 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
- 48 that may be incorporated into the Work include, but are not limited to the following:
- 49 a. ACM Chemistries.
- 50 b. BASF Corporation; Construction Systems.
- 51 c. GCP Applied Technologies (formerly Grace Construction Products).
- 52 E. CMUs: ASTM C 90.
- 53 1. Density Classification: Medium weight.
- 54

- 1 **2.3 NON-LOADBEARING BURNISHED CONCRETE MASONRY UNITS**
- 2 A. Basis of Design: Premier Ultra Burnished masonry units as manufactured and distributed by County
- 3 Materials Corporation
- 4 B. Acceptable manufacturers providing comparable products shall be Anchor Block Company, and Air Vol
- 5 Block.
- 6 C. Description: Integrally pigmented burnished units. Normal weight, integrally pigmented hollow units with
- 7 burnished faces as scheduled or required and with a net area compressive strength of greater than or equal
- 8 to 1900 psi.
- 9 1. Compliance: ASTM C 90.
- 10 2. Coloring: Integral, through-body coloring; synthetic or natural iron oxide pigments.
- 11 3. Integral Polymer Emulsion Water Repellent as provided by manufacturer.
- 12 4. Size and Shape: As indicated on Drawings.
- 13 5. Color: As indicated on Drawings.
- 14 6. Mortar – Colored Mortar to match Architect's sample
- 15 7. Provide field applied anti-graffiti coating
- 16 **2.4 CONCRETE LINTELS**
- 17 A. Refer to Structural Drawings.
- 18 B. Concrete Lintels: ASTM C 1623, matching CMUs in color, texture, and density classification; and with
- 19 reinforcing bars indicated. Provide lintels with net-area compressive strength not less than that of CMUs.
- 20 **2.5 MORTAR AND GROUT MATERIALS**
- 21 A. Regional Materials: Aggregate for mortar and grout, cement, and lime shall be manufactured within 300
- 22 miles of Project site.
- 23 B. Portland Cement: ASTM C 150/C 150M, Type I or II, except Type III may be used for cold-weather
- 24 construction. Provide natural color or white cement as required to produce mortar color indicated.
- 25 C. Hydrated Lime: ASTM C 207, Type S.
- 26 D. Portland Cement-Lime Mix: Packaged blend of portland cement and hydrated lime containing no other
- 27 ingredients.
- 28 E. Aggregate for Mortar: ASTM C 144.
- 29 1. White-Mortar Aggregates: Natural white sand or crushed white stone.
- 30 2. Colored-Mortar Aggregates: Natural sand or crushed stone of color necessary to produce required
- 31 mortar color.
- 32 F. Aggregate for Grout: ASTM C 404.
- 33 G. Colored Cement Products: Packaged blend made from portland cement and hydrated lime or mortar cement
- 34 and mortar pigments, all complying with specified requirements, and containing no other ingredients.
- 35 1. Formulate blend as required to produce color indicated or, if not indicated, as selected from
- 36 manufacturer's standard colors.
- 37 2. Pigments shall not exceed 10 percent of portland cement by weight.
- 38 3. Pigments shall not exceed 5 percent of mortar cement by weight.
- 39 H. Cold-Weather Admixture: Nonchloride, noncorrosive, accelerating admixture complying with
- 40 ASTM C 494/C 494M, Type C, and recommended by manufacturer for use in masonry mortar of
- 41 composition indicated.
- 42 I. Water-Repellent Admixture: Liquid water-repellent mortar admixture intended for use with CMUs containing
- 43 integral water repellent from same manufacturer.
- 44 J. Water: Potable.
- 45 **2.6 REINFORCEMENT**
- 46 A. Masonry-Joint Reinforcement, General: ASTM A 951/A 951M.
- 47 1. Ladder Type Reinforcing: Provide in lengths of not less than 10 feet, with prefabricated corner and
- 48 tee units.
- 49 2. Interior Walls: Mill- galvanized, carbon steel.
- 50 3. Exterior Walls: Hot-dip galvanized carbon steel.
- 51 4. Wire Size for Side Rods: 0.187-inch diameter.
- 52 5. Wire Size for Cross Rods: 0.187-inch diameter.
- 53 6. Spacing of Cross Rods: Not more than 16 inches o.c.

- 1 **2.7 EMBEDDED FLASHING MATERIALS**
- 2 A. Single-Wythe CMU Flashing System: System of CMU cell flashing pans and interlocking CMU web covers
- 3 made from UV-resistant, high-density polyethylene. Cell flashing pans have integral weep spouts designed
- 4 to be built into mortar bed joints and that extend into the cell to prevent clogging with mortar.
- 5 **2.8 MISCELLANEOUS MASONRY ACCESSORIES**
- 6 A. Compressible Filler: Premolded filler strips complying with ASTM D 1056, Grade 2A1; compressible up to
- 7 35 percent; of width and thickness indicated; formulated from neoprene.
- 8 B. Preformed Control-Joint Gaskets: Made from styrene-butadiene-rubber compound, complying with
- 9 ASTM D 2000, Designation M2AA-805 and designed to fit standard sash block and to maintain lateral
- 10 stability in masonry wall; size and configuration as indicated on Structural Drawings..
- 11 C. Bond-Breaker Strips: Asphalt-saturated felt complying with ASTM D 226/D 226M, Type I (No. 15 asphalt
- 12 felt).
- 13 D. Top of wall restraint anchors: one of the following: Refer to Structural Drawings.
- 14 1. Homan and Bernard PTA series anchors: PTA 420 with plastic tube sleeve
- 15 2. Wire Bond partition top anchor 4301 with plastic tube sleeve
- 16 3. Heckman masonry wall stabilizer #19 with #421 plastic tube sleeve
- 17 **2.9 MORTAR AND GROUT MIXES**
- 18 A. General: Do not use admixtures, including pigments, air-entraining agents, accelerators, retarders, water-
- 19 repellent agents, antifreeze compounds, or other admixtures unless otherwise indicated.
- 20 1. Do not use calcium chloride in mortar or grout.
- 21 2. Use masonry cement mortar unless otherwise indicated.
- 22 3. Use portland cement-lime mortar.
- 23 4. For reinforced masonry, use portland cement-lime or masonry cement mortar.
- 24 5. Add cold-weather admixture (if used) at same rate for all mortar that will be exposed to view,
- 25 regardless of weather conditions, to ensure that mortar color is consistent.
- 26 B. Preblended, Dry Mortar Mix: Furnish dry mortar ingredients in form of a preblended mix. Measure quantities
- 27 by weight to ensure accurate proportions, and thoroughly blend ingredients before delivering to Project site.
- 28 C. Mortar for Unit Masonry: Comply with ASTM C 270, Property Specification. Provide the following types of
- 29 mortar for applications stated unless another type is indicated.
- 30 1. For mortar parge coats, use Type S or Type N.
- 31 2. For interior nonload-bearing partitions, Type O may be used instead of Type N.
- 32 D. Grout for Unit Masonry: Comply with ASTM C 476.
- 33 1. Use grout of type indicated or, if not otherwise indicated, of type (fine or coarse) that will comply with
- 34 TMS 602/ACI 530.1/ASCE 6 for dimensions of grout spaces and pour height.
- 35 2. Proportion grout in accordance with ASTM C 476, Table 1 or paragraph 4.2.2 for specified 28-day
- 36 compressive strength indicated, but not less than 2000 psi.
- 37 3. Provide grout with a slump of 8 to 11 inches as measured according to ASTM C 143/C 143M.

38 **PART 3 - EXECUTION**

- 39 **3.1 INSTALLATION, GENERAL**
- 40 A. Use full-size units without cutting if possible. If cutting is required to provide a continuous pattern or to fit
- 41 adjoining construction, cut units with motor-driven saws; provide clean, sharp, unchipped edges. Allow units
- 42 to dry before laying unless wetting of units is specified. Install cut units with cut surfaces and, where possible,
- 43 cut edges concealed.
- 44 **3.2 TOLERANCES**
- 45 A. Dimensions and Locations of Elements:
- 46 1. For dimensions in cross section or elevation, do not vary by more than plus 1/2 inch or minus 1/4
- 47 inch.
- 48 2. For location of elements in plan, do not vary from that indicated by more than plus or minus 1/2 inch.
- 49 3. For location of elements in elevation, do not vary from that indicated by more than plus or minus 1/4
- 50 inch in a story height or 1/2 inch total.
- 51 B. Control and Expansion Joints:
- 52 1. Provide vertical control and building expansion joints in masonry where shown on the Drawings. If
- 53 not shown on the Drawings, comply with the recommendations of NCMA as reviewed by the Architect
- 54 prior to construction of joint. Confirm with Structural Engineer and Architect before laying out walls.
- 55

- 1 C. Lines and Levels:
2 1. For bed joints and top surfaces of bearing walls, do not vary from level by more than 1/4 inch in 10
3 feet, or 1/2-inch maximum.
4 2. For conspicuous horizontal lines, such as lintels, sills, parapets, and reveals, do not vary from level
5 by more than 1/8 inch in 10 feet, 1/4 inch in 20 feet, or 1/2-inch maximum.
6 3. For vertical lines and surfaces, do not vary from plumb by more than 1/4 inch in 10 feet, 3/8 inch in
7 20 feet, or 1/2-inch maximum.
8 4. For conspicuous vertical lines, such as external corners, door jambs, reveals, and expansion and
9 control joints, do not vary from plumb by more than 1/8 inch in 10 feet, 1/4 inch in 20 feet, or 1/2-inch
10 maximum.
11 5. For lines and surfaces, do not vary from straight by more than 1/4 inch in 10 feet, 3/8 inch in 20 feet,
12 or 1/2-inch maximum.
13 D. Joints:
14 1. For bed joints, do not vary from thickness indicated by more than plus or minus 1/8 inch, with a
15 maximum thickness limited to 1/2 inch.
16 2. For head and collar joints, do not vary from thickness indicated by more than plus 3/8 inch or minus
17 1/4 inch.
18 3. For exposed head joints, do not vary from thickness indicated by more than plus or minus 1/8 inch.

19 3.3 LAYING MASONRY WALLS

- 20 A. Lay out walls in advance for accurate spacing of surface bond patterns with uniform joint thicknesses and
21 for accurate location of openings, movement-type joints, returns, and offsets. Avoid using less-than-half-size
22 units, particularly at corners, jambs, and, where possible, at other locations.
23 B. Bond Pattern for Exposed Masonry: Unless otherwise indicated, lay exposed masonry in running bond; do
24 not use units with less-than-nominal 4-inch horizontal face dimensions at corners or jambs.
25 C. Built-in Work: As construction progresses, build in items specified in this and other Sections. Fill in solidly
26 with masonry around built-in items.
27 D. Fill space between steel frames and masonry solidly with mortar unless otherwise indicated.
28 E. Where built-in items are to be embedded in cores of hollow masonry units, place a layer of metal lath, wire
29 mesh, or plastic mesh in the joint below, and rod mortar or grout into core.
30 F. Fill cores in hollow CMUs with grout 24 inches under bearing plates, beams, lintels, posts, and similar items
31 unless otherwise indicated.

32 3.4 MORTAR BEDDING AND JOINTING

- 33 A. Lay hollow CMUs as follows:
34 1. Bed face shells in mortar and make head joints of depth equal to bed joints.
35 2. Bed webs in mortar in all courses of piers, columns, and pilasters.
36 3. Bed webs in mortar in grouted masonry, including starting course on footings.
37 4. Fully bed entire units, including areas under cells, at starting course on footings where cells are not
38 grouted.
39 B. Lay solid CMUs with completely filled bed and head joints; butter ends with sufficient mortar to fill head joints
40 and shove into place. Do not deeply furrow bed joints or slush head joints.
41 C. Tool exposed joints slightly concave when thumbprint hard, using a jointer larger than joint thickness unless
42 otherwise indicated.
43 D. Cut joints flush for masonry walls to receive plaster or other direct-applied finishes (other than paint) unless
44 otherwise indicated.

45 3.5 MASONRY-JOINT REINFORCEMENT

- 46 A. General: Install entire length of longitudinal side rods in mortar with a minimum cover of 5/8 inch on exterior
47 side of walls, 1/2 inch elsewhere. Lap reinforcement a minimum of 6 inches.
48 1. Space reinforcement not more than 16 inches o.c.
49 2. Provide reinforcement not more than 8 inches above and below wall openings and extending 12
50 inches beyond openings in addition to continuous reinforcement.
51 B. Interrupt joint reinforcement at control and expansion joints unless otherwise indicated.
52 C. Provide continuity at wall intersections by using prefabricated T-shaped units.
53 D. Provide continuity at corners by using prefabricated L-shaped units.
54

- 1 **3.6 ANCHORING MASONRY TO STRUCTURAL STEEL AND CONCRETE**
2 A. Anchor masonry to structural steel and concrete, where masonry abuts or faces structural steel or concrete,
3 to comply with the following:
4 1. Provide an open space not less than 1/2 inch wide between masonry and structural steel or concrete
5 unless otherwise indicated. Keep open space free of mortar and other rigid materials.
6 2. Anchor masonry with anchors embedded in masonry joints and attached to structure.
7 3. Space anchors as indicated, but not more than 24 inches o.c. vertically and 36 inches o.c.
8 horizontally.
- 9 **3.7 FLASHING**
10 A. Install single-wythe CMU flashing system in bed joints of CMU walls where indicated to comply with
11 manufacturer's written instructions. Install CMU cell pans with upturned edges located below face shells and
12 webs of CMUs above and with weep spouts aligned with face of wall. Install CMU web covers so that they
13 cover upturned edges of CMU cell pans at CMU webs and extend from face shell to face shell.
- 14 **3.8 FIELD QUALITY CONTROL**
15 A. Testing and Inspecting: Owner will engage special inspectors to perform tests and inspections and prepare
16 reports. Allow inspectors access to scaffolding and work areas as needed to perform tests and inspections.
17 Retesting of materials that fail to comply with specified requirements shall be done at Contractor's expense.
18 B. Inspections: Special inspections according to Level B in TMS 402/ACI 530/ASCE 5.
19 1. Begin masonry construction only after inspectors have verified proportions of site-prepared mortar.
20 2. Place grout only after inspectors have verified compliance of grout spaces and of grades, sizes, and
21 locations of reinforcement.
22 3. Place grout only after inspectors have verified proportions of site-prepared grout.
23 C. Testing Prior to Construction: One set of tests.
24 D. Testing Frequency: One set of tests for each 5000 sq. ft. of wall area or portion thereof.
25 E. Concrete Masonry Unit Test: For each type of unit provided, according to ASTM C 140 for compressive
26 strength.
27 F. Mortar Aggregate Ratio Test (Proportion Specification): For each mix provided, according to ASTM C 780.
28 G. Mortar Test (Property Specification): For each mix provided, according to ASTM C 780. Test mortar for
29 compressive strength.
30 H. Grout Test (Compressive Strength): For each mix provided, according to ASTM C 1019.
- 31 **3.9 REPAIRING, POINTING, AND CLEANING**
32 A. In-Progress Cleaning: Clean unit masonry as work progresses by dry brushing to remove mortar fins and
33 smears before tooling joints.
34 B. Final Cleaning: After mortar is thoroughly set and cured, clean exposed masonry as follows:
35 1. Test cleaning methods on sample wall panel; leave one-half of panel uncleaned for comparison
36 purposes.
37 2. Clean concrete masonry by applicable cleaning methods indicated in NCMA TEK 8-4A.
- 38 **3.10 MASONRY WASTE DISPOSAL**
39 A. Waste Disposal as Fill Material: Dispose of clean masonry waste, including excess or soil-contaminated
40 sand, waste mortar, and broken masonry units, by crushing and mixing with fill material as fill is placed.
41 1. Do not dispose of masonry waste as fill within 36 inches of finished grade.
42 B. Masonry Waste Recycling: Return broken CMUs not used as fill to manufacturer for recycling.
43 C. Excess Masonry Waste: Remove excess clean masonry waste that cannot be used as fill, as described
44 above or recycled, and other masonry waste, and legally dispose of off Owner's property.

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:
 - 1. Dimension stone panels set with individual anchors.
- B. Related Requirements:
 - 1. Section 03 30 00 "Cast-in-Place Concrete" for installing inserts and weld plates in concrete for anchoring dimension stone cladding.
 - 2. Section 04 20 00 "Unit Masonry" for installing inserts in unit masonry for anchoring dimension stone cladding.

1.3 DEFINITIONS

- A. Definitions contained in ASTM C 119 apply to this Section.
- B. Dimension Stone Cladding Assembly: An exterior wall covering system consisting of dimension stone panels together with anchors, secondary weather barrier (sheathing), fasteners, and sealants used to secure the stone to the building structure and to produce a weather-resistant covering.
- C. IBC: International Building Code.

1.4 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at Project site.

1.5 ACTION SUBMITTALS

- A. Product Data: For each variety of stone, stone accessory, and manufactured product.

- 1 B. Shop Drawings: Show fabrication and installation details for dimension stone cladding assembly, including
2 dimensions and profiles of stone units.
3 1. Show locations and details of joints both within dimension stone cladding assembly and between
4 dimension stone cladding assembly and other construction.
5 2. Show locations and details of anchors.
6 3. Show direction of veining, grain, or other directional pattern.
7 C. Stone Samples for Verification: Sets for each variety, color, and finish of stone required; not less than 12
8 inches square.
9 1. Sets shall consist of at least five Samples, exhibiting extremes of the full range of color and other
10 visual characteristics expected and will establish the standard by which stone will be judged.

11 **1.6 INFORMATIONAL SUBMITTALS**

- 12 A. Source quality-control reports.

13 **1.7 QUALITY ASSURANCE**

- 14 A. Fabricator Qualifications: Shop that employs skilled workers who custom fabricate dimension stone cladding
15 assemblies similar to that required for this Project and whose products have a record of successful in-service
16 performance.
17 B. Installer Qualifications: A firm or individual experienced in installing dimension stone cladding assemblies
18 similar in material, design, and extent to that indicated for this Project, whose work has a record of successful
19 in-service performance.
20 C. Testing Agency Qualifications: Qualified according to ASTM E 329 for testing indicated.
21 D. Welding Qualifications: Qualify procedures and personnel according to AWS D1.1/D1.1M, "Structural
22 Welding Code – Steel and AWS D1.3, "Structural Welding Code - Sheet Steel."
23 E. Mockups: Build mockups to verify selections made under Sample submittals and to demonstrate aesthetic
24 effects and set quality standards for materials and execution.
25 1. Build mockups of typical exterior wall area not less than 15 feet long by 10 feet high.
26 a. Include typical components, attachments to building structure, and methods of installation.
27 b. Include sealant-filled joint complying with requirements in Section 07 92 00 "Joint Sealants."
28 2. Approval of mockups does not constitute approval of deviations from the Contract Documents
29 contained in mockups unless Architect specifically approves such deviations in writing.
30 3. Subject to compliance with requirements, approved mockups may become part of the completed
31 Work if undisturbed at time of Substantial Completion.

32 **1.8 DELIVERY, STORAGE, AND HANDLING**

- 33 A. Store and handle stone and related materials to prevent deterioration or damage due to moisture,
34 temperature changes, contaminants, corrosion, breaking, chipping, and other causes.
35 1. Lift stone with wide-belt slings; do not use wire rope or ropes that might cause staining. Move stone,
36 if required, using dollies with cushioned wood supports.
37 2. Store stone on wood skids or pallets with non-staining, waterproof covers. Arrange to distribute
38 weight evenly and to prevent damage to stone. Ventilate under covers to prevent condensation.
39 B. Mark stone units, on surface that will be concealed after installation, with designations used on Shop
40 Drawings to identify individual stone units. Orient markings on vertical panels so that they are right side up
41 when units are installed.
42 C. Deliver sealants to Project site in original unopened containers labeled with manufacturer's name, product
43 name and designation, color, expiration period, pot life, curing time, and mixing instructions for
44 multicomponent materials.

45 **1.9 FIELD CONDITIONS**

- 46 A. Protect dimension stone cladding during erection by doing the following:
47 1. Cover tops of dimension stone cladding installation with nonstaining, waterproof sheeting at end of
48 each day's work. Cover partially completed structures when work is not in progress. Extend cover a
49 minimum of 24 inches down both sides and hold securely in place.
50 2. Protect base of walls from rain-splashed mud and mortar splatter by coverings spread on ground and
51 over wall surface.

52 **1.10 COORDINATION**

- 53 A. Coordinate installation of inserts that are to be embedded in concrete or masonry, flashing reglets, and
54 similar items to be used by dimension stone cladding Installer for anchoring, supporting, and flashing of
55 dimension stone cladding assembly. Furnish setting drawings, templates, and directions for installing such
56 items and deliver to Project site in time for installation.

- 1 B. Time delivery and installation of dimension stone cladding to avoid extended on-site storage and to
2 coordinate with work adjacent to dimension stone cladding.

3 **PART 2 - PRODUCTS**

4 **2.1 MANUFACTURERS**

- 5 A. Source Limitations for Stone: Obtain stone, regardless of finish, from single quarry, whether specified in this
6 Section or in another Section of the Specifications, with resources to provide materials of consistent quality
7 in appearance and physical properties.
8 1. For stone types that include same list of varieties and sources, provide same variety from same
9 source for each.
10 2. Make quarried blocks available for examination by Architect.
11 B. Source Limitations for Other Materials: Obtain each type of stone accessory and other material from single
12 manufacturer for each product.

13 **2.2 PERFORMANCE REQUIREMENTS**

- 14 A. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.
15 1. Temperature Change: 120 deg F, ambient; 150 deg F, material surfaces.
16 B. Provisions for Fabrication and Erection Tolerances: Allow for fabrication and erection tolerances of building's
17 structural system. Concrete fabrication and erection tolerances are specified in Section 03 30 00 "Cast-in-
18 Place Concrete."

19 **2.3 LIMESTONE (LM-1)**

- 20 A. Material Standard: Comply with ASTM C 568.
21 1. Classification: II Medium-Density.
22 B. Description: Oolitic limestone.
23 C. Varieties and Sources: Indiana limestone quarried in Lawrence, Monroe, or Owen Counties, Indiana.
24 1. Indiana Limestone Grade and Color: Standard, buff, according to grade and color classification
25 established by ILI.
26 D. Cut: Vein and Fleuri as indicated or scheduled.
27 1. Orientation of Veining: As indicated.
28 E. Cut stone from one block or contiguous, matched blocks in which natural markings occur.
29 F. Finish: Smooth finish.
30 G. Match Architect's samples for color, finish, and other stone characteristics relating to aesthetic effects.
31 H. Thickness: Not less than 2 inches unless otherwise indicated.

32 **2.4 GRANITE (GR-1)**

- 33 A. Granite Building Stone Standard: ASTM C 615
34 B. Association Standard: The National Building Granite Quarries Association's (NBGQA) "Specifications for
35 Architectural Granite."
36 C. Properties:
37 1. Absorption by Weight: 0.40 percent maximum, per ASTM C97.
38 2. Density: 160 lb per cu. ft. minimum, per ASTM C97.
39 3. Compressive Strength: 19,000 psi minimum, per ASTM C 170.
40 4. Modulus of Rupture: 1,500 psi minimum, as tested dry and perpendicular to grain per ASTM C 99.
41 5. Flexural or Bending Strength: 1200 psi minimum, as tested per ASTM C 880 modified.
42 6. Color: Exterior wall Base Facing: Absolute Black
43 7. Finish: Polished

44 **2.5 ANCHORS AND FASTENERS**

- 45 A. Fabricate anchors from stainless steel, ASTM A 240/A 240M or ASTM A 666, Type 316; temper as required
46 to support loads imposed without exceeding allowable design stresses. Fabricate dowels and pins for
47 anchors from stainless steel, ASTM A 276, Type 316.
48 B. Cast-in-Place Concrete Inserts: Either threaded or wedge type unless otherwise indicated; galvanized
49 ferrous castings, either ASTM A 47/A 47M malleable iron or ASTM A 27/A 27M cast steel, with capability to
50 sustain, without failure, a load equal to 4 times the loads imposed as determined by testing per ASTM E
51 488, conducted by a qualified independent testing agency. Provide bolts, washers, and shims as needed,
52 all hot-dip galvanized per ASTM F 2329.
53

- 1 C. Postinstalled Anchor Bolts for Concrete and Masonry: Torque-controlled expansion anchors, or undercut
2 anchors made from stainless-steel components complying with ASTM F 593 and ASTM F 594, Alloy Group
3 1 or 2 for bolts and nuts; ASTM A 240/A 240M, ASTM A 276, or ASTM A 666, Type 304 or 316, for anchors,
4 with capability to sustain, without failure, a load equal to 4 times the loads imposed, for concrete, or 6 times
5 the load imposed, for masonry, as determined by testing per ASTM E 488, conducted by a qualified
6 independent testing agency.

7 **2.6 STONE FABRICATION**

- 8 A. General: Fabricate stone units in sizes and shapes required to comply with requirements indicated.
9 1. For limestone, comply with recommendations in ILLI's "Indiana Limestone Handbook."
10 B. Control depth of stone and back check to maintain minimum clearance of 1-1/2 inches between backs of
11 stone units and surfaces or projections of structural members, fireproofing (if any), backup walls, and other
12 work behind stone.
13 C. Dress joints (bed and vertical) straight and at right angle to face unless otherwise indicated. Shape beds to
14 fit supports.
15 D. Cut and drill sinkages and holes in stone for anchors, fasteners, supports, and lifting devices as indicated or
16 needed to set stone securely in place.
17 E. Finish exposed faces and edges of stone, to comply with requirements indicated for finish and to match
18 approved samples and mockups.
19 F. Quirk-miter corners unless otherwise indicated; provide for cramp anchorage in top and bottom bed joints of
20 corner pieces.
21 G. Cut stone to produce uniform joints [**3/8 inch**][**1/2 inch**]**<Insert dimension>** wide and in locations indicated.
22 H. Contiguous Work: Provide chases, reveals, reglets, openings, and similar features as required to
23 accommodate contiguous work.
24 I. Fabricate molded work, including washes and drips, to produce stone shapes with a uniform profile
25 throughout entire unit length, with precisely formed arris slightly eased to prevent snipping, and with
26 matching profile at joints between units.
27 1. Produce moldings and molded edges with machines that use abrasive shaping wheels made to
28 reverse contour of molding shape.
29 J. Clean backs of stone to remove rust stains, iron particles, and stone dust.
30 K. Inspect finished stone units at fabrication plant for compliance with requirements for appearance, material,
31 and fabrication. Replace defective units.
32 1. Grade and mark stone for overall uniform appearance when assembled in place. Natural variations
33 in appearance are acceptable if installed stone units match range of colors and other appearance
34 characteristics represented in approved samples and mockups.

35 **2.7 FABRICATION OF BACKUP STRUCTURE**

- 36 A. Fabrication of Steel Stud Frames: Fabricate and assemble by welding to comply with requirements in
37 Section 05 40 00 "Cold-Formed Metal Framing."
38 1. Weld secondary weather barrier (sheathing) to outside face of steel stud frames. Use continuous
39 welds at all four edges of sheets to provide continuous weather seal.
40 2. Clean welds, bolted connections, and abraded areas and repair galvanizing to comply with ASTM A
41 780/A 780M.

42 **2.8 SHOP-PAINTED STEEL FINISHES**

- 43 A. General: Paint uncoated steel backup structure before delivering to Project site to comply with SSPC-PA 1,
44 "Paint Application Specification No. 1: Shop, Field, and Maintenance Painting of Steel."
45 B. Surface Preparation: After fabricating steel items, prepare surfaces to comply with SSPC-SP 6/NACE No.
46 3, "Commercial Blast Cleaning."
47 C. Apply one coat of fast-curing, lead- and chromate-free, universal modified-alkyd primer complying with
48 MPI#76. [After primer has dried, apply one coat of exterior alkyd enamel complying with MPI#96 of a different
49 color than primer.]
50 D. Apply two-coat, high-performance coating system consisting of epoxy zinc-rich primer, complying with
51 MPI#20 and topcoat of high-build epoxy coating, complying with MPI#108.
52

1 **2.9 SOURCE QUALITY CONTROL**

- 2 A. Testing Agency: Engage a qualified testing agency to perform source quality-control testing.
3 1. Furnish test specimens randomly selected from same blocks as actual materials proposed for
4 incorporation into the Work.
5 2. Flexural Strength Tests: ASTM C 880/C 880M, performed on specimens of same thickness,
6 orientation of cut, and finish as installed stone. One set of test specimens is required to be tested for
7 every 10,000 sq. ft., but not fewer than two sets for each stone variety.

8 **PART 3 - EXECUTION**

9 **3.1 EXAMINATION**

- 10 A. Examine surfaces to receive dimension stone cladding and conditions under which dimension stone cladding
11 will be installed, with Installer present, for compliance with requirements for installation tolerances and other
12 conditions affecting performance of dimension stone cladding.
13 B. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of dimension
14 stone cladding.
15 C. Proceed with installation only after unsatisfactory conditions have been corrected.

16 **3.2 SETTING DIMENSION STONE CLADDING, GENERAL**

- 17 A. Before setting stone, clean surfaces that are dirty or stained by removing soil, stains, and foreign materials.
18 Clean stone by thoroughly scrubbing with fiber brushes and then drenching with clear water. Use only mild
19 cleaning compounds that contain no caustic or harsh materials or abrasives.
20 B. Coat limestone with dampproofing to extent indicated below:
21 1. Stone at Grade: Beds, joints, and back surfaces to at least 12 inches above finish-grade elevations.
22 2. Stone Extending Below Grade: Beds, joints, back surfaces, and face surfaces below grade.
23 3. Allow dampproofing to cure before setting dampproofed stone. Do not damage or remove
24 dampproofing while handling and setting stone.
25 C. Execute dimension stone cladding installation by skilled mechanics and employ skilled stone fitters at Project
26 site to do necessary field cutting as stone is set.
27 1. Use power saws with diamond blades to cut stone. Produce lines cut straight and true, with edges
28 eased slightly to prevent snipping.
29 D. Contiguous Work: Provide reveals, reglets, and openings as required to accommodate contiguous work.
30 E. Set stone to comply with requirements indicated. Install anchors, supports, fasteners, and other attachments
31 indicated or necessary to secure dimension stone cladding in place. Shim and adjust anchors, supports, and
32 accessories to set stone accurately in locations indicated, with uniform joints of widths indicated, and with
33 edges and faces aligned according to established relationships and indicated tolerances.
34 F. Provide expansion, control, and pressure-relieving joints of widths and at locations indicated.
35 1. Sealing expansion and other joints is specified in Section 07 92 00 "Joint Sealants."
36 G. Keep cavities open where unfilled space is indicated between back of stone units and backup wall; do not
37 fill cavities with mortar or grout.

38 **3.3 SETTING MECHANICALLY ANCHORED DIMENSION STONE CLADDING**

- 39 A. Set dimension stone cladding with mechanical anchors without mortar unless otherwise indicated.
40 B. Attach anchors securely to stone and to backup surfaces. Comply with recommendations in ASTM C 1242.
41 C. Provide compressible filler in ends of dowel holes and bottoms of kerfs to prevent end bearing of dowels
42 and anchor tabs on stone. Fill remainder of anchor holes and kerfs with sealant indicated for filling kerfs.
43 D. Set stone supported on clips or continuous angles on resilient setting shims. Use material of thickness
44 required to maintain uniform joint widths and to prevent point loading of stone on anchors. Hold shims back
45 from face of stone a distance at least equal to width of joint.

46 **3.4 INSTALLATION TOLERANCES**

- 47 A. Variation from Plumb: For vertical lines and surfaces of walls, do not exceed 1/4 inch in 10 feet, 3/8 inch in
48 20 feet, or 1/2 inch in 40 feet or more. For external corners, corners and jambs within 20 feet of an entrance,
49 expansion joints, and other conspicuous lines, do not exceed 1/8 inch in 10 feet, 1/4 inch in 20 feet, or 3/8
50 inch in 40 feet or more.
51 B. Variation from Level: For lintels, sills, water tables, parapets, horizontal bands, horizontal grooves, and other
52 conspicuous lines, do not exceed 1/8 inch in 10 feet, 1/4 inch in 20 feet, or 3/8 inch maximum.
53 C. Variation of Linear Building Line: For positions shown in plan and related portions of walls and partitions, do
54 not exceed 1/4 inch in 20 feet or 1/2 inch in 40 feet or more.

- 1 D. Variation in Cross-Sectional Dimensions: For thickness of walls from dimensions indicated, do not exceed
2 plus or minus 1/4 inch.
3 E. Variation in Joint Width: Do not vary from average joint width more than plus or minus 1/8 inch or a quarter
4 of nominal joint width, whichever is less. For joints within 60 inches of each other, do not vary more than 1/8
5 inch or a quarter of nominal joint width, whichever is less from one to the other.
6 F. Variation in Plane between Adjacent Stone Units (Lipping): Do not exceed 1/16-inch difference between
7 planes of adjacent units.

8 **3.5 ADJUSTING AND CLEANING**

- 9 A. Remove and replace broken, chipped, stained, or otherwise damaged stone, defective joints, and dimension
10 stone cladding that does not match approved samples [**and mockups**]. Damaged stone may be repaired if
11 Architect approves methods and results.
12 B. Replace damaged or defective work in a manner that results in dimension stone cladding's matching
13 approved samples [**and mockups**], complying with other requirements, and showing no evidence of
14 replacement.
15 C. In-Progress Cleaning: Clean dimension stone cladding as work progresses. Remove excess sealant and
16 smears as sealant is installed.
17 D. Final Cleaning: Clean dimension stone cladding no fewer than six days after completion of pointing and
18 sealing, using clean water and stiff-bristle fiber brushes. Do not use wire brushes, acid-type cleaning agents,
19 cleaning agents containing caustic compounds or abrasives, or other materials or methods that could
20 damage stone.
21

38 **PART 1 - GENERAL**

39 **1.1 SUMMARY**

- 40 A. Section Includes:
 - 41 1. Metal fabrications
 - 42 a. Miscellaneous steel framing and supports.
 - 43 b. Miscellaneous steel trim.
 - 44 c. Grating.
 - 45 d. Metal bollards.
 - 46 e. Public parking – steel sign posts.
 - 47 f. Elevator machine beams, hoist beams, and divider beams.
 - 48 g. Elevator pit ladder.
 - 49 h. Ships ladders.
 - 50 i. Aluminum tube frames.
 - 51 j. Vault access hatch
 - 52 2. Madison Fire Department KNOX Box.
- 53 B. Products furnished, but not installed, under this Section include the following:
 - 54 1. Loose steel lintels.
 - 55 2. Anchor bolts, steel pipe sleeves, slotted-channel inserts, and wedge-type inserts indicated to be cast
 - 56 into concrete or built into unit masonry.
 - 57

- 1 **1.2 COORDINATION**
- 2 A. Coordinate selection of shop primers with topcoats to be applied over them. Comply with paint and coating
- 3 manufacturers' written recommendations to ensure that shop primers and topcoats are compatible with one
- 4 another.
- 5 B. Coordinate installation of metal fabrications that are anchored to or that receive other work. Furnish setting
- 6 drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor
- 7 bolts, and items with integral anchors, that are to be embedded in concrete or masonry. Deliver such items
- 8 to Project site in time for installation.
- 9 **1.3 ACTION SUBMITTALS**
- 10 A. Product Data: For the following:
- 11 1. Paint products.
- 12 2. Grout.
- 13 B. Sustainable Design Submittals:
- 14 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
- 15 cost.
- 16 C. Shop Drawings: Show fabrication and installation details. Include plans, elevations, sections, and details of
- 17 metal fabrications and their connections. Show anchorage and accessory items.
- 18 D. Samples for Verification: For each type and finish of extruded nosing and tread.
- 19 E. Delegated-Design Submittal: For ladders, including analysis data signed and sealed by the qualified
- 20 professional engineer licensed in Wisconsin responsible for their preparation.
- 21 **1.4 INFORMATIONAL SUBMITTALS**
- 22 A. Qualification Data: For professional engineer.
- 23 B. Mill Certificates: Signed by stainless-steel manufacturers, certifying that products furnished comply with
- 24 requirements.
- 25 C. Welding certificates.
- 26 D. Paint Compatibility Certificates: From manufacturers of topcoats applied over shop primers, certifying that
- 27 shop primers are compatible with topcoats.
- 28 E. Research/Evaluation Reports: For post-installed anchors, from ICC-ES.
- 29 **1.5 QUALITY ASSURANCE**
- 30 A. Welding Qualifications: Qualify procedures and personnel according to AWS D1.1/D1.1M, "Structural
- 31 Welding Code - Steel."
- 32 B. Welding Qualifications: Qualify procedures and personnel according to the following:
- 33 1. AWS D1.1/D1.1M, "Structural Welding Code - Steel."
- 34 2. AWS D1.2/D1.2M, "Structural Welding Code - Aluminum."
- 35 3. AWS D1.6/D1.6M, "Structural Welding Code - Stainless Steel."
- 36 **1.6 FIELD CONDITIONS**
- 37 A. Field Measurements: Verify actual locations of walls and other construction contiguous with metal
- 38 fabrications by field measurements before fabrication.

39 **PART 2 - PRODUCTS**

- 40 **2.1 PERFORMANCE REQUIREMENTS**
- 41 A. Delegated Design: Engage a qualified professional engineer licensed in the State of Wisconsin, as defined
- 42 in Section 01 40 00 "Quality Requirements," to design ladders.
- 43 B. Structural Performance of Aluminum Ladders: Aluminum ladders shall withstand the effects of loads and
- 44 stresses within limits and under conditions specified in ANSI A14.3.
- 45 C. Structural Performance of Stairs: Metal stairs shall withstand the effects of gravity loads and the following
- 46 loads and stresses within limits and under conditions indicated:
- 47 1. Uniform Load: 100 lbf/sq. ft.
- 48 2. Concentrated Load: 300 lbf applied on an area of 4 sq. in.
- 49 3. Uniform and concentrated loads need not be assumed to act concurrently.
- 50 4. Stair Framing: Capable of withstanding stresses resulting from railing loads in addition to loads
- 51 specified above.
- 52 5. Limit deflection of treads, platforms, and framing members to L/360 or 1/4 inch, whichever is less.
- 53

- 1 D. Structural Performance of Railings: Railings shall withstand the effects of gravity loads and the following
2 loads and stresses within limits and under conditions indicated:
3 1. Handrails and Top Rails of Guards:
4 a. Uniform load of 50 lbf/ft. applied in any direction.
5 b. Concentrated load of 200 lbf applied in any direction.
6 c. Uniform and concentrated loads need not be assumed to act concurrently.
7 2. Infill of Guards:
8 a. Concentrated load of 50 lbf applied horizontally on an area of 1 sq. ft.
9 b. Infill load and other loads need not be assumed to act concurrently.
10 E. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes acting
11 on exterior metal fabrications by preventing buckling, opening of joints, overstressing of components, failure
12 of connections, and other detrimental effects.
13 1. Temperature Change: 120 deg F, ambient; 180 deg F, material surfaces.

14 **2.2 METALS**

- 15 A. Metal Surfaces, General: Provide materials with smooth, flat surfaces unless otherwise indicated. For metal
16 fabrications exposed to view in the completed Work, provide materials without seam marks, roller marks,
17 rolled trade names, or blemishes.
18 B. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled
19 content not less than 25 percent.
20 C. Steel Plates, Shapes, and Bars: ASTM A 36/A 36M.
21 D. Stainless-Steel Bars and Shapes: ASTM A 276, Type 316L.
22 E. Steel Tubing: ASTM A 500/A 500M, cold-formed steel tubing.
23 F. Steel Pipe: ASTM A 53/A 53M, Standard Weight (Schedule 40) unless otherwise indicated.

24 **2.3 FASTENERS**

- 25 A. General: Unless otherwise indicated, provide Type 316 stainless-steel fasteners for exterior use and zinc-
26 plated fasteners with coating complying with ASTM B 633 or ASTM F 1941, Class Fe/Zn 5, at exterior walls.
27 Select fasteners for type, grade, and class required.
28 1. Provide stainless-steel fasteners for fastening aluminum.
29 2. Provide stainless-steel fasteners for fastening stainless steel.
30 B. Cast-in-Place Anchors in Concrete: Either threaded type or wedge type unless otherwise indicated;
31 galvanized ferrous castings, either ASTM A 47/A 47M malleable iron or ASTM A 27/A 27M cast steel.
32 Provide bolts, washers, and shims as needed, all hot-dip galvanized per ASTM F 2329.
33 C. Post-Installed Anchors: Torque-controlled expansion anchors or chemical anchors.
34 1. Material for Interior Locations: Carbon-steel components zinc plated to comply with ASTM B 633 or
35 ASTM F 1941, Class Fe/Zn 5, unless otherwise indicated.
36 2. Material for Exterior Locations and Where Stainless Steel Is Indicated: Alloy Group 2 stainless-steel
37 bolts, ASTM F 593, and nuts, ASTM F 594.
38 D. Slotted-Channel Inserts: Cold-formed, hot-dip galvanized-steel box channels (struts) complying with MFMA-
39 4, 1-5/8 by 7/8 inches by length indicated with anchor straps or studs not less than 3 inches long at not more
40 than 8 inches o.c. Provide with temporary filler and tee-head bolts, complete with washers and nuts, all zinc-
41 plated to comply with ASTM B 633, Class Fe/Zn 5, as needed for fastening to inserts.

42 **2.4 MISCELLANEOUS MATERIALS**

- 43 A. Shop Primers (Exposed to view locations): Provide primers that comply with Section 09 91 23 "Interior
44 Painting".
45 B. Water-Based Primer (interior concealed locations): Emulsion type, anticorrosive primer for mildly corrosive
46 environments that is resistant to flash rusting when applied to cleaned steel, complying with MPI#107 and
47 compatible with topcoat.
48 C. Galvanizing Repair Paint: High-zinc-dust-content paint complying with SSPC-Paint 20 and compatible with
49 paints specified to be used over it.
50 D. Bituminous Paint: Cold-applied asphalt emulsion complying with ASTM D 1187/D 1187M.
51 E. Nonshrink, Nonmetallic Grout: Factory-packaged, nonstaining, noncorrosive, nongaseous grout complying
52 with ASTM C 1107/C 1107M. Provide grout specifically recommended by manufacturer for interior and
53 exterior applications.
54 F. Concrete for steel bollards, bollard footings: Comply with requirements in Section 03 30 00 "Cast-in-Place
55 Concrete" for normal-weight, air-entrained, concrete with a minimum 28-day compressive strength of 3000
56 psi.
57

- 1 **2.5 FABRICATION, GENERAL**
- 2 A. Shop Assembly: Preassemble items in the shop to greatest extent possible. Use connections that maintain
- 3 structural value of joined pieces.
- 4 B. Cut, drill, and punch metals cleanly and accurately. Remove burrs and ease edges. Remove sharp or rough
- 5 areas on exposed surfaces.
- 6 C. Weld corners and seams continuously to comply with the following:
- 7 1. Use materials and methods that minimize distortion and develop strength and corrosion resistance
- 8 of base metals.
- 9 2. Obtain fusion without undercut or overlap.
- 10 3. Remove welding flux immediately.
- 11 4. At exposed connections, finish exposed welds and surfaces smooth and blended.
- 12 D. Form exposed connections with hairline joints, flush and smooth, using concealed fasteners or welds where
- 13 possible. Locate joints where least conspicuous.
- 14 E. Fabricate seams and other connections that are exposed to weather in a manner to exclude water. Provide
- 15 weep holes where water may accumulate.
- 16 F. Where units are indicated to be cast into concrete or built into masonry, equip with integrally welded steel
- 17 strap anchors not less than 8 inches from ends and corners of units and 24 inches o.c.
- 18 **2.6 MISCELLANEOUS FRAMING AND SUPPORTS**
- 19 A. General: Provide steel framing and supports not specified in other Sections as needed to complete the Work.
- 20 B. Fabricate units from steel shapes, plates, and bars of welded construction unless otherwise indicated.
- 21 Fabricate to sizes, shapes, and profiles indicated and as necessary to receive adjacent construction.
- 22 **2.7 MISCELLANEOUS STEEL TRIM**
- 23 A. Unless otherwise indicated, fabricate units from steel shapes, plates, and bars of profiles shown with
- 24 continuously welded joints and smooth exposed edges. Miter corners and use concealed field splices where
- 25 possible.
- 26 B. Provide cutouts, fittings, and anchorages as needed to coordinate assembly and installation with other work.
- 27 **2.8 GRATING**
- 28 A. Pressure-Locked Steel Grating: Fabricated by pressing rectangular flush-top crossbars into slotted bearing
- 29 bars or swaging crossbars between bearing bars.
- 30 1. Areaway On The West Wall:
- 31 a. 1-1/4 inches x 1/8 inch (32 mm by 3 mm) bearing bars at 1-3/16 inches spacing.
- 32 b. Design Free Area: 84% free area. Minimum Free Area Required: 60%.
- 33 c. Crossbar Spacing: 4 inches (102 mm) o.c.
- 34 d. Surface: Plain.
- 35 e. Perimeter Plate: 1/4 inch (6 mm).
- 36 f. Steel Finish: Hot-dip galvanized with a coating weight of not less than 1.8 oz./sq. ft. (550
- 37 g/sq. m) of coated surface.
- 38 g. Bearing Shelf Angle: 3 inches x height of grating.
- 39 B. Welded Steel Grating:
- 40 1. Transformer Vault:
- 41 a. Manufacturer: Hughes and Brothers as required by MG&E. They have sized it for required
- 42 area. We have done a drawing, attached.
- 43 b. Refer to Drawing and Details.
- 44 **2.9 METAL BOLLARDS**
- 45 A. Fabricate metal bollards from Schedule 40 steel pipe
- 46 1. Cap bollards with 1/4-inch-thick steel plate.
- 47 B. Fabricate bollards with 3/8-inch-thick steel baseplates for bolting to concrete slab. Drill baseplates at all four
- 48 corners for 3/4-inch anchor bolts.
- 49 C. Fabricate sleeves for bollard anchorage from steel pipe or tubing with 1/4-inch-thick steel plate welded to
- 50 bottom of sleeve.
- 51 D. Prime bollards with zinc-rich primer.
- 52

- 1 **2.10 PIPE OR DOWNSPOUT GUARDS**
- 2 A. Fabricate pipe and downspout guards from 3/8-inch-thick by 12-inch-wide steel plate, bent to fit flat against
- 3 the wall or column at both ends and to fit around pipe with 2-inch clearance between pipe and pipe guard.
- 4 Drill each end for two 3/4-inch anchor bolts.
- 5 B. Galvanize pipe and downspout guards.
- 6 **2.11 METAL SHIPS' LADDERS**
- 7 A. Provide metal ships' ladders where indicated. Fabricate of open-type construction with channel or plate
- 8 stringers and pipe and tube railings unless otherwise indicated. Provide brackets and fittings for installation.
- 9 1. Treads shall be not less than 5 inches exclusive of nosing or less than 8-1/2 inches including the
- 10 nosing, and riser height shall be not more than 9-1/2 inches.
- 11 2. Fabricate ships' ladders, including railings from steel.
- 12 3. Fabricate treads from welded or pressure-locked steel bar grating. Limit openings in gratings to no
- 13 more than 1/2 inch in least dimension.
- 14 4. Fabricate treads from abrasive-surface floor plate.
- 15 5. Comply with applicable railing requirements in Section 055213 "Pipe and Tube Railings."
- 16 B. Galvanize steel ships' ladders, including treads, railings, brackets, and fasteners.
- 17 **2.12 ALUMINUM TUBE FRAMES**
- 18 A. Design: Picture framing and structural support of various exterior elements as indicated
- 19 B. Aluminum Tube Frames: Fabricate railings to comply with requirements indicated for design, dimensions,
- 20 details, finish, and member sizes, including wall thickness of tube, and anchorage, but not less than that
- 21 needed to withstand indicated loads. Refer to Drawings (A300)
- 22 1. Aluminum: Alloy and temper recommended by manufacturer for type of use and finish indicated.
- 23 a. Sheet and Plate: ASTM B 209.
- 24 b. Extruded Bars, Rods, Profiles, and Tubes: ASTM B 221.
- 25 c. Extruded Structural Pipe and Tubes: ASTM B 429/B 429M.
- 26 d. Structural Profiles: ASTM B 308/B 308M.
- 27 2. Brackets and Reinforcements: Manufacturer's standard high-strength aluminum with nonstaining,
- 28 nonferrous shims for aligning system components.
- 29 3. Finish: Fluoropolymer resin based two coat finish containing 70% "Kynar 500" resin to match PPG
- 30 Duranar Sunstorm Pewter:
- 31 **2.13 VAULT ACCESS DOOR**
- 32 A. Product: Bilco J-AL Channel Frame – AASHTO H-20 Heavy Duty Access Door.
- 33 B. Finish: Mill.
- 34 C. Hinges and Hardware: Stainless steel type 316 – standard.
- 35 **2.14 ABRASIVE METAL STAIR NOSINGS**
- 36 A. Cast-Metal Units: Cast iron, with an integral-abrasive, as-cast finish consisting of aluminum oxide, silicon
- 37 carbide, or a combination of both. Fabricate units in lengths necessary to accurately fit openings or
- 38 conditions:
- 39 1. Manufacturers:
- 40 a. American Safety Tread Company
- 41 b. Balco, Inc
- 42 c. Barry Pattern and Foundry Company
- 43 d. Safe-T-Metal Company, Inc.
- 44 2. Nosings: Two-piece units, 3 inches wide, with subchannel for casting into concrete steps.
- 45 B. Provide anchors for embedding units in concrete, either integral or applied to units, as standard with
- 46 manufacturer.
- 47 C. Apply bituminous paint to concealed surfaces of cast-metal units.
- 48

- 1 **2.15 COUNTER SUPPORTS**
- 2 A. Counter Support Brackets: Rakks counter support brackets, clear anodized aluminum by Rangine Corp.,
3 Needham, MA, as follows:
- 4 1. Anodized aluminum face plates with adhesive backing, Model No. EHFP-0202.
5 2. Bracket Model No. EH-1818, for countertops up to 25-inch depth, 18" x 18", 450-pound capacity,
6 surface-mounted.
7 3. Bracket Model No. EH-1824, for countertops up to 30-inch depth, 18" x 24", 450-pound capacity,
8 surface-mounted.
9 4. Bracket Model No. EH-1818-FM, for countertops up to 25-inch depth, 18" x 20", 300-pound capacity,
10 flush-mounted for countertops.
11 5. Bracket Model No. EH-1824-FM, for countertops up to 30-inch depth, 18" x 26", 300-pound capacity,
12 flush-mounted for countertops.
13 6. Bracket Model No. EH-1212, for shelf supports
- 14 **2.16 MADISON FIRE DEPARTMENT KNOX BOX**
- 15 A. Key Vaults: A key box shall be installed and incorporated into the entry access bollard as located on plan
16 and as detailed. Fabrication and installation shall comply with Madison City Ordinance 918.
- 17 B. Provide and place Fire Department alert decals (e.g. Knox Company stock #1001) on each exterior door or
18 door frame of the building near the lock cylinder. Regarding label placement for a group of doors, one label
19 for each pair of doors or a group of contiguous doors shall be required.
- 20 **2.17 LOOSE BEARING AND LEVELING PLATES**
- 21 A. Provide loose bearing and leveling plates for steel items bearing on masonry or concrete construction. Drill
22 plates to receive anchor bolts and for grouting.
- 23 **2.18 STEEL WELD PLATES AND ANGLES**
- 24 A. Provide steel weld plates and angles not specified in other Sections, for items supported from concrete
25 construction as needed to complete the Work. Provide each unit with no fewer than two integrally welded
26 steel strap anchors for embedding in concrete.
- 27 **2.19 FINISHES, GENERAL**
- 28 A. Finish metal fabrications after assembly.
- 29 **2.20 STEEL AND IRON FINISHES**
- 30 A. Galvanizing: Hot-dip galvanize items as indicated to comply with ASTM A 153/A 153M for steel and iron
31 hardware and with ASTM A 123/A 123M for other steel and iron products.
- 32 B. Shop prime iron and steel items not indicated to be galvanized unless they are to be embedded in concrete,
33 sprayed-on fireproofing, or masonry, or unless otherwise indicated.
- 34 C. Preparation for Shop Priming: Prepare surfaces to comply with requirements indicated below:
- 35 1. Exterior Items: SSPC-SP 6/NACE No. 3, "Commercial Blast Cleaning."
36 2. Items Indicated to Receive Zinc-Rich Primer: SSPC-SP 6/NACE No. 3, "Commercial Blast Cleaning."
37 3. Other Items: SSPC-SP 3, "Power Tool Cleaning."

38 **PART 3 - EXECUTION**

- 39 **3.1 INSTALLATION, GENERAL**
- 40 A. Cutting, Fitting, and Placement: Perform cutting, drilling, and fitting required for installing metal fabrications.
41 Set metal fabrications accurately in location, alignment, and elevation; with edges and surfaces level, plumb,
42 true, and free of rack; and measured from established lines and levels.
- 43 B. Fit exposed connections accurately together to form hairline joints. Weld connections that are not to be left
44 as exposed joints but cannot be shop welded because of shipping size limitations. Do not weld, cut, or
45 abrade surfaces of exterior units that have been hot-dip galvanized after fabrication and are for bolted or
46 screwed field connections.
- 47 C. Field Welding: Comply with the following requirements:
- 48 1. Use materials and methods that minimize distortion and develop strength and corrosion resistance
49 of base metals.
50 2. Obtain fusion without undercut or overlap.
51 3. Remove welding flux immediately.
52 4. At exposed connections, finish exposed welds and surfaces smooth and blended so no roughness
53 shows after finishing and contour of welded surface matches that of adjacent surface.

- 1 D. Fastening to In-Place Construction: Provide anchorage devices and fasteners where metal fabrications are
2 required to be fastened to in-place construction.
- 3 E. Provide temporary bracing or anchors in formwork for items that are to be built into concrete, masonry, or
4 similar construction.
- 5 **3.2 INSTALLING PIPE GUARDS**
- 6 A. Provide pipe guards at exposed vertical pipes in parking garage where not protected by curbs or other
7 barriers. Install by bolting to wall or column with expansion anchors. Provide four 3/4-inch bolts at each pipe
8 guard. Mount pipe guards with top edge 26 inches above driving surface.
- 9 **3.3 INSTALLING STAIR NOSINGS**
- 10 A. Install stair nosing on tread two-piece insert.
- 11 B. Two piece nosings embedded in concrete steps or curbs, align insert nosings flush with riser faces and level
12 with tread surfaces.
- 13 **3.4 INSTALLING METAL BOLLARDS**
- 14 A. Anchor pedestrian control bollards as indicated on the drawings.
- 15 B. Anchor vehicle drive bollards in place with concrete footings. Place concrete and vibrate or tamp for
16 consolidation. Support and brace bollards in position until concrete has cured.
- 17 C. Fill bollards solidly with concrete, mounding top surface to shed water.
- 18 **3.5 INSTALLING BEARING AND LEVELING PLATES**
- 19 A. Clean concrete and masonry bearing surfaces of bond-reducing materials, and roughen to improve bond to
20 surfaces. Clean bottom surface of plates.
- 21 B. Set bearing and leveling plates on wedges, shims, or leveling nuts. After bearing members have been
22 positioned and plumbed, tighten anchor bolts. Do not remove wedges or shims but, if protruding, cut off flush
23 with edge of bearing plate before packing with nonshrink grout. Pack grout solidly between bearing surfaces
24 and plates to ensure that no voids remain.
- 25 **3.6 ADJUSTING AND CLEANING**
- 26 A. Touchup Painting: Immediately after erection, clean field welds, bolted connections, and abraded areas.
27 Paint uncoated and abraded areas with the same material as used for shop painting to comply with SSPC-
28 PA 1 for touching up shop-painted surfaces.
- 29 B. Galvanized Surfaces: Clean field welds, bolted connections, and abraded areas and repair galvanizing to
30 comply with ASTM A 780/A 780M.

26 **PART 1 - GENERAL**

27 **1.1 SUMMARY**

- 28 A. Section Includes:
- 29 1. Stainless-steel pipe and tube railings.

30 **1.2 COORDINATION**

- 31 A. Coordinate selection of shop primers with topcoats to be applied over them. Comply with paint and coating
- 32 manufacturers' written recommendations to ensure that shop primers and topcoats are compatible with one
- 33 another.
- 34 B. Coordinate installation of anchorages for railings. Furnish setting drawings, templates, and directions for
- 35 installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors, that
- 36 are to be embedded in concrete or masonry. Deliver such items to Project site in time for installation.
- 37 C. Schedule installation so wall attachments are made only to completed walls. Do not support railings
- 38 temporarily by any means that do not satisfy structural performance requirements.

39 **1.3 ACTION SUBMITTALS**

- 40 A. Product Data: For the following:
- 41 1. Manufacturer's product lines of mechanically connected railings.
- 42 2. Railing brackets.
- 43 3. Grout and anchoring cement.
- 44 B. Sustainable Design Submittals:
- 45 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
- 46 cost.
- 47 2. Regional Materials Certificate.
- 48 C. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.
- 49 D. Samples: For each type of exposed finish required.
- 50 E. Delegated-Design Submittal: For railings, including analysis data signed and sealed by the qualified
- 51 professional engineer licensed in the State of Wisconsin responsible for their preparation.

52 **1.4 INFORMATIONAL SUBMITTALS**

- 53 A. Product Test Reports: For pipe and tube railings, for tests performed by a qualified testing agency, according
- 54 to ASTM E 894 and ASTM E 935.

1 **1.5 QUALITY ASSURANCE**

- 2 A. Welding Qualifications: Qualify procedures and personnel according to the following:
3 1. AWS D1.6/D1.6M, "Structural Welding Code - Stainless Steel."

4 **1.6 DELIVERY, STORAGE, AND HANDLING**

- 5 A. Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary
6 protective covering before shipping.

7 **PART 2 - PRODUCTS**

8 **2.1 MANUFACTURERS**

- 9 A. Stainless Steel Pipe and Tube Railings:
10 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
11 that may be incorporated into the Work include, but are not limited to, the following:
12 2. Indigenous Materials: Materials and products shall be manufactured within 300 miles (482 km) of
13 Project site.
14 a. Wagner, R & B, Inc.
15 b. McMaster-Carr
16 c. Steele Solutions, Inc.

17 **2.2 PERFORMANCE REQUIREMENTS**

- 18 A. Delegated Design: Engage a qualified professional engineer licensed in the State of Wisconsin, as defined
19 in Section 01 40 00 "Quality Requirements," to design railings, including attachment to building construction.
20 B. Structural Performance: Railings, including attachment to building construction, shall withstand the effects
21 of gravity loads and the following loads and stresses within limits and under conditions indicated:
22 1. Handrails and Top Rails of Guards:
23 a. Uniform load of 50 lbf/ ft. applied in any direction.
24 b. Concentrated load of 200 lbf applied in any direction.
25 c. Uniform and concentrated loads need not be assumed to act concurrently.
26 2. Infill of Guards:
27 a. Concentrated load of 50 lbf applied horizontally on an area of 1 sq. ft..
28 b. Infill load and other loads need not be assumed to act concurrently.

29 **2.3 METALS, GENERAL**

- 30 A. Brackets, Flanges, and Anchors: Cast or formed metal of same type of material and finish as supported rails
31 unless otherwise indicated.
32 1. Provide type of bracket with flange tapped for concealed anchorage to threaded hanger bolt and that
33 provides 1-1/2-inch clearance from inside face of handrail to finished wall surface.

34 **2.4 STAINLESS STEEL**

- 35 A. Tubing: ASTM A 554, Grade MT 316L.
36 B. Castings: ASTM A 743/A 743M, Grade CF 8M or CF 3M.
37 C. Plate and Sheet: ASTM A 240/A 240M or ASTM A 666, Type 316L.

38 **2.5 FASTENERS**

- 39 A. General: Provide the following:
40 1. Ungalvanized-Steel Railings: Plated steel fasteners complying with ASTM B 633 or ASTM F 1941,
41 Class Fe/Zn 5 for zinc coating.
42 2. Hot-Dip Galvanized Railings: Type 304 stainless-steel.
43 B. Post-Installed Anchors: Torque-controlled expansion anchors capable of sustaining, without failure, a load
44 equal to 6 times the load imposed when installed in unit masonry and 4 times the load imposed when
45 installed in concrete, as determined by testing according to ASTM E 488/E 488M, conducted by a qualified
46 independent testing agency.
47 1. Material Where Stainless Steel Is Indicated: Alloy Group 2 (A4) stainless-steel bolts, ASTM F 593
48 (ASTM F 738M), and nuts, ASTM F 594 (ASTM F 836M).

49 **2.6 MISCELLANEOUS MATERIALS**

- 50 A. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

1 **2.7 FABRICATION**

- 2 A. General: Fabricate railings to comply with requirements indicated for design, dimensions, member sizes and
3 spacing, details, finish, and anchorage, but not less than that required to support structural loads.
4 B. Shop assemble railings to greatest extent possible to minimize field splicing and assembly. Disassemble
5 units only as necessary for shipping and handling limitations. Clearly mark units for reassembly and
6 coordinated installation. Use connections that maintain structural value of joined pieces.
7 C. Cut, drill, and punch metals cleanly and accurately. Remove burrs and ease edges to a radius of
8 approximately 1/32 inch unless otherwise indicated. Remove sharp or rough areas on exposed surfaces.
9 D. Form work true to line and level with accurate angles and surfaces.
10 E. Welded Connections: Cope components at connections to provide close fit, or use fittings designed for this
11 purpose. Weld all around at connections, including at fittings.
12 1. Use materials and methods that minimize distortion and develop strength and corrosion resistance
13 of base metals.
14 2. Obtain fusion without undercut or overlap.
15 3. Remove flux immediately.
16 4. At exposed connections, finish exposed surfaces smooth and blended so no roughness shows after
17 finishing and welded surface matches contours of adjoining surfaces.
18 F. Nonwelded Connections: Connect members with concealed mechanical fasteners and fittings. Fabricate
19 members and fittings to produce flush, smooth, rigid, hairline joints.
20 G. Form changes in direction by bending or by inserting prefabricated elbow fittings.
21 H. For changes in direction made by bending, use jigs to produce uniform curvature for each repetitive
22 configuration required. Maintain cross section of member throughout entire bend without buckling, twisting,
23 cracking, or otherwise deforming exposed surfaces of components.
24 I. Close exposed ends of railing members with prefabricated end fittings.
25 J. Provide wall returns at ends of wall-mounted handrails unless otherwise indicated.
26 K. Brackets, Flanges, Fittings, and Anchors: Provide wall brackets, flanges, miscellaneous fittings, and anchors
27 to interconnect railing members to other work unless otherwise indicated.
28 L. Provide inserts and other anchorage devices for connecting railings to concrete or masonry work. Fabricate
29 anchorage devices capable of withstanding loads imposed by railings. Coordinate anchorage devices with
30 supporting structure.
31 M. For railing posts set in concrete, provide stainless-steel sleeves not less than 6 inches long with inside
32 dimensions not less than 1/2 inch greater than outside dimensions of post, with metal plate forming bottom
33 closure.
34 N. Toe Boards: Where indicated, provide toe boards at railings around openings and at edge of open-sided
35 floors and platforms. Fabricate to dimensions and details indicated.

36 **2.8 STAINLESS-STEEL FINISHES**

- 37 A. Remove tool and die marks and stretch lines, or blend into finish.
38
39 B. Grind and polish surfaces to produce uniform, directionally textured, polished finish indicated, free of cross
40 scratches. Run grain with long dimension of each piece.
41 C. Stainless Steel Tubing Finishes:
42
43
44 1. 180-Grit Polished Finish: Uniform, directionally textured finish.
45 D. Stainless Steel Sheet and Plate Finishes:
46
47
48 1. Directional Satin Finish: ASTM A 489/A 480, No. 4.
49 E. When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces
50 chemically clean.

51 **PART 3 - EXECUTION**

52 **3.1 INSTALLATION, GENERAL**

- 53 A. Fit exposed connections together to form tight, hairline joints.
54 B. Perform cutting, drilling, and fitting required for installing railings. Set railings accurately in location,
55 alignment, and elevation; measured from established lines and levels and free of rack.

- 1 1. Do not weld, cut, or abrade surfaces of railing components that are coated or finished after fabrication
2 and that are intended for field connection by mechanical or other means without further cutting or
3 fitting.
4 2. Set posts plumb within a tolerance of 1/16 inch in 3 feet.
5 3. Align rails so variations from level for horizontal members and variations from parallel with rake of
6 steps and ramps for sloping members do not exceed 1/4 inch in 12 feet.
7 C. Control of Corrosion: Prevent galvanic action and other forms of corrosion by insulating metals and other
8 materials from direct contact with incompatible materials.
9 1. Coat, with a heavy coat of bituminous paint, concealed surfaces of aluminum that are in contact with
10 grout, concrete, masonry, wood, or dissimilar metals.
11 D. Adjust railings before anchoring to ensure matching alignment at abutting joints.
12 E. Fastening to In-Place Construction: Use anchorage devices and fasteners where necessary for securing
13 railings and for properly transferring loads to in-place construction.

14 **3.2 RAILING CONNECTIONS**

- 15 A. Nonwelded Connections: Use mechanical or adhesive joints for permanently connecting railing components.
16 Seal recessed holes of exposed locking screws using plastic cement filler colored to match finish of railings.
17 B. Welded Connections: Use fully welded joints for permanently connecting railing components. Comply with
18 requirements for welded connections in "Fabrication" Article whether welding is performed in the shop or in
19 the field.

20 **3.3 ANCHORING POSTS**

- 21 A. Anchor posts to metal surfaces with oval flanges, angle type, or floor type as required by conditions,
22 connected to posts and to metal supporting members as follows:
23 1. For stainless-steel pipe railings, weld flanges to post and bolt to supporting surfaces.
24 B. Install removable railing sections, where indicated, in slip-fit metal sockets.

25 **3.4 ATTACHING RAILINGS**

- 26 A. Anchor railing ends at walls with round flanges anchored to wall construction and welded to railing ends or
27 connected to railing ends using nonwelded connections.
28 B. Anchor railing ends to metal surfaces with flanges bolted to metal surfaces and welded to railing ends or
29 connected to railing ends using nonwelded connections.
30 C. Attach railings to wall with wall brackets, except where end flanges are used. Locate brackets as indicated
31 or, if not indicated, at spacing required to support structural loads.
32 D. Secure wall brackets and railing end flanges to building construction as follows:
33 1. For concrete and solid masonry anchorage, use drilled-in expansion shields and hanger or lag bolts.
34 2. For hollow masonry anchorage, use toggle bolts.

35 **3.5 ADJUSTING AND CLEANING**

- 36 A. Clean stainless steel by washing thoroughly with clean water and soap and rinsing with clean water.

37 **3.6 PROTECTION**

- 38 A. Protect finishes of railings from damage during construction period with temporary protective coverings
39 approved by railing manufacturer. Remove protective coverings at time of Substantial Completion.

20 3.2 [PROTECTION](#)

21 **PART 1 - GENERAL**

22 **1.1 RELATED DOCUMENTS**

- 23 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
24 Division 01 Specification Sections, apply to this Section.

25 **1.2 SUMMARY**

- 26 A. Section Includes:
27 1. Wood blocking.
28 2. Plywood backing panels.

29 **1.3 DEFINITIONS**

- 30 A. Boards or Strips: Lumber of less than 2 inches nominal (38 mm actual) size in least dimension.
31 B. Dimension Lumber: Lumber of 2 inches nominal (38 mm actual) size or greater but less than 5 inches
32 nominal (114 mm actual) size in least dimension.
33 C. Exposed Framing: Framing not concealed by other construction.

34 **1.4 ACTION SUBMITTALS**

- 35 A. Product Data: For each type of process and factory-fabricated product.
36 1. Include data for wood-preservative treatment from chemical treatment manufacturer and certification
37 by treating plant that treated materials comply with requirements. Indicate type of preservative used
38 and net amount of preservative retained.
39 2. Include data for fire-retardant treatment from chemical treatment manufacturer and certification by
40 treating plant that treated materials comply with requirements. Include physical properties of treated
41 materials based on testing by a qualified independent testing agency.
42 3. For fire-retardant treatments, include physical properties of treated lumber both before and after
43 exposure to elevated temperatures, based on testing by a qualified independent testing agency
44 according to ASTM D 5664.
45 4. For products receiving a waterborne treatment, include statement that moisture content of treated
46 materials was reduced to levels specified before shipment to Project site.
47

- 1 B. Sustainable Design Submittals:
2 1. Product Certificates: For regional materials, indicating location of material manufacturer and point of
3 extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each
4 regional material.
5 2. Product Data: For installation adhesives, indicating VOC content.
6 3. Laboratory Test Reports: For installation adhesives, indicating compliance with requirements for low-
7 emitting materials.

8 **1.5 INFORMATIONAL SUBMITTALS**

- 9 A. Material Certificates: For dimension lumber specified to comply with minimum allowable unit stresses.
10 Indicate species and grade selected for each use and design values approved by the ALSC Board of Review.
11 B. Evaluation Reports: For the following, from ICC-ES:
12 1. Wood-preserved-treated wood.
13 2. Fire-retardant-treated wood.
14 3. Engineered wood products.
15 4. Power-driven fasteners.
16 5. Post-installed anchors.

17 **1.6 DELIVERY, STORAGE, AND HANDLING**

- 18 A. Stack wood products flat with spacers beneath and between each bundle to provide air circulation. Protect
19 wood products from weather by covering with waterproof sheeting, securely anchored. Provide for air
20 circulation around stacks and under coverings.

21 **PART 2 - PRODUCTS**

22 **2.1 WOOD PRODUCTS, GENERAL**

- 23 A. Regional Materials: The following wood products shall be manufactured within 300 miles of Project site from
24 materials that have been extracted, harvested, or recovered, as well as manufactured, within 300 miles of
25 Project site.
26 1. Dimension lumber.
27 2. Laminated-veneer lumber.
28 B. Lumber: DOC PS 20 and applicable rules of grading agencies indicated. If no grading agency is indicated,
29 comply with the applicable rules of any rules-writing agency certified by the ALSC Board of Review. Grade
30 lumber by an agency certified by the ALSC Board of Review to inspect and grade lumber under the rules
31 indicated.
32 1. Factory mark each piece of lumber with grade stamp of grading agency.
33 2. Dress lumber, S4S, unless otherwise indicated.
34 C. Maximum Moisture Content of Lumber: 15 percent for 2-inch nominal thickness or less; 19 percent for more
35 than 2-inch nominal thickness unless otherwise indicated.
36 D. Engineered Wood Products: Acceptable to authorities having jurisdiction and for which current model code
37 research or evaluation reports exist that show compliance with building code in effect for Project.
38 1. Allowable design stresses, as published by manufacturer, shall meet or exceed those indicated.
39 Manufacturer's published values shall be determined from empirical data or by rational engineering
40 analysis and demonstrated by comprehensive testing performed by a qualified independent testing
41 agency.

42 **2.2 WOOD-PRESERVATIVE-TREATED LUMBER**

- 43 A. Preservative Treatment by Pressure Process: AWP A U1; Use Category UC2 for interior construction not in
44 contact with ground, Use Category UC3b for exterior construction not in contact with ground, and
45 Use Category UC4a for items in contact with ground.
46 1. Preservative Chemicals: Acceptable to authorities having jurisdiction and containing no arsenic or
47 chromium. Do not use inorganic boron (SBX) for sill plates.
48 B. Kiln-dry lumber after treatment to a maximum moisture content of 19 percent. Do not use material that is
49 warped or that does not comply with requirements for untreated material.
50 C. Mark lumber with treatment quality mark of an inspection agency approved by the ALSC Board of Review.
51 D. Application: Treat items indicated on Drawings, and the following:
52 1. Wood cants, nailers, curbs, equipment support bases, blocking, stripping, and similar members in
53 connection with roofing, flashing, vapor barriers, and waterproofing.

- 1 a. Lumber treated with wood preservatives such as Pentachlorophenol, Copper Naphthenate or
2 Copper 8-quinolinolate that adversely affect the membrane when in direct contact not
3 acceptable.
4 2. Wood sills, sleepers, blocking, furring, stripping, and similar concealed members in contact with
5 masonry or concrete.
6 3. Wood framing and furring attached directly to the interior of below-grade exterior masonry or concrete
7 walls.

8 **2.3 FIRE-RETARDANT-TREATED MATERIALS**

- 9 A. General: Where fire-retardant-treated materials are indicated, materials shall comply with requirements in
10 this article, that are acceptable to authorities having jurisdiction, and with fire-test-response characteristics
11 specified as determined by testing identical products per test method indicated by a qualified testing agency.
12 B. Fire-Retardant-Treated Lumber and Plywood by Pressure Process: Products with a flame-spread index of
13 25 or less when tested according to ASTM E 84, and with no evidence of significant progressive combustion
14 when the test is extended an additional 20 minutes, and with the flame front not extending more than 10.5
15 feet beyond the centerline of the burners at any time during the test.
16 1. Interior Type A: Treated materials shall have a moisture content of 28 percent or less when tested
17 according to ASTM D 3201 at 92 percent relative humidity. Use where exterior type is not indicated.
18 C. Kiln-dry lumber after treatment to maximum moisture content of 19 percent. Kiln-dry plywood after treatment
19 to maximum moisture content of 15 percent.
20 D. Identify fire-retardant-treated wood with appropriate classification marking of qualified testing agency.
21 E. Application: Treat all rough carpentry unless otherwise indicated.
22 1. Framing for raised platforms.
23 2. Concealed blocking.
24 3. Plywood backing panels.

25 **2.4 MISCELLANEOUS LUMBER**

- 26 A. General: Provide miscellaneous lumber indicated and lumber for support or attachment of other construction,
27 including the following:
28 1. Blocking.
29 2. Furring.
30 3. Grounds.
31 B. Concealed Boards: 15 percent maximum moisture content and any of the following species and grades:
32 1. Mixed southern pine or southern pine; No. 2 grade; SPIB.
33 2. Northern species; No. 2 Common grade; NLGA.

34 **2.5 PLYWOOD BACKING PANELS**

- 35 A. Equipment Backing Panels: Plywood, DOC PS 1, fire-retardant treated, in thickness indicated or, if not
36 indicated, not less than 3/4-inch nominal thickness.

37 **2.6 FASTENERS**

- 38 A. General: Fasteners shall be of size and type indicated and shall comply with requirements specified in this
39 article for material and manufacture.
40 1. Where rough carpentry is exposed to weather, in ground contact, pressure-preservative treated, or
41 in area of high relative humidity, provide fasteners with hot-dip zinc coating complying with
42 ASTM A 153/A 153M.
43 B. Power-Driven Fasteners: Fastener systems with an evaluation report acceptable to authorities having
44 jurisdiction, based on ICC-ES AC70.
45 C. Post-Installed Anchors: Fastener systems with an evaluation report acceptable to authorities having
46 jurisdiction, based on ICC-ES AC01, ICC-ES AC58, ICC-ES AC193 or ICC-ES AC308 as appropriate for
47 the substrate.

48 **2.7 MISCELLANEOUS MATERIALS**

- 49 A. Adhesives for Gluing Furring and Sleepers to Concrete or Masonry: Formulation complying with
50 ASTM D 3498 that is approved for use indicated by adhesive manufacturer.

1 **PART 3 - EXECUTION**

2 **3.1 INSTALLATION, GENERAL**

- 3 A. Set rough carpentry to required levels and lines, with members plumb, true to line, cut, and fitted. Fit rough
4 carpentry accurately to other construction. Locate nailers, blocking, and similar supports to comply with
5 requirements for attaching other construction.
- 6 B. Comply with AWPA M4 for applying field treatment to cut surfaces of preservative-treated lumber.
- 7 C. Where wood-preservative-treated lumber is installed adjacent to metal decking, install continuous flexible
8 flashing separator between wood and metal decking.
- 9 D. Securely attach rough carpentry work to substrate by anchoring and fastening as indicated, complying with
10 the following:
- 11 1. Table 2304.9.1, "Fastening Schedule," in ICC's International Building Code (IBC).
12 2. ICC-ES evaluation report for fastener.

13 **3.2 PROTECTION**

- 14 A. Protect wood that has been treated with inorganic boron (SBX) from weather. If, despite protection, inorganic
15 boron-treated wood becomes wet, apply EPA-registered borate treatment. Apply borate solution by spraying
16 to comply with EPA-registered label.

17 **END OF SECTION**

PART 2 – PRODUCTS

- 2.1 [PLASTIC-LAMINATE-FACED ARCHITECTURAL CABINETS](#)
- 2.2 [WOOD MATERIALS](#)
- 2.3 [FIRE-RETARDANT-TREATED MATERIALS](#)
- 2.4 [CABINET HARDWARE AND ACCESSORIES](#)
- 2.5 [MISCELLANEOUS MATERIALS](#)
- 2.6 [FABRICATION](#)

PART 3 – EXECUTION

- 3.1 [PREPARATION](#)
- 3.2 [INSTALLATION](#)
- 3.3 [ADJUSTING AND CLEANING](#)

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:
 - 1. Plastic-laminate-faced architectural cabinets.
 - 2. Wood furring, blocking, shims, and hanging strips for installing plastic-laminate-faced architectural cabinets that are not concealed within other construction.
- B. Related Requirements:
 - 1. Section 12 36 61.19 "Simulated Stone Countertops."

1.3 COORDINATION

- A. Coordinate sizes and locations of framing, blocking, furring, reinforcements, and other related units of Work specified in other Sections to support loads imposed by installed and fully loaded cabinets.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Include data for fire-retardant treatment from chemical-treatment manufacturer and certification by treating plant that treated materials comply with requirements.
- B. Sustainable Design Submittals:
 - 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
 - 2. Product Certificates: For regional materials, indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each regional material.
 - 3. Product Data: For adhesives, indicating that product contains no urea formaldehyde.
 - 4. Laboratory Test Reports: For adhesives, indicating compliance with requirements for low-emitting materials.
 - 5. Product Data: For composite wood products, indicating that product contains no urea formaldehyde.
 - 6. Laboratory Test Reports: For composite wood products, indicating compliance with requirements for low-emitting materials.
- C. Shop Drawings: For plastic-laminate-faced architectural cabinets.
 - 1. Include plans, elevations, sections, and attachment details.

- 1 2. Show locations and sizes of furring, blocking, and hanging strips, including concealed blocking and
2 reinforcement specified in other Sections.
- 3 3. Show locations and sizes of cutouts and holes for items installed in plastic-laminate architectural
4 cabinets.
- 5 4. Apply AWI Quality Certification Program label to Shop Drawings.
- 6 D. Samples: For each exposed product and for each color and texture specified, in manufacturer's or
7 fabricator's standard size.
- 8 1. Plastic laminates, for each color, pattern, and surface finish.
- 9 2. Thermoset decorative panels, for each color, pattern, and surface finish.
- 10 **1.5 INFORMATIONAL SUBMITTALS**
- 11 A. Qualification Data: For fabricator.
- 12 B. Product Certificates: For each type of product.
- 13 C. Quality Standard Compliance Certificates: AWI Quality Certification Program.
- 14 D. Evaluation Reports: For fire-retardant-treated materials, from ICC-ES.
- 15 **1.6 QUALITY ASSURANCE**
- 16 A. Fabricator Qualifications: Shop that employs skilled workers who custom fabricate products similar to those
17 required for this Project and whose products have a record of successful in-service performance.
- 18 1. Shop Certification: AWI's Quality Certification Program accredited participant.
- 19 B. Installer Qualifications: Fabricator of products.
- 20 **1.7 DELIVERY, STORAGE, AND HANDLING**
- 21 A. Do not deliver cabinets until painting and similar finish operations that might damage architectural cabinets
22 have been completed in installation areas. Store cabinets in installation areas or in areas where
23 environmental conditions comply with requirements specified in "Field Conditions" Article.
- 24 **1.8 FIELD CONDITIONS**
- 25 A. Environmental Limitations: Do not deliver or install cabinets until building is enclosed, wet-work is complete,
26 and HVAC system is operating and maintaining temperature and relative humidity at levels planned for
27 building occupants during the remainder of the construction period.

28 **PART 2 - PRODUCTS**

- 29 **2.1 PLASTIC-LAMINATE-FACED ARCHITECTURAL CABINETS**
- 30 A. Quality Standard: Unless otherwise indicated, comply with the "Architectural Woodwork Standards" for
31 grades of cabinets indicated for construction, finishes, installation, and other requirements.
- 32 1. Provide inspections of fabrication and installation together with labels and certificates from AWI
33 certification program indicating that woodwork complies with requirements of grades specified.
- 34 2. The Contract Documents contain requirements that are more stringent than the referenced quality
35 standard. Comply with requirements of Contract Documents in addition to those of the referenced
36 quality standard.
- 37 B. Grade: Custom.
- 38 C. Regional Materials: Wood products shall be manufactured within 300 miles (480 km) of Project site from
39 materials that have been extracted, harvested, or recovered, as well as manufactured, within 300 miles (480
40 km) of Project site.
- 41 D. Certified Wood: Wood products shall be certified as "FSC Pure" according to FSC STD-01-001 and FSC
42 STD-40-004.
- 43 E. Type of Construction: Frameless.
- 44 F. Door and Drawer-Front Style: Flush overlay.
- 45 G. High-Pressure Decorative Laminate: NEMA LD 3, grades as indicated or if not indicated, as required by
46 quality standard.
- 47 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
48 that may be incorporated into the Work include, but are not limited to, the following:
- 49 a. Formica Corporation.
- 50 b. Pionite: a Panolam Industries International, Inc. brand.
- 51 c. Wilsonart International Holdings, Inc.
- 52 H. Laminate Cladding for Exposed Surfaces:
- 53 1. Horizontal Surfaces: Grade HGS.
- 54 2. Vertical Surfaces: Grade VGS.

- 1 I. Materials for Semiexposed Surfaces:
- 2 1. Surfaces Other Than Drawer Bodies: Thermoset decorative panels.
- 3 2. Drawer Sides and Backs: Solid-hardwood lumber.
- 4 3. Drawer Bottoms: Hardwood plywood.
- 5 J. Concealed Backs of Panels with Exposed Plastic-Laminate Surfaces: High-pressure decorative laminate,
- 6 NEMA LD 3, Grade BKL.
- 7 K. Drawer Construction: Fabricate with exposed fronts fastened to subfront with mounting screws from interior
- 8 of body.
- 9 1. Join subfronts, backs, and sides with glued rabbeted joints supplemented by mechanical fasteners
- 10 or glued dovetail joints.
- 11 L. Colors, Patterns, and Finishes: Provide materials and products that result in colors and textures of exposed
- 12 laminate surfaces complying with the selected material.

13 2.2 WOOD MATERIALS

- 14 A. Wood Products: Provide materials that comply with requirements of referenced quality standard for each
- 15 type of architectural cabinet and quality grade specified unless otherwise indicated.
- 16 1. Wood Moisture Content: 5 to 10 percent.
- 17 B. Composite Wood and Agrifiber Products: Provide materials that comply with requirements of referenced
- 18 quality standard for each type of architectural cabinet and quality grade specified unless otherwise indicated.
- 19 1. Recycled Content of MDF and Particleboard: Postconsumer recycled content plus one-half of
- 20 preconsumer recycled content not less than 100 percent.
- 21 C. Composite Wood Products: Products shall be made without urea formaldehyde.
- 22 D. Composite Wood Products: Products shall comply with the testing and product requirements of the California
- 23 Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical
- 24 Emissions from Indoor Sources Using Environmental Chambers."
- 25 1. Medium-Density Fiberboard (MDF): ANSI A208.2, Grade 130.
- 26 2. Particleboard: ANSI A208.1, Grade M-2.
- 27 3. Veneer-Faced Panel Products (Hardwood Plywood): HPVA HP-1.
- 28 4. Thermoset Decorative Panels: Particleboard or MDF finished with thermally fused, melamine-
- 29 impregnated decorative paper and complying with requirements of NEMA LD 3, Grade VGL, for Test
- 30 Methods 3.3, 3.4, 3.6, 3.8, and 3.10.

31 2.3 FIRE-RETARDANT-TREATED MATERIALS

- 32 A. Fire-Retardant-Treated Materials, General: Where fire-retardant-treated materials are indicated, use
- 33 materials that are acceptable to authorities having jurisdiction and with fire-test-response characteristics
- 34 specified as determined by testing identical products per test method indicated by a qualified testing agency.
- 35 1. Identify fire-retardant-treated materials with appropriate classification marking of qualified testing
- 36 agency in the form of removable paper label or imprint on surfaces that will be concealed from view
- 37 after installation.
- 38 B. Fire-Retardant-Treated Lumber and Plywood: Products with a flame-spread index of 25 or less when tested
- 39 according to ASTM E 84, with no evidence of significant progressive combustion when the test is extended
- 40 an additional 20 minutes, and with the flame front not extending more than 10.5 feet beyond the centerline
- 41 of the burners at any time during the test.
- 42 1. Kiln-dry lumber and plywood after treatment to a maximum moisture content of 19 and 15 percent,
- 43 respectively.

44 2.4 CABINET HARDWARE AND ACCESSORIES

- 45 A. General: Provide cabinet hardware and accessory materials associated with architectural cabinets except
- 46 for items specified in Section 08 71 00 "Door Hardware."
- 47 B. Exposed Hardware Finishes: For exposed hardware, provide finish that complies with BHMA A156.18 for
- 48 BHMA finish numbers indicated:
- 49 1. Satin Chrome: BHMA 626 /652.
- 50 2. Satin Stainless Steel: BHMA 630.
- 51 3. For concealed hardware, provide manufacturer's standard finish that complies with product class
- 52 requirements in BHMA A156.9.
- 53 C. For concealed hardware, provide manufacturer's standard finish that complies with product class
- 54 requirements in BHMA A156.9.
- 55 D. Frameless Concealed Hinges (European Type): Totally concealed spring-activated, self-closing European
- 56 type cabinet hinges for vertical, horizontal, and depth adjustment, not less than 165 degrees opening, except
- 57 provide 90 degree opening where door may strike adjacent walls or cabinets. Nickel plated.
- 58 1. Acceptable manufacturers and products:
- 59 a. Hafele America, Co; Duomatic #0.329.06.

- 1 b. Grass America, Inc.; #3903.
2 c. Hettich America; Euromat Topsafe #4955.
3 E. Center Pivot Hinges: Totally concealed spring-activated, self-closing European type cabinet hinges for
4 Trash / Recycling Containers. Nickel plated.
5 1. Acceptable manufacturers and products:
6 a. E.R. Butler & Co Manufacturing.
7 F. Back-Mounted Pulls
8 1. Doug Mockett, DP105A/2.
9 2. Finish: 26M Matte Chrome.
10 3. Size 4-3/16" 3/8" profile.
11 G. Adjustable Shelf Standards and Supports: BHMA A156.9, B04071; with shelf rests, B04081.
12 H. Drawer Slides: BHMA A156.9, B05091.
13 1. Heavy Duty (Grade 1HD-100 and Grade 1HD-200): Side mounted; full-extension type; zinc-plated
14 steel ball-bearing slides.
15
16 I. Grommets for Cable Passage through Countertops (MA-3): Size: 7-3/32" x 1-25/32" overall fitting into a slot
17 6-7/8" x 1-9/16" square. 3/4" deep.
18 1. Product: Subject to compliance with requirements, provide product by Doug Mockett & Company,
19 Inc. Refer to Material Tag Index.
20 2. Finish: Match hardware.

21 **2.5 MISCELLANEOUS MATERIALS**

- 22 A. Furring, Blocking, Shims, and Hanging Strips: Softwood or hardwood lumber, kiln-dried to less than 15
23 percent moisture content.
24 B. Anchors: Select material, type, size, and finish required for each substrate for secure anchorage. Provide
25 metal expansion sleeves or expansion bolts for post-installed anchors. Use nonferrous-metal or hot-dip
26 galvanized anchors and inserts at inside face of exterior walls and at floors.
27 C. Adhesives: Do not use adhesives that contain urea formaldehyde.
28 D. Adhesives: Use adhesives that meet the testing and product requirements of the California Department of
29 Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions
30 from Indoor Sources Using Environmental Chambers."
31 E. Adhesive for Bonding Plastic Laminate: Unpigmented contact cement.
32 1. Adhesive for Bonding Edges: Hot-melt adhesive or adhesive specified above for faces.

33 **2.6 FABRICATION**

- 34 A. Fabricate architectural cabinets to dimensions, profiles, and details indicated.
35 B. Complete fabrication, including assembly and hardware application, to maximum extent possible before
36 shipment to Project site. Disassemble components only as necessary for shipment and installation. Where
37 necessary for fitting at site, provide ample allowance for scribing, trimming, and fitting.
38 C. Shop-cut openings to maximum extent possible to receive hardware, appliances, electrical work, and similar
39 items. Locate openings accurately and use templates or roughing-in diagrams to produce accurately sized
40 and shaped openings. Sand edges of cutouts to remove splinters and burrs.
41 D. Grade: Unless otherwise indicated, provide Custom-grade interior woodwork complying with referenced
42 quality standard.
43 E. Wood Moisture Content: Comply with requirements of referenced quality standard for wood moisture content
44 in relation to ambient relative humidity during fabrication and in installation areas.
45 F. Sand fire-retardant-treated wood lightly to remove raised grain on exposed surfaces before fabrication.
46 G. Fabricate woodwork to dimensions, profiles, and details indicated. Ease edges to radius indicated for the
47 following:
48 1. Corners of Cabinets and Edges of Solid-Wood (Lumber) Members 3/4 Inch Thick or Less: 1/16 inch.
49 Edges of Rails and Similar Members More Than 3/4 Inch Thick: 1/8 inch.
50 2. Corners of Cabinets and Edges of Solid-Wood (Lumber) Members and Rails: 1/16 inch.
51 H. Complete fabrication, including assembly and hardware application, to maximum extent possible before
52 shipment to Project site. Disassemble components only as necessary for shipment and installation. Where
53 necessary for fitting at site, provide ample allowance for scribing, trimming, and fitting.
54 I. Shop-cut openings to maximum extent possible to receive hardware, appliances, electrical work, and similar
55 items. Locate openings accurately and use templates or roughing-in diagrams to produce accurately
56 sized and shaped openings. Sand edges of cutouts to remove splinters and burrs.

1 **PART 3 - EXECUTION**

2 **3.1 PREPARATION**

- 3 A. Before installation, condition cabinets to humidity conditions in installation areas for not less than 72 hours.

4 **3.2 INSTALLATION**

- 5 A. Grade: Install cabinets to comply with quality standard grade of item to be installed.
6 B. Assemble cabinets and complete fabrication at Project site to extent that it was not completed in the shop.
7 C. Anchor cabinets to anchors or blocking built in or directly attached to substrates. Secure with wafer-head
8 cabinet installation screws.
9 D. Install cabinets level, plumb, and true in line to a tolerance of 1/8 inch in 96 inches using concealed shims.
10 1. Scribe and cut cabinets to fit adjoining work, refinish cut surfaces, and repair damaged finish at cuts.
11 2. Install cabinets without distortion so doors and drawers fit openings and are accurately aligned.
12 Adjust hardware to center doors and drawers in openings and to provide unencumbered operation.
13 Complete installation of hardware and accessory items as indicated.
14 3. Fasten wall cabinets through back, near top and bottom, and at ends not more than 16 inches o.c.
15 with No. 10 wafer-head screws sized for not less than 1-1/2-inch penetration into wood framing,
16 blocking, or hanging strips and toggle bolts through metal backing or metal framing behind wall finish
17 where no blocking.

18 **3.3 ADJUSTING AND CLEANING**

- 19 A. Repair damaged and defective cabinets, where possible, to eliminate functional and visual defects. Where
20 not possible to repair, replace architectural cabinets. Adjust joinery for uniform appearance.
21 B. Clean, lubricate, and adjust hardware.
22 C. Clean cabinets on exposed and semi-exposed surfaces.

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 DESCRIPTION

- A. Carlisle Coatings and Waterproofing Blindside Waterproofing System utilizes the MiraPLY-H Waterproofing System fully adhered to poured concrete. The dual membrane is comprised of TPO and Butyl Alloy adhesive with a total thickness of 70 mils.
- B. Carlisle Coatings and Waterproofing Blindside Waterproofing System utilizes the MiraPLY-V Waterproofing System fully adhered to poured concrete. The dual membrane is comprised of TPO and Butyl Alloy adhesive with a total thickness of 47 mils.

1.3 REFERENCE STANDARDS

- A. ASTM D 412 Standard Test Methods for Rubber Properties in Tension
- B. ASTM D 570 Standard Test Methods for Water Absorption of Plastics
- C. ASTM D 624 Standard Test Method for Tear Strength of Conventional Vulcanized Rubber and Thermoplastic Elastomers
- D. ASTM D 882 Standard Test Method for Tensile Properties of Thin Plastic Sheeting
- E. ASTM D 903 Standard Test Method for Peel or Stripping Strength of Adhesive Bonds
- F. ASTM D 1876 Standard Test Method for Peel Release of Adhesives (T-Peel)
- G. ASTM D 1970 Standard Specification for Self-Adhering Polymer Modified Bituminous Sheet Materials Used as Steep Roofing Underlayment for Ice Dam Protection
- H. ASTM D 3767 Standard Practice for Rubber - Measurements of Dimensions
- I. ASTM D 5385 Standard Test Method for Hydrostatic Pressure Resistance of Waterproofing Membranes
- J. ASTM E 96 Standard Test Methods for Water Vapor Transmission of Materials
- K. ASTM E 154 Standard Test Methods for Water Vapor Retarders Used in Contact with Earth Under Concrete Slabs, on Walls, or as Ground Cover

JUDGE DOYLE SQUARE - BLOCK 88 PARKING GARAGE

CONTRACT # 7952 MUNIS # 11471

071326 - 1

**BLINDSIDE SELF-ADHERING SHEET
WATERPROOFING**

1 **1.4 QUALITY ASSURANCE**

- 2 A. MiraPLY-H Blindsided Waterproofing System and MiraPLY-V Blindsided Waterproofing System must
3 be installed by a Carlisle Coatings & Waterproofing Inc Authorized Applicator in compliance with
4 shop drawings approved by Carlisle Coatings & Waterproofing Inc. There must be no deviations
5 made from Carlisle's specifications or details without the prior approval from Carlisle Coatings &
6 Waterproofing Inc.
7 B. A pre-installation meeting shall be coordinated by the General Contractor and attended by the
8 waterproofing applicator and other trades working on the Blindsided System both before and after
9 installation. The purpose of this meeting is to discuss the necessity of ensuring proper
10 waterproofing membrane protection during all phases of installation and to review other applicable
11 requirements or unusual field conditions.
12 C. Provide primary materials which are the products of one manufacturer, for each type of material
13 required for the work.
14 D. Upon request by the authorized applicator, an inspection will be conducted by a Carlisle Coatings &
15 Waterproofing Inc representative to ensure that the waterproofing membrane has been installed according
16 to Carlisle Coatings & Waterproofing Inc specifications and details. This inspection shall be coordinated prior
17 to installing the Blindsided components so that access to the membrane is not impaired.
18 E. An in-progress inspection may be scheduled after the initial inspection (after the membrane installation is
19 completed) to ensure proper protection procedures are being followed to prevent possible damage to the
20 membrane during the installation of above membrane components.

21
22 **1.5 SUBMITTALS**

- 23 A. General: Submit in accordance with Section 01 33 23.
24 B. Product Data: Submit manufacturer's product literature and installation instructions.
25 C. Subcontractor's approval by Manufacturer: Submit document stating manufacturer's acceptance of
26 subcontractor as an Approved Applicator for the specified materials.
27 D. Warranty Submit a sample warranty identifying the terms and conditions stated in Section 1.06.

28
29 **1.6 WARRANTY**

- 30 A. Provide a written, single-source warranty for all system components agreeing to promptly make
31 repairs or replace defective waterproofing system materials without additional cost to the owner
32 during the warranty period.
33 B. A 10-year System Warranty is available for a charge on commercial buildings and applies only to
34 products manufactured or marketed by Carlisle Coatings & Waterproofing Inc. The membrane
35 system is defined as membrane, flashings, adhesives, sealants and other Carlisle brand products
36 utilized in this installation. For a complete description of these products, refer to the "Products
37 Section" or the applicable "Attachment" in the Carlisle specifications.
38 C. Access for warranty service - it shall be the owner's responsibility to expose the waterproofing
39 membrane assembly in the event warranty service is required.
40 D. For the MiraPLY-V Warranty: the formation or presence of mold or fungi in a building is dependent
41 upon a broad range of factors including, but not limited to, the presence of spores and nutrient
42 sources, moisture, temperatures, climatic conditions, relative humidity, and heating/ventilating
43 systems and their maintenance and operating capabilities. These factors are beyond the control
44 of Carlisle and Carlisle shall not be responsible for any claims, repairs, restoration or damages
45 relating to the presence of any irritants, contaminants, vapors, fumes, molds, fungi, bacteria, spores,
46 mycotoxins, or the like in any building or in the air, land, or water serving the building.

47
48 **1.7 JOB CONDITIONS**

- 49 A. Coordination between various trades is essential to avoid unnecessary traffic to prevent damage to
50 the membrane. Heavily traveled areas must be protected by placing temporary protection courses
51 to prevent damage to the membrane.
52 B. Coordinate waterproofing work with other trades. The applicator shall have sole right of access to
53 the specified areas for the time needed to complete the application.
54 C. Protect adjoining surfaces not to be waterproofed against damage or soiling. Protect plants,
55 vegetation and animals which might be affected by waterproofing operations.
56 D. Wear applicable protective clothing and respiratory protection gear.
57 E. Maintain work area in a neat and orderly condition, removing empty containers, rags, and rubbish
58 daily from the site.
59

- 1 **1.8 PRODUCT DELIVERY, STORAGE AND HANDLING**
2 A. Deliver materials to project site in original, factory-sealed, unopened containers bearing
3 manufacturer's name and label intact and legible with the following information.
4 1. Name of material
5 2. Manufacturer's stock number and date of manufacture
6 3. Material safety data sheet
7 B. Store membrane and accessory products in a protected area out of direct sunlight and between
8 40°F and 100°F. Protect from rain, physical damage and construction traffic.

9 **PART 2 - PRODUCTS**

10 **2.1 GENERAL**

- 11 A. Provide products manufactured and supplied by Carlisle Coatings & Waterproofing Inc, 900 Hensley
12 Lane, Wylie Texas 75098, phone (800) 527-7098, fax (972) 442-0076.
13 B. The components of this Blindsheet System are to be products of Carlisle Coatings & Waterproofing Inc. The
14 installation, performance or integrity of products by others is not the responsibility of Carlisle Coatings &
15 Waterproofing Inc and is expressly disclaimed by the warranty.

16 **2.2 MEMBRANE**

- 17 A. MiraPLY-H Sheet Membrane: Shall be CCW-MiraPLY-H self-adhering adhesive coated membrane,
18 and shall meet or exceed the requirements listed in charts found on Technical Data Sheet.
19 B. MiraPLY-V Sheet Membrane: Shall be CCW-MiraPLY-V self-adhering adhesive coated membrane,
20 and shall meet or exceed the requirements listed in charts found in section 2.

21 **2.3 MIRAPLY-H RELATED ACCESSORY PRODUCTS**

- 22 A. Seam Tape: MiraPLY Seam Tape, MiraPLY Seam Tape LT or SecurTAPE – 6" wide
23 B. Detailing Tapes: Shall be:
24 1. MiraPLY Detail Tape – 6" wide
25 2. P/S Elastoform Flashing
26 C. Primers:
27 1. Low VOC Primer
28 2. HP-250 Primer
29 3. CAV-GRIP
30 D. Termination Sealant:
31 1. Sure-Seal Lap Sealant
32 2. Universal Single Ply Sealant
33 E. Detail Sealants:
34 1. Sure-Seal Lap Sealant
35 2. Universal Single Ply Sealant
36 3. DOW 758
37 F. 2-Part Liquid Membrane: CCW-703V LiquiSeal
38 G. Reinforcing Fabric:
39 1. CCW-LiquiFiber-6", 12" wide
40 H. Termination Bar: Sure-Seal Termination Bar
41 I. Water Stop: CCW MiraSTOP
42 J. Backer Rod: Closed-cell polyethylene foam rod
43 K. Expansion joints: EJ-500
44 L. Drain Composite: CCW MiraDRAIN Drainage Composite as selected per project
45 M. Perimeter Drainage System: Where required, shall be CCW MiraDRAIN HC
46 N. Cleaner: Weathered Membrane Cleaner or approved equal

47 **2.4 MIRAPLY-V RELATED ACCESSORY PRODUCTS**

- 48 A. Seam Tape: Shall be SecurTAPE – 6" wide
49 B. Detailing Tapes: Shall be:
50 1. CCW-Detail Tape – 2", 6" wide
51 2. P/S Elastoform Flashing
52 C. Primers shall be:
53 1. Low VOC Primer
54 2. HP-250 Primer

ISSUED FOR FINAL BID

JUDGE DOYLE SQUARE - BLOCK 88 PARKING GARAGE

CONTRACT # 7952 MUNIS # 11471

071326 - 3

**BLINDSIDE SELF-ADHERING SHEET
WATERPROOFING**

- 1 D. Termination Sealant:
- 2 1. Sure-Seal Lap Sealant
- 3 E. Detail Sealants:
- 4 1. Sure-Seal Lap Sealant
- 5 2. Universal Single Ply Sealant
- 6 F. 2-Part Liquid Membrane: CCW-703V LiquiSeal
- 7 G. Reinforcing Fabric:
- 8 1. CCW-LiquiFiber – 6”, 12” wide
- 9 H. Termination Bar: Shall be Sure-Seal Termination Bar
- 10 I. Water Stop: CCW MiraSTOP
- 11 J. Backer Rod: Closed-cell polyethylene foam rod
- 12 K. Expansion joints: EJ-500
- 13 L. Drain Composite: CCW MiraDRAIN Drainage Composite as selected per project
- 14 M. Perimeter Drainage System: Where required, shall be CCW MiraDRAIN HC
- 15 N. Cleaner: Weathered Membrane Cleaner or approved equal
- 16 O. Reinforcing Membrane/Flashing: Sure-Seal P/S Elastoform Flashing

17 **2.5 CARLISLE BLINDSIDE PHYSICAL PROPERTIES MIRAPLY-H**

- 18 A. Please refer to Technical Data Sheet.

19 **2.6 CARLISLE BLINDSIDE PHYSICAL PROPERTIES MIRAPLY-V**

Property	Method	Unit	Typical Value
TPO	—	mils (mm)	22 (.56)
Butyl Alloy	—	mils (mm)	25 (.64)
Thickness per ASTM D 5147 across sheet	ASTM D1970	mils (mm)	47 (1.19)
Water Vapor Transmission	ASTM E96 (Water Method)	perms	0.100
Tensile Strength ¹	ASTM D882	psi	1,360
300% Modulus ¹	ASTM D412	psi	1,390
90° T-Peel	ASTM D1876	lb.	>5.0
Elongation @ Break @ 23°C (Die C) ¹	ASTM D412	%	335
Flexibility Temperature @ -29°C (-20°F) ¹	ASTM D1970	pass/fail	No Cracking @-29°C (-20°F)
Hydrostatic Pressure Resistance	ASTM D5385	ft.	>231 ft. (100 psi)
Peel Strength Over Poured Concrete (tested w/2” strips)	ASTM D903	lb.	5.6
Puncture Resistance Elongation	ASTM E154	in	4.9

Puncture Resistance Load at Puncture	ASTM E154	lb.	106.4
Tear Strength of Vulcanized Rubber and Thermoplastics Die C ¹	ASTM D624	psi	685
Soil Decay Testing- E 96 Permeance	ASTM E154		Pass
Soil Decay Testing- Weight Loss	ASTM E154		Pass
Lateral Water Migration Resistance ²	ASTM D5385 modified		Pass at 100 psi (231 ft) of hydrostatic pressure

¹Data Listed according to Machine Direction criteria where applicable

²Lateral water migration resistance test is performed by casting concrete against butyl side of membrane with a hole and applying a hydrostatic head pressure with water. This test measures the resistance of lateral water migration between membrane and concrete.

1 **PART 3 - EXECUTION**

2 **3.1 GENERAL**

- 3 A. Before any waterproofing work is started the waterproofing applicator shall thoroughly examine all
4 lagging and support for any deficiencies. Should any deficiencies exist, the architect, owner, or
5 general contractor shall be notified in writing and corrections made.

6 **3.2 SUBSTRATE REQUIREMENTS**

- 7 A. The substrate shall be even without noticeable high spots or depressions, smooth, free of protrusions,
8 debris, sharp edges or foreign materials and must be free of accumulated water, ice and snow. For
9 MiraPLY-H system, earth, crushed stone, or soil shall be compacted such that the soil is not
10 displaced from traffic or concrete placement.
11 B. Before any waterproofing work is started the waterproofing applicator shall thoroughly examine
12 all surfaces for any deficiencies. Should any deficiencies exist, the architect, owner, or general
13 contractor shall be notified in writing and corrections made.
14 C. All work shall be performed in accordance with Carlisle-CCW application instructions.

15 **3.3 INSTALLATION: HORIZONTAL**

- 16 A. Refer to the applicable Manufacturer's Technical Data Bulletins for cautions and warnings.
17 B. All substrates shall be smooth and even. Concrete substrate should likewise be smooth and monolithic.
18 Gaps or voids greater than 0.5in (12mm) shall be filled. Gravel sub-base must be 3/4" or smaller aggregate,
19 level and compacted. Install MiraDRAIN over sub-base before installing MiraPLY-H, if substrate
20 requirements cannot be met or required by project requirements. There is to be no standing water.
21 C. CCW MiraDRAIN Composites by Carlisle Coatings and Waterproofing is an acceptable substrate. Install
22 CCW MiraDRAIN with fabric side facing down.
23 D. Always comply with the instructions found in manufacturer's literature, which includes:
24 1. Apply the product with the TPO surface against the prepared surface and the butyl alloy adhesive
25 side facing up.
26 2. Carefully position successive sheets to overlap the previous sheet by 3 in. (75mm) minimum along
27 the lap line. Be sure the product lays flat with no openings. End laps must be staggered.

- 1 3. For side laps simultaneously remove the release liner on the FAT (factory applied tape) pre-
2 primed strip then mate the two sheets together.
3 4. For end laps, position the MiraPLY Seam Tape in the lap area. Remove release liner on the MiraPLY
4 Seam Tape and mate the two sheets together. For SecurTAPE option, the TPO and Butyl surfaces
5 of lap area shall be clean and primed with HP-250 Primer or Low VOC Primer and allow to flash off
6 then position SecurTAPE 6" in the lap area. Remove release liner on the SecurTAPE and mate two
7 sheets together. Lap area shall be rolled with firm hand pressure to ensure a continuous bond is
8 achieved.

9 **3.4 INSTALLATION: VERTICAL**

- 10 A. Refer to the applicable Manufacturer's Technical Data Bulletins for cautions and warnings.
11 B. All substrates shall be smooth and even. Concrete substrate should likewise be smooth and monolithic.
12 Gaps or voids greater than 0.5in (12mm) shall be filled.
13 C. Cover soil retention systems with CCW MiraDRAIN Composites by Carlisle Coatings and Waterproofing.
14 Install CCW MiraDRAIN with fabric side facing toward grade/blind side.
15 D. Always comply with the instructions found in manufacturer's literature, which includes:
16 1. Start the installation at one corner of the building. Unroll the first sheet of MiraPLY-V and install it
17 square/parallel to building wall centered in the corner with the TPO side facing the MiraDRAIN
18 attached to the soil retention system (lagging, sheet pile, shotcrete, etc.) and the adhesive/release
19 liner facing out. Mechanically fasten the membrane vertically, use fasteners with plastic washer
20 heads that are compatible with the substrate. Ensure MiraPLY- V is not bridging or wrinkled and tight
21 to the corner with no seams in the corner. Install an adequate number of fasteners across the top of
22 the MiraPLY-V to support and keep the membrane tight against the substrate without wrinkles and
23 blousing until concrete is poured. Walls higher than 8'-0" require fasteners in the field of the MiraPLY-
24 V membrane with approximately 1 fastener per 2 ft2 (not including fasteners at the perimeter). Fasten
25 perimeter edges of MiraPLY approximately 12" on center and a minimum of 6" from the edge.
26 Caution – over driven fasteners can cause stress in the membrane and seams.
27 2. Unroll the the next sheet of MiraPLY-V and align parallel to and overlap the preceding roll of
28 MiraPLY-V 3" and a minimum 3" end overlap. Stagger end laps. Ensure that the membrane
29 lays flat and no openings are visible. Make sure that the TPO side of the lap is clean, dry and
30 free of contaminants and prime TPO with HP-250 Primer or Low VOC Primer.
31 3. Remove the release liner on the lap (edge of the sheet) and mate the two sheets together. Lap area
32 shall be rolled with a hard rubber roller using firm hand pressure.
33 4. Leave the plastic liner on MiraPLY-V until ready for concrete pour or placement of rebar. Cover
34 fasteners with a 3" x 3" piece of SecurTAPE, P/S Elastoform Flashing or CCW Detail Tape.
35
36

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Work shall include, but is not limited to, the following:
 - 1. Preparation of all field and flashing substrates.
 - 2. Drainage mat, mechanically fastened.
 - 3. Protection board, mechanically fastened.
 - 4. SBS-modified bitumen vertical field membrane.
 - 5. SBS-modified bitumen horizontal field membrane.
 - 6. Protection sheet, self-adhered.
 - 7. Liquid-applied, reinforced flashings.
 - 8. All related materials and labor required to complete specified waterproofing necessary to receive specified manufacturer's warranty.

1.3 DEFINITIONS

- A. ASTM D 1079 – Definitions of Term Relating to Roofing and Waterproofing.
- B. The National Roofing Contractors Association (NRCA) Roofing and Waterproofing Manual, Fifth Edition Glossary.

1 **1.4 REFERENCES**

- 2 A. American Standard of Testing Methods (ASTM):
3 1. ASTM C 836 - Standard Specification for High Solids Content, Cold Liquid-Applied Elastomeric
4 Waterproofing Membrane for Use with Separate Wearing Course.
5 2. ASTM D 903 - Standard Test Method for Peel or Stripping Strength of Adhesive Bonds.
6 3. ASTM D 1970 - Standard Specification for Self-Adhering Polymer Modified Bituminous Sheet
7 Materials Used as Steep Roofing Underlayment for Ice Dam Protection.
8 4. ASTM D 412 - Standard Test Method for Tensile Strength and Ultimate Elongation.
9 5. ASTM D 5385 - Standard Test Method for Hydrostatic Pressure Resistance of Waterproofing
10 Membranes.
11 6. ASTM D 5385 (modified) – Standard Test Method for Lateral Water Migration.
12 7. ASTM D 5601 - Standard Test Method for Tearing Resistance of Roofing and Waterproofing
13 Materials and Membranes.
14 8. ASTM E 96 - Standard Test Methods for Water Vapor Transmission of Materials.
15 9. ASTM E 154 - Standard Test Method for Water Vapor Retarders Used in Contact with Earth Under
16 Concrete Slabs, on Walls, or as Ground Cover.
17 10. ASTM D 1876 - Standard Test Method for Lap Peel Adhesion.
18 11. ASTM D 570 - Standard Test Method for Water Absorption.
19 12. ASTM D 1434 - Standard Test Method for Methane Gas Permeability.
20 13. ASTM D 1894 - Standard Test Method for Coefficient of Friction.

21 **1.5 ACTION SUBMITTALS**

- 22 A. Product Data Sheets: Submit manufacturer's product data sheets, installation instructions and/or general
23 requirements for each component.
24 B. Safety Data Sheets: Submit manufacturer's Safety Data Sheets (SDS) for each component.
25 C. Sample/Specimen Warranty from the manufacturer and contractor.
26 D. Shop Drawings: Provide roof plan and applicable roof system detail drawings.

27 **1.6 INFORMATIONAL SUBMITTALS**

- 28 A. Contractor Certification: Submit written certification from waterproofing manufacturer certifying that the
29 applicator is authorized by the manufacturer to install the specified materials and system.

30 **1.7 CLOSEOUT SUBMITTALS**

- 31 A. Warranty: Provide manufacturer's and contractor's warranties upon substantial completion of the
32 waterproofing.

33 **1.8 QUALITY ASSURANCE**

- 34 A. Manufacturer Qualifications:
35 1. Manufacturer shall have 20 years of experience manufacturing SBS-modified bitumen waterproofing
36 materials.
37 2. Provide specified warranty upon satisfactory project completion.
38 B. Contractor Qualifications:
39 1. Contractor shall be authorized by the manufacturer to install specified materials prior to the bidding
40 period through satisfactory project completion.
41 2. Contractor shall provide full time, non-working, on-site superintendent experienced with the specified
42 waterproofing through satisfactory project completion.
43 3. Applicators shall be skilled in the application methods for all materials.
44 4. Contractor shall maintain a daily record, on-site, documenting material installation and related project
45 conditions.
46 5. Contractor shall maintain a copy of all submittal documents, on-site, available at all times, for
47 reference.

48 **1.9 DELIVERY, STORAGE AND HANDLING**

- 49 A. Refer to each product data sheet or other published literature for specific requirements.
50 B. Deliver materials and store them in their unopened, original packaging, bearing the manufacturer's name,
51 related standards, and any other specification or reference accepted as standard.
52 C. Protect and store materials in a dry, well-vented, and weatherproof location. Only materials to be used the
53 same day shall be removed from this location. During cold weather, store materials in a heated location,
54 removed only as needed for immediate use.

- 1 D. When materials are to be stored outdoors, store away from standing water, stacked on raised pallets or
2 dunnage, at least 4 in or more above ground level. Carefully cover storage with "breathable" tarpaulins to
3 protect materials from precipitation and to prevent exposure to condensation.
4 E. Carefully store waterproofing membrane materials delivered in rolls on-end with selvage edges up. Store
5 and protect roll storage to prevent damage.
6 F. Properly dispose of all product wrappers, pallets, cardboard tubes, scrap, waste, and debris. All damaged
7 materials shall be removed from job site and replaced with new, suitable materials.

8 **1.10 SITE CONDITIONS**

9 A. Safety:

- 10 1. The contractor shall be responsible for complying with all project-related safety and environmental
11 requirements.
12 2. Heat-welding shall include heating the specified membrane ply using propane roof torches or electric
13 hot-air welding equipment. The contractor shall determine when and where conditions are
14 appropriate to utilize heat-welding equipment. When conditions are determined by the contractor to
15 be unsafe to proceed, equivalent SBS-modified bitumen materials and methods shall be utilized to
16 accommodate requirements and conditions.
17 3. Refer to NRCA CERTA recommendations, local codes and building owner's requirements for hot
18 work operations.
19 4. The contractor shall review project conditions and determine when and where conditions are
20 appropriate to utilize the specified liquid-applied, or semi-solid waterproofing materials. When
21 conditions are determined by the contractor to be unsafe or undesirable to proceed, measures shall
22 be taken to prevent or eliminate the unsafe or undesirable exposures and conditions, or equivalent
23 approved materials and methods shall be utilized to accommodate requirements and conditions.
24 5. The contractor shall refer to product Safety Data Sheets (SDS) for health, safety, and environment
25 related hazards, and take all necessary measures and precautions to comply with exposure
26 requirements.

27 B. Environmental Conditions:

- 28 1. Monitor substrate temperature and material temperature, as well as all environmental conditions such
29 as ambient temperature, moisture, sun, cloud cover, wind, humidity, and shade. Ensure conditions
30 are satisfactory to begin work and ensure conditions remain satisfactory during the installation of
31 specified materials. Materials and methods shall be adjusted as necessary to accommodate varying
32 project conditions. Materials shall not be installed when conditions are unacceptable to achieve the
33 specified results.
34 2. Precipitation and dew point: Monitor weather to ensure the project environment is dry before, and
35 will remain dry, during the application of waterproofing materials. Ensure all waterproofing materials
36 and substrates remain above the dew point temperature as required to prevent condensation and
37 maintain dry conditions.
38 3. Self-adhered membrane application: During cold weather, store the specified self-adhered
39 membrane and primer materials in heated storage areas to ensure materials remain no less than
40 70°F (21°C) during application. Ensure conditions allow primer to remain tacky, but not wet so that
41 primer will transfer to finger when touched. Self-adhered primer should not fully dry and lose tack
42 before applying the self-adhered membrane. Ensure conditions remain satisfactory to achieve
43 membrane adhesion as specified.
44 4. Heat-Welding Application: Take all necessary precautions and measures to monitor conditions to
45 ensure all environmental conditions are safe to proceed with the use of torches and hot-air welding
46 equipment. Combustibles, flammable liquids and solvent vapors that represent a hazard shall be
47 eliminated and primers shall be fully dry before proceeding with heat-welding operations. Refer to
48 NRCA CERTA recommendations.

49 **1.11 WARRANTY**

- 50 A. Manufacturer's Warranty: The manufacturer shall provide the owner with the manufacturer's warranty
51 providing labor and materials for a period of 10 years from the date the warranty is issued.
52 B. The contractor shall guarantee the workmanship and shall provide the owner with the contractor's warranty
53 covering workmanship for a period of 2 years from completion date.

1 **PART 2 - PRODUCTS**

2 **2.1 MANUFACTURER**

- 3 A. Single Source Manufacturer: All products shall be provided by a single supplier with 20 years or more
4 waterproofing manufacturing history in the US.
5 1. Comply with the Manufacturer's requirements as necessary to provide the specified warranty.
6 B. Product Quality Assurance Program: Manufacturer shall be an ISO 9001 registered company.
7 C. Acceptable Manufacturer:
8 1. Soprema, located at: 310 Quadral Dr.; Wadsworth, OH 44281; Tel: 800-356-3521; Tel: 330-334-
9 0066; Website: www.soprema.us.
10 2. Acceptable Alternate Manufacturers: Tremco and Carlisle.

11 **2.2 WATERPROOFING SYSTEM**

- 12 A. Waterproofing Basis of Design:
13 1. Soprema

14 **2.3 BLINDSIDE WATERPROOFING**

- 15 A. Vertical Field Membrane:
16 1. SBS-Modified Bitumen:
17 a. Soprema Colphene BSW V: SBS-modified bitumen, self-adhesive membrane with release
18 film on the bottom surface and a sanded top surface used for vertical blindside waterproofing
19 applications. Composite reinforcement. DUO SELVEDGE side laps.
20 1) Thickness: 120 mils (3.0 mm)
21 2) Width: 39.4 in (1 m)
22 3) Length: 32.8 ft (10 m)
23 4) Adhesion of Poured Concrete (ASTM D 903 modified): 24.2 lbf/in (4235 N/m)
24 5) Puncture Resistance (ASTM E154): 350 lb (1557 N)
25 6) Resistance to Hydrostatic Head (ASTM D 5385 modified): >360 ft (110 m)
26 7) Resistance to Lateral Migration (ASTM D 5385 modified): >360 ft (110 m)
27 8) Tensile Strength, MD/XD (ASTM D 412): 3437/2638 psi (23.7/18.1 MPa)
28 9) Ultimate Elongation, MD/XD (ASTM D 412): 67/74 %
29 10) Low Temperature Flexibility (ASTM D 1970): Unaffected at -4°F (-20°C)
30 11) Tear Resistance (ASTM D 5601): 28.1 lbf (125 N)
31 12) Low Temperature Crack Bridging (ASTM C 836 (C1305)): Unaffected at -9°F (-23°C)
32 13) Lap Peel Adhesion (ASTM D 1876): 7.7 lbf/in (1360 N/m)
33 14) Water Vapor Transmission (ASTM E 96 Procedure B): <0.037 perms (2.1 ng/Pa·s·m²)
34 15) Water Absorption (maximum) (ASTM D 570): 0.5 %
35 16) Methane Gas Permeability (ASTM D 1434): 1.6*10⁻⁶ft²/hr at 14.7 psia (4.12*10⁻⁷
36 cm²/sec at 1 atm)
37 17) Coefficient of Friction (ASTM D 1894): sanded side on sanded side, 1.03 static 0.76
38 kinetic
39 18) Coefficient of Friction (ASTM D 1894): sanded side on concrete, 0.84 static 0.67
40 kinetic
41 b. Soprema Colphene BSW H: SBS-modified bitumen membrane with plastic burn-off film on
42 the bottom surface and a sanded top surface used for vertical blindside waterproofing
43 applications. Polyester reinforcement.
44 1) Thickness: 140 mils (3.5 mm)
45 2) Width: 39.4 in (1 m)
46 3) Length: 32.8 ft (10 m)
47 4) Adhesion of Poured Concrete (ASTM D 903 modified): 19.6 lbf/in (3430 N/m)
48 5) Puncture Resistance (ASTM E154): 311 lb (1383N)
49 6) Resistance to Hydrostatic Head (ASTM D 5385 modified): >360 ft (110 m)
50 7) Resistance to Lateral Migration (ASTM D 5385 modified): >360 ft (110 m)
51 8) Tensile Strength, MD/XD (ASTM D 412): 3437/2638 psi (23.7/18.1 MPa)
52 9) Ultimate Elongation, MD/XD (ASTM D 412): 67/74 %
53 10) Low Temperature Flexibility (ASTM D 1970): Unaffected at -4°F (-20°C)
54 11) Tear Resistance (ASTM D 5601): 28.1 lbf (125 N)
55 12) Low Temperature Crack Bridging (ASTM C 836 (C1305)): Unaffected at -9°F (-23°C)
56 13) Lap Peel Adhesion (ASTM D 1786): 7.7 lbf/in (1360 N/m)
57 14) Water Vapor Transmission (ASTM E 96 Procedure B): <0.037 perms (2.1 ng/Pa·s·m²)
58 15) Water Absorption (maximum) (ASTM D 570): 0.5 %

- 1 16) Methane Gas Permeability (ASTM D 1434): 1.6×10^{-6} ft²/hr at 14.7 psia (4.12×10^{-7}
- 2 cm²/sec at 1 atm)
- 3 17) Coefficient of Friction (ASTM D 1894): sanded side on sanded side, 1.04 static 0.71
- 4 kinetic
- 5 18) Coefficient of Friction (ASTM D 1894): sanded side on concrete, 0.75 static 0.63
- 6 kinetic
- 7 B. Horizontal Field Membrane:
- 8 1. SBS-Modified Bitumen:
- 9 a. Soprema Colphene BSW H: SBS-modified bitumen membrane with plastic burn-off film on
- 10 the bottom surface and a sanded top surface used for horizontal blindside waterproofing
- 11 applications. Polyester reinforcement.
- 12 1) Thickness: 140 mils (3.5 mm)
- 13 2) Width: 39.4 in (1 m)
- 14 3) Length: 32.8 ft (10 m)
- 15 4) Adhesion of Poured Concrete (ASTM D 903 modified): 19.6 lbf/in (3430 N/m)
- 16 5) Puncture Resistance (ASTM E154): 311 lb (1383N)
- 17 6) Resistance to Hydrostatic Head (ASTM D 5385 modified): >360 ft (110 m)
- 18 7) Resistance to Lateral Migration (ASTM D 5385 modified): >360 ft (110 m)
- 19 8) Tensile Strength, MD/XD (ASTM D 412): 3437/2638 psi (23.7/18.1 MPa)
- 20 9) Ultimate Elongation, MD/XD (ASTM D 412): 67/74 %
- 21 10) Low Temperature Flexibility (ASTM D 1970): Unaffected at -4°F (-20°C)
- 22 11) Tear Resistance (ASTM D 5601): 28.1 lbf (125 N)
- 23 12) Low Temperature Crack Bridging (ASTM C 836 (C1305)): Unaffected at -9°F (-23°C)
- 24 13) Lap Peel Adhesion (ASTM D 1786): 7.7 lbf/in (1360 N/m)
- 25 14) Water Vapor Transmission (ASTM E 96 Procedure B): <0.037 perms (2.1 ng/Pa·s·m²)
- 26 15) Water Absorption (maximum) (ASTM D 570): 0.5 %
- 27 16) Methane Gas Permeability (ASTM D 1434): 1.6×10^{-6} ft²/hr at 14.7 psia (4.12×10^{-7}
- 28 cm²/sec at 1 atm)
- 29 17) Coefficient of Friction (ASTM D 1894): sanded side on sanded side, 1.04 static 0.71
- 30 kinetic
- 31 18) Coefficient of Friction (ASTM D 1894): sanded side on concrete, 0.75 static 0.63
- 32 kinetic
- 33 C. Flashing Membrane
- 34 1. Polymethacrylate Liquid-applied Flashing (PMA):
- 35 a. Soprema Alsan RS 260 LO Flash System: Liquid-applied, catalyzed flashing membrane with
- 36 an embedded polyester reinforcement fabric used for monolithic waterproofing flashing
- 37 membranes.
- 38 1) Soprema Alsan RS 260 LO Flash: Low odor, rapid curing, polymethacrylate (PMA)
- 39 liquid resin.
- 40 a) VOC Content: 0.5 g/L
- 41 b) Color: White
- 42 2) Soprema Alsan RS Catalyst Powder: Reactive agent used to induce curing of PMA
- 43 resin products.
- 44 3) Soprema Alsan RS Fleece: Woven polyester reinforcement used in PMA liquid
- 45 membrane applications.
- 46 a) Thickness: 30-40 mils (0.8-1 mm)
- 47 b) Weights: 110 g/m²
- 48 c) Width: Size as required.
- 49 d) Length: 164 ft (50 m)
- 50 2. Polymethyl Methacrylate Liquid-applied Flashing (PMMA):
- 51 a. Soprema Alsan RS 230 Flash System: Liquid-applied, catalyzed flashing membrane with an
- 52 embedded polyester reinforcement fabric used for monolithic waterproofing flashing
- 53 membranes.
- 54 1) Soprema Alsan RS 230 Flash: Rapid curing, polymethyl methacrylate (PMMA) liquid
- 55 resin with an embedded polyester reinforcement fabric used for monolithic blindside
- 56 waterproofing flashing applications.
- 57 a) VOC Content: 4.2 g/L
- 58 b) Color: White
- 59 2) Soprema Alsan RS Catalyst Powder: Reactive agent used to induce curing of PMMA
- 60 resin products.
- 61 3) Soprema Alsan RS Fleece: Woven polyester reinforcement used in PMMA liquid
- 62 membrane applications.

- 1 a) Thickness: 30-40 mils (0.8-1 mm)
- 2 b) Weights: 110 g/m²
- 3 c) Width: Size as required.
- 4 d) Length: 164 ft (50 m)
- 5 3. Elastomeric Liquid-applied Flashing:
- 6 a. Soprema Colphene Liquid Membrane Flashing System: Two-component elastomeric, solvent
- 7 free liquid membrane reinforced with self-adhesive modified bitumen membrane.
- 8 1) Soprema Colphene Liquid Membrane: Two component, elastomeric, solvent free
- 9 liquid used to flash blindside waterproofing penetrations.
- 10 2) Soprema Colphene 3000: SBS-modified bitumen, self-adhesive membrane with
- 11 release film on the bottom surface and a polyethylene woven composite facer used to
- 12 reinforce Soprema Colphene Liquid Membrane.
- 13 a) Thickness: 60 mils (1.5 mm)
- 14 b) Width: 36 in (0.9 m)
- 15 c) Length: 61 ft (18.6 m)
- 16 4. Bitumen-Urethane Liquid-applied Flashing:
- 17 a. Soprema Alsan Flashing System: Liquid-applied, single-component, reinforced flashing
- 18 membrane.
- 19 1) Soprema Alsan Flashing: Single-component, polyurethane-bitumen resin with
- 20 polyester reinforcing fleece fabric fully embedded into the resin used to flash
- 21 penetrations in blindside waterproofing applications.
- 22 a) Solids Content: 80%
- 23 b) Meets or exceeds ASTM C836.
- 24 2) Alsan Polyfleece: Non-woven polyester reinforcement.
- 25 5. Polymethyl Methacrylate (PMMA) Detailing Flashing:
- 26 a. Soprema Alsan RS Detailer Flashing System: Rapid curing, catalyzed polymethyl
- 27 methacrylate (PMMA) liquid resin with microfibers used as the waterproofing paste where it
- 28 is difficult to install a conventional reinforced waterproofing membrane.
- 29 1) Soprema Alsan RS Detailer: Polymethyl methacrylate (PMMA) liquid resin with
- 30 microfibers used as the waterproofing paste where it is difficult to install a conventional
- 31 reinforced waterproofing membrane.
- 32 2) Soprema Alsan RS Catalyst Powder: Reactive agent used to induce curing of PMMA
- 33 resin products.
- 34 D. Drainage Mat:
- 35 1. Soprema Sopradrain 10-G: High density drainage mat with a non-woven, factory laminated geotextile
- 36 fabric on the top side used to drain vertical and horizontal blindside waterproofing applications.
- 37 a. Width: 72 in (1.83 m)
- 38 b. Length: 50 ft (15.25 m)
- 39 c. Compressive Strength (kPa): 550 (11,000 psf)
- 40 2. Soprema Sopradrain ECO-2: Entangled polypropylene filament drainage mat with a geocomposite
- 41 fabric on both sides used to drain vertical and horizontal blindside waterproofing applications.
- 42 a. Width: 39 in (1 m)
- 43 b. Length: 100 ft (30 m)
- 44 c. Compressive Strength: 1436 kPa (>30,000 psf)
- 45 E. Pre-applied Protection Board
- 46 1. Soprema Sopraboard: Mineral fortified, asphaltic roof substrate board with glass fiber facers. For
- 47 use as a protection board on vertical and horizontal substrates in blindside waterproofing
- 48 applications. Asphaltic Protection Board shall be manufactured by the membrane supplier.
- 49 a. Thickness: 1/4 in
- 50 b. Dimensions: 4 x 4 ft
- 51 F. Post Applied Protection Sheet
- 52 1. Soprema Colphene BSW Protect'r: SBS-modified bitumen, self-adhesive membrane with release film
- 53 on the bottom surface and a sanded top surface used as a secondary protection on horizontal
- 54 blindside waterproofing applications. Composite reinforcement.
- 55 a. Thickness: 80 mils (2.0 mm)
- 56 b. Width: 39.4 in (1 m)
- 57 c. Length: 49.2 ft (15 m)

58 **2.4 ACCESSORIES**

- 59 A. Primers:

- 1 1. Soprema Sopraseal Stick: Self-Adhered membrane primer. SBS polymer, resin and, solvent-based
- 2 primer for the preparation of membrane substrates for self-adhered SBS membrane and self-adhered
- 3 SBS flashing applications.
- 4 2. Soprema Elastocol Stick Zero: Zero VOC, self-adhesive membrane primer. Low VOC solvent-based
- 5 primer for the preparation of membrane substrates for self-adhered SBS membrane and self-adhered
- 6 SBS flashing applications.
- 7 B. Fasteners and Plates:
- 8 1. Soprema #12 DP Fastener and 3 in stress plate: Fastener and plate used to secure drainage mat to
- 9 wood lagging.
- 10 2. Soprema #12 DP Fastener and 2 in stress plate: Fastener and plate used to secure vertical field
- 11 membrane to wood lagging.
- 12 C. Waterstop: Bentonite/butyl-rubber waterstop, RX-101 rectangle, 1" x 3/4", such as by Volclay,
- 13 www.CETCO.com.

14 PART 3 - EXECUTION

15 3.1 EXAMINATION

- 16 A. Examination includes visual observations, qualitative analysis, and quantitative testing measures as
- 17 necessary to ensure conditions remain satisfactory throughout the project.
- 18 B. The contractor shall examine all waterproofing substrates.
- 19 C. The applicator shall not begin installation until conditions have been properly examined and determined to
- 20 be clean, dry and, otherwise satisfactory to receive specified waterproofing materials.
- 21 D. During the application of specified materials, the applicator shall continue to examine all project conditions
- 22 to ensure conditions remain satisfactory to complete the specified waterproofing system.
- 23 E. No waterproofing membranes will be installed during rain or snowfall. Use of salt or calcium is prohibited to
- 24 remove ice or snow.
- 25 F. Verify the compatibility of all membrane components with curing compounds, coatings or other materials
- 26 which are already or will be installed on the surfaces to be treated.

27 3.2 PREPARATION

- 28 A. Before commencing work each day, the contractor shall prepare all waterproofing substrates to ensure
- 29 conditions are satisfactory to proceed with the installation of specified waterproofing materials. Preparation
- 30 of substrates includes, but is not limited to, substrate repairs, securement of substrates, eliminating all
- 31 incompatible materials, and cleaning.
- 32 B. Where conditions are found to be unsatisfactory, work shall not begin until conditions are made satisfactory
- 33 to begin work. Commencing of work shall indicate contractor's acceptance of conditions.

34 3.3 DRAINAGE MAT APPLICATION

- 35 A. Drainage board must be supported and follow the shapes of the substrate.
- 36 B. Drainage board can bridge cracks and/or holes in the substrate from 1 to 2 in wide and deep. Cracks and/or
- 37 holes in the substrate exceeding 2 in shall be prepared using mortar, shotcrete, plywood, Sopraboard
- 38 (mechanically attached to substrate) or other approved method prior to the placement of the drainage board.
- 39 C. Install drainage mat in accordance with membrane manufacturer's published instructions.
- 40 D. Place and secure drainage mat with the filter fabric facing the positive side of the waterproofing. Overlap the
- 41 edges of the geotextile fabric to maintain continuity.
- 42 E. For vertical applications, fasten drainage mat to substrate using appropriate fasteners and plates.
- 43 F. Ensure drainage panels are not damaged during subsequent construction.

44 3.4 PRE-APPLIED PROTECTION BOARD APPLICATION

- 45 A. Install protection board in accordance with manufacturer's published instructions.
- 46 B. Place and secure all boards fitted against adjoining boards to form tight joints.
- 47 C. For vertical applications, fasten and secure protection board to substrate using appropriate fasteners for the
- 48 substrate.
- 49 D. Ensure protection board is not damaged during subsequent construction.

50 3.5 POST APPLIED PROTECTION SHEET APPLICATION

- 51 A. Follow material product data sheets and published general requirements for installation instructions.
- 52 B. Ensure environmental conditions are satisfactory, and will remain satisfactory, during the application of the
- 53 self-adhesive membrane.

- 1 C. Ensure horizontal field membrane is prepared and acceptable to receive the self-adhesive membrane.
- 2 D. Unroll the protection sheet and loose lay in place.
- 3 E. Ensure minimum 1 in side and end-laps.
- 4 F. Adhere the protection sheet in a continuous longitudinal strip over the horizontal waterproofing membrane
- 5 by removing the silicone release film.
- 6 G. As the release film is peeled away, use a stiff push broom or roller to firmly set the sheet in place. Ensure
- 7 full contact is made between the ply and the substrate for full adhesion.
- 8 H. Each day, physically inspect all side and end-laps, and ensure the membrane is sealed watertight.
- 9 I. Inspect the installation each day to ensure the plies are fully adhered. Repair all un-adhered voids, wrinkles,
- 10 open laps and all other deficiencies.
- 11 J. Repair deficiencies using specified heat-welded or self-adhesive membrane. For self-adhesive repairs,
- 12 prime surfaces using specified self-adhesive primer. Repairs shall extend 6 in beyond the damaged
- 13 membrane.

14 **3.6 PRIMER APPLICATION**

- 15 A. Examine all substrates and conduct adhesion peel tests as necessary to ensure satisfactory adhesion is
- 16 achieved.
- 17 B. Apply the specified self-adhesive primer to dry, compatible substrates where determined primer is necessary
- 18 to enhance adhesion.
- 19 C. For the self-adhesive waterproofing applied during cold temperatures (below 50°F) the specified self-
- 20 adhesive primer shall be applied.
- 21 D. Apply primer using brush, roller, or sprayer at the rate published on the product data sheet.
- 22 E. Ensure self-adhered membrane primer is tacky to-the-touch, but not wet. Primer should not transfer to the
- 23 finger tips when touched.
- 24 F. As project conditions vary throughout the day, applicator shall monitor changing conditions, monitor the
- 25 drying time of primers, and monitor the adhesion of the membrane plies. Adjust primer and membrane
- 26 application methods as necessary to achieve the desired results.

27 **3.7 VERTICAL FIELD MEMBRANE APPLICATION (COLPHENE BSW V)**

- 28 A. Follow material product data sheets and published general requirements for installation instructions.
- 29 B. Temporarily fasten the top leading edge of the waterproofing ply in place using specified fasteners and
- 30 plates. Upon completion, remove and seal fastener holes using specified heat welded waterproofing
- 31 membrane or specified liquid-applied flashing.
- 32 C. Vertical blind side waterproofing membrane shall be applied in lengths not exceeding 16 ft or as necessary
- 33 to accommodate project conditions.
- 34 D. Once in place, remove the release film on the underside of the sheet.
- 35 E. As the release film is peeled away, use an approved membrane roller to roll-in vertical membrane to firmly
- 36 set the sheet in place. Ensure full contact is made between the ply and the substrate for full adhesion.
- 37 F. Ensure a minimum 4 in side-lap is achieved.
- 38 G. The 4 in duo-selvage side-lap consists of 2 in of self-adhesive on the inside edge of the lap and 2 in of heat
- 39 welded membrane along the outside edge of the side-lap.
- 40 H. Using a roller, seal the self-adhesive portion of the side-lap, and use an approved roofing torch or hot-air
- 41 welder to seal the 2 in heat welded portion of the side lap.
- 42 I. All waterproofing end-laps shall be overlapped 6 in and fully adhered by heat welding.
- 43 J. All end lap joints shall be aligned and overlapped a minimum of 6 in beyond all fastener penetrations and
- 44 holes where fasteners were removed.
- 45 K. Ensure all membrane T-joints are heat welded and fully sealed.
- 46 L. Waterproofing over concrete cold joints shall be reinforced by installing an additional 12 in reinforcing ply of
- 47 membrane over the cold joint, fully heat-welded or self-adhered over primed surface. The waterproofing
- 48 reinforcing ply shall be centered in the angle of the cold joint or over the cold joint.
- 49 M. All waterproofing membrane tie-ins shall be heat-welded to the adjacent ply.
- 50 N. If a negative/back-water lap is created on the positive side of the waterproofing, heat weld or self-adhere a
- 51 reinforcing ply to strip-in the end-lap joint. The reinforcing ply shall extend a minimum of 4 in beyond the
- 52 joint in both directions.
- 53 O. Each day, the contractor shall physically inspect all side and end-laps, and ensure the membrane is fully
- 54 sealed watertight.
- 55 P. Inspect the installation each day to ensure the plies are secure and adhered.
- 56 Q. Repair deficiencies using specified heat-welded or self-adhesive membrane. For self-adhesive repairs,
- 57 prime surfaces using specified self-adhesive primer. Repairs shall extend 6 in beyond the damaged
- 58 membrane.

- 1 **3.8 VERTICAL FIELD MEMBRANE APPLICATION (COLPHENE BSW H)**
2 A. Follow material product data sheets and published general requirements for installation instructions.
3 B. Temporarily fasten the top leading edge of the waterproofing ply in place using specified fasteners and
4 plates. Upon completion, remove seal and fastener holes using specified heat welded waterproofing
5 membrane or specified liquid-applied flashing.
6 C. Vertical blind side waterproofing membrane shall be applied in lengths not exceeding 16 ft or as necessary
7 to accommodate project conditions.
8 D. Ensure a minimum 4 in side-lap is achieved.
9 E. The 4 in duo-selvage side-lap consists of 2 in of self-adhesive on the inside edge of the lap and 2 in of heat
10 welded membrane along the outside edge of the side-lap.
11 F. Remove the side-lap release film, and use a roller to seal the self-adhesive portion of the side-lap. Use an
12 approved roofing torch or hot-air welder to seal the 2 in heat welded portion of the side lap.
13 G. All end lap joints shall be aligned and overlapped a minimum of 6 in beyond all fastener penetrations and
14 holes where fasteners were removed.
15 H. Waterproofing over concrete cold joints shall be reinforced by installing an additional 12 in reinforcing ply of
16 membrane over the cold joint, fully heat-welded or self-adhered over primed surface. The waterproofing
17 reinforcing ply shall be centered in the angle of the cold joint or over the cold joint.
18 I. All waterproofing membrane tie-ins shall be heat-welded to the adjacent ply.
19 J. If a negative/back-water lap is created on the positive side of the waterproofing, heat weld or self-adhere a
20 reinforcing ply to strip-in the end-lap joint. The reinforcing ply shall extend a minimum of 4 in beyond the
21 joint in both directions.
22 K. Each day, the contractor shall physically inspect all side and end-laps, and ensure the membrane is fully
23 sealed watertight.
24 L. Inspect the installation each day to ensure the plies are secure and adhered.
25 M. Repair deficiencies using specified heat-welded or self-adhesive membrane. For self-adhesive repairs,
26 prime surfaces using specified self-adhesive primer. Repairs shall extend 6 in beyond the damaged
27 membrane.

- 28 **3.9 HORIZONTAL FIELD MEMBRANE APPLICATION (COLPHENE BSW H)**
29 A. Follow material product data sheets and published general requirements for installation instructions.
30 B. Unroll horizontal blind side waterproofing membrane loose-laid onto the prepared substrate, or onto
31 specified drainage mat/protection board where applicable per design requirements.
32 C. The 4 in duo-selvage side-lap consists of 2 in of self-adhesive on the inside edge of the lap and 2 in of heat
33 welded membrane along the outside edge of the side-lap.
34 D. Remove the side-lap release film, and use a roller to seal the self-adhesive portion of the side-lap. Use an
35 approved roofing torch or hot-air welder to seal the 2 in heat welded portion of the side lap.
36 E. All end lap joints shall be overlapped a minimum of 6 in.
37 F. End-laps shall be staggered 12 in or more. Where T-joints are formed at the end-laps, cut away a 4 in corner
38 at a 45° angle from the overlying end-lap.
39 G. Waterproofing over concrete cold joints shall be reinforced by installing an additional 12 in reinforcing ply of
40 membrane over the cold joint, fully heat-welded or self-adhered over primed surface. The waterproofing
41 reinforcing ply shall be centered in the angle of the cold joint or over the cold joint.
42 H. All waterproofing membrane tie-ins shall be heat-welded to the adjacent ply.
43 I. Each day, the contractor shall physically inspect all side and end-laps, and ensure the membrane is fully
44 sealed watertight.
45 J. Inspect the installation each day to ensure the plies are secure and adhered.
46 K. Repair deficiencies using specified heat-welded or self-adhesive membrane. For self-adhesive repairs,
47 prime surfaces using specified self-adhesive primer. Repairs shall extend 6 in beyond the damaged
48 membrane.

- 49 **3.10 LIQUID-APPLIED FLASHING, (PMA MEMBRANE APPLICATION) (ALSAN RS 260 LO FLASH)**
50 A. Refer to manufacturer's details drawings, product data sheets and published general requirements for
51 application rates and specific installation instructions.
52 B. Pre-cut polyester reinforcing fleece to conform to roof terminations, transitions and penetrations being
53 flashed. Ensure a minimum 2 in overlap of fleece at side and end-laps. Ensure the completed liquid-applied
54 flashing membrane is fully reinforced.
55 C. Apply the base coat of catalyzed liquid resin onto the substrate using a brush or roller, working the material
56 into the surface for complete coverage and full adhesion.
57 D. Immediately apply the reinforcing fleece into the wet base coat of resin. Using a brush or roller, work the
58 reinforcing fabric into the wet resin while applying the second coat of catalyzed liquid resin to completely
59 encapsulate the fleece.

1 E. Refer to reinforced, polymethacrylate (PMA) specification section and application instructions, details
2 drawings, product data sheets and published general requirements for installation instructions.

3 **3.11 LIQUID-APPLIED FLASHING, (PMMA MEMBRANE APPLICATION) (ALSAN 230 FLASH)**

4 A. Refer to manufacturer's details drawings, product data sheets and published general requirements for
5 application rates and specific installation instructions.

6 B. Pre-cut polyester reinforcing fleece to conform to roof terminations, transitions and penetrations being
7 flashed. Ensure a minimum 2 in overlap of fleece at side and end-laps. Ensure the completed liquid-applied
8 flashing membrane is fully reinforced.

9 C. Apply the base coat of catalyzed liquid resin onto the substrate using a brush or roller, working the material
10 into the surface for complete coverage and full adhesion.

11 D. Immediately apply the reinforcing fleece into the wet base coat of resin. Using a brush or roller, work the
12 reinforcing fabric into the wet resin while applying the second coat of catalyzed liquid resin to completely
13 encapsulate the fleece.

14 E. Refer to reinforced, polymethyl-methacrylate (PMMA) specification section and application instructions,
15 details drawings, product data sheets and published general requirements for installation instructions.

16 **3.12 LIQUID-APPLIED FLASHING, (ELASTOMERIC LIQUID MEMBRANE APPLICATION) (COLPHENE
17 LIQUID MEMBRANE)**

18 A. Refer to manufacturer's detail drawings, product data sheets and published general requirements for
19 application rates and specific installation instructions.

20 B. Dispense the liquid-applied membrane from 2-component cartridge onto the substrate, then evenly apply
21 over the work area using a trowel.

22 C. Remove release film from Colphene 3000 and apply over the wet Colphene liquid Membrane immediately
23 before the liquid skins over.

24 D. For pipe penetrations and similar round details, secure a stainless steel pipe clamp around top leading edge
25 of the reinforced liquid flashing before Colphene Liquid Membrane has cured.

26 **3.13 LIQUID-APPLIED FLASHING, (BITUMEN-URETHANE MEMBRANE APPLICATION) (ALSAN
27 FLASHING)**

28 A. Refer to manufacturer's details drawings, product data sheets and published general requirements for
29 application rates and specific installation instructions.

30 B. Pre-cut Colphene BSW H to conform to penetration.

31 C. Field-wrap and heat weld Colphene BSW H to completely flash and seal the penetration watertight.

32 D. Apply reinforced Alsan Flashing over Colphene BSW H to fully encapsulate and seal the penetration.

33 1. Pre-cut polyester reinforcing fleece to conform to roof terminations, transitions and penetrations
34 being flashed. Ensure a minimum 2 in overlap of fleece at side and end-laps. Ensure the completed
35 liquid-applied flashing membrane is fully reinforced.

36 2. Apply the base coat of liquid resin onto the substrate using a brush or roller, working the material into
37 the surface for complete coverage and full adhesion at 2.0 gallons per square.

38 3. Immediately apply the reinforcing fleece into the wet base coat of resin. Using a brush or roller, work
39 the fleece into the wet resin while applying the second coat of liquid resin to completely encapsulate
40 the fleece at 2.0 gallons per square, and extend the liquid resin 1 inch beyond the fleece.

41 4. Allow the liquid membrane to sufficiently cure for 24 to 48 hours then apply the finish coat of liquid
42 resin at 2.0 gallons per square.

43 E. Pre-cut Colphene BSW V and remove the self-adhesive release film.

44 F. Ensure Alsan flashing has cured then wrap the pipe with the Colphene BSW V.

45 G. Secure a stainless steel pipe clamp around the Colphene BSW V.

46 **3.14 CLEAN-UP**

47 A. Clean-up and properly dispose of waste and debris resulting from these operations each day as required to
48 prevent damages and disruptions to operations.

- B. Related Requirements:

31

1. Section 09 9120 "Parking Pavement Markings".

32

2. Section 03 30 00 "Cast-In-Place Concrete" for surface finish of subgrade to receive traffic coating.

33

1.3 PREINSTALLATION MEETINGS

34

- A. Preinstallation Conference: Conduct conference at Project site.

35

1.4 ACTION SUBMITTALS

36

- A. Product Data: For each type of product, including installation instructions.

37

- B. Shop Drawings: For traffic coatings.

38

1. Include details for treating substrate joints and cracks, flashings, deck penetrations, and other termination conditions.

39

2. Include plans showing layout of pavement markings, lane separations, and defined parking spaces. Indicate, with international symbol of accessibility, spaces allocated for people with disabilities.

40

41

42

1.5 INFORMATIONAL SUBMITTALS

43

- A. Qualification Data: For Installer.

44

- B. Product Certificates: For each type of traffic coating.

45

- C. Sample Warranty: For special warranty.

46

1.6 QUALITY ASSURANCE

47

- A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.

- 1 **1.7 FIELD CONDITIONS**
2 A. Environmental Limitations: Apply traffic coatings within the range of ambient and substrate temperatures
3 recommended in writing by manufacturer. Do not apply traffic coatings to damp or wet substrates, when
4 temperatures are below 40 deg F, when relative humidity exceeds 85 percent, or when temperatures are
5 less than 5 deg F above dew point.
6 1. Do not apply traffic coatings in snow, rain, fog, or mist, or when such weather conditions are imminent
7 during the application and curing period. Apply only when frost-free conditions occur throughout the
8 depth of substrate.
9 B. Do not install traffic coating until items that penetrate membrane have been installed.
10 C. Pavement-Marking Paint: Proceed with pavement marking only on clean, dry surfaces and at a minimum
11 ambient or surface temperature of 40 deg F for oil-based materials or 50 deg F for water-based materials,
12 and not exceeding 95 deg F.

- 13 **1.8 WARRANTY**
14 A. Manufacturer's Warranty: Manufacturer agrees to repair or replace traffic coating that fails in materials or
15 workmanship within specified warranty period.
16 1. Failures include, but are not limited to, the following:
17 a. Adhesive or cohesive failures.
18 b. Abrasion or tearing failures.
19 c. Surface crazing or spalling.
20 d. Intrusion of water, oils, gasoline, grease, salt, deicer chemicals, or acids into deck substrate.
21 2. Warranty Period: Five years from date of Substantial Completion.

22 **PART 2 - PRODUCTS**

- 23 **2.1 MATERIALS, GENERAL**
24 A. Material Compatibility: Provide primers; base-, intermediate-, and topcoat; and accessory materials that are
25 compatible with one another and with substrate under conditions of service and application, as demonstrated
26 by manufacturer based on testing and field experience.
27 B. Source Limitations:
28 1. Obtain traffic coatings from single source from single manufacturer.
29 2. Obtain primary traffic-coating materials, including primers, from traffic-coating manufacturer. Obtain
30 accessory materials including aggregates, sheet flashings, joint sealants, and substrate repair
31 materials of types and from sources recommended in writing by primary material manufacturer.
32 3. Obtain pavement-marking paint from single source from single manufacturer.

- 33 **2.2 TRAFFIC COATING**
34 A. Traffic Coating: Manufacturer's standard, traffic-bearing, seamless, high-solids-content, cold liquid-applied,
35 elastomeric, waterproofing membrane system with integral wearing surface for vehicular traffic; according
36 to ASTM C 957.
37 1. Traffic Coating – Car Stall:
38 2. Traffic Coating – Drive Lanes:
39 B. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
40 1. Advanced Polymer Technology Corporation.
41 2. BASF Corporation; Construction Systems.
42 3. Neogard; a division of Jones-Blair, Inc.
43 4. Tremco Incorporated.
44 C. Primer: Liquid waterborne or solvent-borne primer recommended for substrate and conditions by traffic-
45 coating manufacturer.
46 1. Material: Epoxy.
47 D. Preparatory and Base Coats: epoxy.
48 1. Thicknesses: Minimum dry film thickness as recommended in writing by manufacturer for substrate
49 and service conditions indicated.
50 E. Intermediate Coat: Polyurethane.
51 1. Thicknesses: Minimum dry film thickness as recommended in writing by manufacturer for substrate
52 and service conditions indicated, measured excluding aggregate.
53 2. Aggregate Content: As recommended in writing by traffic-coating manufacturer for substrate and
54 service conditions indicated.
55 F. Topcoat: Polyurethane.

- 1 1. Thicknesses: Minimum dry film thickness as recommended in writing by manufacturer for substrate
2 and service conditions indicated, measured excluding aggregate.
3 2. Aggregate Content: As recommended in writing by traffic-coating manufacturer for substrate and
4 service conditions indicated and as required to achieve slip-resistant finish.
5 3. Service Condition:
6 a. Vehicle Parking Stall.
7 b. Vehicle Drive Lane.
8 c. Vehicle Drive Turning Lanes.
9 d. Vehicle Drive Ramps.
10 4. Color: As selected by Architect from manufacturer's full range.
11 G. Aggregate: Manufacturer's standard aggregate for each use indicated of particle sizes, shape, and minimum
12 hardness recommended in writing by traffic-coating manufacturer.
13 H. Concrete Sealer: Floor concrete sealer at level U4.
14 1. Silane and siloxane product chemistry developed to penetrate concrete surfaces to repel water and
15 liquids.
16 2. Basis of Design: Chemstop WB Regular as manufactured by Euclid Chemical Co.
- 17 **2.3 ACCESSORY MATERIALS**
18 A. Joint Sealants: As specified in Section 07 92 00 "Joint Sealants."
19 B. Sheet Flashing: Nonstaining sheet material recommended in writing by traffic-coating manufacturer.
20 1. Thickness: Minimum 50 mils.
21 C. Adhesive: Contact adhesive recommended in writing by traffic-coating manufacturer.
22 D. Reinforcing Strip: Fiberglass mesh recommended in writing by traffic-coating manufacturer.

23 **PART 3 - EXECUTION**

24 **3.1 EXAMINATION**

- 25 A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for
26 surface smoothness, surface moisture, and other conditions affecting performance of traffic-coating work.
27 B. Verify that substrates are visibly dry and free of moisture.
28 1. Test for moisture according to ASTM D 4263.
29 2. Test for moisture content by measuring with an electronic moisture meter.
30 C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of traffic-coating
31 work.
32 D. Proceed with installation only after substrate construction and penetrating work have been completed and
33 unsatisfactory conditions have been corrected.
34 1. Begin coating application only after minimum concrete-curing and -drying period recommended in
35 writing by traffic-coating manufacturer has passed and after substrates are dry.
36 2. Application of coating indicates acceptance of surfaces and conditions.

37 **3.2 PREPARATION**

- 38 A. General: Before applying traffic coatings, clean and prepare substrates according to ASTM C 1127 and
39 manufacturer's written instructions to produce clean, dust-free, dry substrate for traffic-coating application.
40 Remove projections, fill voids, and seal joints if any, as recommended in writing by traffic-coating
41 manufacturer.
42 B. Schedule preparation work so dust and other contaminants from process do not fall on wet, newly coated
43 surfaces.
44 C. Mask adjoining surfaces not receiving traffic coatings to prevent overspray, spillage, leaking, and migration
45 of coatings. Prevent traffic-coating materials from entering deck substrate penetrations and clogging weep
46 holes and drains.
47 D. Concrete Substrates: Mechanically abrade surface to a uniform profile acceptable to manufacturer,
48 according to ASTM D 4259. Do not acid etch.
49 1. Remove grease, oil, paints, and other penetrating contaminants from concrete.
50 2. Remove concrete fins, ridges, and other projections.
51 3. Remove laitance, glaze, efflorescence, curing compounds, concrete hardeners, form-release agents,
52 and other incompatible materials that might affect coating adhesion.
53 4. Remove remaining loose material to provide a sound surface, and clean surfaces according to ASTM
54 D 4258.

- 1 **3.3 TERMINATIONS AND PENETRATIONS**
- 2 A. Prepare vertical and horizontal surfaces at terminations and penetrations through traffic coatings and at
- 3 expansion joints, drains, and sleeves according to ASTM C 1127 and manufacturer's written instructions.
- 4 B. Provide sealant cants at penetrations and at reinforced and nonreinforced, deck-to-wall butt joints.
- 5 C. Terminate edges of deck-to-deck expansion joints with preparatory base-coat strip.
- 6 D. Install sheet flashings at deck-to-wall expansion and dynamic joints, and bond to deck and wall substrates
- 7 according to manufacturer's written recommendations.
- 8 **3.4 JOINT AND CRACK TREATMENT**
- 9 A. Prepare, treat, rout, and fill joints and cracks in substrates according to ASTM C 1127 and manufacturer's
- 10 written recommendations. Before coating surfaces, remove dust and dirt from joints and cracks according
- 11 to ASTM D 4258.
- 12 1. Comply with recommendations in ASTM C 1193 for joint-sealant installation.
- 13 B. Apply reinforcing strip in traffic-coating system where recommended in writing by traffic-coating
- 14 manufacturer.
- 15 **3.5 TRAFFIC-COATING APPLICATION**
- 16 A. Apply traffic coating according to ASTM C 1127 and manufacturer's written instructions.
- 17 B. Start traffic-coating application in presence of manufacturer's technical representative.
- 18 C. Verify that wet film thickness of each coat complies with requirements every 1000 sq. ft..
- 19 D. Uniformly broadcast aggregate on coats specified to receive aggregate. Embed aggregate according to
- 20 manufacturer's written instructions. After coat dries, sweep away excess aggregate.
- 21 E. Apply traffic coatings to prepared wall terminations and vertical surfaces to height indicated; omit aggregate
- 22 on vertical surfaces.
- 23 F. Cure traffic coatings. Prevent contamination and damage during application and curing stages.
- 24 G. Apply number of coats of specified compositions for each type of traffic coating at locations as indicated on
- 25 Drawings.
- 26 1. Traffic Coating – Car Stall:
- 27 2. Traffic Coating – Drive Lanes:
- 28 **3.6 FIELD QUALITY CONTROL**
- 29 A. Testing Agency: Owner will engage a qualified testing agency to perform the following field tests and
- 30 inspections:
- 31 1. Materials Testing:
- 32 a. Samples of material delivered to Project site shall be taken, identified, sealed, and certified in
- 33 presence of Owner and Contractor.
- 34 b. Testing agency shall perform tests for characteristics specified, using applicable referenced
- 35 testing procedures.
- 36 c. Testing agency shall verify thickness of coatings during traffic-coating application for each
- 37 6000 sq. ft. of installed traffic coating or part thereof.
- 38 2. If test results show traffic coating does not comply with requirements, remove and replace or repair
- 39 the membrane as recommended in writing by traffic-coating manufacturer and make further repairs
- 40 after retesting until traffic-coating installation passes.
- 41 B. Final Traffic-Coating Inspection: Arrange for traffic-coating manufacturer's technical personnel to inspect
- 42 membrane installation on completion.
- 43 1. Notify Architect or Owner 48 hours in advance of date and time of inspection.
- 44 C. Additional testing and inspecting, at Contractor's expense, will be performed to determine compliance of
- 45 replaced or additional work with specified requirements.
- 46 D. Prepare test and inspection reports.
- 47 **3.7 PROTECTING AND CLEANING**
- 48 A. Protect traffic coatings from damage and wear during remainder of construction period.
- 49 B. Clean spillage and soiling from adjacent construction using cleaning agents and procedures recommended
- 50 by manufacturer of affected construction.

51 **END OF SECTION 07 18 00**

14 PART 3 – EXECUTION

- 15 3.1 [EXAMINATION](#)
- 16 3.2 [PREPARATION](#)
- 17 3.3 [APPLICATION](#)

18 PART 1 - GENERAL

19 1.1 RELATED DOCUMENTS

- 20 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 21 Division 01 Specification Sections, apply to this Section.

22 1.2 SUMMARY

- 23 A. Section includes film-forming water-repellent treatments for the following vertical and horizontal surfaces:
 - 24 1. Concrete unit masonry.
 - 25 2. Natural stone.
- 26 B. Related Requirements:
 - 27 1. Section 03 01 30 "Maintenance of Cast-in-Place Concrete" for high-build penetrating polymer
 - 28 sealers for exterior traffic surfaces.
 - 29 2. Section 04 22 00 "Concrete Unit Masonry" for integral water-repellent admixture for unit masonry
 - 30 assemblies.

31 1.3 PREINSTALLATION MEETINGS

- 32 A. Preinstallation Conference: Conduct conference at Project site.

33 1.4 ACTION SUBMITTALS

- 34 A. Product Data: For each type of product.
 - 35 1. Include manufacturer's printed statement of VOC content.
 - 36 2. Include manufacturer's recommended number of coats for each type of substrate and spreading
 - 37 rate for each separate coat.

38 1.5 INFORMATIONAL SUBMITTALS

- 39 A. Product Certificates: For each type of water repellent.
- 40 B. Preconstruction Test Reports: For water-repellent-treated substrates.
- 41 C. Sample Warranty: For special warranty.

42 1.6 PRECONSTRUCTION TESTING

- 43 A. Preconstruction Testing: Engage a qualified testing agency to perform preconstruction testing of water
- 44 repellents on field mockups.
 - 45 1. Test a minimum 4 ft. by 4 ft. area on each type of masonry. Use the manufacturer's application
 - 46 instructions. Let test area protective treatment cure before inspection. Keep test panels available
 - 47 for comparison throughout the protective treatment project.
 - 48 2. In addition to verifying performance requirements, use mockups to verify manufacturer's written
 - 49 instructions for application procedure and optimum rates of product application to substrates.
 - 50 3. Propose changes to materials and methods to suit Project.
 - 51 4. Notify Architect seven days in advance of the dates and times when mockups will be tested.

1 **1.7 FIELD CONDITIONS**

- 2 A. Limitations: Proceed with application only when the following existing and forecasted weather and
3 substrate conditions permit water repellents to be applied according to manufacturers' written instructions
4 and warranty requirements:
- 5 1. Concrete surfaces and mortar have cured for not less than 28 days.
 - 6 2. Building has been closed in for not less than 30 days before treating wall assemblies.
 - 7 3. Ambient temperature is above 40 deg F and below 100 deg F and will remain so for 24 hours.
 - 8 4. Substrate is not frozen and substrate-surface temperature is above 40 deg F and below 100 deg F.
 - 9 5. Rain or snow is not predicted within 24 hours.
 - 10 6. Not less than 2 hours have passed since surfaces were last wet.
 - 11 7. Windy conditions do not exist that might cause water repellent to be blown onto vegetation or
12 surfaces not intended to be treated.

13 **1.8 WARRANTY**

- 14 A. Special Warranty: Manufacturer's standard form in which manufacturer and Applicator agree(s) to repair or
15 replace materials that fail to maintain water repellency and graffiti protection within specified warranty
16 period.
- 17 1. Warranty Period: Two years from date of Substantial Completion.

18 **PART 2 - PRODUCTS**

19 **2.1 WATER REPELLENTS**

- 20 A. High performance, clear, solvent-based silicone elastomer formulated to weatherproof concrete block and
21 other porous masonry materials and protect treated surfaces from repeated graffiti attacks with little to no
22 change to the natural appearance.
- 23 1. Applied with low-pressure spray, brush or roller, product penetrates and fills pores to prevent water
24 penetration through exterior walls exposed to normal weathering. Graffiti removal is achieved using
25 Defacer Eraser® Graffiti Wipe.
 - 26 2. Basis of Design: Subject to compliance with requirements, provide the following product that may
27 be incorporated into the Work, but are not limited to, the following:
 - 28 a. Sure Klean® Weather Seal Blok-Guard® & Graffiti Control Ultra 15.
- 29 B. Technical Properties:
- 30 1. Form: Clear liquid, petroleum odor.
 - 31 2. Specific Gravity: 1.28.
 - 32 3. pH: not applicable.
 - 33 4. Weight/Gallon: 10.62 pounds.
 - 34 5. Active Content: 15 percent.
 - 35 6. Total Solids: 15 percent ASTM D2369.
 - 36 7. Voc Content: less than 100 grams per Liter.
 - 37 8. Flash Point: 100 degrees F (38 degrees C) ASTM D3278.
 - 38 9. Freeze Point: less than -22 degrees F (less than -30 degrees C).
 - 39 10. Shelf Life: 1 year in tightly sealed, unopened container.

40 **PART 3 - EXECUTION**

41 **3.1 EXAMINATION**

- 42 A. Examine substrates, areas, and conditions, with Applicator present, for compliance with requirements and
43 conditions affecting performance of the Work.
- 44 1. Verify that surfaces are clean and dry according to water-repellent manufacturer's requirements.
45 Check moisture content in three representative locations by method recommended by
46 manufacturer.
 - 47 2. Verify that there is no efflorescence or other removable residues that would be trapped beneath the
48 application of water repellent.
 - 49 3. Verify that required repairs are complete, cured, and dry before applying water repellent.
- 50 B. Proceed with installation only after unsatisfactory conditions have been corrected.
51

- 1 **3.2 PREPARATION**
2 A. Cleaning: Before application of water repellent, clean substrate of substances that could impair penetration
3 or performance of product according to water-repellent manufacturer's written instructions and as follows:
4 1. Concrete Unit Masonry: Remove oil, curing compounds, laitance, and other substances that inhibit
5 penetration or performance of water repellents according to ASTM E 1857.
6 2. Natural Stone: As recommended by stone supplier.
7 B. Protect adjoining work, including mortar and sealant bond surfaces, from spillage or blow-over of water
8 repellent. Cover adjoining and nearby surfaces of aluminum and glass if there is the possibility of water
9 repellent being deposited on surfaces. Cover live vegetation.

- 10 **3.3 APPLICATION**
11 A. Manufacturer's Field Service: Engage a factory-authorized service representative to inspect the substrate
12 before application of water repellent and to instruct Applicator on the product and application method to be
13 used.
14 B. Before applying, read "Preparation" and "Safety Information" sections in the Manufacturer's Product Data
15 Sheet for Weather Seal Blok-Guard® & Graffiti Control Ultra 15. Refer to the Product Data Sheet for
16 additional information about application of Blok-Guard® & Graffiti Control Ultra 15. Do not dilute or alter.
17 Stir thoroughly before use. Once opened, Blok-Guard® & Graffiti Control Ultra 15 must be used
18 immediately.
19 C. Sprayer Application Instructions
20 1. Using low-pressure (less than 50 psi) spray equipment, saturate, "wet-on-wet" from the bottom up.
21 Avoid excessive overlapping.
22 2. Let the first application penetrate the masonry surface for 2 to 3 minutes.
23 3. Immediately brush out runs and drips to prevent build up.
24 D. Brush or Roller Application Instructions
25 1. Thoroughly saturate the surface. Avoid excessive overlapping. Brush out runs and drip to prevent
26 buildup.
27 E. Heavily Textured and Porous Surface Application Instructions
28 1. Using low-pressure (less than 50 psi) spray equipment, saturate, "wet-on-wet" from the bottom up,
29 applying enough material to create a 6 to 8 inch rundown below the contact point while avoiding
30 excessive overlapping. Let the first application penetrate the masonry surface for 2 to 3 minutes.
31 Reapply in the same saturating manner to ensure complete coverage of recessed surfaces.
32 Immediately brush out runs and rips to prevent build up.
33 F. Dense, Smooth Surface Application Instructions
34 1. Apply enough in a single saturating application to completely wet the surface without creating drips,
35 puddles or rundown. Brush out or back roll all runs and drips for uniform appearance. DO NOT
36 OVER APPLY. One application is normally enough.
37 G. Second Coat Application Instructions
38 1. Apply the second coat as soon as the first coat is dry to touch, or within 2 hours of the first coat.
39 Immediately back roll or brush out runs and drips for a uniform appearance and to prevent build up.
40 Allowing more than 2 hours between coats reduces effectiveness of the second coat.
41 H. Drying Time: Protect treated surfaces from rain for 4 to 6 hours. In normal weather (60 to 80 degrees
42 Fahrenheit at 50 percent humidity), Blok-Guard® & Graffiti Control Ultra 15 dries to the touch in about 25
43 minutes. Drying takes lower at lower temperatures. Product gains its water-repellency properties in 24
44 hours.
45 I. Graffiti Removal: Remove most types of graffiti with Defacer Eraser® Graffiti Wipe or Enviro Klean®
46 SafStrip.
47 J. Clean-up: clean tools and equipment immediately with mineral spirits or an equivalent cleaning
48 solvent. Remove over spray and spills as soon as possible.

17 **PART 1 - GENERAL**

18 **1.1 RELATED DOCUMENTS**

- 19 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 20 Division 01 Specification Sections, apply to this Section.

21 **1.2 SUMMARY**

- 22 A. Section Includes:
- 23 1. Mineral-wool blanket.
- 24 2. Mineral-wool board.

25 **1.3 ACTION SUBMITTALS**

- 26 A. Product Data: For each type of product.
- 27 B. Sustainable Design Submittals:
 - 28 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
 - 29 cost.

30 **1.4 INFORMATIONAL SUBMITTALS**

- 31 A. Product test reports.
- 32 B. Research reports.

33 **1.5 DELIVERY, STORAGE, AND HANDLING**

- 34 A. Protect insulation materials from physical damage and from deterioration due to moisture, soiling, and other
- 35 sources. Store inside and in a dry location. Comply with manufacturer's written instructions for handling,
- 36 storing, and protecting during installation.
- 37 B. Protect foam-plastic board insulation as follows:
 - 38 1. Do not expose to sunlight except to necessary extent for period of installation and concealment.
 - 39 2. Protect against ignition at all times. Do not deliver foam-plastic board materials to Project site until
 - 40 just before installation time.
 - 41 3. Quickly complete installation and concealment of foam-plastic board insulation in each area of
 - 42 construction.

43 **PART 2 - PRODUCTS**

44 **2.1 MINERAL-WOOL BLANKETS**

- 45 A. Recycled Content: Postconsumer recycled content plus one-half of Pre-consumer recycled content not less
- 46 than 35 percent. Pre consumer = 70%. Post-consumer = 0%.

- 1 B. Mineral-Wool Blanket, Kraft faced: ASTM C 665, Type II (blankets kraft- faced product facing); consisting of
2 fibers; with Class C Membrane-faced surface not rated for flame propagation resistance (for use In non-
3 exposed applications only).
4 1. Category 1 Membrane is a vapor retarder. Where indicated or required.
5 2. Category 2 Membrane is not a vapor retarder. Where indicated or required.
6 3. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
7 that may be incorporated into the Work include, but are not limited to, the following:
8 a. Industrial Insulation Group, LLC (IIG-LLC).
9 b. Roxul Inc.
10 c. Thermafiber Inc.; an Owens Corning company.

11 **2.2 MINERAL-WOOL BOARD**

- 12 A. Recycled Content: Postconsumer recycled content plus one-half of Pre-consumer recycled content not less
13 than 35 percent. Pre consumer = 70%. Post-consumer = 0%.
14 B. Mineral-Wool Board, Kraft faced: ASTM C 665, Type II (kraft- faced product facing); consisting of fibers; with
15 Class C Membrane-faced surface not rated for flame propagation resistance (for use In non-exposed
16 applications only).
17 1. Category 1 Membrane is a vapor retarder. Where indicated or required.
18 2. Category 2 Membrane is not a vapor retarder. Where indicated or required.
19 3. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
20 that may be incorporated into the Work include, but are not limited to the following:
21 a. Industrial Insulation Group, LLC (IIG-LLC).
22 b. Roxul Inc.
23 c. Thermafiber, Inc.; an Owens Corning company.

24 **2.3 ACCESSORIES**

- 25 A. Insulation for Miscellaneous Voids:
26 1. Glass-Fiber Insulation: ASTM C 764, Type II, loose fill; with maximum flame-spread and smoke-
27 developed indexes of 5, per ASTM E 84.
28 2. Spray Polyurethane Foam Insulation: ASTM C 1029, Type II, closed cell, with maximum flame-
29 spread and smoke-developed indexes of 75 and 450, respectively, per ASTM E 84.
30 B. Insulation Anchors, Spindles, and Standoffs: As recommended by manufacturer.
31 C. Adhesive for Bonding Insulation: Product compatible with insulation and air and water barrier materials, and
32 with demonstrated capability to bond insulation securely to substrates without damaging insulation and
33 substrates.

34 **PART 3 - EXECUTION**

35 **3.1 PREPARATION**

- 36 A. Clean substrates of substances that are harmful to insulation, including removing projections capable of
37 puncturing insulation or vapor retarders, or that interfere with insulation attachment.

38 **3.2 INSTALLATION, GENERAL**

- 39 A. Comply with insulation manufacturer's written instructions applicable to products and applications.
40 B. Install insulation that is undamaged, dry, and unsoiled and that has not been left exposed to ice, rain, or
41 snow at any time.
42 C. Extend insulation to envelop entire area to be insulated. Fit tightly around obstructions and fill voids with
43 insulation. Remove projections that interfere with placement.
44 D. Provide sizes to fit applications and selected from manufacturer's standard thicknesses, widths, and lengths.
45 Apply single layer of insulation units unless multiple layers are otherwise shown or required to make up total
46 thickness or to achieve R-value.

47 **3.3 PROTECTION**

- 48 A. Protect installed insulation from damage due to harmful weather exposures, physical abuse, and other
49 causes. Provide temporary coverings or enclosures where insulation is subject to abuse and cannot be
50 concealed and protected by permanent construction immediately after installation.

51 **END OF SECTION**

- 16 3.3 [INSTALLATION](#)
- 17 3.4 [PROTECTION](#)

18 **PART 1 - GENERAL**

19 **1.1 RELATED DOCUMENTS**

- 20 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 21 Division 01 Specification Sections, apply to this Section.

22 **1.2 SUMMARY**

- 23 A. Section Includes:
 - 24 1. Sprayed cellulose thermal insulation.
- 25 B. Related Requirements:
 - 26 1. Section 07 21 00 "Thermal Insulation" for foamed in place insulation.

27 **1.3 ACTION SUBMITTALS**

- 28 A. Product Data: For each type of product.
- 29 B. Manufacturer's Written Certification:
 - 30 1. Product contains no asbestos, fiberglass or other man-made mineral fibers.
 - 31 2. Recycled Content: Minimum fiber recycled content shall no less than 75%.
 - 32 3. Materials shall not contain any added Urea-Formaldehyde Resins.

33 **1.4 INFORMATIONAL SUBMITTALS**

- 34 A. Qualification Data: For Installer.
- 35 B. Product Test Reports: For each product, for tests performed by a qualified testing agency.

36 **1.5 QUALITY ASSURANCE**

- 37 A. Manufacturer shall have a current Underwriters Laboratories (UL) Code Evaluation Report.
- 38 B. Manufacturer shall be in compliance with the 2009 and 2012 International Building Code.
- 39 C. Manufacturer shall subscribe to independent laboratory follow-up inspection services of Underwriters
- 40 Laboratories and Factory Mutual. Each bag shall be labeled accordingly.
- 41 D. Applicator: Licensed by manufacturer.

42 **1.6 DELIVERY, STORAGE AND HANDLING**

- 43 A. Deliver in original, unopened containers bearing name of manufacturer, product identification and reference
- 44 to U.L. testing.
- 45 B. Store materials dry, off ground, and under cover.
- 46 C. Protect liquid adhesive from freezing.
- 47 D. Water to be potable.

1 **PART 2 - PRODUCTS**

2 **2.1 SPRAY-ON SYSTEM**

- 3 A. Performance:
- 4 1. Bond strength shall be greater than 100 psf per ASTM E 736.
 - 5 2. Product shall be Class 1 Class A per ASTM E 84/ UL 723.
 - 6 3. Non-corrosive per ASTM C 739.
 - 7 4. Bond Deflection per ASTM E 759: 6" Deflection in 10' Span – No Spalling or Delamination.
 - 8 5. R-Value shall be 3.75 per inch per ASTM C518.
 - 9 6. Comply with IBC 803.3/2009 IBC 803.10 stability requirements for interior finishes.
 - 10 7. Meet ASTM C 1149.
- 11 B. Basis-of-Design Product: Subject to compliance with requirements, provide International Cellulose Corporation - K-13 Spray-On-Systems or comparable product by one of the following:
- 12 1. Applegate Insulation.
- 13 C. Material:
- 14 1. Color shall be from Manufacturer's standard color chart.
 - 15 2. Comply with local Building Code requirements.
 - 16 3. Material shall have been tested in accordance with ASTM E 1042. Testing laboratory shall be NVLAP
 - 17 accredited.
 - 18

19 **2.2 MISCELLANEOUS MATERIALS**

- 20 A. Primer: Material recommended by insulation manufacturer where required for adhesion of insulation to
- 21 substrates.

22 **PART 3 - EXECUTION**

23 **3.1 EXAMINATION**

- 24 A. Examine surfaces and report unsatisfactory conditions in writing. Do not proceed until unsatisfactory
- 25 conditions are corrected.
- 26 B. Verify surfaces to receive spray insulation to determine if priming/sealing is required to insure bonding and/or
- 27 to prevent discoloration caused by migratory stains.

28 **3.2 PREPARATION**

- 29 A. Clips, hangers, supports, sleeves and other attachments to spray bases are to be placed by other trades
- 30 prior to the application of sprayed insulation.
- 31 B. Ducts, piping, conduit or other suspended equipment shall not be positioned until after the application of
- 32 sprayed insulation.
- 33 C. Provide masking, drop cloths or other satisfactory coverings for materials/surfaces that are not to receive
- 34 insulation to protect from over-spray.
- 35 D. Coordinate installation of the sprayed cellulose fiber with work of other trades.
- 36 E. Prime surfaces as required by manufacturer's instructions or as determined by examination.

37 **3.3 INSTALLATION**

- 38 A. Install spray applied insulation to achieve an average NRC as indicated on the Material Tag Index.
- 39 B. Cure insulation with continuous natural or mechanical ventilation.
- 40 C. Remove and dispose of over-spray.

41 **3.4 PROTECTION**

- 42 A. Protect installed insulation from damage due to harmful weather exposures, physical abuse, and other
- 43 causes.

44 **END OF SECTION**

PART 1 - GENERAL

22

1.1 SECTION INCLUDES

23

- A. Commercial Exterior Insulation and Finish System with an Air and Water-Resistive Barrier Coating and a Means of Positive Moisture Drainage.

24

25

1.2 RELATED SECTIONS

26

- A. Section 03 30 00 - Cast-in-Place Concrete.

27

1.3 PERFORMANCE REQUIREMENTS

28

- A. Exterior Insulation and Finish System (EIFS):

29

1. Air/Water-Resistive Barrier Coating - System Construction:

30

a. Tensile Bond ASTM C 297/E 2134: Minimum 104 kPa (15 psi).

31

b. Freeze-thaw ASTM E 2485: No deleterious effects after 10 cycles.

32

c. Water Resistance ASTM D 2247: No deleterious effects after 14 days exposure.

33

d. Water Vapor Transmission ASTM E 96 Proc. B: Vapor Permeable.

34

e. Air Leakage ASTM E 283: 0.6 l/min/m² (0.002 cfm/sqft).

35

f. Air Permeance ASTM E 2178: 0.0006 l/s/m² @ 75Pa

36

g. (1.2x10⁻⁴ cfm/ft² @ 1.6 psf) (Backstop NT)

37

h. Air Barrier Assembly ASTM E 2357: 0.05 l/sec m² @300 Pa

38

i. (<0.001 cfm/ft² @ 6.24 psf) (Backstop NT)

39

j. Structural Performance ASTM E 1233 Proc. A: Minimum 10 positive cycles at

40

1/240 deflection; No cracking in field, at joints or interface with flashing.

41

k. Racking ASTM E 72: No cracking in field, at joints or interface with flashing at net

42

deflection of 3.2 mm (1/8 inch).

43

l. Restrained Environmental: 5 cycles; No cracking in field, at joints or interface with

44

flashing.

45

m. Water Penetration ASTM E 331: No water penetration beyond the inner-most plane

46

of the wall after 15 minutes at 137 Pa (2.86 psf).

47

n. UV Exposure ASTM D 2898: 210 hours of exposure.

48

o. Accelerated Aging: 25 cycles of drying and soaking.

49

p. Hydrostatic Pressure Test AATCC 127: 21.6 inch water column for 5 hours.

50

q. Surface Burning Characteristics ASTM E 84: Flame Spread - Less Than 25;

51

Smoke Developed - Less than 450.

2. Durability - System Construction:
- a. Abrasion Resistance ASTM D 968: No deleterious effects after 1000 liters (1056 quarts).
 - b. Accelerated Weathering ASTM G155 Cycle 1: No deleterious effects after 5000 hours.
 - c. Accelerated Weathering ASTM G 154 Cycle 1 (QUV): No deleterious effects after 5000 hours.
 - d. Freeze-Thaw ASTM E 2485: No deleterious effects after 90 cycles.
 - e. Mildew Resistance ASTM D 3273: No growth during 60 day exposure period.
 - f. Water Resistance ASTM D 2247: No deleterious effects after 42 days exposure.
 - g. Taber Abrasion ASTM D 4060: Passed 1000 cycles.
 - h. Salt Spray Resistance ASTM B 117: No deleterious effects after 1000 hours exposure.
 - i. Water Penetration ASTM E 331: Passed 15 minutes at 137 Pa (2.86 psf).
 - j. Water Vapor Transmission ASTM E 96 Proc. B.
 - 1) EPS: 5 Perm-inch.
 - 2) Base Coat: 40 Perms.
 - 3) Finish: 40 Perms.
 - k. Drainage Efficiency ASTM E 2273: Minimum Drainage Efficiency of 90 percent.
3. Structural
- a. Tensile Bond ASTM C 297/E 2134: Minimum 104 kPa (15 psi) - substrate or insulation failure.
 - b. Transverse Wind Load ASTM E 330: Withstand positive and negative wind loads as specified by the building code. Minimum 4.3 kPa (90 psf) 16 inch o.c. framing, 1/2 inch sheathing screw attached at 203 mm (8 inch) o.c. (For higher wind loads contact Dryvit Systems, Inc.)
4. Impact Resistance: In accordance with ASTM E 2486 (formerly EIMA Standard 101.86):
- a. Standard - 146 g/m²(4.3 oz/yd²), Minimum Tensile Strength 27 g/cm (150 lbs/in). EIMA Impact Classification - Standard. EIMA Impact Range 3-6 Joules (25-49 in-lbs).
 - b. Standard Plus - 203 g/m²(6 oz/yd²), Minimum Tensile Strength 36 g/cm (200 lbs/in). EIMA Impact Classification - Medium. EIMA Impact Range 6-10 Joules (50-89 in-lbs).
 - c. Intermediate - 407 g/m²(12 oz/yd²), Minimum Tensile Strength 54 g/cm (300 lbs/in). EIMA Impact Classification - High. 10-17 Joules (90-150 in-lbs).
 - d. Panzer 15 - 509 g/m²(15 oz/yd²), Minimum Tensile Strength 71 g/cm (400 lbs/in). EIMA Impact Classification - Ultra High. >17 Joules (>150 in-lbs). Used in conjunction with standard mesh.
 - e. Panzer 20 - 695 g/m²(20.5 oz/yd²), Minimum Tensile Strength 98 g/cm (550 lbs/in). EIMA Impact Classification - Ultra High. >17 Joules (>150 in-lbs). Used in conjunction with standard mesh.
 - f. Detail Short Rolls - 146 g/m²(4.3 oz/yd²), Minimum Tensile Strength 27 g/cm (150 lbs/in).
 - g. Corner Mesh - 244 g/m²(7.2 oz/yd²), Minimum Tensile Strength 49 g/cm (274 lbs/in).
5. Fire Performance:
- a. Fire Resistance (ASTM E 119): Passed 1 hour.
 - b. Ignitability (NFPA 268): No ignition at 12.5 kw/m² at 20 minutes.
 - c. Intermediate Multi-Story Fire Test (NFPA 285):
 - 1) Resist flame propagation over the exterior surface.
 - 2) Resist vertical spread of flame within combustible core/component of panel from one story to the next.
 - 3) Resist vertical spread of flame over the interior surface from one story to the next.
 - 4) Resist lateral spread of flame from the compartment of fire origin to adjacent spaces.
 - d. Full Scale Multi-Story with Dryvit FM products (corner test) ASTM E 84. Flame Spread - Less Than 25; Smoke Developed - Less than 450.

1 **1.4 SUBMITTALS**

- 2 A. Submit under provisions of Section 01 30 00 - Administrative Requirements.
3 B. Product Data: Manufacturer's data sheets on each product to be used, including:
4 1. Preparation instructions and recommendations.
5 2. Storage and handling requirements and recommendations.
6 3. Installation methods.
7 C. Shop Drawings: Submit Manufacturer's drawings detailing the approved methods for flashing and
8 waterproofing all conditions applicable to the work listed in this section.
9 D. Selection Samples: For each finish product specified, two complete sets of color chips
10 representing manufacturer's full range of available colors and patterns.
11 E. Manufacturer's Certificates: Certify products meet or exceed specified requirements.
12 F. Closeout Submittals: Provide manufacturer's moisture drainage and limited materials warranty
13 against defective material.

14 **1.5 QUALITY ASSURANCE**

- 15 A. Manufacturer Qualifications: Provide all products specified in this section by a single
16 manufacturer with a minimum of ten years experience.
17 B. Installer Qualifications: Install all products listed in this section by a single installer with a
18 minimum of five years demonstrated experience in installing products of the same type and scope
19 as specified.

20 **1.6 DELIVERY, STORAGE, AND HANDLING**

- 21 A. Store products in manufacturer's unopened packaging until ready for installation.
22 B. Store and dispose of hazardous materials in accordance with requirements of local authorities
23 having jurisdiction.

24 **1.7 PROJECT CONDITIONS**

- 25 A. Maintain environmental conditions (temperature, humidity, and ventilation) within limits
26 recommended by manufacturer for optimum results. Do not install products under environmental
27 conditions outside manufacturer's absolute limits.

28 **PART 2 - PRODUCTS**

29 **2.1 MANUFACTURERS**

- 30 A. Acceptable Manufacturers:
31 1. Dryvit Systems, Inc.
32 2. Finestone BASF Wall Systems
33 3. Parex
34 4. Requests for substitutions will be considered in accordance with provisions of Section
35 01 60 00 - Product Requirements.

36 **2.2 EXTERIOR INSULATION AND FINISH SYSTEM**

- 37 A. Basis of Design: Dryvit Outsulation MD System Exterior Insulation and Finish System (EIFS),
38 Class PB, in accordance with Dryvit Systems Inc. Provide the system complete including a water-
39 resistive barrier coating (air/water-resistive barrier), an adhesive, grooved expanded polystyrene
40 insulation board, internal vinyl tracks (Dryvit Track and Vent Track), Dryvit Vent Assembly, Dryvit
41 Starter Strip, base coat, reinforcing mesh and finish.
42 1. Methods of Installation:
43 a. Field Applied: Applied to the substrate system in place.
44 2. Design Requirements:
45 a. Deflection of the substrate systems shall not exceed 1/240 times the span.
46 b. Substrate shall be flat within 6.4 mm (1/4 inches) in a 1.2 m (4 foot) radius.
47 c. Slope of inclined surfaces shall not be less than 6:12, and the length shall not
48 exceed 305 mm (12 inches).
49 d. Expansion Joints: Provide expansion joints where indicated on the Drawings. As a
50 minimum, expansion joints shall be placed at the following locations:
51 1) Where expansion joints occur in the substrate system.
52 2) Where building expansion joints occur.
53 3) Where the EIFS System abuts dissimilar materials.

- 1 e. Terminations:
2 1) Prior to applying EIFS System, treat wall openings with flashing Tape.
3 2) EIFS System shall be held back from adjoining materials around openings
4 and penetrations such as windows, doors, and mechanical equipment a
5 minimum of 19 mm (3/4 inch) for sealant application.
6 3) Terminate the system to a minimum of 203 mm (8 inches) above finished
7 grade.
8 4) Sealants: Sealants shall be compatible with the EIFS System materials.
9 f. Vapor Retarders: Provide vapor retarders within a wall assembly as indicated on
10 the Drawings and in conformance with local building code requirements.
11 g. Flashing: Provide at all roof-wall intersections, windows, doors, chimneys, decks,
12 balconies and other areas as necessary to prevent water from entering behind the
13 EIFS System.

14 **2.3 FINISH COAT**

- 15 A. Standard DPR (Dirt Pickup Resistance) Finish: 100 percent acrylic-based coating offered in
16 standard and custom colors. The finishing touch that adds lasting color and texture to exterior and
17 interior walls.
18 1. Color: To be selected by the Architect from Manufacturer's available color choices.
19 2. Texture: Sandpebble Fine DPR.
20 3. Performance:
21 a. Water Vapor Transmission: ASTM E 96 - Permeable to water vapor.
22 b. Water Resistance: ASTM D 2247 - 42 day exposure; No deleterious effects.
23 c. Salt Spray Resistance: ASTM B 117 - 1000 hours; No deleterious effects.
24 d. Accelerated Weathering: ASTM G 155 - 5000 hours; No deleterious effects.
25 e. Mildew Resistance: ASTM D 3273 - 60 Days, no growth.
26 f. Flame Spread: ASTM E 84 - Less than 25, Class I.

27 **PART 3 - EXECUTION**

28 **3.1 EXAMINATION**

- 29 A. Do not begin installation until substrates have been properly prepared.
30 B. Verify that the substrate is:
31 1. Acceptable for use in conjunction with the work listed in this section.
32 2. Flat within 6.4 mm (1/4 inch) in a 1.2 m (4 foot) radius.
33 3. Sound and dry with tight connections, no surface voids, projections, or other conditions
34 that may interfere with the EIFS System installation or performance.
35 C. Install all flashings and other waterproofing details prior to commencing work.
36 1. Inspect metal roof flashing for installation in accordance with Asphalt Roofing
37 Manufacturers Association (ARMA) Standards.
38 2. Flash openings in accordance with the Contract Drawings or as otherwise necessary to
39 prevent water penetration.
40 3. Flash all chimneys, balconies and decks and other adjacent work.
41 4. Install all windows, doors and other surface penetrations in accordance with
42 manufacturer's requirements and the Contract Drawings.
43 D. If substrate preparation is the responsibility of another installer, notify Architect of unsatisfactory
44 preparation before proceeding.

45 **3.2 PREPARATION**

- 46 A. Protect adjoining work and property during installation
47 B. Remove foreign materials from all substrates, such as oil, dust, dirt, form-release agents,
48 efflorescence, paint, wax, water repellants, moisture, frost, and any other condition that may
49 inhibit adhesion.

50 **3.3 INSTALLATION**

- 51 A. Install in accordance with manufacturer's instructions as follows.
52 B. Apply base coat sufficiently to fully embed the mesh. The recommended method is to apply the
53 base coat in two passes.
54 C. Coat EIFS System surfaces in contact with textured finishes or base coat surfaces with Demandit
55 or Color Prime.

- 1 D. Install high impact meshes as specified at ground level, high traffic areas and other areas
2 exposed to or susceptible to impact damage.
3 E. Protect EIFS System materials from inclement weather and other sources of damage until
4 completely dry.
- 5 **3.4 CLEANING**
6 A. Remove all excess materials shall be removed from the job site in accordance with contract
7 provisions and as required by applicable law.
8 B. Clean debris and foreign substances resulting from the contractor's work from all surrounding
9 areas.
- 10 **3.5 PROTECTION**
11 A. Protect installed products until completion of project.
12 B. Touch-up, repair or replace damaged products before Substantial Completion.

13 **END OF SECTION**

23 **PART 1 - GENERAL**

24 **1.1 RELATED DOCUMENTS**

- 25 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 26 Division 01 Specification Sections, apply to this Section.

27 **1.2 SUMMARY**

- 28 A. Section Includes:
- 29 1. Self-adhering, vapor-permeable, nonbituminous sheet air barriers.
- 30 B. Related Requirements:
- 31 1. Section 06 16 00 "Sheathing" for wall sheathings and wall sheathing joint-and-penetration treatments.
- 32 2. Section 07 42 13.16 "Metal Plate Wall Panels" for the weather barrier envelope system.

33 **1.3 DEFINITIONS**

- 34 A. Air-Barrier Material: A primary element that provides a continuous barrier to the movement of air.
- 35 B. Air-Barrier Accessory: A transitional component of the air barrier that provides continuity.
- 36 C. Air-Barrier Assembly: The collection of air-barrier materials and accessories applied to an opaque wall,
- 37 including joints and junctions to abutting construction, to control air movement through the wall.

38 **1.4 PREINSTALLATION MEETINGS**

- 39 A. Preinstallation Conference: Conduct conference at Project site.
- 40 1. Review air-barrier requirements and installation, special details, mockups, air-leakage and bond
- 41 testing, air-barrier protection, and work scheduling that covers air barriers.

42 **1.5 ACTION SUBMITTALS**

- 43 A. Product Data: For each type of product.
- 44 1. Include manufacturer's written instructions for evaluating, preparing, and treating each substrate;
- 45 technical data; and tested physical and performance properties of products.
- 46 B. Shop Drawings: For air-barrier assemblies.
- 47 1. Show locations and extent of air-barrier materials, accessories, and assemblies specific to Project
- 48 conditions.
- 49 2. Include details for substrate joints and cracks, counterflashing strips, penetrations, inside and outside
- 50 corners, terminations, and tie-ins with adjoining construction.
- 51 3. Include details of interfaces with other materials that form part of air barrier.
- 52 C. Sustainable Design Submittals:

ISSUED FOR FINAL BID

JUDGE DOYLE SQUARE - BLOCK 88 PARKING GARAGE

CONTRACT # 7952 MUNIS # 11471

072715 - 1

BITUMINOUS SELF-ADHERING SHEET AIR
BARRIERS

- 1 1. Product Certificates: For regional materials, indicating location of material manufacturer and point of
2 extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each
3 regional material.
- 4 **1.6 INFORMATIONAL SUBMITTALS**
- 5 A. Qualification Data: For Installer.
- 6 B. Product Certificates: From air-barrier manufacturer, certifying compatibility of air barriers and accessory
7 materials with Project materials that connect to or that come in contact with air barrier.
- 8 C. Product Test Reports: For each air-barrier assembly, for tests performed by a qualified testing agency.
- 9 1. Submit documentation from an approved independent testing laboratory certifying compliance with a)
10 the air leakage rates of the air barrier membrane assembly, including primary membrane, primer and
11 sealants have been tested to meet ASTM E2357, b) ICC-AC 38, c) Peel adhesion to unprimed
12 plywood and cyclic and elongation per ICC-AC 48, d) Class A flame spread index and smoke
13 development per ASTM E-84.
- 14 2. Submit documentation from an approved independent testing laboratory certifying the air leakage and
15 vapor permeance rates of the air barrier membrane, including primary membrane and transition
16 sheets, exceed the requirements of the Massachusetts Energy Code and in accordance with ASTM
17 E2178.
- 18 a. Test report submittals shall include test results of sustained wind loads and gust load air
19 leakage results.
- 20 D. Field quality-control reports.
- 21 **1.7 QUALITY ASSURANCE**
- 22 A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by
23 manufacturer.
- 24 **1.8 DELIVERY, STORAGE, AND HANDLING**
- 25 A. Remove and replace liquid materials that cannot be applied within their stated shelf life.
- 26 B. Protect stored materials from direct sunlight.
- 27 **1.9 FIELD CONDITIONS**
- 28 A. Environmental Limitations: Apply air barrier within the range of ambient and substrate temperatures
29 recommended in writing by air-barrier manufacturer.
- 30 1. Protect substrates from environmental conditions that affect air-barrier performance.
- 31 2. Do not apply air barrier to a damp or wet substrate or during snow, rain, fog, or mist.
- 32 **1.10 WARRANTY**
- 33 A. Provide manufacturer's published 12-year material warranty for air barrier membrane materials, sealant and
34 flashing membrane.

35 **PART 2 - PRODUCTS**

36 **2.1 MATERIALS**

- 37 A. Source Limitations: Obtain primary air-barrier materials and air-barrier accessories from single source from
38 single manufacturer.

39 **2.2 PERFORMANCE REQUIREMENTS**

- 40 A. Air-Barrier Performance: Air-barrier assembly and seals with adjacent construction shall be capable of
41 performing as a continuous air barrier and as a liquid-water drainage plane flashed to discharge to the
42 exterior incidental condensation or water penetration. Air-barrier assemblies shall be capable of
43 accommodating substrate movement and of sealing substrate expansion and control joints, construction
44 material changes, penetrations, and transitions at perimeter conditions without deterioration and air leakage
45 exceeding specified limits.
- 46

- 1 **2.3 NONBITUMINOUS SHEET AIR BARRIER (AB-2)**
2 A. Basis-of-Design Product: Subject to compliance with requirements, provide BlueskinVP 160 manufactured
3 by Henry. or comparable product by one of the following:
4 1. Tremco, Inc., ExoAir 111.
5 2. Carlisle Coatings & Waterproofing Inc.
6 3. Cosella-Dörken Products, Inc.
7 4. GCP Applied Technologies Inc. (formerly Grace Construction Products).
8 5. VaproShield LLC.
9 B. Nominal 23-mil- (0.58 mm-) thick, self-adhering sheet consisting of a breathable carrier film or fabric and an
10 adhesive with release liner on adhesive side and formulated for application with primer that complies with
11 VOC limits
12 C. Physical and Performance Properties:
13 1. Air leakage: <0.004 CFM/ft² @ 1.57 lbs/ft² when tested in accordance with ASTM E2178,
14 2. Water Vapor Permeance: 29 perms to ASTM E96, Method B,
15 3. Tested to ASTM E2357 for Air Leakage of Air Barrier Assemblies,
16 4. Resistance to Water Penetration: Pass ICC-ES AC 38
17 5. Water Penetration Resistance around Nails: Pass when tested to AAMA 711-05 & ASTM D 1970
18 modified,
19 6. Surface Burning Characteristics: Class A, when tested in accordance with ASTM E84: Flame Spread
20 Rating of 0 and Smoke Development Classification of 105,
21 7. Basis Weight: Minimum 160 gm/m², when tested in accordance with TAPPI Test Method T-410,
22 8. Tensile Strength: 40 lbF MD and 29 lbF CD per ASTM D828,
23 9. Average Dry Breaking Force: 127 lbF MD, and 91 lbF CD per ASTM D 5034,
24 10. Cyclic and Elongation: Pass at 100 cycles, -29 degrees C (-20 degrees F) per ICC-ES AC 48

25 **2.4 ACCESSORY MATERIALS**

- 26 A. Requirement: Provide primers, transition strips, termination strips, joint sealants, counterflashing strips,
27 flashing sheets and metal termination bars, termination mastic, substrate patching materials, adhesives,
28 tapes, foam sealants, lap sealants, and other accessory materials that are recommended in writing by air-
29 barrier manufacturer to produce a complete air-barrier assembly and that are compatible with primary air-
30 barrier material and adjacent construction to which they may seal.
31 B. Self-adhering membrane for window sill pan flashings shall be Blueskin® SA, LT, or HT manufactured by
32 Henry; an SBS modified bitumen, self-adhering sheet membrane which is integrally laminated to a blue
33 polyethylene film. Membrane shall have the following physical properties:
34 C. Self-adhering membrane for all window jams, headers, door openings, inside and outside corners, and
35 other transitions shall be pre-cut BlueskinVP™ 160 manufactured by Henry; a self-adhering sheet air barrier
36 membrane with an engineered film specifically designed to be water resistant and vapor permeable.
37 Membrane shall have the following physical properties:
38 D. Low VOC adhesive primer for primary self-adhering water resistive air barrier membrane, self-adhering
39 transition membrane and SBS modified bitumen membranes at all temperatures shall be Blueskin® LVC
40 Adhesive as supplied by Henry; a low V.O.C. quick setting rubber based adhesive. Adhesive Primer shall
41 have the following physical properties:
42 E. Termination Sealant shall be HE925 BES Sealant manufactured by Henry; a moisture cure, medium
43 modulus polymer modified sealing compound having the following physical properties:
44 1. Compatible with sheet air barrier, roofing and waterproofing membranes and substrate,
45 2. Seals construction joints up to 1 inch wide,

46 **PART 3 - EXECUTION**

47 **3.1 EXAMINATION**

- 48 A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements and
49 other conditions affecting performance of the Work.
50 1. Verify that substrates are sound and free of oil, grease, dirt, excess mortar, or other contaminants.
51 2. Verify that substrates have cured and aged for minimum time recommended in writing by air-barrier
52 manufacturer.
53 3. Verify that substrates are visibly dry and free of moisture.
54 B. Proceed with installation only after unsatisfactory conditions have been corrected.

1 **3.2 SURFACE PREPARATION**

- 2 A. Clean, prepare, treat, fill, and seal substrate and joints and cracks in substrate according to manufacturer's
3 written instructions and details. Provide clean, dust-free, and dry substrate for air-barrier application.
4 B. Mask off adjoining surfaces not covered by air barrier to prevent spillage and overspray affecting other
5 construction.
6 C. At changes in substrate plane, apply sealant or termination mastic beads at sharp corners and edges to
7 form a smooth transition from one plane to another.
8 D. Cover gaps in substrate plane and form a smooth transition from one substrate plane to another with
9 stainless-steel sheet mechanically fastened to structural framing to provide continuous support for air barrier.

10 **3.3 INSTALLATION**

- 11 A. Install materials according to air-barrier manufacturer's written instructions and details to form a seal with
12 adjacent construction and ensure continuity of air and water barrier.
13 B. Prepare, treat, and seal inside and outside corners and vertical and horizontal surfaces at terminations and
14 penetrations with termination mastic.
15 C. Apply primer to substrates at required rate and allow it to dry. Limit priming to areas that will be covered by
16 air-barrier sheet on same day. Reprime areas exposed for more than 24 hours.
17 D. Apply and firmly adhere air-barrier sheets over area to receive air barrier. Accurately align sheets and
18 maintain uniform minimum lap widths and end laps. Overlap and seal seams, and stagger end laps to ensure
19 airtight installation.
20 1. Apply sheets in a shingled manner to shed water.
21 2. Roll sheets firmly to enhance adhesion to substrate.
22 E. Apply continuous air-barrier sheets over accessory strips bridging substrate cracks, construction, and
23 contraction joints.
24 F. Seal top of through-wall flashings to air-barrier sheet with an additional 6-inch-wide, transition strip.
25 G. Seal exposed edges of sheet at seams, cuts, penetrations, and terminations not concealed by metal
26 counterflashings or ending in reglets with termination mastic.
27 H. Install air-barrier sheet and accessory materials to form a seal with adjacent construction and to maintain a
28 continuous air barrier.
29 I. At end of each working day, seal top edge of air-barrier material to substrate with termination mastic.
30 J. Apply joint sealants forming part of air-barrier assembly within manufacturer's recommended application
31 temperature ranges. Consult manufacturer when sealant cannot be applied within these temperature ranges.
32 K. Wall Openings: Prime concealed, perimeter frame surfaces of windows, curtain walls, storefronts, and doors.
33 Apply transition strip so that a minimum of 3 inches of coverage is achieved over each substrate. Maintain
34 3 inches of contact over firm bearing to perimeter frames, with not less than 1 inch of full contact.
35 1. Transition Strip: Roll firmly to enhance adhesion.
36 2. Preformed Silicone Extrusion: Set in full bed of silicone sealant applied to walls, frame, and air-barrier
37 material.
38 L. Fill gaps in perimeter frame surfaces of windows, curtain walls, storefronts, doors, and miscellaneous
39 penetrations of air-barrier material with foam sealant.
40 M. Repair punctures, voids, and deficient lapped seams in air barrier. Slit and flatten fishmouths and blisters.
41 Patch with air-barrier sheet extending 6 inches beyond repaired areas in all directions.

42 **3.4 CLEANING AND PROTECTION**

- 43 A. Protect air-barrier system from damage during application and remainder of construction period, according
44 to manufacturer's written instructions.
45 1. Protect air barrier from exposure to UV light and harmful weather exposure as recommended in writing
46 by manufacturer. If exposed to these conditions for longer than recommended, remove and replace
47 air barrier or install additional, full-thickness, air-barrier application after repairing and preparing the
48 overexposed materials according to air-barrier manufacturer's written instructions.
49 2. Protect air barrier from contact with incompatible materials and sealants not approved by air-barrier
50 manufacturer.
51 B. Clean spills, stains, and soiling from construction that would be exposed in the completed Work, using
52 cleaning agents and procedures recommended in writing by manufacturer of affected construction.

29 PART 1 - GENERAL

30 1.1 RELATED DOCUMENTS

- 31 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 32 Division 01 Specification Sections, apply to this Section.

33 1.2 SUMMARY

- 34 A. Section includes metal plate wall panels.

35 1.3 PREINSTALLATION MEETINGS

- 36 A. Preinstallation Conference: Conduct conference at Project site.
 - 37 1. Meet with Owner, Architect, Owner's insurer if applicable, material panel Installer, plate material
 - 38 panel manufacturer's representative, structural-support Installer, and installers whose work
 - 39 interfaces with or affects plate material panels, including installers of doors, windows, and louvers.
 - 40 2. Review and finalize construction schedule and verify availability of materials, Installer's personnel,
 - 41 equipment, and facilities needed to make progress and avoid delays.
 - 42 3. Review methods and procedures related to plate material panel installation, including manufacturer's
 - 43 written instructions.
 - 44 4. Examine support conditions for compliance with requirements, including alignment between and
 - 45 attachment to structural members.
 - 46 5. Review flashings, special siding details, wall penetrations, openings, and condition of other
 - 47 construction that affect plate material panels.
 - 48 6. Review governing regulations and requirements for insurance, certificates, and tests and inspections
 - 49 if applicable.
 - 50 7. Review temporary protection requirements for plate material panel assembly during and after
 - 51 installation.
 - 52 8. Review procedures for repair of panels damaged after installation.
 - 53 9. Document proceedings, including corrective measures and actions required, and furnish copy of
 - 54 record to each participant.

- 1 **1.4 ACTION SUBMITTALS**
- 2 A. Product Data: For each type of product.
- 3 1. Include construction details, material descriptions, dimensions of individual components and profiles,
4 and finishes for each type of panel and accessory.
- 5 B. Shop Drawings:
- 6 1. Include fabrication and installation layouts of plate material panels; details of edge conditions, joints,
7 panel profiles, corners, anchorages, attachment assembly, trim, flashings, closures, and accessories;
8 and special details.
- 9 2. Accessories: Include details of the flashing, trim and anchorage, at a scale of not less than 1-1/2
10 inches per 12 inches.
- 11 C. Samples for Verification: For each type of exposed finish required, prepared on Samples of size indicated
12 below.
- 13 1. Plate Material Panels: 12 inches long by actual panel width. Include fasteners, closures, and other
14 plate material panel accessories.
- 15 **1.5 INFORMATIONAL SUBMITTALS**
- 16 A. Qualification Data: For Installer.
- 17 B. Product Test Reports: For each product, tests performed by a qualified testing agency.
- 18 C. Sample Warranties: For special warranties.
- 19 **1.6 QUALITY ASSURANCE**
- 20 A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by
21 manufacturer.
- 22 **1.7 DELIVERY, STORAGE, AND HANDLING**
- 23 A. Deliver components, plate material panels, and other manufactured items so as not to be damaged or
24 deformed. Package plate material panels for protection during transportation and handling.
- 25 B. Unload, store, and erect plate material panels in a manner to prevent bending, warping, twisting, and surface
26 damage.
- 27 C. Stack plate material panels horizontally on platforms or pallets, covered with suitable weathertight and
28 ventilated covering. Store plate material panels to ensure dryness, with positive slope for drainage of water.
29 Do not store plate material panels in contact with other materials that might cause staining, denting, or other
30 surface damage.
- 31 D. Retain strippable protective covering on plate material panels during installation.
- 32 **1.8 FIELD CONDITIONS**
- 33 A. Weather Limitations: Proceed with installation only when existing and forecasted weather conditions permit
34 assembly of plate material panels to be performed according to manufacturers' written instructions and
35 warranty requirements.
- 36 **1.9 COORDINATION**
- 37 A. Coordinate plate material panel installation with rain drainage work, flashing, trim, construction of soffits, and
38 other adjoining work to provide a leak proof, secure, and noncorrosive installation.
- 39 **1.10 WARRANTY**
- 40 A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace
41 components of plate material panel systems that fail in materials or workmanship within specified warranty
42 period.
- 43 1. Failures include, but are not limited to, the following:
- 44 a. Structural failures including rupturing, cracking, or puncturing.
- 45 b. Deterioration of metals and other materials beyond normal weathering.
- 46 2. Warranty Period: Two years from date of Substantial Completion.
- 47

- 1 B. Special Warranty on Panel Finishes: Manufacturer's standard form in which manufacturer agrees to repair
2 finish or replace plate material panels that show evidence of deterioration of factory-applied finishes within
3 specified warranty period.
4 1. Exposed Panel Finish: Deterioration includes, but is not limited to, the following:
5 a. Color fading more than 5 Hunter units when tested according to ASTM D 2244.
6 b. Chalking in excess of a No. 8 rating when tested according to ASTM D 4214.
7 c. Cracking, checking, peeling, or failure of paint to adhere to bar metal.
8 2. Finish Warranty Period: 20 years from date of Substantial Completion.

9 **PART 2 - PRODUCTS**

10 **2.1 PERFORMANCE REQUIREMENTS**

- 11 A. Structural Performance: Provide plate material panel systems capable of withstanding the effects of the
12 following loads, based on testing according to ASTM E 330:
13 1. Wind Loads: 25 psf.
14 2. Other Design Loads: As indicated on Drawings.
15 3. Deflection Limits: For wind loads, no greater than 1/180 of the span.
16 B. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes by
17 preventing buckling, opening of joints, overstressing of components, failure of joint sealants, failure of
18 connections, and other detrimental effects. Base calculations on surface temperatures of materials due to
19 both solar heat gain and nighttime-sky heat loss.
20 1. Temperature Change (Range): 120 deg F, ambient; 180 deg F, material surfaces.

21 **2.2 MANUFACTURER**

- 22 A. Basis-of-Design Product: Subject to compliance with requirements, provide AP-2000RS Rainscreen Alumi-
23 num Plate Panels as manufactured by Protean Construction Products, Inc. of Burnsville, MN. Phone:
24 (952)895-4000 Fax: (952)895-1691. www.protean.com or comparable product by one of the following:
25 1. DAMS Incorporated's Rainscreen Plate Panel Systems – CPRS.
26 2. Dri-Design Rainscreen Panel System.
27 3. Firestone Building Products Series 4500.
28 4. SAF M4000 Rainscreen Panel System

29 **2.3 PANEL SYSTEM**

- 30 A. The entire panel system shall be installed in accordance with the details illustrated on the contract drawings.
31 The panel system shall be designed based on the Rainscreen Principal which incorporates open jointing,
32 panel weeps, drainage channels, trim, back ventilation and pressure equalization. The panels shall be
33 positively attached to the building structure or subframe with concealed clips or tabs on the panel edges, as
34 illustrated on the contract drawings.
35 1. Coping and flashing associated with panel system shall be provided as integral to the system.

36 **2.4 PANEL ASSEMBLY**

- 37 A. The basic panel shall consist of custom fabricated solid aluminum plate, fabricated in thicknesses, lengths
38 and widths as illustrated on the contract drawings.
39 B. The panel assembly shall be manufactured from .125 inch (minimum) aluminum plate tension leveled sheets
40 in a smooth texture, confirming to ASTM B209, 3003 alloy, H14 temper.
41 C. All panel corners shall be welded and ground smooth prior to application of finish unless noted otherwise.
42 D. Extruded aluminum stiffeners shall be pre-attached to the panel assembly as required by design calculations
43 to insure panel flatness and conformance with design loads. The attachment shall be made with VHB tapes
44 and structural silicone sealant to accommodate expansion and contraction of the aluminum sheet.

45 **2.5 ALUMINUM FINISHES**

- 46 A. High-Performance Organic Finish: Three-coat fluoropolymer finish complying with AAMA 2605 and
47 containing not less than 70 percent PVDF or FEVE resin by weight in both color coat and clear topcoat.
48 Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin
49 manufacturers' written instructions.
50 1. Color and Gloss: to match PPG Duranar Sunstorm Pewter.

51 **2.6 ACCESSORIES**

- 52 A. Fasteners

- 1 1. All panels shall be positively attached to the structure through the use of concealed fasteners
2 contained within the side joint of the assembly.
3 2. No exposed fasteners will be accepted, unless noted otherwise.
4 3. Fastener types and sizes shall be engineered to resist design loads and to be 304 stainless steel
5 unless noted otherwise.
6 B. Extrusions
7 1. All extrusions noted in the contract documents as part of this section shall be fabricated as detailed.
8 Extruded components shall include but are not necessarily limited to; panel stiffeners, extruded trim,
9 and panel edge assembly.
10 2. Where exposed to view, extrusions shall be finished to match the exterior skin.
11 3. The alloy of the extrusions should be determined by its intended use. Such factors as corrosion
12 resistance, machinability, formability, strength and weldability should be considered. The alloy should
13 be listed on the product standard die drawing.
14 C. Flashings / Drainage Channels
15 1. Flashings and drainage channels noted in the contract documents as part of this section shall be
16 fabricated as detailed from materials matching the specifications for the face materials and finished
17 to match unless noted otherwise. The reverse side of all flashings shall be mill finished.
18 2. Flashings and extruded trim will be fabricated in 10'-0" or 12'- 0" lengths unless otherwise noted. All
19 inside and outside corner intersections shall be field mitered from standard flashing or extrusion
20 lengths.
21 D. Sealants
22 1. Sealants shall be in accordance with the latest ASTM standards and shall comply with the sealant
23 specifications of the contract documents. Apply sealants in compliance with ASTM standards and
24 sealant manufacturer's recommendations.
25 E. Subgirts & Clips
26 1. Subgirts and clips shall be furnished as part of the scope of this work as noted on the contract
27 drawings and as required to provide a complete wall panel assembly. They shall be designed by the
28 panel manufacturer to withstand the specified loads and shall typically be fabricated from mill
29 finished, G90 galvanized steel, unless otherwise noted. Isolator shims shall be provided to separate
30 dissimilar materials.

31 **2.7 THE PANEL ASSEMBLY**

- 32 A. Panel system shall be designed on the Rainscreen Principal to accommodate all local building code
33 requirements unless noted otherwise for thermal movement, vibration, load deflection, weep drainage,
34 ventilation, air and water tightness and attachment requirements.

35 **2.8 DIMENSIONAL AND FLATNESS CRITERIA**

- 36 A. Panels shall have a flatness criteria not to exceed 0.1875" in 24" in any direction. Using a straight edge, no
37 point shall be more than 0.1875" away from the straight edge between two points of contact.
38 B. Normal dimensional tolerances shall be as follows:
39 1. Length & Width:
40 a. +/- 0.032" up to 48"
41 b. +/- 0.064" over 48"
42 2. Diagonal: +/- 0.1875"
43 a. Color Anodic Finish: AAMA 611, [AA-M12C22A42/A44, Class I, 0.018 mm][AA-
44 M12C22A32/A34, Class II, 0.010 mm] or thicker.
45

1 **PART 3 - EXECUTION**

2 **3.1 EXAMINATION**

- 3 A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for
4 installation tolerances, plate material panel supports, and other conditions affecting performance of the
5 Work.
6 1. Examine wall framing to verify that girts, angles, channels, studs, and other structural panel support
7 members and anchorage have been installed within alignment tolerances required by plate material
8 wall panel manufacturer.
9 2. Examine wall sheathing to verify that sheathing joints are supported by framing or blocking and that
10 installation is within flatness tolerances required by plate material wall panel manufacturer.
11 a. Verify that air- or water-resistive barriers have been installed over sheathing or backing
12 substrate to prevent air infiltration or water penetration.
13 B. Examine roughing-in for components and assemblies penetrating plate material panels to verify actual
14 locations of penetrations relative to seam locations of plate material panels before installation.
15 C. Proceed with installation only after unsatisfactory conditions have been corrected.

16 **3.2 PREPARATION**

- 17 A. Miscellaneous Supports: Install subframing, furring, and other miscellaneous panel support members and
18 anchorages according to ASTM C 754 and plate material panel manufacturer's written recommendations.

19 **3.3 PLATE MATERIAL PANEL INSTALLATION**

- 20 A. General: Install plate material panels according to manufacturer's written instructions in orientation, sizes,
21 and locations indicated on Drawings. Install panels perpendicular to supports unless otherwise indicated.
22 Anchor plate material panels and other components of the Work securely in place, with provisions for thermal
23 and structural movement.
24 1. Shim or otherwise plumb substrates receiving plate material panels.
25 2. Flash and seal plate material panels at perimeter of all openings. Fasten with self-tapping screws.
26 Do not begin installation until air- or water-resistive barriers and flashings that will be concealed by
27 plate material panels are installed.
28 3. Install screw fasteners in predrilled holes.
29 4. Locate and space fastenings in uniform vertical and horizontal alignment.
30 5. Install flashing and trim as plate material panel work proceeds.
31 6. Locate panel splices over, but not attached to, structural supports. Stagger panel splices and end
32 laps to avoid a four-panel lap splice condition.
33 7. Align bottoms of plate material panels and fasten with blind rivets, bolts, or self-tapping screws.
34 Fasten flashings and trim around openings and similar elements with self-tapping screws.
35 B. Fasteners:
36 1. Aluminum Panels: Use aluminum or stainless-steel fasteners for surfaces exposed to the exterior;
37 use aluminum or galvanized-steel fasteners for surfaces exposed to the interior.
38 C. Metal Protection: Where dissimilar metals contact each other or corrosive substrates, protect against
39 galvanic action as recommended in writing by plate material panel manufacturer.
40 D. Attachment Assembly, General: Install attachment assembly required to support plate material wall panels
41 and to provide a complete weathertight wall system, including subgirts, perimeter extrusions, tracks,
42 drainage channels, panel clips, and anchor channels.
43 1. Include attachment to supports, panel-to-panel joinery, panel-to-dissimilar-material joinery, and
44 panel-system joint seals.
45 2. Wet Seal Systems: Seal horizontal and vertical joints between adjacent plate material wall panels
46 with sealant backing and sealant. Install sealant backing and sealant according to requirements
47 specified in Section 07 92 00 "Joint Sealants."
48 3. Dry Seal Systems: Seal horizontal and vertical joints between adjacent plate material wall panels
49 with manufacturer's standard gasket system.
50 E. Subgirt-and-Spline Installation: Install support assembly at locations, spacings, and with fasteners
51 recommended by manufacturer. Use manufacturer's standard subgirts and splines that provide support and
52 complete secondary drainage assembly, draining to the exterior at horizontal joints. Attach plate material
53 wall panels by interlocking perimeter extrusions attached to panels with subgirts and splines. Fully engage
54 integral subgirt-and-spline gaskets and leave horizontal and vertical joints with open reveal. Terminate edge
55 of panels flush with perimeter extrusions.
56 1. Install wall panels to allow individual panels to "free float" and be installed and removed without
57 disturbing adjacent panels.
58 F. Accessory Installation: Install accessories with positive anchorage to building and weathertight mounting,
59 and provide for thermal expansion. Coordinate installation with flashings and other components.

- 1 1. Install components required for a complete plate material panel assembly including trim, copings,
2 corners, seam covers, flashings, sealants, gaskets, fillers, closure strips, and similar items. Provide
3 types indicated by plate material panel manufacturer; or, if not indicated, provide types recommended
4 in writing by plate material panel manufacturer.
- 5 G. Flashing and Trim: Comply with performance requirements, manufacturer's written installation instructions,
6 and SMACNA's "Architectural Sheet Metal Manual." Provide concealed fasteners where possible, and set
7 units true to line and level as indicated. Install work with laps, joints, and seams that are permanently
8 watertight.
- 9 1. Install exposed flashing and trim that is without buckling and tool marks and that is true to line and
10 levels indicated, with exposed edges folded back to form hems. Install sheet metal flashing and trim
11 to fit substrates and to result in waterproof performance.
- 12 2. Expansion Provisions: Provide for thermal expansion of exposed flashing and trim. Space movement
13 joints at a maximum of 10 feet with no joints allowed within 24 inches of corner or intersection. Where
14 lapped expansion provisions cannot be used or would not be sufficiently waterproof, form expansion
15 joints of intermeshing hooked flanges, not less than 1 inch deep, filled with mastic sealant (concealed
16 within joints).

17 **3.4 ERECTION TOLERANCES**

- 18 A. Installation Tolerances: Shim and align plate material wall panel units within installed tolerance of 1/4 inch
19 in 20 feet, non-accumulative, on level, plumb, and location lines as indicated, and within 1/8-inch offset of
20 adjoining faces and of alignment of matching profiles.

21 **3.5 CLEANING AND PROTECTION**

- 22 A. Remove temporary protective coverings and strippable films, if any, as plate material panels are installed,
23 unless otherwise indicated in manufacturer's written installation instructions. On completion of plate material
24 panel installation, clean finished surfaces as recommended by plate material panel manufacturer. Maintain
25 in a clean condition during construction.
- 26 B. After plate material panel installation, clear weep holes and drainage channels of obstructions, dirt, and
27 sealant.
- 28 C. Replace plate material panels that have been damaged or have deteriorated beyond successful repair by
29 finish touchup or similar minor repair procedures.

- 26 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 27 Division 01 Specification Sections, apply to this Section.

28 **1.2 SUMMARY**

- 29 A. Section Includes:
 - 30 1. Formed wall sheet metal flashing fabrications.
- 31 B. Related Work:
 - 32 1. Section 04 22 00 - Concrete Unit Masonry.

33 **1.3 PREINSTALLATION MEETINGS**

- 34 A. Preinstallation Conference: Conduct conference at Project site.

35 **1.4 ACTION SUBMITTALS**

- 36 A. Product Data: For each type of product.
- 37 B. Sustainable Design Submittals:
 - 38 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
 - 39 cost.
- 40 C. Shop Drawings: For sheet metal flashing and trim.
 - 41 1. Include plans, elevations, sections, and attachment details.
 - 42 2. Distinguish between shop- and field-assembled work.
 - 43 3. Include identification of finish for each item.
 - 44 4. Include pattern of seams and details of termination points, expansion joints and expansion-joint
 - 45 covers, direction of expansion, roof-penetration flashing, and connections to adjoining work.
- 46 D. Samples: For each exposed product and for each color and texture specified.

47 **1.5 INFORMATIONAL SUBMITTALS**

- 48 A. Product certificates.
- 49 B. Product test reports.
- 50 C. Sample warranty.

1 **1.6 CLOSEOUT SUBMITTALS**

2 A. Maintenance data.

3 **1.7 QUALITY ASSURANCE**

4 A. Fabricator Qualifications: Employs skilled workers who custom fabricate sheet metal flashing and trim similar
5 to that required for this Project and whose products have a record of successful in-service performance.

6 **1.8 WARRANTY**

7 A. Special Warranty on Finishes: Manufacturer agrees to repair finish or replace sheet metal flashing and trim
8 that shows evidence of deterioration of factory-applied finishes within specified warranty period.

9 1. Finish Warranty Period: 20 years from date of Substantial Completion.

10 **PART 2 - PRODUCTS**

11 **2.1 PERFORMANCE REQUIREMENTS**

12 A. Sheet Metal Standard for Flashing and Trim: Comply with SMACNA's "Architectural Sheet Metal Manual"
13 requirements for dimensions and profiles shown unless more stringent requirements are indicated.

14 B. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less
15 than 25 percent.

16 C. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

17 1. Temperature Change: 120 deg F, ambient; 180 deg F, material surfaces.

18 **2.2 SHEET METALS**

19 A. General: Protect mechanical and other finishes on exposed surfaces from damage by applying strippable,
20 temporary protective film before shipping.

21 B. Stainless-Steel Sheet: ASTM A 240/A 240M or ASTM A 666, Type 304, dead soft, fully annealed; with
22 smooth, flat surface.

23 1. Finish: 2D (dull, cold rolled).

24 **2.3 UNDERLAYMENT MATERIALS**

25 A. Self-Adhering, High-Temperature Sheet: Minimum 30 mils thick, consisting of a slip-resistant polyethylene-
26 or polypropylene-film top surface laminated to a layer of butyl- or SBS-modified asphalt adhesive, with
27 release-paper backing; specifically designed to withstand high metal temperatures beneath metal roofing.
28 Provide primer according to written recommendations of underlayment manufacturer.

29 1. Thermal Stability: ASTM D 1970; stable after testing at 240 deg F or higher.

30 2. Low-Temperature Flexibility: ASTM D 1970; passes after testing at minus 20 deg F or lower.

31 **2.4 MISCELLANEOUS MATERIALS**

32 A. Fasteners: Wood screws, annular threaded nails, self-tapping screws, self-locking rivets and bolts, and other
33 suitable fasteners designed to withstand design loads and recommended by manufacturer of primary sheet
34 metal.

35 1. General: Blind fasteners or self-drilling screws, gasketed, with hex-washer head.

36 a. Exposed Fasteners: Heads matching color of sheet metal using plastic caps or factory-applied
37 coating. Provide metal-backed EPDM or PVC sealing washers under heads of exposed
38 fasteners bearing on weather side of metal.

39 b. Blind Fasteners: High-strength aluminum or stainless-steel rivets suitable for metal being
40 fastened.

41 2. Fasteners for Stainless-Steel Sheet: Series 300 stainless steel.

42 B. Solder:

43 1. For base materials a mixture of tin and lead [with maximum lead content of 0.2 percent.

44 C. Sealant Tape: Pressure-sensitive, 100 percent solids, polyisobutylene compound sealant tape with release-
45 paper backing. Provide permanently elastic, nonsag, nontoxic, nonstaining tape 1/2 inch wide and 1/8 inch
46 thick.

47 D. Elastomeric Sealant: ASTM C 920, elastomeric silicone polymer sealant; of type, grade, class, and use
48 classifications required to seal joints in sheet metal flashing and trim and remain watertight.

49 E. Epoxy Seam Sealer: Two-part, noncorrosive, aluminum seam-cementing compound, recommended by
50 aluminum manufacturer for exterior nonmoving joints, including riveted joints.

51 F. Bituminous Coating: Cold-applied asphalt emulsion according to ASTM D 1187.

1 **2.5 FABRICATION, GENERAL**

- 2 A. General: Custom fabricate sheet metal flashing and trim to comply with details shown and recommendations
3 in cited sheet metal standard that apply to design, dimensions, geometry, metal thickness, and other
4 characteristics of item required. Fabricate sheet metal flashing and trim in shop to greatest extent possible.
5 1. Obtain field measurements for accurate fit before shop fabrication.
6 2. Form sheet metal flashing and trim to fit substrates without excessive oil canning, buckling, and tool
7 marks; true to line, levels, and slopes; and with exposed edges folded back to form hems.
8 3. Conceal fasteners and expansion provisions where possible. Do not use exposed fasteners on faces
9 exposed to view.
10 B. Expansion Provisions: Form metal for thermal expansion of exposed flashing and trim.
11 1. Form expansion joints of intermeshing hooked flanges, not less than 1 inch deep, filled with butyl
12 sealant concealed within joints.
13 2. Use lapped expansion joints only where indicated on Drawings.
14 C. Sealant Joints: Where movable, nonexpansion-type joints are required, form metal to provide for proper
15 installation of elastomeric sealant according to cited sheet metal standard.
16 D. Fabricate cleats and attachment devices from same material as accessory being anchored or from
17 compatible, noncorrosive metal.
18 E. Fabricate cleats and attachment devices of sizes as recommended by cited sheet metal standard for
19 application, but not less than thickness of metal being secured.
20 F. Seams: Fabricate nonmoving seams with flat-lock seams. Tin edges to be seamed, form seams, and solder.

21 **2.6 WALL SHEET METAL FABRICATIONS**

- 22 A. Through-Wall Flashing: Fabricate continuous flashings in minimum 96-inch-long, but not exceeding 12-foot-
23 long, sections, under copings, and at shelf angles. Fabricate discontinuous lintel, sill, and similar flashings
24 to extend 6 inches beyond each side of wall openings; and form with 2-inch-high, end dams. Fabricate from
25 the following materials:
26 1. Stainless Steel: 0.016 inch thick.
27 B. Opening Flashings in Frame Construction: Fabricate head, sill and similar flashings to extend 4 inches
28 beyond wall openings. Form head and sill flashing with 2-inch-high, end dams. Fabricate from the following
29 materials:
30 1. Stainless Steel: 0.016 inch thick.
31 C. Wall Expansion-Joint Cover: Fabricate from the following materials:
32 1. Stainless Steel: 0.019 inch thick.

33 **PART 3 - EXECUTION**

34 **3.1 UNDERLAYMENT INSTALLATION**

- 35 A. Self-Adhering Sheet Underlayment: Install self-adhering sheet underlayment, wrinkle free. Prime substrate
36 if recommended by underlayment manufacturer. Comply with temperature restrictions of underlayment
37 manufacturer for installation; use primer for installing underlayment at low temperatures. Apply in shingle
38 fashion to shed water, with end laps of not less than 6 inches staggered 24 inches between courses. Overlap
39 side edges not less than 3-1/2 inches. Roll laps and edges with roller. Cover underlayment within 14 days.

40 **3.2 INSTALLATION, GENERAL**

- 41 A. General: Anchor sheet metal flashing and trim and other components of the Work securely in place, with
42 provisions for thermal and structural movement. Use fasteners, solder, protective coatings, separators,
43 sealants, and other miscellaneous items as required to complete sheet metal flashing and trim system.
44 1. Install sheet metal flashing and trim true to line, levels, and slopes. Provide uniform, neat seams with
45 minimum exposure of solder, welds, and sealant.
46 2. Install sheet metal flashing and trim to fit substrates and to result in watertight performance. Verify
47 shapes and dimensions of surfaces to be covered before fabricating sheet metal.
48 3. Space cleats not more than 12 inches apart. Attach each cleat with at least two fasteners. Bend tabs
49 over fasteners.
50 4. Install exposed sheet metal flashing and trim with limited oil canning, and free of buckling and tool
51 marks.
52 5. Torch cutting of sheet metal flashing and trim is not permitted.
53 B. Metal Protection: Where dissimilar metals contact each other, or where metal contacts pressure-treated
54 wood or other corrosive substrates, protect against galvanic action or corrosion by painting contact surfaces
55 with bituminous coating or by other permanent separation as recommended by sheet metal manufacturer or
56 cited sheet metal standard.

- 1 1. Coat concealed side of stainless-steel sheet metal flashing and trim with bituminous coating where
- 2 flashing and trim contact wood, ferrous metal, or cementitious construction.
- 3 C. Expansion Provisions: Provide for thermal expansion of exposed flashing and trim. Space movement joints
- 4 at maximum of 10 feet with no joints within 24 inches of corner or intersection.
- 5 1. Form expansion joints of intermeshing hooked flanges, not less than 1 inch deep, filled with sealant
- 6 concealed within joints.
- 7 2. Use lapped expansion joints only where indicated on Drawings.
- 8 D. Fasteners: Use fastener sizes that penetrate wood blocking or sheathing not less than 1-1/4 inches for nails
- 9 and not less than 3/4 inch for wood screws.
- 10 E. Conceal fasteners and expansion provisions where possible in exposed work and locate to minimize
- 11 possibility of leakage. Cover and seal fasteners and anchors as required for a tight installation.
- 12 F. Seal joints as required for watertight construction. Prepare joints and apply sealants to comply with
- 13 requirements in Section 07 92 00 "Joint Sealants."
- 14 G. Soldered Joints: Clean surfaces to be soldered, removing oils and foreign matter. Pre-tin edges of sheets
- 15 with solder to width of 1-1/2 inches; however, reduce pre-tinning where pre-tinned surface would show in
- 16 completed Work.
- 17 1. Do not use torches for soldering.
- 18 2. Heat surfaces to receive solder, and flow solder into joint. Fill joint completely. Completely remove
- 19 flux and spatter from exposed surfaces.
- 20 3. Stainless-Steel Soldering: Tin edges of uncoated sheets, using solder for stainless steel and acid
- 21 flux. Promptly remove acid flux residue from metal after tinning and soldering. Comply with solder
- 22 manufacturer's recommended methods for cleaning and neutralization.

23 **3.3 WALL FLASHING INSTALLATION**

- 24 A. General: Install sheet metal wall flashing to intercept and exclude penetrating moisture according to cited
- 25 sheet metal standard unless otherwise indicated. Coordinate installation of wall flashing with installation of
- 26 wall-opening components such as windows, doors, and louvers.

27 **3.4 CLEANING AND PROTECTION**

- 28 A. Clean exposed metal surfaces of substances that interfere with uniform oxidation and weathering.
- 29 B. Clean and neutralize flux materials. Clean off excess solder.
- 30 C. Clean off excess sealants.
- 31 D. Remove temporary protective coverings and strippable films as sheet metal flashing and trim are installed
- 32 unless otherwise indicated in manufacturer's written installation instructions.

22 **PART 1 - GENERAL**

23 **1.1 RELATED DOCUMENTS**

- 24 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 25 Division 01 Specification Sections, apply to this Section.

26 **1.2 SUMMARY**

- 27 A. Section Includes:
- 28 1. Penetrations in fire-resistance-rated walls.
- 29 2. Penetrations in horizontal assemblies.

30 **1.3 PREINSTALLATION MEETINGS**

- 31 A. Preinstallation Conference: Conduct conference at Project site.

32 **1.4 ACTION SUBMITTALS**

- 33 A. Product Data: For each type of product.
- 34 B. Sustainable Design Submittals:
 - 35 1. Product Data: For sealants, indicating VOC content.
 - 36 2. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting
 - 37 materials.
- 38 C. Product Schedule: For each penetration firestopping system. Include location, illustration of firestopping
- 39 system, and design designation of qualified testing and inspecting agency.
 - 40 1. Engineering Judgments: Where Project conditions require modification to a qualified testing and
 - 41 inspecting agency's illustration for a particular penetration firestopping system, submit illustration,
 - 42 with modifications marked, approved by penetration firestopping system manufacturer's fire-
 - 43 protection engineer as an engineering judgment or equivalent fire-resistance-rated assembly.
 - 44 Obtain approval of authorities having jurisdiction prior to submittal.

45 **1.5 INFORMATIONAL SUBMITTALS**

- 46 A. Qualification Data: For Installer.
- 47 B. Product test reports.

48 **1.6 CLOSEOUT SUBMITTALS**

- 49 A. Installer Certificates: From Installer indicating that penetration firestopping systems have been installed in
- 50 compliance with requirements and manufacturer's written instructions.

- 1 **1.7 QUALITY ASSURANCE**
- 2 A. Installer Qualifications: A firm that has been approved by FM Global according to FM Global 4991,
3 "Approval of Firestop Contractors," or been evaluated by UL and found to comply with its "Qualified
4 Firestop Contractor Program Requirements."
- 5 B. Fire-Test-Response Characteristics: Penetration firestopping shall comply with the following requirements:
6 1. Penetration firestopping tests are performed by a qualified testing agency acceptable to authorities
7 having jurisdiction.
8 2. Penetration firestopping is identical to those tested per testing standard referenced in "Penetration
9 Firestopping" Article. Provide rated systems complying with the following requirements:
10 a. Penetration firestopping products bear classification marking of qualified testing and
11 inspecting agency.
12 b. Classification markings on penetration firestopping correspond to designations listed by the
13 following:
14 1) UL in its "Fire Resistance Directory."
15 C. Preinstallation Conference: Conduct conference at Project site.
- 16 **1.8 PROJECT CONDITIONS**
- 17 A. Environmental Limitations: Do not install penetration firestopping when ambient or substrate temperatures
18 are outside limits permitted by penetration firestopping manufacturers or when substrates are wet because
19 of rain, frost, condensation, or other causes.
20 B. Install and cure penetration firestopping per manufacturer's written instructions using natural means of
21 ventilations or, where this is inadequate, forced-air circulation.
- 22 **1.9 COORDINATION**
- 23 A. Coordinate construction of openings and penetrating items to ensure that penetration firestopping is
24 installed according to specified requirements.
25 B. Coordinate sizing of sleeves, openings, core-drilled holes, or cut openings to accommodate penetration
26 firestopping.

27 **PART 2 - PRODUCTS**

- 28 **2.1 PERFORMANCE REQUIREMENTS**
- 29 A. Fire-Test-Response Characteristics:
30 1. Perform penetration firestopping system tests by a qualified testing agency acceptable to
31 authorities having jurisdiction.
32 2. Test per testing standards referenced in "Penetration Firestopping Systems" Article. Provide rated
33 systems complying with the following requirements:
34 a. Penetration firestopping systems shall bear classification marking of a qualified testing
35 agency.
36 1) UL in its "Fire Resistance Directory."
37 2) Intertek Group in its "Directory of Listed Building Products."
38 3) FM Global in its "Building Materials Approval Guide."
- 39 **2.2 PENETRATION FIRESTOPPING SYSTEMS**
- 40 A. Penetration Firestopping Systems: Systems that resist spread of fire, passage of smoke and other gases,
41 and maintain original fire-resistance rating of construction penetrated. Penetration firestopping systems
42 shall be compatible with one another, with the substrates forming openings, and with penetrating items if
43 any.
44 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
45 that may be incorporated into the Work include, but are not limited to the following:
46 a. 3M Fire Protection Products:
47 b. Hilti, Inc.
48 c. Tremco, Inc.
49 B. Penetrations in Fire-Resistance-Rated Walls: Penetration firestopping systems with ratings determined per
50 ASTM E 814 or UL 1479, based on testing at a positive pressure differential of 0.01-inch wg.
51 1. F-Rating: Not less than the fire-resistance rating of constructions penetrated.
52

- 1 C. Penetrations in Horizontal Assemblies: Penetration firestopping systems with ratings determined per
2 ASTM E 814 or UL 1479, based on testing at a positive pressure differential of 0.01-inch wg.
3 1. F-Rating: At least one hour, but not less than the fire-resistance rating of constructions penetrated.
4 2. T-Rating: At least one hour, but not less than the fire-resistance rating of constructions penetrated
5 except for floor penetrations within the cavity of a wall.
6 3. W-Rating: Provide penetration firestopping systems showing no evidence of water leakage when
7 tested according to UL 1479.
8 D. Penetrations in Smoke Barriers: Penetration firestopping systems with ratings determined per UL 1479,
9 based on testing at a positive pressure differential of 0.30-inch wg.
10 1. L-Rating: Not exceeding 5.0 cfm/sq. ft. of penetration opening at and no more than 50-cfm
11 cumulative total for any 100 sq. ft. at both ambient and elevated temperatures.
12 E. Exposed Penetration Firestopping Systems: Flame-spread and smoke-developed indexes of less than 25
13 and 450, respectively, per ASTM E 84.
14 1. Sealant shall have a VOC content of 250 g/L or less.
15 F. Accessories: Provide components for each penetration firestopping system that are needed to install fill
16 materials and to maintain ratings required. Use only those components specified by penetration
17 firestopping system manufacturer and approved by qualified testing and inspecting agency for conditions
18 indicated.
19 1. Permanent forming/damming/backing materials.
20 2. Substrate primers.
21 3. Collars.
22 4. Steel sleeves.

23 **2.3 TELECOMMUNICATIONS AND ELECTRICAL APPLICATIONS**

- 24 A. Cable Bundling Protection:
25 1. Composite Sheet (Intumescent): The intumescent sheet shall be capable of passing ASTM E 814
26 (ANSI/UL 1479) Standard Method of Fire Tests for Through-Penetration Fire Stops up to the
27 desired fire resistance rating.
28 2. Basis of Design: 3M CS-195+ Composite Sheet.
29 3. Systems Components:
30 a. Fire barrier caulk or putty.
31 b. Fire barrier wrap strip.
32 c. Graphite intumescent seal.
33 d. Sheet metal, anchors, washers and screws.
34 e. Cardboard.
35 4. Single Cable Tray - Wall (One and Two Hour Wall): Based on W-L-40004.
36 5. Single and Multiple Cable Trays – Concrete Floor (One and Two Hours): Based on C-AJ-4003.
37 6. Single Cable Tray – Concrete Curb Retrofit (One and Two Hours): Based on F-B-3004.

38 **2.4 FILL MATERIALS**

- 39 A. Cast-in-Place Firestop Devices: Factory-assembled devices for use in cast-in-place concrete floors and
40 consisting of an outer metallic sleeve lined with an intumescent strip, a radial extended flange attached to
41 one end of the sleeve for fastening to concrete formwork, and a neoprene gasket.
42 B. Latex Sealants: Single-component latex formulations that do not re-emulsify after cure during exposure to
43 moisture.
44 C. Firestop Devices: Factory-assembled collars formed from galvanized steel and lined with intumescent
45 material sized to fit specific diameter of penetrant.
46 D. Intumescent Composite Sheets: Rigid panels consisting of aluminum-foil-faced elastomeric sheet bonded
47 to galvanized-steel sheet.
48 E. Intumescent Putties: Nonhardening dielectric, water-resistant putties containing no solvents, inorganic
49 fibers, or silicone compounds.
50 F. Intumescent Wrap Strips: Single-component intumescent elastomeric sheets with aluminum foil on one
51 side.
52 G. Mortars: Prepackaged dry mixes consisting of a blend of inorganic binders, hydraulic cement, fillers, and
53 lightweight aggregate formulated for mixing with water at Project site to form a nonshrinking,
54 homogeneous mortar.
55 H. Pillows/Bags: Reusable heat-expanding pillows/bags consisting of glass-fiber cloth cases filled with a
56 combination of mineral-fiber, water-insoluble expansion agents, and fire-retardant additives. Where
57 exposed, cover openings with steel-reinforcing wire mesh to protect pillows/bags from being easily
58 removed.
59 I. Silicone Foams: Multicomponent, silicone-based liquid elastomers that, when mixed, expand and cure in
60 place to produce a flexible, nonshrinking foam.
61

- 1 J. Silicone Sealants: Single-component, silicone-based, neutral-curing elastomeric sealants of grade
2 indicated below:
3 1. Grade: Pourable (self-leveling) formulation for openings in floors and other horizontal surfaces,
4 and nonsag formulation for openings in vertical and sloped surfaces, unless indicated firestopping
5 limits use of nonsag grade for both opening conditions.

6 **PART 3 - EXECUTION**

7 **3.1 INSTALLATION**

- 8 A. Examine substrates and conditions, with Installer present, for compliance with requirements for opening
9 configurations, penetrating items, substrates, and other conditions affecting performance of the Work.
10 B. General: Install penetration firestopping systems to comply with manufacturer's written installation
11 instructions and published drawings for products and applications.
12 C. Install forming materials and other accessories of types required to support fill materials during their
13 application and in the position needed to produce cross-sectional shapes and depths required to achieve
14 fire ratings.
15 1. After installing fill materials and allowing them to fully cure, remove combustible forming materials
16 and other accessories not forming permanent components of firestopping.
17 D. Install fill materials by proven techniques to produce the following results:
18 1. Fill voids and cavities formed by openings, forming materials, accessories and penetrating items to
19 achieve required fire-resistance ratings.
20 2. Apply materials so they contact and adhere to substrates formed by openings and penetrating
21 items.
22 3. For fill materials that will remain exposed after completing the Work, finish to produce smooth,
23 uniform surfaces that are flush with adjoining finishes.

24 **3.2 IDENTIFICATION**

- 25 A. Wall Identification: Permanently label walls containing penetration firestopping systems with the words
26 "FIRE AND/OR SMOKE BARRIER - PROTECT ALL OPENINGS," using lettering not less than 3 inches
27 high and with minimum 0.375-inch strokes.
28 1. Locate in accessible concealed floor, floor-ceiling, or attic space at 15 feet from end of wall and at
29 intervals not exceeding 30 feet.
30 B. Penetration Identification: Identify each penetration firestopping system with legible metal or plastic labels.
31 Attach labels permanently to surfaces adjacent to and within 6 inches of penetration firestopping system
32 edge so labels are visible to anyone seeking to remove penetrating items or firestopping systems. Use
33 mechanical fasteners or self-adhering-type labels with adhesives capable of permanently bonding labels to
34 surfaces on which labels are placed. Include the following information on labels:
35 1. The words "Warning - Penetration Firestopping - Do Not Disturb. Notify Building Management of
36 Any Damage."
37 2. Contractor's name, address, and phone number.
38 3. Designation of applicable testing and inspecting agency.
39 4. Date of installation.
40 5. Manufacturer's name.
41 6. Installer's name.

42 **3.3 FIELD QUALITY CONTROL**

- 43 A. Owner will engage a qualified testing agency to perform tests and inspections according to ASTM E 2174.
44 B. Where deficiencies are found or penetration firestopping system is damaged or removed because of
45 testing, repair or replace penetration firestopping system to comply with requirements.
46 C. Proceed with enclosing penetration firestopping systems with other construction only after inspection
47 reports are issued and installations comply with requirements.

- 8 A. Testing Agency Qualifications: Qualified according to ASTM C 1021 to conduct the testing indicated.
- 9 **1.7 PRECONSTRUCTION TESTING**
- 10 A. Preconstruction Laboratory Testing: Submit to joint-sealant manufacturers, for testing indicated below,
- 11 samples of materials that will contact or affect joint sealants.
- 12 1. Adhesion Testing: Use ASTM C 794 to determine whether priming and other specific joint
- 13 preparation techniques are required to obtain rapid, optimum adhesion of joint sealants to joint
- 14 substrates.
- 15 2. Compatibility Testing: Use ASTM C 1087 to determine sealant compatibility when in contact with
- 16 glazing and gasket materials.
- 17 B. Preconstruction Field-Adhesion Testing: Before installing sealants, field test their adhesion to Project joint
- 18 substrates. Test joint sealants according to Method A, Field-Applied Sealant Joint Hand Pull Tab, in
- 19 Appendix X1.1 in ASTM C 1193 or Method A, Tail Procedure, in ASTM C 1521.
- 20 **1.8 WARRANTY**
- 21 A. Special Installer's Warranty: Installer agrees to repair or replace joint sealants that do not comply with
- 22 performance and other requirements specified in this Section within specified warranty period.
- 23 1. Warranty Period: Two years from date of Substantial Completion.
- 24 B. Special Manufacturer's Warranty: Manufacturer agrees to furnish joint sealants to repair or replace those
- 25 joint sealants that do not comply with performance and other requirements specified in this Section within
- 26 specified warranty period.
- 27 1. Warranty Period: Five years from date of Substantial Completion.

28 **PART 2 - PRODUCTS**

- 29 **2.1 JOINT SEALANTS, GENERAL**
- 30 A. VOC Content: Sealants and sealant primers shall comply with the following:
- 31 1. Architectural sealants shall have a VOC content of 250 g/L or less.
- 32 2. Sealants and sealant primers for nonporous substrates shall have a VOC content of 250 g/L or less.
- 33 3. Sealants and sealant primers for porous substrates shall have a VOC content of 775 g/L or less.
- 34 B. Colors of Exposed Joint Sealants: As selected by Architect from manufacturer's full range.
- 35 **2.2 NONSTAINING SILICONE JOINT SEALANTS (SEALANT-1)**
- 36 A. Nonstaining Joint Sealants: No staining of substrates when tested according to ASTM C 1248.
- 37 B. Silicone, Nonstaining, S, NS, 50, NT: Nonstaining, single-component, nonsag, plus 50 percent and minus 50
- 38 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant; ASTM C 920, Type S,
- 39 Grade NS, Class 50, Use NT.
- 40 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
- 41 that may be incorporated into the Work include, but are not limited to the following:
- 42 a. Dow Corning Corporation.
- 43 b. Pecora Corporation.
- 44 c. Sika Corporation; Joint Sealants.
- 45 d. Tremco Incorporated.
- 46 **2.3 URETHANE JOINT SEALANTS (SEALANT-2)**
- 47 A. Urethane, S, NS, 50, T, NT: Single-component, nonsag, plus 50 percent and minus 50 percent movement
- 48 capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C 920, Type S, Grade NS, Class 25,
- 49 Uses T and NT.
- 50 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
- 51 that may be incorporated into the Work include, but are not limited to the following:
- 52 a. BASF Corporation; Construction Systems.
- 53 b. LymTal International Inc.

- 1 **2.4 IMMERSIBLE JOINT SEALANTS (SEALANT-3)**
2 A. Immersible Joint Sealants. Suitable for immersion in liquids; ASTM C 1247, Class 1; tested in deionized
3 water unless otherwise indicated
4 B. Urethane, Immersible, S, P, 50, T, NT, I: Immersible, single-component, pourable, plus 50 percent and
5 minus 50 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C 920,
6 Type S, Grade P, Class 25, Uses T, NT, and I.
7 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
8 that may be incorporated into the Work include, but are not limited to the following:
9 a. Sika Corporation; Joint Sealants.
10 b. Tremco Incorporated.
11 c. W. R. Meadows, Inc.

- 12 **2.5 MILDEW-RESISTANT JOINT SEALANTS**
13 A. Mildew-Resistant Joint Sealants: Formulated for prolonged exposure to humidity with fungicide to prevent
14 mold and mildew growth.
15 B. Silicone (SEALANT-4): Mildew Resistant, Acid Curing, S, NS, 50, NT: Mildew-resistant, single-component,
16 nonsag, plus 50 percent and minus 50 percent movement capability, nontraffic-use, acid-curing silicone joint
17 sealant; ASTM C 920, Type S, Grade NS, Class 25, Use NT.
18 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
19 that may be incorporated into the Work include, but are not limited to the following:
20 a. Dow Corning Corporation.
21 b. GE Construction Sealants; Momentive Performance Materials Inc.
22 c. Tremco Incorporated.
23 C. Acrylic Latex (SEALANT-5): Acrylic latex or siliconized acrylic latex, ASTM C 834, Type OP, Grade NF.
24 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
25 that may be incorporated into the Work include, but are not limited to the following:
26 a. BASF Corporation; Construction Systems.
27 b. Pecora Corporation.
28 c. Tremco Incorporated.

- 29 **2.6 JOINT-SEALANT BACKING**
30 A. Cylindrical Sealant Backings: ASTM C 1330, Type C (closed-cell material with a surface skin), and of size
31 and density to control sealant depth and otherwise contribute to producing optimum sealant performance.
32 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
33 that may be incorporated into the Work include, but are not limited to the following:
34 a. Alcot Plastics Ltd.
35 b. Backer Rod Mfg. Inc.
36 c. BASF Corporation; Construction Systems.
37 d. Construction Foam Products; a division of Nomaco, Inc.
38 B. Bond-Breaker Tape: Polyethylene tape or other plastic tape recommended by sealant manufacturer.

- 39 **2.7 MISCELLANEOUS MATERIALS**
40 A. Primer: Material recommended by joint-sealant manufacturer where required for adhesion of sealant to joint
41 substrates indicated, as determined from preconstruction joint-sealant-substrate tests and field tests.
42 B. Cleaners for Nonporous Surfaces: Chemical cleaners acceptable to manufacturers of sealants and sealant
43 backing materials.
44 C. Masking Tape: Nonstaining, nonabsorbent material compatible with joint sealants and surfaces adjacent to
45 joints.

46 **PART 3 - EXECUTION**

- 47 **3.1 PREPARATION**
48 A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealants to comply with joint-
49 sealant manufacturer's written instructions and the following requirements:
50 1. Remove laitance and form-release agents from concrete.
51 2. Clean nonporous joint substrate surfaces with chemical cleaners or other means that do not stain,
52 harm substrates, or leave residues capable of interfering with adhesion.
53 B. Joint Priming: Prime joint substrates where recommended by joint-sealant manufacturer or as indicated by
54 preconstruction joint-sealant-substrate tests or prior experience.

- 1 C. Masking Tape: Use masking tape where required to prevent contact of sealant or primer with adjoining
2 surfaces.

3 **3.2 INSTALLATION OF JOINT SEALANTS**

- 4 A. General: Comply with ASTM C 1193 and joint-sealant manufacturer's written installation instructions for
5 products and applications indicated, unless more stringent requirements apply.
6 B. Install sealant backings of kind indicated to support sealants during application and at position required to
7 produce cross-sectional shapes and depths of installed sealants relative to joint widths that allow optimum
8 sealant movement capability.
9 C. Install bond-breaker tape behind sealants where sealant backings are not used between sealants and backs
10 of joints.
11 D. Install sealants using proven techniques that comply with the following and at the same time backings are
12 installed:
13 1. Place sealants so they directly contact and fully wet joint substrates.
14 2. Completely fill recesses in each joint configuration.
15 3. Produce uniform, cross-sectional shapes and depths relative to joint widths that allow optimum
16 sealant movement capability.
17 E. Tooling of Nonsag Sealants: Immediately after sealant application and before skinning or curing begins, tool
18 sealants to form smooth, uniform beads of configuration indicated. Use tooling agents that are approved in
19 writing by sealant manufacturer and that do not discolor sealants or adjacent surfaces.
20 1. Provide concave joint profile per Figure 8A in ASTM C 1193 unless otherwise indicated.

21 **3.3 FIELD QUALITY CONTROL**

- 22 A. Field-Adhesion Testing: Field test joint-sealant adhesion to joint substrates as follows:
23 1. Extent of Testing: Test completed and cured sealant joints as follows:
24 a. Perform 5 tests for the first 1000 feet of joint length for each kind of sealant and joint substrate.
25 2. Test Method: Test joint sealants according to Method A, Field-Applied Sealant Joint Hand Pull Tab,
26 in Appendix X1 in ASTM C 1193 or Method A, Tail Procedure, in ASTM C 1521.
27 B. Evaluation of Field-Adhesion-Test Results: Sealants not evidencing adhesive failure from testing or
28 noncompliance with other indicated requirements will be considered satisfactory. Remove sealants that fail
29 to adhere to joint substrates during testing or to comply with other requirements. Retest failed applications
30 until test results prove sealants comply with indicated requirements.

31 **3.4 JOINT-SEALANT SCHEDULE**

- 32 A. Refer to Material Finish Legend for sealant types.
33 B. Joint-Sealant Application: Exterior joints in horizontal traffic surfaces .
34 1. Joint Locations:
35 a. Isolation and contraction joints in cast-in-place concrete slabs.
36 b. Joints in stone paving units, including steps.
37 c. Joints between different materials listed above.
38 d. Other joints as indicated on Drawings.
39 2. Joint Sealant: Urethane, M, P, 50, T, NT.
40 3. Joint-Sealant Color: As selected by Architect from manufacturer's full range of colors.
41 C. Joint-Sealant Application: Exterior joints in horizontal traffic surfaces subject to water immersion.
42 1. Joint Locations:
43 a. Joints in pedestrian plazas.
44 b. Other joints as indicated on Drawings.
45 2. Joint Sealant: Urethane, immersible, S, P, 50, T, NT, I.
46 3. Joint-Sealant Color: As selected by Architect from manufacturer's full range of colors.
47 D. Joint-Sealant Application: Exterior joints in vertical surfaces and horizontal nontraffic surfaces
48 1. Joint Locations:
49 a. Construction joints in cast-in-place concrete.
50 b. Control and expansion joints in unit masonry.
51 c. Joints in dimension stone cladding.
52 d. Joints between stone or masonry exterior envelope components/assemblies and window and
53 door frames and/or subframes.
54 e. Other joints as indicated on Drawings.
55 2. Joint Sealant: Silicone, nonstaining, S, NS, 50, NT.
56 3. Joint-Sealant Color: As selected by Architect from manufacturer's full range of colors
57

- 1 E. Joint-Sealant Application: Interior joints in horizontal traffic surfaces.
2 1. Joint Locations:
3 a. Isolation joints in cast-in-place concrete slabs.
4 b. Control and expansion joints in tile flooring.
5 c. Other joints as indicated on Drawings.
6 2. Joint Sealant: Urethane, S, P, 50, T, NT.
7 3. Joint-Sealant Color: As selected by Architect from manufacturer's full range of colors.
8 F. Joint-Sealant Application: Interior joints in vertical surfaces and horizontal nontraffic surfaces .
9 1. Joint Locations:
10 a. Control and expansion joints on exposed interior surfaces of exterior walls.
11 b. Tile control and expansion joints.
12 c. Vertical joints on exposed surfaces of unit masonry walls and partitions.
13 d. Joints on underside of plant-precast structural concrete
14 e. Other joints as indicated on Drawings.
15 2. Joint Sealant: Urethane, S, NS, 50, NT.
16 3. Joint-Sealant Color: As selected by Architect from manufacturer's full range of colors.
17 G. Joint-Sealant Application: Interior joints in vertical surfaces and horizontal nontraffic surfaces not subject to
18 significant movement .
19 1. Joint Locations:
20 a. Control joints on exposed interior surfaces of exterior walls.
21 b. Perimeter joints between interior wall surfaces and frames of interior doors, windows and
22 elevator entrances.
23 c. Other joints as indicated on Drawings.
24 2. Joint Sealant: Acrylic latex.
25 3. Joint-Sealant Color: As selected by Architect from manufacturer's full range of colors.
26 H. Joint-Sealant Application: Mildew-resistant interior joints in vertical surfaces and horizontal nontraffic
27 surfaces .
28 1. Joint Locations:
29 a. Joints between plumbing fixtures and adjoining walls, floors, and counters.
30 b. Tile control and expansion joints where indicated.
31 c. Other joints as indicated on Drawings.
32 2. Joint Sealant: Silicone, mildew resistant, acid curing, S, NS, 50, NT.
33 3. Joint-Sealant Color: As selected by Architect from manufacturer's full range of colors.
34 I. Joint-Sealant Application: Concealed mastics .
35 1. Joint Locations:
36 a. Aluminum thresholds.
37 b. Sill plates.
38 c. Other joints as indicated on Drawings.

25 **PART 1 - GENERAL**

26 **1.1 RELATED DOCUMENTS**

- 27 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 28 Division 01 Specification Sections, apply to this Section.

29 **1.2 SUMMARY**

- 30 A. Section includes hollow-metal work.

31 **1.3 DEFINITIONS**

- 32 A. Minimum Thickness: Minimum thickness of base metal without coatings according to NAAMM-HMMA 803
- 33 or SDI A250.8.

34 **1.4 COORDINATION**

- 35 A. Coordinate anchorage installation for hollow-metal frames. Furnish setting drawings, templates, and
- 36 directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral
- 37 anchors. Deliver such items to Project site in time for installation.
- 38 B. Coordinate requirements for installation of door hardware, electrified door hardware, and access control and
- 39 security systems.

40 **1.5 PREINSTALLATION MEETINGS**

- 41 A. Preinstallation Conference: Conduct conference at Project site.

42 **1.6 ACTION SUBMITTALS**

- 43 A. Product Data: For each type of product.
- 44 B. Sustainable Design Submittals:
 - 45 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
 - 46 cost.
- 47 C. Shop Drawings: Include elevations, door edge details, frame profiles, metal thicknesses, preparations for
- 48 hardware, and other details.
- 49 D. Samples for Initial Selection: For units with factory-applied color finishes.

- 1 E. Samples for Verification: For each type of exposed finish required.
- 2 F. Schedule: Prepared by or under the supervision of supplier, using same reference numbers for details and
- 3 openings as those on Drawings.

4 **1.7 INFORMATIONAL SUBMITTALS**

- 5 A. Product test reports.

6 **PART 2 - PRODUCTS**

7 **2.1 MANUFACTURERS**

- 8 A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may
- 9 be incorporated into the Work include, but are not limited to the following:
- 10 1. Amweld Building Products, LLC
- 11 2. Curries Company; ASSA ABLOY.
- 12 3. LaForce, Inc.
- 13 4. Steelcraft; an Allegion brand

14 **2.2 REGULATORY REQUIREMENTS**

- 15 A. Fire-Rated Assemblies: Complying with NFPA 80 and listed and labeled by a qualified testing agency
- 16 acceptable to authorities having jurisdiction for fire-protection ratings and temperature-rise limits indicated,
- 17 based on testing at positive pressure according to NFPA 252 or UL 10C.
- 18 1. Smoke- and Draft-Control Assemblies: Provide an assembly with gaskets listed and labeled for
- 19 smoke and draft control by a qualified testing agency acceptable to authorities having jurisdiction,
- 20 based on testing according to UL 1784 and installed in compliance with NFPA 105.
- 21 B. Fire-Rated, Borrowed-Lite Assemblies: Complying with NFPA 80 and listed and labeled by a testing and
- 22 inspecting agency acceptable to authorities having jurisdiction for fire-protection ratings indicated, based on
- 23 testing according to NFPA 257 or UL 9.

24 **2.3 INTERIOR DOORS AND FRAMES**

- 25 A. Extra-Heavy-Duty Doors and Frames: SDI A250.8, Level 3. At locations indicated in the Door and Frame
- 26 Schedule.
- 27 1. Physical Performance: Level A according to SDI A250.4.
- 28 2. Doors:
- 29 a. Type: As indicated in the Door and Frame Schedule.
- 30 b. Thickness: 1-3/4 inches.
- 31 c. Face: Metallic-coated steel sheet, minimum thickness of 0.053 inch, with minimum A60
- 32 coating.
- 33 d. Edge Construction: Model 1, Full Flush.
- 34 e. Bottom Edges: Close bottom edges of doors where required for attachment of weather
- 35 stripping with end closures or channels of same material as face sheets.
- 36 f. Core: Manufacturer's standard vertical steel-stiffener core.
- 37 1) Fire Door Core: As required to provide fire-protection and temperature-rise ratings
- 38 indicated.
- 39 3. Frames:
- 40 a. Materials: Uncoated, cold-rolled steel sheet, minimum thickness of 0.053 inch.
- 41 b. Sidelite and Transom Frames: Fabricated from same thickness material as adjacent door
- 42 frame.
- 43 c. Construction: Full profile welded.
- 44 4. Exposed Finish: Factory Prime.
- 45

- 1 **2.4 EXTERIOR HOLLOW-METAL DOORS AND FRAMES**
- 2 A. Extra-Heavy-Duty Doors and Frames: SDI A250.8, Level 3; SDI A250.4, Level A. At locations indicated in
- 3 the Door and Frame Schedule.
- 4 1. Doors:
- 5 a. Type: As indicated in the Door and Frame Schedule.
- 6 b. Thickness: 1-3/4 inches.
- 7 c. Face: Metallic-coated steel sheet, minimum thickness of 0.053 inch, with minimum A60
- 8 coating.
- 9 d. Edge Construction: Model 1, Full Flush.
- 10 e. Edge Bevel: Bevel lock and hinge edges 1/8 inch in 2 inches.
- 11 f. Top Edge Closures: Close top edges of doors with flush closures of same material as face
- 12 sheets. Seal joints against water penetration.
- 13 g. Bottom Edges: Close bottom edges of doors where required for attachment of weather
- 14 stripping with end closures or channels of same material as face sheets. Provide weep-hole
- 15 openings in bottoms of exterior doors to permit moisture to escape.
- 16 h. Core: Polyurethane.
- 17 i. Fire-Rated Core: Manufacturer's standard vertical steel stiffener with insulation core for fire-
- 18 rated doors.
- 19 2. Frames:
- 20 a. Materials: Metallic-coated steel sheet, minimum thickness of 0.053 inch, with minimum A60
- 21 coating.
- 22 b. Construction: Full profile welded.
- 23 3. Exposed Finish: Prime.
- 24 **2.5 BORROWED LITES**
- 25 A. Hollow-metal frames of **uncoated** steel sheet, minimum thickness of 0.053 inch.
- 26 B. Construction: Full profile welded.
- 27 **2.6 FRAME ANCHORS**
- 28 A. Jamb Anchors:
- 29 1. Masonry Type: Adjustable strap-and-stirrup or T-shaped anchors to suit frame size, not less than
- 30 0.042 inch thick, with corrugated or perforated straps not less than 2 inches wide by 10 inches long;
- 31 or wire anchors not less than 0.177 inch thick.
- 32 2. Postinstalled Expansion Type for In-Place Concrete or Masonry: Minimum 3/8-inch-diameter bolts
- 33 with expansion shields or inserts. Provide pipe spacer from frame to wall, with throat reinforcement
- 34 plate, welded to frame at each anchor location.
- 35 B. Floor Anchors: Formed from same material as frames, minimum thickness of 0.042 inch, and as follows:
- 36 1. Monolithic Concrete Slabs: Clip-type anchors, with two holes to receive fasteners.
- 37 2. Separate Topping Concrete Slabs: Adjustable-type anchors with extension clips, allowing not less
- 38 than 2-inch height adjustment. Terminate bottom of frames at finish floor surface.
- 39 **2.7 MATERIALS**
- 40 A. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled
- 41 content not less than **25** percent.
- 42 B. Hot-Rolled Steel Sheet: ASTM A 1011/A 1011M, Commercial Steel (CS), Type B; free of scale, pitting, or
- 43 surface defects; pickled and oiled.
- 44 C. Metallic-Coated Steel Sheet: ASTM A 653/A 653M, Commercial Steel (CS), Type B.
- 45 D. Frame Anchors: ASTM A 879/A 879M, Commercial Steel (CS), 04Z coating designation; mill phosphatized.
- 46 1. For anchors built into exterior walls, steel sheet complying with ASTM A 1008/A 1008M or
- 47 ASTM A 1011/A 1011M, hot-dip galvanized according to ASTM A 153/A 153M, Class B.
- 48 E. Inserts, Bolts, and Fasteners: Hot-dip galvanized according to ASTM A 153/A 153M.
- 49 F. Power-Actuated Fasteners in Concrete: From corrosion-resistant materials.
- 50 G. Grout: ASTM C 476, except with a maximum slump of 4 inches, as measured according to
- 51 ASTM C 143/C 143M.
- 52 H. Mineral-Fiber Insulation: ASTM C 665, Type I (blankets without membrane facing).
- 53 I. Glazing: Section 08 80 00 "Glazing."
- 54 J. Bituminous Coating: Cold-applied asphalt mastic, compounded for 15-mil dry film thickness per coat.

1 **2.8 FABRICATION**

- 2 A. Fabricate hollow-metal work to be rigid and free of defects, warp, or buckle. Accurately form metal to required
3 sizes and profiles, with minimum radius for metal thickness. Where practical, fit and assemble units in
4 manufacturer's plant. To ensure proper assembly at Project site, clearly identify work that cannot be
5 permanently factory assembled before shipment.
- 6 B. Hollow-Metal Doors:
- 7 1. Exterior Doors: Provide weep-hole openings in bottoms of exterior doors to permit moisture to
8 escape. Seal joints in top edges of doors against water penetration.
- 9 2. Astragals: Provide overlapping astragal on one leaf of pairs of doors where required by NFPA 80 for
10 fire-performance rating or where indicated.
- 11 C. Hollow-Metal Frames: Where frames are fabricated in sections due to shipping or handling limitations,
12 provide alignment plates or angles at each joint, fabricated of same thickness metal as frames.
- 13 1. Sidelite and Transom Bar Frames: Provide closed tubular members with no visible face seams or
14 joints, fabricated from same material as door frame. Fasten members at crossings and to jambs by
15 butt welding.
- 16 2. Provide countersunk, flat- or oval-head exposed screws and bolts for exposed fasteners unless
17 otherwise indicated.
- 18 3. Grout Guards: Weld guards to frame at back of hardware mortises in frames to be grouted.
- 19 4. Floor Anchors: Weld anchors to bottoms of jambs with at least four spot welds per anchor; however,
20 for slip-on drywall frames, provide anchor clips or countersunk holes at bottoms of jambs.
- 21 5. Jamb Anchors: Provide number and spacing of anchors as follows:
- 22 a. Masonry Type: Locate anchors not more than 16 inches from top and bottom of frame. Space
23 anchors not more than 32 inches o.c., to match coursing, and as follows:
- 24 1) Two anchors per jamb up to 60 inches high.
- 25 2) Three anchors per jamb from 60 to 90 inches high.
- 26 3) Four anchors per jamb from 90 to 120 inches high.
- 27 4) Four anchors per jamb plus one additional anchor per jamb for each 24 inches or
28 fraction thereof above 120 inches high.
- 29 b. Stud-Wall Type: Locate anchors not more than 18 inches from top and bottom of frame. Space
30 anchors not more than 32 inches o.c. and as follows:
- 31 1) Three anchors per jamb up to 60 inches high.
- 32 2) Four anchors per jamb from 60 to 90 inches high.
- 33 3) Five anchors per jamb from 90 to 96 inches high.
- 34 4) Five anchors per jamb plus one additional anchor per jamb for each 24 inches or
35 fraction thereof above 96 inches high.
- 36 c. Postinstalled Expansion Type: Locate anchors not more than 6 inches from top and bottom
37 of frame. Space anchors not more than 26 inches o.c.
- 38 6. Door Silencers: Except on weather-stripped frames, drill stops to receive door silencers.
- 39 a. Single-Door Frames: Drill stop in strike jamb to receive three door silencers.
- 40 b. Double-Door Frames: Drill stop in head jamb to receive two door silencers.
- 41 D. Hardware Preparation: Factory prepare hollow-metal work to receive templated mortised hardware; include
42 cutouts, reinforcement, mortising, drilling, and tapping according to SDI A250.6, the Door Hardware
43 Schedule, and templates.
- 44 1. Reinforce doors and frames to receive nontemplated, mortised, and surface-mounted door hardware.
- 45 2. Comply with applicable requirements in SDI A250.6 and BHMA A156.115 for preparation of hollow-
46 metal work for hardware.
- 47 E. Stops and Moldings: Provide stops and moldings around glazed lites and louvers where indicated. Form
48 corners of stops and moldings with mitered hairline joints.
- 49 1. Single Glazed Lites: Provide fixed stops and moldings welded on secure side of hollow-metal work.
- 50 2. Multiple Glazed Lites: Provide fixed and removable stops and moldings so that each glazed lite is
51 capable of being removed independently.
- 52 3. Provide fixed frame moldings on outside of exterior and on secure side of interior doors and frames.
- 53 4. Provide loose stops and moldings on inside of hollow-metal work.
- 54 5. Coordinate rabbet width between fixed and removable stops with glazing and installation types
55 indicated.

56 **2.9 STEEL FINISHES**

- 57 A. Prime Finish: Clean, pretreat, and apply manufacturer's standard primer.
- 58 1. Shop Primer: SDI A250.10.

1 **2.10 ACCESSORIES**

- 2 A. Louvers: Provide sightproof louvers for interior doors, where indicated, which comply with SDI 111C, with
3 blades or baffles formed of 0.020-inch-thick, cold-rolled steel sheet set into 0.032-inch-thick steel frame.
4 1. Fire-Rated Automatic Louvers: Movable blades closed by actuating fusible link, and listed and
5 labeled for use in fire-rated door assemblies of type and fire-resistance rating indicated.
6 B. Mullions and Transom Bars: Join to adjacent members by welding or rigid mechanical anchors.
7 C. Grout Guards: Formed from same material as frames, not less than 0.016 inch thick.

8 **PART 3 - EXECUTION**

9 **3.1 INSTALLATION**

- 10 A. Hollow-Metal Frames: Install hollow-metal frames for doors, transoms, sidelites, borrowed lites, and other
11 openings, of size and profile indicated. Comply with SDI A250.11 or NAAMM-HMMA 840 as required by
12 standards specified.
13 1. Set frames accurately in position; plumbed, aligned, and braced securely until permanent anchors
14 are set. After wall construction is complete, remove temporary braces, leaving surfaces smooth and
15 undamaged.
16 a. At fire-rated openings, install frames according to NFPA 80.
17 b. Where frames are fabricated in sections because of shipping or handling limitations, field
18 splice at approved locations by welding face joint continuously; grind, fill, dress, and make
19 splice smooth, flush, and invisible on exposed faces.
20 c. Install frames with removable stops located on secure side of opening.
21 d. Install door silencers in frames before grouting.
22 e. Remove temporary braces necessary for installation only after frames have been properly set
23 and secured.
24 f. Check plumb, square, and twist of frames as walls are constructed. Shim as necessary to
25 comply with installation tolerances.
26 g. Field apply bituminous coating to backs of frames that will be filled with grout containing
27 antifreezing agents.
28 2. Floor Anchors: Provide floor anchors for each jamb and mullion that extends to floor, and secure with
29 postinstalled expansion anchors.
30 a. Floor anchors may be set with power-actuated fasteners instead of postinstalled expansion
31 anchors if so indicated and approved on Shop Drawings.
32 3. Metal-Stud Partitions: Solidly pack mineral-fiber insulation inside frames.
33 4. Masonry Walls: Coordinate installation of frames to allow for solidly filling space between frames and
34 masonry with grout.
35 5. Concrete Walls: Solidly fill space between frames and concrete with mineral-fiber insulation.
36 6. In-Place Concrete or Masonry Construction: Secure frames in place with postinstalled expansion
37 anchors. Countersink anchors, and fill and make smooth, flush, and invisible on exposed faces.
38 7. Installation Tolerances: Adjust hollow-metal door frames for squareness, alignment, twist, and plumb
39 to the following tolerances:
40 a. Squareness: Plus or minus 1/16 inch, measured at door rabbet on a line 90 degrees from
41 jamb perpendicular to frame head.
42 b. Alignment: Plus or minus 1/16 inch, measured at jambs on a horizontal line parallel to plane
43 of wall.
44 c. Twist: Plus or minus 1/16 inch, measured at opposite face corners of jambs on parallel lines,
45 and perpendicular to plane of wall.
46 d. Plumbness: Plus or minus 1/16 inch, measured at jambs at floor.
47

- 1 B. Hollow-Metal Doors: Fit hollow-metal doors accurately in frames, within clearances specified below. Shim
2 as necessary.
3 1. Non-Fire-Rated Steel Doors:
4 a. Between Door and Frame Jambs and Head: 1/8 inch plus or minus 1/32 inch.
5 b. Between Edges of Pairs of Doors: 1/8 inch to 1/4 inch plus or minus 1/32 inch.
6 c. At Bottom of Door: 5/8 inch plus or minus 1/32 inch.
7 d. Between Door Face and Stop: 1/16 inch to 1/8 inch plus or minus 1/32 inch.
8 2. Fire-Rated Doors: Install doors with clearances according to NFPA 80.
9 3. Smoke-Control Doors: Install doors and gaskets according to NFPA 105.
10 C. Glazing: Comply with installation requirements in Section 08 80 00 "Glazing" and with hollow-metal
11 manufacturer's written instructions.
12 1. Secure stops with countersunk flat- or oval-head machine screws spaced uniformly not more than 9
13 inches o.c. and not more than 2 inches o.c. from each corner.

14 **3.2 ADJUSTING AND CLEANING**

- 15 A. Final Adjustments: Check and readjust operating hardware items immediately before final inspection. Leave
16 work in complete and proper operating condition. Remove and replace defective work, including hollow-
17 metal work that is warped, bowed, or otherwise unacceptable.
18 B. Remove grout and other bonding material from hollow-metal work immediately after installation.
19 C. Prime-Coat Touchup: Immediately after erection, sand smooth rusted or damaged areas of prime coat and
20 apply touchup of compatible air-drying, rust-inhibitive primer.
21 D. Metallic-Coated Surface Touchup: Clean abraded areas and repair with galvanizing repair paint according
22 to manufacturer's written instructions.

23 **PART 1 - GENERAL**

24 **1.1 RELATED DOCUMENTS**

- 25 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
26 Division 01 Specification Sections, apply to this Section.

27 **1.2 SUMMARY**

- 28 A. Section Includes:
29 1. Interior insulated service doors.
30 B. Related Requirements:
31 1. Section 05 50 00 "Metal Fabrications" for miscellaneous steel supports.

32 **1.3 ACTION SUBMITTALS**

- 33 A. Product Data: For each type and size of overhead coiling door and accessory.
34 1. Include construction details, material descriptions, dimensions of individual components, profiles for
35 slats, and finishes.
36 2. Include rated capacities, operating characteristics, electrical characteristics, and furnished
37 accessories.
38 B. Shop Drawings: For each installation and for special components not dimensioned or detailed in
39 manufacturer's product data.
40 1. Include plans, elevations, sections, and mounting details.
41 2. Include details of equipment assemblies, and indicate dimensions, required clearances, method of
42 field assembly, components, and location and size of each field connection.
43 3. Include points of attachment and their corresponding static and dynamic loads imposed on structure.
44 4. Include diagrams for power, signal, and control wiring.

45 **1.4 CLOSEOUT SUBMITTALS**

- 46 A. Maintenance Data: For overhead coiling doors to include in maintenance manuals.

47 **1.5 QUALITY ASSURANCE**

- 48 A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by
49 manufacturer for both installation and maintenance of units required for this Project.
50 B. Regulatory Requirements: Comply with applicable provisions in the U.S. Architectural & Transportation
51 Barriers Compliance Board's ADA-ABA Accessibility Guidelines.
52

1 **PART 2 - PRODUCTS**

2 **2.1 DOOR ASSEMBLY**

- 3 A. Service Door: Overhead coiling door formed with curtain of interlocking metal slats.
- 4 B. Operation Cycles: Door components and operators capable of operating for not less than 10,000. One
5 operation cycle is complete when a door is opened from the closed position to the fully open position and
6 returned to the closed position.
- 7 C. Door Curtain Material: Aluminum.
- 8 D. Door Curtain Slats: Flat profile slats of 1-7/8-inch to 2-5/8-inch center-to-center height.
9 1. Door Finish: Aluminum Finish: Baked-Enamel or Powder-Coat Finish.
10 2. Baked-Enamel or Powder-Coat Finish: AAMA 2603. Comply with coating manufacturer's written
11 instructions for cleaning, conversion coating, application, and baking.
- 12 E. Bottom Bar: Two angles, each not less than 1-1/2 by 1-1/2 by 1/8 inch thick; fabricated from, aluminum
13 extrusions and finished to match door..
- 14 F. Hood: Match curtain material and finish.
15 1. Shape: Round.
16 2. Mounting: As shown on Drawings.
- 17 G. Locking Devices: Equip door with locking device assembly.
18 1. Locking Device Assembly: locking bars, operable from outside with cylinders.
19 2. Safety Interlock Switch: Equip power-operated doors with safety interlock switch to disengage power
20 supply when door is locked.
- 21 H. Electric Door Operator:
22 1. Usage Classification: Light duty, up to 10 cycles per hour.
23 2. Operator Location: As shown on Drawings.
24 3. Safety: Listed according to UL 325 by a qualified testing agency for commercial or industrial use;
25 moving parts of operator enclosed or guarded if exposed and mounted at 8 feet or lower.
26 4. Motor Exposure: Interior.
27 5. Emergency Manual Operation: Push-up type.
28 6. Control Station(s): Where shown on Drawings.
29 7. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a
30 qualified testing agency, and marked for intended location and application.

31 **2.2 DOOR CURTAIN MATERIALS AND CONSTRUCTION**

- 32 A. Door Curtains: Fabricate overhead coiling-door curtain of interlocking metal slats in a continuous length for
33 width of door without splices. Unless otherwise indicated, provide slats of thickness and mechanical
34 properties recommended by door manufacturer for performance, size, and type of door indicated, and as
35 follows:
36 1. Aluminum Door Curtain Slats: ASTM B 209 sheet or ASTM B 221 extrusions, alloy and temper
37 standard with manufacturer for type of use and finish indicated; thickness of 0.050 inch ; and as
38 required.
39 2. Curtain R-Value: 4.5 deg F x h x sq. ft./Btu.
40 3. Insulated-Slat Interior Facing: Metal.
- 41 B. Curtain Jamb Guides: Manufacturer's standard angles or channels and angles of same material and finish
42 as curtain slats unless otherwise indicated, with sufficient depth and strength to retain curtain, to allow curtain
43 to operate smoothly, and to withstand loading. Slot bolt holes for guide adjustment. Provide removable stops
44 on guides to prevent overtravel of curtain.
- 45 C. Weatherseals for Doors: Equip each door with weather-stripping gaskets fitted to entire exterior perimeter
46 of door for a weather-resistant installation unless otherwise indicated.
47 1. At door head, use 1/8-inch- thick, replaceable, continuous-sheet baffle secured to inside of hood or
48 field-installed on the header.
49 2. At door jambs, use replaceable, adjustable, continuous, flexible, 1/8-inch- thick seals of flexible vinyl,
50 rubber, or neoprene.

51 **2.3 HOODS**

- 52 A. General: Form sheet metal hood to entirely enclose coiled curtain and operating mechanism at opening
53 head. Contour to fit end brackets to which hood is attached. Roll and reinforce top and bottom edges for
54 stiffness. Form closed ends for surface-mounted hoods and fascia for any portion of between-jamb mounting
55 that projects beyond wall face. Equip hood with intermediate support brackets as required to prevent
56 sagging.

- 1 **2.4 CURTAIN ACCESSORIES**
- 2 A. Push/Pull Handles: Equip each push-up-operated or emergency-operated door with lifting handles on each
- 3 side of door, finished to match door..
- 4 **2.5 COUNTER BALANCING MECHANISM**
- 5 A. General: Counterbalance doors by means of manufacturer's standard mechanism with an adjustable-
- 6 tension, steel helical torsion spring mounted around a steel shaft and contained in a spring barrel connected
- 7 to top of curtain with barrel rings. Use grease-sealed bearings or self-lubricating graphite bearings for
- 8 rotating members.
- 9 B. Counterbalance Barrel: Fabricate spring barrel of manufacturer's standard hot-formed, structural-quality,
- 10 seamless or welded carbon-steel pipe, of sufficient diameter and wall thickness to support rolled-up curtain
- 11 without distortion of slats and to limit barrel deflection to not more than 0.03 in./ft. of span under full load.
- 12 C. Counterbalance Spring: One or more oil-tempered, heat-treated steel helical torsion springs. Size springs to
- 13 counterbalance weight of curtain, with uniform adjustment accessible from outside barrel. Secure ends of
- 14 springs to barrel and shaft with cast-steel barrel plugs.
- 15 D. Torsion Rod for Counterbalance Shaft: Fabricate of manufacturer's standard cold-rolled steel, sized to hold
- 16 fixed spring ends and carry torsional load.
- 17 E. Brackets: Manufacturer's standard mounting brackets of either cast iron or cold-rolled steel plate.
- 18 **2.6 ELECTRIC DOOR OPERATORS**
- 19 A. General: Electric door operator assembly of size and capacity recommended and provided by door
- 20 manufacturer for door and operation-cycles requirement specified, with electric motor and factory-prewired
- 21 motor controls, starter, gear-reduction unit, solenoid-operated brake, clutch, control stations, control devices,
- 22 integral gearing for locking door, and accessories required for proper operation.
- 23 1. Comply with NFPA 70.
- 24 2. Control equipment complying with NEMA ICS 1, NEMA ICS 2, and NEMA ICS 6, with NFPA 70 Class
- 25 2 control circuit, maximum 24-V ac or dc.
- 26 B. Motors: Reversible-type motor with controller (disconnect switch) for motor exposure indicated.
- 27 1. Electrical Characteristics:
- 28 a. Phase: Single phase.
- 29 b. Volts: 115 V.
- 30 c. Hertz: 60.
- 31 2. Motor Size: Minimum size as indicated. If not indicated, large enough to start, accelerate, and operate
- 32 door in either direction from any position, at a speed not less than 8 in./sec. and not more than 12
- 33 in./sec. , without exceeding nameplate ratings or service factor.
- 34 3. Operating Controls, Controllers, Disconnect Switches, Wiring Devices, and Wiring: Manufacturer's
- 35 standard unless otherwise indicated.
- 36 4. Coordinate wiring requirements and electrical characteristics of motors and other electrical devices
- 37 with building electrical system and each location where installed.
- 38 C. Limit Switches: Equip each motorized door with adjustable switches interlocked with motor controls and set
- 39 to automatically stop door at fully opened and fully closed positions.
- 40 D. Control Station: Three-button control station in fixed location with momentary-contact push-button controls
- 41 labeled "Open" and "Stop" and sustained- or constant-pressure push-button control labeled "Close."
- 42 1. Interior-Mounted Units: Full-guarded, surface-mounted, heavy-duty type, with general-purpose
- 43 NEMA ICS 6, Type 1 enclosure.
- 44 E. Emergency Manual Operation: Equip each electrically powered door with capability for emergency manual
- 45 operation. Design manual mechanism so required force for door operation does not exceed 25 lbf .
- 46 F. Emergency Operation Disconnect Device: Equip operator with hand-operated disconnect mechanism for
- 47 automatically engaging manual operator and releasing brake for emergency manual operation while
- 48 disconnecting motor without affecting timing of limit switch. Mount mechanism so it is accessible from floor
- 49 level. Include interlock device to automatically prevent motor from operating when emergency operator is
- 50 engaged.
- 51 G. Motor Removal: Design operator so motor may be removed without disturbing limit-switch adjustment and
- 52 without affecting emergency manual operation.

53 **PART 3 - EXECUTION**

54 **3.1 EXAMINATION**

- 55 A. Examine substrates areas and conditions, with Installer present, for compliance with requirements for
- 56 substrate construction and other conditions affecting performance of the Work.

- 1 B. Examine locations of electrical connections.
- 2 C. Proceed with installation only after unsatisfactory conditions have been corrected.

3 **3.2 INSTALLATION**

- 4 A. Install overhead coiling doors and operating equipment complete with necessary hardware, anchors, inserts, hangers, and equipment supports; according to manufacturer's written instructions and as specified.
- 5
- 6 B. Install overhead coiling doors, hoods, controls, and operators at the mounting locations indicated for each
- 7 door.
- 8 C. Accessibility: Install overhead coiling doors, switches, and controls along accessible routes in compliance
- 9 with regulatory requirements for accessibility.

10 **3.3 STARTUP SERVICE**

- 11 A. Engage a factory-authorized service representative to perform startup service.
- 12 1. Perform installation and startup checks according to manufacturer's written instructions.
- 13 2. Test and adjust controls and safety devices. Replace damaged and malfunctioning controls and
- 14 equipment.

15 **3.4 ADJUSTING**

- 16 A. Adjust hardware and moving parts to function smoothly so that doors operate easily, free of warp, twist, or
- 17 distortion.
- 18 B. Lubricate bearings and sliding parts as recommended by manufacturer.
- 19 C. Adjust seals to provide tight fit around entire perimeter.

20 **3.5 MAINTENANCE SERVICE**

- 21 A. Initial Maintenance Service: Beginning at Substantial Completion, maintenance service shall include 12
- 22 months' full maintenance by skilled employees of coiling-door Installer. Include quarterly preventive
- 23 maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting
- 24 as required for door operation. Parts and supplies shall be manufacturer's authorized replacement parts and
- 25 supplies.
- 26 1. Perform maintenance, including emergency callback service, during normal working hours.

27 **3.6 DEMONSTRATION**

- 28 A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust,
- 29 operate, and maintain overhead coiling doors.

23 **PART 1 - GENERAL**

24 **1.1 RELATED DOCUMENTS**

- 25 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 26 Division 01 Specification Sections, apply to this Section.

27 **1.2 SUMMARY**

- 28 A. Section Includes:
 - 29 1. Exterior and Interior storefront framing.
 - 30 2. Exterior and Interior manual-swing entrance doors and door-frame units.

31 **1.3 PREINSTALLATION MEETINGS**

- 32 A. Preinstallation Conference: Conduct conference at Project site.

33 **1.4 ACTION SUBMITTALS**

- 34 A. Product Data: For each type of product.
- 35 B. Sustainable Design Submittals:
 - 36 1. Product Data: For sealants, indicating VOC content.
 - 37 2. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting
 - 38 materials.
- 39 C. Shop Drawings: Include plans, elevations, sections, full-size details, and attachments to other work.
 - 40 1. Show connection to and continuity with adjacent thermal, weather, air, and vapor barriers.
- 41 D. Samples: For each exposed finish required.
- 42 E. Entrance Door Hardware Schedule: Prepared by or under supervision of supplier, detailing fabrication and
- 43 assembly of entrance door hardware, as well as procedures and diagrams.

44 **1.5 INFORMATIONAL SUBMITTALS**

- 45 A. Energy Performance Certificates: NFRC-certified energy performance values from manufacturer.
- 46 B. Product test reports.
- 47 C. Field quality-control reports.
- 48 D. Sample warranties.

49 **1.6 CLOSEOUT SUBMITTALS**

- 50 A. Maintenance data.

- 1 **1.7 QUALITY ASSURANCE**
2 A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by
3 manufacturer.
4 B. Testing Agency Qualifications: Qualified according to ASTM E 699 for testing indicated.
5 C. Product Options: Information on Drawings and in Specifications establishes requirements for aesthetic
6 effects and performance characteristics of assemblies. Aesthetic effects are indicated by dimensions,
7 arrangements, alignment, and profiles of components and assemblies as they relate to sightlines, to one
8 another, and to adjoining construction.
9 1. Do not change intended aesthetic effects, as judged solely by Architect, except with Architect's
10 approval. If changes are proposed, submit comprehensive explanatory data to Architect for review.

- 11 **1.8 WARRANTY**
12 A. Special Warranty: Installer agrees to repair or replace components of aluminum-framed entrances and
13 storefronts that do not comply with requirements or that fail in materials or workmanship within specified
14 warranty period.
15 1. Warranty Period: 10 years from date of Substantial Completion.
16 B. Special Finish Warranty: Standard form in which manufacturer agrees to repair finishes or replace aluminum
17 that shows evidence of deterioration of factory-applied finishes within specified warranty period.
18 1. Warranty Period: 10 years from date of Substantial Completion.

19 **PART 2 - PRODUCTS**

- 20 **2.1 PERFORMANCE REQUIREMENTS**
21 A. General Performance: Comply with performance requirements specified, as determined by testing of
22 aluminum-framed entrances and storefronts representing those indicated for this Project without failure due
23 to defective manufacture, fabrication, installation, or other defects in construction.
24 1. Aluminum-framed entrances and storefronts shall withstand movements of supporting structure
25 including, but not limited to, story drift, twist, column shortening, long-term creep, and deflection from
26 uniformly distributed and concentrated live loads.
27 2. Failure also includes the following:
28 a. Thermal stresses transferring to building structure.
29 b. Glass breakage.
30 c. Noise or vibration created by wind and thermal and structural movements.
31 d. Loosening or weakening of fasteners, attachments, and other components.
32 e. Failure of operating units.
33 B. Structural Loads:
34 1. Other Design Loads: 5 psf for interior storefront loads; 25 psf for exterior storefront loads.
35 C. Air Infiltration: Test according to ASTM E 283 for infiltration as follows:
36 1. Fixed Framing and Glass Area:
37 a. Maximum air leakage of 0.06 cfm/sq. ft. at a static-air-pressure differential of 1.57 lbf/sq. ft..
38 2. Entrance Doors:
39 a. Pair of Doors: Maximum air leakage of 1.0 cfm/sq. ft. at a static-air-pressure differential of
40 1.57 lbf/sq. ft.
41 b. Single Doors: Maximum air leakage of 0.5 cfm/sq. ft. at a static-air-pressure differential of
42 1.57 lbf/sq. ft.
43 3. Temperature Change: 120 deg F, ambient; 180 deg F, material surfaces.
44

- 1 **2.2 MANUFACTURERS**
- 2 A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may
- 3 be incorporated into the Work include, but are not limited to the following:
- 4 1. EFCO Corporation.
- 5 2. Kawneer North America.
- 6 3. Tubelite Inc.
- 7 **2.3 INTERIOR STOREFRONT FRAMING**
- 8 A. Basis of Design: Kawneer North America; TriFab 451-Series, front glazed, with SSG in selected locations,
- 9 per the drawings.
- 10 B. Framing Members: Manufacturer's extruded- or formed-aluminum framing members of thickness required
- 11 and reinforced as required to support imposed loads.
- 12 1. Construction: Non-thermal.
- 13 2. Glazing System: Retained mechanically with gaskets on four sides.
- 14 3. Glazing Plane: Front.
- 15 4. Finish: Baked-enamel finish.
- 16 5. Fabrication Method: Field-fabricated stick system.
- 17 C. Backer Plates: Manufacturer's standard, continuous backer plates for framing members, if not integral,
- 18 where framing abuts adjacent construction.
- 19 D. Brackets and Reinforcements: Manufacturer's standard high-strength aluminum with nonstaining,
- 20 nonferrous shims for aligning system components.
- 21 E. Materials:
- 22 1. Aluminum: Alloy and temper recommended by manufacturer for type of use and finish indicated.
- 23 a. Sheet and Plate: ASTM B 209.
- 24 b. Extruded Bars, Rods, Profiles, and Tubes: ASTM B 221.
- 25 c. Extruded Structural Pipe and Tubes: ASTM B 429/B 429M.
- 26 d. Structural Profiles: ASTM B 308/B 308M.
- 27 **2.4 ENTRANCE DOOR SYSTEMS**
- 28 A. Entrance Doors: Manufacturer's standard glazed entrance doors for manual-swing operation.
- 29 1. Door Construction: 1-3/4-inch overall thickness, with minimum 0.125-inch-thick, extruded-aluminum
- 30 tubular rail and stile members. Mechanically fasten corners with reinforcing brackets that are deeply
- 31 penetrated and fillet welded or that incorporate concealed tie rods.
- 32 2. Door Design: Narrow style. 2 1/2 inches wide stile. Coordinate with hardware space requirement.
- 33 3. Glazing Stops and Gaskets: Square, snap-on, extruded-aluminum stops and preformed gaskets.
- 34 a. Provide non removable glazing stops on outside of door.
- 35 **2.5 ENTRANCE DOOR HARDWARE**
- 36 A. Entrance Door Hardware: Hardware not specified in this Section is specified in Section 08 71 00 "Door
- 37 Hardware."
- 38 **2.6 GLAZING**
- 39 A. Glazing: Comply with Section 08 80 00 "Glazing."
- 40 B. Glazing Gaskets: Manufacturer's standard sealed-corner pressure-glazing system of black, resilient
- 41 elastomeric glazing gaskets, setting blocks, and shims or spacers.
- 42 C. Glazing Sealants: As recommended by manufacturer.
- 43 1. Sealant shall have a VOC content of 250 g/L or less.~\$~45~S\$
- 44 **2.7 FABRICATION**
- 45 A. Form or extrude aluminum shapes before finishing.
- 46 B. Weld in concealed locations to greatest extent possible to minimize distortion or discoloration of finish.
- 47 Remove weld spatter and welding oxides from exposed surfaces by descaling or grinding.
- 48 C. Fabricate components that, when assembled, have the following characteristics:
- 49 1. Profiles that are sharp, straight, and free of defects or deformations.
- 50 2. Accurately fitted joints with ends coped or mitered.
- 51 3. Physical and thermal isolation of glazing from framing members.
- 52 4. Accommodations for thermal and mechanical movements of glazing and framing to maintain required
- 53 glazing edge clearances.
- 54 5. Provisions for field replacement of glazing from exterior.
- 55 6. Fasteners, anchors, and connection devices that are concealed from view to greatest extent possible.
- 56 D. Mechanically Glazed Framing Members: Fabricate for flush glazing without projecting stops.

- 1 E. Entrance Doors: Reinforce doors as required for installing entrance door hardware.
- 2 F. Entrance Door Hardware Installation: Factory install entrance door hardware to the greatest extent possible.
- 3 Cut, drill, and tap for factory-installed entrance door hardware before applying finishes.
- 4 G. After fabrication, clearly mark components to identify their locations in Project according to Shop Drawings.

5 **2.8 ALUMINUM FINISHES**

- 6 A. Fluoropolymer resin based two coat finish containing 70% "Kynar 500" resin to match PPG Duranar
- 7 Sunstorm Pewter:

8 **PART 3 - EXECUTION**

9 **3.1 INSTALLATION**

- 10 A. General:
 - 11 1. Comply with manufacturer's written instructions.
 - 12 2. Do not install damaged components.
 - 13 3. Fit joints to produce hairline joints free of burrs and distortion.
 - 14 4. Rigidly secure nonmovement joints.
 - 15 5. Install anchors with separators and isolators to prevent metal corrosion and electrolytic deterioration
 - 16 and to prevent impeding movement of moving joints.
 - 17 6. Seal perimeter and other joints watertight unless otherwise indicated.
- 18 B. Metal Protection:
 - 19 1. Where aluminum is in contact with dissimilar metals, protect against galvanic action by painting contact
 - 20 surfaces with materials recommended by manufacturer for this purpose or by installing nonconductive
 - 21 spacers.
 - 22 2. Where aluminum is in contact with concrete or masonry, protect against corrosion by painting contact
 - 23 surfaces with bituminous paint.
- 24 C. Set continuous sill members and flashing in full sealant bed as specified in Section 07 92 00 "Joint Sealants"
- 25 to produce weathertight installation.
- 26 D. Install components plumb and true in alignment with established lines and grades.
- 27 E. Install operable units level and plumb, securely anchored, and without distortion. Adjust weather-stripping
- 28 contact and hardware movement to produce proper operation.
- 29 F. Install glazing as specified in Section 08 80 00 "Glazing."
- 30 G. Entrance Doors: Install doors to produce smooth operation and tight fit at contact points.
 - 31 1. Exterior Doors: Install to produce weathertight enclosure and tight fit at weather stripping.
 - 32 2. Field-Installed Entrance Door Hardware: Install surface-mounted entrance door hardware according
 - 33 to entrance door hardware manufacturers' written instructions using concealed fasteners to greatest
 - 34 extent possible.

- 3.5 [FIELD QUALITY CONTROL](#)

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:
 - 1. Field-glazed, four-sided structural-sealant-glazed curtain-wall assemblies.
- B. Related Requirements:
 - 1. Section 08 44 13 "Glazed Aluminum Curtain Walls" for conventionally glazed curtain walls.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at Project site.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
- B. Shop Drawings: For structural-sealant-glazed curtain walls. Include plans, elevations, sections, full-size details, and attachments to other work.
 - 1. Include details of provisions for assembly expansion and contraction and for draining moisture occurring within the assembly to the exterior.
 - 2. Include full-size isometric details of each vertical-to-horizontal intersection of structural-sealant-glazed curtain walls, showing the following:
 - a. Joinery, including concealed welds.
 - b. Anchorage.
 - c. Expansion provisions.
 - d. Glazing.
 - e. Flashing and drainage.
 - 3. Show connection to and continuity with adjacent thermal, weather, air, and vapor barriers.

ISSUED FOR FINAL BID

JUDGE DOYLE SQUARE - BLOCK 88 PARKING GARAGE

CONTRACT # 7952 MUNIS # 11471

084423 - 1

STRUCTURAL-SEALANT-GLAZED CURTAIN WALLS

- 1 C. Samples for Verification: For each type of exposed finish required, in manufacturer's standard sizes.
2 D. Fabrication Sample: Of each vertical-to-horizontal intersection of assemblies, made from 12-inch lengths of
3 full-size components and showing details of the following:
4 1. Joinery, including concealed welds.
5 2. Anchorage.
6 3. Expansion provisions.
7 4. Glazing.
8 5. Flashing and drainage.
9 E. Delegated-Design Submittal: For structural-sealant-glazed curtain walls indicated to comply with
10 performance requirements and design criteria, including analysis data signed and sealed by the qualified
11 professional engineer responsible for their preparation.

12 **1.5 INFORMATIONAL SUBMITTALS**

- 13 A. Energy Performance Certificates: For structural-sealant-glazed curtain walls, accessories, and components
14 from manufacturer.
15 1. Basis for Certification: NFRC-certified energy performance values for each structural-sealant-glazed
16 curtain wall.
17 B. Product Test Reports: For structural-sealant-glazed curtain walls, for tests performed by manufacturer and
18 witnessed by a qualified testing agency.
19 C. Sample Warranties: For special warranties.

20 **1.6 QUALITY ASSURANCE**

- 21 A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by
22 manufacturer.
23 B. Testing Agency Qualifications: Qualified according to ASTM E 699 for testing indicated and accredited by
24 IAS or ILAC Mutual Recognition Arrangement as complying with ISO/IEC 17025.
25 C. Product Options: Information on Drawings and in Specifications establishes requirements for aesthetic
26 effects and performance characteristics of assemblies. Aesthetic effects are indicated by dimensions,
27 arrangements, alignment, and profiles of components and assemblies as they relate to sightlines, to one
28 another, and to adjoining construction.
29 1. Do not change intended aesthetic effects, as judged solely by Architect, except with Architect's
30 approval. If changes are proposed, submit comprehensive explanatory data to Architect for review.
31 D. Structural-Sealant Glazing: Comply with ASTM C 1401 for design and installation of curtain-wall assemblies.

32 **1.7 WARRANTY**

- 33 A. Special Warranty: Manufacturer agrees to repair or replace components of glazed aluminum curtain wall
34 that do not comply with requirements or that fail in materials or workmanship within specified warranty period.
35 1. Failures include, but are not limited to, the following:
36 a. Structural failures including, but not limited to, excessive deflection.
37 b. Noise or vibration created by wind and thermal and structural movements.
38 c. Deterioration of metals, metal finishes, and other materials beyond normal weathering.
39 d. Water penetration through fixed glazing and framing areas.
40 e. Failure of operating components.
41 2. Warranty Period: 10 years from date of Substantial Completion.
42 B. Special Finish Warranty: Standard form in which manufacturer agrees to repair finishes or replace aluminum
43 that shows evidence of deterioration of factory-applied finishes within specified warranty period.
44 1. Deterioration includes, but is not limited to, the following:
45 a. Color fading more than 5 Hunter units when tested according to ASTM D 2244.
46 b. Chalking in excess of a No. 8 rating when tested according to ASTM D 4214.
47 c. Cracking, checking, peeling, or failure of paint to adhere to bare metal.
48 2. Warranty Period: 20 years from date of Substantial Completion.
49

1 **PART 2 - PRODUCTS**

2 **2.1 PERFORMANCE REQUIREMENTS**

- 3 A. Delegated Design: Engage a qualified professional engineer, as defined in Section 01 40 00 "Quality
4 Requirements," to design aluminum-framed entrances and storefronts.
- 5 B. General Performance: Comply with performance requirements specified, as determined by testing of
6 structural-sealant-glazed curtain walls representing those indicated for this Project without failure due to
7 defective manufacture, fabrication, installation, or other defects in construction.
- 8 1. Structural-sealant-glazed curtain walls shall withstand movements of supporting structure including,
9 but not limited to, story drift, twist, column shortening, long-term creep, and deflection from uniformly
10 distributed and concentrated live loads.
- 11 2. Failure also includes the following:
- 12 a. Thermal stresses transferring to building structure.
- 13 b. Glass breakage.
- 14 c. Noise or vibration created by wind and thermal and structural movements.
- 15 d. Loosening or weakening of fasteners, attachments, and other components.
- 16 e. Failure of operating units.
- 17 C. Structural Loads:
- 18 1. Wind Loads: 40 psf.
- 19 2. Other Design Loads: As indicated on Drawings.
- 20 D. Deflection of Framing Members: At design wind pressure, as follows:
- 21 1. Deflection Normal to Wall Plane: Limited to 1/175 of clear span for spans up to 13 feet 6 inches and
22 to 1/240 of clear span plus 1/4 inch for spans greater than 13 feet 6 inches or an amount that restricts
23 edge deflection of individual glazing lites to 3/4 inch, whichever is less.
- 24 2. Deflection Parallel to Glazing Plane: Limited to amount not exceeding that which reduces glazing bite
25 to less than 75 percent of design dimension and that which reduces edge clearance between framing
26 members and glazing or other fixed components to less than 1/8 inch.
- 27 a. Operable Units: Provide a minimum 1/16-inch clearance between framing members and
28 operable units.
- 29 3. Cantilever Deflection: Where framing members overhang an anchor point, as follows:
- 30 a. Perpendicular to Plane of Wall: No greater than 1/240 of clear span plus 1/4-inch for spans
31 greater than 11 feet 8-1/4 inches or 1/175 times span, for spans less than 11 feet 8-1/4 inches.
- 32 E. Structural: Test according to ASTM E 330 as follows:
- 33 1. When tested at positive and negative wind-load design pressures, assemblies do not evidence
34 deflection exceeding specified limits.
- 35 2. When tested at 150 percent of positive and negative wind-load design pressures, assemblies,
36 including anchorage, do not evidence material failures, structural distress, or permanent deformation
37 of main framing members exceeding 0.2 percent of span.
- 38 3. Test Durations: As required by design wind velocity, but not less than 10 seconds.
- 39 F. Air Infiltration: Test according to ASTM E 283 for infiltration as follows:
- 40 1. Fixed Framing and Glass Area:
- 41 a. Maximum air leakage of 0.06 cfm/sq. ft. at a static-air-pressure differential of 6.24 lbf/sq. ft..
- 42 G. Water Penetration under Static Pressure: Test according to ASTM E 331 as follows:
- 43 1. No evidence of water penetration through fixed glazing and framing areas when tested according to
44 a minimum static-air-pressure differential of 20 percent of positive wind-load design pressure, but not
45 less than 15 lbf/sq. ft.
- 46
- 47 H. Water Penetration under Dynamic Pressure: Test according to AAMA 501.1 when tested with pressures as
48 per G.1., above:
- 49
- 50 I. Interstory Drift: Accommodate design displacement of adjacent stories indicated.
- 51 1. Design Displacement: As indicated on Drawings.
- 52 2. Test Performance: Complying with criteria for passing based on building occupancy type when tested
53 according to AAMA 501.4 at design displacement and 1.5 times the design displacement.
- 54 J. Energy Performance: Certify and label energy performance according to NFRC as follows:
- 55 1. Thermal Transmittance (U-factor): Fixed glazing and framing areas shall have U-factor of not more
56 than 0.36 Btu/sq. ft. x h x degree F as determined according to NFRC 100.
- 57 2. Solar Heat Gain Coefficient: Fixed glazing and framing areas shall have a solar heat gain coefficient
58 of no greater than 0.40] as determined according to NFRC 200.
- 59 3. Condensation Resistance: Fixed glazing and framing areas shall have an NFRC-certified
60 condensation resistance rating of no less than 60 as determined according to NFRC 500.

- 1 K. Thermal Movements: Allow for thermal movements resulting from ambient and surface temperature
2 changes:
3 1. Temperature Change: 130 degree F, ambient; 180 degree F, material surfaces.
4 2. Thermal Cycling: No buckling; stress on glass; sealant failure; excess stress on framing, anchors,
5 and fasteners; or reduction of performance when tested according to AAMA 501.5.
6 a. High Exterior Ambient-Air Temperature: That which produces an exterior metal-surface
7 temperature of 110 degree F.
8 b. Low Exterior Ambient-Air Temperature: -10 degree F.
9 L. Structural-Sealant Joints::
10 1. Designed to carry gravity loads of glazing.
11 2. Designed to produce tensile or shear stress of less than 20 psi.
12 M. Structural Sealant: Capable of withstanding tensile and shear stresses imposed by structural-sealant-glazed
13 curtain walls without failing adhesively or cohesively. When tested for preconstruction adhesion and
14 compatibility, cohesive failure of sealant shall occur before adhesive failure.
15 1. Adhesive failure occurs when sealant pulls away from substrate cleanly, leaving no sealant material
16 behind.
17 2. Cohesive failure occurs when sealant breaks or tears within itself but does not separate from each
18 substrate because sealant-to-substrate bond strength exceeds sealant's internal strength.

19 2.2 MANUFACTURERS

- 20 A. Source Limitations: Obtain all components of curtain-wall system, including framing and accessories, from
21 single manufacturer.
22 B. Basis of Design: Oldcastle Building Envelope Reliance Cassette – 4- sided structurally glazed system.
23 C. Design:
24 1. Shop glazed infill onto frames structural glazing tape or structural silicone. The pre-glazed frames
25 are field applied to a structural grid of curtain wall framing. Overall system depth as indicated or
26 required.
27 2. The system shall include thermally improved door framing adaptors. Provide exterior face caps as
28 detailed.

29 2.3 FRAMING

- 30 A. Framing Members: Manufacturer's extruded- or formed-aluminum framing members of thickness required
31 and reinforced as required to support imposed loads.
32 1. Glazing System: Retained with structural sealant on four sides.
33 2. Finish: High-performance organic finish.
34 3. Fabrication Method: Either factory- or field-fabricated system.
35 B. Brackets and Reinforcements: Manufacturer's standard high-strength aluminum with nonstaining,
36 nonferrous shims for aligning system components.
37 C. Materials:
38 1. Aluminum: Alloy and temper recommended by manufacturer for type of use and finish indicated.
39 a. Sheet and Plate: ASTM B 209.
40 b. Extruded Bars, Rods, Profiles, and Tubes: ASTM B 221.
41 c. Extruded Structural Pipe and Tubes: ASTM B 429/B 429M.
42 d. Structural Profiles: ASTM B 308/B 308M.

43 2.4 ENTRANCES

- 44 A. Entrances: Comply with Section 08 41 13 "Aluminum-Framed Entrances and Storefronts."
45 a. Structural Profiles: ASTM B 308/B 308M.

46 2.5 GLAZING

- 47 A. Glazing: Comply with Section 08 80 00 "Glazing."
48 B. Structural Glazing Sealants (SEALANT-6): ASTM C 1184, chemically curing silicone formulation that is
49 compatible with system components with which it comes in contact, specifically formulated and tested for
50 use as structural sealant and approved by structural-sealant manufacturer for use in curtain-wall assembly
51 indicated.
52 1. Color: As selected by Architect from manufacturer's full range of colors.
53 C. Weatherseal Sealants: ASTM C 920 for Type S; Grade NS; Class 25; Uses NT, G, A, and O; chemically
54 curing silicone formulation that is compatible with structural sealant and other system components with which
55 it comes in contact; recommended by structural-sealant, weatherseal-sealant, and structural-sealant-glazed
56 curtain-wall manufacturers for this use.
57 1. Color: Match structural sealant.

ISSUED FOR FINAL BID

JUDGE DOYLE SQUARE - BLOCK 88 PARKING GARAGE

CONTRACT # 7952 MUNIS # 11471

084423 - 4

STRUCTURAL-SEALANT-GLAZED CURTAIN

WALLS

1 D. Sealants used inside the weatherproofing system shall have a VOC content of 250 g/L or less.

2 **2.6 ACCESSORIES**

3 A. Fasteners and Accessories: Manufacturer's standard corrosion-resistant, nonstaining, nonbleeding
4 fasteners and accessories compatible with adjacent materials.

5 1. Use self-locking devices where fasteners are subject to loosening or turning out from thermal and
6 structural movements, wind loads, or vibration.

7 2. Reinforce members as required to receive fastener threads.

8 B. Anchors: Three-way adjustable anchors with minimum adjustment of 1 inch that accommodate fabrication
9 and installation tolerances in material and finish compatible with adjoining materials and recommended by
10 manufacturer.

11 1. Concrete and Masonry Inserts: Hot-dip galvanized cast-iron, malleable-iron, or steel inserts
12 complying with ASTM A 123/A 123M or ASTM A 153/A 153M requirements.

13 **2.7 FABRICATION**

14 A. Form or extrude aluminum shapes before finishing.

15 B. Weld in concealed locations to greatest extent possible to minimize distortion or discoloration of finish.
16 Remove weld spatter and welding oxides from exposed surfaces by descaling or grinding.

17 C. Fabricate components that, when assembled, have the following characteristics:

18 1. Profiles that are sharp, straight, and free of defects or deformations.

19 2. Accurately fitted joints with ends coped or mitered.

20 3. Physical and thermal isolation of glazing from framing members.

21 4. Accommodations for thermal and mechanical movements of glazing and framing to maintain required
22 glazing edge clearances.

23 5. Provisions for field replacement of glazing from exterior.

24 6. Fasteners, anchors, and connection devices that are concealed from view to greatest extent possible.

25 D. Factory-Assembled Frame Units:

26 1. Four side structurally glazing is to be in-factory controlled galzing.

27 2. Rigidly secure nonmovement joints.

28 3. Prepare surfaces that are in contact with structural sealant according to sealant manufacturer's
29 written instructions, to ensure compatibility and adhesion.

30 4. Preparation includes, but is not limited to, cleaning and priming surfaces.

31 5. Seal joints watertight unless otherwise indicated.

32 6. Install glazing to comply with requirements in Section 08 80 00 "Glazing." Four sided structural
33 glazed units must be factory glazed.

34 E. After fabrication, clearly mark components to identify their locations in Project according to Shop Drawings.

35 **2.8 ALUMINUM FINISHES**

36 A. High-Performance Organic Finish (AL-1): Two coat fluoropolymer finish complying with AAMA 2605 and
37 containing not less than 70 percent PVDF or FEVE resin by weight. Prepare, pretreat, and apply coating to
38 exposed metal surfaces to comply with coating and resin manufacturers' written instructions.

39 1. Color and Gloss: to match PPG Duranar Sunstorm Pewter (UC 110227F).

40 **PART 3 - EXECUTION**

41 **3.1 EXAMINATION**

42 A. Examine areas, with Installer present, for compliance with requirements for installation tolerances and other
43 conditions affecting performance of the Work.

44 B. Proceed with installation only after unsatisfactory conditions have been corrected.

45 **3.2 PREPARATION**

46 A. Prepare surfaces that are in contact with structural sealant according to sealant manufacturer's written
47 instructions to ensure compatibility and adhesion. Preparation includes, but is not limited to, cleaning and
48 priming surfaces.

49 **3.3 INSTALLATION**

50 A. General:

51 1. Comply with manufacturer's written instructions.

52 2. Do not install damaged components.

- 1 3. Fit joints to produce hairline joints free of burrs and distortion.
- 2 4. Rigidly secure nonmovement joints.
- 3 5. Install anchors with separators and isolators to prevent metal corrosion and electrolytic deterioration
- 4 and to prevent impeding movement of moving joints.
- 5 6. Where welding is required, weld components in concealed locations to minimize distortion or
- 6 discoloration of finish. Protect glazing surfaces from welding.
- 7 7. Seal joints watertight unless otherwise indicated.
- 8 B. Metal Protection:
- 9 1. Where aluminum is in contact with dissimilar metals, protect against galvanic action by painting
- 10 contact surfaces with primer, applying sealant or tape, or installing nonconductive spacers as
- 11 recommended by manufacturer for this purpose.
- 12 2. Where aluminum is in contact with concrete or masonry, protect against corrosion by painting contact
- 13 surfaces with bituminous paint.
- 14 C. Install components plumb and true in alignment with established lines and grades.
- 15 D. Install operable units level and plumb, securely anchored, and without distortion. Adjust weather-stripping
- 16 contact and hardware movement to produce proper operation.
- 17 E. Install glazing as specified in Section 08 80 00 "Glazing."
- 18 1. Prepare surfaces that are in contact with structural sealant according to sealant manufacturer's
- 19 written instructions, to ensure compatibility and adhesion. Preparation includes, but is not limited to,
- 20 cleaning and priming surfaces.
- 21 F. Install weather seal sealant according to Section 07 92 00 "Joint Sealants" and according to sealant
- 22 manufacturer's written instructions, to produce weatherproof joints. Install joint filler behind sealant as
- 23 recommended by sealant manufacturer.

24 3.4 ERECTION TOLERANCES

- 25 A. Erection Tolerances: Install structural-sealant-glazed curtain walls to comply with the following maximum
- 26 tolerances:
- 27 1. Plumb: 1/8 inch in 10 feet; 1/4 inch in 40 feet.
- 28 2. Level: 1/8 inch in 20 feet; 1/4 inch in 40 feet.
- 29 3. Alignment:
- 30 a. Where surfaces abut in line or are separated by reveal or protruding element up to 1/2 inch
- 31 wide, limit offset from true alignment to 1/16 inch.
- 32 b. Where surfaces are separated by reveal or protruding element from 1/2 to 1 inch wide, limit
- 33 offset from true alignment to 1/8 inch.
- 34 c. Where surfaces are separated by reveal or protruding element of 1 inch wide or more, limit
- 35 offset from true alignment to 1/4 inch.
- 36 4. Location: Limit variation from plane to 1/8 inch in 12 feet; 1/2 inch over total length.

37 3.5 FIELD QUALITY CONTROL

- 38 A. Testing Agency: Owner will engage a qualified testing agency to perform tests and inspections.
- 39 B. Test Area: Perform tests on one bay at least 30 feet, by one story.
- 40 C. Field Quality-Control Testing: Perform the following test on representative areas of structural-sealant-glazed
- 41 curtain walls.
- 42 1. Water-Spray Test: Before installation of interior finishes has begun, areas designated by Architect
- 43 shall be tested according to AAMA 501.2 and shall not evidence water penetration.
- 44 a. Perform tests in each test area as directed by Architect.
- 45 2. Air Infiltration: ASTM E 783 at 1.5 times the rate specified for laboratory testing in "Performance
- 46 Requirements" Article but not more than 0.50 cfm/sq. ft..
- 47 a. Perform tests in each test area as directed by Architect.
- 48 3. Water Penetration: ASTM E 1105 at a minimum uniform static-air-pressure differential of 0.67 times
- 49 the static-air-pressure differential specified for laboratory testing in "Performance Requirements"
- 50 Article, but not less than 6.24 lbf/sq. ft., and shall not evidence water penetration.
- 51 D. Structural-Sealant Adhesion: Test structural sealant according to recommendations in ASTM C 1401,
- 52 Destructive Test Method A, "Hand Pull Tab (Destructive)," Appendix X2 and Shop Glazing Considerations.
- 53 1. Test a minimum of one area on each building facade.
- 54 2. Repair installation areas damaged by testing.
- 55 E. Structural-sealant-glazed curtain walls will be considered defective if they do not pass tests and inspections.
- 56 F. Prepare test and inspection reports.

40 1. GENERAL

41 1.1 CONDITIONS

- 42 A. Conditions of the contract (General and Supplementary Conditions) and Division One General
- 43 Requirements, govern the work of this section.
- 44 B. This section includes all material, and related service necessary to furnish all finish hardware indicated on
- 45 the drawings, or specified herein.
- 46 C. Furnish UL listed hardware for all labeled and 20 min. openings in conformance with the requirements for
- 47 the class of opening scheduled. Underwriters' requirements shall have precedence over specification where
- 48 conflicts exist.
- 49 D. All work shall be in accordance with all applicable state and local building codes. Code requirements shall
- 50 have precedence over this specification where conflicts exist.

51 1.2 WORK INCLUDED

- 1 A. This section includes the following:
- 2 1. Furnish door hardware (for hollow metal and aluminum doors) specified herein, listed in the hardware
- 3 schedule, and/or required by the drawings.
- 4 2. Cylinders for Aluminum Doors
- 5 3. Thresholds and Weather-stripping (Aluminum frame seals to be provided by aluminum door supplier)
- 6 4. Electro-Mechanical Devices
- 7 5. Access Control components and or systems specified within this section.
- 8 B. Where items of hardware are not definitely or correctly specified and is required for the intended service,
- 9 such omission, error or other discrepancy should be directed to the Architect prior to the bid date for
- 10 clarification by addendum. Otherwise furnish such items in the type and quantity established by this
- 11 specification for the appropriate service intended.
- 12 **1.3 RELATED WORK IN OTHER SECTIONS**
- 13 A. This section includes coordination with related work in the following sections:
- 14 1. Division 8 Section "Hollow Metal Doors and Frames".
- 15 2. Division 8 Section "Aluminum Entrances and Storefronts"
- 16 3. Division 28 Sections "Electrical".
- 17 **1.4 REFERENCES**
- 18 A. Publications of agencies and organizations listed below form a part of this specification section to the extent
- 19 referenced.
- 20 1. DHI - Recommended Locations for Builders' Hardware.
- 21 2. NFPA 80 - Standards for Fire Doors and Windows.
- 22 3. NFPA 101 - Code for Safety to Life from Fire in Buildings and Structures.
- 23 4. UL - Building Material Directory.
- 24 5. DHI - Door and Hardware Institute
- 25 6. WHI - Warnock Hersey
- 26 7. BHMA - Builders Hardware Manufacturers Association
- 27 8. ANSI – American National Standards Institute
- 28 9. IBC 2009 - International Building Code 2009 Edition (as amended by local building code)
- 29 **1.5 SUBMITTALS**
- 30 A. Submit detailed hardware schedule in quantities as required by Division 1 - General Conditions.
- 31 B. Schedule format shall be consistent with recommendations for a vertical format as set forth in the Door &
- 32 Hardware Institute's (DHI) publication "Sequence and Format for the Hardware Schedule". Hardware sets
- 33 shall be consolidated to group multiple door openings which share similar hardware requirements.
- 34 Schedule shall include the following information:
- 35 1. Door number, location, size, handing, and rating.
- 36 2. Door and frame material, handing.
- 37 3. Degree of swing.
- 38 4. Manufacturer
- 39 5. Product name and catalog number
- 40 6. Function, type and style
- 41 7. Size and finish of each item
- 42 8. Mounting heights
- 43 9. Explanation of abbreviations, symbols, etc.
- 44 10. Numerical door index, indicating the hardware set/ group number for each door.
- 45 C. When universal type door closers are to be provided, the schedule shall indicate the application method to
- 46 be used for installation at each door: (regular arm, parallel arm, or top jamb).
- 47 D. The schedule will be prepared under the direct supervision of a certified Architectural Hardware Consultant
- 48 (AHC) employed by the hardware distributor. The hardware schedule shall be signed and embossed with

- 1 the DHI certification seal of the supervising AHC. The supervising AHC shall attend any meetings related to
2 the project when requested by the architect.
- 3 E. Review drawings from related trades as required to verify compatibility with specified hardware. Indicate
4 unsuitable or in compatible items, and proposed substitutions in the hardware schedule.
- 5 F. Provide documentation for all hardware to be furnished on labeled fire doors indicating compliance with
6 positive pressure fire testing UL 10C.
- 7 G. Furnish manufacturers' catalog data for each item of hardware in quantities as required by Division 1 -
8 General Conditions.
- 9 H. Submit a sample of each type of hardware requested by the architect. Samples shall be of the same finish,
10 style, and function as specified herein. Tag each sample with its permanent location so that it may be used
11 in the final work.
- 12 I. After final approved schedule is returned, transmit corrected copies for distribution and field use in
13 quantities as required by Division 1 - General Conditions.
- 14 J. Furnish approved hardware schedules, template lists, and pertinent templates as requested by related
15 trades.
- 16 K. Furnish necessary diagrams, schematics, voltage and amperage requirements for all electro-mechanical
17 devices or systems as required by related trades. Wiring diagrams shall be opening specific and include
18 both a riser diagram and point to point diagram showing all wiring terminations.
- 19 L. After receipt of approved hardware schedule, Hardware supplier shall initiate a meeting including the
20 owner's representative to determine keying requirements. Upon completion of the initial key meeting,
21 hardware supplier shall prepare a proposed key schedule with symbols and abbreviations as set forth in the
22 door and hardware institute's publication "Keying Procedures, Systems, and Nomenclature". Submit copies
23 of owner approved key schedule for review and field use in quantities as required by Division 1 - General
24 Conditions. Wiring diagrams shall be included in final submittals transmitted for distribution and field use.
- 25 1.6 QUALITY ASSURANCE
- 26 A. Manufacturers and model numbers listed are to establish a standard of function and quality. Similar items
27 by approved manufacturers that are equal in design, function, and quality, may be considered for prior
28 approval of the architect, provided the required data and physical samples are submitted for approval as set
29 forth in Division One General Requirements.
- 30 B. Where indicated in this specification, products shall be independently certified by ANSI for compliance with
31 relevant ANSI/BHMA standards A156.1 - A156.36 – Standards for Hardware and Specialties. All products
32 shall meet or exceed certification requirements for the respective grade indicated within this specification.
33 Supplier shall provide evidence of certification when requested by the architect.
- 34 C. Obtain each type of hardware (hinges, latch & locksets, exit devices, closers, etc.) from a single
35 manufacturer, although several may be indicated as offering products complying with requirements.
- 36 D. All hardware items shall be manufactured no earlier than 6 months prior to delivery to site.
- 37 E. Installation of hardware shall be installed or directly supervised and inspected by a skilled installer certified
38 by the manufacturer of locksets, door closers, and exit devices used on the project, or with not less than 3
39 years' experience in successful completion of projects similar in size and scope.
- 40 F. Provide hardware for all labeled fire doors, which complies with positive pressure fire testing UL 10C.
- 41 G. Comply with all applicable provisions of the standards referenced within section 1.4 of this specification.

1 H. Hardware supplier shall participate when reasonably requested to meet with the contractor and or architect
2 to inspect any claim for incorrect or non-functioning materials; following such inspection, the hardware
3 supplier shall provide a written statement documenting the cause and proposed remedy of any unresolved
4 items.

5 1.7 DELIVERY, STORAGE AND HANDLING

6 A. Hardware supplier shall deliver hardware to the job site unless otherwise specified.

7 B. All hardware shall be delivered in manufacturers' original cartons and shall be clearly marked with set and
8 door number.

9 C. Coordinate with contractor prior to hardware delivery and recommend secure storage and protection
10 against loss and damage at job site.

11 D. Contractor shall receive all hardware and provide secure and proper protection of all hardware items to
12 avoid delays caused by lost or damaged hardware. Contractor shall report shortages to the Architect and
13 hardware supplier immediately after receipt of material at the job site.

14 E. Coordinate with related trades under the direction of the contractor for delivery of hardware items
15 necessary for factory installation.

16 1.8 PRE-INSTALLATION MEETING

17 A. Schedule a hardware pre-installation meeting on site to review and discuss the installation of continuous
18 hinges, locksets, door closers, exit devices, overhead stops, and electromechanical door hardware.

19 B. Meeting attendees shall be notified 7 days in advance and shall include: Architect, Contractor, Door
20 Hardware Installers (including low voltage hardware), Manufacturers representatives for above hardware
21 items, and any other effected subcontractors or suppliers.

22 C. All attendees shall be prepared to distribute installation manuals, hardware schedules, templates, and
23 physical hardware samples.

24 1.9 WARRANTY

25 A. All hardware items shall be warranted against defects in material and workmanship as set forth in Division
26 One General Requirements.

27 B. Repair, replace, or otherwise correct deficient materials and workmanship without additional cost to owner.

28 PART 2 - PRODUCTS

29 2.1 FASTENERS

30 A. All exposed fasteners shall be Phillips head or as otherwise specified, and shall match the finish of the
31 adjacent hardware. All fasteners ex-posed to the weather shall be non-ferrous or stainless steel. Furnish
32 correct fasteners to accommodate surrounding conditions.

33 B. Coordinate required reinforcements for doors and frames. Seek approval of the architect prior to furnishing
34 through-bolts. Furnish through-bolts as required for materials not readily reinforced.

35 2.2 BUTT HINGES

36 A. Acceptable manufacturers and respective catalog numbers:

	<u>Ives</u>	<u>Stanley</u>	<u>Hager</u>	<u>McKinney</u>
1. Standard Weight, Ball Bearing, Non-Ferrous	5BB1	FBB191	BB1191	TB2314
2. Heavy Weight, Ball Bearing, Non-Ferrous	5BB1HW	FBB199	BB1199	T4B3386

- 1 B. Hinges shall be independently certified by ANSI for compliance with ANSI A156.1 (2006). Hinges shall
2 meet or exceed the following ANSI grade requirements as indicated below:
- 3 1. Standard Weight, 2 Ball Bearing Hinges: Grade 2
4 2. Heavy Weight, 4 Ball Bearing Hinges: Grade 1
- 5 C. Unless otherwise specified, furnish the following hinge quantities for each door leaf.
- 6 1. 3 hinges for doors up to 90 inches.
7 2. 1 additional hinge for every 30 inch on doors over 90 inches.
8 3. 4 hinges for Dutch door applications.
- 9 D. Unless otherwise specified, top and bottom hinges shall be located as specified in division 8 Section
10 "Hollow Metal Doors and Frames". Intermediate hinges shall be located equidistant from others.
- 11 E. Unless otherwise specified, furnish hinge weight and type as follows:
- 12 1. Standard weight: ball bearing hinge 5BB1 for interior opening over 36 through 40 inches wide without a
13 door closer, and for interior openings through 40 inches wide with a door closer.
14 2. Heavyweight: 4 ball bearing hinge 5BB1HW for interior openings over 40 inches wide, and for all
15 vestibule doors.
16 3. Heavyweight: 4 ball bearing hinge 5BB1HWss for exterior openings unless otherwise listed in groups.
- 17 F. Unless otherwise specified, furnish hinges fabricated from \neq stainless steel.
- 18 G. Unless otherwise specified, furnish hinges in the following sizes:
- 19 1. 4-1/2" x 4-1/2" 1-3/4" thick doors
- 20 I. Unless otherwise specified, furnish hinges with flat button tips with non-rising pins at interior doors, non-
21 removable loose pins (NRP) at exterior and out-swinging interior doors.
- 22 J. Unless otherwise specified, furnish all hinges to template standards.

23 2.3 CONTINUOUS GEARED HINGES

- 24 A. Acceptable manufacturers and respective catalog numbers:
- | | | | |
|--------------|-------------|--------------|----------------|
| | <u>Ives</u> | <u>HAGER</u> | <u>STANLEY</u> |
| Full Mortise | 112HD | 780-112HD | 661HD |
- 25 B. Hinges shall be independently certified by ANSI for compliance with ANSI A156.26, Grade 1 (2012).
- 26 C. Continuous hinges shall be geared type hinge providing full height door support up to 600 lbs.
- 27 D. Hinge shall be non-handed with symmetrical template hole pattern and factory drilled.
- 28 E. Hinge to be able to carry Warnock Hersey Int. or UL for fire rated doors and frames up to 90 minutes.
- 29 F. Provide machine screws for doors which have been reinforced to accept machine screws.
- 30 G. Note: Fire label for doors and frames should be placed on the header and top rail of fire rated doors and
31 frames.

32 2.4 POWER TRANSFERS

- 33 A. Acceptable manufacturers and respective catalog numbers:

Von Duprin

- 1. Concealed Two Wire EPT-2
- 2. Concealed Ten Wire EPT-10
- 3. Armored Door Cord Four Wire 788C-12
- 4. Armored Door Cord Four Wire 788C-18

- 1 B. Door cords shall be armored cable with screw on caps.
- 2 C. Concealed power transfers shall be concealed in the door and frame when the door is closed.
- 3 D. Concealed power transfers shall have a steel tube to protect wires from being cut.
- 4 E. Concealed power transfers with spring tubes shall be rejected.
- 5 F. Concealed power transfers shall be supplied with a mud box to house all terminations.

6 **2.5 FLUSH BOLTS AND DUST PROOF STRIKES**

- 7 A. Acceptable manufacturers and respective catalog numbers:

	<u>Ives</u>	<u>Door Controls</u>	<u>Hager</u>
1. Dust Proof Strike	DP2	80	280X
2. Auto Flush Bolt (Metal Door)	FB31P	842	292D
3. Manual Flush Bolt	FB458	780	282D

- 8 B. Unless otherwise specified, provide 12" rods for manual flush bolts for door 7'6" or less, 24" top rods for
- 9 doors over 7'6" to 8'6".
- 10 C. Unless otherwise specified, provide doors over 8'6" with automatic top bolts.
- 11 D. Provide automatic flush bolts where required to maintain fire door listing and or egress requirements on
- 12 pairs of doors.
- 13 E. All flush-bolt applications shall be UL listed to be installed with top flush-bolt only. Provide auxiliary fire bolt
- 14 as required for fire rated openings where less bottom bolt has been specified.
- 15 F. Provide all bottom flush bolts with non-locking dust proof strikes.

16 **2.6 EXIT DEVICES**

- 17 A. Acceptable manufacturers and respective catalog numbers:

	<u>Von Duprin</u>	<u>No Substitution</u>
1. Wide Stile, Push Pad	98 / 99 Series	
2. Lever Trim	996 Series	

- 18 A. Exit devices shall be independently certified by ANSI for compliance with ANSI A156.3, Grade 1 (2008).
- 19 B. Obtain exit devices from a single manufacturer, although several may be indicated as offering products
- 20 complying with requirements.
- 21 C. All exit devices shall be equipped with a sound-dampening feature to reduce touch pad return noise.
- 22 D. All exit devices shall be provided with flush end caps to reduce potential damage from impact.
- 23 E. All exit devices shall be provided with dead-locking latch bolts to insure security.

- 1 F. All exit devices shall be U.L. listed for accident hazard. Exit device for use on fire doors shall also be U.L.
2 listed for fire exit hardware.
- 3 G. Provide optional strikes, special length rods, and adapter plates to accommodate door and frame
4 conditions. Provide narrow style series devices in lieu of wide stile series devices where optional strikes
5 will not accommodate door and frame conditions.
- 6 H. Coordinate with related trades to insure adequate clearance and reinforcement is provided in doors and
7 frames. Provide thru bolts as required.
- 8 I. Refer to hardware groups for exit device applications utilizing the option of: "less bottom rod and floor
9 strike" (LBR)
- 10 J. All exit devices shall be provided with optional trim designs to match other lever and pull designs used on
11 the project.
- 12 K. Unless specific exit device dogging options are noted within hardware sets, provide dogging options as
13 follows:
- 14 L. Fire Rated devices: Dogging not permitted.
- 15 M. Non-Rated Exit Only functions not equipped with outside trim or pull: Less Dogging.

16 **2.7 LOCKS AND LATCHES**

- 17 A. Acceptable manufacturers and respective catalog numbers:

Schlage

No Substitution

1. Grade 1 Mortise L Series 03A Lever x Round Rose

- 18 B. Bored locks shall be independently certified by ANSI for compliance with ANSI A156.2 (2011).
19 Interconnected locks shall be independently certified by ANSI for compliance with ANSI A156.12 (2013).
20 Mortise locks shall be independently certified by ANSI for compliance with ANSI A156.13 (2012).

- 21 C. Minimize transmission of heat to lock trim. Provide temperature control modules (TCM) on all electrified
22 locks when cataloged by the lock manufacturer.

- 23 D. Unless otherwise specified, all locks and latches to have:

- 24 1. 2-3/4" Backset
25 2. 1/2" minimum throw latchbolt
26 3. 1" throw deadbolt
27 4. 6 pin cylinders
28 5. ANSI A115.2 strikes

- 29 E. Provide guarded latch bolts for all locksets, and latch bolts with sufficient throw to maintain fire rating of
30 both single and paired door assemblies.

- 31 F. Length of strike lip shall be sufficient to clear surrounding trim.

- 32 G. Provide wrought boxes for strikes at inactive doors, and metal frames without integral mortar covers.

33 **2.8 PULLS, PUSH BARS, PUSH/PULL PLATES**

- 34 A. Acceptable manufacturers and respective catalog numbers:

Burns

Hager

Ives

LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
23 JUNE 2017

1. Offset Pull / Push-Bar (1" dia., 10" ctc Pull) 422 x 39C 159 9190-HD

1 B. Adjust dimensions of push plates to accommodate stile and rail dimensions, lite and louver cutouts, and
2 adjacent hardware. Where required by adjacent hardware, push plates shall be factory drilled for cylinders
3 or other mortised hardware. All push plates shall be beveled 4 sides and counter sunk.

4 C. Where possible, provide back-to-back, and concealed mounting for pulls and push bars. Push bar length
5 shall be 3" less door width, or center of stile to center of stile for stile & rail or full glass doors.

6 2.9 COORDINATORS

7 A. Acceptable manufacturers and respective catalog numbers:

	<u>Ives</u>	<u>Door Controls</u>	<u>Hager</u>
1. Bar Coordinator	COR x FL	600 x Filler	297D x 297F
2. Mounting Bracket	MB Series	AB, C Series	297 Series

8 B. Provide coordinators at all pairs of doors having automatic flush bolts and closers on the inactive leaf, and
9 for pairs of doors having vertical rod/mortise exit device combinations with overlapping astragals.

10 C. Provide appropriate filler bars, closer mounting brackets, carry bars, and special top latch preparations as
11 required by adjacent hardware.

12 2.10 CLOSERS

13 A. Acceptable manufacturers and respective catalog numbers:

	<u>LCN</u>	<u>Sargent</u>	<u>No Substitution</u>
1. 4011 /4111		281 / 281P10 (less PRV valve)	

14 B. Door closers shall be independently certified by ANSI for compliance with ANSI A156.4, Grade 1 (2013).

15 C. Obtain door closers from a single manufacturer, although several may be indicated as offering products
16 complying with requirements.

17 D. Provide extra heavy duty arm (EDA / HD) when closer is to be installed using parallel arm mounting.

18 E. Hardware supplier shall coordinate with related trades to insure aluminum frame profiles will accommodate
19 specified door closers.

20 F. Provide "SPECIAL TEMPLATE - #1728 / #0723" closer arms as required to accommodate aluminum frame
21 head details with "non-structural stops" when closers will be required to utilize parallel arm mounting
22 positions. Frame mounting shoe shall be shortened, and pivot hub height shall be increased to permit
23 frame mounted shoe to be positioned on frame rabbit (rather than the frame stop), and behind the frame
24 stop rather than on top of the frame stop. Contact LCN Door Closers at: 877-671-7011 for pricing and
25 design assistance.

26 G. Closers shall use high strength cast iron cylinders, forged main arms, and 1 piece forged steel pistons.

27 H. Closers shall utilize a stable fluid withstanding temperature range of +120deg F to -30deg F without
28 seasonal adjustment of closer speed to properly close the door. Closers for fire-rated doors shall be
29 provided with temperature stabilizing fluid that complies with standards UL10C.

30 I. Unless otherwise specified, all door closers shall have full covers and separate adjusting valves for sweeps,
31 latch, and backcheck.

32 J. Provide closers for all labeled doors. Provide closer series and type consistent with other closers for similar
33 doors specified elsewhere on the project.

- 1 K. Provide closers with adjustable spring power. Size closers to insure exterior and fire rated doors will
2 consistently close and latch doors under existing conditions. Size all other door closers to allow for reduced
3 opening force not to exceed 5 lbs.
- 4 L. Install closers on the room side of corridor doors, stair side of stairways and interior side of exterior doors.
- 5 M. Closers shall be furnished complete with all mounting brackets and cover plates as required by door and
6 frame conditions, and by adjacent hardware.
- 7 N. Door closers shall be provided with a powder coat finish to provide superior protection against the effects of
8 weathering. Powder coat finish shall successfully pass a 100 hour salt spray test.
- 9 O. Pressure Relief Valve, PRV, shall not be acceptable.

10 2.11 LOW ENERGY ELECTRO-HYDRAULIC AUTOMATIC OPERATORS

- 11 A. Acceptable manufacturers and respective catalog numbers:

	<u>LCN</u>	<u>No Substitution</u>
1. Electro-Hydraulic Operator	4640	

- 12 B. Low energy operators shall be independently certified by ANSI for compliance with ANSI A156.19 (2002).
- 13 C. Where low kinetic energy, as defined by ANSI/BHMA Standard A156.19, power operators are indicated for
14 doors required to be accessible to the disabled, provide electrically powered operators complying with the
15 ADA for opening force and time to close standards.
- 16 D. The closing action shall be controlled by modern type cast iron door closer cylinder filled with a flat viscosity
17 fluid, stable from +120F to -30F that would require no seasonal adjustments. The closer shall have field
18 adjustable spring power; have two independent closing speed adjustment valves, and hydraulic back-
19 check.
- 20 E. Full closing force shall be provided when the power or assist cycle ends.
- 21 F. All power operator systems shall include the following features and functions:
- 22 1. Provisions for separate conduits to carry high and low voltage wiring in compliance with the National
23 Electrical Code, section 725-31.
- 24 2. The operator will be designed with an electronically controlled mechanical clutching mechanism to
25 prevent damage to the operator if the system is actuated while the door is latched or if the door is
26 forced closed during the opening cycle.
- 27 3. All covers, mounting plates and arm systems shall be powder coated and successfully pass a minimum
28 of 100 hours testing as outlined in ANSI/BHMA Standard A156.18.
- 29 4. UL listed for use on labeled doors.
- 30 5. All operators shall be non-handed with spring power over a range of at least four sizes; either 1 through
31 4 or 2 through 5.
- 32 6. The power operator shall incorporate microprocessor controlled digital controls including: factory default
33 memory settings, on-board diagnostics, non-volatile memory, and integrated delay and relay for
34 controlling door release devices.
- 35 7. Provisions in the control box or module shall provide control {inputs and outputs} for; electric strike
36 delay, auxiliary contacts, sequential operation, fire alarms systems, actuators, swing side sensors, and
37 stop side sensors.

1 8. Wall mounted actuators shall consist of a 4-1/2 inch diameter stainless steel touch plate with a blue
2 filled handicapped symbol. Switches shall be weather resistant and mount on a single gang electrical
3 box furnished by Division 16.

4 G. All electrically powered operators shall include the following features or functions:

5 1. When an obstruction or resistance to the opening swing is encountered, the operator will pause at that
6 point, then attempt to continue opening the door. If the obstruction or resistance remains, the operator
7 will again pause the door.

8 2. Easily accessible main power and maintain hold open switches will be provided on the operator.

9 3. An electronically controlled clutch to provide adjustable opening force.

10 4. A microprocessor to control all motor and clutch functions.

11 5. An on-board power supply capable of delivering both 12V and 24V outputs up to a maximum of 1.0
12 ampere combined load.

13 6. All input and output power wiring shall be protected by slow blow fuses. These fuses shall be easily
14 replaceable without special tools or component replacement.

15 7. If electrical failure occurs, the unit shall operate as a standard door closer.

16 H. Power Operators shall be warranted by the manufacturer to be free from defects in material and
17 workmanship for a period of two years.

18 2.12 KICK PLATES AND MOP PLATES

19 A. Furnish protective plates as specified in hardware groups.

20 B. Where specified, provide 10" kick plates, 34" armor plates, and 4" mop plates. Unless otherwise specified,
21 metal protective plates shall be .050" thick; plastic plates shall be 1/8" thick.

22 C. Protective plates shall be 2" less door width, or 1" less door width at pairs. All protective plates shall be
23 beveled 4 sides and counter sunk. Protection plates over 16" shall not be provided for labeled doors unless
24 specifically approved by door manufacturers listing.

25 D. Where specified, provide surface mounted door edges. Edges shall butt to protective plates. Provide
26 edges with cutouts as required adjacent hardware.

27 E. Adjust dimensions of protection plates to accommodate stile and rail dimensions, lite and louver cutouts,
28 and adjacent hardware. Where required by adjacent hardware, protection plates shall be factory drilled for
29 cylinders or other mortised hardware.

30 2.13 OVERHEAD STOPS

31 A. Acceptable manufacturers and respective catalog numbers:

	<u>Glynn-Johnson</u>	<u>Rixson</u>	<u>Sargent</u>
1. Heavy Duty Surface Mount	GJ900 Series	9 Series	590
2. Heavy Duty Concealed Mount	GJ100 Series	1 Series	690
3. Medium Duty Surface Mount	GJ450 Series	10 Series	1540
4. Medium Duty Concealed Mount	GJ410	2 Series	1530

32 B. Unless otherwise specified, furnish GJ900 series overhead stop for hollow metal or 1-3/4" solid core doors
33 equipped with regular arm surface type closers that swing more than 140 degrees before striking a wall, for
34 hollow metal or 1-3/4" solid core doors that open against equipment, casework, sidelights, or other objects
35 that would make wall bumpers inappropriate, and as specified in hardware groups.

LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
23 JUNE 2017

- 1 C. Furnish sex bolt attachments for wood and mineral core doors unless doors are supplied with proper
 2 reinforcing blocks.
- 3 D. Provide special stop only ("SE" suffix) overhead stops when used in conjunction with electronic hold open
 4 closers.
- 5 E. Do not provide holder function for labeled doors.

6 **2.14 WALL STOPS AND HOLDERS**

- 7 A. Acceptable manufacturers and respective catalog numbers:

	<u>Ives</u>	<u>Hager</u>	<u>Burns</u>
1. Wrought Convex Wall Bumper	WS406CVX	232W	570
2. Wrought Concave Wall Bumper	WS406CCV	236W	575
3. Extended Wall Stop	WS11/WS11X	255W	530
4. Extended Wall Stop	WS33/WS33X	****	****
5. Automatic Wall Holder	WS40	326W	533
6. Hinge Pin Stop	70	****	****

- 8 B. Furnish a stop or holder for all doors. Furnish floor stops or hinge pin stops only where specifically
 9 specified.
- 10 C. Where wall stops are not applicable, furnish overhead stops.
- 11 D. Do not provide holder function for labeled doors.

12 **2.15 MAGNETIC HOLD OPENS**

- 13 A. Acceptable manufacturers and respective catalog numbers:

	<u>LCN</u>	<u>ABH</u>	<u>Edwards</u>
1. Wall Holder	SEM 7800	2000	1500

- 14 B. Magnetic hold opens shall be independently certified by ANSI for compliance with ANSI A156.15, Grade 1
 15 (2006).
- 16 C. Magnetic holder's housing and armature shall be constructed of a die cast zinc material.
- 17 D. Provide types as listed in groups.
- 18 E. Where wall conditions do not permit the armature to reach the magnet, provide extensions.
- 19 F. Provide proper voltage and power consumption as required by Division 16.
- 20 G. Coordinate electrical requirements and mounting locations with other trades.

21 **2.16 WEATHERSTRIP, GASKETING**

- 22 A. Acceptable manufacturers and respective catalog numbers:

	<u>Zero</u>	<u>Pemko</u>	<u>NG</u>	<u>Reese</u>
1. Weatherstrip	429	2891_PK	700NA	755
2. Adhesive Gasket	188	S88	5050	797
3. Sweeps	8192	18061_NB	B606	964
4. Drip Cap	142	346	16	R201

- 1 B. Weatherstrip and gasketing shall be independently certified by ANSI for compliance with ANSI A156.22
2 (2005).
- 3 C. Where specified in the hardware groups, furnish the above products unless otherwise detailed in groups.
- 4 D. Provide weatherstripping all exterior doors and where specified.
- 5 E. Provide intumescent and other required edge sealing systems as required by individual fire door listings to
6 comply with positive pressure standards UL 10C.
- 7 F. Provide Zero 188 smoke gaskets at all fire rated doors and smoke and draft control assemblies.
- 8 G. Provide gasketing for all meeting edges on pairs of fire doors. Gasketing shall be compatible with astragal
9 design provided by door supplier as required for specific fire door listings.

10 2.17 THRESHOLDS

- 11 A. Acceptable manufacturers and respective catalog numbers:

	<u>Zero</u>	<u>Pemko</u>	<u>NGP</u>	<u>Reese</u>
1. Saddle Thresholds	8655	171	425	S205

- 12 B. Thresholds shall be independently certified by ANSI for compliance with ANSI A156.21 (2001).
- 13 C. Hardware supplier shall verify all finish floor conditions and coordinate proper threshold as required to
14 insure a smooth transition between threshold and interior floor finish.

15 2.18 POWER SUPPLIES

- 16 A. Provide quantities and types as specified in hardware sets. Shared power supplies will not be accepted
17 without prior approval from the owner.
- 18 B. All power supplies shall have the following features:
- 19 1. 12/24 VDC Output, field selectable.
- 20 2. Class 2 Rated power limited output.
- 21 3. Universal 120-240 VAC input.
- 22 4. Low voltage DC, regulated and filtered.
- 23 5. Polarized connector for distribution boards.
- 24 6. Fused primary input.
- 25 7. AC input and DC output monitoring circuit w/LED indicators.
- 26 8. Cover mounted AC Input indication.
- 27 9. Tested and certified to meet UL294.
- 28 10. NEMA 1 enclosure.
- 29 11. Hinged cover w/lock down screws.
- 30 12. High voltage protective cover.
- 31 C. All power supplies shall incorporate fused distribution boards.
- 32 D. All electro-mechanical systems requiring fail safe circuits shall be capable of interfacing with the fire alarm
33 system to cut power to appropriate system components. Unless already provided in another system
34 component, all power supplies utilized in fail safe circuits shall include an integral relay which when
35 connected to the N/C fire alarm contact will cut power to all openings connected to the individual power
36 supply. Power supply, unless otherwise specified, will automatically reset itself when fire alarm relay returns
37 to normal state following a fire alarm.

38 2.19 FINISHES AND BASE MATERIALS

- 39 A. All hollow metal doors and aluminum doors shall be provided with hardware except where noted in the
40 hardware set schedule.

1 2.20 KEYING

- 2 A. Provide all cylinders in keyways as required to accommodate owners existing key system.
- 3 B. All locks under this section shall be keyed as directed by the owner to an existing Master Key System.
- 4 C. Furnish a total of 2 keys per cylinder. Actual cut keys to be determined by owner.
- 5 D. Master keys, control keys, and change keys shall be delivered by registered mail to the owner.
- 6 Construction keys shall be delivered to the contractor.

7 2.21 KEY CABINETS

- 8 A. Acceptable manufacturers and respective catalog numbers:

<u>Lund</u>	<u>Key Control</u>	<u>Telkee</u>
1. 1200-1205 AA	M228-2480	RWC-AWC

- 9 B. Furnish 1 each model 1200 or 1205 AA key cabinet with a capacity 1.5 times the number of key sets.
- 10 C. Provide one key cabinet with at least one hook for each key set, plus additional hooks for 50% expansion.
- 11 D. Furnish key cabinet complete with cam lock, permanent key tags, and change key cards.
- 12 E. Hardware supplier shall prepare all key change index records, tag all keys and place permanent file keys in
- 13 cabinet.

14 PART 3 - EXECUTION

15 3.1 EXAMINATION

- 16 A. Prior to installation of hardware, installer shall examine door frame installation to insure frames have been
- 17 set square and plumb. Installer shall examine doors, door frames, and adjacent wall, floor, and ceiling for
- 18 conditions, which would adversely affect proper operation and function of door assemblies. Do not proceed
- 19 with hardware installation until such deficiencies have been corrected.

20 3.2 INSTALLATION

- 21 A. Before hardware installation, general contractor/construction manager shall coordinate a hardware
- 22 installation seminar with a 1 week notice to all parties involved. The seminar is to be conducted on the
- 23 installation of hardware, specifically of locksets, closers, exit devices, continuous hinges and overhead
- 24 stops. Manufacturer's representative of the above products to present seminar. Seminar to be held at the
- 25 job site and attended by installers of hardware (including low voltage hardware) for aluminum, hollow metal
- 26 and wood doors. Training to include use of installation manuals, hardware schedule, templates and
- 27 physical products samples.
- 28 B. Install all hardware in accordance with the approved hardware schedule and manufacturers instructions for
- 29 installation and adjustment.
- 30 C. Set units level, plumb and true to the line and location. Adjust and reinforce the attachment substrate as
- 31 necessary for proper installation and operation.
- 32 D. Drill and countersink units which are not factory-prepared for anchorage fasteners. Space fasteners and
- 33 anchors in accord with industry standards.
- 34 E. Drill appropriate size pilot holes for all hardware attached to wood doors and frames.

- 1 F. Shim doors as required to maintain proper operating clearance between door and frame.
- 2 G. Unless otherwise specified, locate all hardware in accordance with the recommended locations for builders
3 hardware for standard doors and frames as published by the Door and Hardware Institute.
- 4 H. Use only fasteners supplied by or approved by the manufacturer for each respective item of hardware.
- 5 I. Mortise and cut to close tolerance and conceal evidence of cutting in the finished work.
- 6 J. Conceal push and pull bar fasteners where possible. Do not install through bolts through push plates.
- 7 K. Install hardware on UL labeled openings in accordance with manufacturer's requirements to maintain the
8 label.
- 9 L. Apply self-adhesive gasketing on frame stop at head & latch side and on rabbet of frame at hinge side.
- 10 M. Install hardware in accordance with supplemental "S" label instructions on all fire rated openings.
- 11 N. Install wall stops to contact lever handles or pulls. Do not mount wall stops on casework, or equipment.
- 12 O. Where necessary, adjust doors and hardware as required to eliminate binding between strike and latchbolt.
13 Doors should not rattle.
- 14 P. Adjust spring power of door closers to the minimum force required to insure exterior and fire rated doors will
15 consistently close and latch doors under existing conditions. Adjust all other door closers to insure opening
16 force does not to exceed 5 lbs.
- 17 Q. Adjust "sweep", "latch", & "back check" valves on all door closers to properly control door throughout the
18 opening and closing cycle. Adjust total closing speed as required to comply with all applicable state and
19 local building codes.
- 20 R. Install "hardware compatible" (bar stock) type weatherstripping continuously for an uninterrupted
21 seal. Adjust templating for parallel arm door closers, exit devices, etc., as required to accommodate
22 weatherstripping.
- 23 S. Unless otherwise specified or detailed, install thresholds with the bevel in vertical alignment with the outside
24 door face. Notch and closely fit thresholds to frame profile. Set thresholds in full bed of sealant.
- 25 T. Compress sweep during installation as recommended by sweep manufacturer to facilitate a water resistant
26 seal.
- 27 U. Deliver to the owner 1 complete set of installation and adjustment instructions, and tools as furnished with
28 the hardware.

29 **3.3 FIELD QUALITY CONTROL**

- 30 A. After installation has been completed, the hardware supplier and manufacturers representative for locksets,
31 door closers, exit devices, and overhead stops shall check the project and verify compliance with
32 installation instructions, adjustment of all hardware items, and proper application according to the approved
33 hardware schedule. Hardware supplier shall submit a list of all hardware that has not been installed
34 correctly.
- 35 B. After installation has been completed, the hardware supplier and manufacturers representative shall meet
36 with the owner to explain the functions, uses, adjustment, and maintenance of each item of hardware.
37 Hardware supplier shall provide the owner with a copy of all wiring diagrams. Wiring diagrams shall be
38 opening specific and include both a riser diagram and point to point diagram showing all wiring
39 terminations.

40 **3.4 ADJUSTMENT AND CLEANING**

**LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
23 JUNE 2017**

1 A. At final completion, and when H.V.A.C. equipment is in operation, installer shall make final adjustments to
2 and verify proper operation of all door closers and other items of hardware. . Lubricate moving parts with
3 type lubrication recommended by the manufacturer.

4 B. All hardware shall be left clean and in good operation. Hardware found to be disfigured, defective, or
5 inoperative shall be repaired or replaced.

6 3.5 HARDWARE SCHEDULE

7 A. The following schedule of hardware groups are intended to describe opening function. The hardware
8 supplier is cautioned to refer to the preamble of this specification for a complete description of all materials
9 and services to be furnished under this section.

10 PART 4 - PRODUCTS

11 SCHEDULED DOOR HARDWARE

1. HA - Hager
2. IV - Ives
3. AD - Adams Rite
4. SC - Schlage
5. VD - Von Duprin
6. GJ - Glynn-Johnson
7. LC - LCN Closers
8. RO - Rockwood
9. NG - National Guard
10. SH - Schlage Electronic Security

31 **PART 1 - GENERAL**

32 **1.1 RELATED DOCUMENTS**

- 33 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 34 Division 01 Specification Sections, apply to this Section.

35 **1.2 SUMMARY**

- 36 A. Section includes:
- 37 1. Glass for doors, interior-aluminum frames.
- 38 2. Glazing sealants and accessories.

39 **1.3 COORDINATION**

- 40 A. Coordinate glazing channel dimensions to provide necessary bite on glass, minimum edge and face
- 41 clearances, and adequate sealant thicknesses, with reasonable tolerances.

42 **1.4 ACTION SUBMITTALS**

- 43 A. Product Data: For each type of product.
- 44 B. Sustainable Design Submittals:
 - 45 1. Product Data: For sealants, indicating VOC content.
 - 46 2. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting
 - 47 materials.
- 48 C. Glazing Schedule: List glass types and thicknesses for each size opening and location. Use same
- 49 designations indicated on Drawings.
- 50 D. Delegated-Design Submittal: For glass indicated to comply with performance requirements and design
- 51 criteria, including analysis data signed and sealed by the qualified professional engineer responsible for their
- 52 preparation.

- 1 **1.5 INFORMATIONAL SUBMITTALS**
2 A. Preconstruction adhesion and compatibility test report.
- 3 **1.6 QUALITY ASSURANCE**
4 A. Sealant Testing Agency Qualifications: An independent testing agency qualified according to ASTM C 1021
5 to conduct the testing indicated.
- 6 **1.7 PRECONSTRUCTION TESTING**
7 A. Preconstruction Adhesion and Compatibility Testing: Test each glass product, tape sealant, gasket, glazing
8 accessory, and glass-framing member for adhesion to and compatibility with elastomeric glazing sealants.
9 1. Testing is not required if data are submitted based on previous testing of current sealant products
10 and glazing materials matching those submitted.
- 11 **1.8 WARRANTY**
12 A. Manufacturer's Special Warranty for Laminated Glass: Manufacturer agrees to replace laminated-glass units
13 that deteriorate within specified warranty period. Deterioration of laminated glass is defined as defects
14 developed from normal use that are not attributed to glass breakage or to maintaining and cleaning laminated
15 glass contrary to manufacturer's written instructions. Defects include edge separation, delamination
16 materially obstructing vision through glass, and blemishes exceeding those allowed by referenced
17 laminated-glass standard.
18 1. Warranty Period: 10 years from date of Substantial Completion.
- 19 **PART 2 - PRODUCTS**
- 20 **2.1 MANUFACTURERS**
21 A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may
22 be incorporated into the Work include, but are not limited to the following:
23 1. Guardian Industries Corp.; SunGuard.
24 2. Oldcastle BuildingEnvelope™.
25 3. PPG Flat Glass; PPG Industries, Inc.
26 4. Viracon, Inc.
- 27 **2.2 PERFORMANCE REQUIREMENTS**
28 A. Delegated Design: Engage a qualified professional engineer licensed in the State of Wisconsin, as defined
29 in Section 01 40 00 "Quality Requirements," to design glazing.
30 B. Structural Performance: Glazing shall withstand the following design loads within limits and under conditions
31 indicated determined according to the International Building Code and ASTM E 1300.
32 1. Design Wind Pressures: 7.5 psf (all interior to garage)
33 C. Safety Glazing: Where safety glazing is indicated, provide glazing that complies with 16 CFR 1201,
34 Category II.
- 35 **2.3 GLASS PRODUCTS, GENERAL**
36 A. Glazing Publications: Comply with published recommendations of glass product manufacturers and
37 organizations below unless more stringent requirements are indicated. See these publications for glazing
38 terms not otherwise defined in this Section or in referenced standards.
39 1. GANA Publications: "Laminated Glazing Reference Manual" and "Glazing Manual."
40 B. Safety Glazing Labeling: Where safety glazing is indicated, permanently mark glazing with certification label
41 of the SGCC or another certification agency acceptable to authorities having jurisdiction. Label shall indicate
42 manufacturer's name, type of glass, thickness, and safety glazing standard with which glass complies.
43 C. Thickness: Where glass thickness is indicated, it is a minimum. Provide glass that complies with
44 performance requirements and is not less than the thickness indicated.
45 D. Strength: Where annealed float glass is indicated, provide annealed float glass, heat-strengthened float
46 glass, or fully tempered float glass. Where heat-strengthened float glass is indicated, provide heat-
47 strengthened float glass or fully tempered float glass. Where fully tempered float glass is indicated, provide
48 fully tempered float glass.
- 49 **2.4 GLASS PRODUCTS**
50 A. Clear Annealed Float Glass: ASTM C 1036, Type I, Class 1 (clear), Quality-Q3.
51 B. Fully Tempered Float Glass: ASTM C 1048, Kind FT (fully tempered), Condition A (uncoated) unless
52 otherwise indicated, Type I, Class 1 (clear) or Class 2 (tinted) as indicated, Quality-Q3.

- 1 C. Heat-Strengthened Float Glass: ASTM C 1048, Kind HS (heat strengthened), Type I, Condition A
2 (uncoated) unless otherwise indicated, Type I, Class 1 (clear) or Class 2 (tinted) as indicated, Quality-Q3.

3 **2.5 LAMINATED GLASS**

- 4 A. Laminated Glass: ASTM C 1172. Use materials that have a proven record of no tendency to bubble, discolor,
5 or lose physical and mechanical properties after fabrication and installation.
6 1. Construction: Laminate glass with polyvinyl butyral interlayer to comply with interlayer manufacturer's
7 written instructions.
8 2. Interlayer Thickness: Provide thickness not less than that indicated and as needed to comply with
9 requirements.
10 3. Interlayer Color: Clear unless otherwise indicated.

11 **2.6 INSULATING GLASS**

- 12 A. Insulating-Glass Units: Factory-assembled units consisting of sealed lites of glass separated by a
13 dehydrated interspace, qualified according to ASTM E 2190.
14 1. Sealing System: Dual seals.
15 2. Spacer: Thermally broken Aluminum with mill or clear anodic finish.

16 **2.7 GLAZING SEALANTS**

- 17 A. General:
18 1. Compatibility: Compatible with one another and with other materials they contact, including glass
19 products and glazing channel substrates, under conditions of service and application, as
20 demonstrated by sealant manufacturer based on testing and field experience.
21 2. Suitability: Comply with sealant and glass manufacturers' written instructions for selecting glazing
22 sealants suitable for applications indicated and for conditions existing at time of installation.
23 3. Sealant shall have a VOC content of 250 g/L or less.
24 4. Colors of Exposed Glazing Sealants: As selected by Architect from manufacturer's full range.
25 B. Glazing Sealant: Neutral-curing silicone glazing sealant complying with ASTM C 920, Type S, Grade NS,
26 Class 100/50, Use NT or as recommended by glass manufacturer for glazing application.

27 **2.8 GLAZING TAPES**

- 28 A. Back-Bedding Mastic Glazing Tapes: Preformed, butyl-based, 100 percent solids elastomeric tape;
29 nonstaining and nonmigrating in contact with nonporous surfaces; with or without spacer rod as
30 recommended in writing by tape and glass manufacturers for application indicated; and complying with
31 ASTM C 1281 and AAMA 800 for products indicated below:
32 1. AAMA 806.3 tape, for glazing applications in which tape is subject to continuous pressure.
33 2. AAMA 807.3 tape, for glazing applications in which tape is not subject to continuous pressure.
34 B. Expanded Cellular Glazing Tapes: Closed-cell, PVC foam tapes; factory coated with adhesive on both
35 surfaces; and complying with AAMA 800 for the following types:
36 1. AAMA 810.1, Type 1, for glazing applications in which tape acts as the primary sealant.
37 2. AAMA 810.1, Type 2, for glazing applications in which tape is used in combination with a full bead of
38 liquid sealant.

39 **2.9 MISCELLANEOUS GLAZING MATERIALS**

- 40 A. Cleaners, Primers, and Sealers: Types recommended by sealant or gasket manufacturer.
41 B. Setting Blocks: Elastomeric material with a Shore, Type A durometer hardness of 85, plus or minus 5.
42 C. Spacers: Elastomeric blocks or continuous extrusions of hardness required by glass manufacturer to
43 maintain glass lites in place for installation indicated.
44 D. Edge Blocks: Elastomeric material of hardness needed to limit glass lateral movement (side walking).
45 E. Cylindrical Glazing Sealant Backing: ASTM C 1330, Type O (open-cell material), of size and density to
46 control glazing sealant depth and otherwise produce optimum glazing sealant performance.

47 **PART 3 - EXECUTION**

48 **3.1 GLAZING, GENERAL**

- 49 A. Comply with combined written instructions of manufacturers of glass, sealants, gaskets, and other glazing
50 materials, unless more stringent requirements are indicated, including those in referenced glazing
51 publications.

- 1 B. Protect glass edges from damage during handling and installation. Remove damaged glass from Project
2 site and legally dispose of off Project site. Damaged glass includes glass with edge damage or other
3 imperfections that, when installed, could weaken glass, impair performance, or impair appearance.
4 C. Apply primers to joint surfaces where required for adhesion of sealants, as determined by preconstruction
5 testing.
6 D. Install setting blocks in sill rabbets, sized and located to comply with referenced glazing publications, unless
7 otherwise required by glass manufacturer. Set blocks in thin course of compatible sealant suitable for heel
8 bead.
9 E. Do not exceed edge pressures stipulated by glass manufacturers for installing glass lites.
10 F. Provide spacers for glass lites where length plus width is larger than 50 inches.
11 G. Provide edge blocking where indicated or needed to prevent glass lites from moving sideways in glazing
12 channel, as recommended in writing by glass manufacturer and according to requirements in referenced
13 glazing publications.

14 **3.2 TAPE GLAZING**

- 15 A. Position tapes on fixed stops so that, when compressed by glass, their exposed edges are flush with or
16 protrude slightly above sightline of stops.
17 B. Install tapes continuously, but not necessarily in one continuous length. Do not stretch tapes to make them
18 fit opening.
19 C. Cover vertical framing joints by applying tapes to heads and sills first, then to jambs. Cover horizontal framing
20 joints by applying tapes to jambs, then to heads and sills.
21 D. Place joints in tapes at corners of opening with adjoining lengths butted together, not lapped. Seal joints in
22 tapes with compatible sealant approved by tape manufacturer.
23 E. Apply heel bead of elastomeric sealant.
24 F. Center glass lites in openings on setting blocks, and press firmly against tape by inserting dense
25 compression gaskets formed and installed to lock in place against faces of removable stops. Start gasket
26 applications at corners and work toward centers of openings.
27 G. Apply cap bead of elastomeric sealant over exposed edge of tape.

28 **3.3 GASKET GLAZING**

- 29 A. Cut compression gaskets to lengths recommended by gasket manufacturer to fit openings exactly, with
30 allowance for stretch during installation.
31 B. Insert soft compression gasket between glass and frame or fixed stop so it is securely in place with joints
32 miter cut and bonded together at corners.
33 C. Installation with Drive-in Wedge Gaskets: Center glass lites in openings on setting blocks, and press firmly
34 against soft compression gasket by inserting dense compression gaskets formed and installed to lock in
35 place against faces of removable stops. Start gasket applications at corners and work toward centers of
36 openings. Compress gaskets to produce a weathertight seal without developing bending stresses in glass.
37 Seal gasket joints with sealant recommended by gasket manufacturer.
38 D. Installation with Pressure-Glazing Stops: Center glass lites in openings on setting blocks, and press firmly
39 against soft compression gasket. Install dense compression gaskets and pressure-glazing stops, applying
40 pressure uniformly to compression gaskets. Compress gaskets to produce a weathertight seal without
41 developing bending stresses in glass. Seal gasket joints with sealant recommended by gasket manufacturer.
42 E. Install gaskets so they protrude past face of glazing stops.

43 **3.4 SEALANT GLAZING**

- 44 A. Install continuous spacers, or spacers combined with cylindrical sealant backing, between glass lites and
45 glazing stops to maintain glass face clearances and to prevent sealant from extruding into glass channel
46 and blocking weep systems until sealants cure. Secure spacers or spacers and backings in place and in
47 position to control depth of installed sealant relative to edge clearance for optimum sealant performance.
48 B. Force sealants into glazing channels to eliminate voids and to ensure complete wetting or bond of sealant
49 to glass and channel surfaces.
50 C. Tool exposed surfaces of sealants to provide a substantial wash away from glass.

51 **3.5 CLEANING AND PROTECTION**

- 52 A. Immediately after installation remove nonpermanent labels and clean surfaces.
53 B. Protect glass from contact with contaminating substances resulting from construction operations. Examine
54 glass surfaces adjacent to or below exterior concrete and other masonry surfaces at frequent intervals during
55 construction, but not less than once a month, for buildup of dirt, scum, alkaline deposits, or stains.

- 1 1. If, despite such protection, contaminating substances do come into contact with glass, remove
2 substances immediately as recommended in writing by glass manufacturer. Remove and replace
3 glass that cannot be cleaned without damage to coatings.
4 C. Remove and replace glass that is damaged during construction period.

5 **3.6 MONOLITHIC GLASS SCHEDULE**

- 6 A. Glass Type GL-_: GL-_: Clear float glass, tempered where indicated on the drawings.
7 1. Minimum Thickness: Refer to Material Tag index.
8 2. Safety glazing required where indicated on the drawings.

9 **3.7 LAMINATED GLASS SCHEDULE**

- 10 A. Glass Type Component of GL1, or safety glass alternate to fully tempered safety glass: Clear laminated
11 glass with two plies of annealed float glass.
12 1. Minimum Thickness of Each Glass Ply: 6 mm.
13 2. Interlayer Thickness: 0.060 inch.
14 3. Safety glazing required.

15 **3.8 INSULATING GLASS SCHEDULE**

- 16 A. IGU Schedule:
17 1. Refer to Material Finish Legend (GL-3, GL-4 and GL-5)
- 18 B. \Glass Type: Low-E-coated, clear insulating glass.
19 1. Basis-of-Design Product: Viracon VRE1-46.
20 2. Overall Unit Thickness: 15/16 inch. 3/16-1/2-1/4 or as required, with a thicker outer lite than inner.
21 3. Minimum Thickness of Each Glass Lite: 6 mm.
22 4. Outdoor Lite: Fully tempered clear float glass.
23 5. Interspace Content: Air.
24 6. Indoor Lite: Fully tempered clear float glass.
25 7. Low-E Coating: Sputtered on third surface.
26 8. Visible Light transmittance: 43%
27 9. Solar Energy Transmittance: 23%.
28 10. UV Transmittance: 16%.
29 11. Visible Light Reflectance - Exterior: 34 percent minimum.
30 12. Visible Light Reflectance - Interior: 15 percent minimum.
31 13. Solar Energy Reflectance: 40 percent minimum.
32 14. Winter Nighttime U-Factor: 0.30 maximum.
33 15. Summer Daytime U-Factor: 0.27 maximum.
34 16. Shading Coefficient: 0.33.
35 17. Solar Heat Gain Coefficient: 0.29 maximum.

SECTION 08 88 13

FIRE-RESISTANT GLAZING

PART 1 – GENERAL

- 1.1 [RELATED DOCUMENTS](#)
- 1.2 [SUMMARY](#)
- 1.3 [COORDINATION](#)
- 1.4 [ACTION SUBMITTALS](#)
- 1.5 [WARRANTY](#)

PART 2 – PRODUCTS

- 2.1 [GLASS PRODUCTS, GENERAL](#)
- 2.2 [GLASS PRODUCTS](#)
- 2.3 [FIRE-RESISTANCE-RATED GLAZING](#)
- 2.4 [GLAZING ACCESSORIES](#)

PART 3 – EXECUTION

- 3.1 [GLAZING](#)
- 3.2 [CLEANING AND PROTECTION](#)
- 3.3 [FIRE-RESISTANCE-RATED GLAZING SCHEDULE](#)

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:
 - 1. Fire-resistance-rated glazing.

1.3 COORDINATION

- A. Coordinate glazing channel dimensions to provide necessary bite on glass, minimum edge and face clearances, and adequate sealant thicknesses, with reasonable tolerances.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of product.
- B. Sustainable Design Submittals:
 - 1. Product Data: For sealants, indicating VOC content.
 - 2. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting materials.
- C. Glass Samples: For each type of glass product; 12 inches square.
- D. Glazing Schedule: List glass types and thicknesses for each size opening and location. Use same designations indicated on Drawings.

1.5 WARRANTY

- A. Manufacturer's Special Warranty on Laminated Glass: Manufacturer agrees to replace laminated-glass units that deteriorate within specified warranty period. Deterioration of laminated glass is defined as defects developed from normal use that are not attributed to glass breakage or to maintaining and cleaning laminated glass contrary to manufacturer's written instructions. Defects include edge separation, delamination materially obstructing vision through glass, and blemishes exceeding those allowed by referenced laminated-glass standard.
 - 1. Warranty Period: 10 years from date of Substantial Completion.

1 **PART 2 - PRODUCTS**

2 **2.1 GLASS PRODUCTS, GENERAL**

- 3 A. Glazing Publications: Comply with published recommendations of glass product manufacturers and
4 organization below unless more stringent requirements are indicated. Refer to these publications for glazing
5 terms not otherwise defined in this Section or in referenced standards.
6 1. GANA Publications: "Laminated Glazing Reference Manual" and "Glazing Manual."
7 B. Safety Glazing Labeling: Permanently mark glazing with certification label of the Safety Glazing Certification
8 Council or another certification agency acceptable to authorities having jurisdiction. Label shall indicate
9 manufacturer's name, type of glass, glass thickness, and safety glazing standard with which glass complies.

10 **2.2 GLASS PRODUCTS**

- 11 A. Laminated Glass: ASTM C 1172. Use materials that have a proven record of no tendency to bubble, discolor,
12 or lose physical and mechanical properties after fabrication and installation.

13 **2.3 FIRE-RESISTANCE-RATED GLAZING**

- 14 A. Fire-Resistance-Rated Glazing: Listed and labeled by a testing agency acceptable to authorities having
15 jurisdiction, for fire-resistance ratings indicated, based on testing according to ASTM E 119 or UL 263.
16 B. Fire-Resistance-Rated Glazing Labeling: Permanently mark fire-resistance-rated glazing with certification
17 label of a testing agency acceptable to authorities having jurisdiction. Label shall indicate manufacturer's
18 name, test standard, that the glazing is approved for use in walls, and the fire-resistance rating in minutes.
19 C. Fire resisting Laminated Glass with Intumescent Interlayers, rating as indicated: Laminated glass made from
20 multiple plies of uncoated, ultraclear float glass; with intumescent interlayers; and complying with
21 16 CFR 1201, Category II.
22 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
23 that may be incorporated into the Work include, but are not limited to the following:
24 a. Pilkington North America: PyroStop.
25 b. SAFTI FIRST Fire Rated Glazing Solutions: SuperLite III-XL.
26 c. Technical Glass Products: FireLite PLUS.
27 d. Vetrotech Saint-Gobain: SGG Contraflam.

28 **2.4 GLAZING ACCESSORIES**

- 29 A. Provide glazing gaskets, glazing sealants, glazing tapes, setting blocks, spacers, edge blocks, and other
30 glazing accessories that are compatible with glazing products and each other and are approved by testing
31 agencies that listed and labeled fire-resistant glazing products with which products are used for applications
32 and fire-protection ratings indicated.
33 B. Glazing Sealants for Fire-Rated Glazing Products: Neutral-curing silicone glazing sealant complying with
34 ASTM C 920, Type S, Grade NS, Class 50, Use NT. Comply with sealant and glass manufacturers' written
35 instructions for selecting glazing sealants suitable for applications indicated.
36 1. Sealant shall have a VOC content of 250 g/L or less.
37 2. Colors of Exposed Glazing Sealants: As selected by Architect from manufacturer's full range.

38 **PART 3 - EXECUTION**

39 **3.1 GLAZING**

- 40 A. Use methods approved by testing agencies that listed and labeled fire-resistant glazing products.
41 B. Comply with combined written instructions of manufacturers of glass, sealants, gaskets, and other glazing
42 materials unless more stringent requirements are indicated, including those in referenced glazing
43 publications.
44 C. Protect glass edges from damage during handling and installation. Remove damaged glass from Project
45 site and legally dispose of off Project site. Damaged glass is glass with edge damage or other imperfections
46 that, when installed, could weaken glass and impair performance and appearance.
47 D. Apply primers to joint surfaces where required for adhesion of sealants, as determined by preconstruction
48 testing.
49 E. Install setting blocks in sill rabbets, sized and located to comply with referenced glazing publications unless
50 otherwise required by glass manufacturer. Set blocks in thin course of compatible sealant suitable for heel
51 bead.
52 F. Do not exceed edge pressures stipulated by glass manufacturers for installing glass lites.
53 G. Provide spacers for glass lites where length plus width is larger than 50 inches.

1 H. Provide edge blocking where indicated or needed to prevent glass lites from moving sideways in glazing
2 channel, as recommended in writing by glass manufacturer and according to requirements in referenced
3 glazing publications.

4 **3.2 CLEANING AND PROTECTION**

5 A. Immediately after installation, remove nonpermanent labels and clean surfaces.

6 B. Protect glass from contact with contaminating substances resulting from construction operations. Examine
7 glass surfaces adjacent to or below exterior concrete and other masonry surfaces at frequent intervals during
8 construction, but not less than once a month, for buildup of dirt, scum, alkaline deposits, or stains.

9 1. If, despite such protection, contaminating substances do come into contact with glass, remove
10 substances immediately as recommended in writing by glass manufacturer.

11 C. Remove and replace glass that is damaged during construction period.

12 **3.3 FIRE-RESISTANCE-RATED GLAZING SCHEDULE**

13 A. Glass Type (FRGL-1): 120-minute fire-resistance-rated glazing with 450 degree F temperature-rise
14 limitation; laminated glass with intumescent interlayers.

15 **END OF SECTION**

24 **PART 1 - GENERAL**

25 **1.1 RELATED DOCUMENTS**

- 26 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 27 Division 01 Specification Sections, apply to this Section.

28 **1.2 SUMMARY**

- 29 A. Section includes forced entry security laminated glass.
- 30 B. Transaction window framing.

31 **1.3 COORDINATION**

- 32 A. Coordinate glazing channel dimensions to provide necessary bite on security glazing, minimum edge and
- 33 face clearances, and adequate sealant thicknesses, with reasonable tolerances.

34 **1.4 ACTION SUBMITTALS**

- 35 A. Product Data: For each type of product.
- 36 B. Sustainable Design Submittals:
 - 37 1. Product Data: For sealants, indicating VOC content.
 - 38 C. Security Glazing Samples: For each type of security glazing; 12 inches square.
 - 39 D. Security Glazing Schedule: List security glazing types and thicknesses for each size opening and location.
 - 40 Use same designations indicated on Drawings. Indicate coordinated dimensions of security glazing and
 - 41 construction that receives security glazing, including clearances and glazing channel dimensions.
 - 42 E. Delegated-Design Submittal: For security glazing indicated to comply with performance requirements and
 - 43 design criteria, including analysis data signed and sealed by the qualified professional engineer responsible
 - 44 for their preparation.

45 **1.5 INFORMATIONAL SUBMITTALS**

- 46 A. Product Test Reports: For each type of security glazing, for tests performed by a qualified testing agency.
- 47 B. Preconstruction adhesion and compatibility test reports.
- 48

1 **1.6 PRECONSTRUCTION TESTING**

- 2 A. Preconstruction Adhesion and Compatibility Testing: Test each security glazing type, tape sealant, gasket,
3 glazing accessory, and glazing-framing member for adhesion to and compatibility with elastomeric glazing
4 sealants.
5 1. Testing will not be required if data based on previous testing of current sealant products and glazing
6 materials match those submitted.

7 **1.7 WARRANTY**

- 8 A. Manufacturer's Special Warranty on Laminated Glass: Manufacturer agrees to replace laminated glass that
9 deteriorates within specified warranty period. Deterioration of laminated glass is defined as defects
10 developed from normal use that are not attributed to glass breakage or to maintaining and cleaning laminated
11 glass contrary to manufacturer's written instructions. Defects include edge separation, delamination
12 materially obstructing vision through glass, and blemishes exceeding those allowed by referenced
13 laminated-glass standard.
14 1. Warranty Period: 10 years from date of Substantial Completion.

15 **PART 2 - PRODUCTS**

16 **2.1 PERFORMANCE REQUIREMENTS**

- 17 A. Delegated Design: Engage a qualified professional engineer licensed in the State of Wisconsin, as defined
18 in Section 01 40 00 "Quality Requirements," to design security glazing.
19 B. Structural Performance: Glazing shall withstand the following design loads within limits and under conditions
20 indicated.
21 1. Design Procedure for Glass: ASTM E 1300 and ICC's International Building Code.
22 2. Design Wind Pressures: 25 psf.
23 C. Safety Glazing: Where safety glazing is indicated, provide glazing that complies with 16 CFR 1201, Category
24 II.

25 **2.2 SECURITY GLAZING, GENERAL**

- 26 A. Glazing Publications: Comply with published recommendations of security glazing and glazing material
27 manufacturers and organizations below unless more stringent requirements are indicated. Refer to these
28 publications for glazing terms not otherwise defined in this Section or in referenced standards.
29 1. GANA Publications: "Laminated Glazing Reference Manual" and "Glazing Manual."
30 B. Safety Glazing Labeling: Where safety glazing is indicated, permanently mark glazing with certification label
31 of the Safety Glazing Certification Council or another certification agency acceptable to authorities having
32 jurisdiction. Label shall indicate manufacturer's name, type of glazing, glass thickness, and safety glazing
33 standard with which glazing complies.
34 C. Transaction Window Framing: Interbank X QS-T4-A-4836 or equal.

35 **2.3 GLASS PRODUCTS**

- 36 A. Float Glass: ASTM C 1036, Type I, Quality-Q3, Class I (clear) unless otherwise indicated.
37 B. Heat-Treated Float Glass: ASTM C 1048; Type I; Quality-Q3; Class I (clear) unless otherwise indicated; of
38 kind and condition indicated.

39 **2.4 LAMINATED GLASS**

- 40 A. Laminated Glass: ASTM C 1172. Use materials that have a proven record of no tendency to bubble, discolor,
41 or lose physical and mechanical properties after fabrication and installation.
42 1. Interlayer Thickness: Provide thickness not less than as needed to comply with requirements.
43 2. Interlayer Color: Clear.
44

- 1 **2.5 GLAZING SEALANTS**
- 2 A. General:
- 3 1. Compatibility: Provide glazing sealants that are compatible with one another and with other materials
- 4 they contact, including security glazing, seals of insulating security glazing and air-gap security
- 5 glazing, and glazing channel substrates, under conditions of service and application, as
- 6 demonstrated by sealant manufacturer based on testing and field experience.
- 7 2. Suitability: Comply with sealant and security glazing manufacturers' written instructions for selecting
- 8 glazing sealants suitable for applications indicated and for conditions existing at time of installation.
- 9 3. Sealant shall have a VOC content of 250 g/L or less.
- 10 4. Colors of Exposed Glazing Sealants: As selected by Architect from manufacturer's full range.
- 11 B. Security Sealant: Manufacturer's standard, nonsag, tamper-resistant sealant for joints with low movement
- 12 complying with ASTM C 920, Grade NS, Class 12.5 or 25, Use NT, and with a Shore A hardness of at least
- 13 45 when tested according to ASTM C 661.
- 14 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
- 15 that may be incorporated into the Work include, but are not limited to the following:
- 16 a. BASF Corporation; Construction Systems.
- 17 b. Pecera Corporation.
- 18 **2.6 GLAZING TAPES**
- 19 A. Back-Bedding Mastic Glazing Tapes: Preformed, butyl-based, 100 percent solids elastomeric tape;
- 20 nonstaining and nonmigrating in contact with nonporous surfaces; with or without spacer rod as
- 21 recommended in writing by tape and security glazing manufacturers for application indicated; and complying
- 22 with ASTM C 1281 and AAMA 800 for products indicated below:
- 23 1. AAMA 806.3 tape, for glazing applications in which tape is subject to continuous pressure.
- 24 2. AAMA 807.3 tape, for glazing applications in which tape is not subject to continuous pressure.
- 25 B. Expanded Cellular Glazing Tapes: Closed-cell, PVC foam tapes; factory coated with adhesive on both
- 26 surfaces; and complying with AAMA 800 for the following types:
- 27 1. AAMA 810.1, Type 1, for glazing applications in which tape acts as the primary sealant.
- 28 2. AAMA 810.1, Type 2, for glazing applications in which tape is used in combination with a full bead of
- 29 liquid sealant.
- 30 **2.7 MISCELLANEOUS GLAZING MATERIALS**
- 31 A. Cleaners, Primers, and Sealers: Types recommended by sealant or gasket manufacturer.
- 32 B. Setting Blocks: Elastomeric material with a Shore, Type A durometer hardness of 85, plus or minus 5.
- 33 C. Spacers: Elastomeric blocks or continuous extrusions of hardness required by security glazing manufacturer
- 34 to maintain security glazing lites in place for installation indicated.
- 35 D. Edge Blocks: Elastomeric material of hardness needed to limit security glazing lateral movement (side
- 36 walking).
- 37 E. Cylindrical Glazing Sealant Backing: ASTM C 1330, Type O (open-cell material), of size and density to
- 38 control glazing sealant depth and otherwise produce optimum glazing sealant performance.
- 39 **2.8 FABRICATION OF SECURITY GLAZING**
- 40 A. Fabricate security glazing in sizes required to fit openings indicated for Project, with edge and face
- 41 clearances, edge and surface conditions, and bite complying with written instructions of product
- 42 manufacturer and referenced glazing publications, to comply with system performance requirements.
- 43

1 **PART 3 - EXECUTION**

2 **3.1 GLAZING, GENERAL**

- 3 A. Comply with combined written instructions of manufacturers of security glazing, sealants, gaskets, and other
4 glazing materials unless more stringent requirements are indicated, including those in referenced glazing
5 publications.
6 B. Protect edges of security glazing from damage during handling and installation. Remove damaged security
7 glazing from Project site and legally dispose of off Project site. Damaged security glazing includes units with
8 edge or face damage or other imperfections that, when installed, could weaken security glazing and impair
9 performance and appearance.
10 C. Apply primers to joint surfaces where required for adhesion of sealants, as determined by preconstruction
11 testing.
12 D. Install setting blocks in sill rabbets, sized and located to comply with referenced glazing publications unless
13 otherwise required by glazing unit manufacturer. Set blocks in thin course of compatible sealant suitable for
14 heel bead.
15 E. Do not exceed edge pressures stipulated by security glazing manufacturers for installing lites.
16 F. Provide spacers for security glazing lites where the length plus width is larger than 50 inches.
17 G. Provide edge blocking where indicated or needed to prevent security glazing from moving sideways in
18 glazing channel, as recommended in writing by security glazing manufacturer and according to requirements
19 in referenced glazing publications.

20 **3.2 TAPE GLAZING**

- 21 A. Position tapes on fixed stops so that, when compressed by security glazing, their exposed edges are flush
22 with or protrude slightly above sightline of stops.
23 B. Install tapes continuously, but not necessarily in one continuous length. Do not stretch tapes to make them
24 fit opening.
25 C. Cover vertical framing joints by applying tapes to heads and sills first and then to jambs. Cover horizontal
26 framing joints by applying tapes to jambs and then to heads and sills.
27 D. Place joints in tapes at corners of opening with adjoining lengths butted together, not lapped. Seal joints in
28 tapes with compatible sealant approved by tape manufacturer.
29 E. Do not remove release paper from tape until just before each glazing unit is installed.
30 F. Apply heel bead of elastomeric sealant.
31 G. Center security glazing in openings on setting blocks and press firmly against tape by inserting dense
32 compression gaskets formed and installed to lock in place against faces of removable stops. Start gasket
33 applications at corners and work toward centers of openings.

34 **3.3 SEALANT GLAZING (WET)**

- 35 A. Install continuous spacers, or spacers combined with cylindrical sealant backing, between security glazing
36 and glazing stops to maintain face clearances and to prevent sealant from extruding into glazing channel
37 and blocking weep systems. Secure spacers or spacers and backings in place and in position to control
38 depth of installed sealant relative to edge clearance for optimum sealant performance.
39 B. Force sealants into glazing channels to eliminate voids and to ensure complete wetting or bond of sealant
40 to security glazing and channel surfaces.
41 C. Tool exposed surfaces of sealants to provide a substantial washaway from security glazing.

42 **3.4 CLEANING AND PROTECTION**

- 43 A. Immediately after installation remove nonpermanent labels and clean surfaces.
44 B. Protect security glazing from contact with contaminating substances resulting from construction operations,
45 including weld splatter.
46 1. If, despite such protection, contaminating substances do come into contact with security glazing,
47 remove substances immediately as recommended in writing by security glazing manufacturer.
48 Remove and replace security glazing that cannot be cleaned without damage.

- 20 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
21 Division 01 Specification Sections, apply to this Section.

22 **1.2 SUMMARY**

- 23 A. Section includes fixed, extruded-aluminum louvers.
24 B. Related Requirements:
25 1. Section 08 11 13 "Hollow Metal Doors and Frames" for louvers in hollow-metal doors.
26 2. Section 08 14 16 "Flush Wood Doors" for louvers in flush wood doors.

27 **1.3 ACTION SUBMITTALS**

- 28 A. Product Data: For each type of product.
29 1. For louvers specified to bear AMCA seal, include printed catalog pages showing specified models
30 with appropriate AMCA Certified Ratings Seals.
31 B. Shop Drawings: For louvers and accessories. Include plans, elevations, sections, details, and attachments
32 to other work. Show frame profiles and blade profiles, angles, and spacing.
33 C. Samples: For each type of metal finish required.
34 D. Delegated-Design Submittal: For louvers indicated to comply with structural performance requirements,
35 including analysis data signed and sealed by the qualified professional engineer responsible for their
36 preparation.

37 **1.4 INFORMATIONAL SUBMITTALS**

- 38 A. Product Test Reports: Based on tests performed according to AMCA 500-L.
39 B. Windborne-debris-impact-resistance test reports.

40 **PART 2 - PRODUCTS**

41 **2.1 PERFORMANCE REQUIREMENTS**

- 42 A. Delegated Design: Design louvers, including comprehensive engineering analysis by a qualified professional
43 engineer licensed in the State of Wisconsin, using structural performance requirements and design criteria
44 indicated.
45

- 1 B. Structural Performance: Louvers shall withstand the effects of gravity loads and the following loads and
2 stresses within limits and under conditions indicated without permanent deformation of louver components,
3 noise or metal fatigue caused by louver-blade rattle or flutter, or permanent damage to fasteners and
4 anchors. Wind pressures shall be considered to act normal to the face of the building.
5 1. Wind Loads: Determine loads based on pressures as indicated on Drawings.
6 2. Wind Loads: Determine loads based on a uniform pressure acting inward or outward.
7 a. Refer to drawings.
8 C. Louver Performance Ratings: Provide louvers complying with requirements specified, as demonstrated by
9 testing manufacturer's stock units identical to those provided, except for length and width according to
10 AMCA 500-L.

11 **2.2 FIXED, EXTRUDED-ALUMINUM LOUVERS**

- 12 A. Horizontal, Drainable-Blade Louver:
13 1. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
14 a. Airolite Company, LLC (The).
15 b. Greenheck Fan Corporation.
16 c. Ruskin Company.
17 B. Fixed-Blade Extruded-Aluminum Louvers: Horizontal Drainable-Blade Louvers as manufactured by The
18 Airolite Co.
19 1. Product: K6776:
20 a. Depth: 6 inches (152 mm) nominal louver depth.
21 b. Type: Concealed mullion.
22 c. Percent Free Area: 54%.
23 d. Beginning Point of Water Penetration: 1,250 fpm (6.35 m/s).
24 e. Air Volume Flow Rate at Beginning Point of Water Penetration: 10,700 cfm (5.06 m³/s).
25 f. Pressure Drop at Beginning Point of Water Penetration: 0.18 in. H₂O (0.045 kPa).
26 g. Blade Thickness: 0.081 in (2 mm) 0.125 in (3 mm).
27 h. Frame Thickness: 0.081 in (2 mm) 0.125 in (3 mm).
28 2. AMCA Seal: Mark units with AMCA Certified Ratings Seal.

29 **2.3 LOUVER SCREENS**

- 30 A. General: Provide screen at each exterior louver.
31 1. Screen Location for Fixed Louvers: Exterior face.
32 2. Screening Type: Bird screening.
33 B. Louver Screen Frames: Same type and form of metal as indicated for louver to which screens are attached.
34 C. Louver Screening for Aluminum Louvers:
35 1. Bird Screening: Aluminum, 1/2-inch-square mesh, 0.063-inch wire.

36 **2.4 MATERIALS**

- 37 A. Aluminum Extrusions: ASTM B 221, Alloy 6063-T5, T-52, or T6.
38 B. Aluminum Sheet: ASTM B 209, Alloy 3003 or 5005 with temper as required for forming, or as otherwise
39 recommended by metal producer for required finish.
40 C. Fasteners: Use types and sizes to suit unit installation conditions.
41 1. Use hex-head or Phillips pan-head screws for interior exposed fasteners unless otherwise indicated.
42 Do not use exterior exposed fasteners.
43 2. For fastening aluminum, use aluminum or 300 series stainless-steel fasteners.
44 3. For fastening galvanized steel, use hot-dip-galvanized steel or 300 series stainless-steel fasteners.
45 4. For fastening stainless steel, use 300 series stainless-steel fasteners.
46 5. For color-finished louvers, use fasteners with heads that match color of louvers.
47 D. Bituminous Paint: Cold-applied asphalt emulsion complying with ASTM D 1187.

48 **2.5 FABRICATION**

- 49 A. Fabricate frames, including integral sills, to fit in openings of sizes indicated, with allowances made for
50 fabrication and installation tolerances, adjoining material tolerances, and perimeter sealant joints.
51 B. Join frame members to each other and to fixed louver blades with fillet welds concealed from view, unless
52 otherwise indicated or size of louver assembly makes bolted connections between frame members
53 necessary.
54

- 1 **2.6 ALUMINUM FINISHES**
2 A. High-Performance Organic Finish: Three-coat fluoropolymer finish complying with AAMA 2605 and
3 containing not less than 70 percent PVDF resin by weight in both color coat and clear topcoat. Prepare,
4 pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers'
5 written instructions.
6 1. Color and Gloss: Match Architect's sample.

7 **PART 3 - EXECUTION**

8 **3.1 INSTALLATION**

- 9 A. Locate and place louvers level, plumb, and at indicated alignment with adjacent work.
10 B. Use concealed anchorages where possible. Provide brass or lead washers fitted to screws where required
11 to protect metal surfaces and to make a weathertight connection.
12 C. Provide perimeter reveals and openings of uniform width for sealants and joint fillers, as indicated.
13 D. Protect unpainted galvanized and nonferrous-metal surfaces that are in contact with concrete, masonry, or
14 dissimilar metals from corrosion and galvanic action by applying a heavy coating of bituminous paint or by
15 separating surfaces with waterproof gaskets or nonmetallic flashing.

16 **3.2 ADJUSTING**

- 17 A. Restore louvers damaged during installation and construction so no evidence remains of corrective work. If
18 results of restoration are unsuccessful, as determined by Architect, remove damaged units and replace with
19 new units.

20 **END OF SECTION**

- 10 2.2 [FRAMING SYSTEMS](#)
- 11 2.3 [FURRING](#)
- 12 2.4 [AUXILIARY MATERIALS](#)
- 13 PART 3 – EXECUTION
- 14 3.1 [INSTALLATION, GENERAL](#)
- 15 3.2 [INSTALLING FRAMED ASSEMBLIES](#)

16 **PART 1 - GENERAL**

17 **1.1 RELATED DOCUMENTS**

- 18 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 19 Division 01 Specification Sections, apply to this Section.

20 **1.2 SUMMARY**

- 21 A. Section Includes:
- 22 1. Non-load-bearing steel framing systems for interior partitions.

23 **1.3 ACTION SUBMITTALS**

- 24 A. Product Data: For each type of product.
- 25 B. Sustainable Design Submittals:
- 26 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
- 27 cost.

28 **1.4 INFORMATIONAL SUBMITTALS**

- 29 A. Evaluation reports for firestop tracks.

30 **PART 2 - PRODUCTS**

31 **2.1 PERFORMANCE REQUIREMENTS**

- 32 A. Fire-Test-Response Characteristics: For fire-resistance-rated assemblies that incorporate non-load-bearing
- 33 steel framing, provide materials and construction identical to those tested in assembly indicated, according
- 34 to ASTM E 119 by an independent testing agency.

35 **2.2 FRAMING SYSTEMS**

- 36 A. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled
- 37 content not less than 35 percent.
- 38 1. Minimum Recycled Content: 34.9%.
- 39 2. Minimum Post-Consumer Recycled Content: 24.3%.
- 40 3. Minimum Pre-Consumer (Post Industrial) Recycled Content: 9.4%.
- 41 B. Framing Members, General: Comply with ASTM C 754 for conditions indicated.
- 42 1. Steel Sheet Components: Comply with ASTM C 645 requirements for metal unless otherwise
- 43 indicated.
- 44 2. Protective Coating: Coating with equivalent corrosion resistance of ASTM A 653/A 653M, G40, hot-
- 45 dip galvanized unless otherwise indicated.
- 46 C. Studs and Runners: ASTM C 645.
- 47 1. Steel Studs and Runners:
- 48 a. Minimum Base-Metal Thickness: 0.0179 inch.
- 49 b. Depth: As indicated on Drawings.

- 1 D. Slip-Type Head Joints: Where indicated, provide the following:
2 1. Deflection Track: Steel sheet top runner manufactured to prevent cracking of finishes applied to
3 interior partition framing resulting from deflection of structure above; in thickness not less than
4 indicated for studs and in width to accommodate depth of studs.
5 E. Flat Strap and Backing Plate: Steel sheet for blocking and bracing in length and width indicated.
6 F. Cold-Rolled Channel Bridging: Steel, 0.0538-inch minimum base-metal thickness, with minimum 1/2-inch-
7 wide flanges.
8 1. Depth: 1-1/2 inches.
9 2. Clip Angle: Not less than 1-1/2 by 1-1/2 inches, 0.068-inch-thick, galvanized steel.
10 G. Z-Shaped Furring: With slotted or nonslotted web, face flange of 1-1/4 inches, wall attachment flange of 7/8
11 inch, minimum uncoated-metal thickness of 0.0179 inch, and depth required to fit insulation thickness
12 indicated.

13 **2.3 FURRING**

- 14 A. Refer to Drawings for type and size.
15 B. Hat-Shaped, Rigid Furring Channels: ASTM C 645.
16 1. Minimum Base-Metal Thickness: 0.0296 inch.
17 2. Depth: As indicated on Drawings.
18 C. Cold-Rolled Furring Channels: 0.053-inch uncoated-steel thickness, with minimum 1/2-inch-wide flanges.
19 1. Depth: As indicated on Drawings.
20 2. Furring Brackets: Adjustable, corrugated-edge-type steel sheet with minimum uncoated-steel
21 thickness of 0.0329 inch.
22 3. Tie Wire: ASTM A 641/A 641M, Class 1 zinc coating, soft temper, 0.062-inch-diameter wire, or
23 double strand of 0.048-inch-diameter wire.

24 **2.4 AUXILIARY MATERIALS**

- 25 A. General: Provide auxiliary materials that comply with referenced installation standards.
26 1. Fasteners for Metal Framing: Of type, material, size, corrosion resistance, holding power, and other
27 properties required to fasten steel members to substrates.
28 B. Isolation Strip at Exterior Walls:
29 1. Foam Gasket: Adhesive-backed, closed-cell vinyl foam strips that allow fastener penetration without
30 foam displacement, 1/8 inch thick, in width to suit steel stud size.

31 **PART 3 - EXECUTION**

32 **3.1 INSTALLATION, GENERAL**

- 33 A. Installation Standard: ASTM C 754.
34 1. Gypsum Board Assemblies: Also comply with requirements in ASTM C 840 that apply to framing
35 installation.
36 B. Install framing and accessories plumb, square, and true to line, with connections securely fastened.
37 C. Install supplementary framing, and blocking to support fixtures, equipment services, heavy trim, grab bars,
38 toilet accessories, furnishings, or similar construction.
39 D. Install bracing at terminations in assemblies.
40 E. Do not bridge building control and expansion joints with non-load-bearing steel framing members. Frame
41 both sides of joints independently.
42

1 **3.2 INSTALLING FRAMED ASSEMBLIES**

- 2 A. Install framing system components according to spacings indicated, but not greater than spacings required
3 by referenced installation standards for assembly types.
- 4 B. Where studs are installed directly against exterior masonry walls or dissimilar metals at exterior walls, install
5 isolation strip between studs and exterior wall.
- 6 C. Install studs so flanges within framing system point in same direction.
- 7 D. Install tracks (runners) at floors and overhead supports. Extend framing full height to structural supports or
8 substrates above suspended ceilings except where partitions are indicated to terminate at suspended
9 ceilings. Continue framing around ducts that penetrate partitions above ceiling.
- 10 1. Slip-Type Head Joints: Where framing extends to overhead structural supports, install to produce
11 joints at tops of framing systems that prevent axial loading of finished assemblies.
- 12 2. Door Openings: Screw vertical studs at jambs to jamb anchor clips on door frames; install runner
13 track section (for cripple studs) at head and secure to jamb studs.
- 14 a. Install two studs at each jamb unless otherwise indicated.
- 15 b. Install cripple studs at head adjacent to each jamb stud, with a minimum 1/2-inch clearance
16 from jamb stud to allow for installation of control joint in finished assembly.
- 17 c. Extend jamb studs through suspended ceilings and attach to underside of overhead structure.
- 18 3. Other Framed Openings: Frame openings other than door openings the same as required for door
19 openings unless otherwise indicated. Install framing below sills of openings to match framing required
20 above door heads.
- 21 E. Direct Furring:
- 22 1. Attach to concrete or masonry with stub nails, screws designed for masonry attachment, or powder-
23 driven fasteners spaced 24 inches o.c.
- 24 F. Z-Shaped Furring Members:
- 25 1. Erect insulation, specified in Section 07 21 00 "Thermal Insulation," vertically and hold in place with
26 Z-shaped furring members spaced 24 inches o.c. unless noted otherwise.
- 27 2. Except at exterior corners, securely attach narrow flanges of furring members to wall with concrete
28 stub nails, screws designed for masonry attachment, or powder-driven fasteners spaced 24 inches
29 o.c.
- 30 3. At exterior corners, attach wide flange of furring members to wall with short flange extending beyond
31 corner; on adjacent wall surface, screw-attach short flange of furring channel to web of attached
32 channel. At interior corners, space second member no more than 12 inches from corner and cut
33 insulation to fit.
- 34 G. Installation Tolerance: Install each framing member so fastening surfaces vary not more than 1/8 inch from
35 the plane formed by faces of adjacent framing.
- 36 H. Installation Tolerances: Install suspension systems that are level to within 1/8 inch in 12 feet measured
37 lengthwise on each member that will receive finishes and transversely between parallel members that will
38 receive finishes.

- 17 3.3 [PROTECTION](#)

18 **PART 1 - GENERAL**

19 **1.1 RELATED DOCUMENTS**

- 20 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 21 Division 01 Specification Sections, apply to this Section.

22 **1.2 SUMMARY**

- 23 A. Section Includes:
- 24 1. Interior gypsum board.

25 **1.3 ACTION SUBMITTALS**

- 26 A. Product Data: For each type of product.
- 27 B. Sustainable Design Submittals:
 - 28 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
 - 29 cost.
 - 30 2. Product Certificates: For regional materials, indicating location of material manufacturer and point of
 - 31 extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each
 - 32 regional material.
 - 33 3. Product Data: For adhesives and sealants, indicating VOC content.

34 **PART 2 - PRODUCTS**

35 **2.1 PERFORMANCE REQUIREMENTS**

- 36 A. Fire-Resistance-Rated Assemblies: For fire-resistance-rated assemblies, provide materials and construction
- 37 identical to those tested in assembly indicated according to ASTM E 119 by an independent testing agency.

38 **2.2 GYPSUM BOARD, GENERAL**

- 39 A. Gypsum board products shall be GREENGUARD Gold Certified.
- 40 B. Regional Materials: Products shall be manufactured within 300 miles of Project site from materials that have
- 41 been extracted, harvested, or recovered, as well as manufactured, within 300 miles of Project site.
- 42 C. Size: Provide maximum lengths and widths available that will minimize joints in each area and that
- 43 correspond with support system indicated.
- 44

- 1 **2.3 INTERIOR GYPSUM BOARD**
- 2 A. Gypsum Wallboard: ASTM C 1396/C 1396M.
- 3 B. Gypsum Board, Type X: ASTM C 1396/C 1396M (GYP-3 and GYP-4).
- 4 1. Thickness: 5/8 inch.
- 5 2. Long Edges: Tapered.
- 6 3. Acoustical isolation hangers: where applicable for wall designation on the drawings, use the following
- 7 product in the assembly per the detail drawings: Acoustical Surfaces Inc.: RSIC-1 Resilient Sound
- 8 Isolation Clips at 16" o.c..
- 9 C. Gypsum Board, Abuse Resistant, Type X: ASTM C 1278 (USG Tile Backerboard and Underlayment)
- 10 1. Thickness: 5/8 inch.
- 11 2. Long Edges: Tapered.
- 12
- 13 **2.4 TRIM ACCESSORIES**
- 14 A. Interior Trim: ASTM C 1047.
- 15 1. Material: Galvanized or aluminum-coated steel sheet, rolled zinc, plastic, or paper-faced galvanized-
- 16 steel sheet.
- 17 2. Shapes:
- 18 a. Cornerbead.
- 19 b. Bullnose bead.
- 20 c. LC-Bead: J-shaped; exposed long flange receives joint compound.
- 21 d. L-Bead: L-shaped; exposed long flange receives joint compound.
- 22 e. U-Bead: J-shaped; exposed short flange does not receive joint compound.
- 23 f. Expansion (control) joint.
- 24 **2.5 JOINT TREATMENT MATERIALS**
- 25 A. General: Comply with ASTM C 475/C 475M.
- 26 B. Joint Tape:
- 27 1. Interior Gypsum Board: Paper.
- 28 C. Joint Compound for Interior Gypsum Board: For each coat, use formulation that is compatible with other
- 29 compounds applied on previous or for successive coats.
- 30 1. Prefilling: At open joints, rounded or beveled panel edges, and damaged surface areas, use setting-
- 31 type taping compound.
- 32 2. Embedding and First Coat: For embedding tape and first coat on joints, fasteners, and trim flanges,
- 33 use setting-type taping compound.
- 34 a. Use setting-type compound for installing paper-faced metal trim accessories.
- 35 3. Fill Coat: For second coat, use setting-type, sandable topping compound.
- 36 4. Finish Coat: For third coat, use setting-type, sandable topping compound.
- 37 **2.6 AUXILIARY MATERIALS**
- 38 A. General: Provide auxiliary materials that comply with referenced installation standards and manufacturer's
- 39 written instructions.
- 40 B. Polyethylene Vapor Retarders: ASTM D 4397, 6-mil- (0.15-mm-) thick sheet, with maximum permeance
- 41 rating of 0.1 perm (5.7 ng/Pa x s x sq. m).
- 42 C. Steel Drill Screws: ASTM C 1002 unless otherwise indicated.
- 43 1. Use screws complying with ASTM C 954 for fastening panels to steel members from 0.033 to 0.112
- 44 inch thick.
- 45 2. For fastening cementitious backer units, use screws of type and size recommended by panel
- 46 manufacturer.
- 47 D. Sound-Attenuation Blankets: ASTM C 665, Type I (blankets without membrane facing) produced by
- 48 combining thermosetting resins with mineral fibers manufactured from slag wool, or rock wool.
- 49 1. Fire-Resistance-Rated Assemblies: Comply with mineral-fiber requirements of assembly.
- 50 2. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content
- 51 not less than 50 percent.
- 52 E. Acoustical Sealant: Manufacturer's standard nonsag, paintable, nonstaining latex sealant complying with
- 53 ASTM C 834. Product effectively reduces airborne sound transmission through perimeter joints and
- 54 openings in building construction as demonstrated by testing representative assemblies according to
- 55 ASTM E 90.
- 56 1. Sealant shall have a VOC content of 250 g/L or less.
- 57 F. Thermal Insulation: As specified in Section 07 21 00 "Thermal Insulation."

1 **PART 3 - EXECUTION**

2 **3.1 APPLYING AND FINISHING PANELS**

- 3 A. Examine panels before installation. Reject panels that are wet, moisture damaged, and mold damaged.
4 B. Comply with ASTM C 840.
5 C. Isolate perimeter of gypsum board applied to non-load-bearing partitions at structural abutments. Provide
6 1/4- to 1/2-inch-wide spaces at these locations and trim edges with edge trim where edges of panels are
7 exposed. Seal joints between edges and abutting structural surfaces with acoustical sealant.
8 D. For trim with back flanges intended for fasteners, attach to framing with same fasteners used for panels.
9 Otherwise, attach trim according to manufacturer's written instructions.
10 E. Prefill open joints, rounded or beveled edges, and damaged surface areas.
11 F. Apply joint tape over gypsum board joints, except for trim products specifically indicated as not intended to
12 receive tape.
13 G. Gypsum Board Finish Levels: Finish panels to levels indicated below and according to ASTM C 840:
14 1. Level 1: Ceiling plenum areas, concealed areas, and where indicated.
15 2. Level 3: not required.
16 3. Level 4: At panel surfaces that will be exposed to view unless otherwise indicated.
17 a. Primer and its application to surfaces are specified in Section 09 91 23 "Interior Painting."
18 4. Level 5: not required.

19 **3.2 PROTECTION**

- 20 A. Protect installed products from damage from weather, condensation, direct sunlight, construction, and other
21 causes during remainder of the construction period.
22 B. Remove and replace panels that are wet, moisture damaged, and mold damaged.

27 **PART 1 - GENERAL**

28 **1.1 RELATED DOCUMENTS**

- 29 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
30 Division 01 Specification Sections, apply to this Section.

31 **1.2 SUMMARY**

- 32 A. Section Includes:

- 33 1. Ceramic mosaic wall tile.
- 34 2. Porcelain floor tile.
- 35 3. Stone thresholds.
- 36 4. Tile base and caps
- 37 5. Metal edge strips and trim.

- 38 B. Related Requirements:

- 39 1. Section 07 92 00 "Joint Sealants" for sealing of expansion, contraction, control, and isolation joints
40 in tile surfaces.
- 41 2. Section 09 29 00 "Gypsum Board" for cementitious backer units.

42 **1.3 DEFINITIONS**

- 43 A. General: Definitions in the ANSI A108 series of tile installation standards and in ANSI A137.1 apply to Work
44 of this Section unless otherwise specified.
 - 45 B. ANSI A108 Series: ANSI A108.01, ANSI A108.02, ANSI A108.1A, ANSI A108.1B, ANSI A108.1C, ANSI
46 A108.4, ANSI A108.5, ANSI A108.6, ANSI A108.8, ANSI A108.9, ANSI A108.10, ANSI A108.11, ANSI
47 A108.12, ANSI A108.13, ANSI A108.14, ANSI A108.15, ANSI A108.16, and ANSI A108.17, which are
48 contained in its "Specifications for Installation of Ceramic Tile."
 - 49 C. Retain terms that remain after this Section has been edited for a project. Coordinate with tile sizes used in
50 "Tile Products" Article.
 - 51 D. Module Size: Actual tile size plus joint width indicated.
 - 52 E. Face Size: Actual tile size, excluding spacer lugs.
- 53

- 1 **1.4 PREINSTALLATION MEETINGS**
- 2 A. Preinstallation Conference: Conduct conference at Project site.
- 3 1. Review requirements in ANSI A108.01 for substrates and for preparation by other trades.
- 4 **1.5 ACTION SUBMITTALS**
- 5 A. Product Data: For each type of product.
- 6 B. Sustainable Design Submittals:
- 7 1. Product Data: For adhesives, indicating VOC content.
- 8 2. Product Data for Credit IEQ 4.3: For grout sealers, documentation indicating that products comply
- 9 with requirements of FloorScore certification.
- 10 3. Laboratory Test Reports: For adhesives, indicating compliance with requirements for low-emitting
- 11 materials.
- 12 C. Shop Drawings: Show locations of each type of tile and tile pattern for typical applications. Show widths,
- 13 details, and locations of industry recommended expansion, contraction, control, and isolation joints in tile
- 14 substrates and finished tile surfaces for specific room by room applications.
- 15 D. Samples:
- 16 1. Each type and composition of tile and for each color and finish required.
- 17 2. Assembled samples mounted on a rigid panel, with grouted joints, for each type and composition of
- 18 tile and for each color and finish required.
- 19 3. Stone thresholds.
- 20 **1.6 INFORMATIONAL SUBMITTALS**
- 21 A. Qualification Data: For Installer.
- 22 **1.7 MAINTENANCE MATERIAL SUBMITTALS**
- 23 A. Furnish extra materials that match and are from same production runs as products installed and that are
- 24 packaged with protective covering for storage and identified with labels describing contents.
- 25 1. Tile and Trim Units: Furnish quantity of full-size units equal to 3 percent of amount installed for each
- 26 type, composition, color, pattern, and size indicated.
- 27 **1.8 QUALITY ASSURANCE**
- 28 A. Installer Qualifications:
- 29 1. Foreman or supervising installer is a five-star member of the National Tile Contractors Association
- 30 or a Trowel of Excellence member of the Tile Contractors' Association of America.
- 31 2. Installer employs Ceramic Tile Education Foundation Certified Installers or installers recognized by
- 32 the U.S. Department of Labor as Journeyman Tile Layers.
- 33 B. Mockups: Build mockups to verify selections made under Sample submittals and to demonstrate aesthetic
- 34 effects and set quality standards for materials and execution.
- 35 1. Build mockup of each type of floor tile installation.
- 36 2. Subject to compliance with requirements, approved mockups may become part of the completed
- 37 Work if undisturbed at time of Substantial Completion.

38 **PART 2 - PRODUCTS**

- 39 **2.1 PRODUCTS, GENERAL**
- 40 A. ANSI Ceramic Tile Standard: Provide Standard-grade tile that complies with ANSI A137.1 for types,
- 41 compositions, and other characteristics indicated.
- 42 B. ANSI Standards for Tile Installation Materials: Provide materials complying with ANSI A108.02, ANSI
- 43 standards referenced in other Part 2 articles, ANSI standards referenced by TCNA installation methods
- 44 specified in tile installation schedules, and other requirements specified.
- 45

- 1 **2.2 TILE PRODUCTS**
- 2 A. Ceramic Tile Type: glazed ceramic wall tile.
- 3 1. Composition: Ceramic.
- 4 2. Certification: Porcelain tile certified by the Porcelain Tile Certification Agency.
- 5 3. Module Size:.
- 6 4. Grout Color: Match Architect's sample.
- 7 5. Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable and matching
- 8 characteristics of adjoining flat tile. Provide shapes as follows, selected from manufacturer's standard
- 9 shapes:
- 10 a. Trim Units:
- 11 b. External Corners for thinset Mortar Installations
- 12 c. Internal Corners for thinset Mortar Installations.
- 13 B. Ceramic Tile Type: Porcelain floor tile.
- 14 1. Refer to material Tag List.
- 15 2. Certification: Tile certified by the Porcelain Tile Certification Agency.
- 16 3. Face Size: 12"x12"
- 17 4. Face Size Variation: Rectified.
- 18 5. Dynamic Coefficient of Friction: Not less than 0.42.
- 19 6. Grout Color: Match Architect's sample.
- 20 **2.3 THRESHOLDS**
- 21 A. General: Fabricate to sizes and profiles indicated or required to provide transition between adjacent floor
- 22 finishes.
- 23 1. Bevel edges at 1:2 slope, with lower edge of bevel aligned with or no greater than 1/16 inch above
- 24 adjacent floor surface. Finish bevel to match top surface of threshold. Limit height of threshold to 1/2
- 25 inch or less above adjacent floor surface.
- 26 **2.4 WATERPROOF MEMBRANE**
- 27 A. Application: Provide at bathroom floors.
- 28 B. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
- 29 1. Bonsal American, an Oldcastle company.
- 30 2. LATICRETE LLC.
- 31 3. MAPEI Corporation.
- 32 C. General: Manufacturer's standard product, selected from the following that complies with ANSI A118.10 and
- 33 is recommended by the manufacturer for the application indicated. Include reinforcement and accessories
- 34 recommended by manufacturer.
- 35 D. Fluid-Applied Membrane: Liquid-latex rubber or elastomeric polymer.
- 36 1. Basis of Design: Laticrete Hydroban.
- 37

1 **2.5 SETTING MATERIALS**

- 2 A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
- 3 1. Bonsal American, an Oldcastle company.
- 4 2. LATICRETE LLC.
- 5 3. MAPEI Corporation.
- 6 B. Portland Cement Mortar (Thickset) Installation Materials: ANSI A108.02.
- 7 1. Latex Additive: Manufacturer's standard water emulsion, serving as replacement for part or all of
- 8 gaging water, of type specifically recommended by latex-additive manufacturer for use with field-
- 9 mixed portland cement and aggregate mortar bed.
- 10 a. Basis of Design: Laticrete 3701 Mortar Admixture.
- 11 C. Latex-Portland Cement Mortar (Thinset): ANSI A118.4.
- 12 1. Product shall be approved for setting beds up to 5/8 inch.
- 13 a. Basis of Design: Laticrete 253 Gold (bagged).
- 14 2. Provide prepackaged, dry-mortar mix containing dry, redispersible, vinyl acetate or acrylic additive
- 15 to which only water is added at Project site.
- 16 3. Provide prepackaged, dry-mortar mix combined with acrylic resin or styrene-butadiene-rubber liquid-
- 17 latex additive at Project site.
- 18 4. For large format floor tile (tile of 8 inches by 8 inches or greater) provide medium setting bed to
- 19 achieve 100% coverage.
- 20 5. For wall applications, provide mortar that complies with requirements for nonsagging mortar in
- 21 addition to the other requirements in ANSI A118.4.

22 **2.6 GROUT MATERIALS**

- 23 A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
- 24 1. Bonsal American, an Oldcastle company.
- 25 2. LATICRETE LLC.
- 26 3. MAPEI Corporation.
- 27 B. High-Performance Tile Grout: ANSI A118.7.
- 28 1. Polymer Type: Ethylene vinyl acetate or acrylic additive, in dry, redispersible form, prepackaged with
- 29 other dry ingredients.
- 30 2. Unsanded and sanded grout with polymer additive added in field.
- 31 a. Basis of Design: Laticrete 1500 and 1600 (bagged).
- 32 b. Basis of Design: Laticrete 1776 Grout Enhancer.
- 33 C. Grout for PregROUTED Tile Sheets: Same product used in factory to pregROUT tile sheets.
- 34 D. Color: As selected by Architect from manufacturer's standard.

35 **2.7 MISCELLANEOUS MATERIALS**

- 36 A. Trowelable Underlayments and Patching Compounds: Latex-modified, portland cement-based formulation
- 37 provided or approved by manufacturer of tile-setting materials for installations indicated.
- 38 B. Grout Sealer: Manufacturer's standard product for sealing grout joints and that does not change color or
- 39 appearance of grout.

40 **2.8 MIXING MORTARS AND GROUT**

- 41 A. Mix mortars and grouts to comply with referenced standards and mortar and grout manufacturers' written
- 42 instructions.
- 43 B. Add materials, water, and additives in accurate proportions.
- 44 C. Obtain and use type of mixing equipment, mixer speeds, mixing containers, mixing time, and other
- 45 procedures to produce mortars and grouts of uniform quality with optimum performance characteristics for
- 46 installations indicated.

47 **PART 3 - EXECUTION**

48 **3.1 EXAMINATION**

- 49 A. Examine substrates, areas, and conditions where tile will be installed, with Installer present, for compliance
- 50 with requirements for installation tolerances and other conditions affecting performance of the Work.
- 51 1. Verify that substrates for setting tile are firm; dry; clean; free of coatings that are incompatible with
- 52 tile-setting materials, including curing compounds and other substances that contain soap, wax, oil,
- 53 or silicone; and comply with flatness tolerances required by ANSI A108.01 for installations indicated.
- 54 2. Verify that installation of grounds, anchors, recessed frames, electrical and mechanical units of work,
- 55 and similar items located in or behind tile has been completed.

- 1 3. Verify that joints and cracks in tile substrates are coordinated with tile joint locations; if not
2 coordinated, adjust joint locations in consultation with Architect.
3 B. Proceed with installation only after unsatisfactory conditions have been corrected.
- 4 **3.2 PREPARATION**
- 5 A. Fill cracks, holes, and depressions in concrete substrates for tile floors installed with adhesives with
6 trowelable leveling and patching compound specifically recommended by tile-setting material manufacturer.
7 B. Blending: For tile exhibiting color variations, verify that tile has been factory blended and packaged so tile
8 units taken from one package show same range of colors as those taken from other packages and match
9 approved Samples. If not factory blended, either return to manufacturer or blend tiles at Project site before
10 installing.
- 11 **3.3 CERAMIC TILE INSTALLATION**
- 12 A. Comply with TCNA's "Handbook for Ceramic, Glass, and Stone Tile Installation" for TCNA installation
13 methods specified in tile installation schedules. Comply with parts of the ANSI A108 series "Specifications
14 for Installation of Ceramic Tile" that are referenced in TCNA installation methods, specified in tile installation
15 schedules, and apply to types of setting and grouting materials used.
- 16 1. For the following installations, follow procedures in the ANSI A108 series of tile installation standards
17 for providing 95 percent mortar coverage:
18 a. Tile floors consisting of tiles 8 by 8 inches or larger.
- 19 B. Extend tile work into recesses and under or behind equipment and fixtures to form complete covering without
20 interruptions unless otherwise indicated. Terminate work neatly at obstructions, edges, and corners without
21 disrupting pattern or joint alignments.
- 22 C. Accurately form intersections and returns. Perform cutting and drilling of tile without marring visible surfaces.
23 Carefully grind cut edges of tile abutting trim, finish, or built-in items for straight aligned joints. Fit tile closely
24 to electrical outlets, piping, fixtures, and other penetrations so plates, collars, or covers overlap tile.
- 25 D. Provide manufacturer's standard trim shapes where necessary to eliminate exposed tile edges.
- 26 E. Where accent tile differs in thickness from field tile, vary setting-bed thickness so that tiles are flush.
- 27 F. Jointing Pattern: Lay tile in grid pattern unless otherwise indicated. Lay out tile work and center tile fields in
28 both directions in each space or on each wall area. Lay out tile work to minimize the use of pieces that are
29 less than half of a tile. Provide uniform joint widths unless otherwise indicated.
- 30 1. For tile mounted in sheets, make joints between tile sheets same width as joints within tile sheets so
31 joints between sheets are not apparent in finished work.
- 32 2. Where adjoining tiles on floor, base, walls, or trim are specified or indicated to be same size, align
33 joints.
- 34 3. Where tiles are specified or indicated to be whole integer multiples of adjoining tiles on floor, base,
35 walls, or trim, align joints unless otherwise indicated.
- 36 G. Expansion Joints: Provide expansion joints and other sealant-filled joints, including control, contraction, and
37 isolation joints, where indicated. Form joints during installation of setting materials, mortar beds, and tile. Do
38 not saw-cut joints after installing tiles.
- 39 1. Where joints occur in concrete substrates, locate joints in tile surfaces directly above them.
- 40 H. Stone Thresholds: Install stone thresholds in same type of setting bed as adjacent floor unless otherwise
41 indicated.
- 42 1. At locations where mortar bed (thickset) would otherwise be exposed above adjacent floor finishes,
43 set thresholds in latex-portland cement mortar (thinset).
- 44 I. Metal Edge Strips: Install at locations indicated.
- 45 J. Grout Sealer: Apply grout sealer to cementitious grout joints in tile floors according to grout-sealer
46 manufacturer's written instructions. As soon as grout sealer has penetrated grout joints, remove excess
47 sealer and sealer from tile faces by wiping with soft cloth.
- 48 **3.4 ADJUSTING AND CLEANING**
- 49 A. Remove and replace tile that is damaged or that does not match adjoining tile. Provide new matching units,
50 installed as specified and in a manner to eliminate evidence of replacement.
- 51 B. Cleaning: On completion of placement and grouting, clean all ceramic tile surfaces so they are free of foreign
52 matter.
- 53 1. Remove grout residue from tile as soon as possible.
- 54 2. Clean grout smears and haze from tile according to tile and grout manufacturer's written instructions
55 but no sooner than 10 days after installation. Use only cleaners recommended by tile and grout
56 manufacturers and only after determining that cleaners are safe to use by testing on samples of tile
57 and other surfaces to be cleaned. Protect metal surfaces and plumbing fixtures from effects of
58 cleaning. Flush surfaces with clean water before and after cleaning.

- 1 **3.5 PROTECTION**
2 A. Protect installed tile work with kraft paper or other heavy covering during construction period to prevent
3 staining, damage, and wear. If recommended by tile manufacturer, apply coat of neutral protective cleaner
4 to completed tile walls and floors.
5 B. Prohibit foot and wheel traffic from tiled floors for at least seven days after grouting is completed.
6 C. Before final inspection, remove protective coverings and rinse neutral protective cleaner from tile surfaces.

7 **3.6 INTERIOR CERAMIC TILE INSTALLATION SCHEDULE**

- 8 A. Interior Floor Installations, Concrete Subfloor:
9 1. Ceramic Tile Installation: TCNA F112 and ANSI A108.1A; cement mortar bed (thickset) bonded to
10 concrete.
11 a. Ceramic Tile Type:
12 b. Grout: High-performance grout.
13 2. Ceramic Tile Installation: TCNA F113; thinset mortar.
14 a. Ceramic Tile Type:
15 b. Thinset Mortar: Latex- portland cement mortar.
16 c. Mediumset Mortar: Latex- portland cement mortar. Large format tile.
17 d. Grout: High-performance grout. Color as selected.
18 e. Grout Sealer: As specified.
19 B. Interior Wall Installations, Metal Studs or Furring:
20 1. Ceramic Tile Installation:
21 a. Ceramic Tile Type: Refer Material Tag List.
22 b. Thinset Mortar: Improved modified dry-set mortar.
23 c. Grout: High-performance grout. Color as selected.

24 **PART 1 - GENERAL**

25 **1.1 RELATED DOCUMENTS**

- 26 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 27 Division 01 Specification Sections, apply to this Section.

28 **1.2 SUMMARY**

- 29 A. Section includes acoustical panels and exposed suspension systems for interior ceilings.
- 30 B. Products furnished, but not installed under this Section, include anchors, clips, and other ceiling attachment
- 31 devices to be cast in concrete.

32 **1.3 ACTION SUBMITTALS**

- 33 A. Product Data: For each type of product.
- 34 B. Sustainable Design Submittals:
 - 35 1. Recycled content.
 - 36 2. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-
 - 37 emitting materials.

38 **1.4 CLOSEOUT SUBMITTALS**

- 39 A. Maintenance Data: For finishes to include in maintenance manuals.

40 **1.5 MAINTENANCE MATERIAL SUBMITTALS**

- 41 A. Furnish extra materials, from the same product run, that match products installed and that are packaged
- 42 with protective covering for storage and identified with labels describing contents.
 - 43 1. Acoustical Ceiling Units: Full-size panels equal to 2 percent of quantity installed.

44 **1.6 DELIVERY, STORAGE, AND HANDLING**

- 45 A. Deliver acoustical panels, suspension-system components, and accessories to Project site and store them
- 46 in a fully enclosed, conditioned space where they will be protected against damage from moisture, humidity,
- 47 temperature extremes, direct sunlight, surface contamination, and other causes.
- 48 B. Before installing acoustical panels, permit them to reach room temperature and a stabilized moisture
- 49 content.
- 50

1 **1.7 FIELD CONDITIONS**

- 2 A. Environmental Limitations: Do not install acoustical panel ceilings until wet-work in spaces is complete and
3 dry, work above ceilings is complete.

4 **PART 2 - PRODUCTS**

5 **2.1 MANUFACTURERS**

- 6 A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may
7 be incorporated into the Work include, but are not limited to the following:
8 1. Armstrong World Industries, Inc.
9 2. CertainTeed Corporation.
10 3. United States Gypsum Company.
11 B. Source Limitations: Obtain each type of acoustical ceiling panel and its supporting suspension system from
12 single source from single manufacturer.

13 **2.2 PERFORMANCE REQUIREMENTS**

- 14 A. Ceiling products shall comply with the requirements of the California Department of Public Health's
15 "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor
16 Sources Using Environmental Chambers."
17 B. Surface-Burning Characteristics: Comply with ASTM E 84; testing by a qualified testing agency. Identify
18 products with appropriate markings of applicable testing agency.
19 1. Flame-Spread Index: Class A according to ASTM E 1264.
20 2. Smoke-Developed Index: 450 or less.

21 **2.3 ACOUSTICAL PANELS**

- 22 A. Basis of Design:
23 1. Manufacturer: USG
24 2. Pattern: Astro
25 B. Material Characteristics:
26 1. Material: Mineral Fiber, Wet-formed.
27 2. ASTM Classification: Type: IV, Form: 2, Pattern: E.
28 3. Texture: Fine.
29 4. Pattern: No Pattern.
30 5. Surface Finish: Factory-applied latex paint on acoustically transparent membrane.
31 6. Dimensions: 24 x 24 x 3/4 inches.
32 7. Edge Profile: Fineline Bevel
33 8. NRC: 0.70
34 9. Grid: 9/16 inch.

35 **2.4 METAL SUSPENSION SYSTEM**

- 36 A. Metal Suspension-System Standard: Provide manufacturer's standard, direct-hung, metal suspension
37 system and accessories according to ASTM C 635/C 635M and designated by type, structural classification,
38 and finish indicated.
39 B. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less
40 than 25 percent.
41 C. Narrow-profile, slotted grid system with 1/8" reveal, Steel Suspension System: Main and cross runners roll
42 formed from cold-rolled steel sheet; prepainted, electrolytically zinc coated, or hot-dip galvanized, G30
43 coating designation; USG Donn® Brand Fineline® DXLF™ 9/16" Acoustical Suspension System
44 1. Structural Classification: Intermediate-duty system.
45 2. End Condition of Cross Runners: Override (stepped) or butt-edge type.
46 3. Face Design: Slotted.
47 4. Cap Material: Cold-rolled steel.
48 5. Cap Finish: Painted white.
49

1 **2.5 ACCESSORIES**

- 2 A. Attachment Devices: Size for five times the design load indicated in ASTM C 635/C 635M, Table 1, "Direct
3 Hung," unless otherwise indicated. Comply with seismic design requirements.
4 1. Anchors in Concrete: Anchors of type and material indicated below, with holes or loops for attaching
5 hangers of type indicated and with capability to sustain, without failure, a load equal to five times that
6 imposed by ceiling construction, as determined by testing according to ASTM E 488/E 488M or
7 ASTM E 1512 as applicable, conducted by a qualified testing and inspecting agency.
8 a. Type: Postinstalled bonded anchors.
9 b. Corrosion Protection: Carbon-steel components zinc plated according to ASTM B 633,
10 Class SC 1 (mild) service condition.
11 B. Wire Hangers, Braces, and Ties: Provide wires as follows:
12 1. Zinc-Coated, Carbon-Steel Wire: ASTM A 641/A 641M, Class 1 zinc coating, soft temper.
13 2. Size: Wire diameter sufficient for its stress at three times hanger design load (ASTM C 635/C 635M,
14 Table 1, "Direct Hung") will be less than yield stress of wire, but not less than 0.106-inch- diameter
15 wire.
16 C. Hanger Rods: Mild steel, zinc coated or protected with rust-inhibitive paint.
17 D. Flat Hangers: Mild steel, zinc coated or protected with rust-inhibitive paint.

18 **2.6 METAL EDGE MOLDINGS AND TRIM**

- 19 A. Roll-Formed, Sheet-Metal Edge Moldings and Trim: Type and profile indicated or, if not indicated,
20 manufacturer's standard moldings for edges and penetrations; formed from sheet metal of same material,
21 finish, and color as that used for exposed flanges of suspension-system runners.
22 1. Edge moldings shall fit acoustical panel edge details and suspension systems indicated and match
23 width and configuration of exposed runners unless otherwise indicated.
24 2. For lay-in panels with reveal edge details, provide stepped edge molding that forms reveal of same
25 depth and width as that formed between edge of panel and flange at exposed suspension member.
26 3. For circular penetrations of ceiling, provide edge moldings fabricated to diameter required to fit
27 penetration exactly.

28 **PART 3 - EXECUTION**

29 **3.1 EXAMINATION**

- 30 A. Examine substrates, areas, and conditions, including structural framing to which acoustical panel ceilings
31 attach or abut, with Installer present, for compliance with requirements specified in this and other Sections
32 that affect ceiling installation and anchorage and with requirements for installation tolerances and other
33 conditions affecting performance of acoustical panel ceilings.
34 B. Examine acoustical panels before installation. Reject acoustical panels that are wet, moisture damaged, or
35 mold damaged.
36 C. Proceed with installation only after unsatisfactory conditions have been corrected.

37 **3.2 PREPARATION**

- 38 A. Measure each ceiling area and establish layout of acoustical panels to balance border widths at opposite
39 edges of each ceiling. Avoid using less-than-half-width panels at borders unless otherwise indicated, and
40 comply with layout shown on reflected ceiling plans.
41 B. Layout openings for penetrations centered on the penetrating items.

42 **3.3 INSTALLATION**

- 43 A. Install acoustical panel ceilings according to ASTM C 636/C 636M and manufacturer's written instructions.
44 B. Suspend ceiling hangers from building's structural members and as follows:
45 1. Install hangers plumb and free from contact with insulation or other objects within ceiling plenum that
46 are not part of supporting structure or of ceiling suspension system.
47 2. Splay hangers only where required to miss obstructions; offset resulting horizontal forces by bracing,
48 countersplaying, or other equally effective means.
49 3. Where width of ducts and other construction within ceiling plenum produces hanger spacings that
50 interfere with location of hangers at spacings required to support standard suspension-system
51 members, install supplemental suspension members and hangers in form of trapezes or equivalent
52 devices.
53 4. Secure wire hangers to ceiling-suspension members and to supports above with a minimum of three
54 tight turns. Connect hangers directly to structure or to inserts, eye screws, or other devices that are
55 secure and appropriate for substrate and that will not deteriorate or otherwise fail due to age,

- 1 corrosion, or elevated temperatures.
2 5. When steel framing does not permit installation of hanger wires at spacing required, install carrying
3 channels or other supplemental support for attachment of hanger wires.
4 6. Space hangers not more than 48 inches o.c. along each member supported directly from hangers
5 unless otherwise indicated; provide hangers not more than 8 inches from ends of each member.
6 7. Size supplemental suspension members and hangers to support ceiling loads within performance
7 limits established by referenced standards.
8 C. Install edge moldings and trim of type indicated at perimeter of acoustical ceiling area and where necessary
9 to conceal edges of acoustical panels.
10 1. Apply acoustical sealant in a continuous ribbon concealed on back of vertical legs of moldings before
11 they are installed.
12 2. Screw attach moldings to substrate at intervals not more than 16 inches o.c. and not more than 3
13 inches from ends. Miter corners accurately and connect securely.
14 3. Do not use exposed fasteners, including pop rivets, on moldings and trim.
15 D. Install suspension-system runners so they are square and securely interlocked with one another. Remove
16 and replace dented, bent, or kinked members.
17 E. Install acoustical panels with undamaged edges and fit accurately into suspension-system runners and edge
18 moldings. Scribe and cut panels at borders and penetrations to provide precise fit.
19 1. For reveal-edged panels on suspension-system runners, install panels with bottom of reveal in firm
20 contact with top surface of runner flanges.
21 2. Paint cut edges of panel remaining exposed after installation; match color of exposed panel surfaces
22 using coating recommended in writing for this purpose by acoustical panel manufacturer.

23 **3.4 ERECTION TOLERANCES**

- 24 A. Suspended Ceilings: Install main and cross runners level to a tolerance of 1/8 inch in 12 feet, non-cumulative.
25 B. Moldings and Trim: Install moldings and trim to substrate and level with ceiling suspension system to a
26 tolerance of 1/8 inch in 12 feet, non-cumulative.

27 **3.5 CLEANING**

- 28 A. Clean exposed surfaces of acoustical panel ceilings, including trim, edge moldings, and suspension-system
29 members. Comply with manufacturer's written instructions for cleaning and touchup of minor finish damage.
30 B. Remove and replace ceiling components that cannot be successfully cleaned and repaired to permanently
31 eliminate evidence of damage.
32

14 **PART 1 - GENERAL**

15 **1.1 RELATED DOCUMENTS**

- 16 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 17 Division 01 Specification Sections, apply to this Section.

18 **1.2 SUMMARY**

- 19 A. Section Includes:
- 20 1. Resilient base.

21 **1.3 ACTION SUBMITTALS**

- 22 A. Product Data: For each type of product.
- 23 B. Sustainable Design Submittals:
- 24 1. Product Data: For adhesives, indicating VOC content.
- 25 C. Samples: For each exposed product and for each color and texture specified, not less than 12 inches long.

26 **PART 2 - PRODUCTS**

27 **2.1 THERMOSET-RUBBER BASE**

- 28 A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may
- 29 be incorporated into the Work include, but are not limited to, the following:
- 30 1. Johnsonite; A Tarkett Company.
- 31 B. Product Standard: ASTM F 1861, Type TS (rubber, vulcanized thermoset), Group I (solid, homogeneous).
- 32 1. Style and Location:
- 33 a. Style B, Coved.
- 34 C. Thickness: 0.125 inch.
- 35 D. Height: 4 inches.
- 36 E. Lengths: Cut lengths 48 inches long or coils in manufacturer's standard length.
- 37 F. Outside Corners: Job formed or preformed.
- 38 G. Inside Corners: Job formed or preformed.
- 39 H. Colors: Refer to Material Finish Legend on sheet A-501.0

40 **2.2 INSTALLATION MATERIALS**

- 41 A. Trowelable Leveling and Patching Compounds: Latex-modified, portland cement based or blended
- 42 hydraulic-cement-based formulation provided or approved by resilient-product manufacturer for applications
- 43 indicated.
- 44 B. Adhesives: Water-resistant type recommended by resilient-product manufacturer for resilient products and
- 45 substrate conditions indicated.
- 46 1. Adhesives shall have a VOC content of 50] g/L or less and 60 g/L or less for rubber stair treads.

1 **PART 3 - EXECUTION**

2 **3.1 PREPARATION**

- 3 A. Prepare substrates according to manufacturer's written instructions to ensure adhesion of resilient products.
4 B. Do not install resilient products until they are the same temperature as the space where they are to be
5 installed.

6 **3.2 RESILIENT BASE INSTALLATION**

- 7 A. Comply with manufacturer's written instructions for installing resilient base.
8 B. Apply resilient base to walls, columns, pilasters, casework and cabinets in toe spaces, and other permanent
9 fixtures in rooms and areas where base is required.
10 C. Install resilient base in lengths as long as practical without gaps at seams and with tops of adjacent pieces
11 aligned.
12 D. Tightly adhere resilient base to substrate throughout length of each piece, with base in continuous contact
13 with horizontal and vertical substrates.
14 E. Do not stretch resilient base during installation.
15 F. On masonry surfaces or other similar irregular substrates, fill voids along top edge of resilient base with
16 manufacturer's recommended adhesive filler material.
17 G. Preformed Corners: Install preformed corners before installing straight pieces.
18 H. Job-Formed Corners:
19 1. Outside Corners: Use straight pieces of maximum lengths possible and form with returns not less
20 than 6 inches in length.
21 a. Form without producing discoloration (whitening) at bends.
22 2. Inside Corners: Use straight pieces of maximum lengths possible and form with returns not less than
23 3 inches in length.
24 a. Miter or cope corners to minimize open joints.

25 **3.3 CLEANING AND PROTECTION**

- 26 A. Comply with manufacturer's written instructions for cleaning and protecting resilient products.

27 **END OF SECTION**

SECTION 09 65 19
RESILIENT TILE FLOORING

- 1
2
3 PART 1 – GENERAL
4 1.1 [RELATED DOCUMENTS](#)
5 1.2 [SUMMARY](#)
6 1.3 [ACTION SUBMITTALS](#)

10 2.2 [RUBBER FLOOR TILE](#)
11 2.3 [INSTALLATION MATERIALS](#)
12 PART 3 – EXECUTION
13 3.1 [PREPARATION](#)
14 3.2 [FLOOR TILE INSTALLATION](#)
15 3.3 [CLEANING AND PROTECTION](#)

16 **PART 1 - GENERAL**

17 **1.1 RELATED DOCUMENTS**

- 18 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
19 Division 01 Specification Sections, apply to this Section.

20 **1.2 SUMMARY**

- 21 A. Section Includes:
22 1. Rubber floor tile.

23 **1.3 ACTION SUBMITTALS**

- 24 A. Product Data: For each type of product.
25 B. Shop Drawings: For each type of floor tile. Include floor tile layouts, edges, columns, doorways, enclosing
26 partitions, built-in furniture, cabinets, and cutouts.
27 1. Show details of special patterns.
28 C. Sustainability Submittals:
29 1. Product Data for adhesives, documentation including printed statement of VOC content.
30 D. Samples: Full-size units of each color and pattern of floor tile required.

31 **1.4 CLOSEOUT SUBMITTALS**

- 32 A. Maintenance Data: For each type of floor tile to include in maintenance manuals..

33 **PART 2 - PRODUCTS**

34 **2.1 PERFORMANCE REQUIREMENTS**

- 35 A. Fire-Test-Response Characteristics: For resilient tile flooring, as determined by testing identical products
36 according to ASTM E 648 or NFPA 253 by a qualified testing agency.
37 B. Performance:
38 1. Hardness (ASTM D 2240) – Not less than 85 Shore A.
39 2. Abrasion Resistance (ASTM D 3389): <1.0 gm weight loss
40 3. Slip Resistance (ASTM D 2047): Meets or Exceeds a static coefficient of friction of 0.8
41 4. Color Heat Stability (ASTM F 1514): < 8.0 □E
42 5. Static Load Limit (ASTM F 970): Passes at 250 PSI with less than .005” residual indentation
43 6. Acoustical: ASTM E- 492 Impact Insulation Class – 40 IIC
44 7. Fire Resistance:
45 a. ASTM E 648/NFPA 253 (Critical Radiant Flux), Class 1.
46 b. ASTM E 662/NFPA 258 (Smoke Density), less than 450.
47

- 1 8. Chemical Resistance (ASTM F 925): Passed - 5% Acetic acid, 70% Isopropyl alcohol, Sodium
2 hydroxide solution (5% NaOH), Hydrochloric acid solution (5% HCl), Sulfuric acid solution (5%
3 H₂SO₄), Household ammonia solution (5% NH₄OH), Household bleach (5.25% NaOCl),
4 Disinfectant cleaner (5% active phenol).

5 **2.2 RUBBER FLOOR TILE**

- 6 A. Basis of Design: Tarkett Folio Rubber Tile.
7 B. Construction: Floor Tiles shall be manufactured from a homogeneous composition of 100% synthetic
8 rubber, high quality additives, and colorants to meet the performance requirements of ASTM F 1344, Class
9 1-A and 1-B Standard Specification for Rubber Floor Tile.
10 C. Thickness: .125 inch (3 mm) thickness.
11 D. Size: 24 inches x 24 inches (61 cm x 61 cm).
12 E. Colors and Patterns: As selected by Architect from full range of industry colors.

13 **2.3 INSTALLATION MATERIALS**

- 14 A. Trowelable Leveling and Patching Compounds: Latex-modified, portland cement based or blended
15 hydraulic-cement-based formulation provided or approved by floor tile manufacturer for applications
16 indicated.
17 B. Adhesives: Water-resistant type recommended by floor tile and adhesive manufacturers to suit floor tile
18 and substrate conditions indicated.

19 **PART 3 - EXECUTION**

20 **3.1 PREPARATION**

- 21 A. Prepare substrates according to floor tile manufacturer's written instructions to ensure adhesion of resilient
22 products.
23 B. Concrete Substrates: Prepare according to ASTM F 710.
24 1. Verify that substrates are dry and free of curing compounds, sealers, and hardeners.
25 2. Remove substrate coatings and other substances that are incompatible with adhesives and that
26 contain soap, wax, oil, or silicone, using mechanical methods recommended by floor tile
27 manufacturer. Do not use solvents.
28 3. Alkalinity and Adhesion Testing: Perform tests recommended by floor tile manufacturer. Proceed
29 with installation only after substrate alkalinity falls within range on pH scale recommended by
30 manufacturer in writing, but not less than 5 or more than 9 pH.
31 4. Moisture Testing: Proceed with installation only after substrates pass testing according to floor tile
32 manufacturer's written recommendations, but not less stringent than the following:
33 a. Perform anhydrous calcium chloride test according to ASTM F 1869. Proceed with
34 installation only after substrates have maximum moisture-vapor-emission rate of 3 lb of
35 water/1000 sq. ft. in 24 hours.
36 b. Perform relative humidity test using in situ probes according to ASTM F 2170. Proceed with
37 installation only after substrates have a maximum 75 percent relative humidity level.
38 C. Fill cracks, holes, and depressions in substrates with trowelable leveling and patching compound; remove
39 bumps and ridges to produce a uniform and smooth substrate.
40 D. Do not install floor tiles until they are the same temperature as the space where they are to be installed.
41 E. Immediately before installation, sweep and vacuum clean substrates to be covered by resilient floor tile.

42 **3.2 FLOOR TILE INSTALLATION**

- 43 A. Comply with manufacturer's written instructions for installing floor tile.
44 B. Lay out floor tiles from center marks established with principal walls, discounting minor offsets, so tiles at
45 opposite edges of room are of equal width. Adjust as necessary to avoid using cut widths that equal less
46 than one-half tile at perimeter.
47 1. Lay tiles square with room axis.
48 C. Match floor tiles for color and pattern by selecting tiles from cartons in the same sequence as
49 manufactured and packaged, if so numbered. Discard broken, cracked, chipped, or deformed tiles.
50 1. Lay tiles with grain running in one direction.
51 D. Scribe, cut, and fit floor tiles to butt neatly and tightly to vertical surfaces and permanent fixtures including
52 built-in furniture, cabinets, pipes, outlets, and door frames.
53 E. Extend floor tiles into toe spaces, door reveals, closets, and similar openings. Extend floor tiles to center of
54 door openings.

- 1 F. Maintain reference markers, holes, and openings that are in place or marked for future cutting by repeating
2 on floor tiles as marked on substrates. Use chalk or other nonpermanent marking device.
3 G. Install floor tiles on covers for telephone and electrical ducts, building expansion-joint covers, and similar
4 items in finished floor areas. Maintain overall continuity of color and pattern between pieces of tile installed
5 on covers and adjoining tiles. Tightly adhere tile edges to substrates that abut covers and to cover
6 perimeters.
7 H. Adhere floor tiles to flooring substrates using a full spread of adhesive applied to substrate to produce a
8 completed installation without open cracks, voids, raising and puckering at joints, telegraphing of adhesive
9 spreader marks, and other surface imperfections.

10 **3.3 CLEANING AND PROTECTION**

- 11 A. Comply with manufacturer's written instructions for cleaning and protecting floor tile.
12 B. Cover floor tile until Substantial Completion.

13 **END OF SECTION**

21 PART 1 - **GENERAL**

22 1.1 **RELATED DOCUMENTS**

- 23 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 24 Division 01 Specification Sections, apply to this Section.

25 1.2 **SUMMARY**

- 26 A. Section includes surface preparation and the application of paint systems on exterior environment within
- 27 the garage vehicular parking space.
- 28 B. Related Requirements:
- 29 1. Section 05 50 00 "Metal Fabrications" for shop priming metal fabrications.
- 30 2. Section 05 53 13 "Bar Gratings" for shop priming metal gratings.

31 1.3 **DEFINITIONS**

- 32 A. MPI Gloss Level 1: Not more than five units at 60 degrees and 10 units at 85 degrees, according to ASTM
- 33 D 523.
- 34 B. MPI Gloss Level 3: 10 to 25 units at 60 degrees and 10 to 35 units at 85 degrees, according to ASTM D
- 35 523.
- 36 C. MPI Gloss Level 4: 20 to 35 units at 60 degrees and not less than 35 units at 85 degrees, according to
- 37 ASTM D 523.
- 38 D. MPI Gloss Level 5: 35 to 70 units at 60 degrees, according to ASTM D 523.
- 39 E. MPI Gloss Level 6: 70 to 85 units at 60 degrees, according to ASTM D 523.
- 40 F. MPI Gloss Level 7: More than 85 units at 60 degrees, according to ASTM D 523.

41 1.4 **ACTION SUBMITTALS**

- 42 A. Product Data: For each type of product. Include preparation requirements and application instructions.
- 43 1. Include printout of current "MPI Approved Products List" for each product category specified, with
- 44 the proposed product highlighted.
- 45 2. Indicate VOC content.
- 46 B. Samples for Verification: For each type of paint system and each color and gloss of topcoat.
- 47 1. Submit Samples on rigid backing, 8 inches square.
- 48 2. Step coats on Samples to show each coat required for system.
- 49 3. Label each coat of each Sample.
- 50 4. Label each Sample for location and application area.

- 1 **1.5 DELIVERY, STORAGE, AND HANDLING**
2 A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures
3 continuously maintained at not less than 45 deg F.
4 1. Maintain containers in clean condition, free of foreign materials and residue.
5 2. Remove rags and waste from storage areas daily.
- 6 **1.6 FIELD CONDITIONS**
7 A. Apply paints only when temperature of surfaces to be painted and ambient air temperatures are between
8 50 and 95 deg F.
9 B. Do not apply paints in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures
10 less than 5 deg F above the dew point; or to damp or wet surfaces.

11 **PART 2 - PRODUCTS**

12 **2.1 MANUFACTURERS**

- 13 A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
14 1. Benjamin Moore & Co.
15 2. Davis Paint Company.
16 3. Diamond Vogel Paints.
17 4. Glidden Professional.
18 5. Sherwin Williams

19 **2.2 PAINT, GENERAL**

- 20 A. Material Compatibility:
21 1. Materials for use within each paint system shall be compatible with one another and substrates
22 indicated, under conditions of service and application as demonstrated by manufacturer, based on
23 testing and field experience.
24 2. For each coat in a paint system, products shall be recommended in writing by topcoat
25 manufacturers for use in paint system and on substrate indicated.
26 B. Colors: As indicated in a color schedule.
27 C. Low-Emitting Materials: Architectural paints and coatings applied to walls and ceilings shall not exceed the
28 VOC content limits established in Green Seal Standard GS-11, Paints, 1st Edition, May 20, 1993.

29 **2.3 STAINS**

- 30 A. Concrete stains for parking garage structure:
31 1. 100% Acrylic emulsion wall stain:
32 a. Product: Loxon Vertical Concrete Stain as manufactured by Sherwin Williams.
33 b. Product: PERMA-CRETE® Vertical Concrete Stain VCS as manufactured by PPG Paints.
34 1) Sheen: Flat 0 to 5 (85° Gloss Meter)
35 2) Cleanup: Soap and Water
36 3) Volume Solids*: 39% +/- 2%
37 4) Weight Solids*: 53% +/- 2%
38 5) Viscosity*: 93 to 103 KU
39 6) VOC*: 85 g/L (0.71 lbs./gal.)
40 7) DRY FILM/COAT: 1.5 mils to 3.2 mils
41 8) DRYING TIME: Dry time @ 70°F (21°C); 50% relative humidity
42 a) To Recoat: 15 minutes
43 b) To Full Cure: 30 days

44 **2.4 SOURCE QUALITY CONTROL**

- 45 A. Testing of Paint Materials: Owner reserves the right to invoke the following procedure:
46 1. Owner will engage the services of a qualified testing agency to sample paint materials. Contractor
47 will be notified in advance and may be present when samples are taken. If paint materials have
48 already been delivered to Project site, samples may be taken at Project site. Samples will be
49 identified, sealed, and certified by testing agency.
50 2. Testing agency will perform tests for compliance with product requirements.
51

- 1 3. Owner may direct Contractor to stop applying paints if test results show materials being used do
2 not comply with product requirements. Contractor shall remove noncomplying paint materials from
3 Project site, pay for testing, and repaint surfaces painted with rejected materials. Contractor will be
4 required to remove rejected materials from previously painted surfaces if, on repainting with
5 complying materials, the two paints are incompatible.

6 **PART 3 - EXECUTION**

7 **3.1 EXAMINATION**

- 8 A. Examine substrates and conditions, with Applicator present, for compliance with requirements for
9 maximum moisture content and other conditions affecting performance of the Work.
10 B. Maximum Moisture Content of Substrates: When measured with an electronic moisture meter as follows:
11 1. Concrete: 12 percent.
12 2. Masonry (Clay and CMUs): 12 percent.
13 C. Verify suitability of substrates, including surface conditions and compatibility, with existing finishes and
14 primers.
15 D. Proceed with coating application only after unsatisfactory conditions have been corrected.
16 1. Application of coating indicates acceptance of surfaces and conditions.

17 **3.2 PREPARATION**

- 18 A. Comply with manufacturer's written instructions and recommendations in "MPI Architectural Painting
19 Specification Manual" applicable to substrates and paint systems indicated.
20 B. Clean substrates of substances that could impair bond of paints, including dust, dirt, oil, grease, and
21 incompatible paints and encapsulants.
22 C. Concrete Substrates: Remove release agents, curing compounds, efflorescence, and chalk. Do not paint
23 surfaces if moisture content or alkalinity of surfaces to be painted exceeds that permitted in manufacturer's
24 written instructions.
25 D. Masonry Substrates: Remove efflorescence and chalk. Do not paint surfaces if moisture content or
26 alkalinity of surfaces or mortar joints exceeds that permitted in manufacturer's written instructions.

27 **3.3 APPLICATION**

- 28 A. Apply paints according to manufacturer's written instructions and recommendations in "MPI Architectural
29 Painting Specification Manual."
30 1. Use applicators and techniques suited for paint and substrate indicated.
31 B. Tint undercoats same color as topcoat, but tint each undercoat a lighter shade to facilitate identification of
32 each coat if multiple coats of same material are to be applied. Provide sufficient difference in shade of
33 undercoats to distinguish each separate coat.
34 C. If undercoats or other conditions show through topcoat, apply additional coats until cured film has a
35 uniform paint finish, color, and appearance.
36 D. Apply paints to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller
37 tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.

38 **3.4 FIELD QUALITY CONTROL**

- 39 A. Dry Film Thickness Testing: Owner may engage the services of a qualified testing and inspecting agency
40 to inspect and test paint for dry film thickness.
41 1. Contractor shall touch up and restore painted surfaces damaged by testing.
42 2. If test results show that dry film thickness of applied paint does not comply with paint
43 manufacturer's written recommendations, Contractor shall pay for testing and apply additional coats
44 as needed to provide dry film thickness that complies with paint manufacturer's written
45 recommendations.
46

- 1 **3.5 CLEANING AND PROTECTION**
2 A. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project
3 site.
4 B. After completing paint application, clean spattered surfaces. Remove spattered paints by washing,
5 scraping, or other methods. Do not scratch or damage adjacent finished surfaces.
6 C. Protect work of other trades against damage from paint application. Correct damage to work of other
7 trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an
8 undamaged condition.
9 D. At completion of construction activities of other trades, touch up and restore damaged or defaced painted
10 surfaces.
- 11 **3.6 STAIN SYSTEMS**
12 A. Basis of Design Product: Pittsburgh Paints Perma-Crete Vertical Concrete Stain VCS 4-5100 Series.
13 B. Concrete: Cast-In-Place Concrete including but not limited to ceilings, columns, surfaces contiguous to
14 traffic coating and miscellaneous concrete surfaces.
15 1. Primer; None required.
16 2. Stain: Pittsburgh Paints Perma-Crete Vertical Concrete Stain VCS 4-5100 Series.
17 3. Coats: Provide 2 coat application at DFT recommended by manufacturer.
- 18 **3.7 PAINT SYSTEMS**
19 A. Concrete: Cast-In-Place Concrete including but limited to ceilings, columns, surfaces contiguous to traffic
20 coating and miscellaneous concrete surfaces.
21 1. Basis of Design: Sherwin Williams.
22 2. Dryfall Waterborne Topcoats:
23 a. Flat Finish:
24 1) 1st Coat: S-W Pro Industrial Waterborne Acrylic Dryfall, B42-80 Series.
25 2) 2nd Coat: S-W Pro Industrial Waterborne Acrylic Dryfall, B42-80 Series (6 mils wet,
26 1.7 mils dry per coat).
27 B. CMU Substrates:
28 1. Water-Based Light Industrial Coating System:
29 a. Prime Coat: Block filler, latex, interior/exterior.
30 b. Intermediate Coat: Light industrial coating, exterior, water based, matching topcoat.
31 c. Topcoat: Light industrial coating, exterior, water based (MPI Gloss Level 3).
32 d. Topcoat: Light industrial coating, exterior, water based, semi-gloss (MPI Gloss Level 5).
33 e. Topcoat: Light industrial coating, exterior, water based, gloss (MPI Gloss Level 6).

PARKING PAVEMENT MARKINGS**

- 1
- 2
- 3 PART 1 - GENERAL
- 4 1.1 RELATED DOCUMENTS
- 5 1.2 SUMMARY
- 6 1.3 SUBMITTALS
- 7 1.4 PROJECT CONDITIONS
- 8 1.5 QUALITY ASSURANCE
- 9 PART 2 – PRODUCTS
- 10 2.1 MATERIALS
- 11 2.2 PAVEMENT MARKING PAINTS
- 12 2.3 COLOR OF PAINT
- 13 2.4 BEADS
- 14 PART 3 – EXECUTION
- 15 3.1 EXAMINATION
- 16 3.2 PREPARATION
- 17 3.3 APPLICATION

18 **PART 1 - GENERAL**

19 **1.1 RELATED DOCUMENTS**

- 20 A. Contract Drawings and general provisions of the Contract.
- 21

22 **1.2 SUMMARY**

- 23 A. This Section includes surface preparation and application of paint systems for the high build, two coat
- 24 systems for the items of types, patterns, sizes, and colors described in this article.
- 25 B. Provide the following systems as shown on Drawings:
- 26 1. Parking Stall Stripes.
- 27 2. Traffic Arrows, crosswalks, accessible stall access aisles, walkways, symbols, stop bars, words
- 28 and other markings.
- 29 3. International Symbol of Accessibility.
- 30 C. Provide painting of curbs and curb ramps as described in the following paragraphs:
- 31 1. Paint vertical surface and the first 6 in. of the abutting horizontal surface at the top of all curbs and
- 32 islands (including PARCS equipment islands) within parking facility except those which do not
- 33 exceed 3'0" in width and abut a wall, spandrel panel, bumper wall guardrail or other construction
- 34 (not including landscaping or equipment) which prevents passage of pedestrians.
- 35 2. In parking areas, paint curb ramps (including flares), curb returns at curb ramps and any projecting
- 36 elements at edges of accessible ramps without handrails.
- 37 3. Paint color for curbs and curb ramps shall be yellow.
- 38 D. Proportion International Symbol of Accessibility in accordance with ICC A117.1-2009 Accessible and
- 39 Usable Buildings or 2010 ADA Standards for Accessible Design.
- 40 E. Related Work:
- 41 1. Pavement Marking Contractor shall verify compatibility with sealers, joint sealants, caulking and all
- 42 other surface treatments as specified in Division 07.
- 43

44 **1.3 SUBMITTALS**

- 45 A. Product Data: For each type of product indicated.
- 46 B. Provide product data as follows:
- 47 1. Manufacturer's certification that the material complies with standards referenced within this Section.
- 48 2. Intended paint use.
- 49 3. Pigment type and content.
- 50 4. Vehicle type and content.
- 51 C. Submit list of similar projects (minimum of 5) where pavement-marking paint has been in use for a period
- 52 of not less than 2 yrs.
- 53 D. Submittals and resubmittals: Engineer will review each of Contractor's shop drawings and/or submittal
- 54 data the initial time and, should resubmittal be required, one additional time to verify the reasons for
- 55 resubmittal have been addressed by Contractor and corrections made. Resubmittal
- 56 changes/revisions/corrections shall be circled. Engineer will review only circled items and will not be

1 responsible for non-circled changes/revisions/corrections and additions. Should additional resubmittals be
2 required, Contractor shall reimburse Owner for all costs incurred, including the cost of Engineer's service
3 made necessary to review such additional resubmittals. Owner will in turn reimburse Engineer.

4 E. Request for Information:

- 5
6 1. Engineer reserves the right to reject any Request for Information (RFI) that the Engineer, at its sole
7 discretion, deem frivolous.
8 2. Engineer reserves the right to reject, any RFI that the Engineer, at its sole discretion, deems
9 already answered in the Contract Documents.
10 3. RFI process shall not be used for requesting substitutions. Procedures for substitutions are clearly
11 specified elsewhere in the contract documents.

12
13 **1.4 PROJECT CONDITIONS**

- 14 A. Apply paints only when temperature of surfaces to be painted and ambient air temperatures are between
15 50 and 95 degrees F.
16 B. Do not apply paints in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures
17 less than 5 degrees F above the dew point; or to damp or wet surfaces.

18
19 **1.5 QUALITY ASSURANCE**

- 20 A. Provide written 1-year warranty to Owner that pavement markings will be free of defects due to
21 workmanship, inadequate surface preparation, and materials including, but not limited to, fading and/or
22 loss of markings due to abrasion, peeling, bubbling and/or delamination. Excessive delamination, peeling,
23 bubbling or abrasion loss shall be defined as more than 15% loss of marking material within one year of
24 substantial completion and/or occupancy of the parking area. With no additional cost to Owner, repair
25 and/or recoat all pavement marking where defects develop or appear during warranty period and all
26 damage to other Work due to such defects.

27 **PART 2 - PRODUCTS**

28 **2.1 MATERIALS**

- 29 A. Pavement marking materials shall meet Federal, State and Local environmental standards.
30 B. Paint shall be manufactured and formulated from first grade raw materials and shall be free from defects or
31 imperfections that might adversely affect product serviceability.
32 C. Paints shall comply with the National Organic Compound Emission Standards for Architectural Coatings,
33 Environmental Protection Agency, 40 CFR Part 59.
34 D. The product shall not contain mercury, lead, hexavalent chromium, or halogenated solvents.

35
36 **2.2 PAVEMENT MARKING PAINTS:**

- 37 A. Solvent based paint may be employed for yellow pavement markings and shall meet the requirements of
38 MPI #32
39 B. 100% acrylic waterborne paint for special color pavement markings (blue, green, red, black) shall meet
40 requirements of Federal Specification TT-P-1952E. Special color marking materials shall be compatible
41 with the white and yellow pavement markings where they are layered.

42
43 **2.3 COLOR OF PAINT**

- 44 A. Color of paint, unless noted otherwise on Contract Drawings, shall be yellow and shall match federal color
45 chip No. 33538. Color shall have daylight directional reflectance (without glass beads) of not less than
46 50% (relative to magnesium oxide) when tested in accordance with Federal Test Method Standard 141,
47 Method 6121.
48 B. Paint color for blue accessible parking space pavement markings, if shown on Contract Drawings, shall
49 match federal color chip No. 35180. Color shall have daylight directional reflectance (without glass beads)
50 of not less than 52% (relative to magnesium oxide) when tested in accordance with Federal Test Method
51 Standard 141, Method 6121.
52 C. Paint color for green special-use parking space pavement markings, if shown on Contract Drawings, shall
53 match federal color chip No. 34108. Color shall have daylight directional reflectance (without glass beads)
54 of not less than 52% (relative to magnesium oxide) when tested in accordance with Federal Test Method
55 Standard 141, Method 6121.
56 D. Paint color for red special-use parking space pavement markings, if shown on Contract Drawings, shall
57 match federal color chip No. 31136. Color shall have daylight directional reflectance (without glass beads)

- 1 of not less than 52% (relative to magnesium oxide) when tested in accordance with Federal Test Method
2 Standard 141, Method 6121.
3 E. Paint color for black special-use pavement markings, if shown on Contract Drawings, shall match federal
4 color chip No. 37038. Black paint shall also meet Federal Specification TT-P-110.
5
6 **2.4 BEADS**
7 A. Use Glass Beads (Spheres) in all pavement markings except stall striping lines. Conform to Federal
8 Specification TT-B-1325D, Type I. Broadcast beads into markings at rate not less than 6 lbs. per gallon of
9 paint.

10 **PART 3 - EXECUTION**

- 11 **3.1 EXAMINATION**
12 A. Examine substrates and conditions, with Applicator present, for compliance with requirements for
13 maximum moisture content and other conditions affecting performance of work.
14 B. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and
15 primers.
16 C. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.
17 1. Beginning coating application constitutes Contractor's acceptance of substrates and conditions.
18 D. Striping shall not be placed until full cure of concrete slab and sealer. Concrete surfaces generally require
19 30 to 90 days @ 70°F or higher. Sealers (other than silane) generally require 14 days @ 70°F or higher.
20 Silane sealers require 24 hrs @ 70°F or higher. Bituminous surfaces generally require 30 days @ 45° F or
21 higher.
22
23 **3.2 PREPARATION**
24 A. Comply with manufacturer's written instructions and recommendations in "MPI Architectural Painting
25 Specification Manual" applicable to substrates and paint systems indicated.
26 B. Do not paint or finish any surface that is wet or damp.
27 C. Clean substrates of substances that could impair bond of paints, including dirt, dust, oil, grease, and
28 incompatible paints and encapsulants.
29 D. Concrete Substrates: Remove release agents, curing compounds, efflorescence, and chalk. Do not paint
30 surfaces if moisture content or alkalinity of surfaces to be painted exceeds that permitted in manufacturer's
31 written instructions.
32 E. Lay out all striping on each tier, using dimensions and details shown on Contract Drawings, before painting
33 that tier. Report any discrepancies, interferences or changes in striping due to field conditions to
34 Engineer/Architect prior to painting. Pavement Marking Contractor shall be required to remove paint, repair
35 surface treatment and repaint stripes not applied in strict accordance with Contract Drawings.
36 F. Work Areas:
37 1. Store, mix and prepare paints only in areas designated by Contractor for that purpose.
38 2. Provide clean cans and buckets required for mixing paints and for receiving rags and other waste
39 materials associated with painting. Clean buckets regularly. At close of each day's Work, remove
40 used rags and other waste materials associated with painting.
41 3. Take precautions to prevent fire in or around painting materials. Provide and maintain appropriate
42 hand fire extinguisher near paint storage and mixing area.
43 G. Mixing:
44 1. Do not intermix materials of different character or different manufacturer.
45 2. Do not thin material except as recommended by manufacturer.
46 H. Disposal:
47 1. Contractor shall properly dispose of unused materials and containers in compliance with Federal
48 Resource Conservation Recovery Act (RCRA) of 1976 as amended, and all other applicable laws
49 and regulations.
50
51 **3.3 APPLICATION**
52 A. Apply paint in 2-coat system; first coat shall be 50% of total 15 wet mil minimum thickness, not to exceed 8
53 mils. First coat shall be cured prior to installation of second coat. At Contractor's option, one coat may be
54 applied before substantial completion, with a second coat delayed for 3-6 months until weather conditions
55 are appropriate and the concrete has cured sufficiently for proper adhesion.
56 1. Two coat system total wet mil thickness of 0.015 in (0.381 mm).

- 2. Two coat system total wet mil thickness of 0.018 to 0.025 in (0.457 – 0.635 mm) When Type IVA beads are used.
 - 3. Two coat system total wet mil thickness of 0.015 to 0.018 in (0.381 – 0.457 mm) When Type IVB beads are used.
 - B. Apply painting and finishing materials in accordance with manufacturer's directions. Use applications and techniques best suited for material and surfaces to which applied. Minimum air shall be used to prevent overspray. Temperature during application shall be minimum of 40° F and rising, unless manufacturer requires higher minimum temperature. Maximum relative humidity shall be as required by manufacturer.
 - C. Application of beads and/or silica sand shall coincide with application of paint, but shall be done as separate operation by a suitable dispenser. Sand may be premixed with paint for application to curbs only. Glass beads and silica sand shall adhere to the cured paint or all marking operations shall cease until corrections are made.
 - D. All lines shall be straight, true, and sharp without fuzzy edges, overspray or non-uniform application. Corners shall be at right angles, unless shown otherwise, with no overlaps. Line width shall be uniform (-0%, +5% from specified width). No excessive humping (more material in middle than at edges or vice versa).

15 3.4 [INTERIOR PAINTING SCHEDULE](#)

16 **PART 1 - GENERAL**

17 **1.1 RELATED DOCUMENTS**

- 18 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
19 Division 01 Specification Sections, apply to this Section.

20 **1.2 SUMMARY**

- 21 A. Section includes surface preparation and the application of paint systems in conditioned spaces only on the
22 following interior substrates:
23 1. Concrete.
24 2. Concrete masonry units (CMUs).
25 3. Steel and iron.
26 4. Galvanized metal.
27 5. Gypsum board.

28 **1.3 DEFINITIONS**

- 29 A. MPI Gloss Level 1: Not more than five units at 60 degrees and 10 units at 85 degrees, according to
30 ASTM D 523.
31 B. MPI Gloss Level 2: Not more than 10 units at 60 degrees and 10 to 35 units at 85 degrees, according to
32 ASTM D 523.
33 C. MPI Gloss Level 3: 10 to 25 units at 60 degrees and 10 to 35 units at 85 degrees, according to ASTM D 523.
34 D. MPI Gloss Level 4: 20 to 35 units at 60 degrees and not less than 35 units at 85 degrees, according to
35 ASTM D 523.
36 E. MPI Gloss Level 5: 35 to 70 units at 60 degrees, according to ASTM D 523.
37 F. MPI Gloss Level 6: 70 to 85 units at 60 degrees, according to ASTM D 523.
38 G. MPI Gloss Level 7: More than 85 units at 60 degrees, according to ASTM D 523.

39 **1.4 ACTION SUBMITTALS**

- 40 A. Product Data: For each type of product. Include preparation requirements and application instructions.
41 1. Include Printout of current "MPI Approved Products List" for each product category specified, with
42 the proposed product highlighted.
43 B. Sustainable Design Submittals:
44 1. Product Data: For paints and coatings, indicating VOC content.
45 C. Samples: For each type of paint system and in each color and gloss of topcoat.
46

1 **PART 2 - PRODUCTS**

2 **2.1 MANUFACTURERS**

- 3 A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may
4 be incorporated into the Work:
- 5 1. Benjamin Moore & Co.
 - 6 2. Hallman Lindsay Paints, Inc.
 - 7 3. PPG: including their Dulux/ICI Paints, AkzoNobel.
 - 8 4. Sherwin-Williams Company (The), including their Valspar range.

9 **2.2 PAINT, GENERAL**

- 10 A. MPI Standards: Products shall comply with MPI standards indicated and shall be listed in its "MPI Approved
11 Products Lists."
- 12 B. Material Compatibility:
- 13 1. Materials for use within each paint system shall be compatible with one another and substrates
14 indicated, under conditions of service and application as demonstrated by manufacturer, based on
15 testing and field experience.
 - 16 2. For each coat in a paint system, products shall be recommended in writing by topcoat manufacturers
17 for use in paint system and on substrate indicated.
- 18 C. Low-Emitting Materials: Architectural paints and coatings applied to walls and ceilings shall not exceed the
19 VOC content limits established in Green Seal Standard GS-11, Paints, 1st Edition, May 20, 1993.

20 **PART 3 - EXECUTION**

21 **3.1 EXAMINATION**

- 22 A. Examine substrates and conditions, with Applicator present, for compliance with requirements for maximum
23 moisture content and other conditions affecting performance of the Work.
- 24 B. Maximum Moisture Content of Substrates: When measured with an electronic moisture meter as follows:
- 25 1. Concrete: 12 percent.
 - 26 2. Masonry (Clay and CMUs): 12 percent.
 - 27 3. Gypsum Board: 12 percent.
- 28 C. Proceed with coating application only after unsatisfactory conditions have been corrected.
- 29 1. Application of coating indicates acceptance of surfaces and conditions.

30 **3.2 PREPARATION**

- 31 A. Comply with manufacturer's written instructions and recommendations in "MPI Architectural Painting
32 Specification Manual" applicable to substrates and paint systems indicated.
- 33 B. Remove hardware, covers, plates, and similar items already in place that are removable and are not to be
34 painted. If removal is impractical or impossible because of size or weight of item, provide surface-applied
35 protection before surface preparation and painting.
- 36 1. After completing painting operations, use workers skilled in the trades involved to reinstall items that
37 were removed. Remove surface-applied protection if any.

38 **3.3 APPLICATION**

- 39 A. Apply paints according to manufacturer's written instructions and recommendations in "MPI Architectural
40 Painting Specification Manual."
- 41 B. Apply paints to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller
42 tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.
- 43

- 1 **3.4 INTERIOR PAINTING SCHEDULE**
2 A. Refer to Materials Finish Legend for PT-# colors.
3 B. Concrete Substrates, Nontraffic Surfaces:
4 1. Institutional Low-Odor/VOC Latex System MPI INT 3.1M:
5 a. Prime Coat: Primer sealer, interior, institutional low odor/VOC, MPI #149.
6 b. Intermediate Coat: Latex, interior, institutional low odor/VOC, matching topcoat.
7 c. Topcoat: Latex, interior, institutional low odor/VOC, flat (MPI Gloss Level 2), MPI #143.
8 C. CMU Substrates:
9 1. Institutional Low-Odor/VOC Latex System MPI INT 3.1M:
10 a. Prime Coat: Primer sealer, interior, institutional low odor/VOC, MPI #149.
11 b. Intermediate Coat: Latex, interior, institutional low odor/VOC, matching topcoat.
12 c. Topcoat: Latex, interior, institutional low odor/VOC, flat (MPI Gloss Level 2), MPI #143.
13 D. Steel Substrates:
14 1. Institutional Low-Odor/VOC Latex System MPI INT 5.1S:
15 a. Prime Coat: Primer, rust inhibitive, water based MPI #107.
16 b. Intermediate Coat: Latex, interior, institutional low odor/VOC, matching topcoat.
17 c. Topcoat: Latex, interior, institutional low odor/VOC (MPI Gloss Level 2), MPI #144.
18 E. Gypsum Board and Plaster Substrates:
19 1. Institutional Low-Odor/VOC Latex System MPI INT 9.2M:
20 a. Prime Coat: Primer sealer, interior, institutional low odor/VOC, MPI #149.
21 b. Intermediate Coat: Latex, interior, institutional low odor/VOC, matching topcoat.
22 c. Topcoat: Latex, interior, institutional low odor/VOC, flat (MPI Gloss Level 2), MPI #143.
23 F. Insulation-Covering Substrates: Including pipe and duct coverings.
24 1. Institutional Low-Odor/VOC Dryfall Latex System MPI INT 10.1D:
25 a. Prime Coat: Primer sealer, latex, interior, MPI #50.
26 b. Intermediate Coat: Latex, interior, institutional low odor/VOC, matching topcoat.
27 c. Topcoat: Latex, interior, institutional low odor/VOC, flat (MPI Gloss Level 2), MPI #143.

20 **PART 1 - GENERAL**

21 **1.1 RELATED DOCUMENTS**

- 22 A. Drawings and general provisions of Contract, apply to this Section.
23
24

25 **1.2 SUMMARY**

- 26 A. This Section includes following types of signs:
27 1. Reflective vehicular directional and information signs (V- Signs).
28 2. Retroreflective regulatory signs (R- Signs).
29 3. Non-reflective pedestrian directional and informational signs (PP- Signs).
30 4. Pedestrian Supergraphic Signs (PS- Signs).
31 5. PVC Pipe Clearance Signs (PVC- Signs).
32 6. Vandal-resistant Signs (VR- Signs).
33 7. Traffic Controller Signs (TC- Signs).
34 8. Dynamic Message Signs (DM- Signs).
35 9. Internally-Illuminated Signs (I- Signs).
36 B. Related Sections include following:
37 1. Division 14 Section "Elevators" for elevator door jamb markings and "In Case of Fire..." signage.
38 2. Division 26 Section "Interior Lighting" for illuminated exit signs.
39 3. See Division 26 Sections for electrical service and connections for electrified and/or illuminated
40 signs and/or letters.
41

42 **1.3 SUBMITTALS**

- 43 A. General: Submit following in accordance with Conditions of Contract and Division 01 Specification
44 Sections.
45 B. Product Data: Include manufacturer's construction details relative to materials, dimensions of individual
46 components, profiles, and finishes for each type of sign required.
47 C. Shop Drawings: Provide shop drawings for fabrication and erection of signs. Include plans, elevations,
48 and large-scale sections of typical members and other components. Show mounting methods, mounting
49 heights, anchors, grounds, reinforcement, accessories, layout, spacing, dimensions and installation
50 details.
51 1. Provide message list, typestyles, graphic elements, including tactile characters and Braille and
52 artwork as shown on drawings, and layout of lettering. Include large scale details of sign layout.
53 2. For signs supported by or anchored to permanent construction, provide setting drawings,
54 templates, and directions for installation of anchor bolts and other anchors to be installed as a unit
55 of Work in other Sections.
56 3. Wiring Diagrams from manufacturer of electrified signs for power, signal and control wiring.
57 D. Samples: Provide following samples of each sign component for verification of compliance with
58 requirements indicated.

- 1 1. Samples of each sign material type (V-, R-, PP-, VR-, etc), on not less than 6-in. squares of
2 extrusion, sheet or plate, showing full range of colors to be provided.
- 3 E. Maintenance Data: For signage cleaning and maintenance requirements to be included in maintenance
4 manual.
- 5 F. Submittals and resubmittals: Engineer will review each of Contractor's shop drawings and/or submittal
6 data the initial time and, should resubmittal be required, one additional time to verify the reasons for
7 resubmittal have been addressed by Contractor and corrections made. Resubmittal
8 changes/revisions/corrections shall be circled. Engineer will review only circled items and will not be
9 responsible for non-circled changes/revisions/corrections and additions. Should additional resubmittals be
10 required, Contractor shall reimburse Owner for all costs incurred, including the cost of Engineer's service
11 made necessary to review such additional resubmittals. Owner will in turn reimburse Engineer.
- 12 G. Request for Information:
- 13 1. Engineer reserves the right to reject any Request for Information (RFI) that the Engineer, at its sole
14 discretion, deem frivolous.
- 15 2. Engineer reserves the right to reject, any RFI that the Engineer, at its sole discretion, deems
16 already answered in the Contract Documents.
- 17 3. RFI process shall not be used for requesting substitutions. Procedures for substitutions are clearly
18 specified elsewhere in the contract documents.
- 19
- 20 **1.4 QUALITY ASSURANCE**
- 21 A. Qualifications: Manufacturers: Only pre-approved manufacturers as listed herein allowed. Sign
22 manufacturer shall have completed a minimum of 3 projects in last 3 years with similar materials and
23 methods of manufacture as required for this project.
- 24 B. Where warranties are required, manufacturer and/or installers shall be authorized by the entity providing
25 the warranty.
- 26 C. All completed signs shall be free from defects in materials and workmanship and effectively present
27 specified or permitted message under both day and night viewing conditions. Sign faces shall be
28 reasonably smooth, shall exhibit uniform color and brightness over entire background surface and shall not
29 appear mottled, streaked, or stained when viewed either in ordinary daylight or incidental beams of
30 automobile headlamps.
- 31 D. Support structures for signs that are free-standing or extending from any exterior surface of the building,
32 including but not limited to the roof level parking signs on cantilever supports, shall be designed by a
33 licensed professional engineer in the State of Wisconsin in accordance with ASCE 7-98's requirements for
34 wind loads.
- 35 E. Internally illuminated or electrified sign cases (, TC-, CM-, DM-, and I-): Housing shall be waterproof and
36 shall comply with NEMA Standards Publication 250-Enclosures for Electrical Equipment, for Type 4
37 enclosures.
- 38 F. Electrical Components, Devices and Accessories: All components shall be listed and labeled by UL and
39 shall comply with NEMA and NFPA standards.
- 40 G. Electrical Service: Sign contractor shall review electrical drawings and coordinate with electrical contractor
41 for any minor changes to design and installation of equipment and/or electrical service for powering signs
42 and/or illumination thereof. If change order(s) are possible, use the Request for Information process.
- 43 H. Regulatory Requirements:
- 44 1. Comply with Americans with Disabilities Act (ADA) and state and local codes as adopted by
45 authorities having jurisdiction.
- 46 2. MUTCD:
- 47 a. Regulatory R- signs shall be fully compliant with all requirements of the Manual on Uniform
48 Traffic Control Devices (MUTCD) except that sign size may be modified due to space
49 constraints.
- 50 I. Single-Source Responsibility: For each separate required type of sign as defined herein, obtain signs from
51 a single firm specializing in this type of work so that there will be undivided responsibility for such work.
- 52 J. Design Criteria: Drawings indicate sizes, profiles, and dimensional requirements of signs. Other signs with
53 deviations from indicated dimensions and profiles may be considered, provided deviations do not change
54 design concept. Burden of proof of equality is on proposer.
- 55 K. Coordinate sign placement with structural configuration and lighting location. Before sign installation,
56 arrange meeting with Engineer/Architect and lighting installer at site to review sign placement. Additional
57 compensation not allowed for relocating signs after installation if relocation required due to conflicts with
58 lighting or structure.
- 59 L. Trade Names: Do not display manufacturer's name, trade name, trademarks, or similar markings on
60 exterior or visible surfaces.
- 61 M. Sign Quantity Count: Sign Fabricator shall be responsible for determining the final quantity count of all
62 signs, as indicated on the Signage Schedule and Location Plans, prior to fabrication.

- 1 N. Provide written 5 year full replacement warranty to Owner that all signage will be free of defects due to
2 workmanship and materials including, but not limited to, fading, peeling, delamination, and installation.
3 With no additional cost to Owner, repair all defects that develop during warranty period and all damage to
4 other Work due to such defects. NOTE: Additional warranties apply to specific sign types and products, as
5 specified herein.
- 6 O. Finishes Warranty: Submit five-year written warranty, signed by the Contractor and Installer, warranting
7 that the architectural signage finishes will not develop excessive fading or excessive non-uniformity of
8 color or shade and will not crack, peel, pit or corrode or otherwise fail as a result in defects, within the
9 warranty period, make necessary repairs or replacement at the convenience of the owner or facility's
10 management.
- 11 1. "Excessive Fading": A change in appearance which is perceptible and objectionable as determined
12 by the Designer when visually compared with the original color range standards.
- 13 2. "Excessive Non-Uniformity": Non-Uniform fading during the period of the guarantee, to the extent
14 that adjacent panels have a color difference greater than the original acceptance range of color.
- 15 3. "Will Not Pit or Otherwise Corrode": No Pitting or other type of corrosion discernible from a
16 distance of 10'-0", resulting from the natural elements in the atmosphere at the project site.
- 17 P. Replacement or Repairs: The owner or facilities management shall have the right to continue use of the
18 defective part until such time that the part is replaced or repaired without loss or inconvenience to the
19 owner or facility's management. Warranties shall also state that the replaced or repaired part shall have a
20 warranty period equal to the remaining warranty period for the replaced or repaired part plus an additional
21 one year.

22 23 **1.5 PROJECT CONDITIONS**

- 24 A. Field Measurements: Take field measurements prior to preparation of shop drawings and fabrication to
25 ensure proper fitting and mounting. Where sizes of signs may be affected by dimensions of surfaces on
26 which they are installed, verify dimensions by field measurement. Show recorded measurements on final
27 shop drawings. Coordinate fabrication schedule with construction progress to avoid delay.

28 29 **1.6 COORDINATION**

- 30 A. For signs to be supported by or anchored to permanent construction, provide installers with specific
31 requirements for anchorage devices. Furnish templates for installation.
- 32 B. Coordinate location of remote transformers with building construction. Ensure that transformers are
33 accessible after completion of Work.

34 35 **1.7 MAINTENANCE**

- 36 A. Maintenance Instruction: Furnish maintenance manual to instruct the owner or facility's management
37 personnel in procedures to be followed in cleaning and maintaining the signage. Provide manufacturer's
38 brochures describing the actual materials used in the Work, including metal alloys and finishes.
- 39 1. Include a list of cleaning materials appropriate for continued cleaning of signs. Include written
40 instructions for proper maintenance, service access, replacement procedures, etc. Include
41 recommended methods for removal of residual adhesives from wall surfaces after removal of
42 adhesive mounted signs.
- 43 B. Extra Materials: Deliver to the owner or facility's management in manufacturer's original packaging and
44 store at the project site where directed.
- 45 1. Furnish one quart of each finish paint color for touch-up purposes.

46 **PART 2 - PRODUCTS**

47 48 **2.1 MANUFACTURERS**

- 49 A. Basis of Design Product: Where named products are specified, subject to compliance with requirements
50 specific to this project, provide either named product or an equivalent product by other manufacturers
51 specified.
- 52 B. Manufacturers: Subject to compliance with requirements specific to this project, accepted manufacturers
53 listed in Part 2 are considered to have been prequalified in conformance with paragraph 1.4.A and B of this
54 section. Acceptable manufacturers include, but are not limited to the following:
- 55 1. Manufacturers of panel signs, including V-,R-, PP-,PS- and, VR- signs:
- 56 a. ABC Architectural Signing System, Division of Nelson-Harkins Industries.
- 57 b. Alcan Composites, Benton, KY.
- 58 c. Allenite, A Division of Allen Marking Products, Inc.
- 59 d. Andco Industries Corp.

- 1 e. APCO Graphics, Inc.
- 2 f. Architectural Graphics, Inc.
- 3 g. ASI Sign Systems, Inc.
- 4 h. Best Manufacturing Co.
- 5 i. Interstate Highway Sign Corp.
- 6 j. Henry Graphics.
- 7 k. Britten Studios.
- 8 l. Pannier Graphics.
- 9 m. Tapco.
- 10 n. Vomar.
- 11 o. Signs + Decal Corp., Brooklyn, NY
- 12 p. Takeform, Medina, NY
- 13 2. Manufacturers of TC-, and DM- signs:
- 14 a. National Sign & Signal Company.
- 15 b. C.J. Hood Co.
- 16 c. Colite Industries, Inc.
- 17 d. Daktronics.
- 18 e. Signal Tech (formerly Howard Industries).
- 19 f. 3M Dynamic Message Signs (formerly American Electronic Sign).
- 20 3. Manufacturers of I- signs:
- 21 a. Andco Industries Corp.
- 22 b. ASI Sign Systems, Inc.
- 23 c. Interstate Highway Sign Company.
- 24 d. Vomar.
- 25 e. Signs + Decal Corp., Brooklyn, NY

2.2 MATERIALS

A. Graphics:

- 28 1. Graphics shall be highest quality with sharp lines and smooth curves. Images shall be uniform
29 colors and free from streaks or spotting.
- 30 2. Silk screening: Where specified or permitted, silk screening shall be highest quality, with sharp
31 lines, no sawtooths, or uneven ink coverage.
 - 32 a. Screens shall be photographically reproduced.
 - 33 b. Background ink shall be process inks as recommended by manufacturer of substrate
34 employed.
 - 35 c. Ink application through screens: 1 flood pass and 1 print pass. Images: uniform color and
36 ink thickness; free from squeegee marks and lines.
 - 37 d. Signs: dry in adequate racks with 2 in. spacing for ample air flow and forced air drying and
38 curing.
 - 39 e. Package signs only after they have dried completely per ink manufacturer's time
40 allowances.
 - 41 f. Where reflective messages are specified or permitted to be reverse silk-screened with a
42 non-reflective, opaque background, the sheeting material shall be 3M Scotchlite Engineer
43 Grade Reflective Sheeting Series 3200 or equivalent meeting US Department of
44 Transportation Standard Specification for Construction of Roads and Bridges on Federal
45 Highway Products, 1985 FP-85, Type II, Section 718.01.
 - 46 g. Where reflective messages are specified or permitted to be reverse silk-screened with a
47 reflective, transparent background, the sheeting material shall be 3M Scotchlite High
48 Intensity Grade Sheeting Series 3930 or equivalent meeting US Department of
49 Transportation Standard Specification for Construction of Roads and Bridges on Federal
50 Highway Products, 1985 FP-85, Type IIIA, Section 718.01.
- 51 3. Pressure applied graphics:
 - 52 a. Where pressure-applied graphics applied to a painted background are specified or
53 permitted, the paint shall be flat, opaque acrylic polyurethane as recommended by
54 manufacturer of substrate and graphic media.
 - 55 b. Where pressure-applied, reflective graphics on an opaque painted background are specified
56 or permitted, letters shall be digitally produced, and cut by electronic cutting machines from
57 3M Scotchlite Electrocut Engineer Grade Sheeting Series 3260 material, colors as noted on
58 drawings or equivalent. Edges shall be sealed per manufacturer recommendation.
 - 59 c. Where pressure-applied, reflective graphics on a reflective background are specified or
60 permitted, the sheeting material shall be 3930 Hi Intensity Prismatic or equivalent meeting
61

- 1 US Department of Transportation Standard Specification for Construction of Roads and
2 Bridges on Federal Highway Products, 1985 FP-85, Type IIIA, Section 718.01. The letters
3 shall be digitally produced, and cut by electronic cutting machines from 3M Scotchlite
4 Electronic Cuttable Film Series 1170, colors as noted on drawings or equivalent.
- 5 d. Where pressure-applied, non-reflective graphics are specified, letters shall be digitally
6 produced, and cut by computer-driven processes from 3M Scotchcal Electrocut 7725 film.
- 7 e. Where electronically cut letters and symbols are specified, the inside corners shall be
8 rounded using the largest radius consistent with acceptable appearance. Minimum radius
9 shall be 1/8 inch on a 3 inch letter. Use prespacing tape as recommended by manufacturer
10 of sheeting as a carrier for letters, numerals and symbols.
- 11 4. Where specified, dry film transfer shall be produced digitally using computer-driven Dry Thermal
12 Transfer system over 3M high intensity reflective vinyl substrates.
- 13 5. All products specified to employ 3M sheeting, films, or other components shall be guaranteed and
14 backed by 3M MCS Warranty or equivalent.
- 15 B. Inks and Paints:
- 16 1. All inks and paints shall be a type made for surface material to which it is applied, and
17 recommended by manufacturer. Exact identification shall be noted on shop drawings, with data
18 describing application method, if other than air-drying. Prohibited: paint or ink that will fade,
19 discolor, or delaminate due to UV or heat exposure.
- 20 2. All colors for which color match specified shall be approved by Engineer/Architect prior to
21 production.
- 22 3. Acceptable manufacturers and suppliers of inks for silk-screening shall be only those materials
23 recommended by the manufacturer of the sheeting and as required for 3M MCS warranty, or
24 equivalent, where applicable.
- 25 4. Paints: all materials best quality. Products of DuPont DeNemours & Company, Pittsburgh Plate
26 Glass Company, Glidden, Matthews or Sherwin-Williams acceptable.
- 27 a. Opaque background for pressure applied graphics: Two part acrylic polyurethane, low gloss.
28 Care shall be taken to provide proper curing so that outgassing does not occur after
29 application of sheeting and/or graphics.
- 30 b. Base for painted graphics on concrete, stucco, masonry and concrete masonry units to be
31 prepared per Paint specifications. Graphics two part acrylic polyurethane, low gloss.
- 32 5. Applied color whether ink or paint shall conform to color and accelerated weathering requirements
33 of FP-79 and shall not be removable when tested by Film Adhesion Test and by Film Hardness
34 Test.
- 35 C. Blank Panels: Comply with requirements indicated for materials, thickness, finish, color, design, shape,
36 size, and details of construction.
- 37 1. General:
- 38 a. Produce smooth, even, level sign panel surfaces, constructed to remain flat under installed
39 conditions within a tolerance of plus or minus 0.0625 in. measured diagonally.
- 40 b. The back side and edges of all panel signs shall be painted with acrylic polyurethane, color
41 to match the specified background color.
- 42 c. Edge Condition: Square cut.
- 43 d. Corner Condition: Square cut for all signs except Regulatory and Warning signs.
44 Regulatory and Warning sign corners shall be rounded per MUTCD.
- 45 2. Aluminum:
- 46 a. Provide aluminum sheet of 6061-T6 or 5052-H38 alloys and temper recommended by
47 aluminum producer or finisher for use type and finish indicated, and with not less than
48 strength and durability properties specified in ASTM B209 for 5005-H15.
- 49 b. Aluminum extrusions shall be of alloy and temper recommended by aluminum producer for
50 type of use and finish and with not less than strength and durability properties specified in
51 ASTM B221 for 6063-T5.
- 52 c. Panels shall be etched, degreased, flat, and free of ragged edges. Radius corners by
53 stamping. All signs of same size shall be totally uniform in size. Surface shall be completely
54 clear of dust and dirt before finishes applied.
- 55 d. Panels to receive 3M sheeting and/or paint shall be treated with an anodizing conversion
56 coating to provide resistance to corrosion and white rust formation. Conversion coating may
57 be:
- 58 1) Chromate, meeting ASTM B449 class 2. Coating weight should be 10 to 35 mg per
59 sq ft with a median of 25 mg per square foot. Coating shall not be dusty and shall be
60 tightly bonded within itself and to the aluminum substrate.
- 61 2) Non-chromate coatings must meet the requirements for ASTM B449 class 1
62 chromate coatings. The non-chrome coating shall be adherent and non-powdery.

- 1 Adhesion of air dried acrylic coating shall meet ASTM D 3359 or ASTM D 4541 and
2 must be equivalent to that of the coating on chromate coated aluminum of the same
3 alloy.
- 4 e. Fabricate aluminum signs with adequately sized, full-length stiffener members as indicated
5 on Drawings.
- | | | | |
|---|-------------------|-------|-----------------|
| 6 | Calcium Carbonate | <5.0% | |
| 7 | Other | | 5-10% |
| 8 | Melting Point | | >350 degrees F. |
- 9 D. V- Signs: Vehicular signs with reflective graphics and retroreflective message on an opaque background.
- 10 1. Base materials:
- 11 a. Aluminum with either reverse silk screened graphics or pressure-applied retroreflective
12 letters.
- 13 2. Graphics and Copy: Any of the following methods of producing graphics and copy may be
14 employed.
- 15 a. Pressure applied retroreflective white letters/symbols. Use 3M High Intensity Prismatic
16 White Sheeting 3930.
- 17 b. Silk screened; background inks shall be opaque, with retroreflective message.
- 18 E. R- Regulatory and W- Warning vehicular signs with retroreflective graphics and message on a
19 retroreflective background.
- 20 1. All regulatory and warning signs to fully comply with MUTCD standards.
- 21 2. Base material: Aluminum.
- 22 3. R and W signs shall have retroreflective messages and retroreflective background using either silk
23 screening or pressure applied retroreflective letters and symbols.
- 24 4. Retroreflective colors determined by 23 CFR Appendix to Subpart F of Part 655, Alternate Method
25 to Determining the Color of Retro-reflective Sign Materials and pavement marking materials.
- 26 a. Federal Highway Authority (FHWA) Reflective Sheeting Identification Guide using ASTM D
27 4956-04.
- 28 b. Sheeting Types I through IX.
- 29 c. The daytime color of non-fluorescent retroreflective materials may be measured in
30 accordance with ASTM Method E 1349, Standard Test Method for Reflectance Factor and
31 Color by Spectrophotometry using Bi-directional Geometry of ASTM Test Method E 1347.
32 Standard Test Method for Color and Color-Difference Measurement by Tristimulus
33 Colorimetry.
- 34 d. The geometric conditions to be used in both test methods are 0/45 or 45/0 circumferential
35 illumination or viewing. The CIE standard illuminant used in computing the colorimetric
36 coordinates shall be D 65.
- 37 e. For fluorescent retroreflective materials ASTM E991 may be used to determine the
38 chromaticity provided that the D65 illumination meets the requirements for E 991.
- 39 f. The following 3M Diamond Grade DG³ Reflective Sheeting materials meet the MUTCD
40 retroreflective requirements:
- | | |
|----|--|
| 41 | 1) White – DG ³ 4090 |
| 42 | 2) Red - DG ³ 4092 |
| 43 | 3) Blue – DG ³ 4095 |
| 44 | 4) Yellow - DG ³ 4091 |
| 45 | 5) Green – DG ³ 4097 |
| 46 | 6) Brown – DG ³ 4099 |
| 47 | 7) Fluorescent Yellow – DG ³ 4081 |
| 48 | 8) Fluorescent Yellow Green – DG ³ 4083 |
| 49 | 9) Fluorescent Orange - DG ³ 4084 |
- 50 F. PP- Pedestrian Panel Wayfinding and Directional Signs.
- 51 1. Base materials:
- 52 a. Aluminum with either reverse silk screened graphics or pressure-applied letters.
- 53 2. Graphics and Copy: Any of the following methods of producing graphics and copy may be
54 employed:
- 55 a. Pressure applied non-reflective letters/symbols.
- 56 b. Silk screened over a flat opaque background.
- 57 G. PS-Supergraphics, Pedestrian Wayfinding and Directional Signs:
- 58 1. Painted Super-Graphics: Where graphics painted directly on walls, doors or other surfaces are
59 specified, message template to be:
- 60 a. Pressure applied electronically cut graphics.

2. Apply primer and/or background color as specified on the drawings to surface as required. Sign contractor shall assure that paint employed for graphics is compatible with surface treatment(s) by others, including but not limited to concrete sealers and/or form release agents.
- H. PVC- Signs: PVC pipe clearance signs shall have pressure applied decals on black PVC pipe, rectangular retroreflective yellow base sticker 3M Diamond Grade yellow sheeting DG³ 4091 with black border, rounded corners, and black text. See drawings.
1. Electronically cut letters: 3M Scotchlite 3840 reflective sheeting.
 2. 10 in. diameter, Schedule 40 PVC pipe, Corrosion Fluid Products Corporation, Addison, IL, or accepted equivalent. Color black.
 3. If black PVC is not available, Paint: "Spraylat" Lacryl B No. 482 High Hiding Black. Meet Lacryl system specifications for painting on PVC.
- I. VR- Signs: Vandal-resistant signs where specified, shall have copy and graphics on second surface.
1. Base material shall be one of the following:
 - a. "Lexan" General Electric Co., or accepted equivalent. Permanently laminate face panels to backing sheets of material and thickness indicated using manufacturer's standard process. Except where digital art is required, signs shall be silk screened on second surface or single sheet.
 - b. "Modulite/Moducal" by Pannier Graphics or equivalent fiberglass reinforced plastic (FRP) material. Copy and graphics shall be permanently embedded in fiberglass panel. Resulting sign shall be a solid, one-piece panel with graphic elements inseparable from fiberglass in which they are embedded. Laminated or encapsulated products will not be accepted.
 2. Sign shall not be permanently defaced by steam, acids, aromatics, scratching, inks or paints and should be capable of being readily wiped clean with paint remover without affecting appearance or legibility of graphics. Sign shall retain legibility and finished appearance when sprayed with a 10% solution of hydrochloric, nitric or sulfuric acid for one-half hour or when scrubbed by a brush of medium hardness using common commercial cleaning compounds such as ammonia, laundry soaps, detergents, carbon tetrachloride or petroleum based solvents.
 3. Sign shall be translucent with a clear or matte finish, as indicated. The index of refraction shall ensure clarity of color, copy and graphics.
 4. Sign shall be router cut with sign edges not crazed or cracked and edge finish shall be smooth, neat and clean.
 5. Original art and/or multi-colored graphics shall be digitally produced, electronic media.
 6. Use colored coatings, including inks and paints for copy and background colors, recommended by manufacturer of sheet for optimum adherence to sheet surface and that are non-fading for application.
 7. Fasteners shall be mechanical, concealed and tamper proof.
- J. Illuminated Traffic Controller Signs (TC- Signs):
1. Illuminated traffic control signs shall be Signal Tech LED controller or equivalent. Traffic arrows shall be TCL1212 series; open/closed or full messages shall be TCL718 series.
 2. Display technology shall be super bright LED using aluminum gallium indium phosphide (ALGaInP) diodes. Viewing angle shall be 70°.
 3. Provide for automatic control from PARCS system computer with individual manual override operator control switches located in parking office. In addition, provide additional manual override switches in cashier booth nearest lane controlled.
- K. Dynamic Message Signs (DM- Signs):
1. Sign design, construction, fabrication, and assembly shall be sign contractor responsibility, subject to Engineer/Architect's review. Where free-standing, supports shall meet AASHTO Standard Specifications for Highway Signs, Luminaries and Traffic Signals (Latest edition).
 2. System to be Daktronics Vanguard VMS or equivalent. Each message line shall be variable and programmable. Display technology shall be LED using aluminum gallium indium phosphide (ALGaInP) diodes. Each digit shall be 7" high, with 7 LED bar segments in amber unless noted otherwise on drawings. The number of characters and/or lines per sign is variable by location, as shown on the drawings.
 3. Product shall include all hardware and hardware for Central Control of messages including a computer terminal dedicated thereto. System shall be National Transportation Communications for ITS Protocol (NTCIP) compliant. Control software shall use Windows® NT operating system, with the following features:
 - a. User interface configurable for specific sign size (WYSIWYG).
 - b. Multiple security password levels.
 - c. Message creation & editing capability.
 - d. Graphics display capability.
 - e. Fonts can be changed and customized to fit client needs.

- 1 f. Message preview function.
- 2 g. Flexible message library.
- 3 h. Message scheduling.
- 4 i. Scenario manager.
- 5 j. Quick message capability.
- 6 k. Real-time message verification.
- 7 l. Automatic or manual dimming.
- 8 m. Sign status monitoring.
- 9 n. VMS system diagnostics (pixels, power supplies, etc.).
- 10 o. Controls multiple signs within VMS network.
- 11 p. Interfaces with various communication systems (telephone, cellular, fiber, radio, CDPD).
- 12 q. Map view user interface.
- 13 4. Functional Requirements:
 - 14 a. The number of messages per sign required is variable by location, as shown on the
 - 15 drawings.
 - 16 b. All messages shall be clearly legible, attracting attention under any lighting condition. At full
 - 17 intensity, sign shall be visible anywhere within 60° cone centered about optic axis.
 - 18 c. Where two-way messages are specified, each shall be single or mult-message overlay.
 - 19 d. Sign shall completely blank out when not energized. No phantom message shall be visible
 - 20 under any ambient light condition.
 - 21 e. Technology shall be solid state, redundant circuitry so that removal or failure of one
 - 22 component has minimal or no effect on overall sign performance.
 - 23 f. Signs shall be capable of continuous operation from -35° F to 165° F.
- 24 L. Internally Illuminated Signs (I Signs):
 - 25 1. Sign design, construction fabrication and assembly shall be contractor responsibility, subject to
 - 26 Engineer's review.
 - 27 2. Aluminum panels, when proposed, to be extruded, anodized aluminum with welded corners and
 - 28 aluminum tube framing as required for straight profiles. Case shall be finished with baked enamel
 - 29 or duranodic in color as shown on the drawings. Illuminated messages, where required, shall be
 - 30 precision cut and filled with translucent material. Illuminated graphics shall be integral and flush
 - 31 with sign face for flat appearance. Raised letters or those projecting beyond sign face will not be
 - 32 accepted.
 - 33 3. Non-illuminated messages, where specified, shall employ any of the following methods:
 - 34 a. Pressure applied non-reflective letters/symbols.
 - 35 b. Silk screened.
 - 36 4. Full message where shown shall be LED letters. Full message shall not be readable when turned
 - 37 off. Full message shall be controlled by PARCS system.
 - 38 5. No buckling, weaving, or oil canning of face panels.
 - 39 6. Sign mounting shall be as noted as drawings from among following:
 - 40 a. Wall or ceiling mount: Provide mounting channel brackets as required by sign size and
 - 41 location.
 - 42 b. Post mount: Sign to be mounted on aluminum posts at both ends, with base plate bolted to
 - 43 concrete foundation to below local frost depth or a minimum of 1/3 the pole height which
 - 44 ever is greater. Coordinate anchor bolt locations with general contractor.
 - 45 c. Concrete pedestal mount. Sign to be mounted on concrete pedestal as detailed on
 - 46 drawings. Coordinate anchor bolt, post sleeves and concealed electrical connections with
 - 47 pedestal contractor.
 - 48 d. Aluminum pedestal mount: Provide aluminum pedestal cover per drawings. Coordinate
 - 49 anchor bolt, post sleeves and concealed electrical connections with pedestal contractor.
 - 50 7. All fasteners and brackets shall be non-corrosive.
 - 51 8. All electrical connections shall be concealed but accessible and serviceable.
 - 52 9. Interior of cabinet to be primed and painted white with acrylic polyurethane, high gloss finish.
 - 53 10. Illumination shall be designed by contractor. Incandescent light sources will not be accepted. Each
 - 54 sign shall contain terminal board with adequate wiring. Lamps to be spaced to prevent shadows
 - 55 and hot spots. Uneven illumination will be rejected. Ballast shall be appropriate to temperature
 - 56 ranges at project site. Minimum luminance of sign message shall be 10 cd/m² at night and 30
 - 57 cd/m² during the day.
- 58 M. Fasteners and Supports:
 - 59 1. Bolts, nylon insert lock nuts: ASTM A 320, Grade B stainless steel.
 - 60 2. Rivets for signs: ASTM B 316, Alloy 6063-T61 or equivalent. Aluminum alloy blind rivets of self-
 - 61 plugging variety may be substituted for solid aluminum alloy rivets, subject to acceptance by
 - 62 Engineer/Architect.

- 1 3. Use concealed fasteners fabricated from metals not corrosive to sign material and mounting
2 surface.
- 3 4. Anchors and Inserts: Use nonferrous metal or hot dipped galvanized anchors and inserts for
4 exterior installations and elsewhere as required for corrosion resistance. Use toothed steel or lead
5 expansion bolt devices for drilled in place anchors. Furnish inserts, as required, to be set into
6 concrete or masonry work.
- 7 5. Sign posts: ASTM A 499 Grade 60 or ASTM A 576, Grade 1080 and meeting mechanical
8 properties specified in ASTM A 499 for Grade 60 steel.
- 9 6. Posts shall be zinc coated per ASTM A 123. Posts shall be straight, with smooth, uniform finish,
10 free from defects affecting strength, durability, or appearance. Punch bolt holes such that post face
11 shall be smooth and even. All holes and ends shall be burr free. After all fabrication, flow coat posts
12 with durable, exterior type, rust inhibiting paint. Paint color: black, unless otherwise indicated on
13 Drawings.
- 14 7. Adhesives, where used for wall mounted signs, shall be per the sign material manufacturer's
15 recommendations.
- 16 8. For DiBond signs, fasteners and mountings shall follow manufacturer's recommendations.
17 Minimum edge distance of 0.75" or 2.5 times the diameter of the fastener being used is
18 recommended as the distance from the center of the hole to the edge of the panel. Large flat
19 washers shall be used to prevent crushing of the sign material.

20 **PART 3 - EXECUTION**

21
22 **3.1 SURFACE PREPARATION OF SUBSTRATE FOR PAINTED SIGNS**

- 23 A. Prepare and clean in strict accordance with paint manufacturer's instructions and as specified here, for
24 each substrate condition.
- 25 B. Clean surfaces to be painted before applying paint or surface treatments. Remove oil and grease prior to
26 mechanical cleaning. Program cleaning and painting so contaminants from cleaning process will not fall
27 onto wet, newly painted surfaces.
- 28 C. Cementitious Surfaces:
29 1. Prepare surfaces to be painted by removing all efflorescence, chalk, dust, dirt, grease, oils, and, by
30 roughening as required, glaze.
31 2. Determine alkalinity and moisture content of surfaces to be painted by appropriate testing. If
32 surfaces found to be sufficiently alkaline to cause blistering and burring of finish paint, correct
33 before painting. Do not paint on surfaces with moisture content exceeds manufacturer's limits.
- 34 D. Ferrous Metals: Clean uncoated ferrous surfaces of oil, grease, dirt, loose mill scale, and other foreign
35 substances by solvent or mechanical cleaning. Clean previously coated metals in accordance with
36 manufacturer recommendation.

37
38 **3.2 MATERIALS PREPARATION FOR PAINTED SIGNS**

- 39 A. Mix and prepare painting materials per manufacturer's directions.
- 40 B. Store materials not in use in tightly covered containers. Keep all containers clean, free of foreign materials
41 and residue.
- 42 C. Stir materials before applying to produce uniform mixture, and stir as required during application. Do not
43 stir surface film into material. Remove film and strain material before using if necessary.

44
45 **3.3 INSTALLATION**

- 46 A. General: Locate signs where shown using mounting methods of type described and in compliance with
47 manufacturer's instructions. Install sign units level, plumb, and at height shown, with sign surfaces free
48 from appearance defects.
- 49 B. For drilled anchors in concrete, verify location of embedded reinforcing steel, post-tensioning, or pre-
50 stressing cables prior to installation.
- 51 C. Wall Mounted Panel Signs: Attach to wall surfaces with Hilti "Hit" anchors or ITW Ramset/Red Head
52 Hammer Set anchors into concrete or masonry surfaces as shown on Drawings. DO NOT OVERDRIVE
53 anchors, as overdriven anchors will damage sign faces and spall concrete.
- 54 D. Bracket Mounted Units: Provide manufacturer's standard brackets, fittings, and hardware as appropriate
55 for mounting signs which project at right angles from walls or ceilings. Attach brackets securely to walls or
56 ceilings with concealed fasteners and anchors per manufacturer's directions.
- 57 E. Installation of signs shall conform to requirements of Americans with Disabilities Act (ADA) and/or state or
58 local accessibility standards.

3.4 CLEANING AND PROTECTION

- A. At completion of installation, clean soiled sign surfaces in accordance with manufacturer's instructions. Protect units from damage until acceptance by Owner.
- B. Cleanup: During progress of Work, remove from site all discarded materials and rubbish at end of each day.
- C. Upon completion of painting, clean all paint spattered surfaces. Remove spattered paint by proper methods of washing and scraping, using care not to scratch or otherwise damage finished surfaces.
- D. Protection: Protect work of other trades, whether to be painted or not, against damage by painting and finishing. Correct any damage by cleaning, repairing, or replacing, and repainting, as acceptable to Engineer/Architect.
- E. Provide "Wet Paint" signs as required.

- PART 3 – EXECUTION
 - 1.1 [INSTALLATION](#)
 - 1.2 [ADJUSTING AND CLEANING](#)

PART 1 - GENERAL

- 1.1 RELATED DOCUMENTS**
 - A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.
- 1.2 SUMMARY**
 - A. Section includes room-identification signs that are directly attached to the building.
 - B. Related Requirements:
 - 1. Section 10 14 00 "Parking Signage" for traffic and wayfinding in the vehicle garage.
- 1.3 DEFINITIONS**
 - A. Accessible: In accordance with the accessibility standard.
- 1.4 COORDINATION**
 - A. Furnish templates for placement of sign-anchorage devices embedded in permanent construction by other installers.
- 1.5 ACTION SUBMITTALS**
 - A. Product Data: For each type of product.
 - B. Sustainable Design Submittals:
 - C. Shop Drawings: For room-identification signs.
 - 1. Include fabrication and installation details and attachments to other work.
 - 2. Show sign mounting heights, locations of supplementary supports to be provided by other installers, and accessories.
 - 3. Show message list, typestyles, graphic elements, including raised characters and Braille, and layout for each sign at least half size.
 - D. Samples for Initial Selection: For each type of sign assembly, exposed component, and exposed finish.
 - 1. Include representative Samples of available typestyles and graphic symbols.

- 1 E. Samples for Verification: For each type of sign assembly showing all components and with the required
2 finish(es), in manufacturer's standard size unless otherwise indicated and as follows:
3 1. Room-Identification Signs: Full-size Sample.
4 2. Variable Component Materials: Full-size Sample of each base material, character (letter, number,
5 and graphic element) in each exposed color and finish not included in Samples above.
6 3. Exposed Accessories: Full-size Sample of each accessory type.
7 4. Full-size Samples, if approved, will be returned to Contractor for use in Project.
8 F. Product Schedule: For room-identification signs. Use same designations indicated on Drawings or specified.

9 **1.6 INFORMATIONAL SUBMITTALS**

- 10 A. Qualification Data: For Installer and manufacturer.
11 B. Sample Warranty: For special warranty.

12 **1.7 CLOSEOUT SUBMITTALS**

- 13 A. Maintenance Data: For signs to include in maintenance manuals.

14 **1.8 QUALITY ASSURANCE**

- 15 A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by
16 manufacturer.

17 **1.9 FIELD CONDITIONS**

- 18 A. Field Measurements: Verify locations of anchorage devices and electrical service embedded in permanent
19 construction by other installers by field measurements before fabrication, and indicate measurements on
20 Shop Drawings.

21 **1.10 WARRANTY**

- 22 A. Special Warranty: Manufacturer agrees to repair or replace components of signs that fail in materials or
23 workmanship within specified warranty period.
24 1. Failures include, but are not limited to, the following:
25 a. Deterioration of finishes beyond normal weathering.
26 b. Deterioration of embedded graphic image.
27 c. Separation or delamination of sheet materials and components.
28 2. Warranty Period: Five years from date of Substantial Completion.

29 **PART 2 - PRODUCTS**

30 **2.1 PERFORMANCE REQUIREMENTS**

- 31 A. Accessibility Standard: Comply with applicable provisions in the USDOJ's "2010 ADA Standards for
32 Accessible Design" and ICC A117.1.

33 **2.2 ROOM-IDENTIFICATION SIGNS**

- 34 A. Refer to the Accessible Signage Diagram on Sheet G-101.0 for sign types and graphics. Signs to have
35 smooth, uniform surfaces; with message and characters having uniform faces, sharp corners, and precisely
36 formed lines and profiles.
37 B. Mounting: Surface mounted to wall with concealed anchors.
38 C. Text and Typeface: Refer to Drawings.

39 **2.3 SIGN MATERIALS**

- 40 A. All signs to be brushed stainless steel with black text and images.
41 B. Paints and Coatings for Sheet Materials: Inks, dyes, and paints that are recommended by manufacturer for
42 optimum adherence to surface and are UV and water resistant for colors and exposure indicated.

43 **2.4 ACCESSORIES**

- 44 A. Fasteners and Anchors: Manufacturer's standard as required for secure anchorage of signs, noncorrosive
45 and compatible with each material joined, and complying with the following:
46 1. Use concealed fasteners and anchors unless indicated to be exposed.
47 2. For exterior exposure, furnish nonferrous-metal devices unless otherwise indicated.

1 **2.5 FABRICATION**

- 2 A. General: Provide manufacturer's standard sign assemblies according to requirements indicated.
3 1. Conceal connections if possible; otherwise, locate connections where they are inconspicuous.

4 **2.6 GENERAL FINISH REQUIREMENTS**

- 5 A. Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary
6 protective covering before shipping.
7 B. Appearance of Finished Work: Noticeable variations in same piece are not acceptable. Variations in
8 appearance of adjoining components are acceptable if they are within the range of approved Samples and
9 are assembled or installed to minimize contrast.

10 **PART 3 - EXECUTION**

11 **3.1 INSTALLATION**

- 12 A. General: Install signs using mounting methods indicated and according to manufacturer's written
13 instructions.
14 1. Install signs level, plumb, true to line, and at locations and heights indicated, with sign surfaces free
15 of distortion and other defects in appearance.
16 2. Install signs so they do not protrude or obstruct according to the accessibility standard.
17 3. Before installation, verify that sign surfaces are clean and free of materials or debris that would impair
18 installation.
19 B. Accessibility: Install signs in locations on walls as indicated on Drawings and according to the accessibility
20 standard Insert requirement.
21 C. Mounting Methods:
22 1. Concealed Studs: Using a template, drill holes in substrate aligning with studs on back of sign.
23 Remove loose debris from hole and substrate surface.
24 a. Masonry Substrates: Fill holes with adhesive. Leave recess space in hole for displaced
25 adhesive. Place sign in position and push until flush to surface, embedding studs in holes.
26 Temporarily support sign in position until adhesive fully sets.
27 b. Thin or Hollow Surfaces: Place sign in position and flush to surface, install washers and nuts
28 on studs projecting through opposite side of surface, and tighten.
29 2. Through Fasteners: Drill holes in substrate using predrilled holes in sign as template. Countersink
30 holes in sign if required. Place sign in position and flush to surface. Install through fasteners and
31 tighten.

32 **3.2 ADJUSTING AND CLEANING**

- 33 A. Remove and replace damaged or deformed signs and signs that do not comply with specified requirements.
34 Replace signs with damaged or deteriorated finishes or components that cannot be successfully repaired
35 by finish touchup or similar minor repair procedures.
36 B. Remove temporary protective coverings and strippable films as signs are installed.
37 C. On completion of installation, clean exposed surfaces of signs according to manufacturer's written
38 instructions, and touch up minor nicks and abrasions in finish. Maintain signs in a clean condition during
39 construction and protect from damage until acceptance by Owner.

PART 1 - GENERAL

22

1.1 RELATED DOCUMENTS

23

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

24

25

1.2 SUMMARY

26

- A. Section Includes:

27

1. Abuse-resistant wall coverings.

28

2. Floor Sweeper Room walls.

29

- B. Related Requirements:

30

1. Section 05 50 00 "Metal Fabrications" for steel angle corner guards,

31

1.3 ACTION SUBMITTALS

32

- A. Product Data: For each type of product.

33

1. Include construction details, material descriptions, impact strength, dimensions of individual components and profiles, and finishes.

34

- B. Samples for Verification: For each type of exposed finish on the following products, prepared on Samples of size indicated below:

35

36

37

1. Abuse-Resistant Wall Covering: 6 by 6 inches square.

38

1.4 INFORMATIONAL SUBMITTALS

39

- A. Material Certificates: For each type of exposed plastic material.

40

1.5 DELIVERY, STORAGE, AND HANDLING

41

- A. Store wall and door protection in original undamaged packages and containers inside well-ventilated area protected from weather, moisture, soiling, extreme temperatures, and humidity.

42

43

1. Maintain room temperature within storage area at not less than 70 deg F during the period plastic materials are stored.

44

45

2. Keep plastic materials out of direct sunlight.

46

47

3. Store plastic wall- and door-protection components for a minimum of 72 hours, or until plastic material attains a minimum room temperature of 70 deg F.

1 **PART 2 - PRODUCTS**

2 **2.1 MANUFACTURERS**

- 3 A. Source Limitations: Obtain wall- and door-protection products from single source from single manufacturer.

4 **2.2 PERFORMANCE REQUIREMENTS**

- 5 A. Surface Burning Characteristics: Comply with ASTM E 84 or UL 723; testing by a qualified testing agency.
6 Identify products with appropriate markings of applicable testing agency.
7 1. Flame-Spread Index: 25 or less.
8 2. Smoke-Developed Index: 450 or less.

9 **2.3 ABUSE-RESISTANT WALL COVERINGS**

- 10 A. Abuse-Resistant Sheet Wall Covering: Fabricated from semirigid, plastic sheet wall-covering material.
11 1. Basis-of-Design Product: Provide Extrutech Plastics Inc. P2400 or comparable product by one of the
12 following:
13 a. <Insert manufacturer's name>
14 2. Sheet Thickness: 0.5 inch.
15 3. Color and Texture: White Standard
16 4. Height: As indicated.
17 5. Trim and Joint Moldings: Extruded rigid plastic that matches wall-covering color.
18 6. Mounting: Mechanically Fastened with screws per Manufacturers Recommendations. Use silicone
19 sealant and construction adhesive as required and recommended.

20 **2.4 MATERIALS**

- 21 A. Plastic Materials: Chemical- and stain-resistant, high-impact-resistant plastic with integral color throughout;
22 extruded and sheet material as required, thickness as indicated.
23 B. Fasteners: Aluminum, nonmagnetic stainless-steel, or other noncorrosive metal screws, bolts, and other
24 fasteners compatible with items being fastened. Use security-type fasteners where exposed to view.
25 C. Adhesive: As recommended by protection-product manufacturer and with a VOC content of 70 g/L or less.

26 **2.5 FABRICATION**

- 27 A. Fabricate wall and door protection according to requirements indicated for design, performance, dimensions,
28 and member sizes, including thicknesses of components.

29 **2.6 FINISHES**

- 30 A. Appearance of Finished Work: Noticeable variations in same piece are not acceptable. Variations in
31 appearance of adjoining components are acceptable if they are within the range of approved Samples and
32 are assembled or installed to minimize contrast.

33 **PART 3 - EXECUTION**

34 **3.1 EXAMINATION**

- 35 A. Examine substrates and wall areas, with Installer present, for compliance with requirements for installation
36 tolerances and other conditions affecting performance of the Work.
37 B. Proceed with installation only after unsatisfactory conditions have been corrected.

38 **3.2 PREPARATION**

- 39 A. Complete finishing operations, including painting, before installing wall and door protection.
40 B. Before installation, clean substrate to remove dust, debris, and loose particles.

41 **3.3 INSTALLATION**

- 42 A. Installation Quality: Install wall and door protection according to manufacturer's written instructions, level,
43 plumb, and true to line without distortions. Do not use materials with chips, cracks, voids, stains, or other
44 defects that might be visible in the finished Work.
45 B. Abuse-Resistant Wall Covering: Install top and edge moldings, corners, and divider bars as required for a
46 complete installation.
47

- 1 **3.4 CLEANING**
- 2 A. Immediately after completion of installation, clean plastic covers and accessories using a standard ammonia-
- 3 based household cleaning agent.
- 4 B. Remove excess adhesive using methods and materials recommended in writing by manufacturer.

PART 3 – EXECUTION

- 3.1 [INSTALLATION](#)
- 3.2 [ADJUSTING AND CLEANING](#)

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:
 - 1. Public-use washroom accessories.
 - 2. Underlavatory guards.
 - 3. Custodial accessories.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product indicated. Include the following:
 - 1. Construction details and dimensions.
 - 2. Anchoring and mounting requirements, including requirements for cutouts in other work and substrate preparation.
 - 3. Material and finish descriptions.
 - 4. Features that will be included for Project.
 - 5. Manufacturer's warranty.
- B. Product Schedule: Indicating types, quantities, sizes, and installation locations by room of each accessory required.
 - 1. Identify locations using room designations indicated.
 - 2. Identify products using designations indicated.

1.4 INFORMATIONAL SUBMITTALS

- A. Warranty: Sample of special warranty.

1.5 QUALITY ASSURANCE

- A. Source Limitations: For products listed together in the same Part 2 articles, obtain products from single source from single manufacturer.

1 **1.6 COORDINATION**

- 2 A. Coordinate accessory locations with other work to prevent interference with clearances required for access
3 by people with disabilities, and for proper installation, adjustment, operation, cleaning, and servicing of
4 accessories.
5 B. Deliver inserts and anchoring devices set into concrete or masonry as required to prevent delaying the
6 Work.

7 **1.7 WARRANTY**

- 8 A. Special Mirror Warranty: Manufacturer's standard form in which manufacturer agrees to replace mirrors
9 that develop visible silver spoilage defects and that fail in materials or workmanship within specified
10 warranty period.
11 1. Warranty Period: 15 years from date of Substantial Completion.

12 **PART 2 - PRODUCTS**

13 **2.1 MANUFACTURERS**

- 14 A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that
15 may be incorporated into the Work include, but are not limited to, the following:
16 1. Bobrick.
17 2. Bradley Corp.
18 3. ASI.

19 **2.2 MATERIALS**

- 20 A. Stainless Steel: ASTM A 666, Type 304, 0.031-inch minimum nominal thickness unless otherwise
21 indicated.
22 B. Steel Sheet: ASTM A 1008/A 1008M, Designation CS (cold rolled, commercial steel), 0.036-inch minimum
23 nominal thickness.
24 C. Galvanized-Steel Sheet: ASTM A 653/A 653M, with G60 hot-dip zinc coating.
25 D. Galvanized-Steel Mounting Devices: ASTM A 153/A 153M, hot-dip galvanized after fabrication.
26 E. Fasteners: Screws, bolts, and other devices of same material as accessory unit and tamper-and-theft
27 resistant where exposed, and of galvanized steel where concealed.
28 F. Chrome Plating: ASTM B 456, Service Condition Number SC 2 (moderate service).
29 G. Mirrors: ASTM C 1503, Mirror Glazing Quality, clear-glass mirrors, nominal 6.0 mm thick.
30 H. ABS Plastic: Acrylonitrile-butadiene-styrene resin formulation.

31 **2.3 PUBLIC-USE WASHROOM ACCESSORIES**

- 32 A. Toilet Tissue (Roll) Dispenser (TTD-1):
33 1. Basis-of-Design Product: Bobrick B-2888.
34 2. Description: Satin-finish stainless steel unit with stainless steel dispensing mechanism. Door has
35 flat face with protruding tumbler lock. Holds two rolls up to 5-1/4 inches (135 mm) diameter (1800
36 sheets). Extra roll automatically drops in place when bottom roll is depleted. Theft-resistant, heavy-
37 duty spindles. Unit 6-1/16 inches W, 11 inches H, 5-15/16 inches D (155 x 280 x 150mm).
38 B. Combination Towel (Folded) Dispenser/Waste Receptacle (HU-2):
39 1. Basis-of-Design Product: Bobrick B-369.
40 2. Description: Satin-finish stainless steel. Seamless beveled flange. Dispenses 350 C- fold or 475
41 multifold towels. Knob-latch retains door. Removable waste container has 2-gallon (7.6-L) capacity.
42 Rough Wall Opening: 12-5/8 inches W, 26-5/8 inches H, 4 inches minimum depth (320 x 675 x
43 100mm).
44 C. Grab Bar (GB-1):
45 1. Basis-of-Design Product: Bobrick B-5806.
46 2. Description: 1-1/4 inches (3 mm) diameter tubing. Constructed of 18-gauge (1.2 mm), type 304
47 satin-finish stainless steel tubing. Concealed mounting flange 1/8 inch (3 mm) thick, type 304
48 stainless steel plate, 2 inches W x 3-1/8 inches H (50 x 80 mm), with screw holes for concealed
49 anchors. Cover is 22-gauge (0.8 mm), type 304 stainless steel with satin finish, 3-1/4 inches (85
50 mm) diameter. Cover snaps over mounting flange to conceal screws.
51 3. Configuration and Length:
52 a. GB-1A: 36 inches (914 mm) horizontal grab bar.
53 b. GB-1B: 42 inches (1067 mm) horizontal grab bar.
54 c. GB-1C: 18 inches (457 mm) vertical grab bar.

- 1 D. Sanitary-Napkin Disposal Unit (HU-1):
2 1. Basis-of-Design Product: Bobrick B-270.
3 2. Description: Satin-finish stainless steel. Cover is drawn, one-piece construction; secured to cabinet
4 with full-length stainless steel piano-hinge. Capacity: 1.0-gallon (3.8-L). Unit 7-1/2 inches W, 10
5 inches H, 3-13/16 inches D (190 x 255 x 95 mm).
6 E. Mirror Unit (MU-1):
7 1. Basis-of-Design Product: Bobrick B-294.
8 2. Description: Tilt forward to provide full visibility for wheelchair patients or return to upright position.
9 Frame is 3/4 inch x 3/4 inch (19 x 19 mm), type 304 stainless steel angle, satin finish. Beveled
10 edges of frame; provides gapless fit for improved appearance, and safety when cleaning mirror.
11 No. 1 quality, 1/4 inch (6 mm) glass mirror; warranted against silver spoilage for 15 years. Top of
12 mirror tilts 7 inches (180 mm) from wall with self-locking mechanisms; bottom of mirror mounts to
13 wall with full-length stainless steel hinge.
14 3. Size: 18 inches (457 mm) W x 30 inches (762 mm) D.
15 F. Coat Hook: At Locker Room
16 1. Stainless multi-hook. Refer to Drawings.

17 **2.4 UNDERLAVATORY GUARDS**

- 18 A. Underlavatory Guard:
19 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
20 that may be incorporated into the Work include, but are not limited to, the following:
21 a. Truebro by IPS Corporation.
22 b. Plumberex Specialty Products, Inc.
23 c. Buckaroos, Inc.
24 2. Description: Insulating pipe covering for supply and drain piping assemblies that prevent direct
25 contact with and burns from piping; allow service access without removing coverings.
26 3. Material and Finish: Antimicrobial, molded plastic, white.

27 **2.5 CUSTODIAL ACCESSORIES**

- 28 A. Utility Shelf (US-1):
29 1. Basis-of-Design Product: Bobrick 224 x 24.
30 2. Description: Shelf is 18- gauge (1.2mm), type 304 stainless steel, satin finish; 24 inches Long, 6
31 inches H, 8 inches D (610 x 150 x 205 mm). Four anti-slip mop holders have spring-loaded rubber
32 cam that grips handles 7/8 inch to 1-1/4 inches (20–30 mm) diameter. Holds mops 8 inches (205
33 mm) from wall. Three stainless steel rag hooks. Rod for wet rags below shelf.
34 B. Mop and Broom Holder (MB-1):
35 1. Basis-of-Design Product: MB-1).
36 2. Description: 24 inches (610 mm) long. Type 304 stainless steel, satin finish. Anti-slip mop holders
37 have spring-loaded rubber cam that grips handles 7/8 inch to 1-1/4 inches (20–30 mm) diameter.
38 Holds 3 mops 3-1/4 inches (85 mm) from wall. Height 5 inches (125 mm).

39 **2.6 FABRICATION**

- 40 A. General: Fabricate units with tight seams and joints, and exposed edges rolled. Hang doors and access
41 panels with full-length, continuous hinges. Equip units for concealed anchorage and with corrosion-
42 resistant backing plates.

43 **PART 3 - EXECUTION**

44 **3.1 INSTALLATION**

- 45 A. Install accessories according to manufacturers' written instructions, using fasteners appropriate to
46 substrate indicated and recommended by unit manufacturer. Install units level, plumb, and firmly anchored
47 in locations and at heights indicated.
48 B. Grab Bars: Install to withstand a downward load of at least 250 lbf, when tested according to ASTM F 446.

49 **3.2 ADJUSTING AND CLEANING**

- 50 A. Adjust accessories for unencumbered, smooth operation. Replace damaged or defective items.
51 B. Remove temporary labels and protective coatings.
52 C. Clean and polish exposed surfaces according to manufacturer's written recommendations.

53 **END OF SECTION 10 28 00**

PART 2 – PRODUCTS

- 2.1 [PERFORMANCE REQUIREMENTS](#)
- 2.2 [PLASTIC LAMINATE LOCKERS \(LOCKER-2\)](#)

PART 3 – EXECUTION

- 3.1 [INSTALLATION](#)

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section Includes:
 - 1. Plastic laminate clad lockers.
 - 2. Locker benches.

1.3 ACTION SUBMITTALS

- A. Product data.
- B. Sustainable Design Submittals:
 - 1. Product Data: For composite wood products, indicating that product contains no urea formaldehyde.
 - 2. Laboratory Test Reports: For composite wood products, indicating compliance with requirements for low-emitting materials.
- C. Shop Drawings: Include plans, elevations, sections, details, attachments to other work, and locker identification system and numbering sequence.
- D. Samples: For each color specified.

1.4 INFORMATIONAL SUBMITTALS

- A. Finish Sample.

1.5 CLOSEOUT SUBMITTALS

- A. Maintenance data.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Accessibility Requirements: For lockers indicated to be accessible, comply with applicable provisions in the U.S. Architectural & Transportation Barriers Compliance Board's ADA-ABA Accessibility Guidelines and ICC A117.1.

2.2 PLASTIC LAMINATE LOCKERS

- A. Manufacturers:
 - 1. Plastic laminate clad lockers shall be as manufactured by Hollman Inc.
 - 2. Other manufacturers as approved by Architect.
- B. Materials:
 - 1. Locker Frame: Tops, sides, and back shall be constructed of 5/8 inch high density thermo-fused melamine.
 - a. Expansion / contraction within +/- 1/16 inch per locker.

- 1 2. Available Locker Models: Refer to Drawings.
- 2 a. Double tier, Model B: 1-Coat Rod, 1-Coat Hook.
- 3 b. Visible Edges: Sealed with a 1.5 millimeter PVC edge banding to closely match locker doors
- 4 3. Locker Doors:
- 5 a. Laminate: 5/8 inch high-industrial grade particle board core with .030 inch vertical grade high
- 6 pressure Class II-B fire retardant plastic laminate.
- 7 1) Matching laminate applied to interior & exterior door face.
- 8 2) Door edges sealed with eased edge 1.5 mm PVC edge banding to closely match
- 9 laminate.
- 10 4. Standard hardware:
- 11 a. Number disk, 1-1/2 inches diameter flush mounted disc with 3/8 inch high contrast digits. US
- 12 Block 1L font.
- 13 b. Coat Rod, 1 inch diameter recessed rod.
- 14 c. Coat Hook(s), 2-prong metal hooks.
- 15 d. Hinges shall be nickel finished, concealed, heavy duty European steel allowing 110 degree
- 16 door opening with a limited lifetime warranty.
- 17 1) 4 hinges per door 60 inches high and over.
- 18 2) 3 hinges per door 36 inches to 59 inches high.
- 19 3) 2 hinges per door 35 inches high and under.
- 20 5. Locks: Centered vertically in door & spaced horizontally per lock type.
- 21 6. Venting: 12 millimeter openings between door and top and bottom of locker and dividers on multiple
- 22 opening frames provide continuous natural air flow.
- 23 C. Fabrication:
- 24 1. Locker shall be fabricated using doweled and glued & nailed assembly process.
- 25 2. Fabricate lockers square, rigid and without warp, with the finished faces flat and free of scratches and
- 26 chips.
- 27 3. Machine all parts and attachment holes accurately and without chips.

28 **PART 3 - EXECUTION**

29 **3.1 INSTALLATION**

- 30 A. General: Install lockers level, plumb, and true; shim as required, using concealed shims.
- 31 1. Anchor locker runs at ends and at intervals recommended by manufacturer, but not more than 36
- 32 inches o.c. Using concealed fasteners, install anchors through backup reinforcing plates, channels,
- 33 or blocking as required to prevent metal distortion.
- 34 2. Anchor single rows of metal lockers to walls near top.
- 35 3. Anchor back-to-back metal lockers to floor.
- 36 B. Lockers: Connect groups together with standard fasteners, with no exposed fasteners on face frames.
- 37 C. Trim: Fit exposed connections of trim, fillers, and closures accurately together to form tight, hairline joints,
- 38 with concealed fasteners and splice plates.
- 39 1. Attach recess trim to recessed metal lockers with concealed clips.
- 40 2. Attach filler panels with concealed fasteners.
- 41 3. Attach sloping-top units to metal lockers, with closures at exposed ends.
- 42 D. Fixed Locker Benches: Provide benches in material and quantity as indicated on the Drawings.

43 **END OF SECTION**

1 SECTION 11 12 00

2 PARKING CONTROL EQUIPMENT

3 PART 1 - GENERAL

4 1.1 RELATED DOCUMENTS

- 5 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
6 Division 01 Specification Sections, apply to this Section.
7 B. The Work of this Section shall be provided by the City of Madison under separate contract. Contract
8 documents references and incorporated information is for coordination and service/rough-in contract
9 requirements only.

10 1.2 SUMMARY

- 11 A. Section Includes:
12 1. Automatic barrier gates.
13 2. Vehicle detectors.
14 3. Traffic controllers.
15 4. Entry terminal ticket dispensers.
16 5. Exit terminals.
17 6. Pay stations.
18 7. Fee computers.
19 8. Miscellaneous parking control equipment.
20 9. Parking facility management software.
21 10. Access control units.
22 B. Related Requirements:
23 1. Section 05 50 00 "Metal Fabrications" for pipe bollards to protect parking control equipment.

24 1.3 PREINSTALLATION MEETINGS

- 25 A. Preinstallation Conference: Conduct conference at Project site.
26 1. Inspect and discuss electrical roughing-in, empty low voltage conduit and raceways, equipment
27 bases, and other preparatory work provided by base building construction contract. Verify that
28 equipment operation is consistent with system description.
29 2. Review sequence of operation for each type of parking control equipment.
30 3. Review coordination of interlocked equipment specified in this Section and elsewhere.
31 4. Review required testing, inspecting, and certifying procedures.

32 1.4 ACTION SUBMITTALS (PROVIDED BY CITY OF MADISON)

- 33 A. Product Data: For each type of product.
34 1. Include construction details, material descriptions, dimensions of individual components and
35 profiles, and finishes for parking control equipment.
36 2. Include rated capacities, operating characteristics, electrical characteristics, and furnished
37 specialties.
38 B. Shop Drawings: For parking control equipment.
39 1. Include plans, elevations, sections, details, and attachments to other work.
40 2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances,
41 method of field assembly, components, and location and size of each field connection.
42 3. Include diagrams for power, signal, and control wiring.
43 4. Vehicle Detectors: Layout and method of placement of vehicle loop detector system.

44 1.5 INFORMATIONAL SUBMITTALS (PROVIDE BY CITY OF MADISON)

- 45 A. Coordination Drawings: <Insert description of drawing type> [and other details], drawn to scale, on
46 which the following items are shown and coordinated with each other, using input from installers of the
47 items involved:

- 1 **1.6 CLOSEOUT SUBMITTALS**
2 A. Operation and Maintenance Data: For parking control equipment to include in emergency, operation, and
3 maintenance manuals.
4 B. Software and Firmware Operational Documentation:
5 1. Software operating and upgrade manuals.
6 2. Program Software Backup: On magnetic media or compact disk, complete with data files.
7 3. Device address list.
8 4. Printout of software application and graphic screens.

- 9 **1.7 MAINTENANCE MATERIAL SUBMITTALS**
10 A. Furnish extra materials that match products installed and that are packaged with protective covering for
11 storage and identified with labels describing contents.
12 1. Gate Arms: [Two] <Insert number> breakaway gate arms for each gate installed, complete with
13 accessory components.

- 14 **1.8 QUALITY ASSURANCE**
15 A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.

16 **PART 2 - PRODUCTS**

- 17 **2.1 MANUFACTURERS**
18 A. Source Limitations: Obtain parking control equipment from single source from single manufacturer.

- 19 **2.2 SYSTEM DESCRIPTION**
20 A. Refer to Equipment Schedule.

- 21 **2.13 ANCHORAGES**
22 A. Anchor bolts; hot-dip galvanized according to ASTM A 153/A 153M and ASTM F 2329.

23 **PART 3 - EXECUTION**

- 24 **3.1 EXAMINATION**
25 A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for
26 installation tolerances, including equipment bases; accurate placement, pattern, and orientation of anchor
27 bolts; critical dimensions; and other conditions affecting performance of the Work.
28 B. Examine roughing-in for electrical and communication systems to verify actual locations of connections
29 before parking control equipment installation.
30 C. Proceed with installation only after unsatisfactory conditions have been corrected.

- 31 **3.2 INSTALLATION**
32 A. General: Install parking control equipment as required for complete and integrated installation.
33 1. Rough-in electrical connections provided by base building contract..
34 B. Automatic Barrier Gates: Anchor cabinets to concrete bases with anchor bolts or expansion anchors, and
35 mount barrier gate arms.
36 1. Install barrier gates according to UL 325.
37 C. Vehicle Loop Detectors: Cut grooves in pavement and bury and seal wire loop at locations indicated on
38 Drawings according to manufacturer's written instructions. Connect to parking control equipment operated
39 by detector.
40 D. Traffic Controllers: Anchor controllers to recessed concrete bases with anchor bolts or expansion anchors.
41 E. Entry Terminal Ticket Dispensers, Pay Stations and Exit Terminals: Attach cabinets to concrete bases with
42 anchor bolts or expansion anchors.
43 1. Connect equipment to remote computer.
44 2. Load ticket dispenser with supply of tickets.
45 F. Fee Computers: Install computers at locations indicated, including connecting to peripheral equipment and
46 remote computers.
47 G. Connect wiring.
48 H. Ground equipment.

- 1 **3.3 FIELD QUALITY CONTROL**
- 2 A. Testing Agency: Owner will engage a qualified testing agency to perform tests and inspections.
- 3 B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect
- 4 components, assemblies, and equipment installations, including connections.
- 5 C. Perform the following tests and inspections:
- 6 1. Perform each visual and mechanical inspection and electrical test stated in NETA Acceptance
- 7 Testing Specification. Certify compliance with test parameters.
- 8 2. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor
- 9 rotation and unit operation.
- 10 3. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and
- 11 equipment.
- 12 D. Parking control equipment will be considered defective if it does not pass tests and inspections.
- 13 E. Prepare test and inspection reports.
- 14 **3.4 ADJUSTING**
- 15 A. Adjust parking control equipment to function smoothly, and lubricate as recommended by manufacturer.
- 16 B. Confirm that locks engage accurately and securely without forcing or binding.
- 17 C. After completing installation of exposed, factory-finished parking control equipment, inspect exposed
- 18 finishes and repair damaged finishes.
- 19 **3.5 PROTECTION**
- 20 A. Remove barrier gate arms during the construction period to prevent damage, and install them immediately
- 21 before Substantial Completion.
- 22 **3.6 SOFTWARE SERVICE AGREEMENT**
- 23 A. Technical Support: Beginning at Substantial Completion, service agreement shall include software support
- 24 for two years.
- 25 B. Upgrade Service: At Substantial Completion, update software to latest version. Install and program
- 26 software upgrades that become available within two years from date of Substantial Completion. Upgrading
- 27 software shall include operating system and new or revised licenses for using software.
- 28 1. Upgrade Notice: At least 30 days to allow Owner to schedule and access the system and to
- 29 upgrade computer equipment if necessary.
- 30 **3.7 DEMONSTRATION**
- 31 A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust,
- 32 operate, and maintain parking control equipment.
- 33 **3.8 PARKING CONTROL EQUIPMENT SCHEDULE**
- 34 A. Parking Access and Revenue Control System (PARCS)
- 35 1. A parking access and revenue control system (PARCS) will be provided in the parking structure.
- 36 The City of Madison will procure the PARCS directly from HUB who will place their equipment on
- 37 the project. All electrical and communication work associated with the PARCS is part of this
- 38 project. We have assumed the following PARCS will be used at each of the entrance and exit
- 39 locations:
- 40 B. Level 1 Plan (Wilson Street):
- 41 Entrance Lane Equipment:
- 42 • One parking gate
- 43 • Three detector loops
- 44 • One counter system
- 45 • One proximity card reader (incorporated into entrance station)
- 46 • One entrance station (ticket dispenser)
- 47 • One lot full sign
- 48 • One intercom
- 49

- 1 Reversible Lane Equipment:
- 2 • Two parking gates
- 3 • Six detector loops
- 4 • Two counter systems
- 5 • Two proximity card readers (incorporated into entrance/exit stations)
- 6 • One entrance station (ticket dispenser)
- 7 • One pay-in-lane machine (cash, credit, validations)
- 8 • One lot full sign
- 9 • Two intercoms
- 10 Exit Lane Equipment:
- 11 • One parking gate
- 12 • Three detector loops
- 13 • One counter system
- 14 • One proximity card reader (incorporated into exit station)
- 15 • One pay-in-lane machine (cash, credit, validations)
- 16 • One intercom
- 17 Wilson Street Elevator Lobby:
- 18 • One pay-on-foot machine (cash, credit)
- 19 • One pay-on-foot machine (credit card only)
- 20 • One future pay-on-foot machine
- 21 C. Level 2 Plan (Doty Street)
- 22 Top of Reversible Ramp:
- 23 • One parking gate
- 24 • Two detector loops
- 25 Bottom of Reversible Ramp
- 26 Reversible Lane Equipment:
- 27 • Two parking gates
- 28 • Six detector loops
- 29 • Two counter systems
- 30 • Two proximity card readers (incorporated into entrance/exit stations).
- 31 • One entrance station (ticket dispenser)
- 32 • One pay-in-lane machine (cash, credit, validations)
- 33 • Two intercoms
- 34 Doty Street Elevator Lobby:
- 35 • One pay-on-foot machine (cash, credit)
- 36 • One pay-on-foot machine (credit card only)
- 37 • One future pay-on-foot machine
- 38 D. Level U2 Plan (City of Madison Parking)
- 39 Entrance Lane Equipment:
- 40 • One parking gate
- 41 • Three detector system
- 42 • One counter system
- 43 • One proximity card reader
- 44 • One intercom
- 45 Exit Lane Equipment:
- 46 • One parking gate
- 47 • Three detector loops

- 12 2.1 [PERFORMANCE REQUIREMENTS](#)
- 13 PART 3 – EXECUTION
- 14 3.1 [INSTALLATION](#)
- 15 3.2 [FIELD QUALITY CONTROL](#)

16 **PART 1 - GENERAL**

17 **1.1 RELATED DOCUMENTS**

- 18 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
- 19 Division 01 Specification Sections, apply to this Section.

20 **1.2 SUMMARY**

- 21 A. Section Includes:
- 22 1. Cooking appliances.
- 23 2. Refrigeration appliances.
- 24 3. Cleaning appliances.

25 **1.3 PREINSTALLATION MEETINGS**

- 26 A. Preinstallation Conference: Conduct conference at **Project site**.

27 **1.4 ACTION SUBMITTALS**

- 28 A. Product Data: For each type of product.
- 29 B. Sustainable Design Submittals:
- 30 1. Product Data: For indicated products, indicating compliance with requirements for ENERGY STAR
- 31 product labeling.
- 32 C. Samples: For each exposed product and for each color and texture specified.

33 **1.5 INFORMATIONAL SUBMITTALS**

- 34 A. Product certificates.
- 35 B. Field quality-control reports.
- 36 C. Sample warranties.

37 **1.6 CLOSEOUT SUBMITTALS**

- 38 A. Operation and maintenance data.

39 **1.7 WARRANTY**

- 40 A. Special Warranties: Manufacturer agrees to repair or replace residential appliances or components that fail
- 41 in materials or workmanship within specified warranty period.
- 42 1. Warranty Period: **Five** years from date of Substantial Completion.
- 43

1 **PART 2 - PRODUCTS**

2 **2.1 PERFORMANCE REQUIREMENTS**

- 3 A. Electrical Appliances: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked
4 for intended location and application.
5 B. Gas-Fueled Appliances: Certified by a qualified testing agency for each type of gas-fueled appliance
6 according to ANSI Z21 Series standards.
7 C. Appliances: Refer to Material Equipment List.

8 **PART 3 - EXECUTION**

9 **3.1 INSTALLATION**

- 10 A. Built-in Equipment: Securely anchor units to supporting cabinets or countertops with concealed fasteners.
11 Verify that clearances are adequate for proper functioning and that rough openings are completely
12 concealed.
13 B. Freestanding Equipment: Place units in final locations after finishes have been completed in each area.
14 Verify that clearances are adequate to properly operate equipment.
15 C. Range Anti-Tip Device: Install at each range according to manufacturer's written instructions.

16 **3.2 FIELD QUALITY CONTROL**

- 17 A. Perform the following tests and inspections with the assistance of a factory-authorized service
18 representative:
19 1. Perform visual, mechanical, and electrical inspection and testing for each appliance according to
20 manufacturers' written recommendations. Certify compliance with each manufacturer's appliance-
21 performance parameters.
22 2. Leak Test: After installation, test for leaks. Repair leaks and retest until no leaks exist.
23 3. Operational Test: After installation, start units to confirm proper operation.
24 4. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and
25 components.
26 B. An appliance will be considered defective if it does not pass tests and inspections.
27 C. Prepare test and inspection reports.

15 **PART 1 - GENERAL**

16 **1.1 RELATED DOCUMENTS**

- 17 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
18 Division 01 Specification Sections, apply to this Section.

19 **1.2 SUMMARY**

- 20 A. Section Includes:
21 1. Solid-surface-material countertops and backsplashes.

22 **1.3 ACTION SUBMITTALS**

- 23 A. Product Data: For countertop materials.
24 B. Sustainable Design Submittals:
25 1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and
26 cost.
27 2. Product Data: For adhesives, indicating that product contains no urea formaldehyde.
28 3. Laboratory Test Reports: For adhesives, indicating compliance with requirements for low-emitting
29 materials.
30 4. Product Data: For composite wood products, indicating that product contains no urea formaldehyde.
31 5. Laboratory Test Reports: For composite wood products, indicating compliance with requirements for
32 low-emitting materials.
33 C. Shop Drawings: For countertops. Show materials, finishes, edge and backsplash profiles, methods of
34 joining, and cutouts for plumbing fixtures.
35 D. Samples: For each type of material exposed to view.

36 **1.4 QUALITY ASSURANCE**

- 37 A. Manufacturer Qualifications: A qualified manufacturer that is certified for chain of custody by an FSC-
38 accredited certification body.
39 B. Vendor Qualifications: A vendor that is certified for chain of custody by an FSC-accredited certification body.

40 **1.5 PROJECT CONDITIONS**

- 41 A. Field Measurements: Verify dimensions of countertops by field measurements after base cabinets are
42 installed but before countertop fabrication is complete.

43 **1.6 COORDINATION**

- 44 A. Coordinate locations of utilities that will penetrate countertops or backsplashes.

1 **PART 2 - PRODUCTS**

2 **2.1 SOLID-SURFACE-MATERIAL COUNTERTOPS)**

- 3 A. Solid Surface Material: Homogeneous solid sheets of filled plastic resin complying with ANSI SS1.
4 1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products
5 that may be incorporated into the Work include, but are not limited to, the following:
6 a. E. I. du Pont de Nemours and Company.
7 b. Formica Corporation.
8 c. LG Chemical, Ltd.
9 d. Silestone by Cosentino
10 e. Wilsonart International.
11 2. Colors and Patterns: As selected by Architect from manufacturer's full range.
12 B. Configuration: Provide countertops with the following front and backsplash style:
13 1. Front: Straight, slightly eased at top
14 2. Backsplash: Straight, slightly eased at corner.
15 3. Endsplash: Matching backsplash
16 C. Countertops: 1/2-inch-with front edge built up with same material].
17 D. Backsplashes: 1/2-inch-thick, solid surface material.

18 **2.2 COUNTERTOP MATERIALS**

- 19 A. Adhesives: Use adhesives that meet the testing and product requirements of the California Department of
20 Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions
21 from Indoor Sources Using Environmental Chambers."

22 **PART 3 - EXECUTION**

23 **3.1 INSTALLATION**

- 24 A. Install countertops level to a tolerance of 1/8 inch in 8 feet.
25 B. Fasten countertops by screwing through corner blocks of base units into underside of countertop. Align
26 adjacent surfaces and, using adhesive in color to match countertop, form seams to comply with
27 manufacturer's written instructions. Carefully dress joints smooth, remove surface scratches, and clean
28 entire surface.

29 **END OF SECTION**

**SECTION 129300
BICYCLE RACKS**

PART 1 - GENERAL

1.01 SUMMARY

- A. This section specifies selection and installation of the following items as shown on the drawings (subject to design development) and specified herein:
1. Bike Rack

1.02 QUALITY ASSURANCE

- A. Shop Assembly: Preassemble in shop to greatest extent possible to minimize field splicing and assembly. Disassemble units only as necessary for shipping and handling.

1.03 SUBMITTALS

- A. Product Data: Submit manufacturers' specifications and installation instructions for all products specified herein.
- B. Samples: Submit three samples for each finish indicated. Prepare samples on materials to be used in work. Where normal color and texture variations are to be expected, provide "range" samples showing limits of variations.

PART 2 - PRODUCTS

- 2.01 Bike rack – Basis of Design: Landscape Forms "Ring" Rack, stainless steel – satin finish, surface mounted.

PART 3 – EXECUTION

3.01 EXAMINATION

- A. The Contractor must examine the areas and the conditions under which all items are to be installed and notify the conditions under which all items are to be installed and notify the Architect in writing of conditions detrimental to the proper and timely completion of the work. Do not proceed with work until unsatisfactory conditions have been corrected in a manner acceptable to the Contractor.

3.02 PREPARATION

- A. Coordination setting drawings, diagrams, templates, instructions, and directions for installation of anchorage, such as sleeves, concrete inserts, anchor bolts, and miscellaneous items having integral anchor, which are to be embedded in concrete or masonry. Coordinate delivery of such items to project site.
- B. Field Measurements: Take field measurements prior to preparation of shop drawings and fabrication, where possible. Do not delay progress. Allow for adjustments during installation where taking field measurements before fabrication might delay work.

3.03 INSTALLATION

- A. Fit exposed connections together accurately to form tight, hairline joints.
- B. Perform cutting, drilling, and fitting required for installation of site furnishings. Do not weld, cut, or abrade surfaces of components, which have been coated or finished after fabrication, and are intended for field connection by mechanical means without further cutting or fitting.
- C. Field Welding (if necessary): Comply with applicable AWS Specifications for procedures of manual shielded metal-arc welding, for appearance and quality of welds made, and for methods used in correcting welding work. Weld connections which are not to be left as exposed joints but cannot be shop welded because of shipping or size limitations. Grind exposed joints smooth and touch up shop paint coat. Tack weld all bolts upon completion of installation.

3.04 ADJUST AND CLEAN

- A. Protect finishes of all items from damage during construction period by use of temporary protective coverings approved by manufacturers. Remove protective covering at project completion or when directed by the Architect. Restore finishes damaged during installation and construction period so that no evidence remains of correction work. Return items which cannot be refinished in the field to the shop; make required alterations and refinish entire unit or provide new units as required.
- B. Touch-up Painting: Immediately after erection, clean field welds, bolted connections, and abraded areas of shop paint; and paint exposed areas with the same material. Surface preparation, prime coat, and finish coat to be in accordance with manufacturers' instructions.

16 **PART 1 - GENERAL**

17 **1.1 RELATED DOCUMENTS**

- 18 A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and
19 Division 01 Specification Sections, apply to this Section.

20 **1.2 SUMMARY**

- 21 A. Section includes bicycle racks.

22 **1.3 ACTION SUBMITTALS**

- 23 A. Product Data: For each type of product.

24 **1.4 CLOSEOUT SUBMITTALS**

- 25 A. Maintenance data.

26 **PART 2 - PRODUCTS**

27 **2.1 MANUFACTURERS**

- 28 A. Acceptable Manufacturer: Saris Cycling Group; 5253 Verona Rd., Madison, WI 53711. ASD. Toll Free TEL:
29 (800) 783-7257. Te1: (608) 274-6550. Fax: (608) 274-1702. Email: prkmgr@saris.com Web:
30 <http://www.sarisparking.com>.
31 B. Requests for substitutions will be considered in accordance with provisions of Section 01600.

32 **2.2 BICYCLE HIGH SECURITY RACKS**

- 33 A. Bicycle High Security Racks, City Rack 2400 Series:
34 1. Construction: 7 gauge, 2.5 inches (63 mm) square steel tube frame; 11 gauge, 1-1/2 inches by 1
35 inches (38 mm by 25 mm) square tube hangers.
36 2. Capacity: refer to Drawings.
37 3. Finish: Polyester powder coat.
38 4. Color: Black.

39 **2.3 BICYCLE STORAGE RACKS**

- 40 A. Locking Bike Rack: "Bike Tracs" vertical no. 6006.
41 1. Locking vertical single bike rack.
42 2. Finish: Polyester powder coat.
43 3. Color: Black.

44 **2.4 MATERIALS**

- 45 A. Steel Tube: ASTM A 513, electric welded steel tubing.
46 B. Steel Pipe: ASTM A 500B steel pipe.

- 1 **2.5 IRON FINISHES**
2 A. Baked-Enamel, Powder-Coat Finish: Manufacturer's standard, baked, polyester, powder-coat finish
3 complying with finish manufacturer's written instructions for surface preparation, including pretreatment,
4 application, baking, and minimum dry film thickness.

5 **PART 3 - EXECUTION**

- 6 **3.1 INSTALLATION**
7 A. Comply with manufacturer's written installation instructions unless more stringent requirements are
8 indicated. Complete field assembly of site furnishings where required.
9 B. Unless otherwise indicated, install site furnishings after landscaping and paving have been completed.
10 C. Install site furnishings level, plumb, true, and securely anchored at locations indicated on Drawings.

11 **END OF SECTION**

SECTION 14 20 50
GENERAL ELEVATOR REQUIREMENTS

PART I GENERAL

1.1 SUMMARY

- A. Comply with the Conditions of the Contract, including General and Supplementary Conditions, and Division 1 Specification.
- B. Provide 4 MRL gearless traction elevators as specified herein and as shown on Drawings.
- C. This section applies to Section 14 21 00 Traction Elevators.

1.2 RELATED WORK

- A. Power of necessary characteristics during erection of elevators to provide illumination, operation of required tools, hoists and power for starting, testing and adjusting elevators.
- B. Controller room heating and cooling sufficient to maintain temperature between 60 and 80 degrees F.
- C. Controller room door for each group of elevators. Doors shall be fire rated, self-closing and self-locking and a minimum of 3'-0" wide by 7'-0" high and shall swing outwards.
- D. Smoke detectors in controller rooms and elevator lobbies. Three dry contacts in each controller room –one contact shall indicate activation of ground floor smoke detector, one contact shall indicate activation of controller room smoke detector and third contact shall indicate activation of typical floor smoke detector.
- E. Telephone lines to each controller room for two-way communication to each elevator.
- F. Patching of lobby walls to accommodate entrances and hall buttons.
- G. Sump pit, sump pump and grating in each elevator group (total of 2). Pit floors shall be sloped so water will run off into sump pits.
- H. Finished flooring in elevators.
- I. Pit ladder in pit of each elevator (total of 4). Pit ladder shall be located as directed by elevator contractor and shall extend at least 4'-0" above bottom landing.
- J. Pit light switches located at top of each pit ladder.
- K. Controller room lighting consisting of 4'-0" long double tube guarded LED light fixtures providing a minimum illumination of 20 foot candles.
- L. Controller room light switches located beside strike jamb of each access door.
- M. Hoistway lighting at top of hoistways consisting of 4'-0" long double tube guarded LED light fixtures providing a minimum illumination of 20 foot candles.
- N. Hoistway lighting switch located in hoistway adjacent to top landing of each elevator.
- O. Three phase, four wire feeder and fused and lockable mainline disconnect for each elevator. Disconnect shall be located in controller room within sight of respective controller.
- P. One single phase, three wire, 20 amp feeders and fused and lockable disconnects for cab lighting of each elevator. Disconnects shall be located in respective controller room.
- Q. Fire rated controller rooms and hoistways. Hoistways shall be plumb within +/- one inch. Ledges projecting more than 4 inches inside hoistways shall be beveled at an angle of 75 degrees to the horizontal.
- R. Structural supports in hoistways to support car and counterweight guide rails for each elevator and structural supports at top of hoistway to support machine beams provided by elevator contractor.
- S. Structural supports in pits to accommodate car and counterweight buffer reactions.
- T. Cameras in each elevator as required.
- U. Two-inch diameter conduit between elevator control panel in Fire Command Center and each group of elevators.
- V. IN CASE OF FIRE signage beside each hall button fixture.
- W. Standby generator capable of operating one elevator from each group (total of 2) at a time.
- X. Two dry contacts in each controller room – one contact shall indicate that building is operating on standby power and 2nd contact shall indicate change in power source (normal to standby or standby to normal) at least 20 seconds prior to change in power.
- Y. LCD screens inside each elevator cab.

1.3 QUALITY ASSURANCE

- A. Work in this section shall be subject to all applicable provisions of state and local building and safety codes and any other codes referenced herein.

**LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
ISSUED FOR FINAL BID 06/23/2017**

- 1 B. Except for more stringent requirements as indicated or imposed by governing regulations, all
- 2 work and tests shall conform to Wisconsin Building Code and American Society of Mechanical
- 3 Engineers Safety Code for Elevators, Dumbwaiters, Escalators, and Moving Walks ASME
- 4 A17.1 latest edition.
- 5 C. References in this Specification to Electrical Code are to National Electrical Code latest
- 6 edition.
- 7 D. Comply with Americans with Disabilities Act, Wisconsin Accessibility Code and ANSI A117.1
- 8 for designing for the physically disabled.
- 9 E. Obtain and pay for necessary building permit, inspection and operating permits and make
- 10 such tests as called for by regulation of such authorities. Tests shall be made in presence of
- 11 authorized representatives of such authorities.
- 12 F. Use only components which are known to perform satisfactorily under expected use. Upon
- 13 Owner's request, provide reference of similar installation.

14 **1.4 SUBMITTALS**

- 15 A. Submit information regarding power requirements (starting and running currents), heat
- 16 dissipation rates, access requirements and lighting and outlet locations, within two weeks
- 17 subsequent to Contract Award.
- 18 B. Submit completion schedule showing equipment delivery dates and anticipated completion
- 19 date for each elevator, including final group adjustment dates, within two weeks subsequent
- 20 to Contract Award. Dates are to coincide with Construction Progress Schedule.
- 21 C. Submit (6) six 12" x 12" samples of 12" lengths of materials and finishes for review which will
- 22 be exposed to public view before fabrication. Samples shall fully represent physical and
- 23 chemical properties of materials to be supplied.
- 24 D. Submit all certification and proof of required fire endurance ratings by acceptable testing
- 25 organization or evidence of UL label and testing for parts where required.
- 26 E. Submit three sets of shop and erection drawings. Include layouts of different levels, controller
- 27 rooms, power and heat release data, loads transmitted to structure, controller room equipment
- 28 isolation details, extended car frame details, cab design, details of entrances, signals, fixtures
- 29 and panels.
- 30 F. Upon completion of work, submit three sets of record wiring diagrams to Owner (for
- 31 subsequent review and submittal to Owner) including all field wiring changes. Also provide
- 32 complete maintenance and operating manuals, as specified herein, sufficiently detailed to
- 33 allow the Owner to undertake maintenance of equipment in future.

34 **1.5 WARRANTY**

- 35 A. Elevator Contractor shall warrant that materials and workmanship or apparatus installed are
- 36 in accordance with Contract Document requirements, and that he will make good any defects
- 37 not due to ordinary wear and tear or improper use, which may develop within one year from
- 38 date of Substantial Completion.
- 39 B. In event that equipment does not meet all requirements of Specifications, Elevator Contractor
- 40 shall promptly remove from premises Work failing to comply and promptly replace or re-
- 41 execute Work without expense to Owner. Bear expense of making good all Work of Separate
- 42 Contractors destroyed or damaged by such removal or replacement. Warranty work shall be
- 43 undertaken at times convenient to the Owner.
- 44 C. If work is not remedied within reasonable time, as fixed by written notice from Owner, Owner
- 45 may correct such condemned Work at expense of Elevator Contractor and withhold such cost
- 46 from final payment. In event, remainder due is insufficient to cover such cost, Elevator
- 47 Contractor shall, upon request, reimburse Owner in full for balance.

48 **1.6 WARRANTY MAINTENANCE**

- 49 A. Provide 12 months of warranty maintenance after date of Substantial Completion. Warranty
- 50 maintenance shall start co-incident with one year warranty.
- 51 B. Warranty maintenance shall include emergency minor adjustment callback service shall be
- 52 available at all times at no extra charge to Owner.
- 53 C. Maintenance shall include systematic examination, adjustment and lubrication of all elevator
- 54 equipment and apparatus, including repair or replacement of electrical and mechanical parts
- 55 of elevator equipment and apparatus. Repair equipment whenever required and use only
- 56 genuine standard parts produced and manufactured for equipment concerned.
- 57 D. Replace all wire ropes as often as necessary to maintain adequate factor of safety.

- 1 E. Renewals or repairs necessitated by reason of misuse, abuse or negligence shall not be
- 2 included. Repair and/or replacements necessitated by ordinary wear and tear shall be
- 3 included.
- 4 F. Supply all necessary lubricants, cleaning materials, and repair parts required to keep elevators
- 5 in good working during warranty period.
- 6 G. Adequate stock of spare parts shall be maintained locally and elevator manufacturer and
- 7 installer shall have men available at such places to ensure fulfillment of service without
- 8 unreasonable loss of time in reaching job site.
- 9 H. Work under this provision shall be performed by personnel under supervision and in direct
- 10 employ of elevator manufacturer and installer.
- 11 I. Maintenance mechanic shall be on site a minimum 8 hours per month to perform preventative
- 12 maintenance. Preventative maintenance shall be performed during normal working hours of
- 13 elevator industry.
- 14 J. Owner shall have the right to postpone commencement of this warranty period in connection
- 15 with any specific elevator providing that such is not put into service at time of substantial
- 16 completion.

17 1.7 FULL MAINTENANCE PROPOSAL

- 18 A. Elevator manufacturer and supplier shall agree to enter into a renewable, full maintenance
- 19 type of contract.
- 20 B. The full maintenance contract shall commence upon the termination of the warranty
- 21 maintenance and shall cover all elevators supplied for the project.
- 22 C. Submit separate price in the Bid Form to furnish complete maintenance for the elevator
- 23 equipment for the first year of the maintenance contract following completion of the warranty
- 24 maintenance, based on today's material and labor cost indices and the requirement that the
- 25 maintenance contract with the Owner will be for a minimum period of five (5) years.
- 26 Maintenance contract shall include 8 hours per month on preventative maintenance performed
- 27 during normal working hours of elevator industry.
- 28 D. Owner shall pay premium time portion only for callbacks occurring outside of normal working
- 29 hours of elevator industry.

30 1.8 TEMPORARY USE OF ELEVATORS

- 31 A. Do not use elevators for construction purposes without written authorization from the Owner.

32 1.9 REQUIREMENTS FOR MAINTENANCE AND OPERATING MANUALS

- 33 A. Provide three sets of manuals containing information described below.
- 34 B. Description of elevator system's method of operation and control including, but not restricted
- 35 to, control system, and special or non-standard features provided. Instructions and on-site
- 36 demonstration for use of elevator control panels, emergency power operation, security
- 37 system, emergency recall, elevator management and remote monitoring.
- 38 C. Legible full-size laminated schematic wiring diagrams stamped as Owner's property covering
- 39 all electrical equipment as supplied and installed, including all changes made in final work,
- 40 with all symbols listed corresponding to identity or markings on both controller room and
- 41 hoistway apparatus.
- 42 D. Information on each piece of equipment shall be assembled in the following order:
- 43 1. Equipment details such as:
- 44 a. approved drawing number
- 45 b. model, part and serial number
- 46 c. contract number, specification section and clause number
- 47 2. Maintenance details:
- 48 a. lubrication chart
- 49 b. trouble shooting procedures
- 50 c. adjuster's manual
- 51 d. wiring diagrams
- 52 e. service tool for accessing software and troubleshooting including door operator
- 53 disable, hoistway learn run, I/O displays, commissioning for encoder replacement
- 54 and board replacement, adjusting acceleration, deceleration, leveling speed and
- 55 start time, load weighing and all safety tests.
- 56 3. Spare parts:
- 57 a. list or recommended spares to be kept on site
- 58 b. list of all special tools and appropriate unique application
- 59 c. detail manufacturer and supplier names and addresses

- 1 d. all equipment is to be listed as to types
2 E. Binders shall be approved by Owner before acceptance of installation.
3 F. All documents other than circuit diagrams, larger than standard size (8 1/2" x 11") paper shall
4 be neatly folded and inserted in labeled envelope. Any photocopies must be totally legible.
5 Only pertinent details shall be acceptable.

6 1.10 MANUFACTURER'S NAME

- 7 A. Manufacturer's name and/or logo shall not appear in any elevator cab, entrance, sill, remote
8 control panel or any other location visible to public.

9 1.11 INTERIM MAINTENANCE

- 10 A. Maintenance for all elevators shall commence on same date. Some units may be turned over
11 for use of Owner before other units, necessitating interim maintenance of such elevators until
12 all units are turned over. Interim maintenance is defined as maintenance provided, from time
13 unit is put into service by Owner, to date when all units are turned over for Owner's use to
14 commence warranty and warranty maintenance. Interim maintenance shall include full
15 maintenance and twenty-four-hour callback service.

16 1.12 IDENTIFIED, SEPARATE AND ALTERNATE PRICES

- 17 A. State in Bid the price carried to provide 12 months of warranty maintenance.
18 B. State in Bid as a separate price cost to provide monthly interim maintenance on each unit.
19 C. State in Bid as a separate price cost to provide full maintenance for 1st year of five-year
20 maintenance contract.

21 1.13 USE OF ELEVATORS FOR CONSTRUCTION PURPOSES

- 22 A. Comply with General Contractor's requirements for use of elevators during construction.
23 B. Construction cars will be provided temporary protection by others.
24 C. Construction cars shall be subject to interim maintenance.
25 D. All repairs and/or replacements not covered by interim maintenance which have been made
26 necessary by use of elevator for construction purposes shall be completed on a time and
27 material basis agreement. All repairs shall be completed prior to final acceptance.

28 **PART 2 PRODUCTS**

29 2.1 APPROVED PRODUCTS AND INSTALLERS

- 30 A. Kone, Otis, Schindler and Thyssen are approved installers. Installers must be able to demonstrate
31 their qualifications to supply, install, maintain and service comparable equipment in the downtown
32 Madison area.
33 B. Kone Monospace, Otis Gen 2O, Schindler 5500 and Thyssen Synergy 300 are approved products
34 subject to conformance with specifications.

35 2.2 ELECTRICAL WIRING

- 36 A. Provide complete necessary insulated wiring to connect all parts of equipment. Provide 10% spare
37 conductors.
38 B. Insulated wiring shall have flame retarding and moisture resisting outer cover and shall be run in metal
39 conduit, metallic tubing or wire ducts.
40 C. Traveling cables between car and hoistway shall have flame retarding and moisture resisting outer
41 cover. They shall have flame retarding and moisture resisting outer cover. They shall be flexible and
42 shall be suitably suspended to relieve strains in individual conductors. Provide halfway junction boxes
43 on elevators with travel more than 60 feet. Prevent cables from rubbing or chaffing against hoistway or
44 car items.
45 D. Insulated conductors and conduit or tubing as well as fittings including metal boxes, troughs and ducts
46 shall comply with requirements of Building Code.
47 E. Provide three shielded pairs of wires and six pairs of unshielded wiring between each elevator controller
48 and respective car stations for future use by Owner.
49 F. Provide three shielded pairs wires (total of six) from each group of elevators to Security Desk.
50 G. All spare wires and cables shall be tagged and identified by their destination.
51 H. Provide wiring and power from machine room to LCD screens mounted on back wall of each elevator.

52 2.3 EMERGENCY TELEPHONE

**LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
ISSUED FOR FINAL BID 06/23/2017**

- 1 A. Provide line powered full duplex hands free telephone in each elevator.
- 2 B. Provide minimum 4-inch diameter speaker and microphone and mount behind perforations in a circular
3 pattern in main car station of each elevator.
- 4 C. Provide "Push to Call Button" in car station such that when call button is pressed call is automatically
5 placed to Security Desk.
- 6 D. Provide engraved signage for CALL PLACED and CALL RECEIVED lights into car station.
- 7 E. Provide raised phone symbol and braille tag to left of push to call button.
- 8 F. All wiring shall be the responsibility of this section including that between the controller room and the
9 hands-free telephones.
- 10 G. The phone shall have the ability to record and play two different voice messages for all elevators.
- 11 H. Provide battery backup to operate telephones for at least 4 hours of use.
- 12 I. The phones shall be programmable and shall have 4 autodial capabilities. The phone shall employ all
13 progress monitoring to detect whether a call has been successfully placed.
- 14 2.4 EMERGENCY RECALL OPERATION
- 15 A. Elevators shall be arranged to operate in accordance with Madison Fire Department and Elevator Code.
16 Provide emergency recall switch and Phase 1 indicator light for each group of elevators. Include for
17 alternate floor recall in the event the alarm signal originates from ground floor. Locate fixture in 1st floor
18 hall button of each group of elevators.
- 19 2.5 HOISTWAY WORK
- 20 A. Coordinate location of sump pits, pit ladders, top of hoistway lighting and pit lighting and light switches
21 with other trades.
- 22 2.6 PAINTING
- 23 A. Exposed metal work, unless otherwise specified, shall be painted minimum of one coat of rust-inhibiting
24 black paint after installation. Painting shall include fascia and guide rails.
- 25 2.7 VOICE ANNUNCIATOR
- 26 A. Provide female voice annunciator with adjustable volume to announce floor and direction of travel as
27 elevator stops at each floor.
- 28 2.8 EMERGENCY CAB LIGHTING
- 29 A. Provide battery powered emergency lighting in accordance with ASME. Emergency light fixture shall
30 consist of 5 LEDs, shall be located in one car station of each elevator and shall be enclosed with a
31 milky white lexan lens and shall provide sufficient illumination around one car station panel. Provide
32 test button in service cabinet for testing emergency lighting unit.
- 33 2.9 FASTENERS
- 34 A. Provide vandal resistant fasteners on all surfaces exposed to public view unless otherwise specified.
- 35 2.10 WORKING PLATFORMS AND LADDERS
- 36 A. Provide permanently mounted working platforms and ladders of prime coated steel where distance
37 from the pit floor to underside of plank channels exceeds 83 inches with the car at lowest landing.
- 38 2.11 HOISTWAY AND PIT ACCESS
- 39 A. Provide hoistway unlocking device in every hoistway door located no more than 6'-11" above finished
40 floor. Provide stainless steel escutcheon tubes and secure with silicone in each door.
- 41 B. Provide hoistway access key switches at top floor of each elevator and provide pit access key switches
42 at bottom floor (unless elevators have a walk-in pit). Mount access switches in door jamb without cover
43 plate. Engrave key switch collar with function and UP and DOWN directions. Key switches shall be
44 same type for each elevator.
- 45 2.12 ELEVATOR NUMBERING
- 46 A. Number all machines, governors, controllers, transformers, disconnects, motor drives, circuit breakers,
47 crossheads and pit equipment with Owner's elevator numbering system.
- 48 B. Stencil back of hoistway doors with 4-inch high floor numbers.
- 49 C. Provide 3-inch high elevator number plates with black backgrounds and stainless steel characters and
50 braille on one door jamb at each entrance.

**LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
ISSUED FOR FINAL BID 06/23/2017**

- 1 2.13 HANDICAP JAMB MARKINGS
2 A. Provide tactile and braille plates on hoistway door jambs of each elevator. Plates shall have black
3 backgrounds with stainless numbers or letters designating floor level. Plates shall be equal to Entrada
4 type VP2.
- 5 2.14 TOP OF CAR LIGHTING
6 A. Provide two top of car LED light fixtures and locate on either side of car top sheave or hoist rope
7 fastening. One light fixture shall be portable type with a cord of sufficient length to access any part of
8 car top.
9 B. Provide at least one duplex GFCI receptacle on car top.
- 10 2.15 TOP OF CAR INSPECTION
11 A. Provide fixed top of car inspection unit including up and down buttons, enable button, stop button and
12 guarded toggle switch.
- 13 2.16 SECURITY
14 A. Provide each elevator with three twisted shielded pairs of 20 gauge wires or two RG-6/U co-axial cables
15 as required by security contractor. The wires shall extend from each controller in controller room to the
16 top of each elevator cab. An excess loop of 6 feet of cable shall be provided at each end of cable. All
17 cables shall be isolated from other traveling cables used to carry high voltage alternating current
18 circuits. Provide cutout in each cab ceiling for mounting camera.
19 B. Provide dedicated single phase 110-volt circuit from controller room to car top of each elevator for
20 camera operation.
- 21 2.17 CAB PROTECTIVE PADS
22 A. Provide one set of cab protective pads for each elevator. Pads shall cover entire side walls and front
23 and rear returns with cutouts for call buttons. Seams shall be double and selvaged. Provide stainless
24 steel pad buttons inside cab of each elevator.
- 25 2.18 ELEVATOR CONTROL PANEL
26 A. Provide stainless steel elevator control panel in Fire Command Center at 1st floor. Incorporate the
27 following features into control panel for each elevator.
28 1. Digital position indicators and direction arrows for each elevator. Position indicators shall be
29 at least 1 ¼ inches high.
30 2. Fire service recall key switch for each group of elevators.
31 3. Interlocked push buttons for Elevator Nos. 1 and 2, Elevator Nos. 3 and 4 so that only one
32 elevator per group can be re-selected to operate off of emergency power.
33 4. Up and down direction arrows.
34 5. Phase 1 indicator lights.
35 6. Phase 2 indicator lights.
36 7. Emergency power light for each group of elevators.
- 37 2.20 STANDBY POWER OPERATION
38 A. One elevator from each group (total of 2) shall start up automatically and return to ground floor at full
39 rated speed. For each group, all elevators in service shall return to the ground floor one at a time.
40 When each elevator reaches the ground floor, it shall shut down and park with its doors open. All cars
41 will have sufficient emergency power, until they are shut down, for alarm, lighting and exhaust fan.
42 Provide interlocked-type manual reselection buttons which will permit operation of selected elevator at
43 any time.
44 B. Cars on independent service shall sound buzzer and return to ground lobby.
45 C. Cars parked at ground floor with doors closed shall open their doors.
46 D. Flight times and express trip times shall comply with specified performances.
47 E. Car which is on "independent service" shall not be designated as car left in service.
48 F. Cars shall be sequentially lowered to ground floor.
49 G. Cars with doors blocked open shall sound continuous buzzer.
50 H. Should elevator fail to respond and return to main level after adjustable period of time initially set at 20
51 seconds, it shall be bypassed and next car returned to ground floor.
52 I. Provide standby power LED jewel in 1st floor hall fixture of each group of elevators.

PART 1 - GENERAL

1.1 SUMMARY

- A. Comply with Section 14 20 50, General Elevator Requirements and with Sections of Division 1.
- B. Provide all materials, products, equipment, services and labor to complete work as specified herein.

1.2 SYSTEM DESCRIPTION

- A. Elevator Nos. 1 and 2 (West Parking Garage)
 - 1. Type: Two MRL Gearless Passengers
 - 2. Capacity: 4,000 pounds
 - 3. Speed: 350 FPM
 - 4. Levels Served: U5 to U0, 1 and 2
 - 5. Stops and Openings: 8 stops in line
 - 6. Operation: Microprocessor Group
 - 7. Dispatch Floor: 1st Floor
 - 8. Platform Dimensions: 8'-0" wide by 6'-2" deep
 - 9. Car Interior Dimensions: 7'-8" wide by 5'-5" deep
 - 10. Control: ACVF
 - 11. Hoistway Entrances: 4'-0" wide by 7'-0" high
 - 12. Hoistway Dimensions: 9'-4" wide by 7'-10" deep
 - 13. Clear Overhead: 16'-0"
 - 14. Pit Depth: 5'-6"
- B. Elevator Nos. 3 and 4 (East Parking Garage)
 - 1. Type: Two MRL Gearless Passengers
 - 2. Capacity: 4,000 pounds
 - 3. Speed: 350 FPM
 - 4. Levels Served: U5 to U1 and 1
 - 5. Stops and Openings: 6 stops in line
 - 6. Operation: Microprocessor Group
 - 7. Dispatch Floor: 1st Floor
 - 8. Platform Dimensions: 8'-0" wide by 6'-2" deep
 - 9. Car Interior Dimensions: 7'-8" wide by 5'-5" deep
 - 10. Control: ACVF
 - 11. Hoistway Entrances: 4'-0" wide by 7'-0" high
 - 12. Hoistway Dimensions: 9'-4" wide by 7'-10" deep
 - 13. Clear Overhead: 16'-0"
 - 14. Pit Depth: 5'-6"

1.3 PERFORMANCE

- A. Elevators shall travel at specified rated speed within maximum variation of 3%, regardless of load or direction of travel.
- B. Performance time is elapsed time measured from start of door close on one floor until car is level and doors are 3/4 open at an adjacent typical floor. Performance time shall be:
 - 1. Elevator Nos. 1 to 4 9.0 seconds
- C. Flight time is the elapsed time from car start to car stop time between adjacent typical floors. Flight time shall be:
 - 1. Elevator Nos. 1 to 4 5.0 seconds
- D. Acceleration component of side to side or front to back sway, measured by Bruel and Kjaer Model 2511 accelerometer or approved manufacturer, shall not exceed:
 - 1. All Elevators 25 millig's peak to peak at rated speed
- E. Maximum noise level from machine to any occupied space including car cab shall not exceed 60 dbA and shall be free of any pure tone elevator transmitted noises. A pure tone shall be when any one-third octave band sound level exceeds adjacent one third band by 3dB.
- F. Acceleration rate shall not exceed 4 feet per second per second and change in acceleration shall not exceed 8 feet per second cubed.

**LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
ISSUED FOR FINAL BID 06/23/2017**

- 1 G. Door open time shall be adjustable and shall be initially set at:
2 1. Elevator Nos. 1 to 4 1.7 seconds
3 H. Door close time shall be adjustable and shall be initially set at:
4 1. Elevator Nos. 1 to 4 2.7 seconds
5 I. Dwell times for car calls shall be individually adjustable and shall be initially set at:
6 1. Elevator Nos. 1 to 4 3.0 seconds
7 J. Dwell times for hall calls shall be individually adjustable and shall be initially set at:
8 1. Elevator Nos. 1 to 4 5.0 seconds
9 K. Nudging time shall be adjustable and shall be initially set at 30.0 seconds.
10 L. Adjust door operation so that the increase of noise level over the ambient noise (assume 40 dbA
11 minimum) does not exceed 4 decibels when measured at 5 feet in front of the entrance, at any time
12 during the full door open and door close cycle and reversal cycle. Measure the noise level using ANSI
13 type-2 sound level meter on the "A" scale.
14 M. Leveling shall be accurate to within 1/8 inch.

15 **PART 2 - PRODUCTS**

16 2.1 **GUIDE RAILS**

- 17 A. Provide accurately machined standard T section guide rails with tongued and grooved joints for car and
18 counterweight weighing not less than specified by Code. Substantial machined fish plates shall be
19 used for rail joints. Back of rail shall be machined where it is in contact with fish plate. Rail joints shall
20 be smooth. Guide rails shall be supported and placed so not to become distorted by eccentric loading.
21 Properly align rails.
22 B. Provide sliding rail clips so as to limit maximum vertical force due to building compression. Properly
23 align vertical force due to building compression. Properly align each car and counterweight rail to
24 provide for ride characteristics within the maximum acceleration rates as specified.
25 C. Bracket spacing shall correspond to support locations shown on Drawings.
26 D. Minimum size of car guide rails shall be 15 pounds per foot and minimum size of counterweight guide
27 rails shall be 12 pounds per foot so rails can span a height of 14'-0".

28 2.2 **BUFFERS**

- 29 A. Provide oil buffers for car and counterweight and provide permanently buffer data plates and provide
30 dated test tags. If required provide stands and extensions to accommodate pit depths shown on
31 Drawings.
32 B. Provide a minimum counterweight runby of at least six inches. Provide at least 12 inches of blocking
33 under each counterweight to facilitate rope shortenings.

34 2.3 **PIT EQUIPMENT**

- 35 A. Provide governor tension sheaves and compensating tension sheaves. Provide a minimum of 12-
36 inches clearance under each tension sheave.
37 B. Provide pit stop switches to comply with ASME.
38 C. Provide limit switches to comply with ASME.
39 D. Locate junction boxes and troughing to allow for installation of pit ladders.
40 E. Provide maximum counterweight runby sign in each pit.

41 2.4 **CONTROLLER ROOM**

- 42 A. Controllers and transformers shall be located in respective controller rooms located as shown on
43 Drawings. Machines and governors shall be located in top of each hoistway and shall be resettable
44 from respective controller room.
45 B. Seal all controller room floor sleeves to inhibit noise transmission into hoistway. Maximum noise level
46 from controller room to any occupied space including car cab shall not exceed 60 dbA.
47 C. Locate front of controllers so that motor starters are visible from respective fused main line disconnect.
48 D. Mounting controllers in hoistway is prohibited.

49 2.5 **GEARLESS MACHINES**

- 50 A. Machines shall be gearless type of approved design with slow speed alternating current reversible
51 motor, traction driving sheave and brake and shall be mounted to continuous steel bedplate. Bearings
52 shall be amply proportioned, dustproof and provided with adequate means for lubrication.

- 1 B. Place machine upon structural supports with bedplates and machine isolation provided by elevator
2 contractor. Mount machines at top of hoistways. Prior to turnover conduct 125% brake overload test.
3 C. Provide flame-retardant wiring between machines and controllers.
4 D. Motor shall be reversible type, designed for elevator service. Motor shall be provided with high starting
5 torque and low starting current. Motor shall have sufficient horsepower to drive elevator, under full load
6 conditions and meet specified performance time and operate at a minimum of 180 starts per hour
7 without overstressing motor.
8 E. Machine bedplate shall be isolated from building structure by means of elastomer pads properly loaded
9 for machine developed static and dynamic loads.
10 F. Brake shall be direct current operated, electrically released, spring applied and shall be capable of
11 stopping and holding car securely with load of 125% of rated capacity.
12 G. Provide double brake to prevent overspeed in up direction and unintended movement away from floor
13 with both car and hoistway doors open.
14 H. Provide brake switches so car cannot run until brakes are lifted.
15 I. Provide sheaves to obtain proper lead of ropes to car and counterweight. Provide all necessary steel
16 beams and channels to support sheaves and machines.
17 J. Deflector, secondary and 2:1 sheaves shall be provided with anti-friction bearings. Bearings shall be
18 protected with grease seal to prevent grease from leaving the grease cavity. Sheaves shall be provided
19 with rope jump guards.
20 K. Secondary and deflector sheaves shall be supported from machine bedplate and mounted in hoistway.
21 There shall be no rigid connections or contact to building structure.

22 2.6 CONTROLLERS

- 23 A. Provide closed loop motor control feedback system which automatically regulates motor drive by
24 comparing actual acceleration, deceleration and velocity profiles with preset values. Provide
25 tachometers and position encoders for accurately measuring speed and position of elevator.
26 B. Enclose all controls in steel cabinet with swing door and adequate ventilation apertures and exhaust
27 fans. Isolate controllers to prevent transmission of structural born vibration to other parts of building.
28 C. Provide solid copper ground as necessary to isolate new controllers from electrical interference and to
29 isolate building equipment from radio frequency interference.
30 D. Pre-torque motor so that elevator can start as soon as doors are closed and locked. Start time shall
31 not exceed 0.3 seconds.
32 E. In the event of a malfunction, elevator controller shall attempt to restart and run elevator. If after third
33 attempt elevator fails to run or run continuously, it shall be brought to nearest floor, open its doors and
34 shut itself down. Only a continuous interruption of safety circuit shall prevent elevator from returning
35 to the nearest floor.
36 F. Provide advanced door opening so that doors can begin to open as soon as elevator enters leveling
37 zone.
38 G. Controllers shall be rated at 180 starts per hour.

39 2.7 MOTOR DRIVES

- 40 A. Provide solid state digitally controlled motor drive with isolation transformer and noise filter to convert
41 main AC supply into variable voltage AC supply for hoisting motor operation. Provide automatic closed
42 loop system providing instant and noiseless response to power requirements. Filter converted power
43 to provide highly regulated, ripple-free, stepless speed control for producing smooth performance and
44 accurate floor landings. Non- regenerative drives are prohibited.
45 B. Provide resistors to burn off regenerative power created by overhauling load or regenerative braking
46 conditions.
47 C. Size motor drive to handle full starting current plus 10%. Protect against voltage spikes. Motor drive
48 shall continue to perform under conditions of fluctuations in voltage line supply of $\pm 6\%$ and frequency
49 variations of $\pm 2\%$ from normal values without any degradation to normal elevator service.
50 D. Provide two independent means for removing power from hoist motor. One shall be contactors in series
51 with both sides of armature and second means shall be thyristors. Contactors shall open each time
52 car stops. Brake shall be applied while contactors are dropped out.
53 E. Continuously monitor armature voltage while elevator is in leveling mode.
54 F. Motor drive unit shall be capable of detection and reacting in safe mode to loss of supply voltage, loss
55 of phase, loss of fuse, and/or excessive heating or short circuits in either machine or motor drive.
56 Automatically re-start equipment which has stopped due to AC power failure.
57 G. Design solid state motor drive to handle current in excess of rated amount without damage to controllers
58 and machines.

**LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
ISSUED FOR FINAL BID 06/23/2017**

- 1 H. Isolate all solid-state motor drive equipment with elastomer pads with a minimum static deflection of
2 3/8 inch to prevent vibration transmission to building structure.
- 3 I. Elevator motor drive shall be sized to accommodate size of disconnects and feeders shown on
4 Drawings.
- 5 J. Equipment manufacturer shall provide a written statement confirming that the total current harmonic
6 distortion contribution from the equipment is less than 5% and individual harmonic distortion is less
7 than 3%. Provide harmonic filters as necessary to meet these conditions.
- 8 K. Motor drives shall be rated at 180 starts per hour.
- 9 2.8 AUTOMATIC LEVELING DEVICE
- 10 A. Provide self-leveling device to maintain car leveling accuracy within 1/8 inch of landing floor irrespective
11 of load. This device shall automatically and independently of other devices correct over-travel and rope
12 stretch.
- 13 2.9 SAFETY DEVICES
- 14 A. Provide car safety devices mounted on underside of platform. Devices shall be equipped with switch
15 to cut off motor power and apply brake prior to actual setting of safety grips. Safety grips shall be
16 automatic reset type.
- 17 B. Provide car governors including tripping switches, governor ropes and tension sheaves. Provide
18 minimum 12-inch clearance underneath each governor tension sheave.
- 19 C. Provide double brake or rope gripper to prevent unintended movement away from floor with both car
20 and hoistway doors open and overspeed in up direction.
- 21 2.10 COUNTERWEIGHT
- 22 A. Provide counterweight consisting of steel weights set in structural steel frame. Counterweight shall be
23 equal to complete elevator cab plus approximately 45% (\pm 50 pounds) of rated capacity. Secure
24 counterweight brick to prevent rattling during car travel.
- 25 B. Provide pit guard on all open sides of counterweight.
- 26 C. Provide at least 12 inches of blocking under each counterweight to eliminate need to shorten hoist
27 ropes.
- 28 2.11 CAR AND COUNTERWEIGHT GUIDES
- 29 A. Provide spring loaded roller guides for car and counterweight, mounted at top and bottom of car frame
30 .
- 31 B. Spring loaded roller guides shall consist of tired wheels of a durable, resilient material maintained in
32 uniform contact with three finished rail surfaces and operate on dry, unlubricated surfaces. Use
33 polyurethane or other roller tire material which will not develop flat spots after standing idle for 24 hours
34 under normal environmental conditions. Provide roller guides of sufficient diameter to restrict wheel
35 diameter to a maximum of 500 for cars and a maximum of 1000 for counterweights except minimum
36 diameter shall be 6 inches for car and 3 inches for counterweight.
- 37 C. Statically balance car and counterweight so that maximum pressure on any roller guide member shall
38 not exceed 50 pounds.
- 39 2.12 TRACTION (HOIST) ROPES
- 40 A. Provide traction steel hoisting ropes of sufficient size and number to ensure proper traction quality.
41 Hoist ropes provided for any car shall be from same factory run and shall be suitably protected from
42 rust and corrosion. Provide wedge clamp rope sockets for fastening ropes to car and counterweight.
43 Provide dated rope installation tag on car top. Provide shackle springs on car or counterweight end.
- 44 B. Provide wedge clamp sockets for fastening to car and counterweight. Hobble sockets at each end to
45 prevent spin out.
- 46 C. Provide shackle springs on counterweight end of hoist ropes.
- 47 D. Equalize tension in hoist ropes and install dated hoist rope tag on car end.
- 48 E. Alternatively provide steel reinforced rubber belts with a 24/7 monitoring device which will automatically
49 shut down the elevator at the nearest floor with its doors open in the event of excessive belt wear.
- 50 2.13 COMPENSATING ROPES
- 51 A. Provide if necessary Whisperflex compensation with pit mounted roller guides.
- 52 2.14 HOISTWAY ENTRANCES, FRAMES AND SILLS

- 1 A. Passenger elevators shall have single speed center opening doors giving clear opening as specified and
2 service elevator shall have two side opening doors giving clear opening as specified.
- 3 B. Doors and sight guards shall be formed from not less than 16-gauge furniture grade sheet steel, both
4 front and hoistway side sheet steel panels shall be flush and separated by suitable steel reinforcing.
5 Doors edges shall be finished smooth. Single panel steel doors are not acceptable. Provide bottom of
6 doors with proper guides (minimum two per door panel) of composite material reinforced with steel to
7 operate in sill slots with minimum clearance. Guides shall allow for lateral adjustment in both directions.
8 Felt wrapped gibs are not acceptable. Top of doors shall be reinforced and be capable of carrying
9 weight of door and hanger pendant bolts.
- 10 C. Provide black rubber astragals to leading edge of center opening doors.
- 11 D. Provide black painted struts and headers to support doors. Provide rubber stops on struts to cushion
12 doors should they over travel full door open by 3/8 inch or more.
- 13 E. Hoistway door operation shall be smooth at all times. Design all door equipment to operate with
14 minimum of noise.
- 15 F. Hoistway doors and sight guards shall be finished in No. 4 stainless steel at all floors.
- 16 G. Entrance frames shall be of hollow metal construction, minimum 14-gauge sheet steel with sound
17 deadening material applied to back surface and designed for three or field bolted construction. Frames
18 shall match finish of hoistway doors.
- 19 H. Entrance frames and doors shall be labeled 1-½ hour fire rating, having certificate approved by Code.
20 Permanently fasten certificates to doors. Stick-on certificates are not acceptable. Related door
21 hardware such as interlock and associated wiring shall be capable of operating at least one hour subject
22 to UL fire test.
- 23 I. Set entrance frames in alignment with elevator cab platform. Fasten struts and headers to structural
24 supports and secure to building walls by substantial ties. Set frames in place prior to building walls.
- 25 J. Provide matching cab interior and hall landing sills having recessed slots to receive door guides. Install
26 sills to allow for lobby floor finishes. Provide steel angles and fasten securely to building structure.
27 Provide sills with adjustable screws to delete need for grouting sills in place. Car sills shall be set to
28 accommodate finished flooring in cab. All sill fastenings shall be concealed. All sills shall be of extruded
29 aluminum construction.
- 30 K. Provide fascia extending from top of hanger to sill above for every floor served or passed. Fascia shall
31 not be less than 16-gauge sheet steel. Fascia shall be properly reinforced and provided with necessary
32 supports and fastenings to secure in place. After installation, paint fascia with one coat of rust inhibiting
33 black paint. Dust covers are prohibited.

34 2.15 CAR AND HOISTWAY DOOR HARDWARE

- 35 A. Provide hanger and track assemblies for each hoistway door and car door. Tracks shall be steel with
36 working surface contoured to match door rollers. Hangers shall be designed for power operation and
37 have provisions for vertical and lateral adjustment. Hangers shall have two point suspensions for each
38 door panel. Door hanger rollers shall be steel with polyurethane tires or suitable non-metallic sound
39 reducing material.
- 40 B. Provide weighted door closers (steel weight traveling within PVC pipe) or spirators to ensure doors are
41 self-closing.
- 42 C. Provide upthrust eccentric (minimum two per panel) and adjust to within 1/32 inch of bottom of track.
- 43 D. Provide relating cord and sheaves to connect center opening doors or two speed doors.
- 44 E. Provide pick up rollers on back of hoistway door to engage car door clutch Adjust rollers so they engage
45 clutch by at least half the thickness of door rollers.
- 46 F. Provide rated interlock assembly designed to prevent movement of car until car doors are within ½ inch
47 of fully closed and hoistway doors are locked both mechanically and electrically. Adjust interlocks so
48 there is no metal to metal contact. ECI interlocks are prohibited.
- 49 G. Provide steel contoured car door tracks, eccentrics, relating cords, hangers and rollers as specified for
50 hoistways doors. Provide mechanical gate switch which shall make up when car doors are within ½
51 inch of fully closed position.

52 2.16 DOOR OPERATORS

- 53 A. Provide direct current closed loop door operators to open and close car and hoistway doors
54 simultaneously, quietly and smoothly. Doors shall be capable of opening automatically when car is
55 leveling at respective landings and shall close after an adjustable interval. Door movements shall be
56 cushioned and checked at both limits. Car doors shall be readily operated by hand from within in event
57 of power interruption and if elevator is within unlocking zone.
- 58 B. Provide car door clutch on each elevator. Door clutch shall engage pick up rollers by at least ½ the
59 depth of the pickup rollers.

**LOTHAN VAN HOOK DESTEFANO AND ARCHITECTS LLC
ISSUED FOR FINAL BID 06/23/2017**

- 1 C. Provide encoder on motor to provide closed loop motor control to measure both speed and position.
2 Motor torque shall be automatically varied to overcome stack effect. Motor shall be sized to meet
3 specified performance times and door times.
4 D. Door open time and door close time shall be adjustable and initially set at times specified.
5 E. After stop is made, doors shall remain open (dwell) for an adjustable interval. Door dwell time shall be
6 adjustable for both car and hall landing calls and shall be initially set at times specified.
7 F. Provide "Door Open" button in car. Pressure on "Door Open" button shall re-open doors.
8 G. Provide "Door Close" button in car. Pressure on "Door Close" button shall cause doors to close
9 immediately but doors must remain fully open for at least 1.0 second when answering a car call and at
10 least 2.0 seconds when answering a hall call. Interruption of infrared door reopening devices shall not
11 affect dwell timing.
12 H. Door operator and components shall be specifically designed to minimize noise as specified.
13 I. Provide door restrictors to prevent opening of car doors more than 4 inches when car is outside
14 unlocking zone. Door operators shall be equal to GAL MOVFR, Kone AMD Heavy Duty, Otis Glide,
15 Schindler QKS 15 and Thyssen HD04 subject to compliance with specifications.
- 16 2.17 DOOR PROTECTION DEVICES
17 A. Provide solid state detector device consisting of at least 36 infrared rays reflected across car entrance.
18 Detector shall be arranged to immediately stop and reverse car and hoistway doors when object
19 interrupts infrared rays. Door detectors shall be equal to T. L. Jones Microscan E, ICU 47, Janus
20 Panaforty and Otis Optiguard subject to compliance with specifications.
21 B. If doors are prevented from closing for adjustable period (initially set at times specified) by operation of
22 protective and/or detector devices, doors shall close at reduced speed independent of door protection
23 devices. Under this condition, loud warning buzzer, located in car, shall sound.
- 24 2.18 LANDING BUTTON FIXTURES
25 A. Provide one hall button riser consisting of cover plates with concealed fasteners, call buttons and back
26 boxes for each group of elevators. Back boxes at designated landing shall be sized to standby power
27 light.
28 B. Provide stainless steel cover plates with concealed fasteners.
29 C. Provide hall buttons equal to Innovation type PB35.
30 D. Provide blue LED registration lights.
31 E. Provide emergency power indicator light in each 1st floor hall button fixture.
- 32 2.19 DIRECTION LANTERNS
33 A. Provide hall direction lanterns consisting of back boxes, 2.5-inch diameter flush mounted milky white
34 lexan disks and stainless steel cover plates with concealed fasteners beside each entrance of each
35 passenger elevator. Provide cluster type LED lights illuminating white for up travel and red for down
36 travel. Provide electronic dual stroke gongs with adjustable volume which shall sound once for up travel
37 and twice for down travel.
38 B. Lantern shall illuminate and sound gong at least 4.0 seconds prior to car arrival. Lantern shall stay
39 illuminated until doors are closed.
40 C. Lanterns shall be self-locking type designed to prevent slippage due to building vibration and shall be
41 readily accessible for maintenance.
42 D. Provide baffle between up and down lanterns to prevent light from bleeding through lens in opposite
43 direction.
- 44 2.20 CAR FRAME AND PLATFORM
45 A. Provide car frame consisting of structural steel uprights, crosshead and safety channels securely bolted
46 together. Frame shall be reinforced and braced to relieve car enclosure of undue strains.
47 B. Provide eccentric type cab steadier plates to ensure cab can float freely within sling.
48 C. Provide car platform and subfloor consisting of sound isolating type with rubber isolation pads on
49 auxiliary steel frame fastened to car frame. Platform shall be suitably reinforced with necessary steel
50 stringers and shall be designed to accommodate Class A loading. Subfloor shall consist of two 1/2 inch
51 layers of marine grade plywood.
52 D. Provide TM switches on car tops.
53 E. Provide rope jump guards on car and counterweight 2:1 sheaves.
- 54 2.21 CAR OPERATING STATIONS

- 1 A. Provide two full swing return type car stations in each passenger elevator. The following flush mounted
2 devices shall be pierced into returns. Locate uppermost car call button 48 inches above finished floor.
3 1. Car call buttons with blue LED registration lights corresponding to each level served. Registration
4 of car call shall cause corresponding light to illuminate. When call is answered call shall cancel
5 and light extinguish.
6 2. Emergency alarm button.
7 3. Door open button and door close button.
8 4. Perforated telephone grille with speaker, microphone, and call answered lights and push to call
9 button.
10 5. Phase 1 indicator light.
11 6. Window for displaying elevator license.
12 B. Button style shall match hall buttons. Provide to the left of each button raised alphanumeric
13 handicapped characters and braille to indicate floor marking and button operation. Markings shall be
14 flange mounted and shall be equal to Innovation type Oval Surround.
15 C. Car shall have lockable key operated service cabinet located below and flush with car station. Cabinet
16 faceplate finish shall match operating panel and be equipped with concealed hinge. Cabinet shall
17 contain following switches:
18 1. Independent service key switch with key removable in both positions.
19 2. Three speed fan key switch.
20 3. Car light key switch.
21 4. Any other key switches or devices required to service elevator.
22 5. Duplex GFCI receptacle.
23 6. Test button for testing emergency lighting unit.
24 7. Inspection key switch.
25 D. Provide engraved capacity and elevator number onto car stations. Back fill engraving with black paint.
26 E. Provide stainless steel cabinet for housing fireman's service including door open and close buttons,
27 call cancel button, phase 2 key switch, phase 2 indicator light and phase 2 signage. Engrave door in
28 red with FIRE OPERATION.

29 2.22 CAR ENCLOSURE

- 30 A. Provide car enclosure fabricated with sheet steel, minimum 14 gauge, designed to support cab finishes.
31 Overall cab height shall be 8'-0".
32 B. Provide stainless steel swing front returns, car door jambs, car doors and transoms. Car doors shall be
33 constructed of two panels of sheet steel, minimum 16 gauge with suitable reinforcing between each
34 panel.
35 C. Provide cab finishes as shown on Architectural Drawings.
36 D. Provide weight allowance of 400 pounds for LCD screens and finished flooring.
37 E. Provide sheet steel canopy, minimum 14 gauge, finished in eggshell white baked enamel.
38 F. Provide three speed squirrel cage exhaust fan for cab ventilation and mount in car ceiling. Provide
39 stainless steel grille over fan in ceiling. Noise level shall not exceed 60 dbA when fan is on high speed.
40 Air shall be displaced at a minimum rate of 350 cfm. Fan shall be equal to Man D Tec type OE.
41 G. Provide ventilation apertures in car enclosure to comply with code.
42 H. Provide top of car emergency exit in canopy. Provide top of car exit switches.
43 I. Provide rubber astragals on center opening car doors.
44 J. Provide recess in subfloor to accommodate finished flooring.

45 2.23 POSITION INDICATORS

- 46 A. Provide red colored LED digital car position indicators located in each car station. Indicators shall be a
47 minimum of 2 inches high and shall be sufficiently bright enough to be readily visible under normal
48 ambient lighting conditions within car.
49 B. Position indicator shall constantly show position of elevator.

50 2.24 ALARM BELL

- 51 A. Provide electric signal bell located on car top and in hoistway at 1st floor. Bells shall be connected to
52 the alarm button in car. Pressing this button shall cause bells to ring.

53 2.25 KEY SWITCHES

- 54 A. Cab exterior key switches, except where contrary to Code, shall be manufacturer's standard type key
55 switches. Engrave key switches to indicate each position (on/off) and function.

- 1 2.26 MICROPROCESSOR GROUP - GENERAL
2 A. Provide EEPROM or EPROM microprocessor based group supervisory control system. Microcomputer
3 and accompanying software programs shall be specifically designed to coordinate and control
4 individual and group elevator activities at all times within building. Provide system with a minimum of
5 two dispatching computers in case one goes down.
6 B. Provide system with solid state devices which shall not be affected by electrical noise caused by
7 switching and operation of other electrical equipment. Equipment shall be capable of problem-free
8 operation within ambient temperature ranges as specified by Code.
9 C. Microcomputer shall be housed within free-standing or wall-mounted control enclosure located in
10 elevator controller room. Enclosures shall be designed to accommodate compartmentalized units.
11 Provide adequate means of ventilation and filtration of air into controller enclosures. Provide swing
12 doors to access group and car control enclosures.
13 D. Printed circuit cards shall be readily removable and interchangeable where cards perform identical
14 functions. All cards shall be electrically interlocked and mechanically keyed to ensure proper seating.
15 Card terminal assemblies shall be plug-in to easily remove and replace without disturbing conductor
16 wiring.
17 E. Provide minimum 16 bit microprocessor with sufficient read only memory storage for all necessary
18 operation and control programs plus 25% spare capacity for future program expansion. Software based
19 programs shall be readily changeable without undue disruption in service. Protect all program
20 memories against loss due to power failure.
21 F. System shall incorporate necessary interfaces to allow for connection of portable service and
22 maintenance service equipment. Interface shall allow for recording of system performances and be
23 compatible with acoustical coupling devices for remote site monitoring of performance. Recording
24 devices shall be capable of a direct connection without wiring changes.
25 G. System shall be provided with complete self-diagnostic capabilities including telephone modem for
26 computerized monitoring of elevator alarms, system failures, performance, etc. by elevator
27 maintenance contractor.
28 H. Microprocessor based control system shall calculate car assignments based on real-time response in
29 reply to current traffic conditions in selecting and assigning cars (based on their availability and present
30 status) to answer landing calls. System shall monitor series of car activity and status data prior to
31 initiating car assignment to a particular landing call. These parameters shall be constantly assessed
32 assesses, minimum five times per seconds. The following parameters shall be monitored as a
33 minimum.
34 1. Car position, direction, velocity
35 2. Motor power status
36 3. Previous car assignments
37 2. Car door position
38 3. Existing car calls
39 4. Car load
40 5. Main lobby status
41 6. Coincident call
42 7. Double lobbies
43

- 44 2.27 MICROPROCESSOR GROUP - FEATURES
45 A. Provide each elevator with following operational and control features as specified below:
46 1. Provide at least two load weighing transducers to measure live load in car. Transducers must
47 be capable of measuring an evenly distributed load within +/-100 pounds. They shall be used
48 in conjunction with the following control features:
49 a. Provide load weighing to dispatch car ahead of operating intervals once it is filled to
50 an adjustable percentage of rated capacity. Load weighing dispatch shall be initially
51 set at 60% of rated capacity.
52 b. Provide load weighing to bypass hall calls in event car becomes and/or remains filled
53 to an adjustable percentage of rated capacity. Load weighing bypass shall be initially
54 set at 70% of rated capacity.
55 c. Provide anti-nuisance service which automatically cancels registered car calls when
56 an adjustable number of registered car calls exceed an adjustable load in the car.
57 Anti-nuisance shall be initially set at 4 registered calls and a load of 300 pounds or
58 less.
59 d. Pre-torque elevator machine to reduce start time to 0.3 seconds or less.

- 1 2. When car arrives at terminal floor all previously registered car calls shall be automatically
2 canceled or when car reverses direction all previously registered car calls shall be
3 automatically canceled.
- 4 3. Provide directional reversal so that car, arriving at landing where both up and down hall calls
5 are registered, will first answer call placed for direction that car was originally traveling. If no
6 car call is placed in initial direction and car is assigned to respond to opposite direction landing
7 call, car doors shall close and immediately re-open to respond to opposite direction landing
8 call. Hall lantern operation shall always correspond to intended direction of elevator travel.
- 9 4. Provide reversal feature, which will allow car to automatically stop at next floor, and reverse
10 without opening its doors, upon assignment of opposite direction landing call when changing
11 traffic conditions have canceled previous hall call assignments. When car stops at floor for
12 reassignment, hall lantern shall not illuminate.
- 13 5. Provide dispatch protection to ensure auxiliary means of dispatching that will automatically be
14 initiated when normal dispatching fails.
- 15 6. Provide controls that will designate only one car as "next up" at ground floor. Only designated
16 car shall illuminate lantern and open its doors. Cars returning to ground floor without
17 registered ground floor car call and not designated "next up" shall not open their doors, nor
18 illuminate their lanterns until designated as "next up". During periods of heavy up peak traffic,
19 two cars may be simultaneously designated as "next up".
- 20 7. Provide independent service feature which will allow individual car to be withdrawn from group
21 operation and operate in response to car calls only. Independent service shall be controlled
22 by two-position key switch mounted in each car's service cabinet, key shall be removable in
23 both positions. Registered car calls shall be capable of cancellation by turning key switch to
24 "OFF" position. Independent service switch shall only take car out of group operation when
25 switch is turned to "ON" position.
- 26 8. Provide high call-low call reversal so that all cars shall be capable of making high call-low call
27 reversals without having to travel to terminal floor, except to answer landing call or car call at
28 that level.
- 29 9. Provide advance selection feature to illuminate appropriate hall lanterns and sound gong of
30 car selected as "next up" when no selected car is at ground floor. Advance timing shall be
31 adjustable and initially set for 5.0 seconds.
- 32 10. All landing calls shall be timed. Any landing call which exists for longer than adjustable time
33 limit shall receive priority service.
- 34 11. Provide car call cancellation feature so that calls placed behind direction of travel will
35 automatically cancel upon direction reversal.

36 2.28 MICROPROCESSOR GROUP - TRAFFIC PROGRAMS

- 37 A. Once car has been assigned landing call, it shall proceed to answer call. Supervisory system shall
38 continuously evaluate operation state of that, and every other car, and be capable of re-assigning
39 landing calls up until assigned car commences deceleration to answer particular call. If "assigned car"
40 becomes delayed, supervisory system shall automatically assign landing call to next most suitable car.
- 41 B. Supervisory system shall anticipate traffic in certain sectors of building and position free or non-
42 assigned cars at these floors accordingly.
- 43 C. Up-peak traffic program shall operate as follows:
 - 44 1. Up traffic mode of operation shall be activated by adjustable time clock and monitoring of car
45 calls registered and car load measured at 1st floor. Clock device shall initiate up peak mode
46 of traffic in anticipation of morning inrush traffic. Up peak mode shall be maintained by
47 measuring ground floor landing calls, car loading at ground floor, and subsequent car calls
48 registered in departing up traveling cars.
 - 49 2. During up peak mode of operation, minimum of one car shall always be assigned to ground
50 floor. Cars, upon answering their car calls, shall travel non-stop to ground floor.
 - 51 3. Up direction and down direction landing calls placed above ground floor shall be answered in
52 efficient and prompt manner.
 - 53 4. System shall be designed to automatically monitor and dispatch cars away from ground floor
54 so as to prevent "bunching" of cars.
 - 55 5. Group supervisory control system shall constantly monitor elevator performance and traffic
56 demands and be capable of automatically shifting after expiration of up peak time clock and
57 adjustable time delay, into normal operating mode when traffic ceases to be predominantly up
58 in direction and/or significantly lighter in volume.
- 59 D. Down peak program shall operate as follows:

- 1
 - 2
 - 3
 - 4
 - 5
 - 6
 - 7
 - 8
 - 9
 - 10
 - 11
 - 12
 - 13
 - 14
 - 15
 - 16
 - 17
 - 18
 - 19
 - 20
 - 21
 - 22
 - 23
 - 24
 - 25
 - 26
 - 27
 - 28
 - 29
 - 30
 - 31
 - 32
 - 33
 - 34
1. When "down" traffic reaches pre-determined level, elevators shall be placed into down peak mode of operation. Down traffic peak shall be measured by continually scanning number of unanswered down landing calls registered above ground floor as well as exiting car load at ground floor.
 2. During down peak mode, system shall automatically dispatch cars up from ground floor. Cars shall be assigned to answer either groups of down landing calls, or landing calls registered within specific building zones, as determined by supervisory system. System shall evenly distribute or cycle cars to service all building floor levels in order to provide consistent levels of service.
 3. Up landing calls shall be assigned in prompt and efficient manner.
 4. Group supervisory computer shall constantly monitor predominance of down direction traffic. System will automatically shift into normal operating mode, after an adjustable time delay, once traffic ceases to be predominantly down and/or significantly light in volume.
 5. Priority shall be given to landing calls exceeding a specified long waiting time (initially set at 60 seconds) by bypassing calls of a short duration.
- E. Two way traffic program shall operate as follows:
1. During periods of two way traffic, each landing call shall be assigned to car best able to respond to registered call. Control system shall bias assignments of landing calls to cars having identical car calls and whose direction of travel corresponds to registered landing calls (i.e., co-incident calls).
 2. System shall automatically select and maintain appropriate ground floor bias depending upon upward bound traffic measured. System may automatically assign one car to park at ground floor provided down direction traffic conditions warrant.
- F. Off-peak traffic program shall operate as follows:
1. During periods of light or off peak traffic each landing call shall be assigned to car best able to answer particular call. Unassigned cars shall be directed to park in pre-designated zones in anticipation of future traffic demands or at last level served. System shall ensure sufficient numbers of elevators are in operation to provide satisfactory service to building at all times.
 2. One elevator shall always be assigned to park at ground floor. This car shall be designated "next up". Consequentially its doors shall be open and its lantern or hall signal fixture shall be illuminated. Once this car has left ground floor in response to car calls, system shall assign another car to ground floor.
 3. Preference shall be given to a running car.

35 **PART 3 - EXECUTION**

36 3.1 **INSTALLATION**

- 37 A. **Equipment Arrangement**
- 38 1. Arrange equipment in controller room so that equipment can be removed for repairs or
 - 39 replacement without dismantling or removing other equipment components.
 - 40 2. Accommodate equipment in space provided.
 - 41 3. Verify dimensions of hoistways and controller rooms before starting work.
- 42 B. **Guide Rails and Brackets**
- 43 1. Ensure guide rails are plumb and parallel within maximum deviation of 1/32". Cut off guide
 - 44 rails that are pinching against top of hoistway.
 - 45 2. Use metal shims only and provide lock washers under all nuts and tap bolts.
 - 46 3. Compensate for expansion and contraction of guide rails and building compression.
 - 47 4. Clean running surface of guide rails prior to final acceptance.
 - 48 5. In concrete structures, supply and install all necessary inserts after coordination with formwork
 - 49 contractor or provide self-drilling expansion shelf bolt anchors for support of brackets. Where
 - 50 Architect considers any concrete fastener improperly installed, either replace fastener or
 - 51 demonstrate stability of fastener by performing on-site test under which fastener is subjected
 - 52 to four times manufacturer's safe pullout or working load.
 - 53 6. Include steel reinforcement and backing for car and counterweight guide rails where
 - 54 necessary.
- 55 C. **Touch-up**
- 56 1. Prior to Substantial Completion, touch-up and restore to new condition damaged or defaced
 - 57 factory finished surfaces.

- 1 2. Remove protective coverings and clean exposed surfaces after completion and leave in first
- 2 class condition.
- 3 3. Paint controller room floors.
- 4 4. Completely clean down hoistways including headers, sills and supports, car tops,
- 5 counterweights, sheaves, roller guide assemblies and pit equipment. Paint car tops.
- 6 D. Entrances and Car Enclosures
- 7 1. Set entrances in alignment with car openings and plumb with hoistway lines.
- 8 2. Erect elevator enclosures in accordance with Code requirements.

9 3.2 **QUALITY CONTROL**

- 10 A. Testing
- 11 1. Perform and meet tests required by ASME, plus State of Wisconsin including witnessing of all
- 12 safety tests.
- 13 2. Supply instruments and carry out performance checks of all equipment, including group
- 14 supervisory control and operation systems. Performance check shall be done in presence of
- 15 Owner. Notify Owner in writing, at least one week prior to date of performance and operational
- 16 inspection.
- 17 3. Submit test and approval certificates required by jurisdictional authorities.
- 18 4. Provide operator to run car for inspection of elevator equipment in hoistway by Owner.
- 19 Provide operator for follow-up re-inspection. Elevator contractor shall be held responsible for
- 20 the additional cost incurred by Consultant of subsequent re-inspections not completed after
- 21 initial re-inspection.
- 22 5. Perform full load overspeed car safety tests, buffer tests and 125% rated load brake test. Spin
- 23 test and seal governors. Install dated test tags.
- 24 6. Comply with OSHA guidelines and Elevator Field Employees Safety Handbook.
- 25 7. Provide accelerometer and noise graphs for each elevator by running car from bottom to top
- 26 and then top to bottom. Graphs shall indicate maximum vibration in each axis and maximum
- 27 noise level.
