REQUEST FOR BID FOR PUBLIC WORKS CONSTRUCTION CITY OF MADISON, WISCONSIN

A BEST VALUE CONTRACTING MUNICIPALITY

PROJECT NAME:	STRUCTURAL REHABILITATION OF WATER MAINS - 2014 EAST
CONTRACT NO.:	7320
SBE GOAL	2%
BID BOND	5%
PRE BID MEETING (1:00 P.M.)	6/20/2014
PREQUALIFICATION APPLICATION DUE (1:00 P.M.)	6/20/2014
BID SUBMISSION (1:00 P.M.)	6/27/2014
BID OPEN (1:30 P.M.)	6/27/2014
PUBLISHED IN WSJ	6/13/2014 & 6/20/2014

PRE BID MEETING: Representatives of the Affirmative Action Department will be present to discuss the Small Business Enterprise requirements at 1600 Emil Street, Madison Wisconsin.

PREQUALIFICATION APPLICATION: Forms are available on our website, www.cityofmadison.com/business/pw/forms.cfm. If not currently prequalified in the categories listed in Section A, an amendment to your Prequalification will need to be submitted prior to the same due date. Postmark is not applicable.

BIDS TO BE SUBMITTED by hand to 1600 EMIL ST., MADISON, WI 53713 or online at www.bidexpress.com.

THE BID OPENING is at 1600 EMIL ST., MADISON, WI 53713.

STANDARD SPECIFICATIONS

The City of Madison's Standard Specifications for Public Works Construction - 2014 Edition, as supplemented and amended from time to time, forms a part of these contract documents as if attached hereto.

These standard specifications are available on the City of Madison Public Works website, www.cityofmadison.com/Business/PW/specs.cfm.

The Contractor shall review these Specifications prior to preparation of proposals for the work to be done under this contract, with specific attention to Article 102, "BIDDING REQUIREMENTS AND CONDITIONS" and Article 103, "AWARD AND EXECUTION OF THE CONTRACT." For the convenience of the bidder, below are highlights of three subsections of the specifications.

SECTION 102.1: PRE-QUALIFICATION OF BIDDERS

In accordance with Wisconsin State Statutes 66.0901 (2) and (3), all bidders must submit to the Board of Public Works proof of responsibility on forms furnished by the City. The City requires that all bidders be qualified on a biennial basis.

Bidders must present satisfactory evidence that they have been regularly engaged in the type of work specified herein and they are fully prepared with necessary capital, materials, machinery and supervisory personnel to conduct the work to be contracted for to the satisfaction of the City. All bidders must be pre-

qualified by the Board of Public Works for the type of construction on which they are bidding prior to the opening of the bid.

In accordance with Section 39.02(9)(a)l. of the General Ordinances, all bidders shall submit in writing to the Affirmative Action Division Manager of the City of Madison, a Certificate of Compliance or an Affirmative Action Plan at the same time or prior to the submission of the proof of responsibility forms.

The bidder shall be disqualified if the bidder fails to or refuses to, prior to opening of the bid, submit a Certificate of compliance, Affirmative Action Plan or Affirmative Action Data Update, as applicable, as defined by Section 39.02 of the General Ordinances (entitled Affirmative Action) and as required by Section 102.11 of the Standard Specifications.

SECTION 102.4 PROPOSAL

No bid will be accepted that does not contain an adequate or reasonable price for each and every item named in the Schedule of Unit Prices.

A lump sum bid for the work in accordance with the plans and specifications is required. The lump sum bid must be the same as the total amounts bid for the various items and it shall be inserted in the space provided.

All papers bound with or attached to the proposal form are considered a part thereof and must not be detached or altered when the proposal is submitted. The plans, specifications and other documents designated in the proposal form will be considered a part of the proposal whether attached or not.

A proposal submitted by an individual shall be signed by the bidder or by a duly authorized agent. A proposal submitted by a partnership shall be signed by a member/partner or by a duly authorized agent thereof. A proposal submitted by a corporation shall be signed by an authorized officer or duly authorized registered agent of such corporation, and the proposal shall show the name of the State under the laws of which such corporation was chartered. The required signatures shall in all cases appear in the space provided thereof on the proposal.

Each proposal shall be placed, together with the proposal guaranty, in a sealed envelope, so marked as to indicate name of project, the contract number or option to which it applies, and the name and address of the Contractor or submitted electronically through Bid Express (www.bidexpress.com). Proposals will be accepted at the location, the time and the date designated in the advertisement. Proposals received after the time and date designated will be returned to the bidder unopened.

The Bidder shall execute the Disclosure of Ownership form. REFER TO SECTION F.

SECTION 102.5: BID DEPOSIT (PROPOSAL GUARANTY)

All bids, sealed or electronic, must be accompanied with a Bid Bond equal to at least 5% of the bid or a Certificate of Annual/Biennial Bid Bond or certified check, payable to the City Treasurer. Bid deposit of the successful bidders shall be returned within forty-eight (48) hours following execution of the contract and bond as required.

PREVAILING WAGE RATES

Prevailing Wage Rates may be required and are attached in Section J of the contract. See Special Provisions to determine applicability.

Bidders for this Contract(s) must be Pre-Qualified for at least one of the following type(s) of construction denoted by an

Building Demolition

- 101 Asbestos Removal
 120 House Mover

- 110 Building Demolition

Street, Utility and Site Construction

- 201 Asphalt Paving
 205 Blasting
 210 Boring/Pipe Jacking
 215 Concrete Paving
 220 Con. Sidewalk/Curb & Gutter/Misc. Flat Work
 221 Concrete Bases and Other Concrete Work
 222 Concrete Removal
 225 Dredging
 230 Fencing
 235 Fiber Optic Cable/Conduit Installation

 242 Infrared Seamless Patching
 245 Landscaping, Maintenance
 250 Landscaping, Site and Street
 251 Parking Ramp Maintenance
 252 Pavement Marking
 255 Pavement Sealcoating and Crack Sealing
 260 Petroleum Above/Below Ground Storage Tank Removal/Installation
 262 Playground Installer
 265 Retaining Walls, Precast Modular Units

- 270 Retaining Walls, Reinforced Concrete
 275 Sanitary, Storm Sewer and Water Main Construction
 276 Sawcutting
 280 Sewer Lateral Drain Cleaning/Internal TV Insp.
 285 Sewer Lining
 290 Sewer Pipe Bursting
 295 Soil Borings
 300 Soil Nailing
 305 Storm & Sanitary Sewer Laterals & Water Svc.
 310 Street Construction
 315 Street Lighting
 318 Tennis Court Resurfacing
 320 Traffic Signals
 325 Traffic Signing & Marking
 332 Tree pruning/removal
 333 Tree, pesticide treatment of
 335 Trucking
 340 Utility Transmission Lines including Natural Gas, Electrical & Communications
 399 Other WATER MAIN LINING

Bridge Construction

- 501 Bridge Construction and/or Repair

Building Construction

- 401 Floor Covering (including carpet, ceramic tile installation, rubber, VCT)
 402 Building Automation Systems
 403 Concrete
 404 Doors and Windows
 405 Electrical - Power, Lighting & Communications
 410 Elevator - Lifts
 412 Fire Suppression
 413 Furnishings - Furniture and Window Treatments
 415 General Building Construction, Equal or Less than \$250,000
 420 General Building Construction, \$250,000 to \$1,500,000
 425 General Building Construction, Over \$1,500,000
 428 Glass and/or Glazing
 429 Hazardous Material Removal
 430 Heating, Ventilating and Air Conditioning (HVAC)
 433 Insulation - Thermal
 435 Masonry/Tuck pointing

- 437 Metals
 440 Painting and Wallcovering
 445 Plumbing
 450 Pump Repair
 455 Pump Systems
 460 Roofing and Moisture Protection
 464 Tower Crane Operator
 461 Solar Photovoltaic/Hot Water Systems
 465 Soil/Groundwater Remediation
 466 Warning Sirens
 470 Water Supply Elevated Tanks
 475 Water Supply Wells
 480 Wood, Plastics & Composites - Structural & Architectural
 499 Other _____

State of Wisconsin Certifications

- 1 Class 5 Blaster - Blasting Operations and Activities 2500 feet and closer to inhabited buildings for quarries, open pits and road cuts.
 2 Class 6 Blaster - Blasting Operations and Activities 2500 feet and closer to inhabited buildings for trenches, site excavations, basements, underwater demolition, underground excavations, or structures 15 feet or less in height.
 3 Class 7 Blaster - Blasting Operations and Activities for structures greater than 15' in height, bridges, towers, and any of the objects or purposes listed as "Class 5 Blaster or Class 6 Blaster".
 4 Petroleum Above/Below Ground Storage Tank Removal and Installation (Attach copies of State Certifications.)
 5 Hazardous Material Removal (Contractor to be certified for asbestos and lead abatement per the Wisconsin Department of Health Services, Asbestos and Lead Section (A&LS).) See the following link for application: www.dhs.wisconsin.gov/Asbestos/Cert. State of Wisconsin Performance of Asbestos Abatement Certificate must be attached.
 6 Certification number as a Certified Arborist or Certified Tree Worker as administered by the International Society of Arboriculture
 7 Pesticide application (Certification for Commercial Applicator For Hire with the certification in the category of turf and landscape (3.0) and possess a current license issued by the DATCP)
 8 State of Wisconsin Master Plumbers License.

Section B: Proposal Page

You can access all City of Madison bid solicitations for FREE at www.bidexpress.com

Click on the "Register for Free" button and follow the instructions to register your company and yourself. You will be asked for a payment subscription preference, since you may wish to bid online someday. Simply choose the method to pay on a 'per bid' basis. This requires no payment until / unless you actually bid online. You can also choose the monthly subscription plan at this time. You will, however, be asked to provide payment information. Remember, you can change your preference at anytime. You will then be able to complete your free registration and have full access to the site. Your free access does not require completion of the 'Digital ID' process, so you will have instant access for viewing and downloading. To be prepared in case you ever do wish to bid online, you may wish to establish your digital ID also, since you cannot bid without a Digital ID.

If you have any problems with the free registration process, you can call the bidexpress help team, toll free at 1-888-352-2439 (option 1, option1).

SECTION C: SMALL BUSINESS ENTERPRISE

Instructions to Bidders City of Madison SBE Program Information

2 Small Business Enterprise (SBE) Program Information

2.1 Policy and Goal

The City of Madison reaffirms its policy of nondiscrimination in the conduct of City business by maintaining a procurement process which remains open to all who have the potential and ability to sell goods and services to the City. It is the policy of the City of Madison to allow Small Business Enterprises (SBE) maximum feasible opportunity to participate in City of Madison contracting. The bidder acknowledges that its bid has been submitted in accordance with the SBE program and is for the public's protection and welfare.

Please refer to the "ADVERTISEMENT FOR BIDS" for the goal for the utilization of SBEs on this project. SBEs may participate as subcontractors, vendors and/or suppliers, which provide a commercially useful function. The dollar value for SBE suppliers or 'materials only' vendors shall be discounted to 60% for purposes of meeting SBE goals.

A bidder which achieves or exceeds the SBE goal will be in compliance with the SBE requirements of this project. In the event that the bidder is unable to achieve the SBE goal, the bidder must demonstrate that a good faith effort to do so was made. Failure to either achieve the goal or demonstrate a good faith effort to do so will be grounds for the bidder being deemed a non-responsible contractor ineligible for award of this contract.

A bidder may count towards its attainment of the SBE goal only those expenditures to SBEs that perform a commercially useful function. For purposes of evaluating a bidder's responsiveness to the attainment of the SBE goal, the contract participation by an SBE is based on the percentage of the total base bid proposed by the Contractor. The total base bid price is inclusive of all addenda.

Work performed by an SBE firm in a particular transaction can be counted toward the goal only if it involves a commercially useful function. That is, in light of industry practices and other relevant considerations, does the SBE firm have a necessary and useful role in the transaction, of a kind for which there is a market outside the context of the SBE Program, or is the firm's role a superfluous step added in an attempt to obtain credit towards goals? If, in the judgment of the Affirmative Action Division, the SBE firm will not perform a commercially useful function in the transaction, no credit towards goals will be awarded.

The question of whether a firm is performing a commercially useful function is completely separate from the question of whether the firm is an eligible SBE. A firm is eligible if it meets the definitional criteria and ownership and control requirements, as set forth in the City of Madison's SBE Program.

If the City of Madison determines that the SBE firm is performing a commercially useful function, then the City of Madison must then decide what that function is. If the commercially useful function is that of an SBE vendor / supplier that regularly transacts business with the respective product, then the City of Madison will count 60% of the value of the product supplied toward SBE goals.

To be counted, the SBE vendor / supplier must be engaged in selling the product in question to the public. This is important in distinguishing an SBE vendor / supplier, which has a regular trade with a variety of customers, from a firm which performs supplier-like functions on an ad hoc basis or for only one or two contractors with whom it has a special relationship.

A supplier of bulk goods may qualify as an eligible SBE vendor / supplier if it either maintains an inventory or owns or operates distribution equipment. With respect to the distribution equipment; e.g., a fleet of trucks, the term "operates" is intended to cover a situation in which the supplier leases the equipment on a regular basis for its entire business. It is not intended to cover a situation in which the firm simply provides drivers for trucks owned or leased by another party; e.g., a prime contractor, or leases such a party's trucks on an ad hoc basis for a specific job.

If the commercially useful function being performed is not that of a qualified SBE vendor / supplier, but rather that of delivery of products, obtaining bonding or insurance, procurement of personnel, acting as a broker or manufacturer's representative in the procurement of supplies, facilities, or materials, etc., only the fees or commissions will apply towards the goal.

For example, a business that simply transfers title of a product from manufacturer to ultimate purchaser; e. g., a sales representative who re-invoices a steel product from the steel company to the Contractor, or a firm that puts a product into a container for delivery would not be considered a qualified SBE vendor / supplier. The Contractor would not receive credit based on a percentage of the cost of the product for working with such firms.

Concerning the use of services that help the Contractor obtain needed supplies, personnel, materials or equipment to perform a contract: only the fee received by the service provider will be counted toward the goal. For example, use of a SBE sales representative or distributor for a steel company, if performing a commercially useful function at all, would entitle the Contractor receiving the steel to count only the fee paid to the representative or distributor toward the goal. This provision would also govern fees for professional and other services obtained expressly and solely to perform work relating to a specific contract.

Concerning transportation or delivery services: if an SBE trucking company picks up a product from a manufacturer or a qualified vendor / supplier and delivers the product to the Contractor, the commercially useful function it is performing is not that of a supplier, but simply that of a transporter of goods. Unless the trucking company is itself the manufacturer or a qualified vendor / supplier in the product, credit cannot be given based on a percentage of the cost of the product. Rather, credit would be allowed for the cost of the transportation service.

The City is aware that the rule's language does not explicitly mention every kind of business that may contribute work on this project. In administering these programs, the City would, on a case-by-case basis, determine the appropriate counting formula to apply in a particular situation.

2.2 Contract Compliance

Questions concerning the SBE Program shall be directed to the Contract Compliance Officer of the City of Madison Department of Civil Rights, Affirmative Action Division, 210 Martin Luther King, Jr. Blvd., Room 523, Madison, WI 53703; telephone (608) 266-4910.

2.3 Certification of SBE by City of Madison

The Affirmative Action Division maintains a directory of SBEs which are currently certified as such by the City of Madison. Contact the Contract Compliance Officer as indicated in Section 2.2 to receive a copy of the SBE Directory or you may access the SBE Directory online at www.cityofmadison.com/dcr/aaTBDDir.cfm.

All contractors, subcontractors, vendors and suppliers seeking SBE status must complete and submit the **Targeted Business Certification Application** to the City of Madison Affirmative Action Division by the time and date established for receipt of bids. A copy of the Targeted Business Certification Application is available by contacting the Contract Compliance Officer at the address and telephone indicated in Section 2.2 or you may access the Targeted Business Certification Application online at www.cityofmadison.com/dcr/aaTBDDir.cfm. Submittal of the Targeted Business Certification Application by the time specified does not guarantee that the applicant will be certified as a SBE eligible to be utilized towards meeting the SBE goal for this project.

2.4 Small Business Enterprise Compliance Report

2.4.1 Good Faith Efforts

Bidders shall take all necessary affirmative steps to assure that SBEs are utilized when possible and that the established SBE goal for this project is achieved. A contractor who self performs a portion of the work, and is pre-qualified to perform that category of work, may subcontract that portion of the work, but shall not be required to do so. When a bidder is unable to achieve the established SBE goal, the bidder must demonstrate that a good faith effort to do so was made. Such a good faith effort should include the following:

- 2.4.1.1 Attendance at the pre-bid meeting.
- 2.4.1.2 Using the City of Madison's directory of certified SBEs to identify SBEs from which to solicit bids.
- 2.4.1.3 Assuring that SBEs are solicited whenever they are potential sources.
- 2.4.1.4 Referring prospective SBEs to the City of Madison Affirmative Action Division for certification.
- 2.4.1.5 Dividing total project requirements into smaller tasks and/or quantities, where economically feasible, to permit maximum feasible SBE participation.
- 2.4.1.6 Establishing delivery schedules, where requirements permit, which will encourage participation by SBEs.
- 2.4.1.7 Providing SBEs with specific information regarding the work to be performed.
- 2.4.1.8 Contacting SBEs in advance of the deadline to allow such businesses sufficient time to prepare a bid.
- 2.4.1.9 Utilizing the bid of a qualified and competent SBE when the bid of such a business is deemed reasonable (i.e. 5% above the lowest bidder), although not necessarily low.
- 2.4.1.10 Contacting SBEs which submit a bid, to inquire about the details of the bid and confirm that the scope of the work was interpreted as intended.

2.4.2 Reporting SBE Utilization and Good Faith Efforts

The Small Business Enterprise Compliance Report is to be submitted by the bidder with the bid: This report is due by the specified bid closing time and date. Bids submitted without a completed SBE Compliance Report as outlined below

shall be deemed non-responsible and the bidder ineligible for award of this contract.

2.4.2.1 If the Bidder meets or exceeds the goal established for SBE utilization, the Small Business Enterprise Compliance Report shall consist of the following:

2.4.2.1.1 **Cover Page**, Page C-6; and

2.4.2.1.2 **Summary Sheet**, C-7.

2.4.2.2 If the bidder does not meet the goal established for SBE utilization, the Small Business Enterprise Compliance Report shall consist of the following:

2.4.2.2.1 **Cover Page**, Page C-6;

2.4.2.2.2 **Summary Sheet**, C-7; and

2.4.2.2.3 **SBE Contact Report**, C-8 and C-9. (A separate Contact Report must be completed for each applicable SBE which is not utilized.)

2.5 Appeal Procedure

A bidder which does not achieve the established goal and is deemed non-responsible for failure to demonstrate a good faith effort to achieve such goal and subsequently denied eligibility for award of contract may, within 72 hours of receiving such notification, appeal that decision to a special appeals committee composed of three (3) members of the Affirmative Action Commission, three (3) members of the Board of Public Works and a seventh member appointed by the Mayor. All appeals must be made in writing to the City Engineer and received within 72 hours of City of Madison's notice. Postmark not applicable.

2.6 SBE Requirements After Award of the Contract

The successful bidder shall identify SBE subcontractors, suppliers and vendors on the subcontractor list in accordance with the specifications. The Contractor shall submit a detailed explanation of any variances between the listing of SBE subcontractors, vendors and/or suppliers on the subcontractor list and the Contractor's SBE Compliance Report for SBE participation.

No change in SBE subcontractors, vendors and/or suppliers from those SBEs indicated in the SBE Compliance Report will be allowed without prior approval from the Engineer and the Affirmative Action Division. The contractor shall submit in writing to the City of Madison Affirmative Action Division a request to change any SBE citing specific reasons which necessitate such a change. The Affirmative Action Division will use a general test of reasonableness in approving or rejecting the contractor's request for change. If the request is approved, the Contractor will make every effort to utilize another SBE if available.

The City will monitor the project to ensure that the actual percentage commitment to SBE firms is carried out.

2.7 SBE Definition and Eligibility Guidelines

A Small Business Enterprise is a business concern awarded certification by the City of Madison. For the purposes of this program a Small Business Enterprise is defined as:

- A. An independent business operated under a single management. The business may not be a subsidiary of any other business and the stock or ownership may not be held by any individual or any business operating in the same or a similar field. In determining whether an entity qualifies as a SBE, the City shall consider all factors relevant to being an independent business including, but not limited to, the date the business was established, adequacy of its resources for the work in which it proposes to involve itself, the degree to which financial, equipment leasing and other relationships exist with other ineligible firms in the same or similar lines of work. SBE owner(s) shall enjoy the customary incidents of ownership and shall share in the risks and profits commensurate with their enjoyment interests, as demonstrated by an examination of the substance rather than form or arrangements that may be reflected in its ownership documents.
- B. A business that has averaged no more than \$4.0 million in annual gross receipts over the prior three year period and the principal owner(s) do not have a personal net worth in excess of \$1.32 million.

Firm and/or individuals that submit fraudulent documents/testimony may be barred from doing business with the City and/or forfeit existing contracts.

SBE certification is valid for one (1) year unless revoked.

SECTION D: SPECIAL PROVISIONS

STRUCTURAL REHABILITATION OF WATER MAINS - 2014 EAST CONTRACT NO. 7320

It is the intent of these Special Provisions to set forth the final contractual intent as to the matter involved and shall prevail over the Standard Specifications and plans whenever in conflict therewith. In order that comparisons between the Special Provisions can be readily made, the numbering system for the Special Provisions is equivalent to that of the Specifications.

Whenever in these Specifications the term "Standard Specifications" appears, it shall be taken to refer to the City of Madison Standard Specifications for Public Works Construction and Supplements thereto.

SECTION 102.10: PREVAILING WAGE

For this project, payment of prevailing wages (white sheet) shall be required unless the box indicating prevailing wages are not required is checked below.

Prevailing wages shall not be required when this box is checked.

If prevailing wages (white sheets) are required, the wages and benefits paid on the contract shall not be less than those specified in the Prevailing Wage Determination included with these contract documents for the following types of work:

- Building and Heavy Construction
- Sewer, Water, and Tunnel Construction
- Local Street and Miscellaneous Paving Operations
- Residential and Agricultural Construction

SECTION 102.12: BEST VALUE CONTRACTING

This Contract shall be considered a Best Value Contract if the Contractor's bid is equal to or greater than \$54,000 for a single trade contract; or equal to or greater than \$264,500 for a multi-trade contract pursuant to MGO 33.07(7).

ARTICLE 104: SCOPE OF WORK

This water main rehabilitation project consists of coordinating with Madison Water Utility, the work plan and execution of rehabilitating approximately 3,700 linear feet of 6-inch cast-iron water main in the City of Madison, WI. The project consists of rehabilitating water main and reinstating service laterals on Bunker Hill Ln (between Independence Ln and Declaration Ln), on Armistice Ln (between Independence Ln and Declaration Ln), and on Anniversary Ln (between Independence Ln and Declaration Ln). In total, 95 properties with ¾-in service laterals are served within these limits. The rehabilitation of these water mains is to be completed by lining the existing water mains with a Class IV structural cured-in-place pipe (CIPP) certified for the conveyance of drinking water. Temporary water service is to be provided to all affected properties during the rehabilitation of these water mains.

The work in this Contract will include, but is not limited to, the following:
Mobilization, shoring and maintaining water main access pits; installing, disinfecting, protecting and maintaining temporary water service; traffic control and work site protection; cleaning, televising and recording the existing and new water mains; photographing construction activities; furnishing and installing a structural CIPP water main liner; internally reinstating service laterals; field and laboratory documentation/testing; site restoration, delivering submittals and obtaining approvals (both Madison Water Utility and WI-Dept. of Natural Resources) as specified in the Contract documents.

View the site prior to bidding to become familiar with the existing conditions. It will be the responsibility of the Contractor to work with the utilities located in the right of way to resolve conflicts during the construction process.

ARTICLE 105.12: COOPERATION BY THE CONTRACTOR

As defined in these Special Provisions, Madison Water Utility is providing portions of work and some materials related to the scope of this Contract (i.e. excavation, backfilling, pavement restoration, permanent water main reconnections, water sampling/testing etc.). Coordinate with Madison Water Utility to establish mutually acceptable scheduling and work procedures.

Per Madison General Ordinance Section 13.205, make no unauthorized alterations to the water system. Only when properly authorized to proceed may any work on the water system occur. Provide the Engineer at least two working-day notice prior to beginning any work affecting the water system. Additionally, any work related to emergency repairs and/or Contractor proposed water system or construction plan alterations, shall be done in accordance with Section 703.3 'Repairs and Alterations' of the Standard Specifications.

The Contractor shall use care around existing trees, plantings, fences, walls, steps and driveways that are not indicated on the plans to be removed. Damage to these items during construction shall be repaired or replaced at the Contractor's expense. No trees, other than those shown on the plan to be removed, shall be cut without approval of the Engineer and City Forester; the abutting property owners shall be notified in accordance with the City's Administrative Procedure Memorandum No. 6-2.

The contractor shall maintain access for mail delivery and garbage/recycling pickup for all properties in the project area.

SECTION 107.7: MAINTENANCE OF TRAFFIC

All signing and barricading shall conform to Part VI of the Federal Highways Administrations "Manual on Uniform Traffic Control Devices" (MUTCD), the State of Wisconsin Standard Facilities Development Manual (including Chapter 16 - Standard Detail Drawings) and the City of Madison Standards for sidewalk and bikeway closures.

Submit an acceptable Traffic Control Plan to Mohr, Traffic Engineering Division, tmohr@cityofmadison.com. Two-way traffic must be maintained at all times.

Access to property entrance driveways shall be maintained whenever possible. Any closure of driveways shall require notice by the Contractor at least three (3) working days prior to this occurring.

Construction activities are not to affect any Metro Transit bus services, routes or schedules. Although this work is not anticipated to interrupt any Metro Transit bus stops, any closure or temporary relocation of Madison Metro bus stops shall require authorization from Madison Metro Transit. Provide any requests for bus stop closure to Madison Metro Transit at least three (3) working days prior to the intended closure date. Madison Metro contact is Katie Sellner (608) 261-9633.

No work shall begin without an approved Traffic Control Plan.

Provide ADA/Handicap Accessible pedestrian access at all intersections within the construction area at all times. Sidewalks shall be maintained on at least one side of the street at all times. The Contractor may remove parking within the project limits as necessary to facilitate construction.

Post and maintain NO PARKING signs in accordance with City of Madison Police Department's "Guidelines for Temporary No Parking Restrictions for Construction or Special Events".

The work areas shall be backfilled, plated, or protected by traffic control devices during non-working hours. If steel plates are used, notify the City of Madison Streets Division, 266-4681, 24-hours prior to placement of the plates.

Provide temporary bridging for aboveground water piping and/or hosing when the piping and/or hosing is to lie on the pavement across sidewalks, driveways or roadways subject to minimal traffic. Provide signing in advance of bumps where there is piping and/or hosing crossing the lane of traffic. Any piping and/or hosing crossing a Metro Transit bus service route or regularly traveled roadway shall be trenched, buried, and backfilled to adequately withstand the traffic loads and be flush to the existing pavement grade. Regularly inspect, maintain and repair, as necessary, all bridging locations and trenched crossings while in-use. Trenched crossings require pavement cutting to avoid excess damage to the existing pavement.

No construction equipment or materials shall be stored in the roadway or street right-of-way that is open to traffic during non-working hours. Construction equipment and materials are not to be stored within the street right-of-way that is outside the project limits as shown on the approved plan.

Contact Tom Mohr, Traffic Engineering Division, (608) 267-8725, with any questions concerning these traffic control specifications.

ARTICLE 107.11: USE OF CITY WATER

Any Madison Water Utility charges associated with the installation, use and removal of the reduced pressure zone (RPZ) valve and water usage will be waived for all work included in this contract. Any use of City of Madison water will still require request and notification procedures indicated in the City of Madison Construction Specifications.

Properly dispose of any highly-chlorinated water in accordance to Section 703 of the Standard Specifications. Contact the Water Utility Engineering Department at (608) 266-4646 to coordinate the installation of the RPZ valves. Contractor furnished RPZ valves are not to be connected to City hydrants unless authorized in writing by the Engineer. Adequately protect and support City RPZ valves at all times; any RPZ valve damage resulting from Contractor negligence shall be repaired or replaced at the Contractor's expense.

SECTION 108.2: PERMITS

Section NR811.69 (6), Wisconsin Administrative Code states, "All materials used for the interior rehabilitation of water mains shall meet ANSI/NSF standards and may not be used until specifically approved by the department."

This water main rehabilitation project is intended to allow the Wisconsin Department of Natural Resources and the Madison Water Utility to evaluate the performance and potential opportunities of rehabilitating deteriorated water mains in-place through structural CIPP lining technology. As identified above per NR811.69 (6), this project requires consent approval from the Wisconsin Department of Natural Resources (WI-DNR).

In order to obtain consent approval from the department, submit documentation to the WI-DNR that the proposed structural CIPP liner is comparatively similar to an AWWA pressure class 150 pipe rating through pipe design calculations based on at least a 50-year service life at an internal working pressure of 100 psi with a safety factor of 2.5. The submittal must include the pipe design calculations and the basis for the long-term strength value used in the design calculations.

Construction may not begin until the WI-DNR has approved the pressure class submittal, even if all additional submittals have been reviewed and approved by the Engineer. See Section 702.3 of these Special Provisions for more detailed information regarding the requirements of the WI-DNR submittal and Section 701.3 for more detailed information regarding submittals to the Engineer.

It is the responsibility of the Contractor to identify and obtain any other permits needed for construction.

ARTICLE 109.2: PROSECUTION OF WORK

Work shall begin after the start work letter is received. Submit the proposed construction schedule to the Engineer prior to mobilization.

Any asphalt paving and paving-associated work which is to be done by the Contractor under this Contract must be completed by October 15, 2014. Any bituminous paving done after October 15, is at the contractor's risk, as per Article 402.2(a) of the Standard Specifications.

All work under this Contract shall be entirely completed by November 21, 2014 unless otherwise authorized by the Engineer, in writing.

SECTION 701: PROVISIONS FOR WATER INSTALLATION AND ABANDONMENT

For questions related to this Contract, contact the Project Engineer:

Adam Wiederhoeft, PE
Madison Water Utility - Design Engineer
awiederhoeft@madisonwater.org
(608) 266-9121

The CIPP liner system shall consist of either a spin-cast monolithic surfacing system or a resin-impregnated flexible tube system, which when cured, forms a hard, impermeable, corrosion resistant pipe within a pipe. The new CIPP liner shall be designed as a Class IV structural liner, not relying on the remaining strength of the host pipe to withstand long-term external loading and internal pressure per AWWA M-28 and as required in the Contract documents.

As the piping system is intended for the conveyance of potable water, the proposed CIPP liner system must be certified as complying with the requirements of NSF/ANSI Standard 61 and be listed on the NSF Approved Product Listing website, <http://www.nsf.org/Certified/PwsComponents/>.

The Contractor is responsible for the successful completion of all work required in the Contract documents; failure of the selected CIPP lining system to be satisfactorily installed in the existing water main shall not relieve him of his responsibility to provide satisfactorily reconstructed water mains. Any cost associated with the removal of the unsatisfactorily installed liner and the subsequent, satisfactory reinstallation of an approved liner shall be borne solely by the Contractor, and no claims shall be made against Madison Water Utility of the City of Madison, WI for this additional required work.

During the warranty period, any defects that might affect the integrity or strength of the liner shall be repaired or replaced at no cost to Madison Water Utility or the City of Madison and are to be executed in accordance to the manufacturer's recommendations, and to the satisfaction of the Engineer.

701.1 Reference Specifications and Standards

The following references apply to CIPP lining work and are to be the latest edition and revision.

American Society for Testing and Materials (ASTM):

- ASTM F1216: Rehabilitation of Existing Pipelines and Conduits by the Inversion and Curing of a Resin-Impregnated Tube
- ASTM F1743: Rehabilitation of Existing Pipelines and Conduits by Pulled-in-Place Installation of Cured-in-Place Thermosetting Resin Pipe (CIPP)
- ASTM D2837: Obtaining Hydrostatic Design Basis for Thermoplastic Pipe Materials or Pressure Design Basis for Thermoplastic Pipe Products
- ASTM D2992: Obtaining Hydrostatic or Pressure Design Basis for "Fiberglass" (Glass Fiber Reinforced Thermosetting Resin) Pipe and Fittings
- ASTM D5813: Cured-In-Place Thermosetting Resin Sewer Piping Systems (Section 6.4)

- ASTM D7065: Determination of Nonylphenol, Bisphenol A, p-tert-Octylphenol, Nonylphenol Monoethoxylate and Nonylphenol Diethoxylate in Environmental Waters by Gas Chromatography Mass Spectrometry
- ASTM D7574: Determination of Bisphenol A in Environmental Waters by Liquid Chromatography/Tandem Mass Spectrometry

American Water Works Association (AWWA):

- M28: Rehabilitation of Water Mains
- C600: Installation of Ductile-Iron Water Mains and Their Appurtenances
- C602: Cement Mortar Lining of Water Pipelines in Place – 4-in and Larger
- C651: Disinfecting Water Mains

Environmental Protection Agency (EPA):

- EPA Method 524.2: Measurement of Purgable Organic Compounds in Water by Capillary Column Gas Chromatography/Mass Spectrometry

NSF/American National Standards Institute (ANSI):

- NSF/ANSI 61: Drinking Water Components

In case of conflicting requirements between the Contract Special Provisions and the reference specifications and standards, these Special Provisions will govern.

701.2 Qualification Requirements for CIPP Rehabilitation

Installer:

- The liner installer must be certified or licensed by the liner manufacturer to perform the installation and rehabilitation work. The installer and/or his subcontractor shall not have less than three years of active experience in the installation of structural CIPP water main liners in pressure pipe applications and shall have completed at least five projects of similar size as required for this project, unless otherwise authorized by the Engineer in writing.
- The installer shall install the liner in accordance with the liner system manufacturer's requirements, NSF requirements, and Section 703 of these Special Provisions.

Product:

- The CIPP system to be installed must be certified as complying with the requirements of NSF/ANSI Standard 61 drinking water components.
- The CIPP liner meets the requirements of AWWA M-28 Liner Classification IV (Structural), capable of withstanding all external loads and internal design pressure for a minimum of 50-years.
- The Class IV structural CIPP liner must demonstrate comparable similarity to AWWA pressure class 150 rated pipe based on criteria defined by WI-DNR. Liner design requires WI-DNR approval prior to installation (See sections 108.2 and 702.3 of these Special Provisions).
- The product shall meet the material requirements identified in Section 702 of these Special Provisions.

701.3 Submittals

At least 20 working days prior to the planned start of construction, deliver the WI-DNR submittal to the department, it should be considered advantageous to submit the WI-DNR submittal prerequisite as early as possible to minimize risk of construction delay (see section 108.2 and 702.3 of these Special Provisions for instructions).

At least two weeks prior to the planned start of construction, deliver the submittals designated in 701.3 (a) to the Engineer. The Engineer will review the required submittals and respond to the Contractor in writing within two weeks of receipt. Submittals to the Engineer shall be electronic (unless specified otherwise) and delivered to the Project Engineer, Adam Wiederhoeft, PE at awiederhoeft@madisonwater.org.

It is the Contractor's sole responsibility to obtain approval for all required submittals identified in this contract; no claim shall be made against the Department of Natural Resources, the Madison Water Utility or the City of Madison if authorization to proceed is not granted due to unsatisfactory submittals.

Construction may not begin until the submittal preconstruction submittal package is accepted in writing by the Engineer and the WI-DNR submittal has been accepted in writing by the department. Once authorized to proceed with construction, the submittal requirements identified in Sections 701.3 (b) and 701.3 (c) shall be required in accordance with section 703 – Construction Methods.

701.3 (a) Preconstruction Submittal Requirements

CIPP product data:

- WI-DNR Submittal per Section 108.2 and Section 702.3 of these Special Provisions.
- ANSI/NSF Standard 61 certificate for the proposed CIPP liner system and any associated installation products such as liner lubricant (Section 702.1). Include any NSF 61 installation/curing requirements for the proposed CIPP liner system.
- CIPP liner design and thickness calculations prepared and stamped by a Professional Engineer (per design criteria of Section 702.2).
- Manufacturer's technical data and applicable product testing data for the proposed CIPP liner system, including all applicable instructions for installation, handling, storing, and inspecting the product.
- Manufacturer's recommended procedures for future 1-inch to 2-inch service taps and recommended procedures for 4-inch to 8-inch pressure tapping using a Mueller CL-12 Drilling Machine (Section 702.1).
- Documentation of compliance with ASTM F1216 Standards or ASTM F1743 Standards, as applicable.
- Documentation of compliance with AWWA Liner Structural Classification IV - Structural (AWWA M-28: Rehabilitation of Water Mains – Appendix A).
- Documentation of compliance with chemical resistivity requirements of ASTM D5813 Section 6.4, including chemicals commonly used to treat drinking water (Section 702.1).

Quality Assurance Submittals:

- Manufacturer's certification identifying the Contractor as a licensed installer and list of at least five successfully completed projects of similar scope (Section 701.2).
- Blank copy of field installation log for liner segments identifying all QA/QC verifications, measurements and tolerances which will be monitored & recorded by the installer during installations.
- Traffic Control Plan (Section 107.7).
- Temporary Water Service Plan including the proposed bypass disinfection methods and the contact information for the Contractor's 24-hour maintenance representative (Section 703.3).
- CIPP Liner Disinfection Plan (Section 703.14)
- Customer Meter Coordination Plan (required only if meters will be affected by lining activities).
- Proposed construction schedule (Section 109.2).
- Proposed location and dimension of access pits and vehicle/equipment storage (Section 703.4)

701.3 (b) Construction Submittal Requirements

- Submit a minimum of 15 digital photos per week (3 per day minimum) of construction documenting project activities (Section 703).
- Pre-Installation CCTV recording to the Engineer and WI-DNR (Section 703.5).
- Resin material quantities for the tube to be installed (Section 703.8).
- Copy of CIPP field curing data log (Section 703.9 (b)).
- Copy of hydrostatic pressure test log and test results (Section 703.10)
- Post-Installation CCTV recording to the Engineer and WI-DNR (Section 703.5 and Section 703.12)
- Physical product samples from each liner segment installed (Section 703.15)

701.3 (c) Post-Construction Submittal Requirements

- Product Evaluation Test Data (Section 703.15):
- Short Term Flexural Properties Report

- Tensile Properties Report
- CIPP Wall Thickness Report

SECTION 702: MATERIALS

In addition to the Standard Specifications, these Special Provisions apply to CIPP lining materials and all associated materials required under this Contract.

See the Plans and Standard Specifications for material requirements of pavements, granular materials, ductile iron water main pipe, valves, hydrants, and fittings identified to be installed by the Contractor under this Contract.

702.1 CIPP Materials

For resin-impregnated flexible tube systems, the CIPP liner shall consist of one or more concentric layers of an absorbent material (i.e. felt, synthetic fiber), and may also contain additional materials such as glass fiber reinforcement or polymeric membranes. The CIPP tube is to be impregnated with an epoxy resin system that is compatible with the proposed installation procedures. For spin-cast surfacing systems the epoxy resin CIPP material shall yield a structural, monolithic pipeline surfacing with proper sealing connections to unsurfaced areas and a hard, impermeable surface that is suitable for water service.

The CIPP lining system must be certified for use in potable drinking water applications by NSF/ANSI 61: Drinking Water Components, which is standard for health effects of all devices, components, and materials to ensure that these products do not contribute contaminants to drinking water that could cause adverse health effects. The product shall also be listed on the NSF Approved Product Listing website, <http://www.nsf.org/Certified/PwsComponents/>.

The liner shall form tightly to the internal circumference of the host pipe without leaving annular space that could compromise the liner system performance in a pressurized environment.

The liner shall not leach organic compounds (volatile organic compounds or bisphenol A) into the potable water system. Pre-installation and post-installation water quality sampling shall be performed to verify that the installed liner system is consistent with NSF/ANSI 61 certification requirements. See Section 703.15 of these Special Provisions for more information.

The CIPP liner system, when cured, shall be chemically resistant to internal exposure to drinking water treated with common chemical additives and meet the sewer corrosion performance requirements of ASTM D5813, Section 6.4.

The resin impregnated tube shall have a relatively uniform thickness that when compressed at installation pressures and after curing is completed it will equal or exceed the approved minimum design thickness excluding the thickness of any polymeric membranes or any other non-structural surface coatings.

The use of a lubricant during the installation process may be needed to reduce friction. The lubricant used shall be a nontoxic, NSF/ANSI 61 certified product compatible for use with the approved CIPP liner system. If lubricated installation will be considered, submit the lubricant's NSF certification with the preconstruction submittals identified in Section 701.3 (a) of these Special Provisions.

The wall color of the interior pipe surface of CIPP after installation shall be a relatively light reflective color so that a clear detailed examination with closed circuit television inspection equipment may be made.

The proposed CIPP liner system shall be compatible with and include manufacturer's recommended installation procedures for future service-line corporation stop tapping in 1-inch, 1 ½-inch and 2-inch diameters.

The proposed CIPP liner system shall be compatible with and include manufacturer's recommended procedures for 4-inch to 8-inch pressurized live-taps using a Mueller CL-12 drilling machine and cutting head.

702.2 Design Parameters

The design of the CIPP liner shall be based on the following design conditions, in addition to the manufacturer's standards and referenced standards:

Host Pipe Diameter / Material Length (total length to be lined)	6-inch / Cast Iron (3,700 LF)
Internal Operating Pressure	100 psi
Ovality of Existing Pipe	2% Minimum
Soil Modulus	700 psi
Soil Unit Weight	120 pcf Minimum
Soil Depth (above top of pipe)	7-feet
Safety Factor	2.5
Design Condition	Fully Deteriorated, Pressure Pipe
Live Loads	AASHTO HS20-44 Loading Under Roadways

The CIPP liner design and thickness calculations are to be prepared and stamped by a Professional Engineer actively licensed in the State of Wisconsin and submitted to the Engineer and WI-DNR for approval in accordance with the submittal requirements of Section 701.3 (a) of these Special Provisions.

702.3 Working Pressure Requirement

As identified in Section 108.2 of these specifications, the proposed structural CIPP liner system must demonstrate comparative similarity to an AWWA pressure class 150 requirements in order to be approved for installation as a Class IV structural liner by WI-DNR.

Section NR811.69 (2), Wis. Adm. Code, states in part, "All pipe shall be minimum AWWA pressure class 150 and shall be designed for a minimum 100 psi working pressure except as approved by the Department for special low pressure applications."

The department's working pressure criteria for considering the installation of structural CIPP liners is that the CIPP liner must sufficiently demonstrate that it is designed, at a minimum, for a 50-year service life with 100 psi internal working pressure and a design safety-factor of 2.5.

WI-DNR requests the working pressure class verification of the proposed CIPP liner is to be demonstrated based on pressure rating and design calculations that use long-term hydrostatic strength data obtained through hydrostatic design basis (HDB) testing procedures, (such as: Procedure B in ASTM D2992: Obtaining Hydrostatic Design Basis for Glass Fiber Reinforced Thermosetting Resin Pipe and Fittings – OR - ASTM D2837: Obtaining Hydrostatic Design Basis for Thermoplastic Pipe Materials).

Submit the CIPP liner design calculations based on the design conditions described above, and in Section 702.2. The submittal shall include the calculated pressure rating and the HDB Test Report per Sections 5.7 & 6 of ASTM 2837 or Sections 14 & 15 of ASTM D2992.

For CIPP liners designed without long-term hydrostatic strength data obtained through HDB test methods, submit the CIPP liner design calculations (based on the design conditions described above, and in Section 702.2) using the Fully Deteriorated Pressure Pipe Condition formula (Section X1.3.2 in ASTM F1216). In lieu of HDB strength data, submit documentation to confirm the value and the method used to obtain the value used as the '50-year tensile strength' in the formula. The submittal must include the pipe design calculations and the basis for the long-term strength value used in the design calculations.

The pressure class verification documents are to be submitted to the WI-DNR and to the Engineer as part of the initial submittal package required in Section 701.3 (a) of these Special Provisions. Construction

may not begin until the WI-DNR has approved the pressure class verification, even if all additional submittals have been reviewed and approved by the Engineer. WI-DNR will respond to the Contractor regarding their submittal within 20-business days of receipt.

Submit the WI-DNR pressure class verification documents:

Norm Hahn
Public Water Supply Section
Wisconsin Department of Natural Resources
PO Box 7921
Madison, WI 53707-7921

Or, submit electronically to: norman.hahnjr@wisconsin.gov

702.4 Delivery, Storage, and Handling CIPP Liner

Transport, handle, and store liner and thermosetting resin, and other materials as recommended by the manufacturers to prevent damage.

CIPP liner materials that are defective or damaged prior to installation shall be rejected and replaced at the Contractor's expense. Liner materials damaged during installation shall be repaired or replaced as recommended by the manufacturers and approved by the Engineer.

702.5 Temporary Bypass Service Materials

All materials furnished for use as temporary bypass pipe, service hose, connections and related appurtenances that come into contact with drinking water are to be certified for compliance with ANSI/NSF Standard 61. All materials shall be fully adequate to withstand the required water pressure and all other conditions of use, and shall provide adequate water tightness before being put into service. All previously used materials may only have been used in potable water applications.

All materials for use as main temporary bypass lines, service lines, connections and related appurtenances shall have a minimum working pressure rating of 200 psi and be made of materials that will not have an adverse effect on the taste or odor of the water.

When the Contract documents or the Engineer requires the temporary water system to include one or more temporary hydrants, the main temporary bypass line must be at least 4-inch diameter; otherwise, the main temporary bypass line must be at least 2-inch in diameter.

Match the diameter of the temporary service line with the existing service lateral diameter for all services 1½-inch diameter to ¾-inch diameter. Use a ¾-inch temporary service line for any service lateral smaller than ¾-inch diameter. Use hoses or piping that is hydraulically equivalent to the service size for all services 2 inch in diameter and larger.

Temporary fire hydrants shall consist of a 4 inch by 4 inch tee or 4 inch 90° bend, with a butterfly valve connected to the end of the tee or bend, and an operating nut to control the valve. Temporary fire hydrant shall be equipped with a 4-1/2 inch diameter National Hose/National Standard Thread nozzle with hydrant cap installed. Any alternative temporary hydrants proposed by the Contractor must be authorized in writing by the Engineer with the consent of Madison Fire Department prior to installation.

SECTION 703: CONSTRUCTION METHODS

In addition to the Standard Specifications, these Special Provisions apply to CIPP lining activities all associated construction activities required under this Contract.

See the Plans and Standard Specifications for construction and installation requirements for any pavements, granular materials, ductile iron water main pipe, valves, hydrants, and fittings identified to be installed under this Contract by the Contractor.

Perform all CIPP applicable construction activities with the Section 703 Construction Methods Special Provisions. Document all relevant CIPP rehabilitation activities with digital photographs (minimum 3 per day and 15 per week) and electronically submit on a weekly basis to the Engineer in accordance with Section 701.3 (b) of these Special Provisions.

703.1 Safety

Carry out all operations in strict accordance with all applicable OSHA and manufacturer's safety requirements. Emphasis shall be placed upon safety requirements for excavations, entering confined spaces, air quality, and working with chemicals, hot water, hot air and/or steam.

Erect such signs and other related devices as necessary for the safety of the work site and to secure the site. All work shall conform to the safety requirements of pertinent regulations and as identified in these specifications.

703.2 Pre-Construction Responsibilities

Provide adequate notice to Madison Water Utility prior to mobilization. Madison Water Utility will schedule and conduct a preconstruction meeting with the Contractor at a mutually acceptable time.

Prior to construction, Madison Water Utility will host a public meeting and/or deliver an informational letter to inform affected residents and emergency services regarding the pilot water main rehabilitation project. It will be the responsibility of the Contractor to notify residents at least 48-hours prior to any planned interruption of service, or immediately upon and throughout any unplanned service interruption.

Do not operate water main valves, curb stops, or fire hydrants without direct authorization from a Madison Water Utility representative. Provide Madison Water Utility at least one working-day notice prior to transferring any water services from the water main to the temporary bypass piping system. For any other work affecting the water system, provide the Engineer at least two working-day notice prior to beginning, per Section 105.12 of these Specifications or as applicable to Section 703.3 of the Standard Specifications.

Water necessary for cleaning, disinfection and flushing, etc. will be available, at no cost per Special Provision Section 107.11, from one location prior to the start of construction. Contact Madison Water Utility to schedule the installation of the RPZ valve at least two (2) working-days notice prior to the time water service is needed. The provided water source will be in close proximity to the lines being rehabilitated. Furnish any necessary piping or flexible hoses, fittings, required for connection between the RPZ valve on the fire hydrant and where water is required.

703.3 Temporary Water Service

As required in Section 701.3 (a), submit a proposed Temporary Water Service plan depicting the proposed components, configuration/locations, protection measures, proposed disinfection methods, and contact information for the Contractor's representative(s) responsible for routine maintenance and emergency response. The temporary water service plan must also indicate if any customer water meters are to be temporarily removed or otherwise affected in order to accommodate the temporary water service or other construction activities. The Temporary Water Service Plan must be approved by the Engineer before installing any section of the temporary distribution piping.

The temporary bypass system shall maintain a continuous supply of water to all affected customers for the duration of time the existing main is out-of-service for rehabilitation. The temporary bypass system shall be maintained in a safe and operative condition at all times. For protection of the work and the public, flashers and barricades shall be installed at apt locations and as directed by the Engineer or Construction Inspector. The flashers and barricades shall be in proper operating condition. Temporary water piping shall be protected from freezing weather at all times.

Additionally, the work is to be in conformance with the requirements of the Standard Specifications, Provisions and AWWA C602 Cement Mortar Lining of Water Pipelines in Place – 4 In. and Larger, Section 4.6 Temporary Bypass to Customers.

If any water meters are to be removed or otherwise affected to establish temporary water service or accommodate any other construction activities the Contractor must notify the Madison Water Utility Meter Shop according to Section 703.3(a) and coordinate with Madison Water Utility prior to performing any meter related work.

The Contractor is responsible for performing any indicated meter removals on the approved Temporary Water Service Plan. Notify the Madison Water Utility Meter Shop of all meter removal appointments and allow the Water Utility to inspect the existing conditions during the removal appointment. Do not reinstall any meter which has been removed. See Section 703.3(e) for meter reinstatement requirements.

If customer water meters are not affected or removed to accommodate construction, the meter reinstatement requirements of Section 703.3(e) still will apply.

All associated temporary water bypass work, including any work required to schedule appointments and coordinate with Madison Water Utility for meter removals and reinstallations, will be paid under Bid Item 90160 – Temporary Water Service.

703.3 (a) Notification Requirements for Service Interruptions:

Notify the Madison Water Utility Meter Shop (Tony Mazzara – 608-261-4297 or tmazzara@madisonwater.org) at least three (3) working-days in advance of any anticipated work involving, or affecting customer water meters. Notify and coordinate all subsequent water meter related work with Madison Water Utility Meter Shop as customer appointments are scheduled or as otherwise directed.

Notify the Construction Inspector and the Engineer at least 2 working-days in advance of any planned service interruption.

Provide affected customers at least 72-hour notice advance of any planned service interruption. The notice shall include the delivery of a door-hanger or similar pamphlet which indicates the date and time of the planned service interruption and, as applicable, the proposed location of temporary service connection and the proposed route of the temporary service line & main bypass line. The notice shall attempt to coordinate the service interruption at a time that is convenient to the customer. Include contact information for the Contractor's field representative and the Engineer.

Whenever possible, make connections to the customer's water service line on a day and at a time that is convenient to the customer. Make satisfactory arrangements with the customer so that stop and waste valves shall be accessible at all times.

Immediately prior to individual service work, attempt to notify the consumer again to verify that all water use has been stopped.

Do not interrupt any customer's service until certain that all labor, material and equipment necessary to perform the work are present at the work site.

Bear all responsibility for any loss or damage arising out of the failure of any such customer to receive the specified notice of a planned interruption of service.

Restore service as soon as possible. Immediately notify the Madison Water Utility's Project Representative regarding the restoration of service.

Emergency Shutdowns and Notifications:

In the event of a break on a water main, service, bypass pipe, temporary service or other failure of a Madison Water Utility facility, whether the result of Contractor's activities or other unrelated matters, act in accordance with the following procedure:

- Immediately notify Madison Water Utility's 24-hour Operator at (608) 266-4667 and inform them of the situation, the affected area, estimated duration, and if there is a need for an immediate water main shutdown.
- The Contractor is NOT to operate any valves unless directly authorized to do so by a Madison Water Utility representative.
- Notify all affected residents affected by the emergency service interruption.

703.3 (b) Temporary Bypass Water System Set-Up

Disinfect the hydrant standpipe prior to connecting the bypass pipe to the hydrant by pouring 1 quart of commercially available bleach (solution containing approximately 5% sodium hypochlorite) into the hydrant. The hydrant shall be filled with clean water and let stand for a minimum of 20 minutes. The hydrant shall then be flushed and the bypass pipe connected to it. All hydrant nozzles shall be capped when not in use.

Whenever possible, install a compliant double-valved tee directly on the 4½-inch hydrant nozzle. One branch of tee shall be used for the temporary bypass connection, and other shall be left without bypass attachments for fire department use. Support, as necessary, all appurtenances attached to hydrant.

All temporary water service connections to hydrants shall be made in such a manner that if it becomes necessary, they can be easily removed so that the hydrant can be used for firefighting purposes, with minimum of effort.

When a connection cannot be made on a hydrant, a bulkhead connection may be required. Install compatible bulkheads (temporary line caps) on the existing water main in place of a solid cap or plug fitting to keep the section of the existing water main pressurized and capable of supplying a continuous flow of water. The bulkheads shall be fitted with a compatible outlet fitting so the temporary bypass pipe can be fed through the end of the bulkhead. The coupling shall be slid over the end of the water main, and braced or restrained so that it will support normal operating pressure without leaking.

Temporary valves and hydrants shall be installed on the temporary bypass pipe at all appropriate locations, as designated on the approved Temporary Bypass Service Plan. Valve and hydrant spacing should, at a minimum, schematically match the existing water main configuration, and also as required to isolate the temporary piping from the existing system. Spacing between adjacent valves or hydrants shall not exceed 500 feet, unless approved by the Engineer.

Temporary fire hydrants shall be serviceable at all times. Hydrants are subject to inspection at any time by either the Madison Water Utility or the City of Madison Fire Department. If they are found to be unserviceable, immediate correction shall be made.

Completely cover and secure black plastic sheeting around all existing or newly-installed hydrants while they are out-of-service. Maintain the plastic covering until the hydrant is returned to service or removed and salvaged.

Install bypass pipe on the house-side of a sidewalk and in ditches or along City-owned greenways whenever possible to minimize or avoid crossing traffic or pedestrian routes. Where not possible, provide a ramping system to protect the bypass pipe at each location where pipe crosses roads or driveways. ADA compliance shall be provided at sidewalk or sidewalk ramp crossings per Section 107.7 of these Special Provisions.

All ramping material is to be furnished, installed, maintained and removed by the Contractor. Any required trenched roadway crossings, including pavement cutting, excavation, backfill, maintenance and

removal are the responsibility of the Contractor, not Madison Water Utility. Madison Water Utility will provide the final pavement restoration at these locations.

Water from the temporary bypass pipes will NOT be allowed for any other purpose other than to supply the bypass pipes. Water for filling water tanks, or any other purpose other than supplying water to bypass pipes must be obtained from a hydrant with a Madison Water Utility approved backflow preventer installed per Section 107.11 of the Standard Specifications and these Special Provisions.

703.3 (c) Temporary Customer Service Lines

Connect consumer services that are 1½ inch and smaller, to the temporary bypass system using a hose connected to an outside hose bib. Use a double-valved "Y" connector to connect temporary hose to consumer's hose bib. When a hose bib connection is not possible, an alternate manner of connection shall be reviewed and approved by the Engineer.

After completing the temporary bypass disinfection per Section 703.3 (d) of these Special Provisions, thoroughly flush hoses to be used for temporary services with potable water immediately prior to connection to consumer's service. Notify consumers in accordance with 703.2 (a) prior to shutting off the service and transfer services to the bypass. Do not transfer services to bypass earlier than necessary to allow the work to progress without delay.

703.3 (d) Bypass System Disinfection

All bypass pipes and services shall be properly disinfected and yield a safe-water sample prior to connecting any customers to the temporary bypass system. The temporary service connections shall have valves at both the connection to the bypass pipe and near the point of connection to the private plumbing system so the entire bypass system including temporary service lines can be disinfected.

As part of the Temporary Water Service plan, required by Section 701.3 (a) and described in Section 703.3 of these Special Provisions, include the proposed disinfection, flushing, and applicable customer notification procedures required for the proposed temporary bypass system. These procedures shall be in accordance with AWWA C651 – Disinfecting Water Mains and the Standard Specifications, which require 48-hours of disinfection prior to flushing and sampling.

Properly dispose of any highly-chlorinated water in accordance to Standard Specification 703.14 (c). Sampling and testing will be done according to the Standard Specifications.

703.3 (e) Return Service Line to New Water Main

The Contractor is responsible for scheduling all appointments and any necessary customer notifications at all properties being served by the temporary water system prior to reconnection to the existing water system. The Contractor must notify the Madison Water Utility Meter Shop according to Section 703.3(a) and coordinate with Madison Water Utility prior to performing any meter related work.

Prior to transferring from the bypass system to the existing water system, clear the water service lines by back flushing with potable water or as otherwise approved in the disinfection and flushing plan. Disconnect the hose, restore the water service line back to normal conditions, and restore water flow. All areas used while providing temporary service shall be properly restored to pre-construction status, or better.

After flushing is completed and service lines have been restored to the permanent laterals, remove bypass and all associated materials used for maintenance and ramping. Complete restoration of all areas damaged by temporary bypass pipe and service connections.

703.3 (f) 24-Hour Maintenance

The Contractor shall be responsible for maintenance and repair of the temporary bypass system and all associated protective equipment (barricades, flashers, ramps etc.) at all times. The Contractor shall be equipped to make all repairs necessary, at the project site, for the duration of the project.

Designate a permanent company employee to maintain the bypass and services. Supply Madison Water Utility with applicable emergency and after-hours phone numbers as part of the proposed Temporary Water Service Plan submittal required in Section 701.3 (a) of these Special Provisions.

703.4 Excavation of CIPP Liner Insertion/Extraction Pits

Based on the information represented on the Plans, the field conditions of the work-site and any design/manufacturing limits of the CIPP liner, identify the number and location of access points required to rehabilitate the designated deteriorated water main. Submit the proposed locations and dimensions to the Engineer for approval as part of the pre-construction submittal requirements in Section 701.3 (a) of these Special Provisions.

Madison Water Utility will provide the excavation and water removal, if necessary, for establishing the approved water main access pits, and other approved excavations on the site. Provide at least two (2) working-days notice to Tom Rosemeyer of the Madison Water Utility (608-266-5985 or trosemeyer@madisonwater.org) prior to the anticipated start of the work to coordinate work schedules. Excavation will not begin until all underground facilities have been marked through Digger's Hotline (three working days notice required). Excavation work, other than emergency repairs, that is needed outside of normal work hours (Monday-Friday 7:30 AM to 3:30 PM) or excavations requested with less than two working days notice will be the responsibility of the Contractor if Madison Water Utility resources are unavailable.

Coordinate the work on-site with Madison Water Utility to ensure that the ditch dimensions adequately allow for the Contractor's proper installation and maintenance of shoring/trench protection and also that the proper length of existing pipe is exposed in the pit based on the manufacturer's recommended installation procedures.

Madison Water Utility will also provide the backfilling work including backfill material, compacting the backfill material, removal of excess ditch/backfill material, final restoration of the access pit, and other work deemed incidental to preparing the ditch and/or pavement base.

The Contractor is required to furnish, install, and maintain the shoring/trench protection in the access pits, as well as any other maintenance associated with the access pits after they are excavated. Shoring/trench protection shall comply with the Standard Specifications and applicable OSHA regulations. The existing main shall be cut square using an appropriate cutting device which leaves no split or fractured ends. All cut faces of the existing main shall be chamfered on the inside surface to a suitable profile to prevent damage to the liner pipe during or after insertion. Edge guards, approved lubrication, or other means shall be used as needed to protect the liner from damage caused by the host pipe edges at insertion points.

Immediately upon opening the host main at the liner insertion points, the ends of the adjacent existing water main that are not to be lined at the insertion/extraction points shall be covered/plugged by the Contractor so that no debris or animals shall enter into them during reconstruction work.

A thorough examination of the route of the existing water main shall be made by after cutting the existing water main. This should include a pipeline location survey with equipment capable of locating any changes in direction, valves, bends, intrusions, and other fittings that may impede the insertion and/or proper inflation of the CIPP liner.

703.5 Clean and Inspect the Existing Water Main

Remove all internal debris out of the pipeline that will interfere with the CIPP liner installation. Pipes shall be adequately cleaned with high-velocity jet cleaners; mechanically powered equipment; cable-attached devices; or fluid-propelled devices (e.g., pipe pigs).

The cleaning method shall remove all rust, scales, tuberculation, deposits, loose or deteriorated remains of any original coatings and other foreign materials from the inside of the pipe so as to produce a smooth metal surface finish that will allow the new CIPP liner to adhere and securely bond to the existing host pipe.

Lawfully dispose of all materials removed from the pipe during the cleaning operation at an off-site location, and pay all associated landfill fees and taxes. Lawfully dispose of any and all leftover materials and/or byproducts of the rehabilitation process at an off-site location, and pay all associated landfill fees and taxes. Cleanup of any soil contamination caused by or encountered during the excavation and/or water main lining process is to be the responsibility of the Contractor.

Verification of readiness to install liner shall be performed by experienced personnel trained in locating services, breaks, obstacles, etc. This will include closed-circuit television (CCTV) and possibly also include pipe mandrels or other devices. The interior of the pipeline shall be carefully inspected to determine the location of any conditions that may prevent proper installation of the CIPP liner. These conditions shall be noted and brought to the attention of the Engineer so that they may be corrected. Copies of CCTV inspection DVD's and related reports shall be made available to the Engineer as soon as possible for review and approval prior to commencement of lining activities.

It shall be the responsibility of Madison Water Utility to remove any unforeseen obstructions that might prevent the liner installation. Madison Water Utility shall have the right to make corrective repairs using in-house staff, a third-party contractor, or if it is deemed to be in Madison Water Utility's best interest to do so, the Engineer may authorize the Contractor to make repairs and compensate the additional work under the terms of this Contract.

Any external water leaking back into the existing pipeline shall be removed so as not to interfere with the proper installation and curing of the CIPP liner.

Verify the length of water main sections to be cleaned and lined. Flush the host pipe with clean water to remove any loose debris from the interior surface of the pipe, and remove all standing water from the inside surfaces of the cleaned water main by passing a sufficient number of oversized foam swabs through the main or use a progressive expansion method to remove standing water.

Perform and submit to the Engineer DVD recordings of the closed circuit television (CCTV) inspection of existing water mains at two intervals:

1. Prior to water main lining, per Section 703.5 of these Special Provisions.
2. The finished pipeline after service reinstatement, per Section 703.5 and Section 703.12 of these Special Provisions.

The Contractor shall provide Madison Water Utility and the Wisconsin Department of Natural Resources with a complete set of all required inspection DVD's. The picture quality and definition shall be clear and acceptable for viewing and the DVD's shall be compatible with standard DVD equipment. Information on the DVD shall identify the water main section, direction of travel, and the date of inspection. Where applicable, the DVDs shall include voice description of the location of any identified defects.

703.6 Prepare Water Service Connections for Lining

Prior installing the CIPP liner, locate all existing water service laterals, and plug the service laterals as recommended by the manufacturer and approved by the Engineer. The insertion of plugs into the service connections may be done simultaneous with the pre-installation CCTV inspection.

The plugs, or other approved device, shall prevent any accumulation of resin inside the service line thus blocking them, and also prevent water infiltration from a leaking curb-stop service valve.

The plugs, or other approved device, shall make visible any non-penetrating service connections in the lined pipe, to ensure the operators are able to accurately locate the non-penetrating service connections after they have been covered with the CIPP liner.

703.7 Equipment Sufficiency

Provide a suitable quality and quantity of temperature and pressure gauges capable of meeting or exceeding the manufacturer's standards and specifications for monitoring installation and curing of the CIPP liner. Puller unit/winch cable shall be equipped with manufacturer recommended tension gauge and shall be smooth running and variable speed. The cutting device shall be a remote monitored device for use inside the lined pipe.

Prepare and inspect all necessary tools and any spare parts that are required for equipment that suffers recurring breakdowns, and shall ensure that said tools and spare parts are available at the work-site. Prepare and make operable all necessary communication equipment for the installation field crew.

703.8 Resin Materials Inspection

The Engineer and/or Madison Water Utility representative shall be able to inspect the epoxy resin materials and/or the chemical impregnation procedure of the CIPP liner tube or spin-cast surfacing liner. The resin and catalyst system shall be prepared as recommended by the liner manufacturer, NSF, and as approved by the Engineer and shall be monitored and documented for each installation.

The quantities of the resin and catalyst system must be prepared in accordance to the manufacturer's standards and NSF requirements to yield a liner that, when cured, provides at least the lining thickness specified in the approved liner design with additional allowances for polymerization shrinkage and the loss of resin through irregularities in the deteriorated host pipe wall. Liner thickness measurements shall exclude the thickness of any polymeric membranes or any other non-structural surface coatings. Ratios of the epoxy resin mixture shall be documented for each installation and verified for consistency with ratios identified on the product's NSF/ANSI 61 certification.

If any chemical impregnation procedures are done onsite, the impregnation shall be done in an enclosed vehicle or other controlled environment approved by the Engineer. On-site impregnation in the open is not acceptable.

703.9 Installing the CIPP Liner

Prior to installing the CIPP liner, verify full compliance with the approval requirements of the Engineer as specified in Section 701.3 of these Special Provisions; also verify full compliance with the approval requirements of the WI-DNR as specified in Sections 108.2 and 702.3 of these Special Provisions. The Contractor shall not proceed with the installation of liner until the Engineer, in writing, certifies such compliance and directs the Contractor to proceed with the CIPP liner installation. The approved liner shall be installed pursuant to the specific provisions set forth for the approved lining method

703.9 (a) Preparing and Inserting the CIPP Liner

The CIPP liner system shall be installed within the existing water main through the insertion point by either spin-casting, inversion or by the pull-in-place method, as recommended by the manufacturer and as specified in ASTM F126/1723 and/or other applicable ASTM Standards required by the Engineer.

The liner dimensions shall be sufficient enough to fully extend the liner within the host pipe both circumferentially and longitudinally, and to ensure proper finished thickness will be obtained with the liner either adhering to or fitting tightly against the interior wall of the existing pipe without creating annular space between the liner and the host pipe.

Before installation begins, confirm as applicable, the minimum pressure required to hold the liner tight against the existing pipeline and the maximum allowable pressure so as not to damage the liner materials. In order to ensure a proper fit of the liner, the pressure shall be maintained between the recommended minimum and maximum pressures through the duration of the installation process. As applicable, verify that field installation data-logs and installation procedures are consistent with manufacturer recommendations and any installation/curing requirements identified in the NSF/ANSI 61 certification for the liner product.

703.9 (b) Curing the CIPP Liner

The equipment used to execute the curing of the CIPP liner shall be in accordance with the liner manufacturer's equipment requirements. As applicable, the equipment shall be capable of uniformly raising the temperature in the entire liner above the temperature required to initiate and complete the curing of the resin system. The required temperature shall be determined by the manufacturer requirements of the approved resin/catalyst system. The heat source shall be fitted with suitable monitors to gauge the temperature and pressure of the incoming and outgoing heat exchanger circulating heating medium. The monitoring devices shall be in accordance to Section 703.6 of these Special Provisions. Thermocouples or temperature gauges or infra-red gun shall be used at insertion and extraction points to determine and record the temperature of the liner and time of exotherm.

Sufficiently monitor and document the pressure readings, temperature readings and the time of readings throughout the duration of the curing process (from before the initiation of the heat source through the cool-down phase). A copy of the documentation shall be submitted to the Engineer in accordance to Section 701.3 (b) of these Special Provisions.

The cure period shall be of a duration recommended by the resin manufacturer and/or the NSF/ANSI 61 certification. Extend the duration as necessary for the site specific conditions at the time curing (temperature, moisture level, thermal conductivity of soil, etc.). During this cure time, it is required that the temperature inside the liner will be continuously maintained at or above the temperature required by the manufacturer and/or NSF/ANSI 61 requirements for curing the product.

The curing shall be considered complete when inspection of the exposed portions of the liner show it to be hard and sound and the temperature readings at the interface of the liner with the host pipe show that enough heating occurred to ensure that no portions of the CIPP liner have not been fully-cured.

Once the cure is ensured to be 100% complete, cool the hardened liner to a temperature below one hundred degrees Fahrenheit (100°F) before relieving the internal pressure. Cool down shall be accomplished as recommended by the manufacturers. Care shall be taken in the release of the internal pressure so that a vacuum will not develop that could damage the newly installed liner.

After the liner is sufficiently cooled to below one hundred degrees Fahrenheit (100°F), and before beginning to reinstate the service laterals, a CCTV inspection of the newly installed liner shall be performed to confirm that the liner was properly installed and completely cured. If no services are involved then this inspection is to be recorded and delivered to the Engineer on DVD as the final TV inspection submittal.

The finished lining segment shall be continuous over the entire length and be free from visual defects such as foreign inclusions, dry spots, pinholes and delaminations. The lining shall be impervious and free of any leakage.

If at the insertion/extraction ends the lining fails to make a tight seal, notify the Engineer and apply a seal of a resin mixture compatible with the CIPP liner or repair using manufacturer's approved methods if different from above.

703.10 Pressure Testing

Pressure testing for water-tightness is required on all CIPP sections installed, and shall be completed after the preliminary video inspection but before the reinstatement of service connections, unless otherwise directed by the Engineer.

Remove any trapped air and stabilize the CIPP liner prior to beginning hydrostatic pressure testing.

Perform hydrostatic pressure test on the lined water main at a hydrostatic pressure of 25% greater than the normal working pressure for a period of one hour.

After the one-hour test, the quantified make up water shall be calculated and if the loss at test pressure exceeds the allowable (up to 20 gallons per inch diameter, per mile, per day) identify the source of the loss and minimize it in a manner acceptable to the Engineer.

703.11 Reinstatement Service Openings

Upon completion of installation and pressure testing of the CIPP liner, reconnect existing services from the interior of the water main using a television camera directed robotic cutting device that removes a small section of the liner to expose the corporation valve opening. All connections that are to be reopened shall be satisfactorily opened to the size of the original opening, and to the depth required to completely open the water service connection to the customer. The reinstated service opening shall be circular, smooth and flush.

Each service successful service reinstatement will be paid under Bid Item 90162 – Service Reinstatement. In the event a service cannot be successfully reinstated from within the pipeline, the service must be connected using manufacturer's recommended methods and as approved by the Engineer or a new service must be tapped into the newly rehabilitated water main. Provide the Engineer at least two working-day notice prior to beginning any such work, per Section 105.12 of these Specifications or as applicable to Section 703.3 of the Standard Specifications.

Any additional cost resulting from unsuccessfully reinstating a service opening from within the pipeline shall be borne solely by the Contractor, and he shall not make any claim against Madison Water Utility for any additional required work associated with the service lateral reinstatement.

703.12 Final Television Inspection

A final television inspection and video recording of the rehabilitated water main, including the restored service connections, shall be performed immediately after work is completed. The final CCTV recording on DVD shall be submitted to the Engineer in accordance to Sections 701.3 (b) and 703.5 of these Special Provisions.

Should the results of this final inspection reveal any defects that are determined by the Engineer to be repairable, repair these defects as directed by the Engineer at no cost to Madison Water Utility or the City of Madison. Should the results of this final inspection reveal any defects that are determined by the Engineer and manufacturer not to be repairable, remove and replace the existing water main as ordered by the Engineer at no cost to Madison Water Utility or the City of Madison.

703.13 Reconnect Water Main

After the final television inspection is completed, Madison Water Utility will furnish and install new water main and reinstall the removed sections of the existing pipeline (e.g. at insertion/reception pits, valves, connections, etc.) as indicated on the Plans. Any required cutting or removal of lined water main will be done in accordance to the manufacturer's recommendations provided to Madison Water Utility. Any additional shoring or trench protection needed for installing/reconnecting water mains will be the responsibility of Madison Water Utility. Provide at least two (2) working-days notice to Tom Rosemeyer of the Madison Water Utility (608-266-5985 or trosemeyer@madisonwater.org) prior to the anticipated start of the water main work to coordinate work schedules. Madison Water Utility main

installation/reconnection work, other than emergency repairs, will occur during normal working hours (Monday-Friday 7:30 AM to 3:30 PM) unless otherwise approved by the Madison Water Utility.

The Contractor shall be responsible for furnishing and performing water main disinfection according to the Standard Specifications and these Special Provisions. Coordinate and work with Madison Water Utility during the water main installations/reconnections to properly perform disinfection procedures and to ensure the adequacy of the new materials furnished and installed by Madison Water Utility.

703.14 Disinfection

All rehabilitated water mains, newly installed water mains, or reinstalled existing water mains shall be properly disinfected by the Contractor and produce a safe-water sample before any customers may be reconnected to the water system. Coordinate work with Madison Water Utility to properly disinfect and ensure the adequacy of all new water mains being furnished and installed by Madison Water Utility or others.

As part of the submittals required under Section 701.3 (a) of these Special Provisions, include the proposed CIPP Lining Disinfection Plan to the Engineer for approval. The plan shall identify the disinfection, flushing, and applicable customer notification procedures required to properly disinfect all water main work included in this Contract. These procedures shall be in accordance with AWWA C651 – Disinfecting Water Mains.

Once all of the pipe work is completed, perform chlorine disinfection of the newly installed pipe and CIPP liner in accordance with the approved CIPP Liner Disinfection Plan.

Properly dispose of any highly-chlorinated water in accordance to Standard Specification 703.14 (c). Sampling and testing will be done according to the Standard Specifications.

Customer service lines shall be transferred from the temporary bypass system to the newly-rehabilitated system after accepted water samples have been obtained and approved by the Engineer in accordance to Section 703.14 (a) these Special Provisions, and after the line has been flushed following the 24-hour stagnation sampling procedures in Special Provisions Sections 703.14 (b) and (c).

703.15 Volatile Organic Compound Analysis / Bisphenol A Analysis

The rehabilitated drinking water system shall be tested to insure that the CIPP lining system is not leaching any volatile organic compounds (VOCs) and/or Bisphenol A (BPA) into the water.

Madison Water Utility will collect and submit water samples for VOCs analysis according to standard methods to meet the requirements of the Safe Drinking Water Act (SDWA) including but not limited to testing by a certified drinking water laboratory, following EPA Method 524.2, with a method detection limit of <1 ug/L for regulated and unregulated contaminants commonly assessed by this method. The testing lab shall identify any peaks that may not fall into the VOC compound library, or at least document any unidentifiable peaks in the results.

Samples collected and analyzed for BPA will according to standard methods to meet the requirements of either ASTM D7065 or ASTM D7574. The testing shall be performed by a certified laboratory capable of using a method detection limit of <100 ng/L for BPA. Submit the test results to the Engineer in accordance to Section 703.15 of these Special Provisions.

Three test samples shall be collected and submitted by Madison Water Utility prior to the beginning of work and shall serve as a base line for comparison. Three post-lining VOC and/or BPA test samples shall be taken by Madison Water Utility at the same locations after the Contractor has successfully completed both hydrostatic testing and disinfection tests and before transferring service lines from the bypass system. The Contractor shall notify the Engineer and isolate the filled rehabilitated water main section and let the water stagnate for at least 24-hours before Madison Water Utility takes the post-lining testing

samples. Contractor is responsible for any lab fees associated with the pre/post BPA/VOC analysis required under this Contract.

After the post-lining VOC and/or BPA samples have been collected and the Engineer has authorized the Contractor to proceed, the customer service lines shall be transferred from the temporary bypass system to the permanent service lines on the rehabilitated water main.

703.15 Quality Assurance Testing

As part of this pilot project, a thorough evaluation of the CIPP liner is intended and considered incidental to the installation of the CIPP liner. Prepare and collect all product/material samples required herein, complete all requested testing procedures, and submit to the Engineer the associated test result data/reports in a timely manner.

Product / Material Samples:

- Collect and submit one restrained tube sample prepared as specified in ASTM F1216 for each liner segment installed. Notify the Engineer if a restrained tube sample cannot be prepared due to physical constraints, a flat plate sample shall be prepared in lieu of the restrained tube. These samples will be in addition to any samples required for required product evaluation testing.

Product Evaluation Testing / Test Data:

- CIPP flat plate samples shall be prepared and physical properties tested in accordance with ASTM F1216 Section 8.1.3.1 – Short Term Flexural Properties, and ASTM F1216 Section 8.1.32 – Tensile Properties.
- CIPP liner wall thickness shall be tested for each liner segment installed in accordance with ASTM F1216 Section 8.6 – CIPP Wall Thickness. The minimum wall thickness at any point shall not be less than the approved minimum design wall thickness excluding the thickness of any polymeric membranes or any other non-structural surface coatings.
- Test results from the VOC analysis (Section 703.14 (b)).
- Test results from the BPA analysis (Section 703.14 (c)).

703.16 Acceptance

Site restoration is considered incidental to the installation of the CIPP liner. Ensure that the entire work-site is sufficiently restored to pre-construction conditions or better. Any excavated areas and other work areas prepared or maintained by Madison Water Utility will be restored by Madison Water Utility.

The CIPP liner shall be deemed acceptable when the installation is performed according to these Special Provisions and Contract documents, and when the applicable tests data submittals are satisfied according to Section 703.15 of these Special Provisions.

Any remaining work pertinent to backfilling excavations, pavement milling, placing asphalt, placing concrete, etc. shall be the responsibility of Madison Water Utility and/or the City of Madison.

BID ITEM 90160: PROVIDE & MAINTAIN TEMPORARY WATER SERVICE

1. Description.

Provide & Maintain Temporary Water Service consists of the cost of furnishing, installing, maintaining and removing all temporary bypass pipe; pipe fittings; valves, large service valves & fittings; service lines; hardware; water supply connection backflow preventers and reduced pressure zone devices; testing; temporary hydrants; flushing; sampling taps; disinfecting; scheduling and assisting with obtaining health samples; ramping, pavement cutting & excavation & burial at road crossings, sidewalks and driveways; preparation and distribution of service interruption notices; maintaining bypass system throughout duration of project; restoration; and furnishing all labor, material and equipment necessary to complete work.

2. Materials.

Materials under the bid item for Provide & Maintain Temporary Water Service shall be in accordance to Section 702 of these Special Provisions and applicable Standard Specifications.

3. Construction Methods.

Construction methods under the bid item for Provide & Maintain Temporary Water Service shall be in accordance to Section 703 of these Special Provisions and applicable Standard Specifications.

4. Method of Measurement.

Provide & Maintain Temporary Water Service is measured as one lump sum to include all temporary water service work performed in accordance with these Special Provisions.

5. Basis of Payment.

Provide & Maintain Temporary Water Service shall be paid for at the Contract lump sum unit price. Lump sum payment shall be full compensation for all temporary water service work as specified.

A partial payment of 50 percent of the unit price bid may be made for the bypass pipe system after assembly has been completed, disinfected, tested and safe water samples have been obtained. The remaining 50 percent of the unit price may be paid when the bypass system has been removed and associated site restorations have been completed.

BID ITEM 90161: STRUCTURAL REHABILITATION OF 6-IN WATER MAIN

1. Description.

Rehabilitate 6-IN Water Main Using Structural CIPP includes all labor, materials, plant, equipment, samples, tests and insurance required and necessary for the designing, fabricating, furnishing, delivering, mobilization, traffic control, cleaning, inspecting/surveying, installing, field and lab testing and reporting, reconnecting, disinfecting, site restoration, and recommissioning of the existing water main reconstructed by using an approved CIPP liner method and do all work incidental thereto, all in accordance with the Plans, Special Provisions, and applicable Standard Specifications, and as directed by the Engineer.

Included in the bid item Rehabilitate 6-IN Water Main Using Structural CIPP shall be the cost of all labor, material and equipment required to locate and set-up insertion and receiving pits (excavated by Madison Water Utility) with sheeting/bracing in accordance to OSHA and the Standard Specifications (See Section 703.2 – Excavation and Section 703.3 – Sheeting, Bracing and Shoring), carefully hand excavating if required, removal of existing pipe, cleaning up, disposal of any removed materials-, and cut/remove portions of the existing water main at insertion and extraction points.

In addition, included in the bid item Rehabilitate 6-IN Water Main Using Structural CIPP shall be the cost for mobilization, traffic and site control, signage, miscellaneous site facilities and equipment, all required submittals, notifications, photographs, CCTV inspection and video recording, field and lab testing as required in the Contract documents, and other incidentals required to complete the work. No separate or additional payment will be made for this work.

2. Materials.

Materials under the bid item for Rehabilitate 6-IN Water Main Using Structural CIPP shall be in accordance to Section 702 of these Special Provisions and applicable Standard Specifications.

3. Construction Methods.

Construction methods under the bid item for Rehabilitate 6-IN Water Main Using Structural CIPP shall be in accordance to Section 703 of these Special Provisions and applicable Standard Specifications.

4. Method of Measurement.

The quantity of Rehabilitate 6-IN Water Main Using Structural CIPP to be measured for payment shall be the number of linear feet of existing water main actually reconstructed by the approved CIPP lining method, complete, all in accordance with the Contract documents and to the satisfaction of the Engineer, measured along the centerline of the water main from insertion point to extraction point.

5. Basis of Payment.

Rehabilitate 6-IN Water Main Using Structural CIPP shall be paid for at the Contract unit price per linear foot. Payment per linear foot shall be full compensation for all work in furnishing and installing the liner as specified.

BID ITEM 90162: REINSTATE SERVICE OPENING

1. Description.

Reinstate Service Opening includes all labor, materials, equipment, tools, and incidentals required to re-open existing services (two-inch diameter, or smaller) from the interior of the CIPP lined water main.

2. Materials.

Materials under the bid item Reinstate Service Opening shall be in accordance to Section 702 of these Special Provisions and applicable Standard Specifications.

3. Construction Methods.

Construction methods under the bid item Reinstate Service Opening shall be in accordance to Section 702 of these Special Provisions and applicable Standard Specifications.

4. Method of Measurement.

The quantity of Reinstate Service Opening to be measured for payment shall be the number of service locations which are re-opened to the size and depth of the original opening and are satisfactorily circular, smooth and flush.

5. Basis of Payment.

Reinstate Service Opening shall be paid for at the Contract unit price per each re-opened service. Payment per each shall be full compensation for all work in furnishing and installing the liner as specified.

In the event a service cannot be successfully reinstated from within the pipeline, the service must be connected using manufacturer's recommended methods and as approved by the Engineer or a new service must be tapped into the newly rehabilitated water main, including all required excavation and surface restoration.

Any additional cost resulting from repairing and/or re-tapping a new service connection due to an unsuccessfully reinstated service opening shall be borne solely by the Contractor, and he shall not make any claim against Madison Water Utility for any additional required work associated with the service lateral reinstatement.

SECTION E: BIDDERS ACKNOWLEDGEMENT

CONTRACT TITLE STRUCTURAL REHABILITATION OF WATER MAIN-2014 EAST

CONTRACT NO. 7320

Bidder must state a Unit Price and Total Bid for each item. The Total Bid for each item must be the product of quantity, by Unit Price. The Grand Total must be the sum of the Total Bids for the various items. In case of multiplication errors or addition errors, the Grand Total with corrected multiplication and/or addition shall determine the Grand Total bid for each contract. The Unit Price and Total Bid must be entered numerically in the spaces provided. All words and numbers shall be written in ink.

- 1. The undersigned having familiarized himself/herself with the Contract documents, including Advertisement for Bids, Instructions to Bidders, Form of Proposal, City of Madison Standard Specifications for Public Works Construction - 2014 Edition thereto, Form of Agreement, Form of Bond, and Addenda issued and attached to the plans and specifications on file in the office of the City Engineer, hereby proposes to provide and furnish all the labor, materials, tools, and expendable equipment necessary to perform and complete in a workmanlike manner the specified construction on this project for the City of Madison; all in accordance with the plans and specifications as prepared by the City Engineer, including Addenda to the Contract Nos. 0 through 0 issued thereto, at the prices for said work as contained in this proposal. (Electronic bids submittals shall acknowledge addendum under Section E and shall not acknowledge here)
2. If awarded the Contract, we will initiate action within seven (7) days after notification or in accordance with the date specified in the contract to begin work and will proceed with diligence to bring the project to full completion within the number of work days allowed in the Contract or by the calendar date stated in the Contract.
3. The undersigned Bidder or Contractor certifies that he/she is not a party to any contract, combination in form of trust or otherwise, or conspiracy in restraint of trade or commerce or any other violation of the anti-trust laws of the State of Wisconsin or of the United States, with respect to this bid or contract or otherwise.
4. I hereby certify that I have met the Bid Bond Requirements as specified in Section 102.5. (IF BID BOND IS USED, IT SHALL BE SUBMITTED ON THE FORMS PROVIDED BY THE CITY. FAILURE TO DO SO MAY RESULT IN REJECTION OF THE BID).

Contract #7320 – Fer-Pal Construction USA, LLC

Section F: Disclosure of Ownership and Best Value Contracting

This section is a required document for the bid to be considered complete. There are two methods for completing the Disclosure of Ownership and BVC form. Method one: The form can be filled out online and submitted to this site to be included with your electronic bid. Method two: The form can be downloaded from the site and submitted by hand to the City of Madison.

Method of Submittal for Disclosure of Ownership and BVC (click in box below to choose) *

I will submit Bid Express fillable online form (Disclosure of Ownership and BVC).

Notice required under Section 15.04(1)(m), Wisconsin Statutes. The statutory authority for the use of this form is prescribed in Sections 66.0903(12)(d), Wisconsin Statutes. The use of this form is mandatory. The penalty for failing to complete this form is prescribed in Section 103.005(12). Personal information you provide may be used for secondary purposes.

(1) On the date a contractor submits a bid to or completes negotiations with a state agency or local governmental unit, on a project subject to Section 66.0903 or 103.49, Wisconsin Statutes, the contractor shall disclose to such state agency or local governmental unit the name of any "other construction business", which the contractor, or a shareholder, officer or partner of the contractor, owns or has owned within the preceding three (3) years.

(2) The term "other construction business" means any business engaged in the erection, construction, remodeling, repairing, demolition, altering or painting and decorating of buildings, structures or facilities. It also means any business engaged in supplying mineral aggregate, or hauling excavated material or spoil as provided by Sections 66.0903(3), 103.49(2) and 103.50(2), Wisconsin Statutes.

(3) This form must ONLY be filed, with the state agency or local governmental unit that will be awarding the contract, if both (A) and (B) are met.

(A) The contractor, or a shareholder, officer or partner of the contractor:

1. Owns at least a 25% interest in the "other construction business", indicated below, on the date the contractor submits a bid or completes negotiations.
2. Or has owned at least a 25% interest in the "other construction business" at any time within the preceding three (3) years.

(B) The Wisconsin Department of Workforce Development (DWD) has determined that the "other construction business" has failed to pay the prevailing wage rate or time and one-half the required hourly basic rate of pay, for hours worked in excess of the prevailing hours of labor, to any employee at any time within the preceding three (3) years.

Best Value Contracting

1. The Contractor shall indicate the non-apprenticeable trades used on this contract.

None

2. Madison General Ordinance (M.G.O.), 33.07(7), does provide for some exemptions from the active apprentice requirement. Apprenticeable trades are those trades considered apprenticeable by the State of Wisconsin. Please check applicable box if you are seeking an exemption.

- Contractor has a total skilled workforce of four or less individuals in all apprenticeable trades combined.
- No available trade training program; The Contractor has been rejected by the only available trade training program, or there is no trade training program within 90 miles.
- Contractor is not using an apprentice due to having a journey worker on layoff status, provided the journey worker was employed by the contractor in the past six months.
- First time contractor on City of Madison Public Works contract requests a onetime exemption but intends to comply on all future contracts and is taking steps typical of a "good faith" effort.
- Contractor has been in business less than one year.
- Contractor doesn't have enough journeyman trade workers to qualify for a trade training program in that respective trade.

3. The Contractor shall indicate on the following section which apprenticeable trades are to be used on this contract. Compliance with active apprenticeship, to the extent required by M.G.O. 33.07(7), shall be satisfied by documentation from an applicable trade training body; an apprenticeship contract with the Wisconsin Department of Workforce Development or a similar agency in another state; or the U.S Department of Labor. This documentation is required prior to the Contractor beginning work on the project site.

The Contractor has reviewed the list and shall not use any apprenticeable trades on this project.

SECTION G: BID BOND

KNOW ALL MEN BY THESE PRESENT, THAT Fer-Pal Construction USA LLC (a corporation of the State of Illinois) (individual), (partnership), hereinafter referred to as the "Principal") and * a corporation of the State of Michigan (hereinafter referred to as the "Surety") and licensed to do business in the State of Wisconsin, are held and firmly bound unto the City of Madison, (hereinafter referred to as the "Obligee"), in the sum of five per cent (5%) of the amount of the total bid or bids of the Principal herein accepted by the Obligee, for the payment of which the Principal and the Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

The conditions of this obligation are such that, whereas the Principal has submitted, to the City of Madison a certain bid, including the related alternate, and substitute bids attached hereto and hereby made a part hereof, to enter into a contract in writing for the construction of:

**STRUCTURAL REHABILITATION OF WATER MAINS - 2014 EAST
CONTRACT NO. 7320**

1. If said bid is rejected by the Obligee, then this obligation shall be void.
2. If said bid is accepted by the Obligee and the Principal shall execute and deliver a contract in the form specified by the Obligee (properly completed in accordance with said bid) and shall furnish a bond for his/her faithful performance of said contract, and for the payment of all persons performing labor or furnishing materials in connection therewith, and shall in all other respects perform the agreement created by the acceptance of said bid, then this obligation shall be void.

If said bid is accepted by the Obligee and the Principal shall fail to execute and deliver the contract and the performance and payment bond noted in 2. above executed by this Surety, or other Surety approved by the City of Madison, all within the time specified or any extension thereof, the Principal and Surety agree jointly and severally to forfeit to the Obligee as liquidated damages the sum mentioned above, it being understood that the liability of the Surety for any and all claims hereunder shall in no event exceed the sum of this obligation as stated, and it is further understood that the Principal and Surety reserve the right to recover from the Obligee that portion of the forfeited sum which exceed the actual liquidated damages incurred by the Obligee.

The Surety, for value received, hereby stipulates and agrees that the obligations of said Surety and its bond shall be in no way impaired or affected by an extension of the time within which the Obligee may accept such bid, and said Surety does hereby waive notice of any such extension.

* The Guarantee Company of North America USA

IN WITNESS WHEREOF, the Principal and the Surety have hereunto set their hands and seals, and such of them as are corporations have caused their corporate seals to be hereto affixed and these presents to be signed by their proper officers, on the day and year set forth below.

POWER OF ATTORNEY

KNOW ALL BY THESE PRESENTS: That THE GUARANTEE COMPANY OF NORTH AMERICA USA, a corporation organized and existing under the laws of the State of Michigan, having its principal office in Southfield, Michigan, does hereby constitute and appoint

Debra Watterson, Joseph A. Sprys, Edward G. Woods, Kathleen Runestad, Lora O'Brien, Sara Schrauben, Tracee Young, Jeffrey Jubera
The Guarantee Company of North America USA

its true and lawful attorney(s)-in-fact to execute, seal and deliver for and on its behalf as surety, any and all bonds and undertakings, contracts of indemnity and other writings obligatory in the nature thereof, which are or may be allowed, required or permitted by law, statute, rule, regulation, contract or otherwise.

The execution of such instrument(s) in pursuance of these presents, shall be as binding upon THE GUARANTEE COMPANY OF NORTH AMERICA USA as fully and amply, to all intents and purposes, as if the same had been duly executed and acknowledged by its regularly elected officers at the principal office.

The Power of Attorney is executed and may be certified so, and may be revoked, pursuant to and by authority of Article IX, Section 9.03 of the By-Laws adopted by the Board of Directors of THE GUARANTEE COMPANY OF NORTH AMERICA USA at a meeting held on the 31st day of December, 2003. The President, or any Vice President, acting with any Secretary or Assistant Secretary, shall have power and authority:

- 1. To appoint Attorney(s)-in-fact, and to authorize them to execute on behalf of the Company, and attach the Seal of the Company thereto, bonds and undertakings, contracts of indemnity and other writings obligatory in the nature thereof; and
2. To revoke, at any time, any such Attorney-in-fact and revoke the authority given, except as provided below
3. In connection with obligations in favor of the Florida Department of Transportation only, it is agreed that the power and authority hereby given to the Attorney-in-Fact includes any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts required by the State of Florida Department of Transportation. It is fully understood that consenting to the State of Florida Department of Transportation making payment of the final estimate to the Contractor and/or its assignee, shall not relieve this surety company of any of its obligations under its bond.
4. In connection with obligations in favor of the Kentucky Department of Highways only, it is agreed that the power and authority hereby given to the Attorney-in-Fact cannot be modified or revoked unless prior written personal notice of such intent has been given to the Commissioner - Department of Highways of the Commonwealth of Kentucky at least thirty (30) days prior to the modification or revocation.

Further, this Power of Attorney is signed and sealed by facsimile pursuant to resolution of the Board of Directors of the Company adopted at a meeting duly called and held on the 8th day of December 2011, of which the following is a true excerpt:

RESOLVED that the signature of any authorized officer and the seal of the Company may be affixed by facsimile to any Power of Attorney or certification thereof authorizing the execution and delivery of any bond, undertaking, contracts of indemnity and other writings obligatory in the nature thereof, and such signature and seal when so used shall have the same force and effect as though manually affixed.

IN WITNESS WHEREOF, THE GUARANTEE COMPANY OF NORTH AMERICA USA has caused this instrument to be signed and its corporate seal to be affixed by its authorized officer, this 23rd day of February, 2012.

SECTION H: AGREEMENT

THIS AGREEMENT made this 6TH day of AUGUST in the year Two Thousand and Fourteen between FER-PAL CONSTRUCTION USA, LLC hereinafter called the Contractor, and the City of Madison, Wisconsin, hereinafter called the City.

WHEREAS, the Common Council of the said City of Madison under the provisions of a resolution adopted AUGUST 5, 2014, and by virtue of authority vested in the said Council, has awarded to the Contractor the work of performing certain construction.

NOW, THEREFORE, the Contractor and the City, for the consideration hereinafter named, agree as follows:

1. **Scope of Work.** The Contractor shall, perform the construction, execution and completion of the following listed complete work or improvement in full compliance with the Plans, Specifications, Standard Specifications, Supplemental Specifications, Special Provisions and contract; perform all items of work covered or stipulated in the proposal; perform all altered or extra work; and shall furnish, unless otherwise provided in the contract, all materials, implements, machinery, equipment, tools, supplies, transportation, and labor necessary to the prosecution and completion of the work or improvements:

STRUCTURAL REHABILITATION OF WATER MAINS – 2014 EAST
CONTRACT NO. 7320

2. **Completion Date/Contract Time.** Construction work must begin within seven (7) calendar days after the date appearing on mailed written notice to do so shall have been sent to the Contractor and shall be carried on at a rate so as to secure full completion SEE SPECIAL PROVISIONS, the rate of progress and the time of completion being essential conditions of this Agreement.
3. **Contract Price.** The City shall pay to the Contractor at the times, in the manner and on the conditions set forth in said specifications, the sum of FOUR HUNDRED SIXTY-THREE THOUSAND FIVE HUNDRED FIFTY (\$463,550.00) Dollars being the amount bid by such Contractor and which was awarded to him/her as provided by law.
4. **Wage Rates for Employees of Public Works Contractors**

General and Authorization. The Contractor shall compensate its employees at the prevailing wage rate in accordance with section 66.0903, Wis. Stats., DWD 290 of the Wisconsin Administrative Code and as hereinafter provided unless otherwise noted in Section D: Special Provisions, Subsection 102.10 – Minimum Rate of Wage Scale.

"Public Works" shall include building or work involving the erection, construction, remodeling, repairing or demolition of buildings, parking lots, highways, streets, bridges, sidewalks, street lighting, traffic signals, sanitary sewers, water mains and appurtenances, storm sewers, and the grading and landscaping of public lands.

"Building or work" includes construction activity as distinguished from manufacturing, furnishing of materials, or servicing and maintenance work, except for the delivery of mineral aggregate such as sand, gravel, bituminous asphaltic concrete or stone which is incorporated into the work under contract with the City by depositing the material directly in final place from transporting vehicle.

"Erection, construction, remodeling, repairing" means all types of work done on a particular building or work at the site thereof in the construction or development of the project, including without limitation, erecting, construction, remodeling, repairing, altering, painting, and decorating, the transporting of materials and supplies to or from the building or work done by the employees of the Contractor, Subcontractor, or Agent thereof, and the manufacturing or furnishing of

materials, articles, supplies or equipment on the site of the building or work, by persons employed by the Contractor, Subcontractor, or Agent thereof.

"Employees working on the project" means laborers, workers, and mechanics employed directly upon the site of work.

"Laborers, Workers, and Mechanics" include pre-apprentices, helpers, trainees, learners and properly registered and indentured apprentices but exclude clerical, supervisory, and other personnel not performing manual labor.

Establishment of Wage Rates. The Department of Public Works shall periodically obtain a current schedule of prevailing wage rates from DWD. The schedule shall be used to establish the City of Madison Prevailing Wage Rate Schedule for Public Works Construction (prevailing wage rate). The Department of Public Works may include known increases to the prevailing wage rate which can be documented and are to occur on a future specific date. The prevailing wage rate shall be included in public works contracts subsequently negotiated or solicited by the City. Except for known increases contained within the schedule, the prevailing wage rate shall not change during the contract. The approved wage rate is attached hereto.

Workforce Profile. The Contractor shall, at the time of signature of the contract, notify the City Engineer in writing of the names and classifications of all the employees of the Contractor, Subcontractors, and Agents proposed for the work. In the alternative, the Contractor shall submit in writing the classifications of all the employees of the Contractor, Subcontractors and Agents and the total number of hours estimated in each classification for the work. This workforce profile(s) shall be reviewed by the City Engineer who may, within ten (10) days, object to the workforce profile(s) as not being reflective of that which would be required for the work. The Contractor may request that the workforce profile, or a portion of the workforce profile, be submitted after the signature of the contract but at least ten (10) days prior to the work commencing. Any costs or time loss resulting from modifications to the workforce profile as a result of the City Engineer's objections shall be the responsibility of the Contractor.

Payrolls and Records. The Contractor shall keep weekly payroll records setting forth the name, address, telephone number, classification, wage rate and fringe benefit package of all the employees who work on the contract, including the employees of the Contractor's subcontractors and agents. Such weekly payroll records must include the required information for all City contracts and all other contracts on which the employee worked during the week in which the employee worked on the contract. The Contractor shall also keep records of the individual time each employee worked on the project and for each day of the project. Such records shall also set forth the total number of hours of overtime credited to each such employee for each day and week and the amount of overtime pay received in that week. The records shall set forth the full weekly wages earned by each employee and the actual hourly wage paid to the employee.

The Contractor shall submit the weekly payroll records, including the records of the Contractor's subcontractors and agents, to the City Engineer for every week that work is being done on the contract. The submittal shall be within twenty-one (21) calendar days of the end of the Contractor's weekly pay period.

Employees shall receive the full amounts accrued at the time of the payment, computed at rates not less than those stated in the prevailing wage rate and each employee's rate shall be determined by the work that is done within the trade or occupation classification which should be properly assigned to the employee.

An employee's classification shall not be changed to a classification of a lesser rate during the contract. If, during the term of the contract, an employee works in a higher pay classification than the one which was previously properly assigned to the employee, then that employee shall be considered to be in the higher pay classification for the balance of the contract, receive the appropriate higher rate of pay, and she/he shall not receive a lesser rate during the balance of the

contract. For purposes of clarification, it is noted that there is a distinct difference between working in a different classification with higher pay and doing work within a classification that has varying rates of pay which are determined by the type of work that is done within the classification. For example, the classification "Operating Engineer" provides for different rates of pay for various classes of work and the Employer shall compensate an employee classified as an "Operating Engineer" based on the highest class of work that is done in one day. Therefore, an "Operating Engineer's" rate may vary on a day to day basis depending on the type of work that is done, but it will never be less than the base rate of an "Operating Engineer". Also, as a matter of clarification, it is recognized that an employee may work in a higher paying classification merely by chance and without prior intention, calculation or design. If such is the case and the performance of the work is truly incidental and the occurrence is infrequent, inconsequential and does not serve to undermine the single classification principle herein, then it may not be required that the employee be considered to be in the higher pay classification and receive the higher rate of pay for the duration of the contract. However, the Contractor is not precluded or prevented from paying the higher rate for the limited time that an employee performs work that is outside of the employee's proper classification.

Questions regarding an employee's classification, rate of pay or rate of pay within a classification, shall be resolved by reference to the established practice that predominates in the industry and on which the trade or occupation rate/classification is based. Rate of pay and classification disputes shall be resolved by relying upon practices established by collective bargaining agreements and guidelines used in such determination by appropriate recognized trade unions operating within the City of Madison.

The Contractor, its Subcontractors and Agents shall submit to interrogation regarding compliance with the provisions of this ordinance.

Mulcting of the employees by the Contractor, Subcontractor, and Agents on Public Works contracts, such as by kickbacks or other devices, is prohibited. The normal rate of wage of the employees of the Contractor, Subcontractor, and Agents shall not be reduced or otherwise diminished as a result of payment of the prevailing wage rate on a public works contract.

Hourly contributions. Hourly contributions shall be determined in accordance with the prevailing wage rate and with DWD. 290.01(10), Wis. Admin. Code.

Apprentices and Subjourney persons. Apprentices and sub journeypersons performing work on the project shall be compensated in accordance with the prevailing wage rate and with DWD 290.02, and 290.025, respectively, Wis. Admin. Code.

Straight Time Wages. The Contractor may pay straight time wages as determined by the prevailing wage rate and DWD 290.04, Wis. Admin. Code.

Overtime Wages. The Contractor shall pay overtime wages as required by the prevailing wage rate and DWD 290.05, Wis. Admin. Code.

Posting of Wage Rates and Hours. A clearly legible copy of the prevailing wage rate, together with the provisions of Sec. 66.0903(10)(a) and (11)(a), Wis. Stats., shall be kept posted in at least one conspicuous and easily accessible place at the project site by the Contractor and such notice shall remain posted during the full time any laborers, workers or mechanics are employed on the contract.

Evidence of Compliance by Contractor. Upon completion of the contract, the Contractor shall file with the Department of Public Works an affidavit stating:

- a. That the Contractor has complied fully with the provisions and requirements of Sec. 66.0903(3), Wis. Stats., and Chapter DWD 290, Wis. Admin. Code; the Contractor has received evidence of compliance from each of the agents and subcontractors; and the

names and addresses of all of the subcontractors and agents who worked on the contract.

- b. That full and accurate records have been kept, which clearly indicate the name and trade or occupation of every laborer, worker or mechanic employed by the Contractor in connection with work on the project. The records shall show the number of hours worked by each employee and the actual wages paid therefore; where these records will be kept and the name, address and telephone number of the person who will be responsible for keeping them. The records shall be retained and made available for a period of at least three (3) years following the completion of the project of public works and shall not be removed without prior notification to the municipality.

Evidence of Compliance by Agent and Subcontractor. Each agent and subcontractor shall file with the Contractor, upon completion of their portion of the work on the contract an affidavit stating that all the provisions of Sec. 66.0903(3), Wis. Stats., have been fully complied with and that full and accurate records have been kept, which clearly indicate the name and trade or occupation of every laborer, worker or mechanic employed by the Contractor in connection with work on the project. The records shall show the number of hours worked by each employee and the actual wages paid therefore; where these records shall be kept and the name, address and telephone number of the person who shall be responsible for keeping them. The records shall be retained and made available for a period of at least three (3) years following the completion of the project of public works and shall not be removed without prior notification to the municipality.

Failure to Comply with the Prevailing Wage Rate. If the Contractor fails to comply with the prevailing wage rate, she/he shall be in default on the contract.

5. **Affirmative Action.** In the performance of the services under this Agreement the Contractor agrees not to discriminate against any employee or applicant because of race, religion, marital status, age, color, sex, disability, national origin or ancestry, income level or source of income, arrest record or conviction record, less than honorable discharge, physical appearance, sexual orientation, gender identity, political beliefs, or student status. The Contractor further agrees not to discriminate against any subcontractor or person who offers to subcontract on this contract because of race, religion, color, age, disability, sex, sexual orientation, gender identity or national origin.

The Contractor agrees that within thirty (30) days after the effective date of this agreement, the Contractor will provide to the City Affirmative Action Division certain workforce utilization statistics, using a form to be furnished by the City.

If the contract is still in effect, or if the City enters into a new agreement with the Contractor, within one year after the date on which the form was required to be provided, the Contractor will provide updated workforce information using a second form, also to be furnished by the City. The second form will be submitted to the City Affirmative Action Division no later than one year after the date on which the first form was required to be provided.

The Contractor further agrees that, for at least twelve (12) months after the effective date of this contract, it will notify the City Affirmative Action Division of each of its job openings at facilities in Dane County for which applicants not already employees of the Contractor are to be considered. The notice will include a job description, classification, qualifications and application procedures and deadlines. The Contractor agrees to interview and consider candidates referred by the Affirmative Action Division if the candidate meets the minimum qualification standards established by the Contractor, and if the referral is timely. A referral is timely if it is received by the Contractor on or before the date started in the notice.

Articles of Agreement
Article I

The Contractor shall take affirmative action in accordance with the provisions of this contract to insure that applicants are employed, and that employees are treated during employment without regard to race, religion, color, age, marital status, disability, sex, sexual orientation, gender identity or national origin and that the employer shall provide harassment free work environment for the realization of the potential of each employee. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation and selection for training including apprenticeship insofar as it is within the control of the Contractor. The Contractor agrees to post in conspicuous places available to employees and applicants notices to be provided by the City setting out the provisions of the nondiscrimination clauses in this contract.

Article II

The Contractor shall in all solicitations or advertisements for employees placed by or on behalf of the Contractors state that all qualified or qualifiable applicants will be employed without regard to race, religion, color, age, marital status, disability, sex, sexual orientation, gender identity or national origin.

Article III

The Contractor shall send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding a notice to be provided by the City advising the labor union or worker's representative of the Contractor's equal employment opportunity and affirmative action commitments. Such notices shall be posted in conspicuous places available to employees and applicants for employment.

Article V

The Contractor agrees that it will comply with all provisions of the Affirmative Action Ordinance of the City of Madison, including the contract compliance requirements. The Contractor agrees to submit the model affirmative action plan for public works contractors in a form approved by the Affirmative Action Division Manager.

Article VI

The Contractor will maintain records as required by Section 39.02(9)(f) of the Madison General Ordinances and will provide the City Affirmative Action Division with access to such records and to persons who have relevant and necessary information, as provided in Section 39.02(9)(f). The City agrees to keep all such records confidential, except to the extent that public inspection is required by law.

Article VII

In the event of the Contractor's or subcontractor's failure to comply with the Equal Employment Opportunity and Affirmative Action Provisions of this contract or Section 39.03 and 39.02 of the Madison General Ordinances, it is agreed that the City at its option may do any or all of the following:

1. Cancel, terminate or suspend this Contract in whole or in part.
2. Declare the Contractor ineligible for further City contracts until the Affirmative Action requirements are met.

3. Recover on behalf of the City from the prime Contractor 0.5 percent of the contract award price for each week that such party fails or refuses to comply, in the nature of liquidated damages, but not to exceed a total of five percent (5%) of the contract price, or five thousand dollars (\$5,000), whichever is less. Under public works contracts, if a subcontractor is in noncompliance, the City may recover liquidated damages from the prime Contractor in the manner described above. The preceding sentence shall not be construed to prohibit a prime Contractor from recovering the amount of such damage from the non-complying subcontractor.

Article VIII

The Contractor shall include the above provisions of this contract in every subcontract so that such provisions will be binding upon each subcontractor. The Contractor shall take such action with respect to any subcontractor as necessary to enforce such provisions, including sanctions provided for noncompliance.

Article IX

The Contractor shall allow the maximum feasible opportunity to small business enterprises to compete for any subcontracts entered into pursuant to this contract. (In federally funded contracts the terms "DBE, MBE and WBE" shall be substituted for the term "small business" in this Article.)

STRUCTURAL REHABILITATION OF WATER MAINS – 2014 EAST
CONTRACT NO. 7320

IN WITNESS WHEREOF, the Contractor has hereunto set his/her hand and seal and the City has caused these presents to be sealed with its corporate seal and to be subscribed by its Mayor and City Clerk the day and year first above written.

Bond No. TS5164241

SECTION 1: PAYMENT AND PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS, that we FER-PAL CONSTRUCTION USA, LLC as principal, and The Guarantee Company of North America USA Company of Michigan as surety, are held and firmly bound unto the City of Madison, Wisconsin, in the sum of FOUR HUNDRED SIXTY-THREE THOUSAND FIVE HUNDRED FIFTY (\$463,550.00) Dollars, lawful money of the United States, for the payment of which sum to the City of Madison, we hereby bind ourselves and our respective executors and administrators firmly by these presents.

The condition of this Bond is such that if the above bounden shall on his/her part fully and faithfully perform all of the terms of the Contract entered into between him/herself and the City of Madison for the construction of:

STRUCTURAL REHABILITATION OF WATER MAINS – 2014 EAST
CONTRACT NO. 7320

in Madison, Wisconsin, and shall pay all claims for labor performed and material furnished in the prosecution of said work, and save the City harmless from all claims for damages because of negligence in the prosecution of said work, and shall save harmless the said City from all claims for compensation (under Chapter 102, Wisconsin Statutes) of employees and employees of subcontractor, then this Bond is to be void, otherwise of full force, virtue and effect.

By Joseph A. Sprys
Attorney-in-Fact Joseph A. Sprys

This certifies that I have been duly licensed as an agent for the above company in Wisconsin under License No. 2487965 for the year 2014 and appointed as attorney-in-fact with authority to execute this payment and performance bond which power of attorney has not been revoked.

August 6, 2014
Date

Joseph A. Sprys
Agent Signature Joseph A. Sprys

The Guarantee Company of North America USA
Southfield, Michigan

POWER OF ATTORNEY

KNOW ALL BY THESE PRESENTS: That THE GUARANTEE COMPANY OF NORTH AMERICA USA, a corporation organized and existing under the laws of the State of Michigan, having its principal office in Southfield, Michigan, does hereby constitute and appoint

Debra Watterson, Joseph A. Sprys, Edward G. Woods, Kathleen Runestad, Lora O'Brien, Sara Schrauben, Tracee Young, Jeffrey Jubera
The Guarantee Company of North America USA

its true and lawful attorney(s)-in-fact to execute, seal and deliver for and on its behalf as surety, any and all bonds and undertakings, contracts of indemnity and other writings obligatory in the nature thereof, which are or may be allowed, required or permitted by law, statute, rule, regulation, contract or otherwise.

The execution of such instrument(s) in pursuance of these presents, shall be as binding upon THE GUARANTEE COMPANY OF NORTH AMERICA USA as fully and amply, to all intents and purposes, as if the same had been duly executed and acknowledged by its regularly elected officers at the principal office.

The Power of Attorney is executed and may be certified so, and may be revoked, pursuant to and by authority of Article IX, Section 9.03 of the By-Laws adopted by the Board of Directors of THE GUARANTEE COMPANY OF NORTH AMERICA USA at a meeting held on the 31st day of December, 2003. The President, or any Vice President, acting with any Secretary or Assistant Secretary, shall have power and authority:

- 1. To appoint Attorney(s)-in-fact, and to authorize them to execute on behalf of the Company, and attach the Seal of the Company thereto, bonds and undertakings, contracts of indemnity and other writings obligatory in the nature thereof; and
2. To revoke, at any time, any such Attorney-in-fact and revoke the authority given, except as provided below
3. In connection with obligations in favor of the Florida Department of Transportation only, it is agreed that the power and authority hereby given to the Attorney-in-Fact includes any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts required by the State of Florida Department of Transportation. It is fully understood that consenting to the State of Florida Department of Transportation making payment of the final estimate to the Contractor and/or its assignee, shall not relieve this surety company of any of its obligations under its bond.
4. In connection with obligations in favor of the Kentucky Department of Highways only, it is agreed that the power and authority hereby given to the Attorney-in-Fact cannot be modified or revoked unless prior written personal notice of such intent has been given to the Commissioner - Department of Highways of the Commonwealth of Kentucky at least thirty (30) days prior to the modification or revocation.

Further, this Power of Attorney is signed and sealed by facsimile pursuant to resolution of the Board of Directors of the Company adopted at a meeting duly called and held on the 6th day of December 2011, of which the following is a true excerpt:

RESOLVED that the signature of any authorized officer and the seal of the Company may be affixed by facsimile to any Power of Attorney or certification thereof authorizing the execution and delivery of any bond, undertaking, contracts of indemnity and other writings obligatory in the nature thereof, and such signature and seal when so used shall have the same force and effect as though manually affixed.

IN WITNESS WHEREOF, THE GUARANTEE COMPANY OF NORTH AMERICA USA has caused this instrument to be signed and its corporate seal to be affixed by its authorized officer, this 23rd day of February, 2012.

SECTION J: PREVAILING WAGE RATES

PREVAILING WAGE RATE DETERMINATION

Issued by the State of Wisconsin
Department of Workforce Development
Pursuant to s. 66.0903, Wis. Stats.
Issued On: 01/06/2014
Amended On: 02/28/2014

DETERMINATION NUMBER: 201400001

EXPIRATION DATE: Prime Contracts MUST Be Awarded or Negotiated On Or Before 12/31/2014. If NOT, You MUST Reapply.

PROJECT NAME: ALL PUBLIC WORKS PROJECTS UNDER SEC 66.0903, STATS - CITY OF MADISON

PROJECT LOCATION: MADISON CITY, DANE COUNTY, WI

CONTRACTING AGENCY: CITY OF MADISON-ENGINEERING

CLASSIFICATION:	Contractors are responsible for correctly classifying their workers. Either call the Department of Workforce Development (DWD) with trade or classification questions or consult DWD's Dictionary of Occupational Classifications & Work Descriptions on the DWD website at: dwd.wisconsin.gov/er/prevailing_wage_rate/Dictionary/dictionary_main.htm .
OVERTIME:	Time and one-half must be paid for all hours worked: <ul style="list-style-type: none">- over 10 hours per day on prevailing wage projects- over 40 hours per calendar week- Saturday and Sunday- on all of the following holidays: January 1; the last Monday in May; July 4; the 1st Monday in September; the 4th Thursday in November; December 25;- The day before if January 1, July 4 or December 25 falls on a Saturday;- The day following if January 1, July 4 or December 25 falls on a Sunday. Apply the time and one-half overtime calculation to whichever is higher between the Hourly Basic Rate listed on this project determination or the employee's regular hourly rate of pay. Add any applicable Premium or DOT Premium to the Hourly Basic Rate before calculating overtime. A DOT Premium (discussed below) may supersede this time and one-half requirement.
FUTURE INCREASE:	When a specific trade or occupation requires a future increase, you MUST add the full hourly increase to the "TOTAL" on the effective date(s) indicated for the specific trade or occupation.
PREMIUM PAY:	If indicated for a specific trade or occupation, the full amount of such pay MUST be added to the "HOURLY BASIC RATE OF PAY" indicated for such trade or occupation, whenever such pay is applicable.
DOT PREMIUM:	This premium only applies to highway and bridge projects owned by the Wisconsin Department of Transportation and to the project type heading "Airport Pavement or State Highway Construction." DO NOT apply the premium calculation under any other project type on this determination.
APPRENTICES:	Pay apprentices a percentage of the applicable journey person's hourly basic rate of pay and hourly fringe benefit contributions specified in this determination. Obtain the appropriate percentage from each apprentice's contract or indenture.
SUBJOURNEY:	Subjourney wage rates may be available for some of the trades or occupations indicated below with the exception of laborers, truck drivers and heavy equipment operators. Any employer interested in using a subjourney classification on this project MUST complete Form ERD-10880 and request the applicable wage rate from the Department of Workforce Development PRIOR to using the subjourney worker on this project.

This document **MUST BE POSTED** by the **CONTRACTING AGENCY** in at least one conspicuous and easily accessible place on **the site of the project**. A local governmental unit may post this document at the place normally used to post public notices if there is no common site on the project. This document **MUST** remain posted during the entire time any worker is employed on the project and **MUST** be physically incorporated into the specifications and all contracts and subcontracts. If you have any questions, please write to the Equal Rights Division, Labor Standards Bureau, P.O. Box 8928, Madison, Wisconsin 53708 or call (608) 266-6861.

The following statutory provisions apply to local governmental unit projects of public works and are set forth below pursuant to the requirements of s. 66.0903(8), Stats.

s. 66.0903 (1) (f) & s. 103.49 (1) (c) "PREVAILING HOURS OF LABOR" for any trade or occupation in any area means 10 hours per day and 40 hours per week and may not include any hours worked on a Saturday or Sunday or on any of the following holidays:

1. January 1.
2. The last Monday in May.
3. July 4.
4. The first Monday in September.
5. The 4th Thursday in November.
6. December 25.
7. The day before if January 1, July 4 or December 25 falls on a Saturday.
8. The day following if January 1, July 4 or December 25 falls on a Sunday.

s. 66.0903 (10) RECORDS; INSPECTION; ENFORCEMENT.

(a) Each contractor, subcontractor, or contractor's or subcontractor's agent performing work on a project of public works that is subject to this section shall keep full and accurate records clearly indicating the name and trade or occupation of every person performing the work described in sub. (4) and an accurate record of the number of hours worked by each of those persons and the actual wages paid for the hours worked.

s. 66.0903 (11) LIABILITY AND PENALTIES.

- (a) 1. Any contractor, subcontractor, or contractor's or subcontractor's agent who fails to pay the prevailing wage rate determined by the department under sub. (3) or who pays less than 1.5 times the hourly basic rate of pay for all hours worked in excess of the prevailing hours of labor is liable to any affected employee in the amount of his or her unpaid wages or his or her unpaid overtime compensation and in an additional amount as liquidated damages as provided under subd. 2., 3., whichever is applicable.
2. If the department determines upon inspection under sub. (10) (b) or (c) that a contractor, subcontractor, or contractor's or subcontractor's agent has failed to pay the prevailing wage rate determined by the department under sub. (3) or has paid less than 1.5 times the hourly basic rate of pay for all hours worked in excess of the prevailing hours of labor, the department shall order the contractor to pay to any affected employee the amount of his or her unpaid wages or his or her unpaid overtime compensation and an additional amount equal to 100 percent of the amount of those unpaid wages or that unpaid overtime compensation as liquidated damages within a period specified by the department in the order.
3. In addition to or in lieu of recovering the liability specified in subd. 1. as provided in subd. 2., any employee for and in behalf of that employee and other employees similarly situated may commence an action to recover that liability in any court of competent jurisdiction. If the court finds that a contractor, subcontractor, or contractor's or subcontractor's agent has failed to pay the prevailing wage rate determined by the department under sub. (3) or has paid less than 1.5 times the hourly basic rate of pay for all hours worked in excess of the prevailing hours of labor, the court shall order the contractor, subcontractor, or agent to pay to any affected employee the amount of his or her unpaid wages or his or her unpaid overtime compensation and an additional amount equal to 100 percent of the amount of those unpaid wages or that unpaid overtime compensation as liquidated damages.
5. No employee may be a party plaintiff to an action under subd. 3. unless the employee consents in writing to become a party and the consent is filed in the court in which the action is brought. Notwithstanding s. 814.04 (1), the court shall, in addition to any judgment awarded to the plaintiff, allow reasonable attorney fees and costs to be paid by the defendant.

BUILDING OR HEAVY CONSTRUCTION

Includes sheltered enclosures with walk-in access for the purpose of housing persons, employees, machinery, equipment or supplies and non-sheltered work such as canals, dams, dikes, reservoirs, storage tanks, etc. A sheltered enclosure need not be "habitable" in order to be considered a building. The installation of machinery and/or equipment, both above and below grade level, does not change a project's character as a building. On-site grading, utility work and landscaping are included within this definition. Residential buildings of four (4) stories or less, agricultural buildings, parking lots and driveways are NOT included within this definition.

RESIDENTIAL OR AGRICULTURAL CONSTRUCTION

Includes single family houses or apartment buildings of no more than four (4) stories in height and all buildings, structures or facilities that are primarily used for agricultural or farming purposes, excluding commercial buildings. For classification purposes, the exterior height of a residential building, in terms of stories, is the primary consideration. All incidental items such as site work, driveways, parking lots, private sidewalks, private septic systems or sewer and water laterals connected to a public system and swimming pools are included within this definition. Residential buildings of five (5) stories and above are NOT included within this definition.
