Capital Budget

Fire

Protective Gear

Project No. 1 Fund No.

GO \$ 125,000
Other 0
\$ 125,000

Firefighter protective gear should be replaced every ten years. This is the third year of a four-year plan to purchase one set for every firefighter. The worn-out second set will be taken out of service, and the current primary set will become the backup set. The Department has ongoing annual costs for replacement of damaged gear and for new employees.

New Stations

Project No. 2 Fund No.

GO \$ 450,000
Other 0
\$ 450,000

The 2001 Capital Budget established a Fire Facility Design and Service Delivery team. The Common Council accepted the team's report, which recommended construction of three new fire stations. The 2001 Capital Budget authorized purchase of land for two new stations; funds were borrowed for only one of the land purchases. Reauthorization of the other land purchase is included in 2002, as well as the purchase of land for the third station. Construction of one station is anticipated in 2003, while construction of the other two stations is anticipated after 2007. No fire apparatus or additional personnel are needed for the station to be constructed in 2003. A ladder apparatus and 18 employee positions are needed to staff each of the other two stations.

Fire Equipment

Project No. 3 Fund No.

GO \$ 80,000
Other 0
\$ 80,000

This project includes: 1) Continual upgrading program for outdated or damaged breathing apparatus along with necessary equipment to test for certification requirements. 2) Replacement of equipment carried on trucks for emergency response use such as extrication tools, air bags, ventilation equipment, and scuba equipment. Current equipment needs replacement due to age and advancement in technology. An example of the age of equipment is the air bags which are approximately 20 years. 3) Ongoing replacement program for fire hose, accessories and testing equipment.

Communications Equipment

Project No. 4 Fund No.

GO \$ 45,800
Other 0
\$ 45,800

This project includes replacement of portable radios, additional portable radios for increased personnel on duty per day, and accessories for the portable radios; collar microphones for fire suits; and headset units for mobile radios in fire vehicles.

General Building Improvements

Project No. **5** Fund No.

GO \$ 313,100
Other 0
\$ 313,100

Older buildings must be upgraded to address deterioration and today's needs. In addition, the diverse work force has created needs for accommodations in the fire stations. Funding provided will allow the Department to prioritize these improvements each year after consultation with City Inspection personnel who have expertise and responsibility for maintaining Fire buildings. Funding is needed for improvements such as dormitory partitioning; window replacement due to age and inability to repair; bathroom, kitchen, locker room, study area and office remodeling; tile and/or carpet replacement, exterior building, plumbing, heating and cooling system improvements; pavement and roof replacement; and other necessary building improvement projects.

NFPA 1500 Equipment

Project No. **6** Fund No.

GO \$ 0
Other 0
\$ 0

The National Fire Protection Association (NFPA) has standards for equipment in fire stations to address the conditioning of employees to maximize job performance standards. The Fire Department has recently been evaluated for an incident by the National Institute for Occupational Safety and Health. The report indicated that the Department should implement annual medical evaluations for all fire personnel according to NFPA Standard 1582, Medical Requirements for Firefighters and Information for Fire Department Physicians. The fitness equipment could be included in the 2003 Capital Budget if a complete employee conditioning/medical program is developed.

Traffic Signal Pre-emption System

Project No. **7** Fund No.

GO \$ 7,500
Other 67,500
\$ 75,000

The City has applied for a State grant which would fund 90 percent of a traffic signal pre-emption system for use by public safety units in responding to emergency incidents. The City has not yet been notified of an award of the grant. General Obligation funding represents the 10 percent match requirement.

Video Teleconferencing

Project No. **8** Fund No.

GO \$ 86,375
Other 201,542
\$ 287,917

This video teleconferencing system for the fire stations will allow the Fire Department to present training programs to personnel in fire stations. As a result, the fire companies would not have to leave the stations and would be available for emergency response. Other funding is a FEMA grant that has been awarded.
