**Subject:** Fwd: eco density

I am forwarding you a VERY interesting website that John Linck sent me. It is from Vancouver and explains some of their new policies for encouraging and prioritizing infill and sustainable city living (they have already institutionalized ADU's or secondary suites as they can them and are moving beyond!)

We might at least encourage ADU's on alleys....you can see their guidelines under "laneway dwellings" . The guidelines are very similar to what we were advocating for ADU's on any residential lot.

Obviously, we should be thinking creatively and bravely like this!

Rick, please forward to all who are working on this topic.

Thank you, Joan
