Subject: GRANDVIEW COMMONS GROCERY STORE PROPOSAL

Commission Members:

There is no question that a major chain super market store with adequate parking facilities would be a welcome addition to the Grandview area. There is a need. There is also a very glaring need for addressing the traffic that such an addition to the area will bring. I do not think it a good idea to continue the project without making positive that this issue be made a major concern and solutions be found to live with it in place. Before, not after, the fact.

I understand that a traffic light will be installed, that, eventually there will be more lanes to the bridge, and that the road will be widened.

All of those points would go to solving some of the problems that traffic will bring. Why not get them done first?
