

**ATTACHMENT TO THE MINUTES
OF THE
JANUARY 9, 2006 MADISON PLAN COMMISSION MEETING**

At their January 9, 2006 meeting, the Plan Commission recommended adoption of the October 2005 Public Hearing Draft of the City of Madison Comprehensive Plan with additional revisions in response to comments offered at the December 13, 2005 Common Council public hearing. The revisions below are recommended in addition to the revisions to the Comprehensive Plan that were recommended in the December 5, 2005 Plan Commission minutes.

At their January 11, 2006 meeting, the Park Commission also recommended adoption of the October 2005 Public Hearing Draft of the City of Madison Comprehensive Plan with the following revisions.

RECOMMENDED REVISIONS TO VOLUME I – BACKGROUND INFORMATION

CHAPTER 7 – PARKS AND OPEN SPACE

In Volume I, Chapter 7, Page 7-3, Paragraph 2, revise the text as shown below:

Park and open space standards are used to establish a measure against which the existing and future needs of Madison's park, open space and outdoor recreation system may be assessed. Madison is proud of its century-long tradition of high standards for parks and open space. With financial constraints and pressing urban issues to be addressed, the success of our parks and open space program will more and more depend on successful partnerships with such entities as the Madison Parks Foundation, the Urban Open Space Foundation and its Central Park initiative, the Olbrich Botanical Society and other groups like the Friends of Hoyt Park.

[Start new paragraph] ~~They~~Our standards can only be used to measure specific aspects of recreation within the system. They cannot be used to measure the total recreation needs, or the psychological needs of the population to view and use natural surroundings. Table 1 on the next page provides a summary of Madison's park and open space standards.

In Volume I, Chapter 7, Page 7-11, add text to the end of Paragraph 3, as shown below:

...Ed Keif Park is an example of a long-term project to relieve a park deficiency. The Urban Open Space Foundation's Central Park initiative is an example of a public-private partnership that may provide new park resources and facilities in our central city.

In Volume I, Chapter 7, revise Map 7-1, Existing & Proposed Park and Open Space, as follows:

Add an asterisk (the symbol for a proposed future park) on the proposed Central Park site within the East Rail Corridor.

RECOMMENDED REVISIONS TO VOLUME II - RECOMMENDATIONS

CHAPTER 2 – LAND USE

In Volume II, Chapter 2, revise Maps 2-1 and 2-2a, Generalized Future Land Use Plan, as follows:

Add a new Map Note at the location of the proposed Central Park to read, "This is the location for the future central park recommended in the adopted East Rail Corridor Plan."
