August 20, 2008

Greetings:

Our current garage is dilapidated. We would like to have a bit more space and are requesting 150 square feet over code. We met early in mid-July with all of the neighbors on our block of Whittier Street where the garage faces (we are on the corner of Whittier and South Shore.) We reviewed and discussed the 1st draft of the plans. They all gave their approval that night for a 25' by 29' structure. We've mentioned it to other neighbors not on the street and they have no problem with it as well.

Our contractor is Don Williams with whom we have worked before and are well pleased with his results:

Williams Service Group LLC
3229 Fernglade Rd
Verona, WI 53593

Architect:

Jason Ekstrom Designs Assoc. AIA
Evansville, WI

We hope to have it built before the end of November. To recap:

- It is 150 sq. feet over code
- Our neighbors gave their approval for this size of garage

Thank you for your consideration,

Douglas Alexander
