

The Correct Way To fit Your Helmet

To watch a video demonstrating how to fit a helmet go to
www.cityofmadison.com/transp/bicycle.html

Step 1 CHECKING YOUR HELMET

- Is the helmet facing the right way?
The brand name should be in front and the longer part should be in back.

- Is the helmet in the proper position:
one or two finger widths above your eyebrows and level with the ground?

- Does the helmet move less than an inch when you push it back and forth or side-to-side?

If you can answer YES to ALL of these questions, congratulations, your helmet fits properly.
If not, follow instructions below to ensure a proper fit.

Step 2 ADJUSTING YOUR HELMET

- Use pads provided by manufacturer or adjust the band inside to ensure a snug fit.

- Fasten the buckle leaving a finger's width between your chin and chin strap.

- Adjust the straps so they form a Y just below your ear. Shorten the front strap if necessary to ensure the helmet covers your forehead.

- This is what your helmet should look like when you are done.
