Prairie Road Water Tower Replacement

The Madison Water Utility has decided to replace the existing water tower, which was damaged by fire, with a new water tower. The larger capacity tower is needed to improve public fire protection in this area.

The attached photos show an artist's rendering of the new tower from three different directions.

VIEWS OF NEW PRAIRIE ROAD WATER TOWER

This photograph shows an artist's rendering of how the new water tower will appear when viewed from the south. The "shadow" on the tower in each photo indicates the profile of the existing 100,000-gallon tower, for comparison to the new tower, which will have a capacity of 400,000 gallons.

This is a rendering of the new tower as viewed from the west.

This how the new tower will appear when viewed from the north.
