

Bicycle Parking Program City of Madison Traffic Engineering Division

The City of Madison can provide bicycle parking for businesses in areas where

- There is no off-street parking available,
- The terrace between the street and sidewalk is wide enough (generally 5 feet or wider), and
- The terrace is concrete (The bike racks need to be able to be bolted down).

There is no cost to the business or property owner. Bike racks will be installed as city funds are available. All we ask is that you keep the bike racks clear of obstructions so they can be used by your customers.

To request bicycle parking at your business, and to see if your site qualifies and / or meets site conditions for installation of bicycle parking in the terrace, contact traffic@cityofmadison.com
