Peter-

The work proposed would not involve regulated work in a wetland or waterway, therefore, no Corps permit is required. If you have any questions, please contact me via email or at the telephone number below. Thanks.

We are pleased to introduce our new paperless communication procedures in Wisconsin. Requests for action (pre-application consultations, permit applications, requests for delineation concurrences, requests for jurisdictional determinations, and mitigation bank proposals) should be sent directly to the following email: [usace\\_requests\\_wi@usace.army.mil](mailto:usace_requests_wi@usace.army.mil). Please include the county name in the subject line of the email (e.g. Washington County). These changes will improve efficiency, reduce costs and reduce environmental footprint. Kyle,

Thank you for taking my call earlier.

Attached is a set of plans for the project I spoke about.

Regarding the Chapter 30 - Grading Permit for which we received coverage (attached) from the Wisconsin DNR, no work will be occurring below the Ordinary High Water Mark of Lake Mendota. The nearest work to the lake is extending three 2" PVC Pipes from the new shelter building to the edge of the Lake for a future clean water system by the County, but we instruct them to be stopped one-foot from the Ordinary High Water Mark on Sheet C600 (last page).

Can you please take the time to review the plan and confirm with a reply that no Army Corps Permit is required for our work?

Thank you,

Peter D. Fortlage P.E.
