SECTION A: ADVERTISEMENT FOR BIDS

REQUEST FOR BID FOR PUBLIC WORKS CONSTRUCTION CITY OF MADISON, WISCONSIN

A BEST VALUE CONTRACTING MUNICIPALITY

CONTRACT NO.	PROJECT NAME:
6833	BURROWS PARK SHORELINE

Plans and Specifications are available at 1600 Emil Street, Madison, WI 53713; 608-267-1197 or on our website at www.cityofmadison.com/business/pw/contracts/openforBid.cfm.

PREQUALIFICATIONS

Bidders who have not been prequalified by the City Engineer and Affirmative Action Director for the period of **February 1, 2012 to January 31, 2013** must submit their application on or before 1:00 p.m., OCTOBER 5, 2012, Room 115, City-County Building, Madison, WI 53703. Postmark is not applicable. Contractors be prequalified by the City Engineer including an affirmative action plan approved by the Affirmative Action Director prior to the bid opening or the bid will be rejected. Forms are available at the same location or on our website at www.cityofmadison.com/business/pw/forms.cfm.

OTHER REQUIREMENTS

Sealed bids must be accompanied with a Bid Bond equal to at least 5% of the bid or a Certificate of Annual/Biennial Bid Bond or certified check, payable to the City Treasurer.

Prevailing Wage Rates may be required and are attached in Section I of the contract. See Special Provisions to determine applicability.

Deadline for the Submittal of Bid is OCTOBER 12, 2012 1:00 PM, at 1600 Emil Street, Madison, WI 53713.

Bid Opening will be on OCTOBER 12, 2012 at 1:30 PM at 1600 Emil Street, Madison, WI 53713.

REQUEST FOR BIDS FOR PUBLIC WORKS CONSTRUCTION FOR THE CITY OF MADISON, WISCONSIN

A BEST VALUE CONTRACTING MUNICIPALITY

Plans and Specifications for Public Works Projects that are open for bid are available on the City of Madison website at <http://www.cityofmadison.com/business/PW/contracts/openforBid.cfm> or by calling City Engineering at 608-266-4751.

Sealed bids must be accompanied with a Bid Bond equal to at least 5% of the bid or a Certificate of Annual/Biennial Bid Bond or certified check, payable to the City Treasurer.

Prevailing Wage Rates may be required and are attached in Section I of the contract. See Special Provisions to determine applicability.

Bidders must be prequalified with the City Engineer and the Affirmative Action Director. Deadline date for submittal of application is noticed on our website. Forms are available on the web at <http://www.cityofmadison.com/business/pw/forms.cfm> or by contacting City Engineering at 608-266-4620

Publ. WSJ 9/28/12 & 10/5/12

SECTION B: INSTRUCTIONS TO BIDDERS

The City of Madison Standard Specifications for Public Works Construction - 2012 Edition, as supplemented and amended from time to time, forms a part of these contract documents as if attached hereto.

These standard specifications are available on the City of Madison Public Works website at www.cityofmadison.com/Business/PW/specs.cfm or by contacting City Engineering Division, Room 115, City-County Building, 210 Martin Luther King Jr. Blvd., Madison, WI 53703.

The Contractor shall review these Specifications prior to preparation of proposals for the work to be done under this contract, with specific attention to Article 102 **"BIDDING REQUIREMENTS AND CONDITIONS"** and Article 103 **"AWARD AND EXECUTION OF THE CONTRACT."** For the convenience of the bidder, below are highlights of three subsections of the specifications.

Section 102.1: Pre-Qualification of Bidders

In accordance with Wisconsin State Statutes 66.0901 (2) and (3), all bidders must submit to the Board of Public Works proof of responsibility on forms furnished by the City. The City requires that all bidders be qualified on a biennial basis.

Bidders must present satisfactory evidence that they have been regularly engaged in the type of work specified herein and they are fully prepared with necessary capital, materials, machinery and supervisory personnel to conduct the work to be contracted for to the satisfaction of the City. All bidders must be pre-qualified by the Board of Public Works for the type of construction on which they are bidding prior to the opening of the bid.

In accordance with Section 39.02(9)(a)1. of the Madison General Ordinances, all bidders shall submit in writing to the Affirmative Action Division Manager of the City of Madison, a Certificate of Compliance or an Affirmative Action Plan at the same time or prior to the submission of the proof of responsibility forms. The bidder shall be disqualified if the bidder fails to or refuses to, prior to opening of the bid, submit a Certificate of compliance, Affirmative Action Plan or Affirmative Action Data Update, as applicable, as defined by Section 39.02 of the Madison General Ordinances (entitled Affirmative Action) and as required by Section 102.11 of the Standard Specifications.

Section 102.4: Proposals

No bid will be accepted that does not contain an adequate or reasonable price for each and every item named in the Schedule of Unit Prices.

A lump sum bid for the work in accordance with the plans and specifications is required. The lump sum bid must be the same as the total amounts bid for the various items and it shall be inserted in the space provided.

All papers bound with or attached to the proposal form are considered a part thereof and must not be detached or altered when the proposal is submitted. The plans, specifications and other documents designated in the proposal form will be considered a part of the proposal whether attached or not.

A proposal submitted by an individual shall be signed by the bidder or by a duly authorized agent. A proposal submitted by a partnership shall be signed by a member/partner or by a duly authorized agent thereof. A proposal submitted by a corporation shall be signed by an authorized officer or duly authorized registered agent of such corporation, and the proposal shall show the name of the State under the laws of

which such corporation was chartered. The required signatures shall in all cases appear in the space provided therefore on the proposal.

Each proposal shall be placed, together with the proposal guaranty, in a sealed envelope, so marked as to indicate name of project, the contract number or option to which it applies, and the name and address of the Contractor. Proposals will be received at the place and until the hour on the date designated in the advertisement. When sent by mail, the sealed proposal marked as indicated above shall be enclosed in an additional envelope. Proposals sent by mail, submitted in person or otherwise delivered must be in the hands of the official conducting the letting by the hour on the date designated in the advertisement. Proposals received after the date designated will be returned to the bidder unopened.

The Bidder shall execute form ERD-7777 (R.9/03), a part of these proposal pages and submit same with the bidder's proposal, if applicable. REFER TO PROPOSAL SECTION.

Section 102.5: Bid Deposit (Proposal Guaranty)

No proposal shall be considered unless either (i) it is accompanied by a bid deposit of the character and amount described in the Advertisement for Bids or (ii) a biennial bid bond in an amount and form acceptable to the City of Madison has been previously submitted.

Bid deposits of unsuccessful bidders shall be returned following the award of the contract by the Common Council. Bid deposit of the successful bidders shall be returned within forty-eight (48) hours following execution of the contract and bond as required.

Bidders for this Contract(s) must be Pre-Qualified for at least one of the following type(s) of construction denoted by an

SECTION C: SBE

**Instructions to Bidders
City of Madison
SBE Program Information**

SBE (Not Applicable)

SECTION D: SPECIAL PROVISIONS

BURROWS PARK SHORELINE CONTRACT NO. 6833

It is the intent of these Special Provisions to set forth the final contractual intent as to the matter involved and shall prevail over the Standard Specifications and plans whenever in conflict therewith. In order that comparisons between the Special Provisions can be readily made, the numbering system for the Special Provisions is equivalent to that of the Specifications.

Whenever in these Specifications the term "Standard Specifications" appears, it shall be taken to refer to the City of Madison Standard Specifications for Public Works Construction and Supplements thereto.

SECTION 102.10: MINIMUM RATE OF WAGE SCALE

For this project, payment of prevailing wages (white sheet) is not required if either: a single trade accounts for 85% or more of the total labor costs of the project and the bid is less than \$48,000; or no single trade accounts for 85% or more of the total labor costs of the project and the bid is less than \$100,000. For bids not meeting either of these conditions, prevailing wages shall be required.

If required, the wages and benefits paid on the contract shall not be less than those specified in the Prevailing Wage Determination included with these contract documents for the following types of work:

- Building and Heavy Construction
- Sewer, Water, and Tunnel Construction
- Local Street and Miscellaneous Paving Operations
- Residential and Agricultural Construction

All bidders are notified that all labor employed on City contracts must be paid in accordance with the minimum rate of wage scale included in the Contract Documents.

For the information of the employees working on the project, a copy of the wage scale included in the contract documents and the provisions of Section 66.0903(8) of the Wisconsin Statutes shall be kept posted by the employer and in at least one conspicuous and easily accessible place at the site of the project.

The Contractor shall keep weekly payroll records setting forth the name, address, telephone number, classification, wage rate and fringe benefit package of each employee who worked on such City project and all other projects the employee worked in the same period, and the Contractor must keep records of the individual time each employee worked on the project and for each day of the project. Such records shall also set forth the total number of hours of overtime credited to each such employee for each day and week and the amount of overtime pay received in that week. Such records shall, in addition, set forth the full weekly wages earned by each such employee and the actual hourly wage paid to that employee. The Contractor shall submit payroll records to the Engineer every week for those periods when work is being done on the project. Said submittal shall be within twenty-one (21) calendar days of the end of the Contractor's weekly pay period.

The Contractor shall ensure that employees shall be paid unconditionally and shall receive the full amounts accrued at the time of payment, computed at rates not less than those stated in the City of Madison "Minimum Rate of Wage Scale" and that each employee's rate shall be determined by the work that is done within the trade or occupation classification which should be properly assigned to such employee. Questions regarding an employee's classification or rate of pay within that classification, shall

be resolved by the practice that predominates in the industry and on which the trade or occupation rate/classification is based. Therefore, rate of pay, classification and work jurisdiction disputes shall be resolved by relying upon practices established by collective bargaining agreements and guidelines used in such determinations by appropriate recognized trade unions operating within the City of Madison.

The Contractor shall agree that the normal rate of wage paid to the Contractor's employees on other projects shall not be reduced or otherwise diminished as a result of the requirement to pay no less than the minimum rate of wage scale on a City project. Mulcting of employees on City projects by contractors, such as by kickbacks or other such devices, is prohibited.

These contract provisions shall apply to all work performed on the contract by the Contractor with its own organization and with assistance of laborers under its immediate superintendency and to all work performed by piecework or by subcontract. No laborer, worker, or mechanic shall be employed directly upon the site of the work except on a wage basis, but this shall not be construed to prohibit the rental of equipment from individuals.

In the event of a refusal by the Contractor to submit payroll records as required by the contract, the City of Madison shall have the option to cancel this contract and request the Surety to perform or to relet the balance of the work for bids, and in that event, to charge the Contractor for any loss which the City may incur thereby.

SECTION 102.12: BEST VALUE CONTRACTING

This Contract shall be considered a Best Value Contract if the Contractor's bid is equal to or greater than \$51,500 for a single trade contract; or equal to or greater than \$251,000 for a multi-trade contract pursuant to MGO 33.07(7).

ARTICLE 102.3 EQUAL BENEFITS REQUIREMENT (SEC. 39.07, MGO)

This provision applies to contracts executed by the City on July 1, 2012 or later, unless exempt by Sec. 39.07 of the Madison General Ordinances (MGO).

For the duration of this Contract, the Contractor agrees to offer and provide benefits to employees with domestic partners that are equal to the benefits offered and provided to married employees with spouses, and to comply with all provisions of Sec. 39.07, MGO. If a benefit would be available to the spouse of a married employee, or to the employee based on his or her status as a spouse, the benefit shall also be made available to a domestic partner of an employee, or to the employee based on his or her status as a domestic partner. "Benefits" include any plan, program or policy provided or offered to employees as part of the employer's total compensation package, including but not limited to, bereavement leave, family medical leave, sick leave, health insurance or other health benefits, dental insurance or other dental benefits, disability insurance, life insurance, membership or membership discounts, moving expenses, pension and retirement benefits, and travel benefits.

Cash Equivalent. If after making a reasonable effort to provide an equal benefit for a domestic partner of an employee, the Contractor is unable to provide the benefit, the Contractor shall provide the employee with the cash equivalent of the benefit.

Proof of Domestic Partner Status. The Contractor may require an employee to provide proof of domestic partnership status as a prerequisite to providing the equal benefits. Any such requirement of proof shall comply with Sec. 39.07(4), MGO.

Notice Posting, Compliance. The Contractor shall post a notice informing all employees of the equal benefit requirements of this Contract, the complaint procedure, and agrees to produce records upon request of the City, as required by Sec. 39.07, MGO.

Subcontractors. Contractor shall require all subcontractors, the value of whose work exceeds the single-trade minimum set forth in Sec 33.07(7)(b)5., MGO, to provide equal benefits in compliance with Sec. 39.07, MGO.

See Section 39.07 MGO for exemptions from this requirement. Exemptions from this requirement include a Contractor whose employees are under a collective bargaining agreement that was in effect prior to July 1, 2012, however, the Contractor must agree to propose to the applicable collective bargaining unit(s) that an equal benefit requirement consistent with this ordinance be incorporated into the next collective bargaining agreement or in the existing agreement upon amendment, extension or other modification that occurs after July 1, 2012.

ARTICLE 103: AWARD AND EXECUTION OF THE CONTRACT

The Contractor shall execute the signing of this contract completely prior to **October 26, 2012**. No exceptions or extensions to the above date will be permitted.

ARTICLE 104: SCOPE OF WORK

This project consists of restoration of the shoreline along Burrows Park by installing glacial riprap. The work also includes grading, seeding, and installation of temporary and permanent erosion mat.

The Contractor shall view the site prior to bidding to become familiar with the existing conditions. It will be the responsibility of the Contractor to work with the utilities located in the right of way to resolve conflicts during the construction process.

ARTICLE 104.4 INCREASED OR DECREASED QUANTITIES

The Contractor shall note that it is possible that the DNR Ch. 30 permit may not be received in time for construction of the project. In the event that the Ch. 30 permit for the project is not received by November 9, 2012 (or a later date if mutually agreed upon by the City and the Contractor), or the DNR will not approve the City's proposed design, the City may elect to delay the work to Spring 2013, or delete the work entirely. The Contractor shall not be reimbursed for any or all deletions to the contract. No change to the unit bid prices will be allowed for reductions of the quantities, if required to satisfy DNR requirements.

SECTION 105.1: AUTHORITY OF THE ENGINEER

The Engineer shall resolve all questions which arise as to the quality and acceptability of materials furnished, work performed, manner of performance, rate of progress of the work, interpretation of the plans and Specifications, acceptable fulfillment of the contract, compensation, and disputes and mutual rights between Contractors under the Specifications. The Engineer shall determine the amount and quantity of work performed and materials furnished.

All decisions of the Engineer shall, when so requested, be rendered in writing. They shall be final and conclusive in all matters unless within ten (10) days after such decision the Contractor applies in writing to the Board of Public Works for a review of such decision.

Any change proposed by a Contractor in SBE subcontractors, vendors or suppliers from those SBEs indicated on the SBE Compliance Report must be approved by the Engineer and the City's Manager of the Affirmative Action Division (hereafter, AAD). When requested, such decision shall be rendered in writing. Such decisions shall be final and conclusive in all matters unless within ten (10) days after such decision the Contractor or the affected SBE applies in writing to the Board of Public Works for a review of such decision.

In the event the Engineer and the AAD disagree over the proper decision to be made regarding an SBE, the Mayor shall appoint a third person to resolve the disagreement, within 30 days of appointment. The decision thus rendered may be reviewed by the Board of Public Works upon request of the Contractor or the affected SBE as set forth in Sections 105.1 and 105.2 of the City's standard specifications.

SECTION 105.12: COOPERATION BY THE CONTRACTOR

Contractor shall obtain approval from Engineer for planned stockpile and staging locations prior to construction to ensure that they do not interfere with park usage.

SECTION 105.13: ORDER OF COMPLETION

The order of doing the work is subject to the review of the City. Prior to beginning construction, the Contractor shall submit to the City a detailed construction schedule showing the sequence and anticipated dates of all construction operations, as well as a Staging/Phasing Plan for approval by the City. The sequence of scheduled operations may be modified by the City to accommodate specific needs.

SECTION 107.14 WEAPONS PROHIBITION

Contractor shall prohibit, and shall require its subcontractors to prohibit, its employees from carrying weapons, including concealed weapons, in the course of performance of work under this Contract, other than while at the Contractor's or subcontractor's own business premises. This requirement shall apply to vehicles used at any City work site and vehicles used to perform any work under this Contract, except vehicles that are an employee's "own motor vehicle" pursuant to Wis. Stat. sec. 175.60(15m).

SECTION 107.2 PROTECTION AND RESTORATION OF PROPERTY AND PROPERTY MONUMENTS

The contractor must repair any damage to park areas from construction operations not adjacent to the shoreline, at the contractor's expense. Contractor shall protect park benches, playground equipment, bike racks, etc. If bench locations or bike racks present a conflict with Contractor's planned operations, contractor may remove and replace benches and racks, at Contractor's expense. Contractor shall obtain permission from the Parks Department prior to removing any benches or racks (Contact Sarah Lerner 261-4281 slerner@cityofmadison.com). Contractor shall repair any damage to paved areas of the park, in kind, at Contractor's expense.

Contractor shall not track heavy equipment over the metal rails in the Mendota Yacht Club Boat Storage and Launch Area. Contractor shall use light equipment in this area, or shall protect the rails in a manner acceptable to the Construction Engineer. Contractor shall repair any damage to rails, in kind, at Contractor's expense.

SECTION 107.7: MAINTENANCE OF TRAFFIC

The Contractor shall ensure that his/her operations do not block access to the park. Contractor may use a portion of the south end of the parking lot for storage of equipment and materials, with prior approval of

the Engineer and Parks Division. No construction equipment or materials shall be stored in public street right-of-way adjacent to the project.

Any necessary work zone signing and barricading shall conform to Part VI of the Federal Highways Administration's "Manual on Uniform Traffic Control Devices" (MUTCD), The City of Madison Standards for Sidewalk and Bikeway Closures, and the State of Wisconsin Standard Detail Drawings, including S.D.D. 15 C 3-1 Barricades and Signs for Side road Closures and 15D 30-1 Traffic Control, Sidewalk Closure.

For removal or replacement of traffic and parking signs, contact the City of Madison Traffic Engineering Field Operations, 1120 Sayle Street, 267-4767, 8:00 a.m. to 4:00 p.m., a minimum of 1 working day in advance of when the signs need to be removed. This service is provided free of charge. If the Contractor removes the signs, the Contractor will be billed for the reinstallation of, and any damage to, the signing equipment.

SECTION 107.13: TREE PROTECTION SPECIFICATIONS

The Contractor is advised to review Section 107.13 of the Standard Specifications for tree protection. Note that Sections 107.13(b) Curb Excavation and Installation, 107.13(c) Sidewalk Excavation and Installation, 107.13(d) Root Cutting/Root Grinding, 107.13(e) Terrace Restoration are not applicable to this project. Other sections are applicable except as provided below.

Because of the intent to save trees, there are trees to be saved that are inside the construction limits. It is recognized that grading operations and root cutting of these trees will need to occur within 5 feet of these trees in order to complete the work, but care must be taken in these areas. Roots shall be cut cleanly by using a saw, axe, lopping shears, chain saw, stump grinder, or other means which will produce a clean cut. Exposed roots shall be covered as soon as excavation is complete. The Contractor shall not rip or pull roots out towards the trunk of a tree while excavating with a backhoe. The use of a backhoe to cut roots is NOT acceptable.

Additional trees beyond those marked on the plans for removal with an X may only occur with the permission of the Construction Engineer and the Forestry Representative.

With regard to Section 107.13(f), pruning to accommodate construction equipment invading the tree crown may be done by the Contractor, with advance permission from the Forestry Representative. All pruning shall be done according to ANSI A300 tree pruning specifications.

With regard to Section 107.14(g), no equipment or materials will be allowed to be parked on, or piled on areas within 5 feet of a tree. Construction traffic within 5 feet of a tree will be allowed only where necessary to complete grading operations, at the discretion of the Construction Engineer.

Note that shoreline alignment location may be adjusted slightly in the field by the Construction Engineer to accommodate existing trees to be saved.

SECTION 108.2: PERMITS

The following permits have been applied for:

1. Army Corps of Engineers Permit (covered under non-reporting permit)
2. WI-DNR Chapter 30 Permit (applied for 8/1/2012)
3. City of Madison Erosion Control Permit

A WI-DNR WRAPP (formerly Notice of Intent – NOI) Stormwater Discharges Associated with Land Disturbing Construction Activities Permit is not required for this project because land disturbance is < 1 Acre.

It shall be the responsibility of the Contractor to obtain the permits listed below, if required, and to pay all applicable charges and fees associated with these permits.

- Wisconsin DNR Dewatering

All permit costs shall be considered incidental to the various Mobilization bid items for the Contract.

The Contractor shall meet the conditions of all permits and must keep a copy of each individual permit on site at all times throughout construction.

With regard to Control of Invasive or Exotic Species, the Chapter 30 permit will stipulate that any equipment or materials that may be in contact with invasive or exotic species must be decontaminated prior to and after work at the project site. It shall be the Contractor's responsibility to comply with decontamination requirements.

The Contractor shall meet the conditions of the permits involving including properly installing and maintaining the erosion control measures shown on the plans, specified in these Special Provisions, or as directed by the Construction Engineer or his designees. This work will be paid for under the appropriate bid items, or if appropriate items are not included in the contract, they shall be paid for as Extra Work.

The City's obtaining these permits is not intended to be exhaustive of all permits that may be required to be obtained by the Contractor for construction of this project. It shall be the responsibility of the Contractor to identify and obtain any other permits needed for construction.

SECTION 109.2: PROSECUTION OF WORK

The Contractor shall begin work on or following **Monday November 12, 2012**. The time of completion shall be **SIXTY-NINE (69) CALENDAR DAYS**. The Contractor may suspend operations as necessary due to weather or temperature conditions, as long as the work is completed within the contract time.

It is the intent of these Special Provisions that construction is staged so that only a portion of the site is disturbed at any given time. Prior to suspending work for more than three days, Contractor shall stabilize the section being constructed, with topsoil, seed and erosion control mat, or other measures approved by the Construction Engineer. If final stabilization is not possible, temporary stabilization consisting of polymer/soil stabilizer shall occur, but use of temporary stabilization shall be limited and shall require approval of the Engineer.

Winter placement of topsoil and ECRM required for final stabilization will require unfrozen topsoil for placement. Contractor shall plan for this and shall provide cold weather protection of stockpiles as needed. No separate payment shall be made for providing unfrozen topsoil.

It is expected that Contractor will need to manage lake ice to maintain access to shoreline area. No separate payment shall be made for management of ice.

The fixed, agreed upon, liquidated damages for failure to complete all work within the contract, unless otherwise specified in this section, shall be calculated in accordance with Article 109 of the Standard Specifications. The Contractor shall limit workdays from 7:00 am to 7:00 pm, unless approved by the Engineer in writing.

BID ITEM 10911 – MOBILIZATION

DESCRIPTION

Work under this item shall include all costs associated with mobilization of the Contractor to the site. A single mobilization shall be paid, i.e., no additional mobilizations shall be paid should Contractor suspend work due to weather or temperature conditions.

METHOD OF MEASUREMENT

Mobilization shall be paid as a lump sum.

BASIS OF PAYMENT

Mobilization shall be measured as described above which shall be full payment for all work as described above.

BID ITEM 20101 – EXCAVATION CUT

DESCRIPTION

Excavation Cut shall include all earthwork cut required to prepare the shoreline for the specified repair. This includes the removal of all rock and soil, as indicated on the plans or as directed in the field by the Engineer. The Contractor shall be responsible for determining a suitable off-site disposal location for excess excavated materials that are deemed unusable as fill in on site fill areas or are considered surplus, and for hauling to and placement at the disposal site.

Suitable materials may be reused as fill within the project limits. Placement of these fill materials shall be considered incidental to this bid item and shall not be compensated separately.

Also included in this item is the removal and stockpiling of sections of salvageable glacial riprap prior to the specified shoreline repair as indicated on the plans or as directed in the field. The hauling from the stockpiled location and the placement in the new location shall be compensated for under Bid Item 90030, Heavy Riprap (Glacial Stone) Placement.

Care shall be taken to protect all tree roots of those trees not marked for removal. Payment for clearing and grubbing of trees shall be compensated separately.

METHOD OF MEASUREMENT

Excavation Cut within the limits shown on the plans and cross sections will be paid for based on the "plan quantity" as shown in the Contract without measurement thereof.

If Construction Engineer determines that substantial changes are required to excavation limits, additional undercut or excavation directed by the Engineer, beyond the limits shown on the plans shall be measured in the field by cubic yards in place, and paid for as Excavation Cut. For purposes of this item, "substantial" shall mean changes over 10% of the estimated quantity.

The plan quantity was computed by average end area based on the shoreline cross sections and the assumptions listed above. No adjustments to the earthworks quantities were made for topsoil.

BASIS OF PAYMENT

Excavation shall be paid at the contract price for work as described and measured above which shall be full compensation for all labor, tools, equipment, and incidentals necessary to complete this item of work.

BID ITEM 20201 – FILL BORROW

DESCRIPTION

This item shall include placement of imported general fill at the locations shown on the plans and cross sections or as directed by the Engineer in the Field. The Contractor shall place fill in compliance with Section 202 – Fill, of the Standard Specifications.

Contractor may reuse suitable materials obtained from excavation for fill, however placement of such fill shall be considered incidental to excavation cut, and no separate payment shall be made for placement. Suitable fill materials, as determined by the Construction Engineer or a representative of the Parks Division, obtained from excavation on site shall be used prior to trucking in borrow materials.

This item shall include placement of fill at the locations shown on the plans and cross sections or as directed by the Engineer in the Field. The Contractor shall place fill in compliance with Section 202 – Fill of the Standard Specifications. Materials used for Fill shall meet the requirements of the Standard Specifications of Section 202.2(a) Fill.

METHOD OF MEASUREMENT

Fill Borrow shall be measured by the ton of material brought to the site and placed.

The quantity on the proposal was computed by average end area based on the sections, with no adjustment made for topsoil. For calculation of the quantity it was assumed that approximately 50% of the estimated 20 cubic yards of required fill would be required to be imported. A conversion of 1.41 tons/cy was used. Note that the actual quantity is may vary from that on the Proposal Page as additional erosion may have occurred at the site since the time of the survey.

BASIS OF PAYMENT

Fill Borrow shall be paid at the contract price for work as described and measured above which shall be full compensation for all labor, tools, equipment, and incidentals necessary to complete this item of work.

BID ITEM 20217 – CLEAR STONE

Contractor shall provide and install clear stone as directed by the Construction Engineer. Clear stone material and placement shall conform to requirements in Section 202 and Article 401 for Clear Stone. This item shall also include any clear stone used for erosion control.

METHOD OF MEASUREMENT

Clear stone shall be measured by the ton of material brought to the site and placed.

BASIS OF PAYMENT

Clear stone shall be paid for at the contract price for work as described and measured above which shall be full compensation for all labor, tools, equipment and incidentals necessary to complete the work.

BID ITEM 20221 – TOPSOIL

DESCRIPTION

This item shall include placement of topsoil within the seeding limits shown on the drawings landward of the shoreline treatment or as directed by the Engineer in the field. Topsoil shall be placed four (4) inches thick per the Standard Specifications. Salvaged topsoil from on site meeting the specifications may be reused. In some areas the existing topsoil thickness may be adequate and no additional topsoil may be required. Topsoil materials and placement shall be in accordance with Article 202 – Fill.

Any required topsoil stripping and stockpiling shall be considered incidental to this bid item.

Prior to seeding, topsoil and the seed bed shall be approved by Parks Division Staff.

METHOD OF MEASUREMENT

Topsoil shall be measured by the square yard.

BASIS OF PAYMENT

Topsoil shall be paid at the contract price for work as described and measured above which shall be full compensation for all labor, tools, equipment, and incidentals necessary to complete this item of work.

BID ITEM 20228 – HEAVY RIPRAP (GLACIAL STONE) IMPORT

DESCRIPTION

This item shall include the provision and stockpiling on site of natural glacial rock or field stone (non-sedimentary rock). The rock shall be durable stone hauled in from an off-site source. The stone shall be sound, hard, dense, resistant to the action of air and water, and free from seams, cracks, or other structural defects. The stone shall consist of varying sizes and weights. Any stone that has been cracked either by shipping, handling, or placing and does not meet the specified size range shall be removed from the project and replaced. The Engineer shall review and approve stone before Contractor brings it on-site. Stone shall be “hand picked” at the pit.

The stone shall have the following dimensions:

D50 (inches)	Min D (inches)	Max D (inches)
18	15	21

Placement of the stone shall be paid separately under BID ITEM #90030.

METHOD OF MEASUREMENT

Heavy Riprap (Glacial Stone) Import will be measured by the ton of stone brought to the site and placed. The quantity on the proposal page was estimated based on the proposed cross sections. The quantity on the proposal page assumes that 40% of the total estimated required quantity of riprap (730 tons) may be salvaged from the existing riprap on site. The actual quantity is expected to vary. No change in the bid price shall be approved should this item be increased or decreased beyond the specifications in Section 104 in the Standard Specifications.

BASIS OF PAYMENT

Heavy Riprap (Glacial Stone) Import shall be paid at the contract price for work as described and measured above, which shall be full compensation for all material, labor, tools, equipment and incidentals necessary to complete this item of work.

BID ITEM 20233 – HEAVY RIPRAP FILTER FABRIC

DESCRIPTION

This item shall include furnishing and placing Heavy Riprap Filter Fabric at all locations required for the project. Heavy Riprap Filter Fabric material and placement shall be as described in Section 202 of the Standard Specifications. Fabric shall conform to requirements for Geotextile Fabric Type HR contained in the latest edition of the Standard Specifications for Highway and Structure Construction for the State of Wisconsin, Department of Transportation. Fabric shall be synthetic, non-woven needle punched fabric that is resistant to chemicals and mildew, stable under freeze-thaw cycles, does not shrink or expand under wet conditions, and that does not unravel during use.

Trimming of the fabric required to accommodate existing tree locations shall be considered incidental to this bid item.

Placement of filter fabric shall conform to manufacturer's requirements to assure a continuous layer unbroken by rips, tears, punctures, or other physical damage from placement of the fabric or placement of materials over the fabric.

Seams between individual pieces of filter fabric shall be joined or overlapped to provide a continuous layer. Fabric shall be overlapped at a minimum of 18 inches.

METHOD OF MEASUREMENT

Heavy Riprap Filter Fabric shall be measured by the square yard, according to the yardage provided in each roll. The total yardage shall be measured by multiplying the number of complete rolls used by the yardage of each roll. The last roll, if partially used, shall be paid, but the remainder of the roll shall be delivered by the Contractor to the Engineering Service Building on Emil Street.

The quantity on the proposal page was calculated using the cross sections, and includes a 10% allowance for overlap and waste.

BASIS OF PAYMENT

Heavy Riprap Filter Fabric shall be paid at the contract price for work as described and measured above which shall be full compensation for all labor, tools, equipment, and incidentals necessary to complete this item of work.

BID ITEM 20401 AND 20403 – CLEARING AND GRUBBING

DESCRIPTION

These items apply to removal of all trees and stumps marked with an X on the plans within the project limits. Clearing and grubbing of trees and stumps shall be done in accordance with Article 204 of the Standard Specifications except as modified herein.

CONSTRUCTION METHODS

All clearing and grubbing shall be done under the supervision of the Forestry representative. Forestry shall be notified a minimum of 2 working days in advance of any such work to arrange for Forestry to be present.

Grubbing shall consist of removal to a depth of at least twelve (12) inches below the original ground area in fill areas, and at least twelve (12) inches below the subgrade in cut areas. For trees in other areas, remove stumps to a depth of 12 inches below the original ground. Fill to backfill holes where stumps are removed shall be considered incidental to this bid item.

The Contractor shall be responsible for off-site disposal of trees, shrubs, brush and for removing and disposing, off site, of stumps, logs, windfalls and any other vegetation to be cleared and grubbed. All material shall be disposed of off-site at a location to be determined and provided by the Contractor.

All brush and herbaceous vegetation within the limits of earthwork are also to be removed, and removal of these shall be considered incidental to this bid item. Trees to be removed within the earthworks limits and elsewhere on the project shall be marked in the field by the Forestry Representative prior to beginning tree removal operations. These trees are indicated on the plans. All other trees shall be saved, unless Contractor is directed to remove them in the field. Trees marked for removal may vary somewhat from those shown on the plans.

Brush, trees and herbaceous vegetation outside the earthworks limits is not to be disturbed.

METHOD OF MEASUREMENT

Clearing and Grubbing shall be measured per inch diameter in accordance with Section 204.3 of the Standard Specifications. Trees under three (3) inches in diameter, shrubs, bushes, windfalls, and herbaceous vegetation shall not be measured and shall be removed at the Contractor's expense.

BASIS OF PAYMENT

Clearing and Grubbing shall be paid at the contract price for work as described and measured above including all work, materials, labor, hauling, placement at a disposal site and incidentals.

BID ITEM 20707 – NO-MOW/RIPRAP SEEDING

DESCRIPTION

Work under this item shall include seeding with the seed mix below at the locations shown on the drawings, or at other locations as directed by Engineer. This mix is intended to be placed within the No-Mow area indicated on the plans as well as in the seeded areas within the riprap for the Vegetated Riprap typical section. This work shall be in accordance with Article 207 of the Standard Specifications, except as provided below.

Seed Mix shall be custom mixed or a modified pre-designed mix from an approved native seed supplier. The native mix shall be as listed below.

Seed at the rate recommended by the manufacturer, 9.98 lbs/acre, 125 seeds per square foot. Submit additions or substitutions and final mix to Engineer for approval. Russ Hefty from City of Madison Parks (267-4918) shall inspect and approve the seed prior to placement.

Seed shall be native ecotypes. No improved varieties are allowed. Seed source shall be native ecotypes from Southeast Minnesota, Eastern Iowa, Southern Wisconsin, or Northern Illinois.

VARIETY – FORBS		
Name	Common Name	% by weight
<i>Agastache foeniculum</i>	Anise Hyssop	1.35
<i>Allium stellatum</i>	Prairie Onion	4.32
<i>Aclepias tuberosa</i>	Butterfly Weed	5.40
<i>Aster azureus</i>	Sky Blue Aster	1.35
<i>Aster laevis</i>	Smooth Blue Aster	1.35
<i>Coreopsis lanceolata</i>	Sand Coreopsis	2.70
<i>Echinacea purpurea</i>	Purple Coneflower	10.80
<i>Eupatorium perfoliatum</i>	Boneset	1.08
<i>Monarda fistulosa</i>	Wild Bergamot	1.08
<i>Penstemon digitalis</i>	Foxglove Beardtongue	3.78
<i>Pycnanthemum virginianum</i>	Mountain Mint	0.54
<i>Ratibida pinnata</i>	Yellow Coneflower	5.40
<i>Rudbeckia fulgida</i>	Orange Coneflower	1.62
<i>Rudbeckia hirta</i>	Black-eyed Susan	5.40
<i>Solidago graminifolia</i>	Grass-leaved Goldenrod	0.54
<i>Solidago speciosa</i>	Showy Goldenrod	0.81
<i>Tradescantia ohiensis</i>	Ohio Spiderwort	5.40
VARIETY – GRASSES, SEDGES & RUSHES		
<i>Andropogon scoparius</i>	Little Bluestem PLS	16.2
<i>Bouteloua curtipendula</i>	Side-Oats Grama PLS	16.2
<i>Carex bebbii</i>	Bebb's Oval Sedge	2.16
<i>Carex bicknellii</i>	Copper-shouldered Oval Sedge	2.16
<i>Carex eburnea</i>	Ivory Sedge	0.27
<i>Carex hystericina</i>	Porcupine Sedge	2.70
<i>Carex muskingumensis</i>	Palm Sedge	1.08
<i>Carex stipata</i>	Common Fox Sedge	2.16
<i>Carex stricta</i>	Common Tussock Sedge	0.38
<i>Carex vulpinoidea</i>	Brown Fox Sedge	3.78

Note that the mix shall include a regreen cover crop as recommended by the native seed supplier, to be applied at a rate of 17.25 lbs/acre, 3.8 seeds/sf.

For Contractor's information, a custom seed mix meeting these specifications (Madison Parks Rip-Rap Planting) is available from Prairie Moon Nursery, Winona MN (866) 417-8156

This item shall include placement of soil stabilizer on all areas seeded in accordance with Section 207.3(f) of the Standard Specifications.

METHOD OF MEASUREMENT

No-Mow/Riprap Seeding shall be measured by the square yard in accordance with Section 207.4.

BASIS OF PAYMENT

No-Mow/Riprap Seeding will be paid for at the contract price per square yard of seeding in accordance with Section 207.5, which shall be payment in full for furnishing, handling, and storing all seed; for preparing the seed bed and sowing the seed; for furnishing, hauling and placing soil stabilizers; for maintenance of the work and repair of all damaged areas, and for furnishing, all labor, tools, equipment and incidentals necessary to complete the work.

BID ITEM 21061 - EROSION MATTING, CLASS I URBAN TYPE A

Work under this bid item shall be as set forth in the Standard Specifications, except Contractor shall note that special care with anchorage devices shall be required so as to not injure users of the beach or the grassy areas of the park. Anchorage devices for the mat are required to be one of those products identified on the Wisconsin Department of Transportation Erosion Control Product Acceptability List (PAL) under the category of "Anchoring Devices for Class I, Urban Erosion Mat. Anchorage devices shall be completely biodegradable, and metal anchorage devices will not be allowed. Materials deemed to present a hazard from splintering or spearing will not be approved, including solid wood devices.

BID ITEM 21083 - EROSION MATTING, CLASS III TYPE C

DESCRIPTION

Work under this bid item shall include provision and installation of Turf Reinforcement Mat (TRM) to be installed in the locations shown on the drawings, (or as directed by the Construction Engineer). A 5-foot wide strip shall be installed at the crest of the slope land-ward of the shoreline treatment. The Class III Type C Erosion Control Re-vegetative Mat (ECRM) shall be one of the products listed in the Wisconsin Department of Transportation Erosion Control Product Acceptability List (PAL), under the category "Erosion Mat, Class III, Type C." Erosion matting supplied shall conform to Wisconsin Department of Transportation requirements for this category of erosion mat.

Overlap and staple pattern shall be in accordance with the manufacturer's recommendations. Contractor shall provide to the City the Manufacturer's recommended staple pattern.

Areas to receive TRM (as shown on the plan set or as directed by the Construction Engineer) shall be prepared for seeding, the TRM shall be installed, one half inch (1/2") of topsoil shall be placed on the TRM, the area shall be seeded, and the Class 1 Urban Type A Erosion Mat shall be placed and secured above the topsoil. Seeding and the Class 1 Urban Type A, Mat shall be paid separately, but topsoil filling of the TRM shall be included with this bid item.

METHOD OF MEASUREMENT

TRM shall be measured by the S.Y. in place, not including run out in anchor trenches or overlap. No adjustment shall be made for slope.

BASIS OF PAYMENT

TRM shall be measured as stated above and shall be paid at the contract price in accordance with the following payment schedule. Seeding and Class 1 Urban Type A Erosion mat to cover the TRM shall be paid separately.

PAYMENT SCHEDULE

ECRM installed correctly with correct anchorage, staple pattern, and overlap shall be paid at the contract price. To verify the staple pattern, the Contractor shall provide to the City a Manufacturer's recommended staple pattern for the type of matting installed.

BID ITEM 90031 – HEAVY RIPRAP (GLACIAL STONE) PLACEMENT

DESCRIPTION

Work under this item shall include placement of imported Heavy Riprap (Glacial Stone) as well as placement of salvaged glacial riprap. This work shall include hauling from the stockpile (or the location where salvaged material is placed following excavation) and placement of the stone in the locations shown on the drawings. Glacial riprap salvaged from on-site may exceed the size requirements for imported riprap contained in BID ITEM #20228, as long as the specification is otherwise met. Salvaged riprap shall be used prior to trucking in new material.

Stone shall be placed at the locations shown on the drawings, to the thicknesses shown. Filter fabric shall be installed beneath the stone, and shall be paid under BID ITEM #20233. A suitable foundation, as approved by the Engineer, shall be provided to preclude settlement. Some chinking may be required to secure stability of the stones.

This item shall also include relocating existing riprap outside the excavation limits shown if needed to field-fit the riprap section. This may be required in particular at the toe of the slope. Also, very limited relocation of existing riprap along the north part of the side, as directed by the Construction Engineer, may be required.

METHOD OF MEASUREMENT

Heavy Riprap (Glacial Stone) Placement will be paid for based on the "plan quantity" as shown in the Contract without measurement thereof. Unless there are significant design changes approved by the Engineer, the final quantity shall be equal to the quantity listed on the proposal page.

The plan quantity was calculated by average end area using the proposed cross sections and reach lengths.

BASIS OF PAYMENT

Heavy Riprap (Glacial Stone) Placement shall be measured as described above and shall be paid for at the contract price which shall be full compensation for all work, materials, labor, and incidentals required to complete the work as set forth in the description.

BID ITEM 90030 – REMOVE TIMBER RETAINING WALL

DESCRIPTION

This item shall include all work necessary to remove exposed portions of the existing timber retaining wall at the locations shown on the plans. The wall is constructed of timber installed on end. Any additional excavation and fill required to remove the wall shall be considered incidental to this bid item. The depth of the wall is unknown, however the wall shall be removed at least to below elev. 848.75, or as directed by Construction Engineer, to accommodate placement of riprap. Removal of the central portion of the, where both sides of are buried and not visible, is not required.

Contractor shall dispose of timbers off-site.

METHOD OF MEASUREMENT

Remove Timber Retaining wall shall not be measured but shall be paid as a lump sum.

BASIS OF PAYMENT

Costs for Remove Timber Retaining Wall shall be measured as described above and shall be paid at the contract price which shall be full compensation for all materials, labor and equipment necessary to complete the work as set forth in the description.

BID ITEM 90031 – REMOVE REBAR LOOPS

DESCRIPTION

Work under this item includes removal of three existing loops of rebar which protrude from existing concrete blocks located in shallow water at the existing canoe launch beach at the far north end of the park shoreline, at the approximate location noted on the plan. The loops are to be removed because they have the potential to damage boats being launched at the site. Work shall consist of sawing off the loops, flush with the top of the concrete blocks, or other method approved by Construction Engineer. Note that the loops are submerged within the shallow water at the canoe launch beach.

METHOD OF MEASUREMENT

Remove Rebar Loops shall be measured as a complete unit installed in the field.

BASIS OF PAYMENT

Remove Rebar Loops will be paid for at the contract price, which shall be full compensation for all work as provided in the description.

BID ITEM 90032 – LAKE CONTROL

DESCRIPTION

Work under this item includes control of backwater from the lake during construction of storm sewer on this project. The Contractor is advised that sustained high water levels in Lake Mendota are possible. Lake level data is available from Dane County at:

<http://www.countyofdane.com/lwrd/landconservation/lakelevelsearchpg.aspx>

Note that lake level data is reported in feet above NGVD 29 datum, which is the same as the project survey.

The Contractor shall be responsible for control of the expected lake backwater while accommodating runoff through the site during construction. If the Contractor wishes to pursue placement of any structures on the bed of the lake at the discharges of the storm sewers to the lake beyond what is shown on the plans, the Contractor shall be responsible for obtaining all necessary permits for that work and compliance with all conditions of those permits. All work, materials, labor and incidentals necessary to control lake backwater, and any necessary work to comply with any necessary permits are included in this bid item.

METHOD OF MEASUREMENT

Lake Control shall be measured as a single lump sum for all dewatering necessary throughout construction.

BASIS OF PAYMENT

Lake Control will be paid for at the contract price, which shall be full compensation for all work as provided in the description.

BID ITEM 90033: TEMPORARY FENCING

DESCRIPTION

This item includes installation of temporary construction fencing at the locations shown on the drawing, to be used for tree protection. Minor relocation of fencing may be required as the work progresses. Fencing may be removed immediately following restoration.

Construction fencing shall be International Orange color, high-density polyethylene mesh conforming to the following:

- Mesh opening: 1 inch min to 3 inch max
- Height: 4 feet
- Ultimate tensile strength: Avg 3000 lb per 4' width (ASTM D638)

Posts shall be conventional metal "T" or "U" shaped posts. Fencing shall be installed according to the manufacturer's recommendations.

METHOD OF MEASUREMENT

Temporary fencing shall be measured by the linear foot installed.

BASIS OF PAYMENT

Cost for temporary fencing shall be paid for according to the contract unit price. Price shall include payment for providing and installing temporary fence and appurtenances, maintenance of fencing as required, creating and closing temporary openings as needed, and removal of fencing and appurtenances including furnishing all labor, tools, equipment, and incidentals necessary to perform the work.

Re: Geotechnical Services
Burrows Park Shoreline Improvements
Madison, Wisconsin

Dear Ms. Coleman:

CGC, Inc. has completed our geotechnical services for the above-referenced project. At your request, two soil borings were drilled along the eastern Lake Mendota shoreline within the subject park. The borings were performed on December 9, 2011 at locations selected by City personnel. The borings were marked out in the field by CGC personnel prior to drilling and are shown on a boring location plan provided to us (copy attached in Appendix A). Elevations at the boring locations were not obtained but can be at a later date upon request. The following paragraphs discuss our observations and provide opinions relative to construction activity at the shoreline.

SUBSURFACE PROGRAM & OBSERVATIONS

The borings were drilled to depths selected by City personnel utilizing the services of J&J Soil Testing (under subcontract to CGC) using a truck-mounted, rotary CME-45 drill rig equipped with hollow-stem augers. Standard Penetration Test (SPT) drilling techniques (ASTM D1586) were used for the full exploration depth at the boring location. This method consists of driving a 2-inch outside diameter split-barrel sampler using a 140-pound weight falling freely through a distance of 30 inches. The sampler is first seated 6 inches into the material to be sampled and then driven 12 inches. The number of blows required to drive the sampler the final 12 inches is recorded on the log of borings and is known as the Standard Penetration Resistance (commonly referred to as the N-value).

During the field exploration program, the driller visually classified the soils and prepared a field log. Water level observations were made at the borings during and shortly after drilling, which are shown on the bottom of each boring log. Note groundwater was encountered between 5 and 6.25 ft below ground surface at the boring locations. Groundwater levels are anticipated to fluctuate based on seasonal variations in precipitation, infiltration, adjacent Lake Mendota stages, etc. Upon completion of drilling, the borings were backfilled to satisfy WDNR requirements and the soil samples delivered to our laboratory for visual classification and limited laboratory testing.

Ms. Lisa Coleman
City of Madison Engineering Dept.
January 18, 2012
Page 2

The soils were visually classified by CGC and reviewed by a geotechnical engineer using the Unified Soil Classification System (USCS). The final logs prepared by the engineer and a description of the USCS are presented in Appendix A.

The attached boring logs indicate that somewhat uniform soil conditions exist at the boring locations. In general, 3.5 ft of clayey to sandy fill materials (topsoil over sand) were present atop 0.5 to 1.5 ft of buried topsoil. The topsoil was underlain by approximately 1 ft of clay over 4 to 5 ft of granular soils, which extended to the full depth at the boring locations. Please refer to the final logs included in Appendix A for additional information specific to the boring location.

CONSTRUCTION DISCUSSION

The groundwater levels observed at the boring locations could prove to be one of the primary concerns for this project. Note the boring logs indicate water levels of 5.0 to 5.5 ft below ground surface shortly after drilling. It is likely that an excavation open for an additional period of time would exhibit shallower water consistent with Lake Mendota levels. As such we anticipate that dewatering will be necessary to construct any below-grade features associated with the project. Furthermore, the dewatering efforts may require well points rather than sump pits that are typically used, depending on the actual depth of installations. Sump pits generally are sufficient for drawdowns of 2 ft or less and well points are necessary for deeper drawdowns. Additional details can be provided upon request. Where backfill is needed, we recommend sand be used that is densified to a compaction level of at least 95% (ASTM D1557) that is placed per Appendix B guidelines.

Regarding rip-rap placement, some settlement should be anticipated due to the soft/very soft consistencies of the buried topsoil and underlying clay layers. We recommend that a geotextile filter fabric be placed between the rip-rap and underlying materials. A fabric can be recommended when details of construction are developed.

Excavation of the sand slopes above the water table are considered temporarily stable per OSHA requirements at a 1.5H:1V slope. They should be flattened to a 2.5H:1V slope for permanent slopes, or even flatter if to be mowed. Slopes below the water table would likely be adequate at a 5H:1V to 10H:1V angle, which are typical for shoreline environments.

Ms. Lisa Coleman
City of Madison Engineering Dept.

APPENDIX B

RECOMMENDED COMPACTED FILL SPECIFICATIONS

APPENDIX B

CGC, INC.

RECOMMENDED COMPACTED FILL SPECIFICATIONS

General Fill Materials

Proposed fill shall contain no vegetation, roots, topsoil, peat, ash, wood or any other non-soil material which by decomposition might cause settlement. Also, fill shall never be placed while frozen or on frozen surfaces. Rock, stone or broken concrete greater than 6 in. in the largest dimension shall not be placed within 10 ft of the building area. Fill used greater than 10 ft beyond the building limits shall not contain rock, boulders or concrete pieces greater than a 2 sq ft area and shall not be placed within the final 2 ft of finish subgrade or in designated utility construction areas. Fill containing rock, boulders or concrete pieces should include sufficient finer material to fill voids among the larger fragments.

Special Fill Materials

In certain cases, special fill materials may be required for specific purposes, such as stabilizing subgrades, backfilling undercut excavations or filling behind retaining walls. For reference, WisDOT gradation specifications for various types of granular fill are attached in Table 1.

Placement Method

The approved fill shall be placed, spread and leveled in layers generally not exceeding 10 in. in thickness before compaction. The fill shall be placed at moisture content capable of achieving the desired compaction level. For clay soils or granular soils containing an appreciable amount of cohesive fines, moisture conditioning will likely be required.

It is the Contractor's responsibility to provide all necessary compaction equipment and other grading equipment that may be required to attain the specified compaction. Hand-guided vibratory or tamping compactors will be required whenever fill is placed adjacent to walls, footings, columns or in confined areas.

Compaction Specifications

Maximum dry density and optimum moisture content of the fill soil shall be determined in accordance with modified Proctor methods (ASTM D1557). The recommended field compaction as a percentage of the maximum dry density is shown in Table 2. Note that these compaction guidelines would generally not apply to coarse gravel/stone fill. Instead, a method specification would apply (e.g., compact in thin lifts with a vibratory compactor until no further consolidation is evident).

Testing Procedures

Representative samples of proposed fill shall be submitted to CGC, Inc. for optimum moisture-maximum density determination (ASTM D1557) prior to the start of fill placement. The sample size should be approximately 50 lb.

CGC, Inc. shall be retained to perform field density tests to determine the level of compaction being achieved in the fill. The tests shall generally be conducted on each lift at the beginning of fill placement and at a frequency mutually agreed upon by the project team for the remainder of the project.

**Table 1
Gradation of Special Fill Materials**

Material	WisDOT Section 311	WisDOT Section 312	WisDOT Section 305			WisDOT Section 209		WisDOT Section 210
	Breaker Run	Select Crushed Material	3-in. Dense Graded Base	1 1/4-in. Dense Graded Base	3/4-in. Dense Graded Base	Grade 1 Granular Backfill	Grade 2 Granular Backfill	Structure Backfill
Sieve Size	Percent Passing by Weight							
6 in.	100							
5 in.		90-100						
3 in.			90-100					100
1 1/2 in.		20-50	60-85					
1 1/4 in.				95-100				
1 in.					100			
3/4 in.			40-65	70-93	95-100			
3/8 in.				42-80	50-90			
No. 4			15-40	25-63	35-70	100 (2)	100 (2)	25-100
No. 10		0-10	10-30	16-48	15-55	75 (2)		
No. 40			5-20	8-28	10-35	15 (2)	30 (2)	
No. 200			2-12	2-12	5-15	8 (2)	15 (2)	15 (2)

Notes:

1. Reference: Wisconsin Department of Transportation *Standard Specifications for Highway and Structure Construction*.
2. Percentage applies to the material passing the No. 4 sieve, not the entire sample.
3. Per WisDOT specifications, both breaker run and select crushed material can include concrete that is 'substantially free of steel, building materials and other deleterious material'.

**Table 2
Compaction Guidelines**

Area	Percent Compaction (1)	
	Clay/Silt	Sand/Gravel
<u>Within 10 ft of building lines</u>		
Footing bearing soils	93 - 95	95
Under floors, steps and walks		
- Lightly loaded floor slab	90	90
- Heavily loaded floor slab and thicker fill zones	92	95
<u>Beyond 10 ft of building lines</u>		
Under walks and pavements		
- Less than 2 ft below subgrade	92	95
- Greater than 2 ft below subgrade	90	90
Landscaping	85	90

Notes:

1. Based on Modified Proctor Dry Density (ASTM D 1557)

APPENDIX C
DOCUMENT QUALIFICATIONS

APPENDIX C DOCUMENT QUALIFICATIONS

I. GENERAL RECOMMENDATIONS/LIMITATIONS

CGC, Inc. should be provided the opportunity for a general review of the final design and specifications to confirm that earthwork and foundation requirements have been properly interpreted in the design and specifications. CGC should be retained to provide soil engineering services during excavation and subgrade preparation. This will allow us to observe that construction proceeds in compliance with the design concepts, specifications and recommendations, and also will allow design changes to be made in the event that subsurface conditions differ from those anticipated prior to the start of construction. CGC does not assume responsibility for compliance with the recommendations in this report unless we are retained to provide construction testing and observation services.

This report has been prepared in accordance with generally accepted soil and foundation engineering practices and no other warranties are expressed or implied. The opinions and recommendations submitted in this report are based on interpretation of the subsurface information revealed by the test borings indicated on the location plan. The report does not reflect potential variations in subsurface conditions between or beyond these borings. Therefore, variations in soil conditions can be expected between the boring locations and fluctuations of groundwater levels may occur with time. The nature and extent of the variations may not become evident until construction.

II. IMPORTANT INFORMATION ABOUT YOUR GEOTECHNICAL ENGINEERING REPORT

Geotechnical engineers structure their services to meet the specific needs of their clients. A geotechnical engineering study conducted for a civil engineer may not fulfill the needs of a construction contractor or even another civil engineer. Because each geotechnical engineering study is unique, each geotechnical engineering report is unique, prepared *solely* for the client. *No one except you* should rely on your geotechnical engineering report without first conferring with the geotechnical engineer who prepared it. *And no one - not even you* - should apply the report for any purpose or project except the one originally contemplated.

Serious problems have occurred because those relying on a geotechnical engineering report did not read it all. Do not rely on an executive summary. Do not read selected elements only.

A GEOTECHNICAL ENGINEERING REPORT IS BASED ON A UNIQUE SET OF PROJECT-SPECIFIC FACTORS

Geotechnical engineers consider a number of unique, project-specific factors when establishing the scope of a study. Typical factors include: the client's goals, objectives, and risk management preferences; the general nature of the structure involved, its size, and configuration; the location of the structure on the site; and other planned or existing site improvements, such as access roads, parking lots, and underground utilities. Unless the geotechnical engineer who conducted the study specifically indicates otherwise, *do not rely on a geotechnical engineering report* that was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific site explored, or
- completed before important project changes were made.

Typical changes that can erode the reliability of an existing geotechnical report include those that affect:

- the function of the proposed structure, as when it's changed from a parking garage to an office building, or from a light industrial plant to a refrigerated warehouse,
- elevation, configuration, location, orientation, or weight of the proposed structure,
- composition of the design team, or project ownership.

As a general rule, , *always* inform your geotechnical engineer of project changes - even minor ones - and request an assessment of their impact. *CGC cannot accept responsibility or liability for problems that occur because our reports do not consider developments of which we were not Informed.*

SUBSURFACE CONDITIONS CAN CHANGE

A geotechnical engineering report is based on conditions that existed at the time the study was performed. *Do not rely on a geotechnical engineering report* whose adequacy may have been affected by: the passage of time; by man-made events, such as construction on or adjacent to the site; or by natural events, such as floods, earthquakes, or groundwater fluctuations. *Always* contact the geotechnical engineer before applying the report to determine if it is still reliable. A minor amount of additional testing or analysis could prevent major problems.

MOST GEOTECHNICAL FINDINGS ARE PROFESSIONAL OPINION

Site exploration identifies subsurface conditions only at those points where surface tests are conducted or samples are taken. Geotechnical engineers review field and laboratory data and then apply their professional judgement to render an opinion about subsurface conditions throughout the site. Actual subsurface conditions may differ - sometimes significantly - from those indicated in your report. Retaining the geotechnical engineer who developed your report to provide construction observation is the most effective method of managing the risks associated with unanticipated conditions.

A REPORT'S RECOMMENDATIONS ARE NOT FINAL

Do not over-rely on the construction recommendations included in your report. *Those recommendations are not final*, because geotechnical engineers develop them principally from judgement and opinion, geotechnical engineers can finalize their recommendations only by observing actual subsurface conditions revealed during construction. *CGC cannot assume responsibility or liability for the report's recommendations if we do not perform construction observation.*

A GEOTECHNICAL ENGINEERING REPORT IS SUBJECT TO MISINTERPRETATION

Other design team members' misinterpretation of geotechnical engineering reports has resulted in costly problems. Lower that risk by having your geotechnical engineer confer with appropriate members of the design team after submitting the report. Also retain your geotechnical engineer to review pertinent elements of the design team's plans and specifications. Contractors can also misinterpret a geotechnical engineering report. Reduce that risk by having CGC participate in prebid and preconstruction conferences, and by providing construction observation.

DO NOT REDRAW THE ENGINEER'S LOGS

Geotechnical engineers prepare final boring and testing logs based upon their interpretation of field logs and laboratory data. To prevent errors or omissions, the logs included in a geotechnical engineering report should *never* be redrawn for inclusion in architectural or other design drawings. Only photographic or electronic reproduction is acceptable, *but recognize that separating logs from the report can elevate risk.*

GIVE CONTRACTORS A COMPLETE REPORT AND GUIDANCE

Some owners and design professionals mistakenly believe they can make contractors liable for unanticipated subsurface conditions by limiting what they provide for bid preparation. To help prevent costly problems, give contractors the complete geotechnical engineering report, *but* preface it with a clearly written letter of transmittal. In that letter, advise contractors that the report was not prepared for purposes of bid development and that the report's accuracy is limited; encourage them to confer with the geotechnical engineer who prepared the report (a modest fee may be required) and/or to conduct additional study to obtain the specific types of information they need or prefer. A prebid conference can also be valuable. *Be sure contractors have sufficient time* to perform additional study. Only then might you be in a position to give contractors the best information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions.

READ RESPONSIBILITY PROVISIONS CLOSELY

Some clients, design professionals, and contractors do not recognize that geotechnical engineering is far less exact than other engineering disciplines. This lack of understanding has created unrealistic expectations that have led to disappointments, claims, and disputes. To help reduce such risks, geotechnical engineers commonly include a variety of explanatory provisions in their reports. Sometimes

labeled "limitations," many of these provisions indicate where geotechnical engineer's responsibilities begin and end, to help others recognize their own responsibilities and risks. Read these provisions closely. Ask questions. Your geotechnical engineer should respond fully and frankly.

GEOENVIRONMENTAL CONCERNS ARE NOT COVERED

The equipment, techniques, and personnel used to perform a *geoenvironmental* study differ significantly from those used to perform a *geotechnical* study. For that reason, a geotechnical engineering report does not usually relate any geoenvironmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated environmental problems have led to numerous project failures.* If you have not yet obtained your own geoenvironmental information, ask your geotechnical consultant for risk management guidance. *Do not rely on an environmental report prepared for someone else.*

OBTAIN PROFESSIONAL ASSISTANCE TO DEAL WITH MOLD

Diverse strategies can be applied during building design, construction, operation, and maintenance to prevent significant amounts of mold from growing on indoor surfaces. To be effective, all such strategies should be devised for the *express purpose* of mold prevention, integrated into a comprehensive plan, and executed with diligent oversight by a professional mold prevention consultant. Because just a small amount of water or moisture can lead to the development of severe mold infestations, a number of mold prevention strategies focus on keeping building surfaces dry. While groundwater, water infiltration, and similar issues may have been addressed as part of the geotechnical engineering study whose findings are conveyed in this report, the geotechnical engineer in charge of this project is not a mold prevention consultant; *none of the services performed in connection with the geotechnical engineer's study were designed or conducted for the purpose of mold prevention.* *Proper implementation of the recommendations conveyed in this report will not of itself be sufficient to prevent mold from growing in or on the structure involved.*

RELY ON YOUR GEOTECHNICAL ENGINEER FOR ADDITIONAL ASSISTANCE

Membership in ASFE exposes geotechnical engineers to a wide array of risk management techniques that can be of genuine benefit for everyone involved with a construction project. Confer with CGC, a member of ASFE, for more information.

SECTION E: PROPOSAL

**BURROWS PARK SHORELINE
CONTRACT NO. 6833**

Bidder must state a Unit Price and Total Bid for each item. The Total Bid for each item must be the product of quantity, by Unit Price. The Grand Total must be the sum of the Total Bids for the various items. In case of multiplication errors or addition errors, the Grand Total with corrected multiplication and/or addition shall determine the Grand Total bid for each contract. The Unit Price and Total Bid must be entered numerically in the spaces provided. All words and numbers shall be written in ink.

1. The undersigned having familiarized himself/herself with the Contract documents, including Advertisement for Bids, Instructions to Bidders, Form of Proposal, City of Madison Standard Specifications for Public Works Construction - 2012 Edition thereto, Form of Agreement, Form of Bond, and Addenda issued and attached to the plans and specifications on file in the office of the City Engineer, hereby proposes to provide and furnish all the labor, materials, tools, and expendable equipment necessary to perform and complete in a workmanlike manner the specified construction on this project for the City of Madison; all in accordance with the plans and specifications as prepared by the City Engineer, including Addenda to the Contract Nos. _____ through _____ issued thereto, at the prices for said work as contained in this proposal.
2. If awarded the Contract, we will initiate action within seven (7) days after notification or in accordance with the date specified in the contract to begin work and will proceed with diligence to bring the project to full completion within the number of work days allowed in the Contract or by the calendar date stated in the Contract.
3. The undersigned Bidder or Contractor certifies that he/she is not a party to any contract, combination in form of trust or otherwise, or conspiracy in restraint of trade or commerce or any other violation of the anti-trust laws of the State of Wisconsin or of the United States, with respect to this bid or contract or otherwise.
4. Accompanying this Proposal is Bid Bond or Certified Check in the amount of _____ Dollars (\$ _____) or a Certificate of Biennial Bid Bond as required by the Advertisement for Bids.
(IF BID BOND IS USED, IT SHALL BE SUBMITTED ON THE FORMS PROVIDED BY THE CITY. FAILURE TO DO SO MAY RESULT IN REJECTION OF THE BID).
5. I hereby certify that all statements herein are made on behalf of _____
(name of corporation, partnership, or person submitting bid)
a corporation organized and existing under the laws of the State of _____ a
partnership consisting of _____; an individual trading as _____; of
the City of _____; State of _____; that I have examined and carefully prepared this
Proposal, from the plans and specifications and have checked the same in detail before submitting
this Proposal; that I have fully authority to make such statements and submit this Proposal in (its,
their) behalf; and that the said statements are true and correct.

SIGNATURE

TITLE, IF ANY

Sworn and subscribed to before me this
_____ day of _____, 20_____

Disclosure of Ownership

Notice required under Section 15.04(1)(m), Wisconsin Statutes. The statutory authority for the use of this form is prescribed in Sections 66.0903(12)(d) and 103.49(7)(d), Wisconsin Statutes. The use of this form is mandatory. The penalty for failing to complete this form is prescribed in Section 103.005(12), Wisconsin Statutes. Personal information you provide may be used for secondary purposes.

- (1) On the date a contractor submits a bid to or completes negotiations with a state agency or local governmental unit, on a project subject to Section 66.0903 or 103.49, Wisconsin Statutes, the contractor shall disclose to such state agency or local governmental unit the name of any "other construction business", which the contractor, or a shareholder, officer or partner of the contractor, owns or has owned within the preceding three (3) years.
- (2) The term "other construction business" means any business engaged in the erection, construction, remodeling, repairing, demolition, altering or painting and decorating of buildings, structures or facilities. It also means any business engaged in supplying mineral aggregate, or hauling excavated material or spoil as provided by Sections 66.0903(3), 103.49(2) and 103.50(2), Wisconsin Statutes.
- (3) This form must ONLY be filed, with the state agency or local governmental unit that will be awarding the contract, if **both (A) and (B) are met.**
 - (A) The contractor, or a shareholder, officer or partner of the contractor:
 - (1) Owns at least a 25% interest in the "other construction business", indicated below, on the date the contractor submits a bid or completes negotiations.
 - (2) Or has owned at least a 25% interest in the "other construction business" at any time within the preceding three (3) years.
 - (B) The Wisconsin Department of Workforce Development (DWD) has determined that the "other construction business" has failed to pay the prevailing wage rate or time and one-half the required hourly basic rate of pay, for hours worked in excess of the prevailing hours of labor, to any employee at any time within the preceding three (3) years.

Best Value Contracting

1. The Contractor shall indicate the non-apprenticeable trades used on this contract.

2. Some Contractors are exempt due to the size of the work force. Apprenticeable trades are those trades considered apprenticeable by the State of Wisconsin.

Check Here if the Contractor has a total skilled work force of four or less individuals in all apprenticeable trades combined. This contractor is exempt from Best Value Contracting.

3. The Contractor shall indicate on page E-4 which apprenticeable trades are to be used on this Contract and shall indicate by checking the appropriate box for the trades used, how the contractor will comply with Madison General Ordinance 33.07(7).

Legend

Number of Journeyworkers	The Contractor shall indicated for trades to be used on this Contract only, the number of journeyworkers that the Contractor has employed company wide.
W-ATT	The Contractor is an active trade trainer in the State of Wisconsin for the trade indicated.
US-ATT	The Contractor is an active trade trainer in an apprenticeship program approved by the U.S. Department of Labor or another state apprenticeship agency in the trade indicated.
SB-ATT	The Contractor shall become an active trade trainer prior to beginning work on the Contract in the trade indicated.

The Contractor has reviewed the list on page E-4 and shall not use any apprenticeable trades on this project.

The Contractor has reviewed this list on E-4 and has checked the appropriate box by each apprenticeable trade to be used on the project.

**BURROWS PARK SHORELINE
CONTRACT NO. 6833**

Apprenticeable Trades

Check the box in the column "Trade Used on This Project" for each apprenticeable trades used on this project. For those trades used on the project indicated the number of journeyworkers that are employed company wide and check a box to the right of the trade as to how the Contractor will comply MGO 33.07(7). Refer to the legend on page E-3 for the meaning associated with each heading. The Contractor must check one of the boxes on the right for each apprenticeable trade used and checked on the left.

SECTION F: BID BOND

KNOW ALL MEN BY THESE PRESENT, THAT _____
(a corporation of the State of _____) (individual), (partnership), hereinafter referred to as the "Principal") and _____, a corporation of the State of _____ (hereinafter referred to as the "Surety") and licensed to do business in the State of Wisconsin, are held and firmly bound unto the City of Madison, (hereinafter referred to as the "Obligee"), in the sum of five per cent (5%) of the amount of the total bid or bids of the Principal herein accepted by the Obligee, for the payment of which the Principal and the Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

The conditions of this obligation are such that, whereas the Principal has submitted, to the City of Madison a certain bid, including the related alternate, and substitute bids attached hereto and hereby made a part hereof, to enter into a contract in writing for the construction of:

BURROWS PARK SHORELINE CONTRACT NO. 6833

1. If said bid is rejected by the Obligee, then this obligation shall be void.
2. If said bid is accepted by the Obligee and the Principal shall execute and deliver a contract in the form specified by the Obligee (properly completed in accordance with said bid) and shall furnish a bond for his/her faithful performance of said contract, and for the payment of all persons performing labor or furnishing materials in connection therewith, and shall in all other respects perform the agreement created by the acceptance of said bid, then this obligation shall be void.

If said bid is accepted by the Obligee and the Principal shall fail to execute and deliver the contract and the performance and payment bond noted in 2. above executed by this Surety, or other Surety approved by the City of Madison, all within the time specified or any extension thereof, the Principal and Surety agree jointly and severally to forfeit to the Obligee as liquidated damages the sum mentioned above, it being understood that the liability of the Surety for any and all claims hereunder shall in no event exceed the sum of this obligation as stated, and it is further understood that the Principal and Surety reserve the right to recover from the Obligee that portion of the forfeited sum which exceed the actual liquidated damages incurred by the Obligee.

The Surety, for value received, hereby stipulates and agrees that the obligations of said Surety and its bond shall be in no way impaired or affected by an extension of the time within which the Obligee may accept such bid, and said Surety does hereby waive notice of any such extension.

IN WITNESS WHEREOF, the Principal and the Surety have hereunto set their hands and seals, and such of them as are corporations have caused their corporate seals to be hereto affixed and these presents to be signed by their proper officers, on the day and year set forth below.

SECTION G: AGREEMENT

THIS AGREEMENT made this _____ day of _____ in the year Two Thousand and Twelve between _____ hereinafter called the Contractor, and the City of Madison, Wisconsin, hereinafter called the City.

WHEREAS, the Common Council of the said City of Madison under the provisions of a resolution adopted _____, _____, and by virtue of authority vested in the said Council, has awarded to the Contractor the work of performing certain construction.

NOW, THEREFORE, the Contractor and the City, for the consideration hereinafter named, agree as follows:

1. **Scope of Work.** The Contractor shall, perform the construction, execution and completion of the following listed complete work or improvement in full compliance with the Plans, Specifications, Standard Specifications, Supplemental Specifications, Special Provisions and contract; perform all items of work covered or stipulated in the proposal; perform all altered or extra work; and shall furnish, unless otherwise provided in the contract, all materials, implements, machinery, equipment, tools, supplies, transportation, and labor necessary to the prosecution and completion of the work or improvements:

BURROWS PARK SHORELINE CONTRACT NO. 6833

2. **Completion Date/Contract Time.** Construction work must begin within seven (7) calendar days after the date appearing on mailed written notice to do so shall have been sent to the Contractor and shall be carried on at a rate so as to secure full completion SEE SPECIAL PROVISIONS, the rate of progress and the time of completion being essential conditions of this Agreement.
3. **Contract Price.** The City shall pay to the Contractor at the times, in the manner and on the conditions set forth in said specifications, the sum of _____ (\$ _____) Dollars being the amount bid by such Contractor and which was awarded to him/her as provided by law.
4. **Wage Rates for Employees of Public Works Contractors**

General and Authorization. The Contractor shall compensate its employees at the prevailing wage rate in accordance with section 66.0903, Wis. Stats., DWD 290 of the Wisconsin Administrative Code and as hereinafter provided.

“Public Works” shall include building or work involving the erection, construction, remodeling, repairing or demolition of buildings, parking lots, highways, streets, bridges, sidewalks, street lighting, traffic signals, sanitary sewers, water mains and appurtenances, storm sewers, and the grading and landscaping of public lands.

“Building or work” includes construction activity as distinguished from manufacturing, furnishing of materials, or servicing and maintenance work, except for the delivery of mineral aggregate such as sand, gravel, bituminous asphaltic concrete or stone which is incorporated into the work under contract with the City by depositing the material directly in final place from transporting vehicle.

“Erection, construction, remodeling, repairing” means all types of work done on a particular building or work at the site thereof in the construction or development of the project, including without limitation, erecting, construction, remodeling, repairing, altering, painting, and decorating, the transporting of materials and supplies to or from the building or work done by the employees of the Contractor, Subcontractor, or Agent thereof, and the manufacturing or furnishing of materials, articles, supplies or equipment on the site of the building or work, by persons employed by the Contractor, Subcontractor, or Agent thereof.

“Employees working on the project” means laborers, workers, and mechanics employed directly upon the site of work.

“Laborers, Workers, and Mechanics” include preapprentices, helpers, trainees, learners and properly registered and indentured apprentices but exclude clerical, supervisory, and other personnel not performing manual labor.

Establishment of Wage Rates. The Department of Public Works shall periodically obtain a current schedule of prevailing wage rates from DWD. The schedule shall be used to establish the City of Madison Prevailing Wage Rate Schedule for Public Works Construction (prevailing wage rate). The Department of Public Works may include known increases to the prevailing wage rate which can be documented and are to occur on a future specific date. The prevailing wage rate shall be included in public works contracts subsequently negotiated or solicited by the City. Except for known increases contained within the schedule, the prevailing wage rate shall not change during the contract. The approved wage rate is attached hereto.

Workforce Profile. The Contractor shall, at the time of signature of the contract, notify the City Engineer in writing of the names and classifications of all the employees of the Contractor, Subcontractors, and Agents proposed for the work. In the alternative, the Contractor shall submit in writing the classifications of all the employees of the Contractor, Subcontractors and Agents and the total number of hours estimated in each classification for the work. This workforce profile(s) shall be reviewed by the City Engineer who may, within ten (10) days, object to the workforce profile(s) as not being reflective of that which would be required for the work. The Contractor may request that the workforce profile, or a portion of the workforce profile, be submitted after the signature of the contract but at least ten (10) days prior to the work commencing. Any costs or time loss resulting from modifications to the workforce profile as a result of the City Engineer’s objections shall be the responsibility of the Contractor.

Payrolls and Records. The Contractor shall keep weekly payroll records setting forth the name, address, telephone number, classification, wage rate and fringe benefit package of all the employees who work on the contract, including the employees of the Contractor’s subcontractors and agents. Such weekly payroll records must include the required information for all City contracts and all other contracts on which the employee worked during the week in which the employee worked on the contract. The Contractor shall also keep records of the individual time each employee worked on the project and for each day of the project. Such records shall also set forth the total number of hours of overtime credited to each such employee for each day and week and the amount of overtime pay received in that week. The records shall set forth the full weekly wages earned by each employee and the actual hourly wage paid to the employee.

The Contractor shall submit the weekly payroll records, including the records of the Contractor’s subcontractors and agents, to the City Engineer for every week that work is being done on the contract. The submittal shall be within twenty-one (21) calendar days of the end of the Contractor’s weekly pay period.

Employees shall receive the full amounts accrued at the time of the payment, computed at rates not less than those stated in the prevailing wage rate and each employee's rate shall be determined by the work that is done within the trade or occupation classification which should be properly assigned to the employee.

An employee's classification shall not be changed to a classification of a lesser rate during the contract. If, during the term of the contract, an employee works in a higher pay classification than the one which was previously properly assigned to the employee, then that employee shall be considered to be in the higher pay classification for the balance of the contract, receive the appropriate higher rate of pay, and she/he shall not receive a lesser rate during the balance of the contract. For purposes of clarification, it is noted that there is a distinct difference between working in a different classification with higher pay and doing work within a classification that has varying rates of pay which are determined by the type of work that is done within the classification. For example, the classification "Operating Engineer" provides for different rates of pay for various classes of work and the Employer shall compensate an employee classified as an "Operating Engineer" based on the highest class of work that is done in one day. Therefore, an "Operating Engineer's" rate may vary on a day to day basis depending on the type of work that is done, but it will never be less than the base rate of an "Operating Engineer". Also, as a matter of clarification, it is recognized that an employee may work in a higher paying classification merely by chance and without prior intention, calculation or design. If such is the case and the performance of the work is truly incidental and the occurrence is infrequent, inconsequential and does not serve to undermine the single classification principle herein, then it may not be required that the employee be considered to be in the higher pay classification and receive the higher rate of pay for the duration of the contract. However, the Contractor is not precluded or prevented from paying the higher rate for the limited time that an employee performs work that is outside of the employee's proper classification.

Questions regarding an employee's classification, rate of pay or rate of pay within a classification, shall be resolved by reference to the established practice that predominates in the industry and on which the trade or occupation rate/classification is based. Rate of pay and classification disputes shall be resolved by relying upon practices established by collective bargaining agreements and guidelines used in such determination by appropriate recognized trade unions operating within the City of Madison.

The Contractor, its Subcontractors and Agents shall submit to interrogation regarding compliance with the provisions of this ordinance.

Mulcting of the employees by the Contractor, Subcontractor, and Agents on Public Works contracts, such as by kickbacks or other devices, is prohibited. The normal rate of wage of the employees of the Contractor, Subcontractor, and Agents shall not be reduced or otherwise diminished as a result of payment of the prevailing wage rate on a public works contract.

Hourly contributions. Hourly contributions shall be determined in accordance with the prevailing wage rate and with DWD. 290.01(10), Wis. Admin. Code.

Apprentices and Subjourneypersons. Apprentices and subjourneypersons performing work on the project shall be compensated in accordance with the prevailing wage rate and with DWD 290.02, and 290.025, respectively, Wis. Admin. Code.

Straight Time Wages. The Contractor may pay straight time wages as determined by the prevailing wage rate and DWD 290.04, Wis. Admin. Code.

Overtime Wages. The Contractor shall pay overtime wages as required by the prevailing wage rate and DWD 290.05, Wis. Admin. Code.

Posting of Wage Rates and Hours. A clearly legible copy of the prevailing wage rate, together with the provisions of Sec. 66.0903(10)(a) and (11)(a), Wis. Stats., shall be kept posted in at least one conspicuous and easily accessible place at the project site by the Contractor and such notice shall remain posted during the full time any laborers, workers or mechanics are employed on the contract.

Evidence of Compliance by Contractor. Upon completion of the contract, the Contractor shall file with the Department of Public Works an affidavit stating:

- a. That the Contractor has complied fully with the provisions and requirements of Sec. 66.0903(3), Wis. Stats., and Chapter DWD 290, Wis. Admin. Code; the Contractor has received evidence of compliance from each of the agents and subcontractors; and the names and addresses of all of the subcontractors and agents who worked on the contract.
- b. That full and accurate records have been kept, which clearly indicate the name and trade or occupation of every laborer, worker or mechanic employed by the Contractor in connection with work on the project. The records shall show the number of hours worked by each employee and the actual wages paid therefor; where these records will be kept and the name, address and telephone number of the person who will be responsible for keeping them. The records shall be retained and made available for a period of at least three (3) years following the completion of the project of public works and shall not be removed without prior notification to the municipality.

Evidence of Compliance by Agent and Subcontractor. Each agent and subcontractor shall file with the Contractor, upon completion of their portion of the work on the contract an affidavit stating that all the provisions of Sec. 66.0903(3), Wis. Stats., have been fully complied with and that full and accurate records have been kept, which clearly indicate the name and trade or occupation of every laborer, worker or mechanic employed by the Contractor in connection with work on the project. The records shall show the number of hours worked by each employee and the actual wages paid therefor; where these records shall be kept and the name, address and telephone number of the person who shall be responsible for keeping them. The records shall be retained and made available for a period of at least three (3) years following the completion of the project of public works and shall not be removed without prior notification to the municipality.

Failure to Comply with the Prevailing Wage Rate. If the Contractor fails to comply with the prevailing wage rate, she/he shall be in default on the contract.

5. **Affirmative Action.** In the performance of the services under this Agreement the Contractor agrees not to discriminate against any employee or applicant because of race, religion, marital status, age, color, sex, disability, national origin or ancestry, income level or source of income, arrest record or conviction record, less than honorable discharge, physical appearance, sexual orientation, political beliefs, or student status. The Contractor further agrees not to discriminate against any subcontractor or person who offers to subcontract on this contract because of race, religion, color, age, disability, sex or national origin.

The Contractor agrees that within thirty (30) days after the effective date of this agreement, the Contractor will provide to the City Affirmative Action Division certain workforce utilization statistics, using a form to be furnished by the City.

If the contract is still in effect, or if the City enters into a new agreement with the Contractor, within one year after the date on which the form was required to be provided, the Contractor will provide updated workforce information using a second form, also to be furnished by the City. The second form will be submitted to the City Affirmative Action Division no later than one year after the date on which the first form was required to be provided.

The Contractor further agrees that, for at least twelve (12) months after the effective date of this contract, it will notify the City Affirmative Action Division of each of its job openings at facilities in Dane County for which applicants not already employees of the Contractor are to be considered. The notice will include a job description, classification, qualifications and application procedures and deadlines. The Contractor agrees to interview and consider candidates referred by the Affirmative Action Division if the candidate meets the minimum qualification standards established by the Contractor, and if the referral is timely. A referral is timely if it is received by the Contractor on or before the date started in the notice.

Articles of Agreement

Article I

The Contractor shall take affirmative action in accordance with the provisions of this contract to insure that applicants are employed, and that employees are treated during employment without regard to race, religion, color, age, marital status, disability, sex or national origin and that the employer shall provide harassment free work environment for the realization of the potential of each employee. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation and selection for training including apprenticeship insofar as it is within the control of the Contractor. The Contractor agrees to post in conspicuous places available to employees and applicants notices to be provided by the City setting out the provisions of the nondiscrimination clauses in this contract.

Article II

The Contractor shall in all solicitations or advertisements for employees placed by or on behalf of the Contractors state that all qualified or qualifiable applicants will be employed without regard to race, religion, color, age, marital status, disability, sex or national origin.

Article III

The Contractor shall send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding a notice to be provided by the City advising the labor union or worker's representative of the Contractor's equal employment opportunity and affirmative action commitments. Such notices shall be posted in conspicuous places available to employees and applicants for employment.

Article V

The Contractor agrees that it will comply with all provisions of the Affirmative Action Ordinance of the City of Madison, including the contract compliance requirements. The Contractor agrees to submit the model affirmative action plan for public works contractors in a form approved by the Director of Affirmative Action.

Article VI

The Contractor will maintain records as required by Section 39.02(9)(f) of the Madison General Ordinances and will provide the City Affirmative Action Division with access to such records and to persons who have relevant and necessary information, as provided in Section 39.02(9)(f). The City agrees to keep all such records confidential, except to the extent that public inspection is required by law.

Article VII

In the event of the Contractor's or subcontractor's failure to comply with the Equal Employment Opportunity and Affirmative Action Provisions of this contract or Section 39.03 and 39.02 of the Madison General Ordinances, it is agreed that the City at its option may do any or all of the following:

1. Cancel, terminate or suspend this Contract in whole or in part.
2. Declare the Contractor ineligible for further City contracts until the Affirmative Action requirements are met.
3. Recover on behalf of the City from the prime Contractor 0.5 percent of the contract award price for each week that such party fails or refuses to comply, in the nature of liquidated damages, but not to exceed a total of five percent (5%) of the contract price, or five thousand dollars (\$5,000), whichever is less. Under public works contracts, if a subcontractor is in noncompliance, the City may recover liquidated damages from the prime Contractor in the manner described above. The preceding sentence shall not be construed to prohibit a prime Contractor from recovering the amount of such damage from the non-complying subcontractor.

Article VIII

The Contractor shall include the above provisions of this contract in every subcontract so that such provisions will be binding upon each subcontractor. The Contractor shall take such action with respect to any subcontractor as necessary to enforce such provisions, including sanctions provided for noncompliance.

Article IX

The Contractor shall allow the maximum feasible opportunity to small business enterprises to compete for any subcontracts entered into pursuant to this contract.

SECTION H: PAYMENT AND PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS, that we _____
as principal, and _____
Company of _____ as surety, are held and firmly bound unto the City of
Madison, Wisconsin, in the sum of _____ (\$_____) Dollars, lawful money of the
United States, for the payment of which sum to the City of Madison, we hereby bind ourselves and our
respective executors and administrators firmly by these presents.

The condition of this Bond is such that if the above bounden shall on his/her part fully and faithfully
perform all of the terms of the Contract entered into between him/herself and the City of Madison for the
construction of:

**BURROWS PARK SHORELINE
CONTRACT NO. 6833**

in Madison, Wisconsin, and shall pay all claims for labor performed and material furnished in the
prosecution of said work, and save the City harmless from all claims for damages because of negligence
in the prosecution of said work, and shall save harmless the said City from all claims for compensation
(under Chapter 102, Wisconsin Statutes) of employees and employees of subcontractor, then this Bond is
to be void, otherwise of full force, virtue and effect.

Signed and sealed this _____ day of _____,

MADISON, WI 53703

ADDITIONAL CONTACT:

NORMAN DAVIS, CONTRACT COMPLIANCE
CITY OF MADISON-DEPT OF CIVIL RTS-AA DIV
210 MARTIN L KING JR BLVD, RM 523
MADISON, WI 537033342

The department received an application for prevailing wage rate determination for the above-captioned project. The department conducted a survey to determine the prevailing wage rate for the trade(s) or occupation(s) needed to complete the project. The survey's findings appear in the attached project determination.

If you believe that the wage rate for any trade or occupation does not accurately reflect the prevailing wage rate in the city, village or town where the project is located, you may ask the department to conduct an administrative review of such wage rate. You must submit this request in writing within 30 days from the date indicated above. Additionally, your request must include wage rate information from at least three similar projects in the city, village or town where the proposed project is located and on which some work has been performed by the contested trade(s) during the current survey period and was previously considered by the department in issuing the attached determination. See DWD 290.10 of the Wisconsin Administrative Code and either s. 66.0903(3)(br), s. 66.0904(4)(e), or s. 103.49(3)(c), Stats., for a complete explanation of the administrative review process.

Enclosures

It is hereby ordered that the prevailing wage rates set forth in the attached project determination shall only be applicable to the above referenced project. This order is a **FINAL ORDER** of the department unless a timely request for an administrative review is filed with the department.

PREVAILING WAGE RATE DETERMINATION

Issued by the State of Wisconsin
Department of Workforce Development
Pursuant to s. 66.0903, Wis. Stats.
Issued On: 1/13/2012

DETERMINATION NUMBER: 201200105

EXPIRATION DATE: Prime Contracts MUST Be Awarded or Negotiated On Or Before 12/31/2012. If NOT, You MUST Reapply.

PROJECT NAME: ALL PUBLIC WORKS PROJECTS UNDER SEC 66.0903, STATS.-CITY OF MADISON

PROJECT LOCATION: MADISON CITY, DANE COUNTY, WI

CONTRACTING AGENCY: CITY OF MADISON-ENGINEERING

CLASSIFICATION:	Contractors are responsible for correctly classifying their workers. Either call the Department of Workforce Development (DWD) with trade or classification questions or consult DWD's Dictionary of Occupational Classifications & Work Descriptions on the DWD website at: dwd.wisconsin.gov/er/prevailing_wage_rate/Dictionary/dictionary_main.htm .
OVERTIME:	Time and one-half must be paid for all hours worked: <ul style="list-style-type: none">- over 10 hours per day on prevailing wage projects- over 40 hours per calendar week- Saturday and Sunday- on all of the following holidays: January 1; the last Monday in May; July 4; the 1st Monday in September; the 4th Thursday in November; December 25;- The day before if January 1, July 4 or December 25 falls on a Saturday;- The day following if January 1, July 4 or December 25 falls on a Sunday. Apply the time and one-half overtime calculation to whichever is higher between the Hourly Basic Rate listed on this project determination or the employee's regular hourly rate of pay. Add any applicable Premium or DOT Premium to the Hourly Basic Rate before calculating overtime. A DOT Premium (discussed below) may supersede this time and one-half requirement.
FUTURE INCREASE:	When a specific trade or occupation requires a future increase, you MUST add the full hourly increase to the "TOTAL" on the effective date(s) indicated for the specific trade or occupation.
PREMIUM PAY:	If indicated for a specific trade or occupation, the full amount of such pay MUST be added to the "HOURLY BASIC RATE OF PAY" indicated for such trade or occupation, whenever such pay is applicable.
DOT PREMIUM:	This premium only applies to highway and bridge projects owned by the Wisconsin Department of Transportation and to the project type heading "Airport Pavement or State Highway Construction." DO NOT apply the premium calculation under any other project type on this determination.
APPRENTICES:	Pay apprentices a percentage of the applicable journey person's hourly basic rate of pay and hourly fringe benefit contributions specified in this determination. Obtain the appropriate percentage from each apprentice's contract or indenture.
SUBJOURNEY:	Subjourney wage rates may be available for some of the trades or occupations indicated below with the exception of laborers, truck drivers and heavy equipment operators. Any employer interested in using a subjourney classification on this project MUST complete Form ERD-10880 and request the applicable wage rate from the Department of Workforce Development PRIOR to using the subjourney worker on this project.

This document **MUST BE POSTED** by the **CONTRACTING AGENCY** in at least one conspicuous and easily accessible place on **the site of the project**. A local governmental unit may post this document at the place normally used to post public notices if there is no common site on the project. This document **MUST** remain posted during the entire time any worker is employed on the project and **MUST** be physically incorporated into the specifications and all contracts and subcontracts. If you have any questions, please write to the Equal Rights Division, Labor Standards Bureau, P.O. Box 8928, Madison, Wisconsin 53708 or call (608) 266-6861.

The following statutory provisions apply to local governmental unit projects of public works and are set forth below pursuant to the requirements of s. 66.0903(8), Stats.

s. 66.0903 (1) (f) & s. 103.49 (1) (c) "PREVAILING HOURS OF LABOR" for any trade or occupation in any area means 10 hours per day and 40 hours per week and may not include any hours worked on a Saturday or Sunday or on any of the following holidays:

1. January 1.
2. The last Monday in May.
3. July 4.
4. The first Monday in September.
5. The 4th Thursday in November.
6. December 25.
7. The day before if January 1, July 4 or December 25 falls on a Saturday.
8. The day following if January 1, July 4 or December 25 falls on a Sunday.

s. 66.0903 (10) RECORDS; INSPECTION; ENFORCEMENT.

(a) Each contractor, subcontractor, or contractor's or subcontractor's agent performing work on a project of public works that is subject to this section shall keep full and accurate records clearly indicating the name and trade or occupation of every person performing the work described in sub. (4) and an accurate record of the number of hours worked by each of those persons and the actual wages paid for the hours worked.

s. 66.0903 (11) LIABILITY AND PENALTIES.

- (a) 1. Any contractor, subcontractor, or contractor's or subcontractor's agent who fails to pay the prevailing wage rate determined by the department under sub. (3) or who pays less than 1.5 times the hourly basic rate of pay for all hours worked in excess of the prevailing hours of labor is liable to any affected employee in the amount of his or her unpaid wages or his or her unpaid overtime compensation and in an additional amount as liquidated damages as provided under subd. 2., 3., whichever is applicable.
2. If the department determines upon inspection under sub. (10) (b) or (c) that a contractor, subcontractor, or contractor's or subcontractor's agent has failed to pay the prevailing wage rate determined by the department under sub. (3) or has paid less than 1.5 times the hourly basic rate of pay for all hours worked in excess of the prevailing hours of labor, the department shall order the contractor to pay to any affected employee the amount of his or her unpaid wages or his or her unpaid overtime compensation and an additional amount equal to 100 percent of the amount of those unpaid wages or that unpaid overtime compensation as liquidated damages within a period specified by the department in the order.
3. In addition to or in lieu of recovering the liability specified in subd. 1. as provided in subd. 2., any employee for and in behalf of that employee and other employees similarly situated may commence an action to recover that liability in any court of competent jurisdiction. If the court finds that a contractor, subcontractor, or contractor's or subcontractor's agent has failed to pay the prevailing wage rate determined by the department under sub. (3) or has paid less than 1.5 times the hourly basic rate of pay for all hours worked in excess of the prevailing hours of labor, the court shall order the contractor, subcontractor, or agent to pay to any affected employee the amount of his or her unpaid wages or his or her unpaid overtime compensation and an additional amount equal to 100 percent of the amount of those unpaid wages or that unpaid overtime compensation as liquidated damages.
5. No employee may be a party plaintiff to an action under subd. 3. unless the employee consents in writing to become a party and the consent is filed in the court in which the action is brought. Notwithstanding s. 814.04 (1), the court shall, in addition to any judgment awarded to the plaintiff, allow reasonable attorney fees and costs to be paid by the defendant.

BUILDING OR HEAVY CONSTRUCTION

Includes sheltered enclosures with walk-in access for the purpose of housing persons, employees, machinery, equipment or supplies and non-sheltered work such as canals, dams, dikes, reservoirs, storage tanks, etc. A sheltered enclosure need not be "habitable" in order to be considered a building. The installation of machinery and/or equipment, both above and below grade level, does not change a project's character as a building. On-site grading, utility work and landscaping are included within this definition. Residential buildings of four (4) stories or less, agricultural buildings, parking lots and driveways are NOT included within this definition.

RESIDENTIAL OR AGRICULTURAL CONSTRUCTION

Includes single family houses or apartment buildings of no more than four (4) stories in height and all buildings, structures or facilities that are primarily used for agricultural or farming purposes, excluding commercial buildings. For classification purposes, the exterior height of a residential building, in terms of stories, is the primary consideration. All incidental items such as site work, driveways, parking lots, private sidewalks, private septic systems or sewer and water laterals connected to a public system and swimming pools are included within this definition. Residential buildings of five (5) stories and above are NOT included within this definition.
