NOTICE OF ADDENDUM
ADDENDUM NO. 1
CONTRACT NO. 8625

LAKE MENDOTA DRIVE AND CAPITAL AVENUE ASSESSMENT DISTRICT - 2022

Revise and amend the contract document(s) for the above project as stated in this addendum, otherwise, the original document shall remain in effect.

SPECIFICATIONS:

REMOVE: SECTION 109.2 PROSECUTION OF WORK

ADD: SECTION 109.2 PROSECUTION OF WORK

The Contractor may begin work as early as **SEPTEMBER 6, 2022**. Work may only proceed after the contract is fully signed, all necessary permits are received to start work in the designated area, and the start work letter is issued. This contract includes variable completion dates depending on Contractor options, and it also includes an interim completion date as noted below.

No work may take place along the Lake Mendota Shoreline between March 15, 2023 and May 15, 2023, unless specifically authorized as part of the City's Chapter 30 permit for this project. Work along the Lake Mendota shoreline may only proceed once all applicable permits are received, which may not be until late Fall of 2022.

If the Contractor elects to complete the work along the Lake Mendota shoreline prior to March 15, 2023, then all work under this contract shall be completed by **JUNE 17, 2023**. If the Contractor elects to complete the work along the Lake Mendota shoreline after May 15, 2023, then all work shall be completed by **JULY 22, 2023**.

All work, except surface pavement, shall be completed on the portion of Lake Mendota Dr. from the westerly project limit, approximately Station 10+43, thru the intersection with Laurel Crest, approximately Station 16+75, by **November 5, 2022**. Temporary asphalt, paid under the appropriate bid item, shall be placed as directed by the Engineer to transition from the limits of work completed in 2022 to the existing pavement, and shall also be placed as directed to ramp any manholes, curb ramps, or other structures, as necessary. All planned tree clearing work shall also be completed by the date noted above. Grubbing work is only subject to overall completion date of the contract.

The Contractor may perform additional work beyond the limits of the interim completion area in 2022; any additional work will need to be restored either to the permanent binder layer of asphalt pavement, or the

Contractor shall install temporary pavement (match section defined in these special provisions), at their cost, in order to provide a safe, rideable, and maintainable surface over the winter.

ADD: BID ITEM 20236 – HEAVEY RIPRAP – GLACIAL FIELD STONE (UNDISTRIBUTED)

DESCRIPTION

This item shall be installed around the new outfall at Lake Mendota as necessary to meet the shoreline stabilization requirements of these plans, the standard specifications, and/or to meet the requirements defined as part of the City’s permitting for this project.

As noted on the plans, the intention of this project is to maintain the existing riprap along the Lake Mendota shoreline, and to remove, salvage, and reset the existing riprap as necessary around the new outfall, which is incidental to the installation of the storm sewer. If there is an inadequate amount of existing riprap to salvage and reset in order to properly stabilize the shoreline, this item shall be used to provide and install additional heavy riprap, as directed by the Engineer.

ADD: BID ITEM 20241 – RIPRAP FILTER FABRIC, TYPE HR (UNDISTRIBUTED)

DESCRIPTION

This item shall be used in any location where existing riprap is removed in order to complete the storm sewer installation, and shall be used regardless of if the riprap is salvaged and reused or if it is newly provided and installed.

ADD: BID ITEM 50227 – UTILITY TRENCH PATCH TYPE IV

DESCRIPTION

This bid item shall be used to pay for trench restoration on any existing gravel roads that may be disturbed by utility work during a time of year when permanent restoration cannot be completed due to weather conditions. Disturbance to streets that are currently paved shall be restored as indicated under the Prosecution of Work section.

This item may apply to locations of existing gravel roads that will either have a paved surface or a turf surface installed as part of this project. If weather conditions meet the standard specifications, the Contractor shall install permanent materials, paid under the appropriate bid items, and this item will not be paid. This item includes any additional excavation/removal necessary to remove this trench patch to install the permanent materials. The plan quantity of excavation cut and undercut will be paid per the standard specifications. Additional undercut required due to poorly compacted trench patch will not be paid.

ADD TO: ARTICLE 500 SEWER AND SEWER STRUCTURES GENERAL

STORM SEWER GENERAL

When noted on the plans, the Lake Mendota Summer Max Elevation is the Target Summer Max Elevation for the lake level. The actual water surface elevation can, and will likely, vary from this targeted summer max. No additional compensation will be provided for accommodating higher or lower lake levels than what is indicated on the plans, and the Contractor shall be prepared to work with a variety of different lake levels, especially given the schedule flexibility of this contract.

**ADD: BID ITEM 50501 – 4’X3’ PRECAST REINFORCED CONCRETE BOX CULVERT AND
BID ITEM 50502 – 6’X3’ PRECAST REINFORCED CONCRETE BOX CULVERT**

All work under these bid items shall be completed and paid per the standard specifications, except per the following. All bedding, including the required filter fabric, are included with these items. Select backfill, as required, will be paid under the appropriate bid item.

PROPOSAL:

Summary of changes to the bid items and quantities are summarized in the table below. Bidder’s shall reference the complete set of bid items found on Bid Express.

ACTION	ITEM NO.	DESCRIPTION	UNITS
ADD ITEM	20236	HEAVY RIPRAP – GLACIAL FIELD STONE (UNDISTRIBUTED)	TON
ADD ITEM	20241	RIPRAP FILTER FABRIC, TYPE HR (UNDISTRIBUTED)	S.Y.
ADD ITEM	50204	UNDERCUT FOR STORM SEWER	C.Y.
ADD ITEM	50227	UTILITY TRENCH PATCH TYPE IV	T.F.

Please acknowledge this addendum on page E1 of the contract documents and/or in Section E: Bidder’s Acknowledgement on Bid Express.

Electronic version of these documents can be found on the Bid Express web site at:
