NOTICE OF ADDENDUM
ADDENDUM NO. 2

CONTRACT NO. 9086
Metro Transit Hanson Rd Bus Facility Remodel

This addendum is issued to modify, explain or correct the original Drawings, Specifications, or Contract Documents marked as ***Metro Transit Hanson Rd Bus Facility Remodel, City of Madison Project 10950, Contract No. 9086, as issued on September 19, 2023, Addendum #1 as issued on September 28, 2023 and Addendum #2 as issued on October 17, 2023.*** The addenda are hereby made a part of the contract documents, represents clarifications of the previously released documents, consists of eleven (11) pages, and the referenced exhibits.

This addendum does not include a change to the bid due date.

Please acknowledge the addenda on page E1 of the contract documents and/or in Section E: Bidder's Acknowledgement on Bid Express.

An electronic version of these documents can be found on the Bid Express website at
https://www.infotechinc.com/bidexpress/

If you are unable to download the plan revisions associated with the addendum please contact the Engineering office at 608-266-4751 to receive the material by another route.

For questions regarding this bid, contact:

Jim Whitney
City of Madison Engineering
Phone: 608-266-4563
Email: jwhitney@cityofmadison.com

Sincerely,

James M. Wolfe, P.E., City Engineer

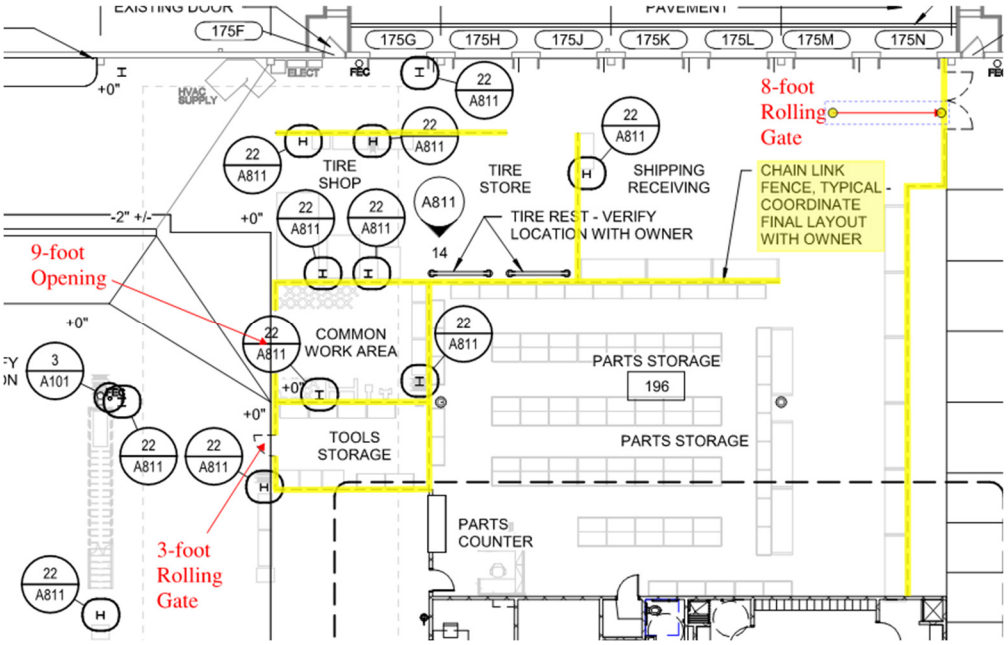
Cc: Greg Fries
Bryan Cooper

GENERAL CONTRACT CONDITIONS

1. No change.

GENERAL QUESTIONS/AMSWERS AND CLARIFICATIONS

1. Can you verify the fence highlighted attached is what is needed to be included in this bid?
    a. Response: The required fence, openings, and gates are highlighted below.



2. How tall does the fence need to be?
    a. Response: See below
3. Do posts need to be cored and set into the concrete floor, or can they be plate set with mechanical anchors?
    a. Response: Specification requires mounting into cored openings at concrete floor.
4. Please provide shop drawings/cut sheets of the New Flyer products which are being furnished and installed under separate contract.
    a. Response: Refer to attached charging equipment cutsheets for the depot chargers, mobil chargers, and pantograph charger for reference.
5. I have been unable to find where the Wash Bay Curtains from Section 10.14.43 are located on the plans.
    a. Response: Refer to sheet A201.
6. I have been unable to find the dimensions required for the curtains.
    a. Response: Refer to the specification and sheet A201. Bottom of curtain is approximately 11-feet above the finished floor.
7. Sheet D400 is not clear in elevations 1 thru 3 what area of the pre-cast wall panels get removed for install of new overhead doors. Please confirm what the hatching specifically at these elevations on the sheet denote as there does not appear to be a sheet legend.
    a. Refer to the revised elevations contained within the addendum.
8. Please confirm as it is not depicted on Sheet A400 or A401, if the existing accent color bands on the buildings are to be re-painted.
    a. Response: the elevations do not require the accent bands to be repainted. The addendum requires select areas of the storage building to be repainted due to selective demolition of items.
9. There is no work shown beyond the new VAV's, based on the demo on the preceding pages this area appears to get all new ductwork and HW piping, none of this work is shown on H101D, not sure if it's a layer issue or what but I think there's a fair amount of information missing from that sheet.
    a. This is being addressed and will be issued in another addendum.
10. Reference D101 – at the existing dock doors, "remove door, sill, seals and bumpers"…. Are the existing levelers being removed and infilled?
    a. Response: There are no levelers and therefore no pit to infill.

The photo above depicts what the building looks like after the sill, seal, and bumpers have been removed (threaded attachments remain as the removal was not complete). The steel, dock edge angle remains in the photo and as noted on the plans as it gets covered with metal flashing where the doors are infilled with metal panel or storefront.

The photo above depicts the sectional door hood and surround that are noted to be removed.

11. Is an equivalent dose of macrofibers in the concrete SOG an acceptable alternative to WWF reinforcement?
    a. Response: No
12. Who was the precaster for the original storage building?
    a. Response: The Con-Steel as-builts were provided in Addendum #1.
13. What is the crane rail elevation? How much clearance is between the crane rail and bottom of structure?
    a. Response: The crane should be as high as possible within the confines of the existing facility. Based on some preliminary measurements there is approximately 20-feet of clearance at the roof low point to accommodate the top of the crane. The buses are approximately12-feet high.
14. What are the retaining walls built from?
    a. Response: This is addressed in Addendum #2. The walls are block and sit on a concrete foundation. The guardrail has been eliminated.

15. Specification says dispensers are to be enamel coated steel. Does end user want stainless steel or painted dispensers?
    a. Response: Dispensers have been revised in the addendum.
16. Will there be a detail or specification on how the fuel piping is to enter the storage and maintenance building?
    a. Response: Refer to Vehicle Fueling System specification. Specifically 1.3(C) and (D).

17. What communication system will the customer want the fueling system to integrate with? (BAS, Modbus, stand alone?)
    a. Response: Refer to Vehicle Fueling System specification. Specifically 1.3(G) and (I).
18. Will there be a detail provided on what is desired for the future assemblies?
    a. Response: Accommodations for future assemblies should include rough-ins for all concealed and buried installations including sumps, catch basins, wash equipment, and the like. Future reels, dispensers, wash equipment, and the like will be provided by the Owner in the future but the concealed rough-ins should be in place to accommodate the installations without concrete removal.
19. Sheet C301 at the Maintenance Building fuel tank pad - should the 6" raised concrete pad be a 6" concrete curb at the perimeter of the 8" concrete slab?
    a. Response: The fuel island edging was removed from the metal fabrication specification. The vehicle fueling system specification requires a minimum of a 6-inch curb. The civil drawings indicate an 8" slab with a 6" curb. The installed condition should be an 8" slab as required by the civil documents with an exposed 6" high curb (2" of the slab is below the surface) with stainless steel edging at curb edge. The reinforcing shall be as indicated within the vehicle fueling specification and not as detailed on the civil sheets.

ACCEPTABLE EQUIVALENTS

1. No change.

SPECIFICATIONS

1. Add Section 08 91 19 Fixed Louvers (Specification section attached to Addendum).
2. Add Section 09 66 00 Terrazzo Shower Base (Specification section attached to Addendum).
3. Section 05 50 00 Metal Fabrications:
    a. Page 05 50 00-5
        i. Delete Section 2.12 Fuel Island Edging.
4. Delete Section 05 53 13 Guardrails
5. Section 08 41 13 Aluminum-Framed Storefronts:
    a. Page 08 41 13-2
        i. Delete Section 1.3(E)(4) Regional Materials.
6. Section 08 71 00 Door Hardware:
    a. Set 01, Set 04, Set 09, Set 11, Set 20, Set 31

i.	Add	1	EA	POWER SUPPLY	PS902		GRY	SCHLAGE
ii.	Add	1	EA	POSITION SWITCH		190-12	GRY	GRI

    b. Set 05, Set 29, 32, 36

i.	Add	1	EA	POWER SUPPLY	PS902		GRY	SCHLAGE
ii.	Add	1	EA	POSITION SWITCH		190-12	GRY	GRI

        iii. Add **GC TO RE-WORK FRAME AS REQUIRED FOR ELECTRIC STRIKE.
    c. Set 08

i.	Delete	3	EA	HINGE FILLERS	AS REQUIRED		652	DON-JO
ii.	Add	1	EA	PUSH	70C		630	ROCKWOOD
iii.	Add	1	EA	PULL	BF111 X 70C		630	ROCKWOOD
iv.	Add	1	EA	CLOSER	4040XP		689	LCN
v.	Add	1	EA	WALL STOP	409		630	ROCKWOOD
vi.	Add	1	EA	DOOR LOUVER				

    d. Add Set 08A

i.	Delete	3	EA	HINGE FILLERS	AS REQUIRED		652	DON-JO
ii.	Add	1	EA	PUSH	70C		630	ROCKWOOD
iii.	Add	1	EA	PULL	BF111 X 70C		630	ROCKWOOD
iv.	Add	1	EA	CLOSER	4040XP		689	LCN
v.	Add	1	EA	WALL STOP	409		630	ROCKWOOD

    e. Set 10

i.	Delete	1	EA	CLASSROOM LOCK	ND70BD X SPA		262	SCHLAGE
ii.	Add	1	EA	PASSAGE	ND10S X SPA		262	SCHLAGE

    f. Set 12
        i. Add **ALLOW 180 DEGREE SWING AT DOOR 177B
    g. Set 21

i.	Delete	1	EA	ELECT HINGE	AS SPECIFIED X TW8		630	IVES

ii. Delete 1 EA DOOR HARNESS CON-XX --- SCHLAGE
iii. Delete 1 EA HARN TO POWER CON-6W --- SCHLAGE
iv. Delete 1 EA ELECTRIC LOCK ND80BDEU X SPA 626 SCHLAGE
v. Delete **CARD READER/KEY PAD BY SECURITY SUPPLIER
vi. Delete OPERATION
vii. Add 1 EA STOREROOM LOCK ND80BD X SPA 262 SCHLAGE

h. Set 25
i. Delete 1 EA PUSH 70C 630 ROCKWOOD
ii. Delete 1 EA PULL BF111 X 70C 630 ROCKWOOD
iii. Add 1 EA PASSAGE ND10S X SPA 262 SCHLAGE

i. Add SET 37
i. Add 1 EA CORE AS REQUIRED 626 BEST
ii. Add 1 EA POSITION SWITCH 190-12 GRY GRI
iii. Add **BALANCE OF HARDWARE IS EXISTING TO REMAIN.

j. Add SET 38
i. Add 1 EA HINGES AS SPECIFIED 652 IVES
ii. Add 1 EA STOREROOM LOCK ND80BD X SPA 626 SCHLAGE
iii. Add 1 EA CORE AS REQUIRED 626 BEST
iv. Add 1 EA CLOSER 4040XP X SCUSH 689 LCN
v. Add 1 EA ELECT STRIKE 6211 630 VON DUPRIN
vi. Add 1 EA POWER SUPPLY PS902 GRY SCHLAGE
vii. Add 1 EA POSITION SWITCH 190-12 GRY GRI
viii. Add **CARD READER/KEYPAD BY SECURITY SUPPLIER.
ix. Add VALID CARD READ RELEASES ELECTRIC STRIKE TO ALLOW ENTRY. UPON LOSS OF POWER, ELECTRIC STRIKE TO REMAIN SECURED (FAIL SECURE). FREE EGRESS IS ALWAYS ALLOWED.

k. Add SET 39
i. Add 1 EA HINGES AS SPECIFIED 652 IVES
ii. Add 1 EA PRIVACY L9040 X 17A X L283-722 626 SCHLAGE
iii. Add 1 EA CLOSER 4040XP X SCUSH 689 LCN
iv. Add **PROVIDE STAINLESS STEEL HINGES AT DOOR 207.

7. Section 08 80 00 Glazing:
a. Page 08 80 00-5
i. Delete Section 2.8(I) Marker Board Standoff.

8. Section 09 30 13 Ceramic Tiling:
a. Page 09 30 13-3:
i. Revise lines 16-30
Porcelain Tile Type CT-1: Unglazed.
Manufacture: Daltile.
Product: Keystones.
Certification: Tile certified by the Porcelain Tile Certification Agency.
Face Size: 2 by 2 mosaic sheet of 12 x 24.
Thickness: 5/16 inch.
Pattern: Stacked bond
Tile Color: Desert Gray Speckle D200.
Grout Color: As selected by Architect from manufacturer's full range.
Precoat with temporary protective coating.
Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable and matching characteristics of adjoining flat tile. Provide shapes as follows, selected from manufacturer's standard shapes:
Built-up Cove Base: MB5B.
Inside and outside corners.
ii. Revise lines 31-45
Porcelain Tile Type CT-2: Unglazed.
Manufacture: Delconca.
Product: Essential.
Certification: Tile certified by the Porcelain Tile Certification Agency.
Face Size: 12 by 24.
Thickness: 5/16 inch.

Pattern: Running bond
Tile Color: Gray HET05.
Grout Color: As selected by Architect from manufacturer's full range.
Precoat with temporary protective coating.
Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable and matching characteristics of adjoining flat tile. Provide shapes as follows, selected from manufacturer's standard shapes:
Base: 4 x 12.

iii. Add line 46:
Porcelain Tile Type CT-4:
Manufacture: Ceramiche Campogalliano.
Distributor: Ceramic Tileworks
Style: Glassalike Block.
Tile Color: Blu
Finish: Glossy
Face Size: 4 x 12.
Thickness: 3/8 inch+.
Pattern: Stacked Bond.
Grout Color: As selected by Architect from manufacturer's full range.
Precoat with temporary protective coating.
Grout width: 1/8-inch.

9. Section 09 91 24 Interior Painting:
   a. Page 09 91 24-5:
      i. Revise Line 3: Epoxy-Modified Latex System MPI EXT 3.1G:
      ii. Revise Line 17: Epoxy-Modified Latex System MPI EXT 4.2J:
      iii. Revise Line 23: Epoxy-Modified Latex System MPI EXT 3.1G:
      iv. Revise Line 24: Prime Coat: Sherwin Williams Pro Industrial Pro-Cryl Universal Primer.
10. Section 10 14 43 Wash Bay Curtain and Track
   a. Page 08 41 13-1
      i. Add line 51: Material weight: 18 oz.
11. Section 10 21 13.19 Plastic Toilet Compartments:
   a. Page 10 21 13.19-2
      i. Delete Section 2.2(A) Recycled Content
      ii. Delete Section 2.2(B) Regional Materials.
12. Section 10 51 13 Metal Lockers
   a. Page 10 51 13-3
      i. Delete Section 2.3(J)(2) Recycled Contect.
      ii. Add line 8: Size: 12-inches wide x 18 inches deep.
      iii. Add line 9: Filler Panels: Fabricated from 0.048-inch nominal-thickness steel sheet.
      iv. Add Line 10:
      Finished End Panels: Fabricated from 0.024-inch nominal-thickness steel sheet to cover unused penetrations and fasteners, except for perimeter fasteners, at exposed ends of nonrecessed metal lockers; finished to match lockers.
13. Section 11 60 05 Vehicle fueling System
   a. Page 11 60 05-3
      i. Revise 2.2(B): Dispensers and Accessories: Heavy duty, <u>stainless steel</u>, digital, UL listed unit with cabinet, register with automatic hoses, swivels, and break away valves. Units shall have vertical rail features. Provide twin 20' (minimum) length hoses at each dispenser location.
14. Section 32 31 13 Chain Link Fencing and Gates (Interior):
   a. Page 32 31 13-1
      i. Add 2.2(A)(3): Fabric Height: 7’-0”.
      ii. Add 2.2(A)(4): Selvage: Knuckled at both selvages.
   b. Page 32 31 13-2
      i. Add 2.2(A)(3): Fabric Height: 7’-0” AFF.
      ii. Add 2.2(C)(1)(a)(vii): Latch: Permitting operation from both sides of gate with provision for padlocking accessible from both sides of gate.
      iii. Add 2.2(C)(1)(a)(vii): Lock: Owner provide padlock.
15. Add Section 28 46 21 Addressable Fire-Alarm System (Specification section attached to Addendum).

DRAWINGS

1. C200 Demolition Plan
   A. Revise pavement removal and sawcut area around proposed transformer location.
   B. Add curb removal called out in proposed stair location.
2. C300 Overall Site Plan
   A. Revise pavement area around proposed transformer location.
   B. Revise callout for proposed camera pole.
   C. Revise bus charger station location and layout.
3. C301 East Building Detailed Site Plan
   A. Revise callout for proposed transformer.
   B. Revise Callouts for bus charger.
   C. Revise dimensioning labels.
4. C501 Details
   A. Add detail for camera pole concrete base.

5. D201 Demolition Reflected Ceiling Plan – Storage Building
   A. Revise existing ceiling to be removed from ACT to gypsum board.
   B. Add note to remove gyp bd ceiling – retain framing.
   C. Delete note to remove card reader. Door is scheduled to receive a card reader. Coordinate with data plans.
6. D400 Demolition Elevations - Maintenance Building
   A. Detail 1 – East elevation
      1. Revise note regarding removal of egress / emergency lighting.
      2. Add metal wall panel removal for door opening.
   B. Detail 2 – West elevation
      1. Revise note regarding removal of egress / emergency lighting.
   C. Detail 3 – North elevation
      1. Revise note regarding removal of egress / emergency lighting.
   D. Detail 4 – South elevation
      1. Revise note regarding removal of egress / emergency lighting.
   E. Demolition Legend
      1. Add Legend
7. D401 Demolition Elevations - Storage Building
   A. Detail 1 – East elevation
      1. Add notes regarding removal of egress / emergency lighting.
      2. Add note regarding removal of sectional door hood and surround.
   B. Detail 2 – West elevation
      1. Revise note regarding removal of egress / emergency lighting.
      2. Add notes regarding sectional door panel replacement.
   C. Detail 3 – North elevation
      1. Revise note regarding removal of egress / emergency lighting.
      2. Add precast removal for louver opening.
      3. Add note regarding existing FDC and alarm.
      4. Add door removal graphic.
      5. Add note regarding sectional door panel replacement.
      6. Add note regarding metal door and frame removal.
   D. Detail 5 – South elevation
      1. Add notes regarding removal of egress / emergency lighting.
      2. Add notes regarding removal of building lighting.
      3. Add note regarding removal of sectional door hood and surround.
      4. Add note regarding retaining a sectional door, sill, and associated seals and accessories.
   E. Demolition Legend
      1. Add Legend
8. A201 Reflected Ceiling Plan – Storage Building
   A. Revise Womens 266 and Mens 267 from ACT ceilings to Gyp Bd ceilings.
   B. Revise Water 299 from OTS to Gyp Bd ceiling.
   C. Add detail 8/A601 reference to Water 299.
   D. Revise PVC ceiling height.
   E. Add note to Wash Bay curtain indicating curtain height.

9. A202 Enlarged Ceiling Plans
    A. Revise Womens 266 and Mens 267 from ACT ceilings to Gyp Bd ceilings.
    B. Add note to reframe existing joists to accommodate 2x2 light fixtures.
    C. Revise Water 299 from OTS to Gyp Bd ceiling.
    D. Add detail 8/A601 reference to Water 299.
10. A400 Elevations - Maintenance Building
    A. Detail 1 – East elevation
        1. Revise note regarding high speed door.
        2. Add glazing panels to high speed door.
        3. Add hose bibbs.
        4. Revise FA Device note.
        5. Delete louver and note.
    B. Detail 2 – West elevation
        1. Revise note regarding egress / emergency lighting.
        2. Add note regarding building lighting.
        3. Add hose bibbs.
    C. Detail 3 – North elevation
        1. Revise note regarding egress / emergency lighting.
        2. Add note regarding building lighting.
    D. Detail 4 – South elevation
        1. Revise note regarding high speed door.
        2. Revise louver note.
        3. Add glazing panels to high speed doors
        4. Revise note regarding egress / emergency lighting.
        5. Add note regarding Fire Protection test header location.
        6. Revise door and frame notation.
    E. Elevation Legend
        1. Add Legend
11. A401 Elevations – Storage Building
    A. Detail 1 - East elevation
        1. Add note to paint wall below canopy.
        2. Revise glazing notes.
        3. Revise note regarding building lighting.
        4. Add glazing panels to high speed door.
        5. Add high speed door control buttons / status lights
        6. Add hose bibbs.
        7. Add building light
    B. Detail 2 – West elevation
        1. Revise detail number.
        2. Revise building lighting note.
        3. Add sectional door panel replacement notes.
    C. Detail 3 – North elevation
        1. Revise detail number.
        2. Revise building lighting notes.
        3. Add sectional door panel replacement notes.
        4. Add Fire Protection test header note.
    D. Detail 4 – South elevation
        1. Revise detail number.
        2. Add note to paint wall
        3. Revise glazing notes.
        4. Revise building lighting notes.
    E. Elevation Legend
        1. Add Legend

12. A601 Door Schedule & Wall Types
    A. Door and Frame Schedule – Maintenance Building:
        1. Delete doors 140B, 140E, 175G, 175H, 175J, 175K, 175L, 175M, and 175N from door schedule and add general note underneath schedule.
        2. Revise door type for doors 100, 160, 161, and 177C.
        3. Revise door material, door finish, and frame finish for doors 100, 175A, 175D, and 177A.
        4. Revise frame type, jamb detail, head detail, and remarks for doors 160 and 161.
        5. Revise label for door 176.
        6. Remove remarks for door 178B.
    B. Door and Frame Schedule – Storage Building:
        1. Remove doors 200E, 200J, 200L, 200N, 200Q, 200T, 200U, and 200V from door schedule and add general note underneath schedule.
        2. Revise door type for doors 200W, 210C, 259A, 266, 267, 293, 294, and 299.
        3. Revise door material, door finish, and frame finish for doors 200K, 200M, 200W, 250A, and 274.
        4. Revise door height for doors 204, 211, and 300.
        5. Revise frame type, jamb detail, head detail, and remarks for doors 200W, 266, 267, 293, 294, and 299.
        6. Revise threshold detail for door 200W.
        7. Revise label for door 299.
        8. Revise hardware for doors 200W, 285B, and 299.
    C. Frame Types: Revise frame type number from 3 to E.
    D. Add detail 8
13. A701 Interior Finishes & Schedules
    A. Finish Schedule – Maintenance Building:
        1. Delete base from rooms 176, 177, 178, 195, and 196.
        2. Revise floor and base finish for room 184.
        3. Revise base finish for rooms 186, 187, 188, and 189.
    B. Finish Schedule – Storage Building:
        1. Delete flooring from room 202.
        2. Delete base from rooms 201, 202, 203, 204, 205, 206, 210, 211, and 264.
        3. Add wall finish and revise remarks for room 201.
        4. Revise floor and base finish for rooms 207 and 208.
        5. Revise base finish for room 263.
    C. Finish Key:
        1. Revise style for CG-1.
        2. Revise CPT-1:
            - Add distributor, delete style, revise product number, and revise color.
        3. Delete style for RB-1.
        4. Delete CTB-1.
14. A702 Interior Finish Plans
    A. Detail 1:
        1. Add base extents for maintenance/building & grounds walls.
    B. Detail 3:
        1. Revise view extents.
        2. Add paint and base extents for bus storage wall.
    C. Detail 4:
        1. Revise view extents.
        2. Add paint callout for plan east wall.
        3. Note extents to paint all exposed items which are not stainless steel PT-1.
15. A801 Interior elevations
    A. Detail 17:
        1. Add base section callout.
        2. Revise base finish callout.
    B. Detail 18:
        1. Add base section callout.
        2. Revise base finish callout.

16. A802 Interior Elevations
    A. Detail 4:
        1. Remove base and add CT-4 wall finish callout.
    B. Detail 5:
        1. Add base section callout.
        2. Revise base finish callout.
    C. Detail 6:
        1. Add base section callout.
        2. Revise base finish callout.
    D. Detail 7:
        1. Remove base and add CT-4 wall finish callout.
    E. Detail 8:
        1. Add base section callout.
        2. Revise base finish callout.
17. A812 Interior Details:
    A. Detail 1:
        1. Revise tile base section and profile.
    B. Detail 2:
        1. Revise tile base section and profile.
    C. Detail 14:
        1. Revise concrete removal extents in Change 186.
18. F100 First Floor Plan Maintenance Building Fire Protection, revise the following:
    A. Add heads under precast lid in Battery 178, Fluids/Compressor 177, & Fire Pump 176.
    B. Relocated and added sidewalls sprinkler heads under garage doors to provide protection under obstructions that are greater than 4'-0" in width.
    C. Added heads above Office 181, Electrical Shop 182, Mechanical 195, Toilet 184, Comfort 183, Corridor 180, Change 187, Change 186, Locker 185, Change 188, and Change 189 as area above ceiling is open to adjacent warehouse.
19. F101 First Floor Plan Storage Building Fire Protection, revise the following:
    A. Show proper location of Fire Department Connection, located outside Office 271.
    B. Added Ordinary Hazard Group 1 classification for Mechanical Room located above Driver Locker 260 and Bus Storage 200.
    C. Added concealed pendants in Lounge 257 and Kitchenette 258. Also added note identifying above and below protection is required.
    D. Added concealed pendants in ceilings in Office 206, Toilet 207, Bus Storage 200, Toilet 208, & Break 209. Also added uprights above rooms as area above ceiling is open to adjacent warehouse.
    E. Removed sidewall sprinkler heads under garage door that does not meet the 4'-0" wide obstruction requirement.
20. E001 Notes, Symbols, Abbreviations & Sheet Index, revise the following:
    A. Revise plan and notes as indicated.
21. ED100A Lighting Demo Plan – 3829 Maint. Bldg. – Section A, revise the following:
    A. Revise plan and notes as indicated.
22. ED100B Lighting Demo Plan – 3829 Maint. Bldg. – Section B, revise the following:
    A. Revise plan and notes as indicated.
23. ED200A Power Demo Plan – 3829 Maint. Bldg. – Section A, revise the following:
    A. Revise plan and notes as indicated.
24. ED200B Power Demo Plan – 3829 Maint. Bldg. – Section B, revise the following:
    A. Revise plan and notes as indicated.
25. ED300 Existing Panel Schedules – 3829 Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
26. E100A Lighting New Work Plan – 3829 Maint. Bldg. – Section A, revise the following:
    A. Revise plan and notes as indicated.
27. E100B Lighting New Work Plan – 3829 Maint. Bldg. – Section B, revise the following:
    A. Revise plan and notes as indicated.
28. E100C Lighting New Work Plan – 3829 Maint. Bldg. – Enlarged Plans, revise the following:
    A. Revise plan and notes as indicated.
29. E200A Power New Work Plan – 3829 Maint. Bldg. – Section A, revise the following:
    A. Revise plan and notes as indicated.
30. E200B Power New Work Plan – 3829 Maint. Bldg. – Section B, revise the following:
    A. Revise plan and notes as indicated.

31. E200C Power New Work Enlarged Plans – Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
32. E200D Power New Work Enlarged Plans – Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
33. E200E Power New Work Enlarged Plans – Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
34. E300A Existing Revised Panel Schedules – 3829 Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
35. E300B New Panel Schedules – 3829 Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
36. E400 One Line Diagram – 3829 Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
37. E500A Fire Alarm New Work – 3829 Maint. Bldg. – Section A, revise the following:
    A. Revise plan and notes as indicated.
38. E500B Fire Alarm New Work – 3829 Maint. Bldg. – Section B, revise the following:
    A. Revise plan and notes as indicated.
39. E501A Fire Alarm New Work – 3901 Storage Bldg. – Section A, revise the following:
    A. Revise plan and notes as indicated.
40. E501B Fire Alarm New Work – 3901 Storage Bldg. – Section B, revise the following:
    A. Revise plan and notes as indicated.
41. E501C Fire Alarm New Work – 3901 Storage Bldg. – Section C, revise the following:
    A. Revise plan and notes as indicated.
42. E501D Fire Alarm New Work – 3901 Storage Bldg. – Section D, revise the following:
    A. Revise plan and notes as indicated.
43. E600 Motor and Equipment Schedules – 3829 Maint. Bldg., revise the following:
    A. Revise plan and notes as indicated.
44. Q001, NOTES, SYMBOLS, AND ABREVIATIONS revise the following:
    A. Added note identifying outside camera locations – referenced sheet Q601.
45. QD100, BUILDING 3829 DEMOLITION PLAN revise the following:
    A. Added note to IT Closet E to refer to Sheet Q103 for Demo Information.
46. Q100, OVERALL BUILDING 3829 PLAN revise the following:
    A. Moved data cable locations in the Bay to better reflect location in relation to Bollards and Columns.
47. Q101, OFFICE AREA BUILDING 3829 PLAN revise the following:
    A. Added 2 Data to room 177.
    B. Added Card Reader to room 176.
48. Q200, OVERALL BUILDING 3901 PLAN revise the following:
    A. Added 3 data to fueling stations.
49. Q201, OFFICE AREA BUILDING 3901 PLAN revise the following:
    A. Added Key Pad Notes – referenced Sheet Q601.
    B. Added 1 Data location to room 204.
50. Q601, SCHEDULES - CARD ACCESS AND CAMERA revise the following:
    A. Revised Card Access Schedule

PROPOSAL

1. No change.

End of Contract 9086 Addendum No. 2

Page Intentionally Left Blank

SECTION 08 91 19
FIXED LOUVERS

PART 1 – GENERAL

1.1 SUMMARY

A. Fixed extruded-aluminum louvers.

B. Blank-off panels for louvers

1.2 DEFINITIONS

A. Louver Terminology: Definitions of terms for metal louvers contained in AMCA 501 apply to this Section unless otherwise defined in this Section or in referenced standards.

B. Horizontal Louver: Louver with horizontal blades (i.e., the axis of the blades are horizontal).

C. Vertical Louver: Louver with vertical blades (i.e., the axis of the blades are vertical).

D. Drainable-Blade Louver: Louver with blades having gutters that collect water and drain it to channels in jambs and mullions, which carry it to bottom of unit and away from opening.

E. Wind-Driven-Rain-Resistant Louver: Louver that provides specified wind-driven-rain performance, as determined by testing in accordance with AMCA 500-L.

F. Windborne-Debris-Impact-Resistant Louver: Louver that provides specified windborne-debris-impact resistance, as determined by testing in accordance with AMCA 540.

1.3 SUBMITTALS

A. Product Data: For each type of product.

1. For louvers specified to bear AMCA seal, include printed catalog pages showing specified models with appropriate AMCA Certified Ratings Seals.

B. Sustainable Design Submittals:

C. Shop Drawings: For louvers and accessories. Include plans, elevations, sections, details, and attachments to other work. Show frame profiles and blade profiles, angles, and spacing.

1. Show weep paths, gaskets, flashings, sealants, and other means of preventing water intrusion.
2. Show mullion profiles and locations.

D. Samples: For each type of metal finish required.

1.4 FIELD CONDITIONS

A. Field Measurements: Verify actual dimensions of openings by field measurements before fabrication.

1.5 WARRANTY

A. Special Finish Warranty, Anodized Finishes: Standard form in which manufacturer agrees to repair finishes or replace aluminum that shows evidence of deterioration of anodized finishes within specified warranty period.

1. Deterioration includes, but is not limited to, the following:
   a. Color fading more than 5 Delta E units when tested in accordance with ASTM D2244.
   b. Chalking in excess of a No. 8 rating when tested in accordance with ASTM D4214.

c. Cracking, peeling, or chipping.

2. Warranty Period: Five years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Source Limitations: Obtain fixed louvers from single source from a single manufacturer where indicated to be of same type, design, or factory-applied color finish.

2.2 PERFORMANCE REQUIREMENTS

A. Structural Performance: Louvers withstand the effects of gravity loads and the following loads and stresses within limits and under conditions indicated without permanent deformation of louver components, noise or metal fatigue caused by louver-blade rattle or flutter, or permanent damage to fasteners and anchors. Wind pressures are considered to act normal to the face of the building.

1. Wind Loads:

a. Determine loads based on pressures as indicated on Drawings.

B. Louver Performance Ratings: Provide louvers complying with requirements specified, as demonstrated by testing manufacturer's stock units identical to those provided, except for length and width in accordance with AMCA 500-L.

C. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

1. Temperature Change (Range): 120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces.

D. SMACNA Standard: Comply with recommendations in SMACNA's "Architectural Sheet Metal Manual" for fabrication, construction details, and installation procedures.

2.3 FIXED EXTRUDED-ALUMINUM LOUVERS

A. Horizontal Drainable-Blade Louver, Extruded Aluminum:

1. Louver Depth: 4 inches unless 6 inches is required to meet performance requirements.
2. Frame and Blade Nominal Thickness: Not less than 0.060 inch for blades and 0.080 for frames.
3. Mullion Type: Exposed.
4. Louver Performance Ratings:

a. Free Area: Not less than 7.5 sq. ft. (0.70 sq. m) for 48-inch- wide by 48-inch- high louver.

b. Point of Beginning Water Penetration: Not less than 900 fpm.

5. AMCA Seal: Mark units with AMCA Certified Ratings Seal.

2.4 LOUVER SCREENS

A. General: Provide screen at each exterior louver.

1. Screen Location for Fixed Louvers: Interior face.
2. Screening Type: Bird screening

B. Secure screen frames to louver frames with stainless steel machine screws, spaced a maximum of 6 inches (150 mm) from each corner and at 16 inches o.c.

C. Louver Screen Frames: Fabricate with mitered corners to louver sizes indicated.

1. Metal: Same type and form of metal as indicated for louver to which screens are attached.
2. Finish: Mill finish unless otherwise indicated.
3. Type: Non-rewirable, U-shaped frames.

D. Louver Screening for Aluminum Louvers:

1. Bird Screening, Flattened, Expanded Aluminum: 3/4 by 0.050 inch (19 by 1.27 mm) thick.

2.5 BLANK-OFF PANELS

A. Insulated Blank-Off Panels: Laminated panels consisting of an insulating core surfaced on back and front with metal sheets and attached to back of louver.

1. Thickness: 2 inches (50 mm).
2. Metal Facing Sheets, Aluminum: Not less than 0.032-inch (0.81-mm) nominal thickness.
3. Insulating Core: extruded-polystyrene foam.
4. Edge Treatment: Trim perimeter edges of blank-off panels with louver manufacturer's standard with corners mitered and with same finish as panels.
5. Seal perimeter joints between panel faces and louver frames with gaskets or sealant.
6. Panel Finish: Same finish applied to louvers but black color.
7. Attach blank-off panels with sheet metal screws.

2.6 MATERIALS

A. Aluminum Extrusions: ASTM B221 (ASTM B221M), Alloy 6063-T5, T-52, or T6.

B. Aluminum Sheet: ASTM B209 (ASTM B209M), Alloy 3003 or 5005, with temper as required for forming, or as otherwise recommended by metal producer for required finish.

C. Fasteners: Use types and sizes to suit unit installation conditions.

1. Use screws for exposed fasteners unless otherwise indicated.
2. For fastening aluminum, use aluminum or 300 series stainless steel fasteners.

D. Postinstalled Fasteners for Concrete and Masonry: Torque-controlled expansion anchors, fabricated from stainless steel components, with allowable load or strength design capacities calculated in accordance with ICC-ES AC193 and ACI 318 greater than or equal to the design load, as determined by testing in accordance with ASTM E488/E488M conducted by a qualified testing agency.

E. Bituminous Paint: Cold-applied asphalt emulsion complying with ASTM D1187/D1187M.

2.7 FABRICATION

A. Factory assemble louvers to minimize field splicing and assembly. Disassemble units as necessary for shipping and handling limitations. Clearly mark units for reassembly and coordinated installation.

B. Vertical Assemblies: Where height of louver units exceeds fabrication and handling limitations, fabricate units to permit field-bolted assembly with close-fitting joints in jambs and mullions, reinforced with splice plates.

1. Continuous Vertical Assemblies: Fabricate units without interrupting blade-spacing pattern.

C. Maintain equal louver blade spacing to produce uniform appearance.

D. Fabricate frames, including integral sills, to fit in openings of sizes indicated, with allowances made for fabrication and installation tolerances, adjoining material tolerances, and perimeter sealant joints.

1. Frame Type: Extruded Channel type flange unless otherwise indicated.

E. Include supports, anchorages, and accessories required for complete assembly.

F. Provide subsills made of same material as louvers for recessed louvers.

G. Join frame members to each other and to fixed louver blades with fillet welds concealed from view, threaded fasteners, or both, as standard with louver manufacturer unless otherwise indicated or size of louver assembly makes bolted connections between frame members necessary.

2.8 ALUMINUM FINISHES

A. Finish louvers after assembly.

B. Clear Anodic Finish: AAMA 611, AA-M12C22A41, Class I, 0.018 mm or thicker.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and openings, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Coordinate setting drawings, diagrams, templates, instructions, and directions for installation of anchorages that are to be embedded in concrete or masonry construction. Coordinate delivery of such items to Project site.

3.3 INSTALLATION

A. Locate and place louvers level, plumb, and at indicated alignment with adjacent work.

B. Use concealed anchorages where possible. Provide brass or lead washers fitted to screws where required to protect metal surfaces and to make a weathertight connection.

C. Form closely fitted joints with exposed connections accurately located and secured.

D. Provide perimeter reveals and openings of uniform width for sealants and joint fillers, as indicated.

E. Protect unpainted galvanized- and nonferrous-metal surfaces that are in contact with concrete, masonry, or dissimilar metals from corrosion and galvanic action by applying a heavy coating of bituminous paint or by separating surfaces with waterproof gaskets or nonmetallic flashing.

F. Install concealed gaskets, flashings, joint fillers, and insulation as louver installation progresses, where weathertight louver joints are required. Comply with Section 079200 "Joint Sealants" for sealants applied during louver installation.

3.4 ADJUSTING AND CLEANING

A. Clean exposed louver surfaces that are not protected by temporary covering, to remove fingerprints and soil during construction period. Do not let soil accumulate during construction period.

B. Before final inspection, clean exposed surfaces with water and a mild soap or detergent not harmful to finishes. Thoroughly rinse surfaces and dry.

C. Restore louvers damaged during installation and construction, so no evidence remains of corrective work. If results of restoration are unsuccessful, as determined by Architect, remove damaged units and replace with new units.

END OF SECTION

Page Intentionally Left Blank

SECTION 09 66 00
TERRAZZO SHOWER BASES

PART 1 – GENERAL

1.1 SUMMARY

A. Section Includes:
1. Shower Basins
2. Grout.

1.2 SUBMITTALS

A. Product Data: For each type of product.
1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for showers **basins**.
2. Include rated capacities, operating characteristics, and furnished specialties and accessories.

A. Maintenance Data: For shower valves to include in maintenance manuals.

PART 2 - PRODUCTS

2.1 SHOWER BASINS

A. Precast-Terrazzo Shower Basins:
1. Basis-of-Design Product: Subject to compliance with requirements, provide Acorn Engineering; Morris Group International, model **SBADA and SBS** or comparable product by one of the following:
a. Florestone Products Co., Inc.
b. Stern-Williams Co., Inc.
2. Source Limitations: Obtain shower basins from single source from single manufacturer.
3. Description: Precast-terrazzo base for built-up-type shower fixture.
4. Standard:
a. CSA B45.8/IAPMO Z403.
b. IAPMO PS 99.
c. 2010 ADA Standards for Accessible Design.
5. Threshold Type: **Standard commercial and Handicapped/accessible**.
6. Shape: **Square** and **Square, ADA for roll-in**.
7. Nominal Size:
a. Square: **36 by 36 in.**
b. Square, ADA for Roll-In: 37 1/2 by 39 in.
8. Color: Selected from manufacturer's standard color selection.
9. Outlet: Coordinate with plumbing contractor.
10. Tiling Flange: Integral, stainless steel.
a. Square fixture: **Three sides**.

2.2 GROUT

A. Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.
B. Characteristics: Nonshrink; recommended for interior and exterior applications.
C. Design Mix: 5000 psi (34.5 MPa), 28-day compressive strength.
D. Packaging: Premixed and factory packaged.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine rough-in of water-supply and sanitary drainage and vent piping systems to verify actual locations of piping connections before shower installation.

B. Examine walls and floors for suitable conditions where showers will be installed.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Assemble shower components in accordance with manufacturers' written instructions.

B. Install showers level and plumb.

C. Set **shower basins** in leveling bed of cement grout.

D. Seal joints between showers and floors and walls using sanitary-type, one-part, mildew-resistant silicone sealant. Match sealant color to fixture color. Comply with sealant requirements specified in Section 079200 "Joint Sealants."

3.3 PIPING CONNECTIONS

A. Connect fixtures with piping. Use size fittings required to match fixtures.

B. Comply with traps and soil and waste piping requirements specified in Section 221316 "Sanitary Waste and Vent Piping."

3.4 ADJUSTING

A. Operate and adjust showers and controls. Replace damaged and malfunctioning showers, fittings, and controls.

B. Adjust water pressure at shower valves to produce proper flow.

3.5 CLEANING AND PROTECTION

A. After completing installation of showers **basins**, inspect and repair damaged finishes.

B. Clean shower **basins**, shower valves, and other fittings with manufacturers' recommended cleaning methods and materials.

C. Provide protective covering for installed fixtures and fittings.

D. Do not allow use of showers **basins** for temporary facilities unless approved in writing by Owner.

END OF SECTION

SECTION 28 46 21
ADDRESSABLE FIRE-ALARM SYSTEMS

PART 1 - GENERAL

SUMMARY

Section Includes:

Addressable fire-alarm system.
Fire-alarm control unit (FACP).
Manual fire-alarm boxes.
System smoke detectors.
Duct smoke detectors.
Carbon monoxide detectors.
Heat detectors.
Fire-alarm notification appliances.
Fire-alarm remote annunciators.
Fire-alarm addressable interface devices.

Related Requirements:

Section 26 05 19 “Low- Voltage Electrical Power Conductors and Cables” or section 26 05 23 ”Control Voltage Electrical Power Cables” for cables and conductors for fire-alarm systems.

DEFINITIONS

DACT: Digital alarm communicator transmitter.
FACP: Fire-alarm control unit.
Voltage Class: For specified circuits and equipment, voltage classes are defined as follows:

Control Voltage: Listed and labeled for use in remote-control, signaling, and power-limited circuits supplied by a Class 2 or Class 3 power supply having rated output not greater than 150 V and 5 A, allowing use of alternate wiring methods complying with NFPA 70, Article 725.

Low Voltage: Listed and labeled for use in circuits supplied by a Class 1 or other power supply having rated output not greater than 1000 V, requiring use of wiring methods complying with NFPA 70, Article 300, Part I.

SEQUENCING AND SCHEDULING

Existing Fire-Alarm Equipment: Maintain existing equipment fully operational until new equipment has been tested and accepted. When new equipment is installed, label it "NOT IN SERVICE" until it is accepted. Remove labels from new equipment when put into service, and label existing fire-alarm equipment "NOT IN SERVICE" until removed from building.

Equipment Removal: After acceptance of new fire-alarm system, remove existing disconnected fire-alarm equipment and wiring.

SUBMITTALS

Product Data: For each type of product, including furnished operations and accessories.

Include construction details, material descriptions, dimensions, profiles, and finishes.

Include rated capacities, operating characteristics, and electrical characteristics.

Shop Drawings: For fire-alarm system.

Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field
assembly, components, and locations. Indicate conductor sizes, indicate termination locations and requirements,

and distinguish between factory and field wiring.

Detail assembly and support requirements.

Include voltage drop calculations for notification-appliance circuits.

Include battery-size calculations.

Include input/output matrix.

Include written statement from manufacturer that equipment and components have been tested as a system and comply with requirements in this Section and in NFPA 72.

Include performance parameters and installation details for each detector.

Verify that each duct detector is listed for complete range of air velocity, temperature, and humidity possible when air-handling system is operating.

Provide control wiring diagrams for fire-alarm interface to HVAC; coordinate location of duct smoke detectors and access to them.

Show critical dimensions that relate to placement and support of sampling tubes, detector housing, and remote status and alarm indicators.

Show field wiring and equipment required for HVAC unit shutdown on alarm.

Locate detectors in accordance with manufacturer's written instructions.

Include floor plans to indicate final outlet locations showing address of each addressable device. Show size and route of cable and conduits and point-to-point wiring diagrams

Delegated Design Submittal: For notification appliances and smoke and heat detectors, in addition to submittals listed above, indicate compliance with performance requirements and design criteria, including analysis data signed and sealed by qualified professional engineer responsible for their preparation.

Drawings showing location of each notification appliance and smoke and heat detector, ratings of each, and installation details as needed to comply with listing conditions of device.

Design Calculations: Calculate requirements for selecting spacing and sensitivity of detection, complying with NFPA 72. Calculate spacing and intensities for strobe signals and sound-pressure levels for audible appliances.

Indicate audible appliances required to produce square wave signal per NFPA 72.

CLOSEOUT SUBMITTALS

Operation and Maintenance Data: For fire-alarm systems and components to include in emergency, operation, and maintenance manuals.

In addition to items specified in Division 1, include the following and deliver copies to authorities having jurisdiction:

Comply with "Records" section of "Inspection, Testing and Maintenance" chapter in NFPA 72.

Provide "Fire-Alarm and Emergency Communications System Record of Completion Documents" in accordance with "Completion Documents" Article in "Documentation" section of "Fundamentals" chapter in NFPA 72.

Complete wiring diagrams showing connections between devices and equipment. Each conductor must be numbered at every junction point with indication of origination and termination points.

Riser diagram.

Device addresses.

Air-sampling system sample port locations and modeling program report showing layout meets performance criteria.

Record copy of site-specific software.

Provide "Inspection and Testing Form" in accordance with "Inspection, Testing and Maintenance" chapter in NFPA 72, and include the following:

Equipment tested.
Frequency of testing of installed components.
Frequency of inspection of installed components.
Requirements and recommendations related to results of maintenance.
Manufacturer's user training manuals.

Manufacturer's required maintenance related to system warranty requirements.

Abbreviated operating instructions for mounting at FACP and each annunciator unit.

MAINTENANCE MATERIAL SUBMITTALS

Extra Stock Material: Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

Lamps for Remote Indicating Lamp Units: Quantity equal to 10 percent of amount installed, but no fewer than one unit.

Lamps for Strobe Units: Quantity equal to 10 percent of amount installed, but no fewer than one unit.

Smoke Detectors, Fire Detectors: Quantity equal to 10 percent of amount of each type installed, but no fewer than one unit of each type.

Detector Bases: Quantity equal to two percent of amount of each type installed, but no fewer than one unit of each type.

Keys and Tools: One extra set for access to locked or tamperproof components.

Audible and Visual Notification Appliances: One of each type installed.

Fuses: Two of each type installed in system. Provide in box or cabinet with compartments marked with fuse types and sizes.

WARRANTY

Special Warranty: Manufacturer agrees to repair or replace fire-alarm system equipment and components that fail because of defects in materials or workmanship within specified warranty period.

Warranty Period: Five years from date of Substantial Completion.

PART 2-PRODUCTS

ADDRESSABLE FIRE-ALARM SYSTEM

Description:

Noncoded, UL-certified addressable system, with multiplexed signal transmission and horn-and-strobe notification for evacuation.

Performance Criteria:

Regulatory Requirements:

Fire-Alarm Components, Devices, and Accessories: Listed and labeled by a NRTL in accordance with NFPA 70 for use with selected fire-alarm system and marked for intended location and application.

General Characteristics:

Automatic sensitivity control of certain smoke detectors.

Fire-alarm signal initiation must be by one or more of the following devices and systems:

- Manual stations.
- Heat detectors.
- Smoke detectors.
- Duct smoke detectors.
- Carbon monoxide detectors.
- Automatic sprinkler system water flow.
- Fire-extinguishing system operation.
- Fire standpipe system.
- Fire pump running.

.

Fire-alarm signal must initiate the following actions:

- Continuously operate alarm notification appliances.
- Identify alarm and specific initiating device at FACP and remote annunciators.
- Unlock electric door locks in designated egress paths.
- Release fire and smoke doors held open by magnetic door holders.
- Activate voice/alarm communication system.
- Record events in system memory.
- Indicate device in alarm on graphic annunciator.

.

Supervisory signal initiation must be by one or more of the following devices and actions:

- Valve supervisory switch.
- Independent fire-detection and -suppression systems.
- Fire pump is running.
- Fire pump has lost power.
- Power to fire pump has phase reversal.
- Zones or individual devices have been disabled.
- FACP has lost communication with network.

System trouble signal initiation must be by one or more of the following devices and actions:

Open circuits, shorts, and grounds in designated circuits.

Opening, tampering with, or removing alarm-initiating and supervisory signal-initiating devices.

Loss of communication with addressable sensor, input module, relay, control module, remote annunciator, printer interface, or Ethernet module.

Loss of primary power at FACP.

Ground or single break in internal circuits of FACP.

Abnormal ac voltage at FACP.

Break in standby battery circuitry.

Failure of battery charging.

Abnormal position of switch at FACP or annunciator.

Voice signal amplifier failure.

System Supervisory Signal Actions:

Identify specific device initiating event at FACP and remote annunciators.
Transmit system status to building management system.
Display system status on graphic annunciator.

Network Communications:

Provide network communications for fire-alarm system in accordance with fire-alarm manufacturer's written instructions.
Provide network communications pathway per manufacturer's written instructions and requirements in NFPA 72 and NFPA 70.

Document Storage Box:

Description: Enclosure to accommodate standard 8-1/2-by-11 inch manuals and loose document records. Legend sheet will be permanently attached to door for system required documentation, key contacts, and system information. Provide two key ring holders with location to mount standard business cards for key contact personnel.

Material and Finish: 18-gauge cold-rolled steel; four mounting holes.

Color: Red powder-coat epoxy finish.

Labeling: Permanently screened with 1 inch high lettering "SYSTEM RECORD DOCUMENTS" with white indelible ink.

Security: Locked with 3/4 inch barrel lock. Provide solid 12 inch stainless steel piano hinge.

FIRE-ALARM CONTROL UNIT (FACP)

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Bosch Security Systems, Inc.
Edwards; Carrier Global Corporation.
Gamewell-FCI; Honeywell International, Inc.
Notifier; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

Description: Field-programmable, microprocessor-based, modular, power-limited design with electronic modules.

Performance Criteria:

Regulatory Requirements: Comply with NFPA 72 and UL 864.

General Characteristics:

System software and programs must be held in nonvolatile flash, electrically erasable, programmable, read-only memory, retaining information through failure of primary and secondary power supplies.

Include real-time clock for time annotation of events on event recorder and printer.

Provide communication between FACP and remote circuit interface panels, annunciators, and displays.

FACP must be listed for connection to central-station signaling system service.

Provide nonvolatile memory for system database, logic, and operating system and event history. System must require no manual input to initialize in the event of complete power down condition. FACP must provide minimum 500-event history log.

Addressable Initiation Device Circuits: FACP must indicate which communication zones have been silenced and must provide selective silencing of alarm notification appliance by building communication zone.

Addressable Control Circuits for Operation of Notification Appliances and Mechanical Equipment: FACP must be listed for releasing service.

Fire-Alarm Annunciator: Arranged for interface between human operator at FACP and addressable system components including annunciation and supervision. Display alarm, supervisory, and component status messages and programming and control menu.

Annunciator and Display: LCD, 80 characters, minimum.

Keypad: Arranged to permit entry and execution of programming, display, and control commands.

Initiating-Device, Notification-Appliance, and Signaling-Line Circuits:

Pathway Class Designations: NFPA 72, Class B

Pathway Survivability: Level 1

Install no more than 50 addressable devices on each signaling-line circuit.

Install fault circuit isolators to comply with circuit performance requirements of NFPA 72 or with manufacturer's written instructions, whichever is more conservative.

Serial Interfaces:

One dedicated RS 485 port for central-station operation using point ID DACT.

One RS 485 port for remote annunciators, Ethernet module, or multi-interface module (printer port).

FACP Notification-Appliance Circuit:

Audible appliances must sound in three-pulse temporal pattern, as defined in NFPA 72.

Where notification appliances provide signals to sleeping areas, alarm signal must be 520 Hz square wave with intensity 15 dB above average ambient sound level or 5 dB above maximum sound level, or at least 75 dB(A-weighted), whichever is greater, measured at pillow.

Visual alarm appliances must flash in synchronization where multiple appliances are in same field of view, as defined in NFPA 72.

Transmission to Remote Alarm Receiving Station: Automatically transmit alarm, supervisory, and trouble signals to remote alarm station.

Voice/Alarm Signaling Service: Central emergency communication system with redundant microphones, preamplifiers, amplifiers, and tone generators provided as special module that is part of FACP.

Indicate number of alarm channels for automatic, simultaneous transmission of different announcements to different zones or for manual transmission of announcements by use of central-control microphone.

Amplifiers must comply with UL 1711.

Allow application of, and evacuation signal to, indicated number of zones and simultaneously allow voice paging to other zones selectively or in combination.

Programmable tone and message sequence selection.

Generate tones to be sequenced with audio messages of type recommended by NFPA 72 and that are compatible with tone patterns of notification-appliance circuits of FACP.

Status Annunciator: Indicate status of various voice/alarm speaker zones and status of firefighters' two-way telephone communication zones.

Preamplifiers, amplifiers, and tone generators must automatically transfer to backup units, on primary equipment failure.

Printout of Events: On receipt of signal, print alarm, supervisory, and trouble events. Identify zone, device, and function. Include type of signal (alarm, supervisory, or trouble) and date and time of occurrence. Differentiate alarm signals from other printed indications. Also, print system reset event, including same information for device, location, date, and time. Commands initiate printing of list of existing alarm, supervisory, and trouble conditions in system and historical log of events.

Primary Power: 24 V(dc) obtained from 120 V(ac) service and power-supply module. Initiating devices, notification appliances, signaling lines, trouble signals, supervisory and DACT must be powered by 24 V(dc) source.

Alarm current draw of entire fire-alarm system must not exceed 80 percent of power-supply module rating.

Secondary Power: 24 V(dc) supply system with batteries, automatic battery charger, and automatic transfer switch.

Batteries: Sealed lead calcium .

Accessories:

Instructions: Computer printout or typewritten instruction card mounted behind plastic or glass cover in stainless steel or aluminum frame. Include interpretation and describe appropriate response for displays and signals. Briefly describe functional operation of system under normal, alarm, and trouble conditions.

Preaction System Functionality:

Initiate Presignal Alarm: This function must cause audible and visual alarm and indication to be provided at FACP. Activation of initiation device connected as part of preaction system must be annunciated at FACP only, without activation of general evacuation alarm.

MANUAL FIRE-ALARM BOXES

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Bosch Security Systems, Inc.
Edwards; Carrier Global Corporation.
Gamewell-FCI; Honeywell International, Inc.
Notifier; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

General Requirements for Manual Fire-Alarm Boxes: Comply with UL 38. Boxes must be finished in red with molded, raised-letter operating instructions in contrasting color; must show visible indication of operation; and must be mounted on recessed outlet box. If indicated as surface mounted, provide manufacturer's surface back box.

Single-action mechanism, pull-lever type; with integral addressable module arranged to communicate manual-station status (normal, alarm, or trouble) to FACP.

Station Reset: Key- or wrench-operated switch.

Able to perform at up to 90 percent relative humidity at 90 deg F .

Able to be used in indoor areas.

SYSTEM SMOKE DETECTORS

Photoelectric Smoke Detectors:

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Bosch Security Systems, Inc.
Edwards; Carrier Global Corporation.
Gamewell-FCI; Honeywell International, Inc.
Notifier; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

Performance Criteria:

Regulatory Requirements:

NFPA 72.
UL 268.

General Characteristics:

Detectors must be two-wire type.

Integral Addressable Module: Arranged to communicate detector status (normal, alarm, or trouble) to FACP.

Base Mounting: Detector and associated electronic components must be mounted in twist-lock module that connects to fixed base. Provide terminals in fixed base for connection to building wiring.

Self-Restoring: Detectors do not require resetting or readjustment after actuation to restore them to normal operation.

Integral Visual-Indicating Light: LED type, indicating detector has operated and power-on status.

Detector address must be accessible from FACP and must be able to identify detector's location within system and its sensitivity setting.

Operator at FACP, having designated access level, must be able to manually access the following for each detector:

Primary status.
Device type.
Present average value.
Present sensitivity selected.
Sensor range (normal, dirty, etc.).

Detector must have functional humidity range within 10 to 90 percent relative humidity.

Sensitivity levels based on time of day.

DUCT SMOKE DETECTORS

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Bosch Security Systems, Inc.
Edwards; Carrier Global Corporation.
Gamewell-FCI; Honeywell International, Inc.
Notifier; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

Description: Photoelectric-type, duct-mounted smoke detector.

Performance Criteria:

Regulatory Requirements:

NFPA 72.
UL 268A.

General Characteristics:

Detectors must be four -wire type.

Integral Addressable Module: Arranged to communicate detector status (normal, alarm, or trouble) to FACP.

Self-Restoring: Detectors do not require resetting or readjustment after actuation to restore them to normal operation.

Integral Visual-Indicating Light: LED type, indicating detector has operated and power-on status.

Detector address must be accessible from FACP and must be able to identify detector's location within system and its sensitivity setting.

Operator at FACP, having designated access level, must be able to manually access the following for each detector:

Primary status.
Device type.
Present average value.
Present sensitivity selected.
Sensor range (normal, dirty, etc.).

Weatherproof Duct Housing Enclosure: NEMA 250, Type 4X; NRTL listed for use with supplied detector for smoke detection in HVAC system ducts.

Each sensor must have multiple levels of detection sensitivity.

Sampling Tubes: Design and dimensions as recommended by manufacturer for specific duct size, air velocity, and installation conditions where applied.

Relay Fan Shutdown: Fully programmable relay rated to interrupt fan motor-control circuit.

CARBON MONOXIDE DETECTORS

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Notifier; Honeywell International, Inc.
Or approved equal

Description: Carbon monoxide detector listed for connection to fire-alarm system.

Performance Criteria:

Regulatory Requirements:

NFPA 72

NFPA 720.
UL 2075.

General Characteristics:

Mounting: Adapter plate for outlet box mounting.
Testable by introducing test carbon monoxide into sensing cell.
Detector must provide alarm contacts and trouble contacts.
Detector must send trouble alarm when nearing end-of-life, power supply problems, or internal faults.
Locate, mount, and wire in accordance with manufacturer's written instructions.
Provide means for addressable connection to fire-alarm system.
Test button simulates alarm condition.

HEAT DETECTORS

Combination-Type Heat Detectors:

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Bosch Security Systems, Inc.
Edwards; Carrier Global Corporation.
Gamewell-FCI; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

Performance Criteria:

Regulatory Requirements:

NFPA 72.
UL 521.

General Characteristics:

Temperature sensors must test for and communicate sensitivity range of device.

Actuated by fixed temperature of 135 deg F or rate of rise that exceeds 15 deg F per minute unless otherwise indicated.

Mounting: Twist-lock base interchangeable with smoke-detector bases.

Integral Addressable Module: Arranged to communicate detector status (normal, alarm, or trouble) to FACP.

Detector must have functional humidity range of 10 to 90 percent relative humidity.

Fixed-Temperature-Type Heat Detectors:

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Bosch Security Systems, Inc.
Edwards; Carrier Global Corporation.
Gamewell-FCI; Honeywell International, Inc.
Notifier; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

Performance Criteria:

Regulatory Requirements:

NFPA 72.
UL 521.

General Characteristics:

Actuated by temperature that exceeds fixed temperature of 190 deg F .

Mounting: Twist-lock base interchangeable with smoke-detector bases.

Integral Addressable Module: Arranged to communicate detector status (normal, alarm, or trouble) to FACP.

Detector must have functional humidity range of 10 to 90 percent.

FIRE-ALARM NOTIFICATION APPLIANCES

Fire-Alarm Audible Notification Appliances:

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Edwards; Carrier Global Corporation.
Notifier; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

Description: Horns, bells, or other notification devices that cannot output voice messages.

Performance Criteria:

Regulatory Requirements:

NFPA 72.

General Characteristics:

Connected to notification-appliance signal circuits, zoned as indicated, equipped for mounting as indicated, and with screw terminals for system connections.

Chimes, Low-Level Output: Vibrating type, 75 dB(A-weighted) minimum rated output.

Chimes, High-Level Output: Vibrating type, 81 dB(A-weighted) minimum rated output.

Sounders, High Volume 24 V(dc): Less than 6 mA of alarm current.
Sounders, Low Volume 24 V(dc): Less than 4 mA of alarm current.

Audible notification appliances must have functional humidity range of 10 to 95 percent relative humidity.

ISO Temporal 3 Evacuation Tone: 90 plus or minus 4 dB(A-weighted) at 24 V.

ISO Temporal 3 Alert Tone: 95 plus or minus 5 dB(A-weighted) at 24 V.

AS2220 Evacuation Tone: 93 plus or minus 4 dB(A-weighted) at 24 V.

AS2220 Alert Tone: 93 plus or minus 5 dB(A-weighted) at 24 V.

Horns: Electric-vibrating-polarized type, 24 V(dc); with provision for housing operating mechanism behind grille. Comply with UL 464. Horns must produce sound-pressure level of 90 dB(A-weighted), measured 10 ft. from horn, using coded signal prescribed in UL 464 test protocol.

Combination Devices: Factory-integrated audible and visible devices in single-mounting assembly, equipped for mounting as indicated, and with screw terminals for system connections.

Fire-Alarm Visible Notification Appliances:

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Edwards; Carrier Global Corporation.
Notifier; Honeywell International, Inc.
Potter Electric Signal Company, LLC.
Siemens Industry, Inc., Building Technologies Division.
Simplex; brand of Johnson Controls International plc, Building Solutions North America.
Or approved equal

Performance Criteria:

Regulatory Requirements:

NFPA 72.
UL 1971.

General Characteristics:

Rated Light Output:

15/30/75/110 cd, selectable in field.

Clear or nominal white polycarbonate lens mounted on aluminum faceplate.

Mounting: Wall mounted unless otherwise indicated.

For units with guards to prevent physical damage, light output ratings must be determined with guards in place.

Flashing must be in temporal pattern, synchronized with other units.

Strobe Leads: Factory connected to screw terminals.

Mounting Faceplate: Factory finished, red .

FIRE-ALARM REMOTE ANNUNCIATORS

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Same as FACP.

Performance Criteria:

Regulatory Requirements:

NFPA 72.

General Characteristics:

Annunciator functions must match those of FACP for alarm, supervisory, and trouble indications. Manual switching functions must match those of FACP, including acknowledging, silencing, resetting, and testing.

Mounting: Surface cabinet, NEMA 250, Type 1.

Display Type and Functional Performance: Alphanumeric display and LED indicating lights must match those of FACP. Provide controls to acknowledge, silence, reset, and test functions for alarm, supervisory, and trouble signals.

FIRE-ALARM ADDRESSABLE INTERFACE DEVICES

Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

Bosch Security Systems, Inc.
Notifier; Honeywell International, Inc.
Or approved equal.

Performance Criteria:

Regulatory Requirements:

NFPA 72.

General Characteristics:

Include address-setting means on module.

Store internal identifying code for control panel use to identify module type.

Listed for controlling HVAC fan motor controllers.

Monitor Module: Microelectronic module providing system address for alarm-initiating devices for wired applications with normally open contacts.

Integral Relay: Capable of providing direct signal to elevator controller to initiate elevator recall .
Allow control panel to switch relay contacts on command.
Have minimum of two normally open and two normally closed contacts available for field wiring.

Control Module:
Operate notification devices.
Operate solenoids for use in sprinkler service.

PART 3- EXECUTION

EXAMINATION

Examine areas and conditions for compliance with requirements for ventilation, temperature, humidity, and other conditions affecting performance of the Work.

Verify that manufacturer's written instructions for environmental conditions have been permanently established in spaces where equipment and wiring are installed, before installation begins.

Examine roughing-in for electrical connections to verify actual locations of connections before installation.

Proceed with installation only after unsatisfactory conditions have been corrected.

PREPARATION

Preinstallation Testing: Perform verification of functionality of installed components of existing system prior to starting work. Document equipment or components not functioning as designed.

Protection of In-Place Conditions: Protect devices during construction unless devices are placed in service to protect facility during construction.

INSTALLATION OF EQUIPMENT

Comply with NECA 305, NFPA 72, NFPA 101, and requirements of authorities having jurisdiction for installation and testing of fire-alarm equipment. Install electrical wiring to comply with requirements in NFPA 70 including, but not limited to, Article 760, "Fire Alarm Systems."

Devices placed in service before other trades have completed cleanup must be replaced.

Devices installed, but not yet placed, in service must be protected from construction dust, debris, dirt, moisture, and damage in accordance with manufacturer's written storage instructions.

Install wall-mounted equipment, with tops of cabinets not more than 78 inch above finished floor.

Manual Fire-Alarm Boxes:

Install manual fire-alarm box in normal path of egress within 60 inch of exit doorway.

Mount manual fire-alarm box on background of contrasting color.

Operable part of manual fire-alarm box must be between 42 and 48 inch above floor level. Devices must be mounted at same height unless otherwise indicated.

Smoke- and Heat-Detector Spacing:

Comply with "Smoke-Sensing Fire Detectors" section in "Initiating Devices" chapter in NFPA 72, for smoke-detector spacing.

Comply with "Heat-Sensing Fire Detectors" section in "Initiating Devices" chapter in NFPA 72, for heat-detector spacing.

Smooth ceiling spacing must not exceed 30 ft. .

Spacing of detectors for irregular areas, for irregular ceiling construction, and for high ceiling areas must be determined in accordance with Annex A or Annex B in NFPA 72.

HVAC: Locate detectors not closer than 36 inch from air-supply diffuser or return-air opening.

Lighting Fixtures: Locate detectors not closer than 12 inch from lighting fixture and not directly above pendant mounted or indirect lighting.

Install cover on each smoke detector that is not placed in service during construction. Cover must remain in place except during system testing. Remove cover prior to system turnover.

Duct Smoke Detectors: Comply with NFPA 72 and NFPA 90A. Install sampling tubes so they extend full width of duct. Tubes more than 36 inch long must be supported at both ends.

Do not install smoke detector in duct smoke-detector housing during construction. Install detector only during system testing and prior to system turnover.

Elevator Shafts: Coordinate temperature rating and location with sprinkler rating and location. Do not install smoke detectors in sprinklered elevator shafts.

Remote Status and Alarm Indicators: Install in visible location near each smoke detector, sprinkler water-flow switch, and valve-tamper switch that is not readily visible from normal viewing position.

Audible Alarm-Indicating Devices: Install not less than 6 inch below ceiling. Install bells and horns on flush-mounted back boxes with device-operating mechanism concealed behind grille. Install devices at same height unless otherwise indicated.

Visible Alarm-Indicating Devices: Install adjacent to each alarm bell or alarm horn and at least 6 inch below ceiling. Install devices at same height unless otherwise indicated.

Device Location-Indicating Lights: Locate in public space near device they monitor.

ELECTRICAL CONNECTIONS

Connect wiring in accordance with Section 26 05 19 "Low-Voltage Electrical Power Conductors and Cables."

Ground equipment in accordance with Section 26 05 26 "Grounding and Bonding for Electrical Systems."
Install electrical devices furnished by manufacturer, but not factory mounted, in accordance with NFPA 70 and NECA 1.

Install nameplate for each electrical connection, indicating electrical equipment designation and circuit number feeding connection.

Nameplate must be laminated acrylic or melamine plastic signs with black background and engraved white letters at least 1/2 inch high.

CONTROL CONNECTIONS

Install control and electrical power wiring to field-mounted control devices.

Connect control wiring in accordance with Section 26 05 23 "Control-Voltage Electrical Power Cables."

Install nameplate for each control connection, indicating field control panel designation and I/O control designation feeding connection.

PATHWAYS

Pathways above recessed ceilings and in inaccessible locations may be routed exposed.

Exposed pathways located less than 96 inch above floor must be installed in EMT.

Exposed EMT must be painted red enamel.

CONNECTIONS

Make addressable connections with supervised interface device to the following devices and systems. Install interface device less than 36 inch from device controlled. Make addressable confirmation connection when such feedback is available at device or system being controlled.

Alarm-initiating connection to smoke-control system (smoke management) at firefighters' smoke-control system panel.

Alarm-initiating connection to stairwell and elevator-shaft pressurization systems.

Smoke dampers in air ducts of designated HVAC duct systems.

Supervisory connections at low-air-pressure switch of each dry-pipe sprinkler system.

Supervisory connections at elevator shunt-trip breaker.

Data communication circuits for connection to building management system.

Supervisory connections at fire-extinguisher locations.

IDENTIFICATION

Identify system components, wiring, cabling, and terminals. Comply with requirements for identification specified in Section 27 05 53 "Identification for Communications Systems."

Install framed instructions in location visible from FACP.

GROUNDING

Ground FACP and associated circuits in accordance with Section 26 05 26 "Grounding and Bonding for Electrical Systems."

Ground shielded cables at control panel location only. Insulate shield at device location.

FIELD QUALITY CONTROL

Field tests must be witnessed by authorities having jurisdiction .

Administrant for Tests and Inspections:

Administer and perform tests and inspections.

Tests and Inspections:

Visual Inspection: Conduct visual inspection prior to testing.

Inspection must be based on completed record Drawings and system documentation that is required by "Completion Documents, Preparation" table in "Documentation" section of "Fundamentals" chapter in NFPA 72.

Comply with "Visual Inspection Frequencies" table in "Inspection" section of "Inspection, Testing and Maintenance" chapter in NFPA 72; retain "Initial/Reacceptance" column and list only installed components.

System Testing: Comply with "Test Methods" table in "Testing" section of "Inspection, Testing and Maintenance" chapter in NFPA 72.

Factory-authorized service representative must prepare "Fire Alarm System Record of Completion" in "Documentation" section of "Fundamentals" chapter in NFPA 72 and "Inspection and Testing Form" in "Records" section of "Inspection, Testing and Maintenance" chapter in NFPA 72.

Reacceptance Testing: Perform reacceptance testing to verify proper operation of added or replaced devices and appliances.

Fire-alarm system will be considered defective if it does not pass tests and inspections.

Prepare test and inspection reports.

Maintenance Test and Inspection: Perform tests and inspections listed for weekly, monthly, quarterly, and semiannual periods. Use forms developed for initial tests and inspections.

Annual Test and Inspection: One year after date of Substantial Completion, test fire-alarm system complying with visual and testing inspection requirements in NFPA 72. Use forms developed for initial tests and inspections.

DEMONSTRATION

Train Owner's maintenance personnel to adjust, operate, and maintain fire-alarm system. Provide video recording of training to Owner.

MAINTENANCE

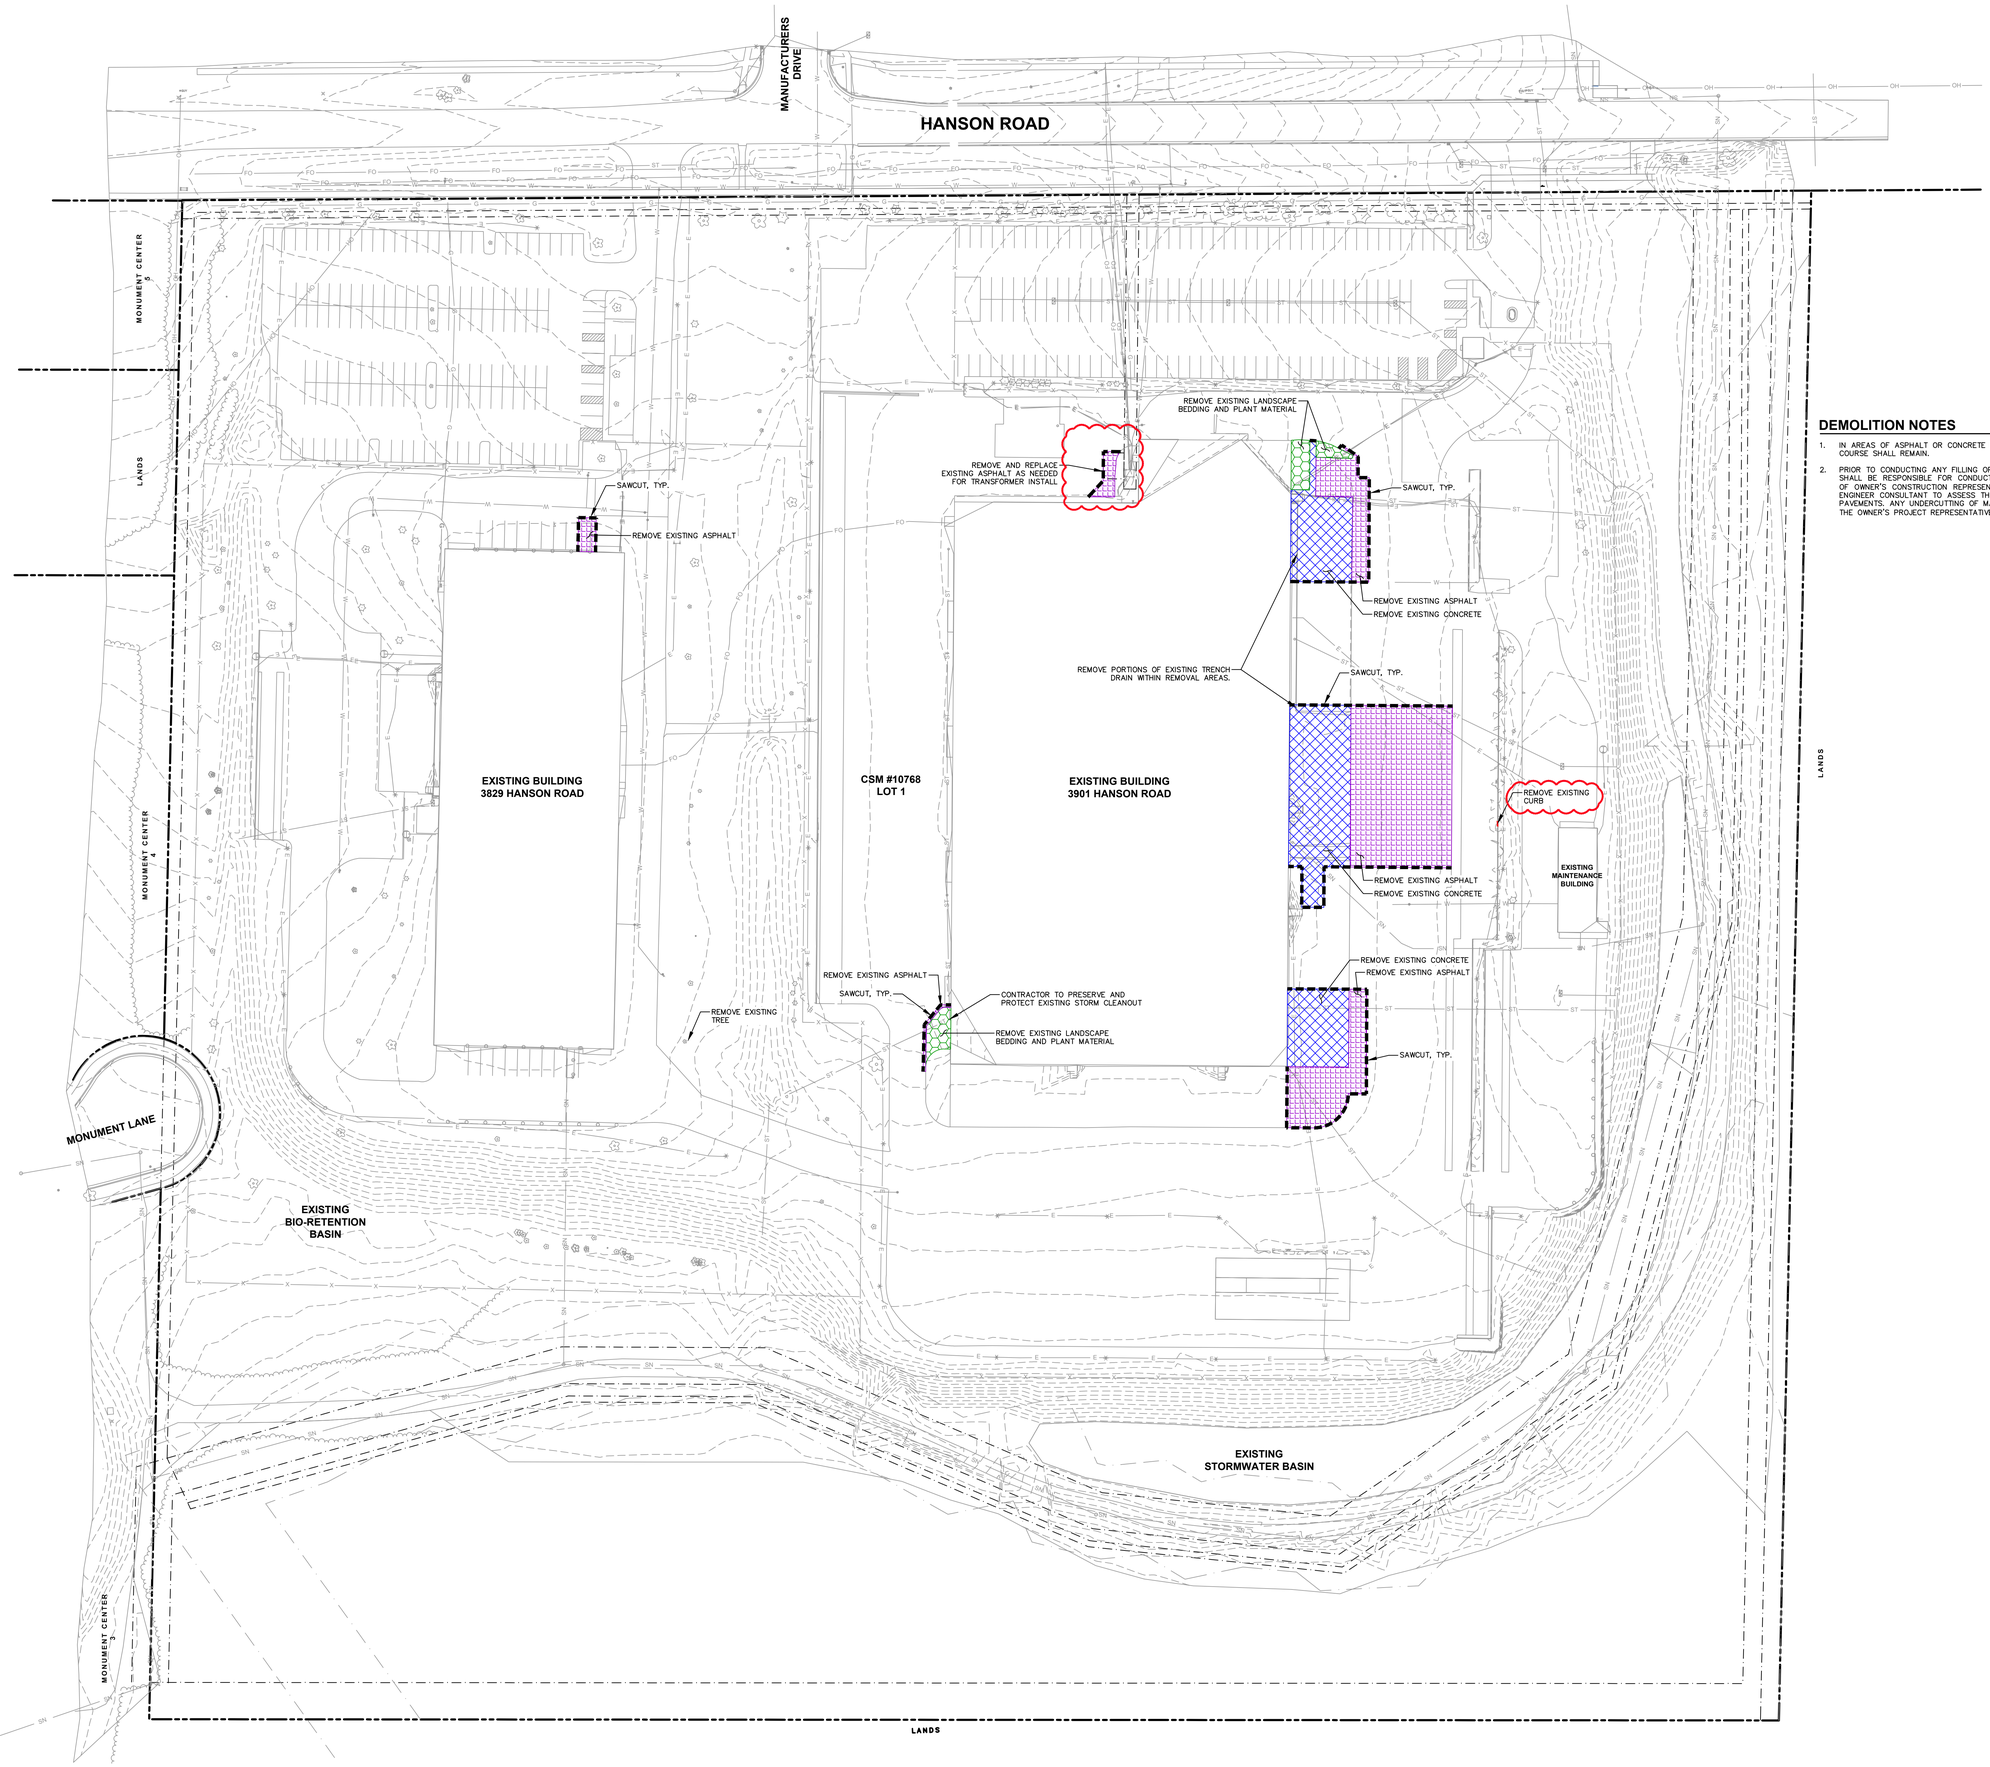
Maintenance Service: Beginning at Substantial Completion, maintenance service must include 12 months' full maintenance by skilled employees of manufacturer's designated service organization. Include preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper operation. Parts and supplies must be manufacturer's authorized replacement parts and supplies.

Include visual inspections in accordance with "Visual Inspection Frequencies" table in "Testing" paragraph of "Inspection, Testing and Maintenance" chapter in NFPA 72.

Perform tests in "Test Methods" table in "Testing" paragraph of "Inspection, Testing and Maintenance" chapter in NFPA 72.

Perform tests per "Testing Frequencies" table in "Testing" paragraph of "Inspection, Testing and Maintenance" chapter in NFPA 72.

END OF SECTION 28 46 21



DEMOLITION NOTES

1. IN AREAS OF ASPHALT OR CONCRETE PAVEMENT REMOVAL; ALL EXISTING BASE COURSE SHALL REMAIN.
2. PRIOR TO CONDUCTING ANY FILLING OPERATION IN PAVED AREAS, CONTRACTOR SHALL BE RESPONSIBLE FOR CONDUCTING A PROOF-ROLL IN THE PRESENCES OF OWNER'S CONSTRUCTION REPRESENTATIVE AND/OR OWNER'S GEOTECHNICAL ENGINEER CONSULTANT TO ASSESS THE STABILITY AND STRENGTH OF EXISTING PAVEMENTS. ANY UNDERCUTTING OF MATERIAL SHALL BE AT THE DIRECTION OF THE OWNER'S PROJECT REPRESENTATIVE.

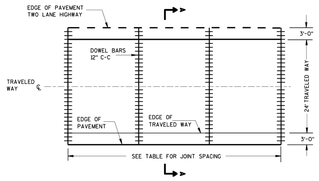
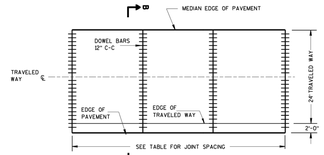
ALTERNATIVE SECTION B-B (1)
DIVIDED HIGHWAY

*NOTE: REFER TO SHEET C301 FOR JOINT LAYOUT AND SPACING. SPACING AND LOCATION OF DOWEL BAR ASSEMBLIES SHALL BE IN ACCORDANCE WITH WISDOT SPECIFICATIONS AS IDENTIFIED ON THIS DETAIL



CONTRACTION JOINT LAYOUT
FOR TWO-LANE TWO-WAY HIGHWAY



CONTRACTION JOINT LAYOUT
FOR DIVIDED HIGHWAY

GENERAL NOTES

CONTRACTION JOINTS

CONSTRUCT TRANSVERSE CONTRACTION JOINTS NORMAL TO THE CENTERLINE, SHOW THE LOCATION OF CONTRACTION JOINTS THROUGH INTERSECTIONS ON THE PLANS OR AS DIRECTED BY THE ENGINEER.

INSTALL DOWEL BARS PARALLEL TO THE PAVEMENT CENTERLINE AND PAVEMENT SURFACE.

FOR PAVEMENT SLABS OF VARYING WIDTHS, LOCATE THE OUTER MOST DOWEL BAR SO THAT THE CENTER OF THE BAR IS A MINIMUM OF 6 INCHES AND A MAXIMUM OF 18 INCHES FROM THE FREE EDGE OF PAVEMENT.

CONSTRUCTION JOINTS

LOCATE CONSTRUCTION JOINTS A MINIMUM OF 6 FEET FROM THE NEAREST CONTRACTION JOINT AND ALIGN PARALLEL TO CONTRACTION JOINTS.

*NOTE: REFER TO SHEET C301 FOR LOCATIONS OF CONSTRUCTION JOINTS

(1) REFER TO TYPICAL CROSS SECTIONS FOR ADDITIONAL DETAILS.

(2) MEASURE THE ENTIRE PAVED WIDTH INCLUDING THE PORTION(S) LABELED PAVED SHOULDER AS CONCRETE PAVEMENT.

PAVEMENT DEPTH: DOWEL BAR SIZE AND JOINT SPACING TABLE

PAVEMENT DEPTH (D)	DOWEL BAR DIAMETER	CONTRACTION JOINT SPACING
5 ½", 6", 6½ ½"	NONE	12'
7", 7 ½"	1"	14'
8", 8 ½"	1¼"	15'
9", 9 ½"	1¼"	15'
10" & ABOVE	1½"	15'

DRILLED DOWEL BAR CONSTRUCTION JOINT (7)

GENERAL NOTES

(1) OBTAIN THE ENGINEER'S APPROVAL FOR THE USE OF ALTERNATIVE DESIGNS OF THE DOWEL ASSEMBLY, USE MECHANICAL DOWEL BAR INSERTERS OR DOWEL ASSEMBLIES WHEN CONSTRUCTING CONTRACTION JOINTS.

(2) SECURE BASKETS WITH ANCHORS TO HOLD DOWEL BARS IN THE CORRECT POSITION AND ALIGNMENT. TYPE, LOCATION, NUMBER AND LENGTH OF ANCHORS ARE DEPENDENT UPON FIELD CONDITIONS.

(3) FORM OR SAW CONSTRUCTION JOINTS. PROVIDE A ¼-INCH RADIUS AT FORMED JOINTS.

(4) PROVIDE A SMOOTH VERTICAL FACE FOR THE ENTIRE DEPTH OF THE PAVEMENT WHEN FORMING CONSTRUCTION JOINTS.

(5) INSTALL DOWEL BARS AT CONSTRUCTION JOINTS BY FORMING OR DRILLING. INSTALL FORMED DOWEL BARS 12 INCHES C-C AND 12 INCHES FROM PAVEMENT EDGE. REMOVE EXCESS CONCRETE FROM THE FREE END OF THE DOWEL BAR IF DOWEL BARS ARE FORMED THROUGH A HEADER BOARD. INSTALL DRILLED DOWEL BARS ACCORDING TO *DRILLED DOWEL BAR CONSTRUCTION JOINT* DETAIL.

(6) APPLY A THIN UNIFORM COATING OF SURFACE TREATMENT TO THE FREE END OF DOWEL BARS TO PREVENT BONDING.

(7) ANCHOR DOWEL BARS INTO DRILLED HOLES WITH AN EPOXY. MAXIMUM DRILLED HOLE SIZE IS ⅛-INCH GREATER THAN DOWEL BAR DIAMETER. 9 INCHES IN LENGTH.

GENERAL NOTES - FINISHES

1. REFER TO INTERIOR ELEVATIONS FOR ADDITIONAL INFORMATION.
2. "-" ON THE FINISH SCHEDULE INDICATES THAT THE EXISTING FINISH IS TO REMAIN.
3. PAINT HOLLOW METAL DOORS AND FRAMES PT-2. SEE DOOR SCHEDULE FOR LOCATIONS.
4. SEE FLOORING TRANSITION DETAILS FOR ADDITIONAL INFORMATION. REMOVE AND REPLACE TRANSITION STRIP IN AREAS WHERE TILE FLOORING IS TO REMAIN.
5. "TRUE" CARDINAL DIRECTIONS ARE INDICATED IN THE FINISH SCHEDULE U.N.O.

SIGNAGE NOTES:

1. SEE FINISH SCHEDULE FOR LOCATIONS OF SIGNS ID-01 THROUGH ID-06.
2. ID-07 SIGNAGE TO BE INSTALLED AT DOORS 100 AND 250A.
3. ID-08 SIGNAGE TO BE INSTALLED AT DOORS 100, 140A, 140C, 140D, 175A, 175D, 175F, 177A, 206B, 200C, 200F, 200G, 200K, 200M, 200P, 200R, 200W, 250A, 274, AND 285A.
4. ID-09, ID-10, AND ID-11 SIGNAGE TO BE INSTALLED AT ALL PEDESTRIAN ENTRIES THROUGH EXTERIOR GATES AROUND THE SITE.
5. TYPEFACE ON ALL SIGNS SHALL BE HELVETICA BOLD.
6. COLOR CHANGES TO BE RAISED 1/32" FROM BACKGROUND.

GENERAL NOTES

1. REFER TO ARCHITECTURAL PLANS AND SPECIFICATIONS FOR ADDITIONAL GENERAL NOTES WHICH WILL APPLY HERE.
2. NOTES ON DRAWINGS SHALL APPLY TO ALL SIMILAR CONDITIONS WHETHER THEY ARE REPEATED OR NOT.
3. THE CONTRACTOR MUST VISIT THE SITE TO FAMILIARIZE HIMSELF WITH THE EXISTING SITE AND BUILDING CONDITIONS WHICH WILL BE AFFECTED DURING CONSTRUCTION PRIOR TO SUBMITTING HIS BID PROPOSAL. CONTRACTOR IS CAUTIONED THAT THE PROJECT IS A REMODELING JOB AND IT IS ASSUMED THAT HE HAS INCLUDED FUNDS IN HIS BID TO COVER UNFORESEEN ITEMS WHICH MUST BE MOVED, RELOCATED OR ADJUSTED TO FIT HIS WORK. NO EXTRA COMPENSATION WILL BE ALLOWED FOR ANY EXTRA WORK CAUSED BY FAILURE TO VISIT, EXAMINE OR VERIFY.
4. ALL EXISTING EQUIPMENT IS TO REMAIN OPERATIONAL DURING CONSTRUCTION PERIOD. ALL TEMPORARY WIRING OR REROUTING OF CIRCUITRY TO ACHIEVE THIS IS BY THE ELECTRICAL CONTRACTOR. SHUTDOWN OF EXISTING SERVICES SHALL ONLY BE PERMITTED UPON WRITTEN APPROVAL FROM THE OWNER AND THEN ONLY FOR THAT DATE AND DURATION AGREED UPON. INCLUDE ALL PREMIUM TIME CHARGES IN THE BASE BID.
5. EXISTING CONDUIT IN SAME PLACE MAY BE REUSED WHERE POSSIBLE, PULL NEW WIRE AS REQUIRED. ALL UNUSED CONDUIT, WIRE, JUNCTION BOXES, ETC. WILL BE REMOVED. RELOCATED EXISTING CONDUIT SHALL NOT BE ALLOWED.
6. BOXES LOCATED ON OPPOSITE SIDES OF NON-FIRE RATED WALLS SHALL BE OFFSET A MINIMUM OF 6" HORIZONTALLY. BOXES ON OPPOSITE SIDES OF FIRE RATED WALL SHALL BE OFFSET A MINIMUM OF 24" HORIZONTALLY. "THRU THE WALL" BOXES SHALL NOT BE ALLOWED WITHOUT PRIOR WRITTEN APPROVAL OF THE ARCHITECT/ENGINEER.
7. ELECTRICAL CONTRACTOR SHALL VERIFY TOTAL CONNECTED LOAD/HP WITH ALL OTHER TRADES PRIOR TO WIRING OF ALL OTHER TRADES' EQUIPMENT. MAKE ANY CHANGES TO OVERCURRENT DEVICES AND FEEDER SIZE PER ELECTRICAL CODE AS REQUIRED.
8. ELECTRICAL CONTRACTOR SHALL VERIFY ALL FURNITURE, MODULAR FURNITURE AND EQUIPMENT LOCATIONS WITH ARCHITECTURAL PLANS, ELEVATIONS AND REVIEWED SHOP DRAWINGS. PRIOR TO MAKING THE ACTUAL ELECTRICAL INSTALLATION. THIS CONTRACTOR SHALL ADJUST RECEPTACLES, OUTLETS OR CONNECTION LOCATIONS TO ACCOMMODATE FURNITURE AND/OR EQUIPMENT.
9. PROVIDE SLEEVES/CONDUITS FOR LOW VOLTAGE CABLES WHEN THEY TRAVERSE ABOVE NON ACCESSIBLE CEILING SPACE. ALSO, PROVIDE SLEEVES THROUGH MASONARY WALLS FOR LOW VOLTAGE CABLES. VERIFY SLEEVE/CONDUIT SIZE REQUIREMENTS AND LOCATION WITH THE CONTRACTOR INSTALLING LOW VOLTAGE SYSTEM.
10. ALL FIRE ALARM SYSTEM WIRING SHALL BE INSTALLED IN CONDUITS INCLUDING WIRING ABOVE ACCESSIBLE CEILING. ALL OTHER LOW VOLTAGE WIRING SHALL BE INSTALLED IN CONDUIT EXCEPT SUCH WIRING ABOVE ACCESSIBLE CEILING SHALL BE EXPOSED. PROVIDE "J" HOOKS AS REQUIRED. USE CABLE TRAY WHERE APPLICABLE.
11. UNLESS NOTED OTHERWISE, THE CONDUITS AND BACK BOXES SHALL BE CONCEALED WITHIN ALL DRY WALLS, NEW MASONRY WALLS AND IN CEILING. SURFACE METAL RACEWAY SHALL BE USED FOR DEVICES ON EXISTING MASONRY WALLS AND ON EXISTING DRY WALL OR PLASTERED WALL. AS MUCH AS PRACTICAL. WHEREVER FEASIBLE, INSTALL CONDUITS BEHIND A WALL IN AN UNFINISHED ROOM AND PENETRATE INTO AN ELECTRICAL DEVICE TO BE INSTALLED IN FINISHED AREA. IF THIS IS NOT FEASIBLE, PROVIDE SURFACE METAL RACEWAY. IN THE ROOM WHERE ELECTRICAL DEVICE NEEDS TO BE INSTALLED. THE SURFACE METAL RACEWAY SHALL BE ROUTED IN THE CORNER AND/OR ADJACENT TO WINDOW, DOOR FRAMEWORK ETC. SO IT IS AS INCONSPICUOUS AS POSSIBLE. FOR SAKE OF SIMPLICITY ONLY THE TERM "CONDUIT" IS USED IN MOST CASES IN THIS DOCUMENT. HOWEVER, BASED UPON ABOVE, THE SURFACE METAL RACEWAY AND CONDUIT SHALL BE USED, AS APPLICABLE WHERE SURFACE METAL RACEWAY IS USED ONE TWO CHANNEL RACEWAY WITH DIVIDER CAN BE USED (FOR POWER & LOW VOLTAGE) WHERE APPLICABLE.
12. WHERE POWER AND LOW VOLTAGE OUTLETS (SUCH AS DATA OUTLETS) ARE SHOWN TOGETHER ON DRAWINGS, PROVIDE THEM ADJACENT TO EACH OTHER.
13. PROVIDE CONCRETE PAD FOR ALL FLOOR MOUNTED ELECTRICAL EQUIPMENT. (SUCH AS SWITCHBOARDS, PANELS, TRANSFORMER, ETC.)
14. FOR THE AREA TO BE DEMOLISHED, THE DEMOLITION OF LIGHT FIXTURES, OUTLETS OR ANY OTHER ELECTRICAL EQUIPMENT/DEVICES SHALL BE PERFORMED AS REQUIRED. SEE ARCHITECTURAL DRAWINGS AND THE RESPECTIVE FLOOR PLANS IN ELECTRICAL DRAWINGS FOR DEMOLITION. ELECTRICAL CONTRACTOR SHALL REMOVE ALL ASSOCIATED RACEWAYS AND WIRING AS REQUIRED. ELECTRICAL CONTRACTOR SHALL DE-ENERGIZE AND DISCONNECT APPLICABLE WIRING TO FACILITATE SAFE DEMOLITION.
15. THE EXISTING EQUIPMENT IS SHOWN BASED UPON THE INFORMATION OBTAINED THROUGH BRIEF SURVEY OF THE FACILITY. CONTRACTOR IS TO SURVEY THE EXISTING FACILITY IN ORDER TO DETERMINE THE FULL EXTENT OF WORK AND BE COMPLETELY FAMILIAR WITH ALL THE EXISTING CONDITIONS INCLUDING PLUMBING, HVAC, ELECTRICAL, ETC. THE ARCHITECT/ENGINEER AND OWNER ASSUME NO RESPONSIBILITY IN RESPECT TO THE ACCURACY OF SUCH INFORMATION SHOWN ON THE DRAWINGS. CONTRACTOR SHALL MAKE ADEQUATE ALLOWANCE IN HIS BID FOR SOME DEVIATIONS TO SUCH INFORMATION.
16. WHERE EXISTING CONDITIONS PREVENT PROPER INSTALLATION OF PROPOSED WORK, REROUTE, EXTEND OR ALTER EXISTING WORK SO AS TO ACCOMMODATE PROPOSED WORK REQUIREMENTS.
17. CIRCUIT NUMBERS SHOWN FOR EXISTING PANELS ARE FOR REFERENCE ONLY. USE NEXT AVAILABLE CIRCUITS AND PROVIDE APPROPRIATE SIZE BREAKERS.
18. REFER TO ARCHITECTURAL DRAWINGS FOR EXACT LOCATIONS OF ELECTRICAL EQUIPMENT & DEVICES. THE ELECTRICAL DRAWINGS ARE FOR CONCEPT ONLY.
19. IN GENERAL, DASHED LINES INDICATE EXISTING ITEMS TO BE REMOVED, LIGHT SOLID LINES INDICATE ITEMS TO REMAIN AND DARK SOLID LINES INDICATE NEW ITEMS.
20. WHERE EXISTING WIRING DEVICE (SUCH AS RECEPTACLE, SWITCH, ETC.) IS INDICATED TO REMAIN, REUSE EXISTING JUNCTION BOX, RACEWAY, BUT PROVIDE NEW DEVICE AND ASSOCIATED COVERPLATE. RECONNECT THIS DEVICE TO NEW CIRCUIT AS INDICATED.
21. THE SYSTEMS PROVIDED BY THIS CONTRACTOR SHALL BE COMPLETELY OPERATIONAL REGARDLESS OF OMISSION OF MINOR ITEMS, SUCH AS CIRCUIT NUMBER FOR RELAY, A CIRCUIT NUMBER NEXT TO A LIGHTING FIXTURE, ETC.
22. ALL OUTDOOR DEVICES SUCH AS RECEPTACLES, DISCONNECTS, SPEAKERS, LIGHTING FIXTURES, JUNCTION BOXES, ETC. SHALL BE OUTDOOR TYPE.
23. THE EXIT SIGNS ARE PROVIDED FOR BIDDING PURPOSE. FINAL LOCATION SHALL BE AS DETERMINED BY LOCAL FIRE MARSHALL. IF REQUIRED BY FIRE MARSHALL, PROVIDE ADDITIONAL EXIT SIGNS WITHOUT ADDITIONAL COST TO OWNER.
24. PROVIDE LOCKING CLIPS ON CIRCUIT BREAKERS SERVING EMERGENCY LIGHTING, FIRE ALARM SYSTEM, PA/INTERCOMM, TELEPHONE SYSTEM AND SECURITY SYSTEM LOAD.
25. WHERE A NEW WALL IS TO BE BUILT PERPENDICULAR TO EXISTING WALL AND IF THERE IS AN EXISTING RECEPTACLE ON THE EXISTING WALL, RELOCATE THIS RECEPTACLE AS REQUIRED.
26. IN CERTAIN CASES LARGER SIZE CABLES ARE SPECIFIED IN ORDER TO COMPENSATE FOR VOLTAGE DROP. PROVIDE OVERSIZE AND/OR MULTIPLE LUGS AT THE LINE AND LOAD SIDE OF EQUIPMENT TO INCORPORATE LARGER AND ADDITIONAL CABLES. IF REQUIRED, PROVIDE SPLICE BOXES AT EITHER END OF CABLE TO INTERCEPT CHANGE IN THE CABLES.
27. PROVIDE LABEL ON MAIN ELECTRICAL SERVICE PANEL/SWITCHBOARD INDICATING THAT IT IS LISTED AND LABELED AS A SUITABLE CONNECTION TO AN ONSITE RENEWABLE ENERGY SOURCE TO COMPLY WITH ARTICLE 608.12 OF IGCC (INTERNATIONAL GREEN CONSTRUCTION CODE).
28. PROVIDE TYPED PANEL DIRECTORY INDICATING LOAD SERVED.
29. UNO, ALL OVERCURRENT PROTECTION DEVICES 800 AMP AND LARGER SHALL BE 100% RATED.
30. AS REQUIRED EXTEND EXISTING RECEPTACLES WHERE EXISTING WALLS ARE FURRED OUT. REFER TO ARCHITECTURAL DRAWINGS FOR EXTENT OF THIS WORK.
31. DUE TO THE SMALL SCALE AND INTERFERENCE OF EXISTING EQUIPMENT, EACH AND EVERY ITEM IS NOT SHOWN. SHOWN INFORMATION IS INTENDED AS A GUIDE. CONTRACTOR SHALL VERIFY INFORMATION AND CONDITIONS IN THE FIELD.
32. RECONFIGURE LIGHTING FIXTURES AND OUTLETS IN MECHANICAL ROOMS TO BE COMPATIBLE WITH EQUIPMENT LAYOUT AS REQUIRED.
33. COORDINATE THE FINAL LOCATION OF RECEPTACLES IN TELECOMMUNICATION CLOSETS WITH TELECOMMUNICATION EQUIPMENT VENDOR.
34. ALL RECEPTACLES LOCATED WITHIN 6' OF SOURCE OF WATER (SUCH AS SINK) AND ALL OUTDOOR RECEPTACLES SHALL BE GFI TYPE, WHETHER SPECIFICALLY INDICATED OR NOT.
35. WHERE THE OUTLETS ARE SHOWN ON FURNITURE/DESK THEY SHALL BE PROVIDED EITHER UNDER THE DESK OR AS A PART OF MILLWORK AS INDICATED ON ARCHITECTURAL DRAWINGS. PROVIDE CONDUITS AND WIRING UNDER OR WITHIN THE FURNITURE/DESK. THE QUANTITY AND LOCATION OF INDICATED OUTLETS IS APPROXIMATE. COORDINATE EXACT REQUIREMENTS WITH ARCHITECT AND MILLWORK VENDOR. IF FURNITURE/DESK IS NEXT TO WALL, THE ROUGH-IN SHALL BE PROVIDED FROM WALLS. IF FURNITURE/DESK IS FREE STANDING, THE ROUGH-IN SHALL BE PROVIDED FROM FLOOR. THE POWER POLE IS NOT ALLOWED UNLESS SPECIFICALLY INDICATED.
36. IN ORDER TO FACILITATE THE REPLACEMENT OF EXISTING OR INSTALLATION OF NEW DUCTWORK AND/OR PIPING, REMOVE EXISTING LIGHTING FIXTURE AND/OR SMOKE /HEAT DETECTORS AS REQUIRED. THIS WORK IS NOT SHOWN ON DRAWINGS. ONCE THE INSTALLATION OF DUCTWORK, PIPING ETC IS COMPLETED, REINSTALL ELECTRICAL EQUIPMENT/DEVICES. PROVIDE ADEQUATE ALLOWANCE IN THE BID FOR THIS WORK.
37. PROVIDE EXPANSION FITTINGS FOR ALL ELECTRICAL RACEWAYS AT EVERY EXPANSION JOINT. REFER TO ARCHITECTURAL AND STRUCTURAL DRAWINGS FOR LOCATION OF EXPANSION JOINTS.
38. COORDINATE THE INSTALLATION OF ELECTRICAL EQUIPMENT SUCH AS PANELS, SWITCHBOARD, MOTOR CONTROL CENTER, TRANSFORMER ETC. WITH OTHER TRADES SUCH THAT NO DUCTWORK, PIPING ETC. IS LOCATED ABOVE THEM.
39. ELECTRICAL CONTRACTOR SHALL VERIFY SIZE OF ALL EXISTING OPENINGS, DOORS, ETC., FOR REMOVING EQUIPMENT AND MATERIAL OUT OF BUILDING. ELECTRICAL CONTRACTOR SHALL PROVIDE ANY NEW OR ENLARGED OPENINGS IN EXISTING BUILDING CONSTRUCTION REQUIRED TO FACILITATE EXITING OF HIS EQUIPMENT/MATERIAL AND RESTORE SUCH OPENINGS TO THEIR ORIGINAL STATE AFTER COMPLETION.
40. VERIFY QUANTITY AND SIZE OF LUGS PROVIDED IN OTHER TRADE'S EQUIPMENT (FOR EXAMPLE, CHILLER, ELEVATOR, FIRE PUMP ETC.) BEFORE STARTING ANY WORK ASSOCIATED WITH SUCH EQUIPMENT. IF THEIR LUGS CANNOT ACCOMMODATE THE CABLES INDICATED IN ELECTRICAL DOCUMENT, PROVIDE LUG FITTINGS TO ACCOMMODATE CHANGE IN THE CABLES. PROVIDE SUCH FITTINGS IN A JUNCTION BOX AS CLOSE AS POSSIBLE TO THEIR EQUIPMENT. IF REQUIRED BY THE EQUIPMENT MANUFACTURER, SUCH FITTINGS MAY BE INSTALLED IN THEIR EQUIPMENT RATHER THAN IN A SEPARATE JUNCTION BOX.
41. MAIN SERVICE ENTRANCE EQUIPMENT SHALL HAVE LABEL FOR SERVICE ENTRANCE TYPE, AND SHALL BE GROUNDED PER ELECTRICAL CODE.
42. AS A MINIMUM, USE #10 FOR ALL EMERGENCY LIGHTING.
43. PROVIDE SEPARATE DEDICATED GROUNDING CONDUCTOR IN EACH FEEDER AND BRANCH CIRCUIT WIRING CIRCUIT.
44. PROVIDE FIRE SEALANTS FOR ALL PENETRATIONS THRU FIRE RATED FLOORS AND WALLS.
45. THE ELECTRICAL DRAWINGS SHOW DIRECT PRINCIPLE WORK WHICH MUST BE ACCOMPLISHED UNDER THIS CONTRACT. INDIRECT AND INCIDENTAL WORK WILL ALSO BE NECESSARY DUE TO CHANGES AFFECTING EXISTING ARCHITECTURAL, MECHANICAL, PLUMBING OR OTHER SYSTEMS. SUCH INCIDENTAL WORK IS ALSO PART OF THIS CONTRACT. INSPECT THOSE AREA, AND ASCERTAIN WORK NEEDED AND DO THAT WORK IN ACCORDANCE WITH THE CONTRACT REQUIREMENTS, AT NO ADDITIONAL COST.
46. PROVIDE WIRELESS COMMUNICATOR AT FIRE ALARM CONTROL PANEL FOR DIALING OUT WHETHER SPECIFICALLY INDICATED OR NOT. THE COMMUNICATOR SHALL BE DSC MODEL LE 4010CF WITH ANTENNA MODEL LTE-50ANT OR APPROVED EQUAL. PROVIDE 120 VOLT POWER TO IT FROM NEAREST GENERATOR CIRCUIT IF THERE IS A GENERATOR. IF THERE IS NO GENERATOR PROVIDE POWER FROM NORMAL CIRCUIT. PROVIDE CAT 5 CABLE BETWEEN COMMUNICATOR AND FACP AND CABLE BETWEEN ANTENNA AND COMMUNICATOR. PROVIDE AN ADDITIONAL CAT 6 CABLE UP TO FACP FROM IT BACK AS A BACK UP TO COMMUNICATOR. IN LIEU OF COMMUNICATOR PROVIDE TWO PHONE LINES IF ACCEPTED BY OWNER AND LOCAL FIRE MARSHALL. COORDINATE APPLICABILITY OF COMMUNICATOR OR PHONE LINES WITH OWNER.
47. PROVIDE SMOKE DETECTOR WITHIN 5 FEET OF FIRE ALARM CONTROL PANEL, WHETHER SPECIFICALLY INDICATED OR NOT.
48. PROVIDE REMOTE TEST AND INDICATING STATION IN A READILY ACCESSIBLE AND VISIBLE SPACE FOR EACH DUCT SMOKE DETECTOR. VERIFY ITS EXACT LOCATION WITH OWNER AND LOCAL FIRE MARSHALL.
49. WHERE "VIF" IS INDICATED NEXT TO A DEVICE, CONTRACTOR SHALL VERIFY ITS REQUIREMENT IN FIELD. THIS INCLUDES VERIFICATION OF DEVICE TYPE, LOCATION, WIRING CONDUIT AND CIRCUIT BREAKER ETC. PROVIDE APPROPRIATE DEVICE, WIRING, CONDUIT, CIRCUIT BREAKER ETC. AS REQUIRED.
50. PROVIDE RED PLASTIC SIGN AT MAIN WATER SERVICE METER INDICATING "MAIN GROUND LOCATION."
51. AIC (AVAILABLE INTERRUPTING CAPACITY) RATING OF PANELS, SWITCHBOARDS, BUSWAY, MCC ETC. ARE SHOWN BASED UPON PRELIMINARY CALCULATIONS. THE FINAL RATING OF THE EQUIPMENT SHALL BE BASED UPON THE ARC-FLASH AND SHORT CIRCUIT COORDINATION STUDY. PROVIDE POWER DISTRIBUTION EQUIPMENT TO MEET THE RATING INDICATED IN THIS STUDY. THE STUDY SHALL BE BASED UPON THE ULTIMATE CAPABILITY OF THE MAIN SERVICE EQUIPMENT AND NOT THE INITIAL TRANSFORMER PROVIDED BY THE UTILITY COMPANY.
52. PROVIDE ARC-FLASH LABELS ON NEW EQUIPMENT IN ACCORDANCE WITH NEC.
53. WHERE EQUIPMENT DEVICES ARE INDICATED TO BE REMOVED, REMOVE ACCESSIBLE, UNUSABLE CONDUITS & WIRING. IF CONDUITS ARE NOT ACCESSIBLE THEY MAY BE ABANDONED. MAINTAIN CONTINUITY TO THE LOAD WHICH IS TO REMAIN.
54. CONNECT FIRE ALARM SYSTEM DEVICES TO EXISTING SYSTEM. UPGRADE/MODIFY EXISTING HEAD-END EQUIPMENT AS REQUIRED.
55. WHERE EXISTING HVAC EQUIPMENT IS SHOWN TO BE REMOVED, REMOVE ITS ASSOCIATED STARTER, DISCONNECT SWITCH, CONDUIT WIRING ETC. FIELD VERIFY LOCATION OF STARTER, DISCONNECT, ETC.
56. ONLY OCCUPANCY/VACANCY SENSORS & REQUIRED SWITCHES ARE INDICATED. PROVIDE POWER PACKS (CONTROL RELAYS) AS REQUIRED. LOCATE SENSORS TO PROVIDE OPTIMUM COVERAGE OF THE DEVICE.
57. PROVIDE GROUND BUS BAR IN EACH PANEL WHETHER SPECIFICALLY INDICATED OR NOT.
58. ARMORED (BX) CABLES OR MC CABLES ARE NOT ALLOWED.
59. ELECTRICAL DEVICES SUCH AS SMOKE/HEAT DETECTORS, OCCUPANCY SENSORS, DAY LIGHT SENSOR ETC. SHALL BE LOCATED IN AS CENTER AND AS UNIFORMLY IN ROOM AS POSSIBLE. THEY ARE NOT ALWAYS SHOWN IN CENTER OF A ROOM OR UNIFORMLY IN A ROOM TO AVOID CONFLICT WITH ROOM NUMBER TAGS.
60. PROVIDE DUCT SMOKE DETECTORS FOR ANY AIR HANDLING UNIT HAVING 2000 CFM OR MORE. PROVIDE TWO DUCT SMOKE DETECTORS FOR ANY AIR HANDLING UNIT HAVING 15000 CFM OR MORE. THE DUCT SMOKE DETECTOR SHALL BE FURNISHED, INSTALLED AND TESTED UNDER 'DIVISION 26. ITS ASSOCIATED REMOTE TEST AND INDICATING STATION SHALL ALSO BE FURNISHED, INSTALLED, WIRED AND TESTED UNDER DIVISION 26. "COMPLETE WARRANTY OF THESE PRODUCTS SHALL ALSO BE PROVIDED UNDER DIVISION 26. THE WIRING OF THESE PRODUCTS TO FIRE ALARM CONTROL PANEL SHALL BE PROVIDED UNDER DIVISION 26. WIRING FOR FAN SHUTDOWN SHALL BE PROVIDED UNDER DIVISION 23. REQUIRED RELAY FOR FAN SHUTDOWN SHALL BE PROVIDED UNDER DIVISION 26.
61. SERIES RATING OF PANELS IS ACCEPTABLE FOR THEIR SHORT CIRCUIT RATING.
62. LUGS FOR CIRCUIT BREAKERS AND SWITCHES SHALL BE RATED FOR TERMINATION OF 60 DEGREE C AND 75 DEGREE C RATED CONDUCTORS. THIS SHALL ALLOW USE OF CONDUCTORS BASED UPON AMPACITIES OF ONLY 75 DEGREE C.
63. OUTDOOR RECEPTACLES SHALL BE INSTALLED IN AN "IN USE" TYPE COVER. SUCH RECEPTACLES SHALL BE TYPE "WR" WEATHER-RESISTANT RECEPTACLES.
64. PROVIDE ARC ENERGY REDUCING FEATURES IN CIRCUIT BREAKERS RATED 1200 AMP OR LARGER TO MEET NEC 240.87.
65. IDENTIFY LOCATION OF CIRCUIT DISCONNECTS FOR FIRE ALARM PANEL PER NFPA 72, 10.5.
66. PER NFPA 72, 10.5.5.2; CIRCUIT BREAKERS FEEDING FIRE ALARM PANELS AND ASSOCIATED EQUIPMENT SHALL HAVE RED MARKING AND SHALL BE IDENTIFIED AS "FIRE ALARM CIRCUIT" AND SHALL HAVE LOCK-ON DEVICE.
67. ALL LOW VOLTAGE WIRING SHALL BE IN CONDUITS EXCEPT WIRING ABOVE ACCESSIBLE CEILING. WIRING ABOVE ACCESSIBLE CEILING SHALL BE EXPOSED UNLESS REQUIRED BY CODE TO BE IN CONDUITS. COORDINATE WITH LOW VOLTAGE SYSTEM VENDORS ROUTING OF THEIR CABLING AND PROVIDE CONDUITS/RACEWAYS AS REQUIRED. ALL FIRE ALARM SYSTEM WIRING SHALL BE IN CONDUITS.
68. FOR DATA WIRING, PROVIDE CONDUITS PER FOLLOWING, (BASED UPON CAT6 CABLES HAVING 0.3" DIAMETER CABLES)

CONDUIT	NUMBER OF CABLES
3/4"	2
1"	4
1 1/4"	6
1 1/2"	10
2"	17

69. PROVIDE CAT5E OR EQUIVALENT CABLING SYSTEM FOR OCCUPANCY SENSORS, VACANCY SWITCHES/SENSORS, POWER PACKS, DIMMER SWITCHES, DAY LIGHT SENSORS ETC. AS REQUIRED.
70. UNLESS NOTED OTHERWISE, WHEN DETERMINING THE DIAMETER FOR DATA WIRING OF FEEDER CONDUITS FROM THE CABLE ORIGINATION POINT CONDUIT SIZING SHALL ALLOW FOR 50% ADDITIONAL CAPACITY FOR OWNERS FUTURE DATA NEEDS.
71. FOR EACH FLUSH MOUNTED PANEL, PROVIDE THREE 1" SPARE EMPTY CONDUITS AND TERMINATE ABOVE ACCESSIBLE CEILING SPACE FOR FUTURE USE.
72. LIGHTING FIXTURES SHALL BE SUPPORTED INDEPENDENTLY OF THE CEILING SYSTEM BY AT LEAST TWO WIRES ON OPPOSITE CORNERS OF THE FIXTURES.
73. ALL WORK SHALL COMPLY WITH ALL LOCAL CODES.
74. UNLESS NOTES OTHERWISE, COLOR OF WIRING DEVICES (OUTLETS, SWITCHES AND COVER PLATES) SHALL BE WHITE. VERIFY FINAL COLOR WITH THE ARCHITECT BY PROVIDING SUBMITTAL.

ELECTRICAL SYMBOLS

- MULTI-OUTLET ASSEMBLY
- CABLE TRAY
- MH — MANHOLE
- HH — HANDHOLE
- PB — PULL BOX
- J — JUNCTION BOX- EXPOSED OR IN CEILING
- J — JUNCTION BOX - WALL MOUNTED
- J — JUNCTION BOX WITH FLEXIBLE CONDUIT AND FINAL CONNECTION TO EQUIPMENT.
- HD — HAND DRYER
- LIGHTING FIXTURE. SIZE AND TYPE AS INDICATED ON SCHEDULE.
- STRIP LIGHTING FIXTURE. SIZE AND TYPE AS INDICATED ON SCHEDULE.
- DOWNLIGHT LIGHTING FIXTURE. SIZE AND TYPE AS INDICATED ON SCHEDULE.
- WALL MOUNTED LIGHTING FIXTURE. SIZE AND TYPE AS INDICATED ON SCHEDULE.
- WALL MOUNTED LIGHTING FIXTURE. SIZE AND TYPE AS INDICATED ON SCHEDULE.
- WALL WASH LIGHTING FIXTURE- SIZE AND TYPE AS INDICATED ON SCHEDULE.
- EMERGENCY LIGHTING FIXTURE
- LIGHTING STANDARD - SINGLE FIXTURE, POLE MOUNTED. NUMBER IDENTIFIES FIXTURE
- LIGHTING STANDARD - MULTI FIXTURE, POLE MOUNTED. NUMBER IDENTIFIES FIXTURE

LIGHTING FIXTURES:
"A" UPPER CASE LETTER INDICATES LIGHTING FIXTURE TYPE. REFER TO LIGHTING FIXTURE SCHEDULE FOR DESCRIPTION AND MOUNTING.
"1" NUMBER INDICATES BRANCH CIRCUIT NUMBER(S)
"a" LOWER CASE LETTER INDICATES SWITCH CONTROL(S)

- TRACK LIGHTING
- BATTERY PACK, EMERGENCY LIGHTING UNIT
- REMOTE HEAD CONNECTED TO BATTERY PACK.
- COMBINATION EXIT SIGN AND EMERGEMCY LIGHTING UNIT
- "XI" INDICATES FIXTURE. SHADED QUADRANTS INDICATES DIRECTION OF LIGHTED FACES. ARROWS INDICATE DIRECTION OF ARROWS.

3W $ XXa — LIGHT SWITCH, SINGLE POLE UNLESS NOTED OTHERWISE:

"a"	SWITCHLEG	"WP"	WEATHERPROOF
"D"	DIMMER SWITCH	"2P"	TWO POLE
"EP"	EXPLOSION PROOF	"3P"	THREE POLE
"F"	FAN CONTROL	"3W"	THREE-WAY
"K"	KEY OPERATED	"4W"	FOUR-WAY
"P"	PILOT LIGHT	"MC"	MOMENTARY CONTACT
"XX"	CIRCUIT NUMBER	"VC"	VACANCY SENSOR
"T"	THERMAL OVERLOAD PROTECTION	"OC"	OCCUPANCY SENSOR
"VS"	VACANCY SWITCH		

- DS — DAYLIGHT SENSOR
- OC — OCCUPANCY SENSOR
- VC — VACANCY SENSOR
- TC — TIME CLOCK
- PC — PHOTOCELL
- B — BLUE INDICATOR LIGHT
- R/G — RED/GREEN INDICATOR LIGHT
- TIMER SWITCH

WALL	CEILING MOUNTED	FLUSH FLOOR MOUNTED	ABOVE COUNTER	
				SINGLE RECEPTACLE
				QUADPLEX RECEPTACLE
				DUPLEX RECEPTACLE
				DUPLEX RECEPTACLE - SPLIT WIRED
				DUPLEX RECEPTACLE - CRITICAL BRANCH
				DUPLEX RECEPTACLE - DEDICATED CIRCUIT
				TELE- DATA SYSTEMS OUTLET
				VOICE ONLY

- JUNCTION BOX WITH FLEXIBLE CONDUIT TO FINAL EQUIPMENT OR FURNITURE SYSTEM POWER CONNECTION

WP XX — ADJACENT LETTERS IN THE SYMBOLS ABOVE INDICATE THE FOLLOWING:

"EP"	RECEPTACLE IS EXPLOSION PROOF
"GF"	RECEPTACLE HAS GROUND FAULT CIRCUIT INTERRUPTER
"IG"	RECEPTACLE HAS ISOLATED GROUND
"TP"	TAMPER PROOF (SAFETY TYPE)
"TVSS"	RECEPTACLE HAS TRANSIENT VOLTAGE SURGE SUPPRESSION
"WP"	RECEPTACLE HAS WATERPROOF COVER
"XX"	RECEPTACLE CIRCUIT NUMBER
"USB"	RECEPTACLE WITH 2 USB PLUGS.

- XX — SPECIAL PURPOSE OUTLET - SEE SCHEDULE "XX" INDICATES OUTLET TAG
- 4FT. MULTI RECEPTACLE STRIP
- PUSH-BUTTON STATION
- GARAGE DOOR OPENER PUSH-BUTTON STATION
- EMERGENCY SHUT OFF SWITCH (2)
- PP — PUSH PLATE STATION
- CB — ENCLOSED CIRCUIT BREAKER
- TGB — TECHNOLOGY GROUND BAR- 1/4" X 4" X 12" COPPER
- RIM — REMOTE INDICATOR MODULE
- MOTOR OR EQUIPMENT
- AS/AF — FUSED DISCONNECT SWITCH, "AS" INDICATES AMPERE RATING OF SWITCH AND "AF" INDICATES AMPERE RATING OF FUSE
- NON-FUSED DISCONNECT SWITCH, CIRCUIT BREAKER IN ENCLOSURE,
- C — CONTACTOR-SEE SCHEDULE
- SWITCHGEAR, SWITCHBOARD OR MOTOR CONTROL CENTER, DASHED LINES INDICATE FUTURE SECTIONS, ARROW INDICATES FRONT
- SURFACE MOUNTED DISTRIBUTION PANELBOARD
- SURFACE MOUNTED NORMAL BRANCH CIRCUIT PANELBOARD
- RECESSED MOUNTED NORMAL BRANCH CIRCUIT PANELBOARD
- T — TRANSFORMER
- HD — HAND DRYER
- KP — KEY PAD (2)

TECHNOLOGY SYMBOLS

- ID — INFORMATION DATA OUTLET
- CE — COMCAST EQUIPMENT CABINET
- CS — COMCAST SPLITTER JUNCTION POINT
- TV — TELEVISION OUTLET-WITH LOW VOLTAGE JACK AND RECEPTACLE
- FACP — FIRE ALARM CONTROL PANEL
- TGB — TECHNOLOGY GROUND BAR. 12" L X 2" H X 0.25" T COPPER BAR WITH HOLES FOR LUGS
- S — SPEAKER - LOCAL SOUND SYSTEM
- E — EQUIPMENT CABINET
- P — PROJECTOR MOUNT
- R — RESCUE ASSISTANCE CALL STATION
- RAP — RESCUE ASSISTANCE CONTROL PANEL
- I — INTERCOM STATION
- C — DOME CAMERA

ELECTRICAL ABBREVIATIONS

AC	ABOVE COUNTER
AFF	ABOVE FINISHED FLOOR
AIC	AVAILABLE INTERRUPTING CAPACITY

LIGHTING DEMOLITION GENERAL NOTES:

1. REFER TO SHEET E001 FOR ALL SYMBOLS, ABBREVIATIONS, AND DETAILS.
2. REFER TO TEMPORARY ELECTRICAL WORK SECTION IN DIVISION 1 GENERAL REQUIREMENTS OF PROJECT MANUAL FOR ALL TEMPORARY ELECTRICAL REQUIREMENTS.
3. ALL DARK DASHED LINES APPROXIMATELY INDICATE EXISTING DEVICES TO BE DISCONNECTED AND REMOVED, UNLESS INDICATED OTHERWISE. REMOVE ANY/ALL UNUSED BOXES, WIRING AND CONDUIT BACK TO SOURCE. ALL PROPERLY SIZED AND PROPERLY SUPPORTED CONDUIT ONLY MAY BE REUSED.
4. MAINTAIN FIRE ALARM SYSTEM THROUGHOUT CONSTRUCTION AND PROVIDE FIRE WATCH, ETC., AS REQUIRED BY LOCAL AHJ. ANY/ALL CEILING MOUNTED DEVICES SHALL BE TEMPORARY SUPPORTED AND PROTECTED, INCLUDING BAGGING SMOKE DETECTORS (AS NECESSARY AND AS PERMITTED), DURING CONSTRUCTION AND SHALL BE REINSTALLED AT APPROXIMATE ORIGINAL LOCATION(S). SYSTEM SHALL BE ACTIVE AND MONITORED THROUGHOUT THE ENTIRE CONSTRUCTION PERIOD.
5. ALL ELECTRICAL CONDUCTORS AND CONDUITS SERVING REMOVED EQUIPMENT AND DEVICES SHALL BE COMPLETELY REMOVED. CONDUIT AND CONDUCTORS SHALL NOT BE ABANDONED IN PLACE. EXISTING CONDUITS AND PATHWAYS MAY BE REUSED. FOR NEW WORK, EXISTING CONDUCTORS MAY NOT BE REUSED, UNLESS SPECIFICALLY NOTED.
6. DISCONNECT AND REMOVE ANY AND ALL ELECTRICAL EQUIPMENT AND DEVICES, ETC. WITHIN DEMOLISHED AREAS AS REQUIRED, UNLESS NOTED OTHERWISE.
7. ANY/ALL EXISTING ELECTRICAL BOXES, RACEWAYS, WIRING, ETC. THAT IS NOT ACTIVE AND ENERGIZED BEFORE, DURING, OR AFTER THE PROJECT COMPLETION SHALL BE DISCONNECTED AND REMOVED COMPLETE. NO ABANDONED BOXES OR RACEWAYS SHALL REMAIN IN THE BUILDING AT PROJECT COMPLETION.

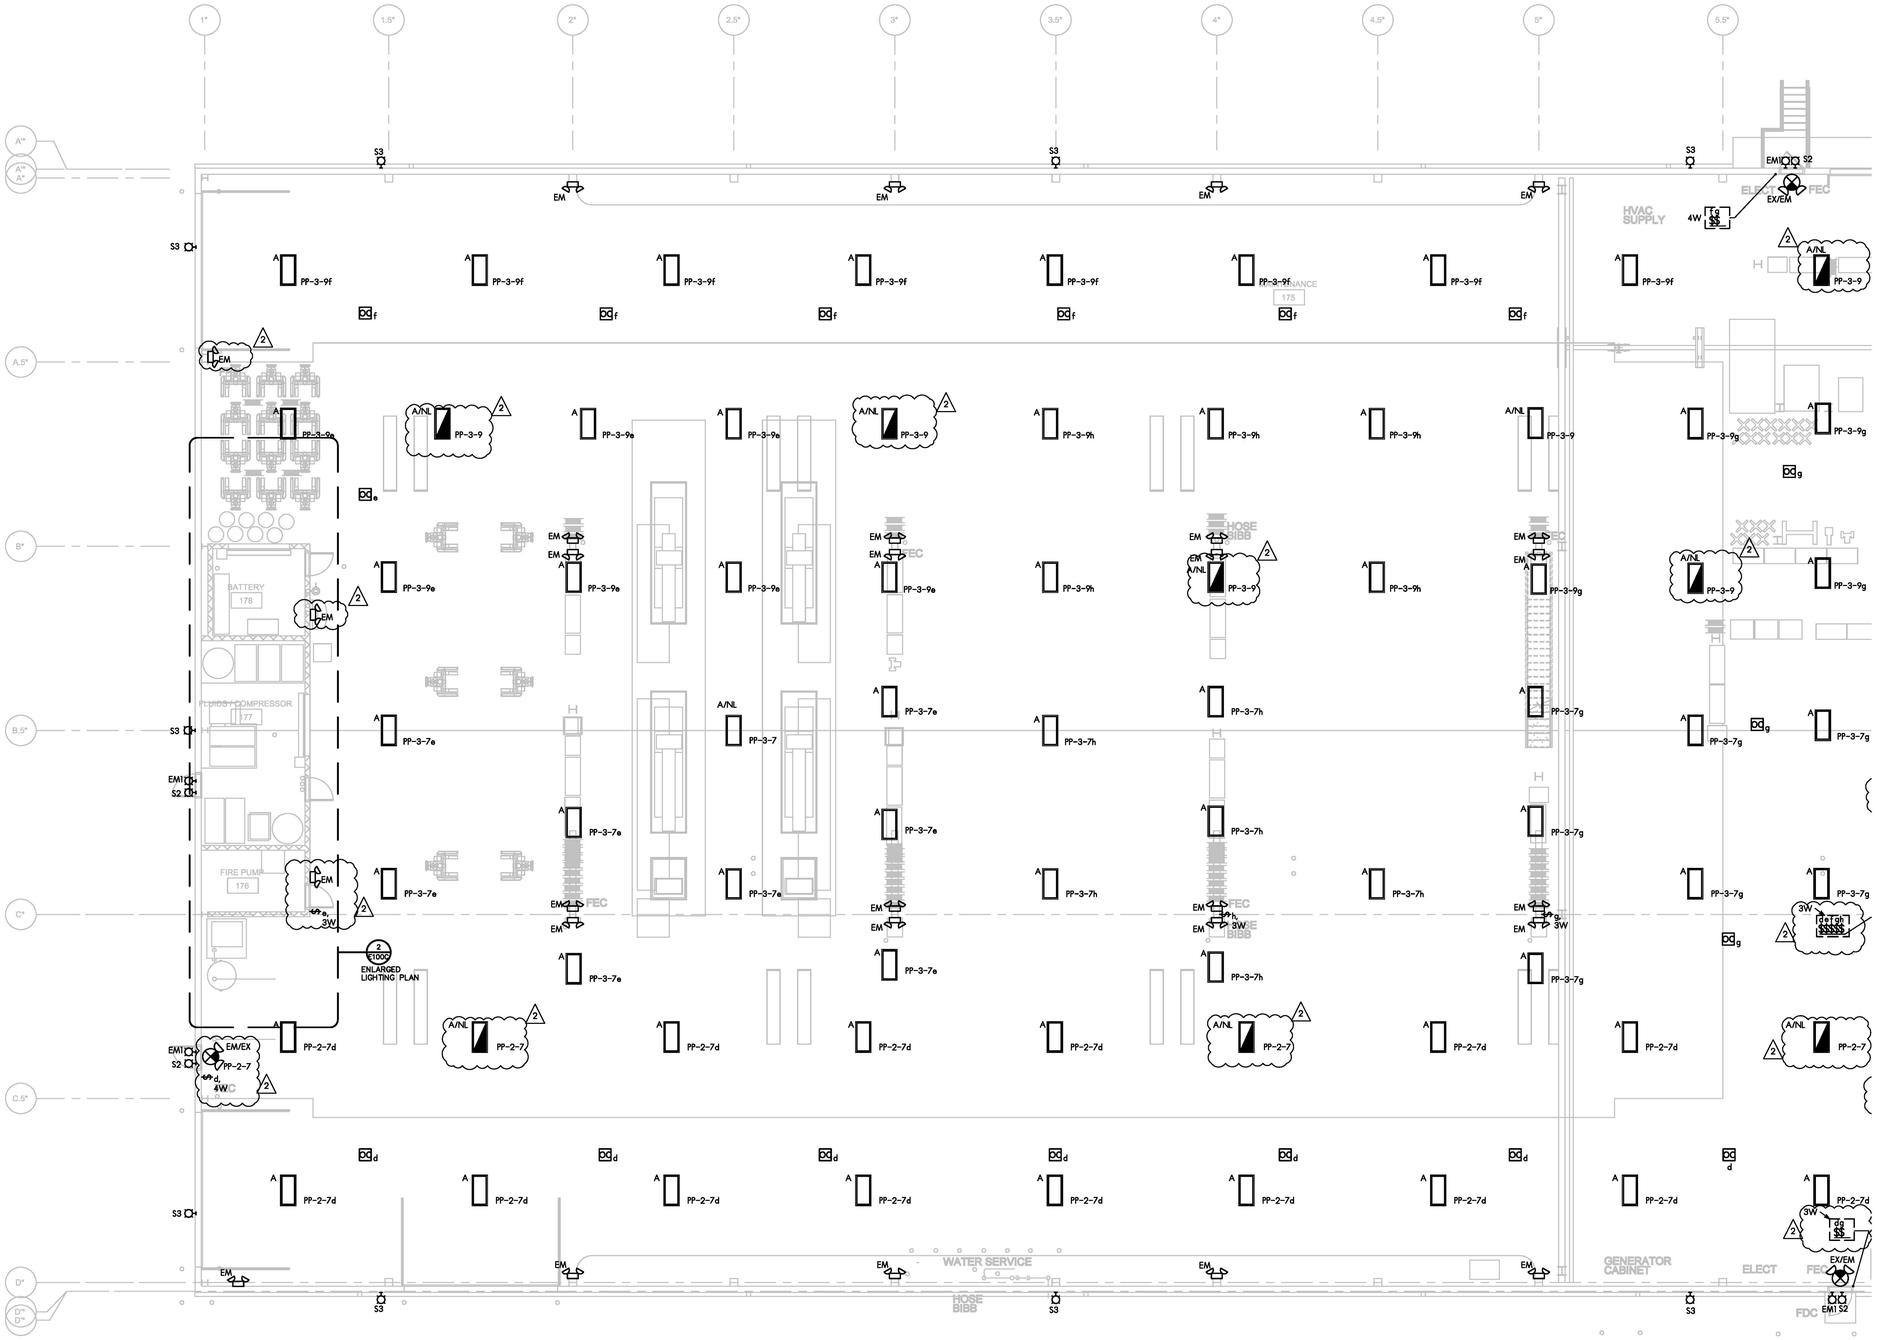
EXISTING PANEL SCHEDULES - 3829 MAINTENANCE BUILDING

2

ED300



1 LIGHTING NEW WORK PLAN - 3829 MAINT. BLDG. - SECTION A
SCALE: 1/8" = 1'-0"

N

LIGHTING GENERAL NOTES:

1. REFER TO SHEET E001 FOR ALL SYMBOLS, ABBREVIATIONS, AND DETAILS.
2. REFER TO ARCHITECTURAL PLANS, SECTIONS, ELEVATIONS, AND REFLECTED CEILING PLANS FOR EXACT LOCATION AND COORDINATION OF ALL LIGHT FIXTURE AND CONTROLLER INSTALLATIONS.
3. VERIFY ALL MOUNTING HEIGHTS OF DEVICES ABOVE MILLWORK WITH ARCHITECTURAL PLANS.
4. WIRING SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE (NEC) AND APPLICABLE LOCAL CODES, INCLUDING PROVISION OF EQUIPMENT GROUNDING AS REQUIRED BY THE NEC.
5. POWER CONDUCTORS SHALL BE SIZED PER THE NEC AMPACITY TABLES (ARTICLE 310), INCLUDING ADJUSTMENT FACTOR AND NEUTRAL CONDUCTOR REQUIREMENTS (FEED AND BRANCH NEUTRAL CONDUCTORS MUST BE COUNTED AS CURRENT CARRYING CONDUCTORS). RUN SEPARATE NEUTRAL CONDUCTORS FOR ALL LIGHTING CIRCUITS.
6. EXIT SIGNAGE IS INDICATED ON THE PLANS BASED ON ANTICIPATED EGRESS PATHS THROUGHOUT THE BUILDING. ELECTRICAL CONTRACTOR SHALL CONFIRM ALL EGRESS PATHS WITH ARCHITECT/OWNER/GENERAL CONTRACTOR DURING CONSTRUCTION AND SHALL ADD/MODIFY EXIT SIGNAGE/EGRESS LIGHTING AS REQUIRED TO COMPLY WITH PATHWAYS.
7. ALL LIGHT FIXTURES SHALL BE PROVIDED WITH QUICK-CONNECT DISCONNECTING MEANS AND A 6'0" (MAXIMUM) FIXTURE WHIP FOR FUTURE MAINTENANCE PURPOSES.
8. LIGHT FIXTURES AND OTHER APPARATUS SUPPORTED BY THE ACOUSTICAL CEILING GRID MUST MEET THE REQUIREMENTS OF NEC SECTION 410.16, MEANS OF SUPPORT.
9. ALL CONDUIT AND WIRING SHALL BE CONCEALED WITHIN ALL FINISHED AREAS. IN UNFINISHED AREAS (MECH. ROOMS, ETC.) ALL CONDUIT AND WIRING MUST BE HIDDEN FROM VIEW AS MUCH AS POSSIBLE AND MOUNTED TIGHT TO BAR JOISTS, ETC. EXPOSED CONDUIT SHALL BE PAINTED TO MATCH PAINTED CEILING COLOR.
10. ALL EXTERIOR LIGHTING SHALL BE FED FROM EXISTING CIRCUITS. EXTERIOR LIGHTING SHALL BE CONTROLLED VIA LUTRON ATHENA NETWORK TIMCLOCK FUNCTIONS. PROVIDE WIRELESS NODE/POWERPACK ON THE INTERIOR OF THE BUILDING IN LINE AT EACH EXTERIOR LIGHT LOCATION. THE EXTERIOR EMERGENCY EGRESS FIXTURES ARE NOT TO BE INCLUDED IN THE ATHENA NETWORK.
11. ALL EMERGENCY LIGHTING SHALL BE FED FROM THE NEAREST NORMAL LIGHTING CIRCUIT IN THE AREA.
12. IN GENERAL, THE EXISTING LIGHTING THROUGHOUT THIS BUILDING WILL BE DISCONNECTED, REMOVED, AND REPLACED. ANY/ALL NEW LIGHT FIXTURES AND SENSORS THROUGHOUT THE VEHICLE AREA(S) SHALL BE MOUNTED TO THE BOTTOM OF THE STRUCTURE/BAR JOISTS AT APPROXIMATELY 20'-0" A.F.F.
13. LIGHTING THROUGHOUT THIS BUILDING SHALL BE CONTROLLED VIA A LUTRON ATHENA NETWORK WIRELESS CONTROL SYSTEM. PROVIDE ATHENA HEAD END SYSTEM, WITH TIMECLOCK FUNCTIONS, LUTRON ENERGI SAVR WIRELESS NODES IN FIXTURES AND LOCAL MANUAL CONTROLS AS SHOWN. PROVIDE LIGHTING MANAGEMENT HUBS, PROCESSORS, SYSTEM SOFTWARE, ETC. AS REQUIRED FOR A COMPLETE OPERATIONAL SYSTEM. REFER TO SPECIFICATION SECTION 26 09 43 FOR ADDITIONAL INFORMATION. ANY/ALL OTHER MANUFACTURERS MUST MEET OR EXCEED THE LUTRON ATHENA SYSTEM AND MUST BE SUBMITTED/APPROVED BY OWNER AND ENGINEER PRIOR TO BID.
14. NOTE THAT THE BUILDING CONSISTS OF AREAS UTILIZED FOR COMMERCIAL GARAGES, REPAIR AND STORAGE. AS A RESULT, ELECTRICAL CONTRACTOR SHALL FIELD VERIFY ANY/ALL AREAS CLASSIFIED AS COMMERCIAL GARAGE, REPAIR & STORAGE PER NEC 511. IN THESE AREAS, ANY/ALL ELECTRICAL WORK WITHIN SHALL COMPLY WITH NEC 511.

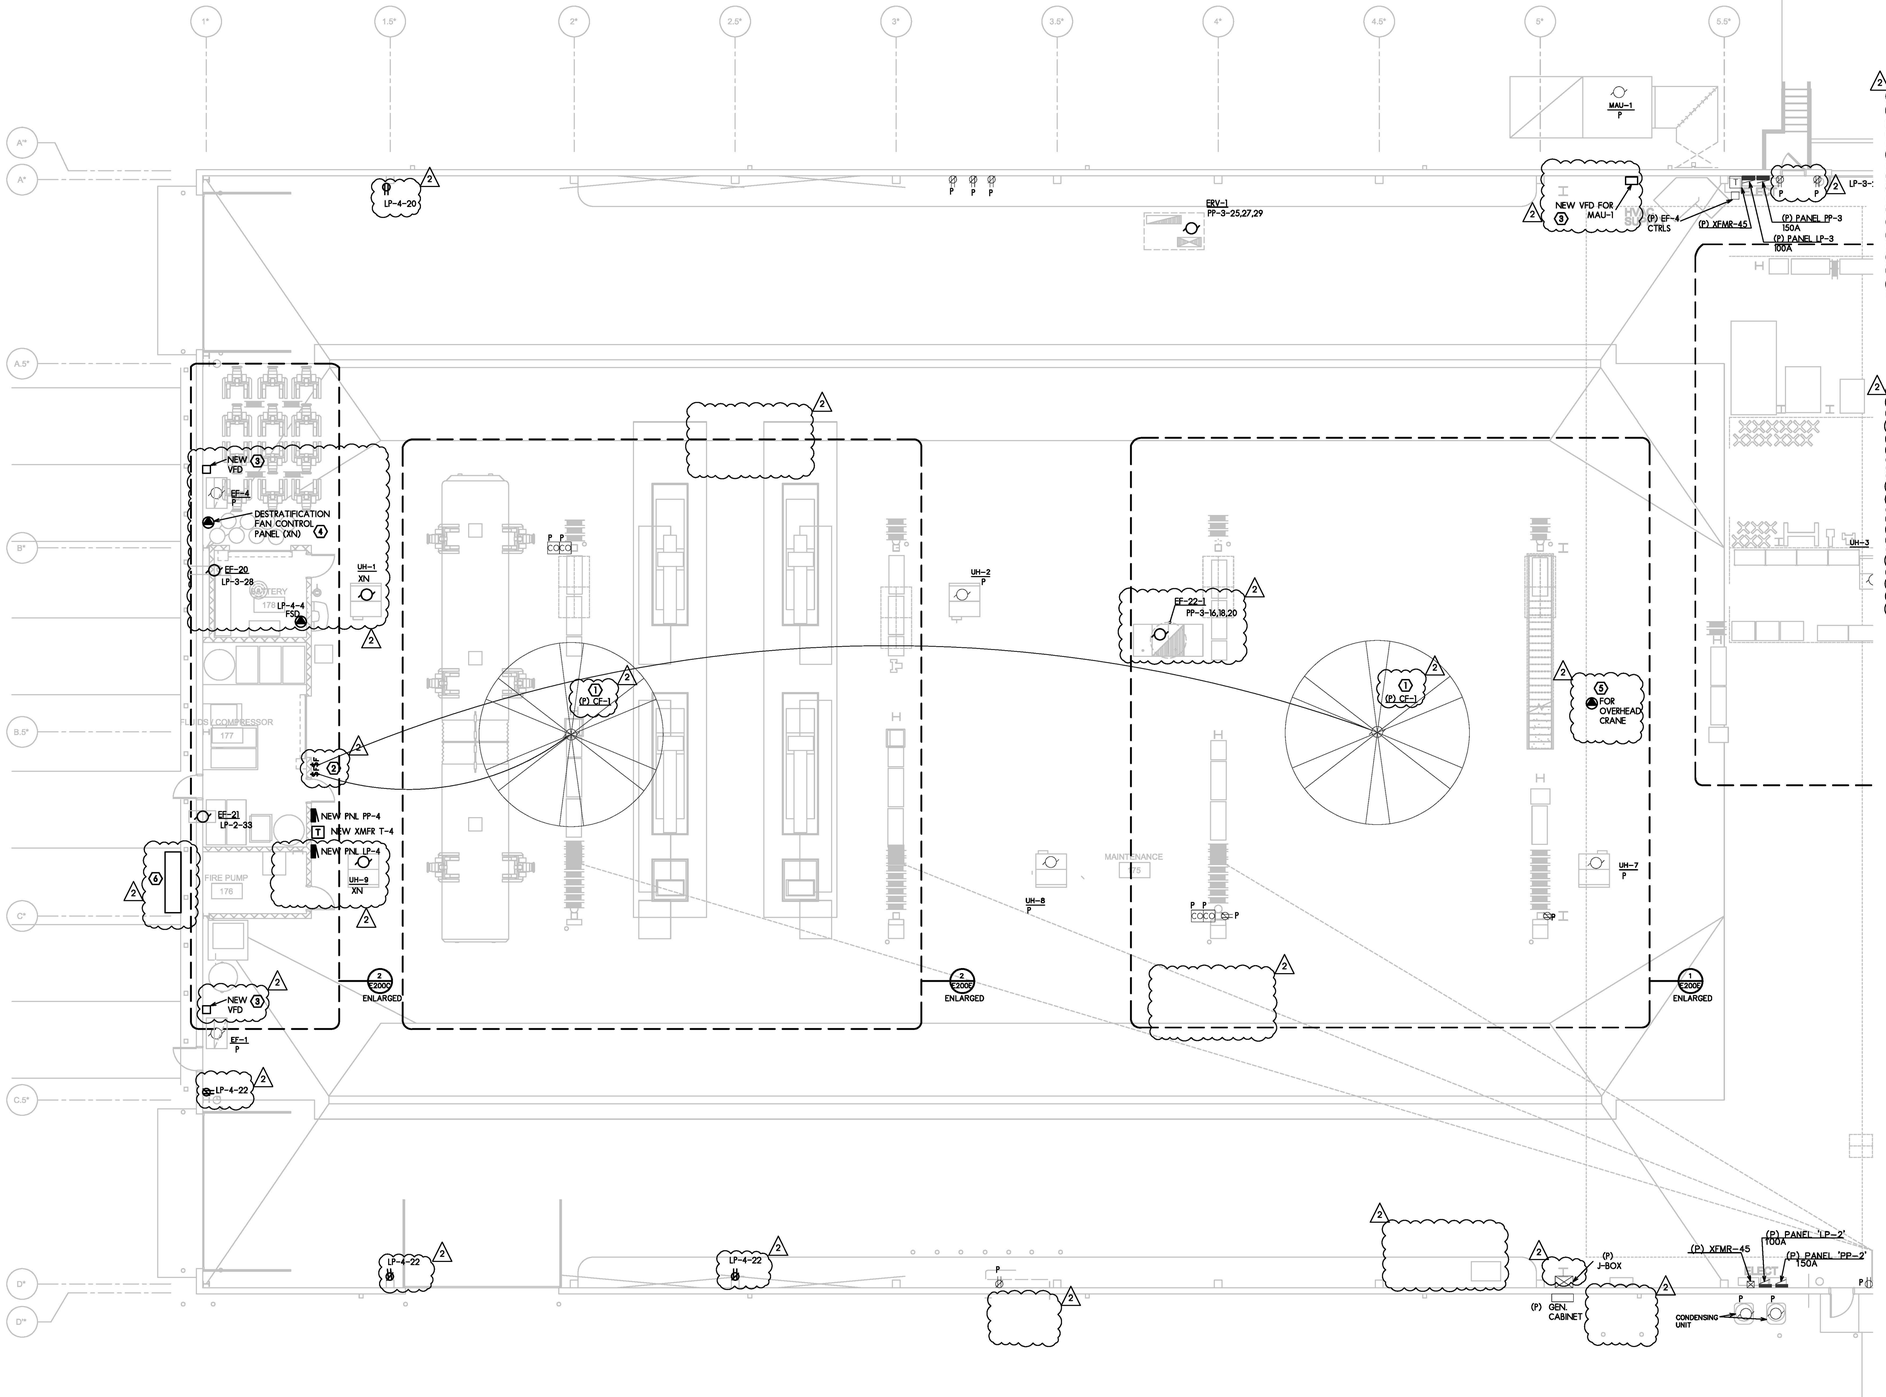
ENLARGED PLANS

A B
KEYPLAN

E100C



POWER GENERAL NOTES:

1. REFER TO SHEET E001 FOR ALL SYMBOLS, ABBREVIATIONS, AND DETAILS.
2. VERIFY ALL MOUNTING HEIGHTS OF DEVICES ABOVE MILLWORK WITH ARCHITECTURAL PLANS.
3. WIRING SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE (NEC) AND APPLICABLE LOCAL CODES, INCLUDING PROVISION OF EQUIPMENT GROUNDING AS REQUIRED BY THE NEC.
4. POWER CONDUCTORS SHALL BE SIZED PER THE NEC AMPACITY TABLES (ARTICLE 310), INCLUDING ADJUSTABLE FACTOR AND NEUTRAL CONDUCTOR REQUIREMENTS (FEED AND BRANCH NEUTRAL CONDUCTORS MUST BE COUNTED AS CURRENT CARRYING CONDUCTORS). RUN SEPARATE NEUTRAL CONDUCTORS FOR ALL LIGHTING CIRCUITS.
5. ALL CONDUIT AND WIRING SHALL BE CONCEALED WITHIN ALL FINISHED AREAS. IN UNFINISHED AREAS (MECH. ROOMS, ETC.) ALL CONDUIT AND WIRING MUST BE HIDDEN FROM VIEW AS MUCH AS POSSIBLE AND MOUNTED TIGHT TO BAR JOISTS, ETC. EXPOSED CONDUIT SHALL BE PAINTED TO MATCH PAINTED CEILING COLOR.
6. ALL LOW VOLTAGE CABLES OR CONDUCTORS OPERATING AT LESS THAN 50 VOLTS SHALL BE IN ELECTRICAL METAL TUBING (EMT) AT A MINIMUM. NO FREE AIR CABLING IS ALLOWED.
7. REFER TO OWNER/OWNERS VENDORS EQUIPMENT SCHEDULES AND PLANS FOR ALL EXACT EQUIPMENT LOCATIONS AND ELECTRICAL REQUIREMENTS. ALL EXACT/FINAL EQUIPMENT ELECTRICAL REQUIREMENTS SHALL BE COORDINATED PRIOR TO ROUGH-IN. ANY/ALL ASSOCIATED ELECTRICAL EQUIPMENT REQUIRED FOR THESE CONNECTIONS SHALL BE CONFIRMED IN ADVANCE OF PURCHASING.
8. E.C. SHALL BE RESPONSIBLE FOR PROVIDING AND INSTALLING THE ROUGH-INS, CONSISTING OF EMPTY JUNCTION BOXES AND CONDUITS, AS REQUIRED FOR ALL LOW VOLTAGE SYSTEMS DEVICES/EQUIPMENT SHOWN ON THE TECHNOLOGY PLANS (SHEETS Q001 – Q701). COORDINATE ALL REQUIREMENTS WITH TECHNOLOGY CONTRACTORS.
9. NOTE THAT THE BUILDING CONSISTS OF AREAS UTILIZED FOR COMMERCIAL GARAGES, REPAIR AND STORAGE. AS A RESULT, ELECTRICAL CONTRACTOR SHALL FIELD VERIFY ANY/ALL AREAS CLASSIFIED AS COMMERCIAL GARAGE, REPAIR & STORAGE PER NEC 511. IN THESE AREAS, ANY/ALL ELECTRICAL WORK WITHIN SHALL COMPLY WITH NEC 511.

KEYED NOTES:

1. DISCONNECT EXISTING CEILING FAN FOR RELOCATION OF EXISTING CONTROLS, REFER TO KEYED NOTE 2. REFEED/RECONNECT ONCE NEW CONTROLS ARE RELOCATED.
2. DISCONNECT AND RELOCATE EXISTING CEILING FAN CONTROLS. REFEED/RECONNECT TO EXISTING CIRCUITS.
3. INSTALL/CONNECT NEW VFD FOR EXISTING HVAC EQUIPMENT. COORDINATE ALL REQUIREMENTS WITH HVAC CONTRACTOR AND FIELD VERIFY ALL REQUIREMENTS.
4. DISCONNECT AND RELOCATE EXISTING DESTRATIFICATION FAN CONTROL PANEL. REFEED/RECONNECT TO EXISTING CIRCUITS.
5. COORDINATE EXACT REQUIREMENT, LOCATION FOR POWER FEED WITH OWNER. FEED FROM PANEL PP-2.
6. PROVIDE NEW MG&E ELECTRICAL SERVICE AS REQUIRED FOR NEW FIRE PUMP. COORDINATE ALL REQUIREMENTS WITH MG&E AND INCLUDE ALL COSTS IN BID.

3. WIRING SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE (NEC) AND APPLICABLE LOCAL CODES, INCLUDING PROVISION OF EQUIPMENT GROUNDING AS REQUIRED BY THE NEC.
4. POWER CONDUCTORS SHALL BE SIZED PER THE NEC AMPACITY TABLES (ARTICLE 310), INCLUDING ADJUSTABLE FACTOR AND NEUTRAL CONDUCTOR REQUIREMENTS (FEED AND BRANCH NEUTRAL CONDUCTORS MUST BE COUNTED AS CURRENT CARRYING CONDUCTORS). RUN SEPARATE NEUTRAL CONDUCTORS FOR ALL LIGHTING CIRCUITS.
5. ALL CONDUIT AND WIRING SHALL BE CONCEALED WITHIN ALL FINISHED AREAS. IN UNFINISHED AREAS (MECH. ROOMS, ETC.) ALL CONDUIT AND WIRING MUST BE HIDDEN FROM VIEW AS MUCH AS POSSIBLE AND MOUNTED TIGHT TO BAR JOISTS, ETC. EXPOSED CONDUIT SHALL BE PAINTED TO MATCH PAINTED CEILING COLOR.
6. ALL LOW VOLTAGE CABLES OR CONDUCTORS OPERATING AT LESS THAN 50 VOLTS SHALL BE IN ELECTRICAL METAL TUBING (EMT) AT A MINIMUM. NO FREE AIR CABLING IS ALLOWED.
7. REFER TO OWNER/OWNERS VENDORS EQUIPMENT SCHEDULES AND PLANS FOR ALL EXACT EQUIPMENT LOCATIONS AND ELECTRICAL REQUIREMENTS. ALL EXACT/FINAL EQUIPMENT ELECTRICAL REQUIREMENTS SHALL BE COORDINATED PRIOR TO ROUGH-IN. ANY/ALL ASSOCIATED ELECTRICAL EQUIPMENT REQUIRED FOR THESE CONNECTIONS SHALL BE CONFIRMED IN ADVANCE OF PURCHASING.
8. E.C. SHALL BE RESPONSIBLE FOR PROVIDING AND INSTALLING THE ROUGH-INS, CONSISTING OF EMPTY JUNCTION BOXES AND CONDUITS, AS REQUIRED FOR ALL LOW VOLTAGE SYSTEMS DEVICES/EQUIPMENT SHOWN ON THE TECHNOLOGY PLANS (SHEETS Q001 – Q701). COORDINATE ALL REQUIREMENTS WITH TECHNOLOGY CONTRACTORS.
9. NOTE THAT THE BUILDING CONSISTS OF AREAS UTILIZED FOR COMMERCIAL GARAGES, REPAIR AND STORAGE. AS A RESULT, ELECTRICAL CONTRACTOR SHALL FIELD VERIFY ANY/ALL AREAS CLASSIFIED AS COMMERCIAL GARAGE, REPAIR & STORAGE PER NEC 511. IN THESE AREAS, ANY/ALL ELECTRICAL WORK WITHIN SHALL COMPLY WITH NEC 511.

KEYPLAN

E200E

PANEL SCHEDULE GENERAL NOTES:

1. THE PANEL SCHEDULES ON THIS SHEET REFLECT APPROXIMATE NEW WORK CONDITIONS AND ARE INCLUDED TO ASSIST IN COMMUNICATING AVAILABLE AND NEW WORK CIRCUITRY WITHIN THE BUILDING. ANY/ALL CIRCUITRY SHALL BE FIELD VERIFIED DURING CONSTRUCTION TO DETERMINE AVAILABILITY FOR POTENTIAL USE/REUSE. PANEL SCHEDULES FOR ANY/ALL NEW PANELS PROVIDED AS PART OF THIS PROJECT ARE ALSO REFLECTED ON THIS SHEET.

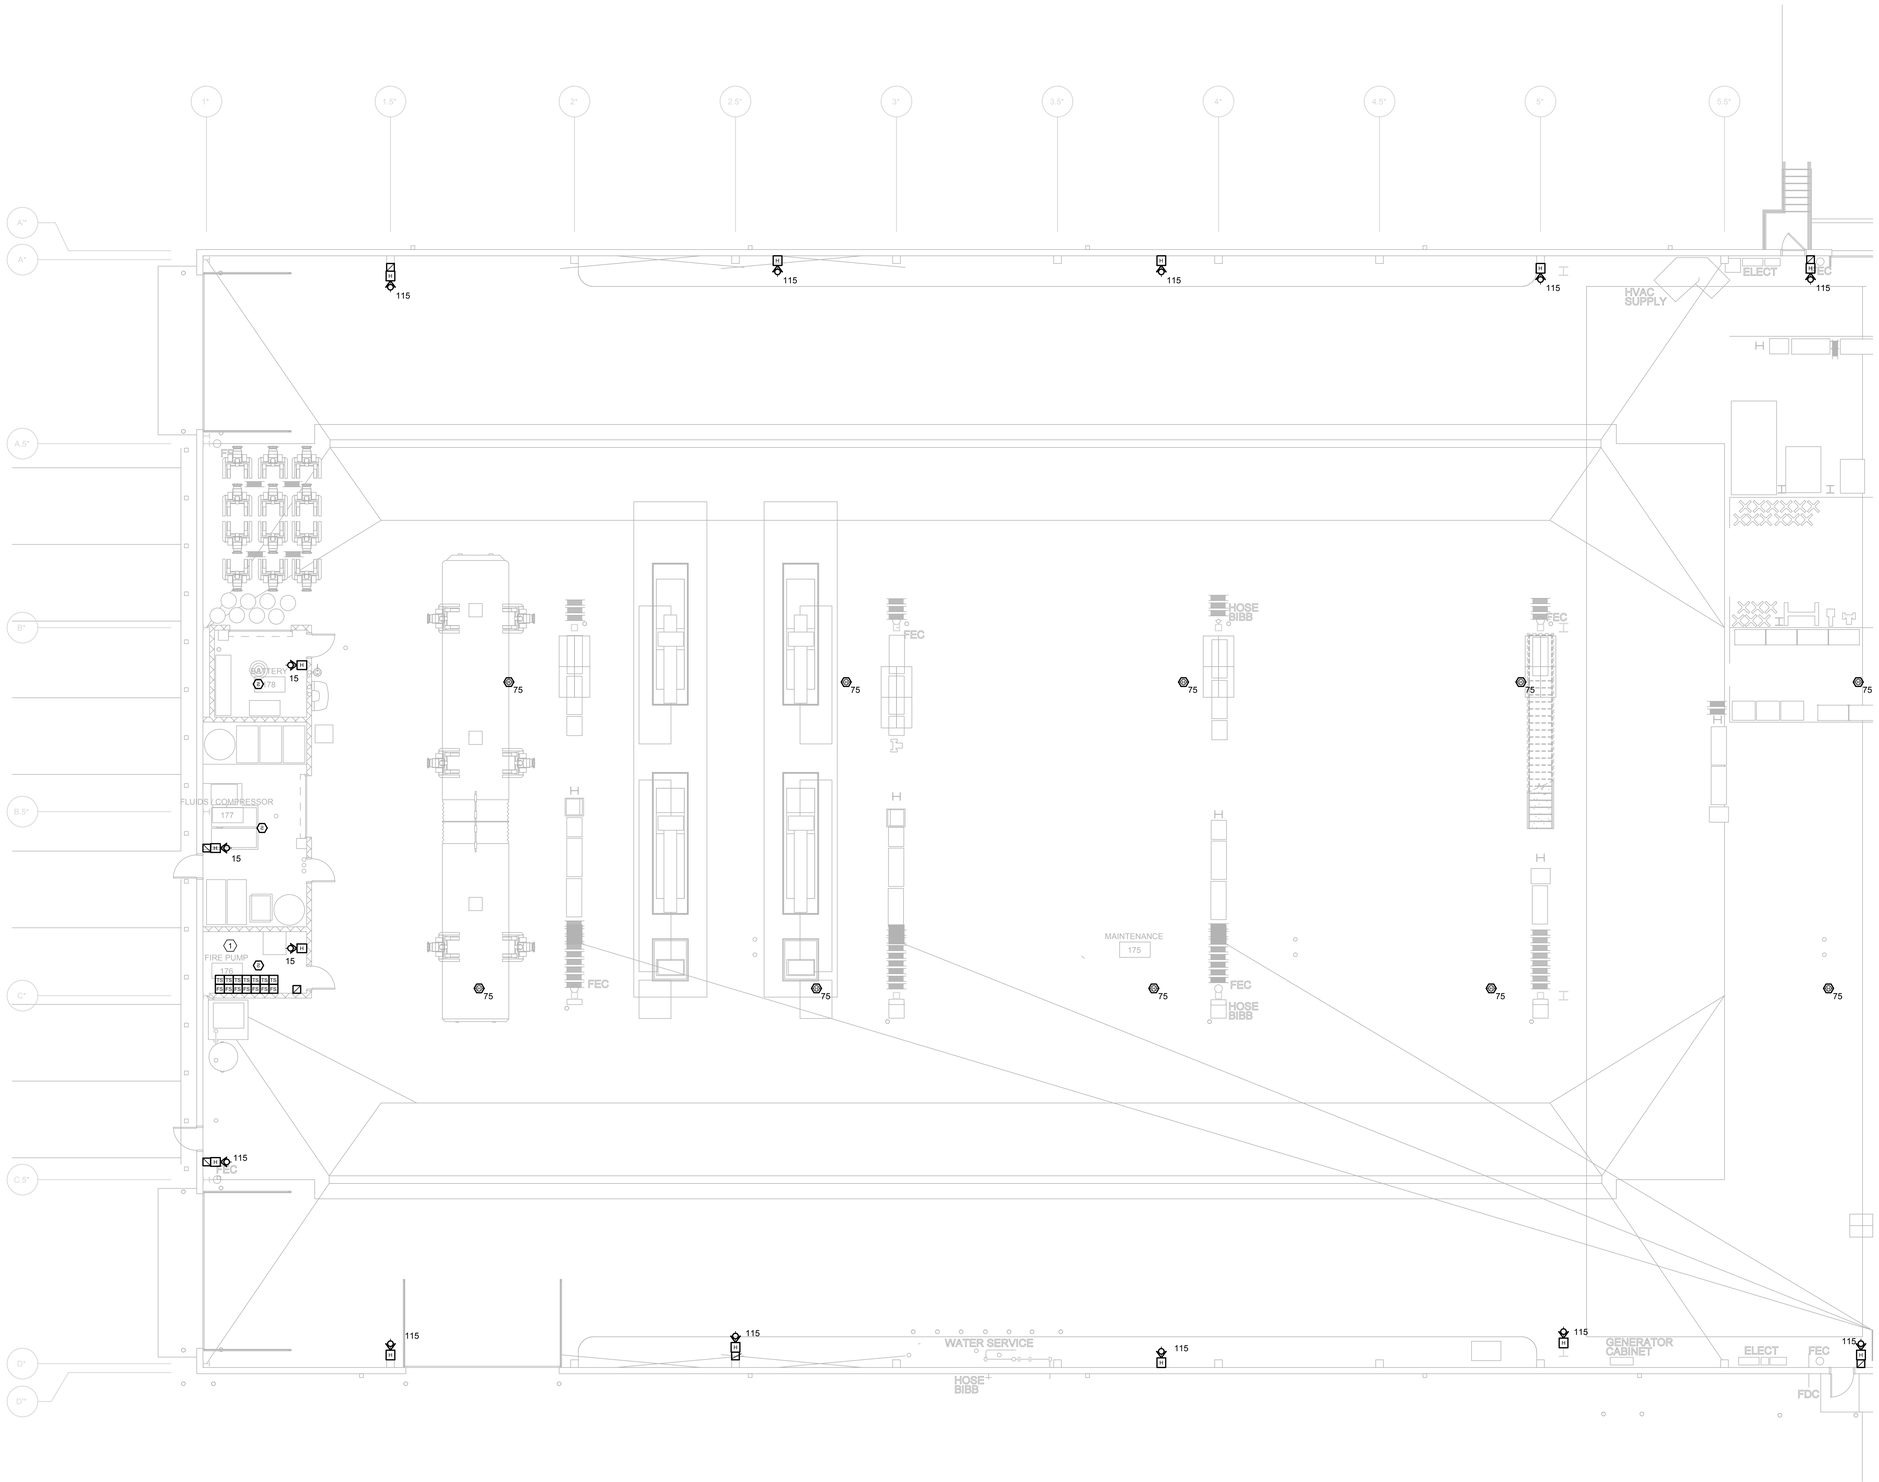
E400



FIRE ALARM NEW WORK PLAN - 3829 MAINT. BLDG. SECTION A

1 SCALE: 1/8" = 1'-0"

N

FIRE ALARM GENERAL NOTES:

1. REFER TO SHEET E001 FOR ALL SYMBOLS, ABBREVIATIONS, AND DETAILS.
2. VERIFY ALL MOUNTING HEIGHTS OF DEVICES ABOVE MILLWORK WITH ARCHITECTURAL PLANS.
3. WIRING SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE (NEC) AND APPLICABLE LOCAL CODES, INCLUDING PROVISION OF EQUIPMENT GROUNDING AS REQUIRED BY THE NEC.
4. POWER CONDUCTORS SHALL BE SIZED PER THE NEC AMPACITY TABLES (ARTICLE 310), INCLUDING ADJUSTABLE FACTOR AND NEUTRAL CONDUCTOR REQUIREMENTS (FEED AND BRANCH NEUTRAL CONDUCTORS MUST BE COUNTED AS CURRENT CARRYING CONDUCTORS). RUN SEPARATE NEUTRAL CONDUCTORS FOR ALL LIGHTING CIRCUITS.
5. ALL CONDUIT AND WIRING SHALL BE CONCEALED WITHIN ALL FINISHED AREAS. IN UNFINISHED AREAS (MECH. ROOMS, ETC.) ALL CONDUIT AND WIRING MUST BE HIDDEN FROM VIEW AS MUCH AS POSSIBLE AND MOUNTED TIGHT TO BAR JOISTS, ETC. EXPOSED CONDUIT SHALL BE PAINTED TO MATCH PAINTED CEILING COLOR.
6. ALL LOW VOLTAGE CABLES OR CONDUCTORS OPERATING AT LESS THAN 50 VOLTS SHALL BE IN ELECTRICAL METAL TUBING (EMT) AT A MINIMUM. NO FREE AIR CABLING IS ALLOWED.
7. MAINTAIN FIRE ALARM SYSTEM THROUGHOUT CONSTRUCTION UNTIL NEW SYSTEM IS INSTALLED, INSPECTED, APPROVED, AND ONLINE/OPERATIONAL. REMOVE ANY/ALL EXISTING FIRE ALARM DEVICES ONCE THE NEW SYSTEM IS ONLINE/OPERATIONAL. PROVIDE FIRE WATCH, ETC. AS REQUIRED BY LOCAL AHJ DURING CONSTRUCTION.
8. ALL FIRE ALARM CONDUIT AND BOXES SHALL BE COLOR RED.

FIRE ALARM KEYED NOTES:

1. PROVIDE FIRE PUMP ALARM AND SIGNALS AS REQUIRED BY NFPA 20:
   - PUMP OR MOTOR RUNNING
   - LOSS OF PHASE
   - PHASE REVERSAL
   - CONTROLLER OR SYSTEM TROUBLE (GROUND-FAULT, PRESSURE-SENSING, VARIABLE SPEED TROUBLE, FAIL-TO-START.)

GENERAL NOTES:

1. THE ABOVE FEEDER SCHEDULE IS A SCHEDULE OF TYPICAL FEEDERS AND SOME SIZES MAY NOT BE UTILIZED.
2. ALL CONDUCTOR AMPACITIES ARE BASED ON TABLE 310-16 OF THE NEC FOR COPPER CONDUCTOR TYPE THW/THWN.
3. FEEDER SIZES SHOWN ON THE RISER DIAGRAM INDICATE FEEDER AMPACITIES AND DO NOT NECESSARILY CORRESPOND TO CIRCUIT BREAKER AMPACITIES. CERTAIN FEEDERS MAY BE SIZED FOR THE DERATION FACTORS REQUIRED BY CODE AND/OR ARE OVERSIZED FOR VOLTAGE DROP.

GENERAL NOTES

A. WORK PERFORMED INCLUDES ALL LABOR, MATERIAL, AND EQUIPMENT REQUIRED TO INSTALL COMPLETE TECHNOLOGY SYSTEMS AS INDICATED ON THESE DRAWINGS AND AS SPECIFIED.

B. ALL TELECOMMUNICATIONS OUTLETS SHALL BE MOUNTED AT HEIGHTS ABOVE FINISH FLOOR AS SHOWN IN THE DEVICE MOUNTING HEIGHT DETAIL U.N.O..

C. SEE ELECTRICAL SPECIFICATIONS FOR LOCATIONS WHERE GRS CONDUIT SHALL BE USED, OR WHERE IMC, EMT, OR PVC CONDUIT MAY BE USED.

D. BOXES LOCATED ON OPPOSITE SIDES OF NON-RATED WALLS SHALL BE OFFSET A MINIMUM OF 6" HORIZONTALLY. BOXES ON OPPOSITE SIDES OF FIRE-RATED WALLS SHALL BE OFFSET A MINIMUM OF 24" HORIZONTALLY. "THRU-TH-WALL" BOXES SHALL NOT BE ALLOWED WITHOUT WRITTEN APPROVAL OF THE ARCHITECT/ENGINEER.

E. TECHNOLOGY SYSTEMS EQUIPMENT/DEVICES SHALL BE MOUNTED SO AS TO ALLOW ACCESS TO ELECTRICAL AND MECHANICAL EQUIPMENT. ALL MOUNTING OF TECHNOLOGY SYSTEMS EQUIPMENT/DEVICES ON EQUIPMENT SUPPLIED BY ANOTHER CONTRACTOR SHALL BE COORDINATED WITH AND APPROVED BY THAT CONTRACTOR IN ADVANCE OF INSTALLATION.

F. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL OPENINGS REQUIRED IN WALLS. ALL OPENING SHALL BE REPAIRED TO MATCH EXISTING BY A QUALIFIED CONTRACTOR AT THE EXPENSE OF THIS CONTRACTOR. ALL CONDUITS THROUGH WALLS SHALL BE GROUTED OR SEALED INTO OPENINGS. PENETRATIONS THROUGH FLOORS AND FIRE-RATED WALLS SHALL BE FIRESTOPPED IN A MANNER THAT MAINTAINS THE RATING OF THE FLOOR OR WALL PENTRATED.

G. ALL TELEPHONE AND DATA JACKS SHALL BE TERMINATED WITH ALL 4 PAIRS TO ALLOW FOR INTERCHANGABILITY.

H. ALL CONDUIT STUBS SHALL HAVE PLASTICE NYLON BUSHINGS INSTALLED PRIOR TO THE INSTALLATION OF CABLES.

KEY NOTES

1. GATE CONTROL 3829.
2. GATE CONTROL 3901.
3. POLE MOUNTED CAMERA, POLE LOCATIONS AND PROPOSED PATHWAYS IDENTIFIED ON SHEET Q601.

PRODUCT LEAFLET

Electric Vehicle Infrastructure

HVC Depot (UL) charging for electric fleets

ABB HVC-C Depot charging systems offer a highly reliable, intelligent and cost-effective solution to charge large EV fleets such as buses, trucks and other commercial vehicles.

—
HVC Depot Boxes and power cabinets, lined up at a depot site.

A practical solution for busy depots
ABB Heavy Vehicle Charger (HVC) products enable electric buses and trucks to charge at the depot ensuring flexibility and scale for every fleet operation that is transitioning to zero-emission transportation.

Key Benefits
+ Smart charging
+ Small infrastructure footprint at vehicle interface
+ Flexible design for roof and floor mounting
+ SAE J1772 CCS and OCPP 1.6 compliant
+ Remote diagnostics and management tools

Sequential Charging
Improving total cost of ownership is easy using the sequential charging feature offered by ABB's depot chargers. This feature allows connection of up to three depot charge boxes with a single power cabinet and vehicles are charged sequentially over time. The system can follow an embedded, predefined charging process or remote triggers sent by a fleet management system via OCPP 1.6.

- Vehicles are charged with high power, maximizing vehicle availability
- The required grid connection is smaller, reducing upfront investments and operational costs
- The compact depot box is easy to install at sites with space constraints
- Optimal utilization of installed infrastructure meaning lower investments in charging equipment.

Buy America
ABB can offer the HVC-C Depot Charging Solution with compliance to the Buy America Act Rule 49 CFR Part 661.5.

Future-proof modular design
Power cabinets can be upgraded from 100 or 150 kW in the field, as well as add additional depot charge boxes, allowing operators to scale their operation and to spread investments over time.

Safe and reliable operation
ABB fast chargers are designed to the highest international electrical, safety, and quality standards, and are certified by notified bodies - guaranteeing safe and reliable operation.

Connectivity and remote services
ABB chargers come with an extensive suite of connectivity features including remote services such as monitoring, management, diagnostics and software upgrades. These advanced services provide equipment owners with powerful insights into their charging operations while enabling high uptime.

ABB E-mobility is your experienced partner
ABB HVC products are based on a decade of high power experience in EV charging solutions. ABB has sold over 30,000 DC fast charging systems in more than 85 countries – and is the leading EV infrastructure technology supplier globally.

Overnight charging 100 kW - 150 kW

A field upgradeable system with future proof reliability

HVC 100C

upgradable

HVC 150C

—

A power upgrade can be done in the field by adding an extra power module. No groundworks, digging and disturbance to the site are required.

HVC 150C*

—

* 150 kW overnight charging system with three depot charge boxes; shown mounted on pedestal option.

Technical specifications

Configurations		**HVC 100C**	**HVC 150C**
Maximum output power		100 kW	150 kW
AC Input voltage		UL: 3-phase, 480Y/277 VAC +/- 10% (60 Hz) CSA: 3-phase, 600Y/347 VAC +/-10% (60 Hz)	
AC Input connection		L1, L2, L3, GND (no neutral)	
Rated input power		117 kVA	170 kVA
Rated input current		UL: 132 A / CSA: 108 A	UL: 198 A / CSA: 168 A
Recommended upstream circuit breaker(s)		UL: 1 x 200 A / CSA: 1 x 150 A	UL: 1 x 250 A / CSA: 1 x 250 A
Output voltage range		150 – 850 VDC	
Maximum DC output current		166 A	200 A
Vehicle connection interface		CCS/Combo Type 1 Connector	
Cable length		3.5 m (11.5 ft) standard; 7 m (23 ft) optional	
DC connection standard		SAE J1772 - IEC 61851-23 / DIN 70121 - ISO 15118	
Environment		Indoor/Outdoor	
Operating temperature		Standard: -10 °C to +50 °C (de-rating characteristic applies) Optional: -35 °C to +50 °C	
Protection		Power Cabinet: IP54 – IK10 (equivalent to NEMA 3R) Depot Charge Box: IP65 - IK10	
Network connection		GSM/3G modem | 10/100 base-T Ethernet	
Compliance and Safety		CSA No. 107.1-16 and UL 2202 certified by TUV BA Rule 49 CFR Part 661.5 (Optional)

PRODUCT LEAFLET

Electric Vehicle Infrastructure

HVC-PD UL opportunity charging for electric buses

ABB's HVC-PD opportunity charging system offers high-power charging via an automated rooftop connection. With typical charge times of 3 to 6 minutes the system can be easily integrated in existing operations by installing chargers at endpoints, terminals and intermediate stops.

The HVC-PD charging system leverages an automated connection to enable extremely fast charge times.

A practical solution for route charging
ABB's Heavy Vehicle Charger (HVC) system architecture offers an ideal solution for opportunity charging, ensuring zero-emission public transit during the day without impacting daily route operations.

Key Benefits
+ Charge in 3 to 6 minutes
+ One charger serves many vehicle makes and models
+ Safe and reliable fully automated connection
+ SAE J3105-1 and OCPP 1.6 compliant
+ Remote diagnostics and management tools

Future-proof modular design
Additional power cabinets can be installed at any time, allowing operators to scale their operation and flexibly spread out infrastructure investments as their fleet grows.

Safe and reliable operation
ABB fast chargers are designed to the highest international electrical, safety, and quality standards, and are certified by notified bodies - ensuring safe and reliable operation.

Interoperability
ABB HVC chargers are based on international standards for operational compatibility with multiple vehicle types and brands. This allows operators to select vehicles from multiple vendors and not be locked into a single supplier.

Connectivity and remote services
ABB chargers come with an extensive suite of connectivity features including remote services such as monitoring, diagnostics and software upgrades. These advanced services provide equipment owners with powerful insights into their charging operations while delivering high uptime.

OCPP 1.6
ABB HVC-PD charging systems can be connected to standardized charging infrastructure management platforms using OCPP 1.6. ABB's HVC suite supports OCPP 1.6 Core and Smart Charging Profiles.

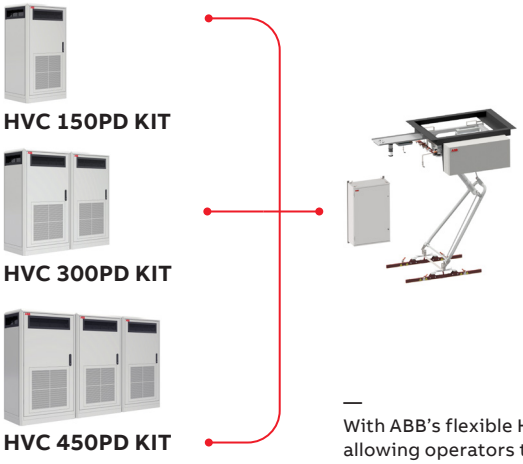
Buy America
ABB can offer the HVC-PD Depot Charging Solution with compliance to the Buy America Act, Rule 49 CFR Part 661.5.

ABB is your experienced partner
ABB HVC products are based on a decade of high-power experience in EV charging solutions. ABB has installed over 50,000 fast charging systems in more than 85 countries – and is the leading EV infrastructure technology supplier globally.

Opportunity charging 150 kW to 450 kW

A scalable system with future-proof reliability

Charging on existing structure



Charging on route

With ABB's flexible HVC architecture, power capability can be expanded over time, allowing operators to spread out infrastructure investments as their fleet grows.

Technical specifications

Configurations		HVC 150PD	HVC 300PD	HVC 450PD
Maximum output power		150 kW	300 kW	450 kW
Input AC connection		UL: 3-phase, 480Y/277 VAC +/- 10 % (60 Hz); CSA: 3-phase, 600Y/347 VAC +/-10% (60 Hz)		
Rated input power		170 kVA	2x 170 kVA	3x 170 kVA
Rated input current		UL: 198 A CSA: 168 A	UL: 2x 198 A CSA: 2x 168 A	UL: 3x 198 A CSA: 3x 168 A
Recommended upstream circuit breaker(s)		1 x 250 A	2 x 250 A	3 x 250 A
Output voltage range		150 – 850 VDC		
Maximum DC output current		250 A	500 A	600 A*
Vehicle connection interface		Inverted crossrail pantograph - OppCharge		
DC connection standard		SAE J3105-1 - IEC 61851-23-1 - ISO 15118		
Environment		Indoor/Outdoor		
Operating temperature		Standard: -10 °C to +50 °C (de-rating characteristic applies); Optional: -35 °C to +50 °C		
Protection		IP54 – IK10 (NEMA 3R)		
Network connection		GSM/3G/4G modem | 10/100 base-T Ethernet		
Compliance and safety		CSA No. 107.1-16 and UL 2202, certified by TUV BA Rule 49 CFR Part 661.5 (Optional)		
Dimensions				
Power cabinet (each)	Number of Power Cabinets	1	2	3
	Dimensions (H x W x D)	2030 x 1170 x 770 mm / 79.9" x 46.1" x 30.3"		
	Weight	1340 kg / 2954 lbs		
Charge pole (includes Pantograph & ACM)	Dimensions (H x W x D)	5240 x 1040 x 300 mm / 206.3" x 40.9" x 11.8"		
	Outreach	4670 mm / 183.9" x 30.3"		
	Weight	1706 kg / 3762 lbs		
ACM Control Module KIT	Dimensions (H x W x D)	1600 x1000 x 476.9 mm / 63" x 39.4" x 18.8"		
	Weight	193 kg / 425 lbs		
Pantograph KIT	Dimensions (H x W x D)	(resting position / bolt-hole pattern) 574 x 1300 x 900mm / 22.6"H x 51.2"W x 35.4"D		
	Weight	387 kg / 854 lbs		

* Limited by inverted pantograph contact ratings

Mobile 50 kW

Simple. Durable. Portable.

With durable and portable design, the Heliox Mobile DC charger is built with the daily activities of service and maintenance personnel in mind. And with no fixed installation required, you'll save thousands on infrastructure costs as well.

Manufactured and tested in the United States ensuring Buy America Act compliance.

Perfect for getting started with EV or scaling up. Simply connect to a 480V AC wall socket and start charging.

With a compact design and no fixed installation, Mobile 50 can be moved to charge anywhere it can be plugged in.

Mobile 50 kW

Durable: A strong metal casing and wheel system means Mobile 50 kW stands up to daily wear and tear in ways other portable chargers simply cannot. And with a NEMA 3R rated enclosure, Mobile can be safely operated both indoors and outside.

Future-proof: The Mobile 50 kW is the perfect EV charging companion, now and in the future. No matter what direction your business is headed, this charger will always be by your side, providing reliable charging when and where you need it.

96.2%
Efficiency

General

Charging standard:	SAE J1772 (CCS type-1)
Communication standard:	DIN70121 / ISO15118-1/2/3
Compliance and safety:	UL 2202 / UL 2231
Power factor above 50% rated:	>0.98
Peak efficiency:	96.2%
Dielectric withstand:	3000 V
Network cellular:	4G modem
Back office:	OCPP 1.6J
Temperature range:	-4 to 104 °F
Operational noise level:	<55 dB(A) @ 40"
System weight:	270 lbs.
Dimensions:	H: 36", W: 20", D 20"
Protection	NEMA 3R
Environment operating:	ISO 12944: C4 H

Input

Input connections, Frequency:	3P + G, 47-63 Hz
Input current limit values:	15 A / 25 A / Max. (user selected)
Full load / idle input power:	54 kVA / 15 VA
Input line-line voltage range:	480 V AC +/- 10%, 60 Hz
Input max. AC phase current:	65 A, inrush current limited

Output

Output DC voltage range:	100 - 1000 V
Rated DC output power:	50 kW
Output power limits:	11 kW (@ 15 A AC input current) 19 kW (@ 25 A AC input current) 50 kW (@ Max. input current)
Maximum DC output current:	80 A

One charger, three settings

Raise or lower your charger input with the turn of a dial, enabling you to activate sessions in situations where power supply may be limited.

Actual power maybe impacted due to vehicle parameters
