CITY OF MADISON

(STC-Form: 05/28/2015)

1. General. Throughout this document, "City of Madison," "City" and "Purchasing" shall be synonymous and mean the City of Madison. The words "bid" and "proposal" are synonymous, as are the words "bidder," "proposer" and "contractor." The phrases "request for proposal," "invitation for bids," "request," "invitation," and "solicitation" shall also be synonymous.
As applied to the winning or selected bidder, the words "bid," "proposal," and "contract" are synonymous.
2. Entire Agreement, Order of Precedence. These standard terms and conditions shall apply to any Purchase Order issued as a result of this Request for Bid/Proposal, except where expressly stated otherwise in the RFP or in a written instrument covering this purchase signed by an authorized representative of the City and the Contractor, in a form approved by the City Attorney (a "Separate Contract"). If such a separate contract is executed it shall constitute the entire agreement and no other terms and conditions, whether oral or written, shall be effective or binding unless expressly agreed to in writing by the City.
If a Separate Contract is not executed, these Standard Terms and Conditions, the City's request for proposals, the version of the vendor's bid that was accepted by the City, and the City's Purchase Order (if any) shall constitute a contract and will be the entire agreement.
Order of Precedence: If there is a conflict between this Section A and any terms in the vendor's accepted bid or proposal, this Section A shall control unless the parties expressly agree to another order of precedence, in writing. If there is a conflict between this Section A and a Separate Contract, the terms and conditions of the Separate Contract shall control.
- I. **TERMS FOR SUBMISSION OF BIDS: The following section applies to the bid/selection process only.**
3. This invitation for bids does not commit the City to award a contract, pay any costs incurred in preparation of bids, or to procure or contract for services or equipment. The City may require the bidder to participate in negotiation and to submit such additional price or technical or other revisions to his or her bids as may result from negotiation. The bidder shall be responsible for all costs incurred as part of his or her participation in the pre-award process.
The City reserves the right to accept or reject any or all bids submitted, in whole or in part, and to waive any informalities or technicalities which at the City's discretion are determined to be in the best interests of the City. Further, the City makes no representations that a contract will be awarded to any offeror responding to this request. The City expressly reserves the right to reject any and all bids responding to this invitation without indicating any reasons for such rejections(s).
The City reserves the right to postpone due dates and openings for its own convenience and to withdraw this solicitation at any time without prior notice.
4. Addenda. Changes affecting the specifications will be made by addenda. Changes may include, or result in, a postponement in the bid due date. Bidders are required to complete the Bidder Response Sheet, acknowledging receipt of all parts of the bid, including all addenda.
5. Price Proposal. All bidders are required to identify the proposed manufacturer and model, and to indicate the proposed delivery time on the attached Proposal Form. Failure to do so may cause the bid to be considered not responsive. If desired, the bidder may include product literature and specifications. The price quoted will remain firm throughout each contract period. Any price increase proposed shall be submitted sixty (60) calendar days prior to subsequent contract periods and shall be limited to fully documented cost increases to the bidder which are demonstrated to be industry-wide.
6. Price Inclusion. The price quoted in any bid shall include all items of labor, materials, tools, equipment, and other costs necessary to fully complete the furnishing and delivery of equipment or services pursuant to the specifications attached thereof. Any items omitted from the specifications which are clearly necessary for the completion of the project shall be considered a portion of the specifications although not directly specified or called for in these specifications.
7. Pricing and Discount.
 - a. Unit prices shown on the bid/proposal or contract shall be the price per unit of sale (e.g., gal., cs., doz., ea., etc.) as stated on the bid/proposal or contract. For any given item, the quantity multiplied by the unit price shall establish the extended price. If an apparent mistake exists in the extended price, the unit price shall govern in the bid/proposal evaluation and contract administration.
 - b. In determination of award, discounts for early payment will only be considered when all other conditions are equal. Early payment is defined as payment within fifteen (15) days providing the discount terms are deemed favorable. All payment terms must allow the option of Net 30.
8. F.O.B. Destination Freight Prepaid. Bid prices must include all handling, transportation and insurance charges. Failure to bid FOB Destination Freight Prepaid may disqualify your bid.
9. Award.
 - a. The City will have sole discretion as to the methodology used in making the award. Where none is specified, the award will be made to the lowest responsible bidder in compliance with the specifications and requirements of this solicitation.
 - b. The right is reserved to make a separate award of each item, group of items or all items, and to make an award in whole or in part, whichever is deemed in the best interest of the City.
10. Responsiveness and Responsibility. Award will be made to the responsible and responsive bidder whose bid is most advantageous to the City with price and other factors considered. For the purposes of this project, responsiveness is defined as the bidder's conformance to the requirements of the solicitation. Being not responsive includes the failure to furnish information requested.

Responsibility is defined as the bidder's potential ability to perform successfully under the terms of the proposed contract. Briefly, a responsible bidder has adequate financial resources or the ability to obtain said resources; can comply with required delivery taking into account other business commitments; has a satisfactory performance record; has a satisfactory record of integrity and business ethics; and has the necessary organization, experience and technical skills.

The City reserves the right to refuse to accept any bid from any person, firm or corporation that is in arrears or is in default to the City, or has failed to perform faithfully any previous contract with the City. If requested, the bidder must present within five (5) working days evidence satisfactory to the City of performance ability and possession of necessary facilities, financial resources, adequate insurance, and any other resources required to determine the bidder's ability to comply with the terms of this solicitation document.

11. Cancellation.

- a. The City reserves the right to cancel any contract in whole or in part without penalty due to non-appropriation of funds.
- b. In the event the Bidder shall default in any of the covenants, agreements, commitments, or conditions and any such default shall continue unremedied for a period of ten (10) days after written notice to the Bidder, the City may, at its option and in addition to all other rights and remedies which it may have, terminate the Agreement and all rights of the Bidder under the Agreement.
- c. Failure to maintain the required certificates of insurance, permits, licenses and bonds will be cause for contract termination. If the Bidder fails to maintain and keep in force the insurance, if required, the City shall have the right to cancel and terminate the contract without notice.

II. **CONDITIONS OF PURCHASE: The following section applies to purchases/contracts after the award. See Paragraphs 1 & 2 for applicability and order of precedence.**

12. Specifications.

- a. All bidders must be in compliance with all specifications and any drawings provided with this solicitation. Exceptions taken to these specifications must be noted on your bid.
- b. When specific manufacturer and model numbers are used, they are to establish a design, type, construction, quality, functional capability and/or performance level desired. When alternates are bid/proposed, they must be identified by manufacturer, stock number, and the bidder/proposer is responsible for providing sufficient information to establish equivalency. The City shall be the sole judge of equivalency. Bidders are cautioned to avoid bidding alternates which do not meet specifications, which may result in rejection of their bid/proposal.

13. Regulatory Compliance.

- a. Seller represents and warrants that the goods or services furnished hereunder, including all labels, packages, and container for said goods, comply with all applicable standards, rules and regulations in effect under the requirements of all Federal, State and local laws, rules and regulations as applicable, including the Occupational Safety and Health Act (OSHA), as amended, with respect to design, manufacture or use for their intended purpose of said goods or services. SECTION 3. SCOPE OF SERVICES

A. GENERAL:

The work under this contract shall consist of completing a topographic survey, Preliminary Plat and Certified Survey Map (CSM) for the lands generally located east of Hawks Woods and Hawks Landing Golf Club. The parcel is east of Meadow Road, between Valley View Road and Mid Town Road and is owned by the City of Madison (Dane County Parcel No.'s 038/0708-324-8001-2 and 038/0708-321-9500-9). The approximate limits of the survey work shall be as depicted on the site map, attached hereto (see attached Exhibit A Project Location and Exhibit B previous survey of property from Sept. of 2000 for reference). The City of Madison (hereafter, "the City"), owner of this parcel, will subdivide the property into public streets, saleable lots for future development and separate outlots that will be dedicated to the public for Storm Water Management/Drainage and Park purposes. The Contractor shall work with the City to design the final lot and street configuration necessary for the preliminary plat and CSM. A conceptual configuration is attached as Exhibit C, and is subject to change until the preliminary plat has been approved by the Plan Commission and Common Council. The City is in the process of attaching the properties to the City from the Town of Middleton and bringing the property into the Central Urban Service Area. The Contractor shall collect all necessary survey data to develop a preliminary plat and certified survey map that are in full conformance with Chapter 236 of the Wisconsin Statutes and the Land Subdivision Regulations (16.23 MGO) of the City of Madison. The location of the existing buildings, driveways, and other substantial, visible improvements shall be depicted on the face of the map as required by State Statute and City of Madison Ordinances. The Contractor shall also be responsible for collection of all survey data necessary to aid in the design of storm water ponds, public utilities and streets, and assist in park planning and development. This will include all topographic data consisting of 1 foot interval contours, existing vegetation (trees and brush), public and private utilities, water features, site improvements, and any additional existing features.

B. CONDUCT SITE SURVEY AND PREPARE SUBDIVISION PLAT

GENERAL SURVEY DELIVERABLE REQUIREMENTS

The Contractor shall supply all data needed to a level of detail sufficient to prepare a digital terrain model (DTM) capable of generating 1 foot contours to national mapping standards. The Contractor shall collect full cross-sections of all adjacent streets and also longitudinally for approximately 100ft of the existing streets adjacent to the property as necessary to design the future public improvements. The cross sections shall be collected at twenty-five (25) foot intervals perpendicular to the street centerline along the identified project limits. All break lines shall be defined including, but not limited to, flow line, top of bank, bottom of bank, centerline of street, top of curb, edge of gutter, flow line, edge of pavement and sidewalk. The elevation of all driveway centerlines shall be recorded at the flow line, edge of gutter, both edges of sidewalk and 10 feet beyond the Right of Way. The Contractor shall locate and record all public and private utilities and easements.

The Contractor shall record all topographical features including, but not limited to, bench marks, control points, property irons, all PLSS corners, drive aprons, utilities (above and below ground), break lines, trees, areas of brush, buildings, retaining structures, fencing and any other pertinent physical features. The center of rim locations shall be recorded for all utility access structures, and all invert elevations of all culverts, pipes, and structures used for storm sewer or sanitary sewer shall be recorded and labeled. Depth to top nut of water valves shall also be recorded. The Contractor shall notify Diggers Hotline prior to site surveying for marking of all underground facilities. The Contractor shall record and label facility centerlines.

It is understood that prior to surveying, the City Engineer shall provide a utility map showing structures to be included for survey that are beyond the limits of the survey. The Contractor shall assume that they shall survey one structure upstream and downstream of the survey limits, for both storm and sanitary sewer

(when they are present). Utility access structure inspections shall not be required with the survey work, but the collection of all utility inverts shall be included.

When working on any City of Madison project, the Contractor shall comply with all OSHA standards. The Contractor shall provide appropriate traffic control in accordance with the Manual on Uniform Traffic Control Devices (MUTCD).

All data shall be collected in Wisconsin County Coordinate System – Dane Zone, NAD83 (2007) datum. All horizontal and vertical control points (minimum of three (3) of each per project location) shall be surveyed in by the City of Madison and provided to the Contractor. All survey data shall be referenced to NAVD 88 (pre 2007 adjustment) ft for vertical datum. Various surveying technologies (i.e. GPS, Conventional Total Station, low level aerial mapping) may be used as long as minimum survey standards defined above and also by 236.15 ss and Wisconsin Administrative Code Chapter A-E 7 are satisfied.

The Contractor shall use the established horizontal and vertical control as provided by the City of Madison (minimum of 3 points per project). The Contractor shall densify the horizontal and vertical control as needed for the survey and shall run a level circuit for the project to check for accuracy. The Contractor shall provide benchmarks from the adjusted level loop. If GPS is used to establish vertical and horizontal control, the Contractor shall provide a check on accuracy by checking established control locations. If vertical control is established using GPS, the vertical control must be distributed across the site using conventional level circuits to the minimum vertical standard noted below. The Contractor shall supply all survey notes for all additional horizontal and vertical survey control points that they have set for the project.

For level loops establishing benchmarks or control for the project, the tolerance for the closure shall be 0.03 feet multiplied by the square root of the length of the level loop in miles.

Control monuments shall be of solid material type consistent with the terrain in which the monument is to be set and provide a degree of permanence for a minimum of 3 years. The Contractor shall be responsible for replacement of all lost control points within that time period. Monuments should be witnessed in a manner that allows them to be easily found by the user in a reasonable period of time.

The following is a list of typical acceptable monuments types of various terrain, but is not limited to these monuments:

EARTH: Acceptable monuments set in earth are a rebar size #3 or larger with a minimum length 8", a nail 60d or larger, and a pipes size ½ " or larger with a minimum length 8".

ASPHALT: Acceptable Monuments set in asphalt are a P.K. nail or equivalent, a masonry nail, a railroad spike, a gin spike, and a Mag spike or equivalent.

CONCRETE: Acceptable Monuments set in concrete are either a cut "X" or a drill hole.

BENCHMARK: Vertical benchmarks shall be placed on monuments or structures of a type that are not susceptible to vertical movement due to fluctuations in surrounding environmental or weather conditions.

SPECIFIC SURVEY LIMITS AND REQUIREMENTS

The survey limits are detailed on map in Exhibit A: Project Location Map. This project shall conform to the general survey requirements as described above.

PRELIMINARY PLAT AND CSM REQUIREMENTS

It is expected that the City shall apply for the preliminary plat and certified survey map approval with the City of Madison. The Contractor shall be required to provide for use in the application a stamped preliminary plat, certified survey map, PLSS tie sheets and/or monument condition report letter in

accordance with all State, County and local subdivision platting requirements, and make modifications to the documents and maps as required to have the plat and CSM approved by the City so that the City can then record the CSM with the Dane County Register of Deeds. **The Contractor is responsible for ordering a 60-year title report and/or title updates for the parcels involved, with the cost included in the proposal.** The Contractor shall be required to provide the preliminary plat and CSM on recordable media material that meets the minimum requirements for recording as established by statute and the Dane County Register of Deeds and shall monument all lot and outlot corners as required by statute.

Any services involving the rezoning of the parcels as necessary for the subdivision plat are not included in the scope of services and it is assumed that the City will complete those tasks.

C. SURVEY DELIVERABLES

The Contractor shall understand that all documents and data transmitted to the City, become the property of the City of Madison, along with all rights to use, copy, and distribute these documents and this data, now and in the future. The Contractor shall meet with City staff to discuss the project requirements and to determine the best method of transmitting the digital data. The City may require that the Contractor convert the data to the City's level schematic by utilizing a *.csv file to convert the data. The City would provide the *.csv file or work with the Contractor on the file format prior to the survey work. Any existing digital files provided by the City may require conversion to the appropriate format and level schematic based on the meeting with City staff.

All survey data shall be transmitted in both digital and printed format. The digital format shall be submitted on CD or by electronic mail along with the printed copies of the data and corresponding documents. All submittals shall be accompanied by a cover letter dated and signed by the Contractor. The cover letter shall be to the attention of the Project Engineer, contain the project name and number, a list of files being transmitted, a description of the data contained in each file, and a statement conveying full rights, to the City, for use of the data being transmitted.

All digital text data shall be submitted in a format compatible with Microsoft Office 2007. All survey and design digital data shall be in Wisconsin Coordinate Reference Systems – Dane Zone, U.S. Survey foot, NAD83 (2007) datum and NAVD 88 (pre 2007 adjustment), feet, for vertical datum. All digital data shall be readily compatible with the City's hardware and software, which is currently **MicroStation V8i(SELECT Series 2) on a Windows XP operating system.**

The following digital design files shall be submitted:

1. One design file shall be a 3D file of the existing topography and shall follow the City of Madison level name schematic. This design file shall contain all the symbols and line work of the topographic features as described in Subsection B, Conduct Site Survey. Any 3D break lines and random points used for the DTM are to be in this design file and at the true elevation.
2. One design file shall be a 3D file of the surface contours, triangles and boundary of the existing topography.
 - a. The interval display for the contours shall be 5' Major and 1' Minor unless the project topography requires a different interval. In that case, the City will work with the Contractor to find an appropriate interval. No contour smoothing or labeling of the contours shall be done when displaying the elements in the design file.
 - b. The Triangulate Irregular Network (TIN) displaying all the triangles used to create the DTM. The triangles displayed shall not be modified by swapping edges or manually deleting triangles. Additional breakline data will be used when needed to further define the DTM.

c. The use of boundaries shall define and constrain the DTM limits.

3. CADD file(s) of the Preliminary Subdivision Plat

4. CADD file(s) of the Certified Survey Map

The files described in 1 and 2 may be submitted as one file if approved by the City and the file follows the level name schematic.

Design files shall be created at full scale, with the Global Origin offset -0, 0, 0 (XYZ, in Master Units) from the design plane center, Master Units of US Survey feet with a label of "sf" (no quotes) in lower-case letters, Sub Units set to "Custom" (1000 non-labeled units = 12 US Survey inches), and 1000 Positional Units (Units of Resolution) per US Survey foot.

The surface deliverable will be a LandXML file that will contain the data necessary to create a matching surface in the City's hardware and software platform. The units of the LandXML shall be set to survey foot and decimal degrees. The LandXML file must include the following information:

- Random Points
- Breaklines
- Boundary Exterior

LandXML files that do not meet the format requirements outlined above will be returned to the Contractor for correction and resubmission. If the project contains one or more bridges supplemental LandXML files shall be provided for each bridge deck DTM. If the project contains any overhang or undercut areas, supplemental LandXML files shall be delivered to accurately represent field conditions.

Survey shots shall be submitted in separate ASCII text files with the format **point#,northing,easting,elevation,description** separated by commas with each point on a separate line. This ASCII text file shall have no headers or discontinuities (blank lines) in the data list. All survey shots shall have a text description. A text file shall be included, which defines all abbreviations used in survey shot descriptions. Survey shots, which have either a numeric code or a station and offset as the description, will not be accepted. The survey shots shall be separated into the following four text files: 1) all survey shots, 2) DTM shots, 3) non-DTM shots and 4) Control Points. All the survey shots shall be provided in a separate file. The DTM shots shall include any survey points required for the creation of the digital terrain model (for example, ground shots and break line shots). The non-DTM shots are survey points that may distort the actual contour model (for example, storm and sanitary sewer invert elevations, fire hydrant (top nut) and other topography features not recorded at the actual ground elevation).

The Contractor shall supply a key that includes a description of all project vertical bench marks, symbols and survey codes, break lines and line work. Paper copies shall be folded to a size not exceeding 9" x 14". The folded copies shall be clearly labeled, with the project name, project number, and description of the contents on the upper right corner of the outer surface when folded. Plots shall show all information, except the node/shot information and triangles.

The Contractor shall use the benchmark and horizontal control as provided by the City of Madison and shall provide a level loop check for the data provided.

Level schematic of surveys deliverables shall follow the current City of Madison level and linestyle libraries. Libraries will be sent to the Contractor at their request.

The Contractor shall provide Digger's Hotline confirmations for all areas marked. If utility system maps are provided by a utility, the Contractor shall provide copies of the mapping. All utilities shall be required to field mark all their facilities. The Contractor shall include MG&E digital system maps as part of the deliverables.

Utility Verification – The surveyor shall send the survey drawings to non-City utility contacts (MG&E, Alliant, AT&T, etc.) by letter copied to the City. The letters shall be sent to all utilities shown on the Digger's Hotline tickets for that representative project. The letter shall specify that the utility reply to the surveyor by letter or email within two-weeks to verify that their facilities are shown correctly within the project limits. If any modifications to the survey are necessary due to utility verification, the surveyor shall modify the drawings accordingly. The verification reply letter or email from the utilities shall be submitted to the City with the final deliverables. The City reserves the right to withhold payment until all deliverables have been submitted. **If the utility company does not mark the project area during survey, provide documentation of no marks to the utility company with the verification letters. A copy of this letter shall be provided to the City.**
