RE: Madison Metropolitan School District – East High School Addition
Plan Commission - Letter of Intent

COMMISSIONERS, on behalf of the Madison Metropolitan School District, we are seeking approval from the Plan Commission for an addition to East High School. We are seeking approval for a single-story addition to serve as a main entrance to the existing fieldhouse.

Proposed Single Story Building – The proposed single-story addition is approximately 4,800 gross square feet (GSF) in size and will serve as the main entrance to the existing fieldhouse. This addition also adds another level of security to the existing school as well as an access point to the fieldhouse in lieu of having to travel through the entire school. The location of the proposed addition is on the southwest side of the existing school and is accessed from N 4th Street. Although portions of the existing high school are historically significant. This addition is not located adjacent to the historically significant building elements.

The major exterior materials will be brick, metal panels and aluminum curtain wall system. The intent is to bring in a modern element and mesh it with the existing context of the building to provide a new largely glass entrance to the school that will invoke excitement for those entering for sporting events. The space will function as the main entrance for larger events to be held in either the adjacent fieldhouse or pool. There will be concessions and new toilet facilities added to help support these events.

Best regards,

Kenneth R Turba, AIA
Project Architect
