Letter of Intent: Program Statement

No structural changes are planned for the buildings. We are planning change in the way the land is being used. We are specifically seeking to add “Community Living Arrangement, Adult Family Home, and Adult Daycare” to the Zoning Text.

Angel Advocate Life Center has planned to accept 8 ambulatory young adults between the ages of 18 to 27 years old on the autism spectrum disorder or other related service needs at 3402 Monroe Street. The two-unit residential facility has 4 bedrooms in each building. Angel Advocate Life Center’s residential home and adult daycare programming are designed to build a safe and nurturing community of uniquely-abled adults to be optimistic, altruist and knowledgeable in an environment that seeks to cultivate sustainable lifestyle opportunities.

Residents of Angel Advocate Life Center will be encouraged to enroll and participate in the accompanying adult day program at the Monroe House from Monday through Friday (8:00 am to 3:00 pm). In order to effectively support our uniquely-abled adults through academic scaffolding and or deep person-centered developmental service care plans, residents and participants will work on enhancing daily living skills at our center-based facility and within the community. We will work together to apply these skills to the natural environment and prepare for independent or supported independent living. Instruction and scaffolding will be designed specifically for those with ASD and related disorders on a case-by-case basis. We will focus on learning independent living skills; developing healthy relationships; and creating meaningful life experiences and potential employment opportunities.

Residents and participants will also be supported with those that are currently employed. We will provide ongoing support services for those who are currently employed or are seeking employment in the community. Our philosophy is to build off the natural supports available from the employer, then assess what evidence-based practices can be put in place to ensure success. In addition to employment support and our daily living skills program, we will offer special education services. We will use group-based dialogue techniques to increase personal effectiveness through rational-emotive imagery, communication skill training, and other exercises for participants that may need help with emotional difficulty, anxiety, mental processing, and other emotional functioning.

The requested change in land use is specifically seeking to add "Community Living Arrangement, Adult Family Home, and Adult Daycare" to the list of permitted uses in the zoning text.

No changes to the buildings are being planned.
