

Shady Wood Neighborhood Development Plan

March 2022

The City of Madison's Planning Division will soon begin a process to prepare the Shady Wood Neighborhood Development Plan. The Planning Area covers approximately 425 acres south of Mid Town Road and west of Woods Road.

The Plan will include detailed recommendations regarding land uses, transportation, and public utilities and services.

What is a Neighborhood Development Plan?

The City of Madison prepares Neighborhood Development Plans (NDPs) to guide the future growth and development in undeveloped areas on the City's periphery. NDPs include detailed recommendations regarding land use, the transportation network, open space, extension of public utilities and services, and more.
