January 4, 2023

This letter is to inform you that the City is in the process of designing stormwater improvements for the existing East Towne Detention Basin parcel. The project is located south of East Springs Drive and east of Zeier Road at 1801 Zeier Rd. These improvements will help reduce sediment from the upstream runoff and reduce peak flow prior to being released downstream.

The project will consist of adding two engineered wet detention cells within the existing detention basin footprint. These cells will be located on the northwest and northeast side of the existing detention basin where stormwater currently enters the existing basin. Some storm sewer reconfiguration on the site will also be required as part to this project to allow for proper inflow into the detention area and promote trash removal. Maintenance access roads will also be incorporated into the project to allow for future maintenance of the basin system. Once the project is completed, the disturbed areas will be seeded with a wet prairie mix and maintained by the City. We are hoping to bid these improvements in January 2023 and begin construction in March 2023. For more information please see the city's project website at: <https://www.cityofmadison.com/engineering/projects/east-towne-detention-basin-improvements>

If you have questions about the project, please contact Grant Pokos at (608) 266-4862 or gpokos@cityofmadison.com.

Sincerely,

 For:
James M. Wolfe, P.E., City Engineer
