

Option 3: Improve Segoe Rd & Owen Drive as alternative north/south bike routes to Midvale Blvd

Pros:

- Maintains all parking on Midvale Blvd for residents
- Less expensive option for now, and can still look for permanent Midvale Blvd redesign in the future during a reconstruction
- Can improve Segoe Rd & Owen Dr through signing, pavement markings, and improvements to cross Mineral Point Road (investigate protected intersections)
- Can add larger bumpouts at pedestrian crossings

Cons:

- Midvale Blvd remains as a high-stress, poor bike option
