CITY OF MADISON INTER-DEPARTMENTAL CORRESPONDENCE

DATE: May 10, 2017

TO: Dave Schmiedicke, Finance Director

FROM: Michael Koval, Chief of Police

SUBJECT: Police Department 2018 Capital Budget Requests

The Police 2018 capital budget has been developed after careful consideration of the Mayor's instructions and the prioritization of police capital needs. Although each agency was asked to consider moving projects out further in the Capital Improvement Plan (CIP), since we moved several projects back last year, we were unable to accommodate this request for the next CIP. In fact, due to software needs for crime analysis, it was necessary to move a portion of the project slated for 2020 up to 2018. This was accommodated by delaying funding for part of the building improvement program.

Although there are no controversial issues in our current submission, I believe it's important to note concerns with the current process. In particular, this is now the second year in which agencies are unable to submit any requests for items not currently funded in the CIP. This creates significant issues when no additional capital proposals can be submitted for any year prior to 2024.

For police, this creates particular concerns when reviewing facility needs. For years, the Department has highlighted an ongoing need to accommodate city growth by adding facilities. In fact, the 2015 CIP included funding for a Property & Evidence Complex to be built in 2018. This project has been discussed at length in the past, and was requested as part of every capital process since 2012. However, with the new process that doesn't allow for the submission of supplemental requests, we no longer have a forum for presenting future needs. Yet the need for this facility continues to exist. The goal is to consolidate services into a single site that provides office space, property storage, impounded vehicle and abandoned bicycle storage, forensic services, a large vehicle processing area, and safe, convenient customer access. Currently, property is maintained in several locations throughout the city, including a rented facility.

With the continued growth of the city, and particularly the planned growth on the north and east sides, we also recognize that there will be a future need for a larger district station. Discussions regarding how and where that facility should be situated, and how the north and east districts would be adjusted, should begin now in order to ensure adequate service as the city expands. The North District Station is currently over capacity and has no options for additional space. The East District Station has reached its capacity as well. The previous process to add a district station took ten years, and it is likely that evaluating the need for an additional district station will take a significant amount of time, particularly when allowing for sufficient public input. We believe that these discussions should begin now and that the City should consider the need for this facility in 2023.

Finally, each year we become aware of new and/or improved technology that is certainly worth exploring in order to improve both efficiencies and service. As an example, for year's public safety agencies have been using AVL (automated vehicle location) systems to improve service (the Madison Fire Department and Dane County Sheriff's Office both use AVL currently). The Madison Police Department has explored

the use of AVL systems integrated with the CAD in order to more efficiently assign squads to emergency calls, and to provide increased officer/community safety. Although we are currently exploring more cost effective options, those do not provide the level of integrated service enjoyed by other agencies. Should the MPD determine that the deployment of AVL would be more efficient and increase service to Madison residents, with the current budget process there is no way to make the City aware of the possible options that could be pursued.

As we consider 2018, we have formed a priority list for the projects requested. These are as follows:

- 1. InCar Video Storage
- 2. Investigative Computer Hardware/Software
- 3. Forensics Server
- 4. Building Improvements
- 5. Light Bar Replacement Project

As highlighted through our priority list, technology continues to drive significant needs for capital improvements. In particular, as State and City requirements related to records retention intersect with expanding technology, particularly in relation to video, storage needs will continue to increase. In addition, improvements in investigative software, necessitates regular upgrades of systems utilized in crime analysis and other investigations. This is why our priorities are heavily focused in these areas.

The Light Bar Replacement Project is necessary in order to ensure visibility of squad cars and sufficient functioning of required safety equipment. As always, the Building Improvement program is developed in conjunction with Facilities Maintenance staff, and includes projects necessary to maintain the four District Stations, the Training Center and space in the CCB. The proposal also includes a schedule to improve energy efficiencies and replace furnishings and major facility equipment as needed.

What is the planned schedule for the project?

2018	2019	2020		2021	2022	2023
Construction	\checkmark	Construction	\vee	\vee	\checkmark	\vee

Project Justification

Is the proposed project the replacement of an existing asset or the construction of a new asset?

New Asset Existing Asset

Is this project called for in an approved master plan?

○ Yes

No

What is the desired outcome of the proposed project?

The desire outcome of this project is to improve the ability to investigate and solve crime by detailed analysis of data obtained from various sources. PenLink, an investigative cell phone analysis database will link phone numbers and information from various cases and incidents, thereby ensuring that all possible leads are thoroughly investigated. The additional server will provide sufficient storage space to maintain cell phone data as evidence.

How will this outcome be measured?

This outcome will be measured by the improvements in software/hardware that will enable investigators and crime analysts to produce more investigative evidence in greater details, along with the number of investigations/criminal cases worked and staff time for data analysis. Another outcome for measurement will be the amount of terabtyes of storage space available.

Operatina Costs

Will the proposed project result in operational efficiencies and/or savings? Please Explain.

There are anticipated operational efficiencies due to the fact that Police personnel will no longer have to manually analyze certain cell phone data. There are however no anticipated savings. New hardware and software would only provide more detailed information to be utilized for investigation and crime analysis along with more storage space.

Include the number of newly created positions required by the project. rrating cost associated with this project includes any annual licenses or maintena	nce fees
rating cost associated with this project includes any annual licenses or maintena	nce fees

Service Level

What are the end products (asset or infrastructure type) provided by this program?

End Product	Product Unit	# of Units Provided
Building	Square Feet	77,114

■ Insert End Product

On average, what is the standard useful life for assets maintained by this program?

10 to 25 years

Is the City currently on track for meeting this standard?

O Yes

No

If not, please provide an explanation

Re-evaluation of certain repairs or replacement for certain districts have been continually pushed out of the capital budget resulting in more repairs needing to the district rather than allowing for complete remodel in the future.

Program Goals

What is the program's desired outcome for the customer?

The desired outcome of this program is to maintain and improve the quality of the five Police District Stations and the Police Training Center. In order to provide an acceptable and functional work space along with an inviting facility for various community meetings and other public involvement, facilities maintenance staffs have provided an ongoing replacement cycle for all the mechanicals, carpet, paint, roofs, parking lots, and other equipment and furnishing replacement as needed. These various planned and miscellaneous minor projects, equipment and furnishing replacement will also ensure and address any concerns relating to optical energy efficiency and maintenance of the five district stations and training center.

How is the outcome currently being measured?

- 1. Equipment and/or mechanicals in these facilities function at an optimal level with minimum need for repair and/or unplanned replacement.
- 2. Energy guidelines are met or exceeded.

Operating Costs

What are the ongoing operating costs associated with proposed projects within the program?

The ongoing building maintenance/improvement operating costs associated with these proposed projects within the program are already included in the police operating budget.

Matching Funds

Have matching funds been secured for any projects within the program?

O Yes

No
