### Project Overview

Project	Sustainability Improvements	Project #	10563
Citywide Element	Green and Resilient	Project Type	Program

#### Project Description

This program is for implementation of the City of Madison's sustainability and climate resilience projects. This program's goals include: (1) reaching the City's goal of 100% renewable energy and net zero carbon emissions for City operations by 2030 and communitywide by 2050; (2) improving the City's resilience to the direct and indirect impacts of climate change; (3) and reducing the City's overall environmental impact, all while centering equity and environmental justice. Projects funded in this program are included in the City's Sustainability Plan, recommendations of the 100% Renewable Madison Report, and the Climate Forward agenda. Projects planned for 2023 include advancing renewable energy through the MadiSUN program and purchasing Renewable Energy Credits (RECs), improving building energy efficiency through the Commercial Building Energy Savings initiative and initiatives to electrify building systems, reduce waste going to the landfill, and to advance resilience to extreme heat events.
