

STEM FAIR

EXPLORE: SCIENCE, TECHNOLOGY, ENGINEERING AND MATH

PROVIDED BY THE STAFF OF NAVIGANT*

Spend your morning having fun exercising your mind!

- Visit **"Up in the Air"** to see how scientific principles can move objects in exciting ways .
- Experience the wonder of robotics through a **Lego Robotics** demonstration.
- Discover the **"Science of Goo"** while learning about properties of fluids through this hands-on experience.
- Explore the **"Science of Poo"** by dissecting an owl pellet to learn about food chains, what owls eat, and how all life in the forest is interrelated.
- See how to **create a battery using food** and use it to power a light bulb,
- We use electricity everyday, but it is also dangerous. Learn why it is important to only **use electricity safely** by seeing what it can do to our bodies if used incorrectly. This will be demonstrated by using electricity to **cook a hotdog**. Feel free to try a bite, too!

There will be **other opportunities** as well to investigate Science, Technology, Engineering and Math. **Geared towards kids ages 5-10.**

**SATURDAY, APRIL 27, 9:00 AM – NOON
AT VERONA PUBLIC LIBRARY, 500 SILENT STREET**
