## Equity • Public Health • Sustainability • Adaptability

Madison Parks continues to follow the four guiding lenses of equity, public health, adaptability and sustainability, as identified in the [2018-2023 Park and Open Space Plan](#). The Parks and Open Space Plan serves as a guide to prioritize strategies across the park system and incorporated into our daily work. Through analyses and data, the 2022 Madison Parks Annual Report highlights this work.

Equity: The inherent worth of each individual in Madison should be esteemed and fostered, enabling them to reach full potential.

Public Health: The access and contribution to mental and physical health of a community.

Sustainability: Management of resources to promote welfare and equity for current and future generations.

Adaptability: Preparedness and ability to respond to and recover from hazards and threats with minimal damage to safety, health, security, and the economy.
