RE: Approval of a demolition permit for a commercial building at 2502 E. Washington Avenue (for Assumption Greek Orthodox Church).

Dear Mr. Fafalios:

The Plan Commission, meeting in regular session on June 19, 2006 determined that the ordinance standards could be met and **approved** your request for a demolition permit to allow a commercial building located at 2502 E. Washington Avenue to be razed and a parking lot constructed, subject to the conditions below. In order to receive final approval of the demolition permit, the following conditions must be met:

Please contact Kathy Voeck, the Assistant Zoning Administrator, at (608) 266-4551 if you have questions regarding the following five items:

1. This lot shall be combined with the 11 N. Seventh Street (church) property with the City Assessor's Office.
2. Meet all applicable State accessible requirements, including but not limited to:
 - a.) Provide a minimum of one accessible stall striped per State requirements. A minimum of one stalls shall be a van accessible stall 8' wide with an 8' striped out area adjacent.
 - b.) Show signage at the head of the stall. Accessible signs shall be a minimum of 60 inches between the bottom of the sign and the ground.
 - c.) Show the accessible path from the stalls to the building. The stall shall be as near the accessible entrance as possible. Show ramps, curbs, or wheel stops where required.
3. Provide two bike parking stalls in a safe and convenient location on an impervious surface to be shown on the final plan. The lockable enclosed lockers or racks or equivalent structures in or upon which the bicycle may be locked by the user shall be securely anchored to the ground or building to prevent the lockers or racks from being removed from the location. NOTE: A bike-parking stall is two feet by six feet with a five-foot access area. Structures that require a user-supplied locking device shall be designed to accommodate U-shaped locking devices.
4. Provide a detailed landscape plan. Show species and sizes of landscape elements. Provide a landscape worksheet with the final plans that shows that the landscaping provided meets the point and required tree ordinances. In order to count toward required points, the landscaping shall be within 15 and 20 feet of the parking lot depending on the type of landscape element. (Note: The required trees do not count toward the landscape point total.)

5. Lighting is not required. However, if it is provided, it must comply with City of Madison outdoor lighting standards. (See parking lot packet). Lighting will be limited to .08 watts per square foot.

Please contact Janet Gebert, City Engineering, at (608) 266-4751 if you have questions regarding the following nine items:

6. The developer shall coordinate their project with the East Washington Avenue Reconstruction Project and the Seventh Street Reconstruction Project.
7. That the applicant close all abandoned driveways by restoring the terrace with grass.
8. The applicant's project requires the minor restoration of the street and sidewalk. The applicant shall obtain a Street Excavation Permit for the street restoration work, which is available from the City Engineering Division. The applicant shall pay all fees associated with the permit including inspection fees.
9. The applicant shall replace all sidewalk and curb and gutter abutting the property that is damaged by the construction or any sidewalk and curb and gutter that the City Engineer determines needs to be replaced because it is not at a desirable grade regardless of whether the condition existed prior to beginning construction.
10. A City licensed contractor shall perform all work in the public right of way.
11. The applicant shall demonstrate compliance with Section 37.07 and 37.08 of the Madison General Ordinances regarding permissible soil loss rates. The erosion control plan shall include Universal Soil Loss Equation (USLE) computations for the construction period. Measures shall be implemented in order to maintain a soil loss rate below 7.5-tons per acre per year.
12. The Applicant shall submit, prior to plan sign-off, digital CAD files to the Land Records Coordinator in the Engineering Division (Lori Zenchenko). The digital copies shall be drawn to scale and represent final construction, including: building footprints, internal walkway areas, internal site parking areas, other miscellaneous impervious areas.
13. Prior to approval of the conditional use application, the owner shall obtain a permit to plug each existing sanitary sewer lateral that serves a building that is proposed for demolition. For each lateral to be plugged the owner shall deposit \$1,000 with the City Engineer in two separate checks in the following amounts: (1) \$100 non-refundable deposit for the cost of inspection of the plugging by City staff; and (2) \$900 for the cost of City crews to perform the plugging. If the owner elects to complete the plugging of a lateral by private contractor and the plugging is inspected and approved by the City Engineer, the \$900 fee shall be refunded to the owner.
14. The applicant shall obtain all necessary sewer connection permits and sewer plugging permits prior to any utility work.

Please contact John Leach, Traffic Engineering, at (608) 267-8755 if you have questions about the following eight items:

15. When the applicant submits final plans for approval, the applicant shall show the following: items in the terrace as existing (e.g., signs and street light poles), type of surfaces, existing property lines, one contiguous plan (showing all easements, all pavement markings, building placement, and stalls), adjacent driveway approaches and across the street, signage, percent of slope, vehicle routes, dimensions of radii, aisles, driveways, stalls including the two (2) feet overhang, and a scaled drawing at 1" = 20'.

16. All directional/regulatory signage and pavement markings on the site shall be shown and noted on the plan.
17. The intersection shall be so designed so as not to violate the City's sight-triangle preservation requirement which states that on a corner lot no structure, screening, or embankment of any kind shall be erected, placed, maintained or grown between the heights of 30 inches and 10 feet above the curb level or its equivalent within the triangle space formed by the two intersecting street lines or their projections and a line joining points on such street lines located a minimum of 25 feet from the street intersection in order to provide adequate vehicular vision clearance.
18. The applicant shall show the dimensions for existing and proposed parking stalls items A, B, C, D, E, and F, and for ninety-degree angle parking with nine-foot or ten-foot wide stalls and backing up, according to Figures II "Medium and Large Vehicles" parking design standards in Section 10.08(6)(b) 2.
19. The driveway proposed N. Seventh Street approach shall have a 5-foot flare at the driveways to be revised for the 24-foot approach.
20. All existing driveway approaches on which are to be abandoned shall be removed and replaced with curb and gutter and noted on the plan.
21. The developer shall post a deposit and reimburse the City for all costs associated with any modifications to traffic signals, street lighting, signing and pavement marking, and conduit and handholes, including labor, engineering and materials for both temporary and permanent installations.
22. Public signing and marking related to the development may be required by the City Traffic Engineer for which the developer shall be financially responsible.

Please contact my office at (608) 261-9632 if you have questions about the following item:

23. That the plans be revised to specifically identify that a **four**-foot tall fence will be erected along the property lines.

Please now follow the procedures listed below for obtaining your demolition permit:

1. Final approval by the Urban Design Commission of the final detailed development plan for the parking lot and landscaping will be required prior to beginning construction of the new parking lot (but not for the demolition and site remediation).
2. Please revise your plans per the above and submit *seven (7) copies* of a complete plan set to the Zoning Administrator for final review and comment. Also be sure to include any additional materials requested by these departments for their approval prior to sign off.
3. This letter shall be signed by the applicant to acknowledge the conditions of approval and returned to the Zoning Administrator when requesting demolition and/or building permit approval.
4. No alteration of this proposal shall be permitted unless approved by the Plan Commission, provided, however, the Zoning Administrator may issue permits for minor alterations. This approval shall become null and void one year after the date of the Plan Commission unless the use is commenced, construction is under way, or a valid building permit is issued and construction commenced within six months of the issuance of said building permit. The Plan Commission shall retain jurisdiction over this matter for the purpose of resolving complaints against the approved demolition permit.

2502 E. Washington Ave.

If you have any questions regarding obtaining your demolition or building permits, please contact the Zoning Administrator at (608) 266-4551. If you have any questions or if may be of any further assistance, please do not hesitate to contact my office at (608) 261-9632.

Sincerely,

Timothy M. Parks
Planner

I hereby acknowledge that I understand and will comply with the above conditions of approval for this demolition permit.
