Dear Mr. Krakora:

At its August 26, 2013 meeting, the Plan Commission found the standards met and **approved** your conditional use application for 1634 Baker Avenue, subject to the conditions below. In order to receive final approval of the conditional use, and for any necessary permits to be issued for your project, the following conditions shall be met:

Please contact my office at 266-5974 if you have questions regarding the following item:

1. The use of the accessory structure as a home-based business shall be limited to use as a photography studio unless further reviewed by the Plan Commission.

Please contact Janet Dailey of the City Engineering Division at 261-9688 if you have questions regarding the following 10 items:

2. The address of the new stand-alone studio building is 1632 Baker Avenue.
3. There shall be no private site improvements or landscaping placed within the public sanitary sewer easement that interfere with the ability for public maintenance of the sanitary facilities in any way.
4. Applicant is advised that the public lands adjacent to the proposed studio are heavily wooded and unmaintained. Applicant may need to trim overhanging trees to build within 10-feet of the public lands.
5. Each building shall have a separate sanitary sewer lateral.

8. The site plan shall include a full and complete legal description of the site or property being subjected to this application.
9. The plan set shall be revised to show more information on proposed drainage for the site. This shall be accomplished by using spot elevations and drainage arrows or through the use of proposed contours. It is necessary to show the location of drainage leaving the site to the public right-of-way. It may be necessary to provide information off the site to fully meet this requirement (POLICY).
10. The Applicant shall submit, prior to plan sign-off, a digital CAD file (single file) to the Engineering Program Specialist in the Engineering Division (Lori Zenchenko). The digital CAD file shall be to scale and represent

final construction. The single CAD file submittal can be either AutoCAD (dwg) Version 2001 or older, MicroStation (dgn) Version J or older, or Universal (dxf) format and contain only the following data, each on a separate layer name/level number:
