

Reminder of Public Meeting

***** Thursday, Feb. 21, 2013 @ 6:00 p.m. @ Warner Park *****
Well 7 Iron and Manganese Filter Const.

Well 7 (1613 N. Sherman Avenue, next to Shabazz High School) provides drinking water to parts of the Northside, Maple Bluff, and the east isthmus. We are proposing to upgrade the well with an iron and manganese filter. This will involve acquiring two adjacent houses and increasing the size of the building. A full description of the proposed project and other information is posted on the Utility website at <http://www.cityofmadison.com/water/plans/Well7.cfm>. You are invited to a public meeting to learn about the project and review proposed building options. If you are unable to attend, written comments and questions can be submitted via email to water@madisonwater.org or by US mail to MADISON WATER UTILITY, 119 E. Olin Avenue, Madison, WI 53713.

We hope you can join us!
