

Iron and Manganese Management Options Advisory Feedback Form

Rate each recommendation in the Demand Advisory by how similar it is to what you would recommend to the Water Utility Board.

	Completely similar	Generally similar	Slightly similar	Slightly different	Generally different	Completely different
1. Construct treatment facility for Well 7 at or in close proximity to the well site to reduce the levels of iron and manganese.	<input type="radio"/>					
2. Construct treatment facility for Well 8 at or in close proximity to the well site to reduce the levels of iron and manganese.	<input type="radio"/>					
3. Establish separate CAPs for Well 7 and 8.	<input type="radio"/>					
4. Plan for "additional room" for treatment in Well 7 & 8, should it prove necessary to add treatment facilities for the removal of volatile organic compounds VOCs	<input type="radio"/>					
5. Establish an interim or contingency plan to ensure that water from Well 7 and Well 8 is safe and acceptable for use in the period before installation of treatment facilities at each well	<input type="radio"/>					
6. Plan for "emerging contaminants" such as Chromium 6 (Hexavalent Chromium) with the goal of becoming proactive in the study and treatment of newly identified contaminants and the provision of full and accurate information to Madison water users.	<input type="radio"/>					
7. Schedule these projects as soon as practicable and in conformance with the financial ability of the Utility.	<input type="radio"/>					

8. If the CAP's recommendations are not 'Completely' or 'Generally' similar to what you would recommend to the Board, what would *you* recommend to the board? (Feel free to continue writing on the back of this sheet if needed.)
